

City Council Meeting Minutes

Vancouver City Hall | Council Chambers | 415 W. 6th St.
PO Box 1995 | Vancouver, WA 98668-1995
cityofvancouver.us

Anne McEnergy-Ogle, Mayor • Bart Hansen • Ty Stober • Erik Paulsen • Sarah J. Fox • Diana H. Perez • Kim D. Harless

April 28, 2025

Workshops: 4:15-6:00 p.m.

Vancouver City Hall - Council Chambers - 415 W 6th Street, Vancouver WA

The City Council Meeting was held on 4/28/2025 at 4:15 PM in the Vancouver City Hall, Council Chambers 415 West 6th Street, Vancouver, WA 98660.

Workshops were conducted in person in the Council Chambers of City Hall. Members of the public were invited to view the meeting in person, via the live broadcast on www.cvtv.org and CVTV cable channels 23 or HD 323, or on the City's Facebook page, or www.facebook.com/VancouverUS.

View the CVTV video recording, including presentations and discussion, for workshops at: https://www.cvtv.org/vid_link/37863?startStreamAt=0&stopStreamAt=6715

Vancouver Downtown Design Guidelines Update

(Approximately 45 minutes)

Jason Nortz, Development Review Manager, jason.nortz@cityofvancouver.us

Staff led Council through a discussion of the Vancouver Downtown Design Guidelines Update.

***Councilmember Perez was absent from the workshop.
Councilmember Hansen joined the workshop remotely.***

Districting Survey Results

(Approximately 1 hour, to immediately follow the previous workshop)

Aaron Lande, Program and Policy Development Manager,
aaron.lande@cityofvancouver.us

Staff led Council through a discussion of the Districting Survey Results.

***Councilmember Perez was late to the workshop.
Councilmembers Hansen and Perez joined the workshop remotely.***

Council Dinner / Administrative Updates (6:00 - 6:30 PM)

Regular Council Meeting

6:30 PM

Vancouver City Hall - Council Chambers - 415 W 6th Street, Vancouver WA

This meeting was conducted as a hybrid meeting with in person and remote viewing and participation over video conference utilizing a GoToMeeting platform. Members of the public were invited to view the meeting in person, via the live broadcast on www.cvtv.org and CVTV cable channels 23 or HD 323, or on the City's Facebook page, www.facebook.com/VancouverUS. Public access and testimony on Consent Agenda items and under the Community Forum were also facilitated in person and via the GoToMeeting conference call.

Vancouver City Council meeting minutes are a record of the action taken by Council. To view the CVTV video recording, including presentations, testimony and discussion, for this meeting please visit:

[https://www.cvtv.org/vid link/37865?startStreamAt=0&stopStreamAt=5154](https://www.cvtv.org/vid_link/37865?startStreamAt=0&stopStreamAt=5154)

Electronic audio recording of City Council meetings are kept on file in the office of the City Clerk for a period of six years.

Pledge of Allegiance

Call to Order and Roll Call

The regular meeting of the Vancouver City Council was called to order at 6:30 p.m. by Mayor McEnery-Ogle. This meeting was conducted as a hybrid meeting, including both in person and remotely over video conference.

Present: Councilmember Harless, Councilmember Perez, Councilmember Fox, Councilmember Paulsen, Councilmember Stober, Councilmember Hansen, Mayor McEnery-Ogle

Absent: None

Councilmembers Hansen and Perez joined the meeting remotely.

Approval of Minutes

Minutes - April 14, 2025

Motion by Councilmember Fox, seconded by Councilmember Stober, and Yes: 6, No: 0, Abstaining: 1, to approve the April 14, 2025, meeting minutes. Councilmember Paulsen abstained.

Minutes - April 21, 2025

Motion by Councilmember Fox, seconded by Councilmember Stober, and Yes: 5, No: 0, Abstaining: 2, to approve the April 21, 2025, meeting minutes. Councilmembers Stober and Paulsen abstained.

Proclamations

National Community Development Week

Mayor McEnery-Ogle read and presented a proclamation to Ian Alger, Associate Housing Program Coordinator at City of Vancouver, proclaiming April 21-25, 2025, as National Community Development Week.

