Dear Council

I have received FOIA data from COV for GPS tracking Devices installed in City Owned Vehicles January - October 2024

I have processed the Data to find Excessive Speed Events and have Mapped them to their GPS coordinates.
(I am a retired IT professional and Geologist)

The Map consists of 1960 GPS tracking Points of speed in excess of 67 MPH January - October 2024

I have withheld showing Vehicle ID on the Map

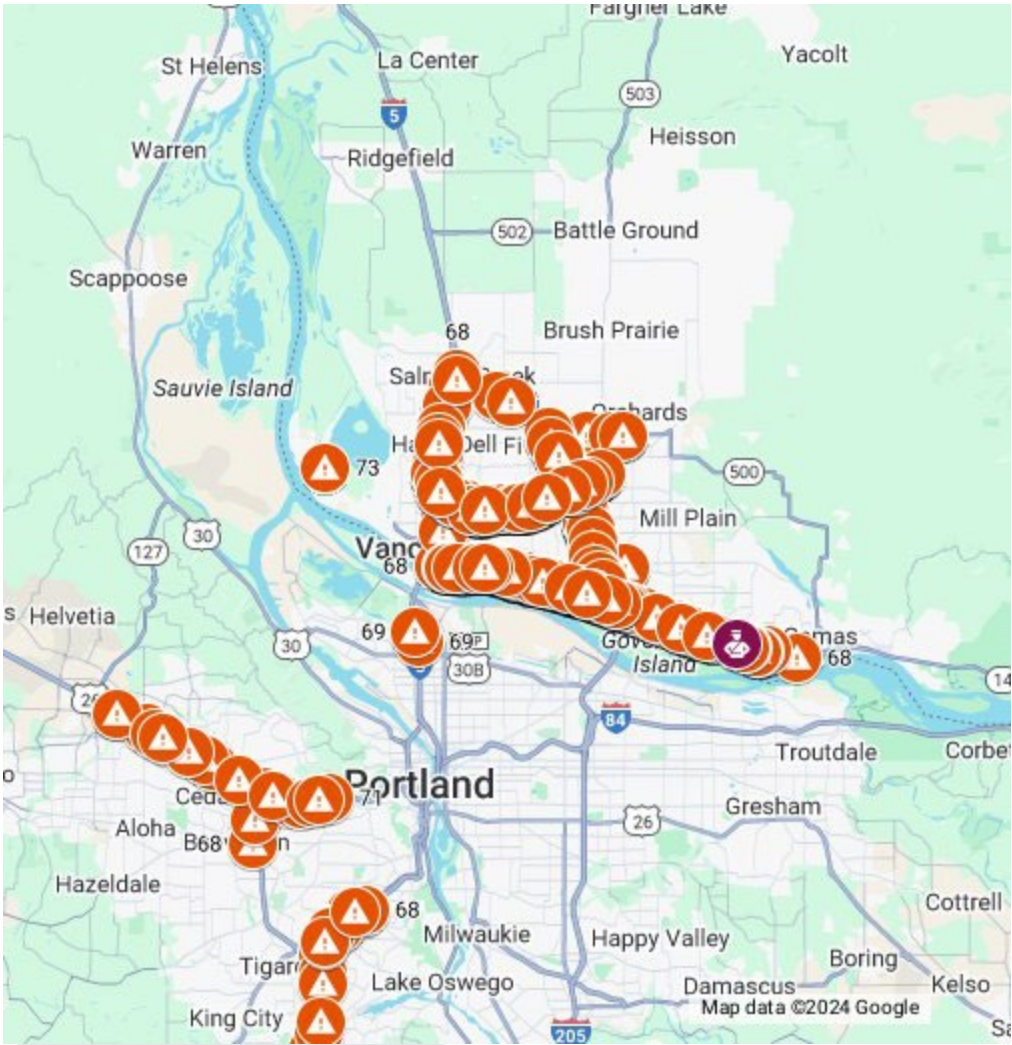

Please have People driving City Owned Vechicles slow down to increase Public Safety, Reduce the \$\$\$ Spent on Gas/Diesel and Help with Climate Change by Reducing CO2 Emissions Etc.

Thanks Peter Bracchi

Please send any questions to my Email [REDACTED]

The City "Ended" a Six Year Pilot program and informed Employees that GPS Monitors will be installed in all vehicles.