Community Communication

This is the place on the agenda where the public is invited to speak to Council regarding any matter on the Agenda not already scheduled for Public Hearing. (Separate instructions are provided for offering testimony on Public Hearing when applicable.) This includes the option to testify about Workshops. Members of the public addressing Council are requested to give their name and city of residence for the audio record. Speakers are to limit their testimony to a total of three minutes for all items combined.

Mayor McEnery-Ogle opened Community Communication and received testimony from the following community members regarding any matter on the agenda not scheduled for a Public Hearing:

- *Carmen DeLeon, Vancouver*
- *Kimberlee Goheen Elbon, La Center, WA*

There being no further testimony, Mayor McEnery-Ogle closed Community Communication.

Consent Agenda

The following items will be passed by a single motion to approve all listed actions and resolutions. There will be no discussion on these items unless requested by Council. If discussion is requested, the item will be moved from the Consent Agenda and considered separately – after the motion has been made and passed to approve the remaining items.

Council pulled item 1 for discussion.

Motion by Councilmember Stober, seconded by Councilmember Fox, and Yes: 7, No: 0, Abstaining: 0, to approve Items 2-3 on the Consent agenda.

Motion by Councilmember Fox, seconded by Councilmember Paulsen, and Yes: 7, No: 0, Abstaining: 0, to approve Item 1 on the Consent agenda.

1. Bid Award - Westside Wastewater Treatment Facility Centrifuge Replacement - ITB 25-14

Staff Report: 088-25

Request: On Monday, April 28, 2025, award a contract and authorize the City Manager, or designee, to award and execute a construction contract and any required amendments with Stellar J Corporation, of Woodland, WA for the centrifuge and solids storing mixing equipment replacement at the Westside WWTF at their bid price of \$3,403,895.28, which includes Washington State sales tax and apprenticeship utilization.

Frank Dick, Wastewater Treatment Program Manager,
frank.dick@cityofvancouver.us

Motion approved the request.

2. Purchase and Sale Agreement - 2607 NE Andresen

Staff Report: 089-25

Request: On Monday, April 28, 2025, approve the City's acquisition of the Parcel at 2607 NE Andresen Rd, Vancouver, WA 98661 pursuant to the Purchase and Sale Agreement ("PSA"), and authorize the City Manager, or designee, to finalize, issue, and execute the PSA in substantially the form attached and execute all other documents and related agreements necessary to implement the Purchase and Sale Agreement.

Chim Chune Ko, Principal Project Manager,
ChimChune.Ko@cityofvancouver.us

Motion approved the request.

3. Approval of Claim Vouchers

Request: Approve claim vouchers for April 28, 2025.

Motion approved claim vouchers in the amount of \$3,492,792.14.

Public Hearings

The following item(s) are scheduled for public hearing. Members of the public addressing Council are requested to give their name and city of residence for the audio record. Unless otherwise announced by the Presiding Officer, speakers are to limit their testimony to three minutes for each public hearing.

4. Right-of-Way Vacation - NE 65th Street

AN ORDINANCE vacating the right-of-way associated with NE 65th Street, located on the west side of NE 124th Avenue, north of NE Fourth Plain Boulevard, located within the Southeast Quarter of Section 10, Township 2 North, Range 2 East, Willamette Meridian, City of Vancouver, Clark County, Washington, described more particularly in Exhibit A; and providing for an effective date.

Staff Report: 065-25

Request: On Monday, April 28, 2025, upon second reading and a public hearing, adopt an ordinance to vacate a portion of public right-of-way associated with NE 65th Street, located within the Southeast Quarter of Section 10, Township 2 North, Range 2 East, Willamette Meridian.

Ryan Lopossa, Streets and Transportation Manager, Eric Hahn, Senior Civil Engineer, ryan.lopossa@cityofvancouver.us, eric.hahn@cityofvancouver.us

Ryan Lopossa, Streets and Transportation Manager, Eric Hahn, Senior Civil Engineer, provided an overview of the Right-of-Way Vacation - NE 65th Street.

Council discussed the item briefly with staff.

Mayor McEnerny-Ogle opened the public hearing and received testimony from the following community members:

- *Kimberlee Goheen Elbon, La Center, WA*

There being no further testimony, Mayor McEnerny-Ogle closed the public hearing.

Motion by Councilmember Paulsen, seconded by Councilmember Fox, and Yes: 0, No: 0, Abstaining: 0, to approve Ordinance M-4500.

5. HP Inc. East Master Plan

A RESOLUTION rendering findings and issuing a decision on a proposed Master Plan for the HP East Inc. ("HP") Master Plan development located within the Section 30 Subarea and providing for an effective date.

Staff Report: 090-25

Request: On Monday, April 28, 2025, approve the resolution approving the HP Section 30 East Master Plan as conditioned in the March 11, 2025, Vancouver Planning Commission Staff Report.

Mark Person, Senior Planner, mark.person@cityofvancouver.us

Mark Person, Senior Planner, provided an overview of the HP Inc. East Master Plan.

Council discussed the item briefly with staff.

Mayor McEnery-Ogle opened the public hearing and received testimony from the following community members:

- *Carmen DeLeon, Vancouver*
- *Kimberlee Goheen Elbon, La Center, WA*
- *Bruce Barnes, Vancouver, WA*

There being no further testimony, Mayor McEnery-Ogle closed the public hearing.

Motion by Councilmember Stober, seconded by Councilmember Harless, and Yes: 7, No: 0, Abstaining: 0, to approve Resolution M-4335.

Communications

A. From the Council

B. From the Mayor

C. From the City Manager

New Public Works Operations Campus Project Update Memorandum

Jason Olson, Capital Projects Project Manager, discussed the New Public Works Operations Campus Project Update Memorandum.

Community Forum

This is the place on the agenda where the public is invited to speak to Council regarding any matter. Members of the public addressing Council are requested to give their name and city of residence for the record. Speakers are to limit their testimony to a total of three minutes. Up to 90 minutes will be allotted for the Community Forum.

Mayor McEnery-Ogle opened the Community Forum and received testimony from the following community members regarding any matter:

- *Wynn Grcich, Vancouver*
- *Carmen DeLeon, Vancouver*
- *Bruce Barnes, Vancouver*
- *Eric Cox, Vancouver*

- Bill Kingsley, Vancouver
- Israel Lopez, Vancouver
- Kimberlee Goheen Elbon, La Center, WA
- Sarah Stroh, Vancouver
- Deken Letnich , Vancouver
- J.P. Laplayne, Vancouver
- Chad Capwell, Vancouver
- Minh Nguyen , Vancouver

There being no further testimony, Mayor McEnerny-Ogle closed Community Forum.

I would like to express support of changing our voting systems. A first past the post system gives 2 parties an outsized amount of power in elections. There are several voting systems that have proven better and foster more open communication among the populace, such as ranked choice voting or single transferable vote systems. Increased dialogue among the populace between people who may not agree upon issues will cause greater understanding and a more representative government. Please consider making this an agenda item in the near future.

Thank you for your time and consideration

James Wu
Resident of Hazel Dell.

HP EAST MASTER PLAN

VANCOUVER, WASHINGTON

CITY COUNCIL PUBLIC HEARING

APRIL 28, 2025

A COMMUNITY PARTNER

- HP has a deep community connection developed over its 40 years in Vancouver.
- Example of HP's commitment to community service: In 2024, HP Vancouver sent over 300 volunteers on a single day to various service projects in the community, completing over 800 volunteer hours in one morning.

MASTER PLAN EXTENT

- The City's master plan process embodies the plan for full site development.
- Infrastructure improvements include creation of a new street network, pedestrian connections, water service, sanitary sewer facilities and stormwater treatment.
- Transformation of a former mine site into an office, research and development, and other uses consistent with the ECX zoning and the HP-City of Vancouver Development Agreement.

INITIAL CONDITIONS

FROM THE SOUTHWEST CORNER OF PROPERTY LOOKING NORTHEAST

FROM SOUTHEAST CORNER OF PROPERTY LOOKING NORTHWEST

Note: Photographs taken during 2022-2023 grading activity

CURRENT CONDITIONS

HP East extent outlined in blue

AERIAL VIEW LOOKING FROM SOUTH TO NORTH

Note: Photograph taken Summer 2024

FULL SITE UTILIZATION PLAN (FSUP)

- FSUP provides an overall impression of how the development plan can flexibly respond to changing circumstances over the life of the Master Plan.
- FSUP indicates the potential placement of buildings and integral open space contemplated within each block.