What were the Benefits and Cost of the Pilot program? Was Council aware of this program.

WA law does allow monitors to be installed in Owned business vehicles without consent of the users of those vehicles.

In September I did a FOIA request for Text Messages for select COV Employees
One Text Message I received was a Request for Installation of a Vehicle GPS Tracker Installation. I then did a FOIA for GPS Tracking Data.

Tracking Data
08/08/2022: FOIA Request for Fleet GPS
10/29/22: Data Goes Out to Potter
11/17/22: message goes out with 8 Year Pilot Program Ending - will install in all vehicles
11/18/22: Request GPS for all 2022 Jan 6th
11/18/22: Data goes out for VPD on 11/18/22

ANDREWS IM MESSAGES - 000060

From: Potter, Brian <Brian.Potter@cityofvancouver.us>
Sent time: 08/23/2024 10:47:29 AM
To: Andrews, Sheila <Sheila.Andrews@cityofvancouver.us>

Remind me of the vehicle number Nicole and Susan are driving? I'd like to schedule some time next week for their vehicle to have a GPS device installed so you can monitor their driving patterns, but so we also know where to locate them if anything was to ever go sideways.

TO: City Staff
FROM: Tim Buck, Operations Division Manager
RE: GPS Implementation
CC: Union Representative of AFSCME, OPEIU, Teamsters, IAM, UA Plumbers & Steamfitters,

For the last several years the Operations department of Public Works has been using Global Positions Systems (GPS) as a pilot in a number of operational departments and with City building inspectors and code enforcement departments.

The use of GPS provided numerous benefits and utility as we continue to enhance our efficiency, productivity and service to the public. Therefore the City plans to move this program from a pilot and implement GPS City wide with all fleet vehicles with the exception of public safety (police and fire).

- The intended use and advantages of GPS more clearly, including but not limited to:
- Protect City and employee from tort claims, and other claims of wrongdoing
 - Manage equipment more efficiently
 - Improve diagnostic and repair capabilities
 - Save on fuel, repairs, maintenance and replacement costs due to mileage reductions
 - Dispatch the right equipment to the right place as quickly as possible
 - Improve upon and document vehicle routing
 - Improve driver safety
 - Respond to emergencies involving our employees

GPS is not intended to create onerous oversight of employees. GPS will not be used as a sole source of information for discipline, but if warranted, can be used as a supporting tool within our standard investigative process.

As a reminder, it is a violation of City Policy 403. Motor Vehicle Usage for any modifications to be made to a City vehicle without the prior consent of the department manager. This would include deactivating the GPS device, any tampering with the GPS device, or otherwise attempting to inhibit the operability of the GPS device.

Beginning December, 2024, fleet services will begin installing GPS devices into vehicles.

Buck, Tim

To DL, City PUBLIC WORKS, Walters, Nicole

GPS Update Memo (002)_Final_11_7_24.pdf

183 KB

Dear Public Works staff,

With support from the Public Works Director, I am attaching this memorandum showing the City's intent to expand our Global Positioning Systems (GPS) to all city fleet vehicles with the exception of public safety. We have been operating a GPS pilot program since 2016 within user groups including, Public Works Operations, building inspections and Code Enforcement. Fleet Services will begin installing devices in December, 2024.

The integration of fleet GPS will help:

- Protect City and employees from tort claims and other claims of wrongdoing
- Manage equipment more efficiently
- Improve diagnostic and repair capabilities
- Save on fuel, repairs, maintenance, and replacement costs due to mileage reductions
- Dispatch the right equipment to the right place as quickly as possible
- Improve upon and document vehicle routing
- Improve driver safety
- Respond faster to emergencies involving our employees

Re: n forwarded message

From: PETER BRACCHI
Subject: Council 11/25 Excess Speed - COV Employees speeding in City Vehicles
Date: November 20, 2022 at 05:17 PM PST
or: counci1@cityofvancouver.us
Cc: cmo@cityofvancouver.us

Dear Council:

I have received FOIA data from COV for GPS tracking data for City-Owned Vehicles January - October 2022.

I have processed the data to find Excess Speed Events and have mapped them to their GPS coordinates. (I am a retired IT professional and Geologist.)