LEGEND	
	HP 68 ACRES PROPERTY LINE
	FUTURE ROW LINE

CONCEPTUAL MASTER PLAN LAYOUT FOR HP PROPERTY

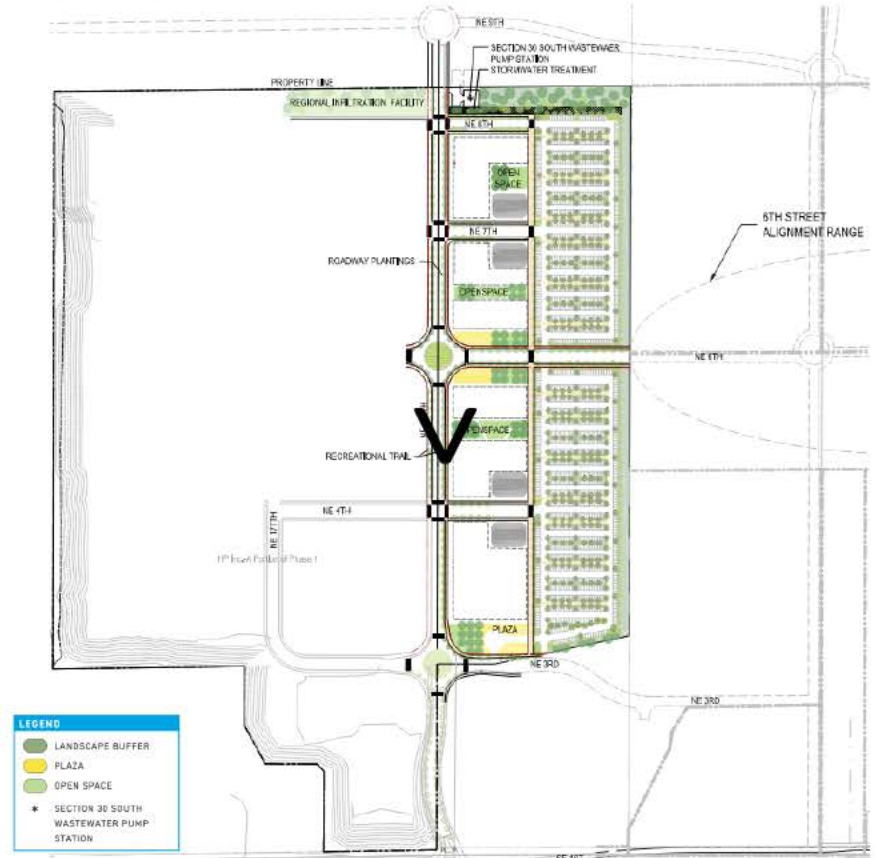

- Conceptual image of a possible configuration of building, parking, and open spaces in each block of development.
- If any buildings need to be sited in the eastern or western parking lots, they will comply with the agreed upon setbacks in the Development Agreement.
- The size and configuration of each building will be determined before each phase is submitted to the City for building permits. Until then, the building footprints shown illustrate the mix of potential buildings.

LEGEND

	FUTURE ROW LINE
	POTENTIAL BUILDING
	POTENTIAL BUILDING OR PARKING
	PARKING AREA
	SERVICE YARD
	OPEN SPACE
	STORMWATER TREATMENT AREA
	PLAZA
	EXISTING TREE
	PROPOSED FUTURE TREE

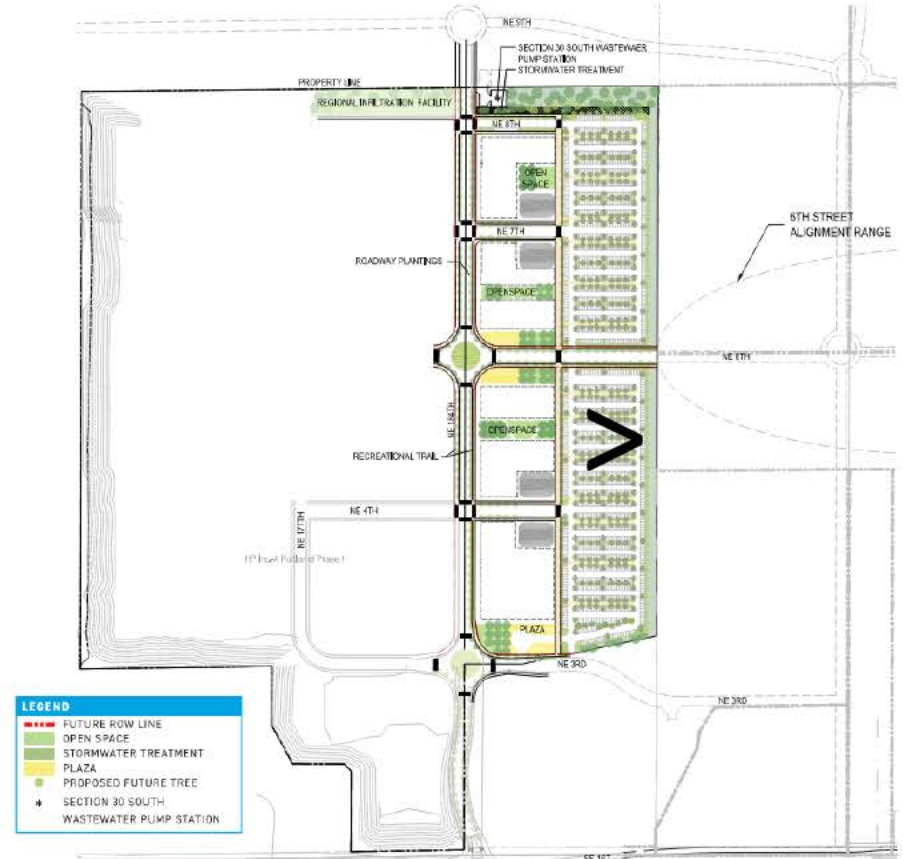

OPEN SPACE AND PLAZAS

- Buildings will be interspersed with open space and plazas providing occupants with various outdoor opportunities.
- A public recreational trail will connect the HP development to the neighborhood and other features planned for Section 30.
- Private streets and plaza areas provide pedestrian access to parking and provide visual relief to blocks.

LANDSCAPE DESIGN

- Landscape design will favor drought-tolerant native plant materials and will create an environment that encourages walking.
- Generous use of trees on streets and in parking lots will provide shade and define distinct outdoor spaces.