The map consists of 1988 GPS tracking points of speed in excess of 67 MPH January - October 2022.

I have withheld showing vehicle IDs on the map.

Please have people driving City-Owned Vehicles slow down to increase Public Safety. Reduce the \$55 spent on Gas/Oil and Help with Climate Change by Reducing CO2 Emissions Etc.

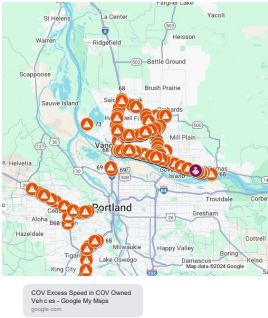

Thanks Peter Bracchi

Please send any questions to my Email: [redacted]

Good morning!

I wanted to share this important update with you - **The Florida Surgeon General Advises Communities to End Fluoridation and refers to Fluoridation as public health malpractice**, following the September 24th, 2024 court ruling which stated:
“The Court finds that fluoridation of water at 0.7 milligrams per liter (“mg/L”) – the level presently considered “optimal” in the United States – poses an unreasonable risk of reduced IQ in children... “In all, there is substantial and scientifically credible evidence establishing that fluoride poses a risk to human health; it is associated with a reduction in the IQ of children and is hazardous at dosages that are far too close to fluoride levels in the drinking water of the United States...Reduced IQ poses serious harm. Studies have linked IQ decrements of even one or two points to, e.g., reduced educational attainment, employment status, productivity, and earned wages.”

Given these latest developments, would you be in support of a formal re-evaluation of Vancouver's water fluoridation program to ensure the City of Vancouver is doing everything in its power to protect its citizens from harm?

Florida Surgeon General Advises Communities to End Fluoridation

Florida's State Surgeon General, Joseph Ladapo, MD, PhD, held a press conference on Friday, November 22nd to announce that his office is advising all communities within the state to stop adding fluoridation chemicals to the public drinking water due to the neurotoxic risk the practice poses to the developing brain. Dr. Ladapo has both a medical degree and a PhD in health policy from Harvard and is a professor of medicine at the University of Florida, where his focus is on reducing health risks for low-income and disadvantaged populations.

He was joined at the press conference by Florida dentist Claire Stagg, DDS, MS, and Ashley Malin, PhD, an assistant professor in the department of epidemiology at the University of Florida's College of Public Health. Dr. Malin was the lead author of a [study published in May](#) in the *Journal of the American Medical Association* (JAMA) that found that children of mothers living in fluoridated Los Angeles, California had double the odds of several neurobehavioral problems compared to mothers with lower fluoride exposures. Funding for the study was provided by the National Institutes of Health (NIH) and the US Environmental Protection Agency (EPA), and it was the [10th consecutive NIH-funded study](#) in humans finding adverse effects of fluoride on children's developing brains.

Dr. Ladapo credited the Fluoride Action Network's (FAN) [recent victory in federal court](#) and the judge's ruling that water fluoridation "poses an unreasonable risk to human health" for bringing the issue to his attention. This led Dr. Ladapo to investigate the science further, including the [National Toxicology Program's systematic review](#), published in August, which found that there is consistent, substantial, and high-quality evidence from diverse birth cohort groups in 5 different countries confirming that fluoride is comparable to lead in its ability to lower IQ and impair brain development in children.

During the press conference, Dr. Ladapo explained that for much of his career he "supported this practice," but after reviewing the science, he "was appalled" by the amount of evidence showing "that fluoride is neurotoxic" and the evidence of side-effects having "been in the [scientific] literature for many years."

Dr. Ladapo provided the following advisory:

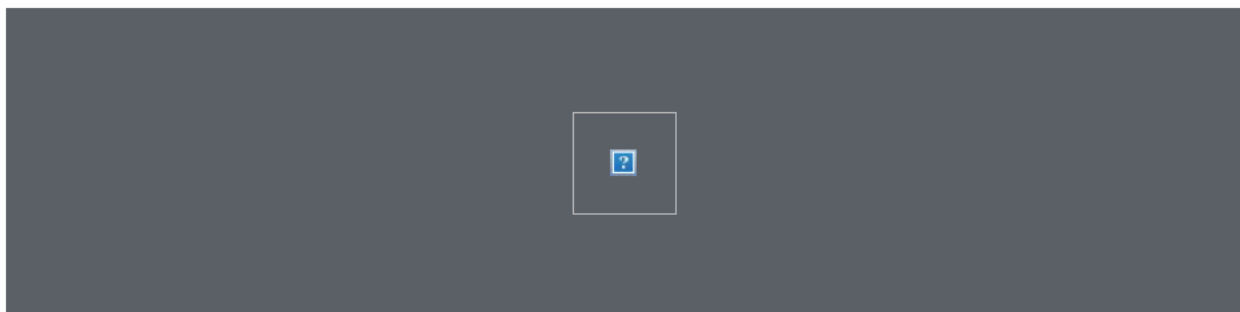

"**Fluoridation is public health malpractice**, and so we are issuing guidance to every community, every municipality, every county in Florida to stop adding fluoride to their community water systems. And I will tell you that the data that we have, the studies that we have, primarily are focused on pregnant women and children, those are clearly the most sensitive and vulnerable populations for fluoridation in terms of these adverse neuropsychiatric effects. But I personally, in my family, we've pulled back in terms of sources of fluoride because we're concerned about the effects in adults also."

He went on to directly counter misinformation being spread by the American Dental Association (ADA) and other pro-fluoridation special interest groups:

"So the typical criticism has been that these studies were in countries like China or India where, say the naturally occurring amounts of fluoride are much higher than what we have here in the United States. Well, it turns out that in fact that wasn't true. So in the last five or six years there have been several studies that have been published, Dr. Malin has actually published some of these studies, in communities in Canada, also in the United States, where levels of fluoride are actually quite similar to the levels that we have here in this state and in this country. And these studies have actually found the same findings – that moms and children exposed to higher levels of fluoride have experienced adverse neurologic and neuropsychiatric effects."

His office has [provided formal guidance](#) for citizens, decision makers, and water treatment employees to better understand his office's recommendation, and will provide a tool on their website so Florida residents can look up their address to determine whether fluoridation chemicals are added to their water.

Dr. Ladapo's announcement was followed by a statement from Dr. Malin, who said:

"Now I first want to say that although this issue has become politicized recently, I really don't view this as a political issue. I view this as a human rights issue and a public health issue and one that is separate from other public health issues that are currently being highlighted in the media and political sphere. As Dr. Ladapo mentioned, in the last seven years there have been numerous high-quality, rigorously conducted, prospective pregnancy and birth cohort studies in North America showing that chronic, relatively low prenatal fluoride exposure levels are associated with poor neurodevelopmental outcomes, including reduced IQ, more symptoms of ADHD, and declines in executive function. While these studies have been conducted among populations based in Canada and Mexico, the fluoride concentrations that these pregnant women were exposed to are similar to those encountered among pregnant women in fluoridated US communities.

In September a federal judge in San Francisco made a ruling in the fluoride trial against the EPA that stated that fluoride and drinking water at the current recommended level of .7 milligrams per liter poses an unreasonable risk of hazard to child IQ because there is not enough of a margin of safety between the hazard level and the exposure level that is added to community drinking water. The ruling stated that the EPA's default is for there to be a factor of 10 between the hazard level and exposure level due to variability in human sensitivities. Based on the NTP's report, the hazard to child IQ exists at 1.5 milligrams per liter. Therefore, according to the EPA standard, the exposure level for fluoride in community drinking water would need to be set at 0.15 milligrams per liter or lower to create enough of a margin of safety to protect child IQ."

Dr. Malin's statement was followed by a brief statement from Dr. Stagg and a Q&A session.

The Fluoride Action Network applauds the actions of Dr. Ladapo, Dr. Malin, and Dr. Stagg, and we echo Dr. Ladapo's sentiments when he said, "I can't imagine why anyone who was a leader in a community would not want to reduce the amount of fluoride while promoting dental health through other methods. I just can't understand why someone would not reach that conclusion."

FAN is currently working with state-level decision makers around the country to keep this momentum moving forward towards drinking water policy that protects all residents, including the fetus and infants. Please share this advisory with your local and state officials.

A transcript of the entire press conference and Q&A, along with shorter video clips, can be [viewed on the FAN website](#).