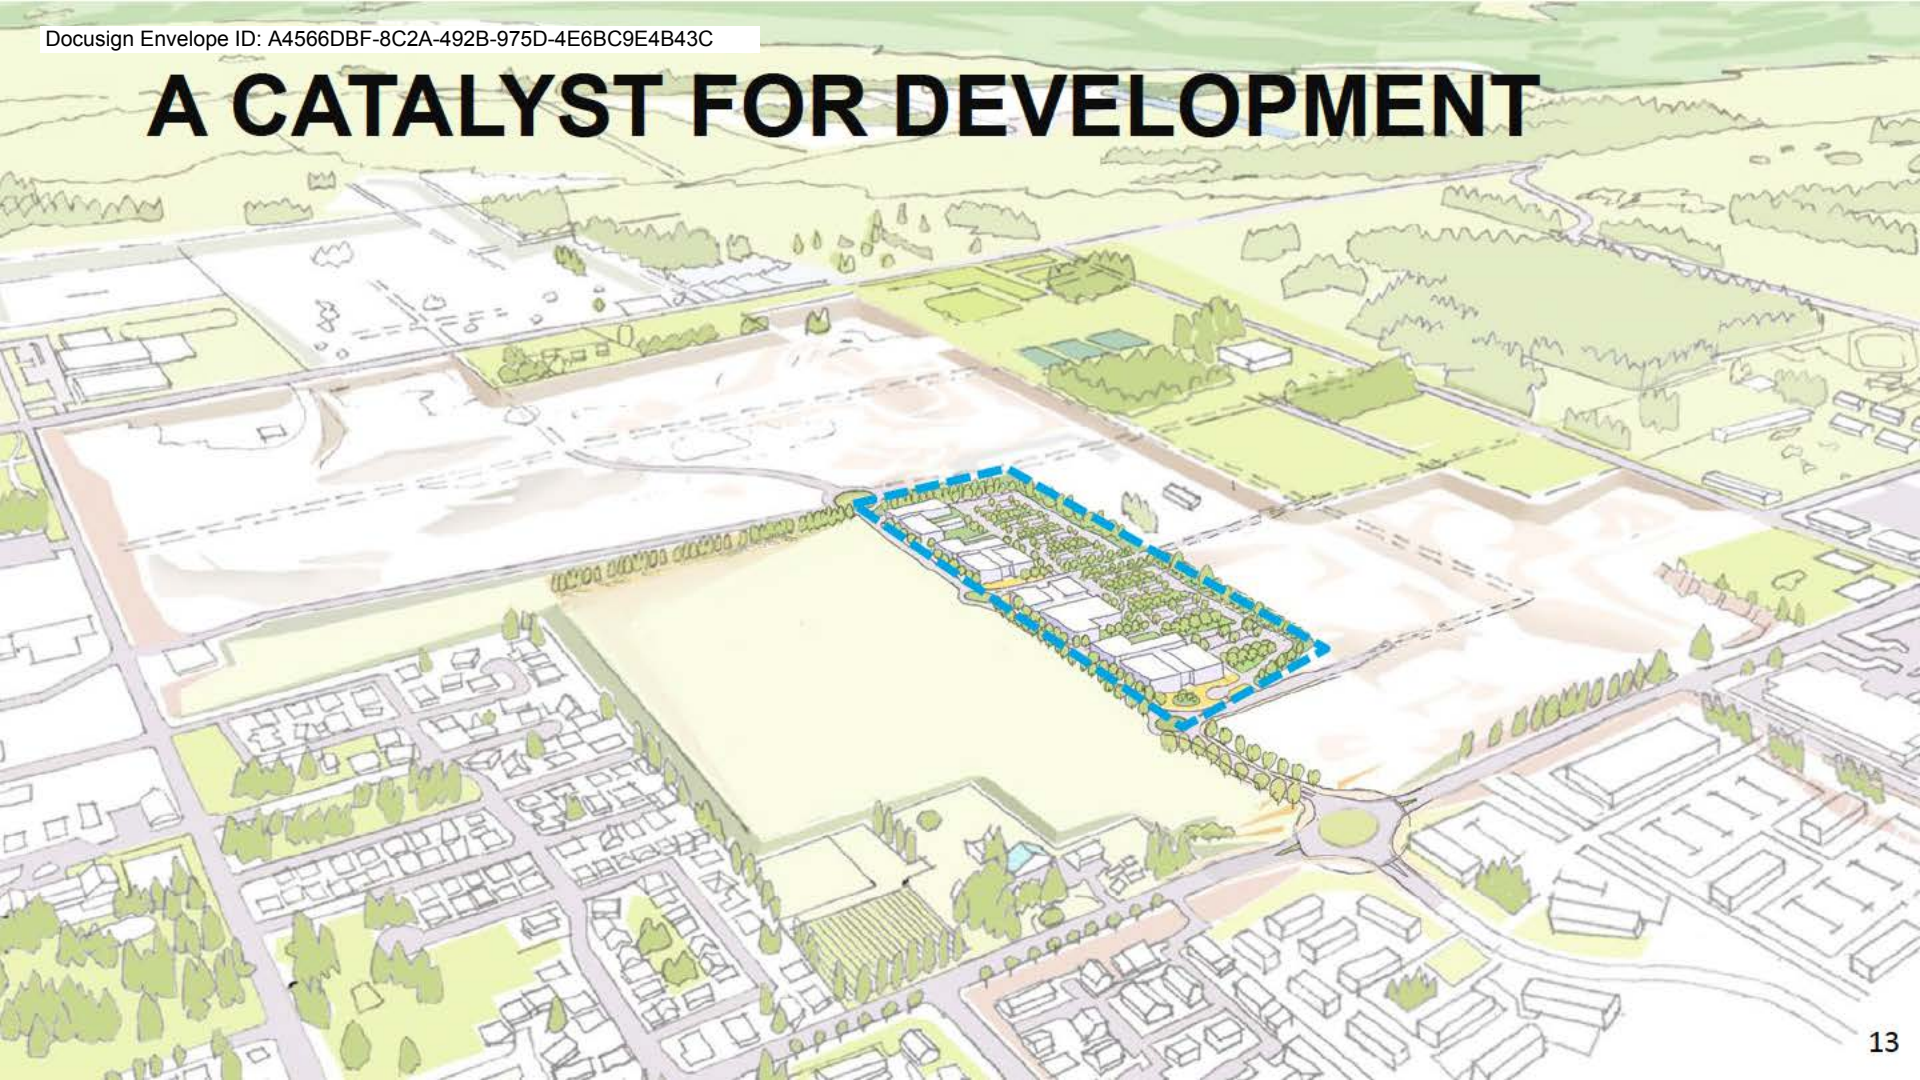

STORMWATER FACILITIES

- Each property owner in Section 30 is to manage stormwater quality on its own property prior to releasing it to a public stormwater collection facility.
- Native gravels provide the best infiltration sites, and the City will prioritize preservation of areas that still have native gravel for stormwater infiltration especially near NE 9th Street.
- The public stormwater facility on the west side of NE 184th Avenue at the northern end of the HP property will extend west as needed to accept public stormwater and may include stormwater runoff from the HP East Master Plan area.

A CATALYST FOR DEVELOPMENT

HP EAST MASTER PLAN

An aerial architectural rendering of a development site. The image shows a mix of green spaces, roads, and building footprints. A central area is highlighted with a yellow glow, suggesting a focal point or a specific development area. The rendering is detailed, showing individual buildings, parking lots, and landscaping elements like trees and walkways.

HP respectfully requests that the City Council approve the HP East Master Plan.

The Blaylock Wellness Report

Living a Long Healthy Life

Edited by Russell L. Blaylock, M.D.

September 2004

The Blaylock Wellness Report

Vol. 1, No. 4

Quick Facts

- **Studies confirm brain damage**
- **Aluminum and fluoride**
- **Water safety**
- **Increased risk for ADD, ADHD, dyslexia**
- **Fluoride's links to Alzheimer's disease, Lou Gehrig's disease**
- **Sleep problems**
- **Fluoridated drinking water and cancer**
- **Fluoride and bone cancer in young men**
- **Crippling bone disease**
- **Thyroid function**
- **Links to male infertility and impotence**
- **Myth: Teeth and fluoride toothpaste**
- **Action to take**
- **California wines**
- **Magnesium malate: Prevents aluminum absorption**

Why Fluoride Is Toxic

The primary reason fluoride began being added into drinking water years ago was to reduce cavities; the general public may not know that fluoride also can injure the nervous system and even cause cancer.

Degenerative brain diseases such as Alzheimer's are possibly linked to drinking fluoridated water. Cancer, behavioral problems, thyroid suppression, male infertility and impotence are also some examples of what may happen to the body when too much fluoride is present. And the combination of fluoride and aluminum is toxic enough that scientists warn about its connection to Parkinson's and Lou Gehrig's diseases.

Fluoride will not kill you outright or cause dementia over a short period of time. But at certain levels it will accumulate in your brain and can lead to a form of degeneration.

I lectured at the Fluoride Action Network conference on the subject of the toxic effects of water fluoridation and urged everyone to stop the government from using drinking water to medicate the public.

Fluoride and the Brain

A number of fairly recent studies have shown significant damage to many parts of the brain caused by fluoride. One study showed that rats given fluoride while still in the womb became hyperactive, much like what we see in childhood ADHD. Newborn and adult rats given fluoride reacted much differently; they became "couch potatoes."

The difference lies in how the brain develops at different ages. In humans, for example, the most rapid brain growth and development occur in the last three months of pregnancy and the first two years after birth. This means the brain is especially susceptible during that time to damage by toxins such as fluoride. Of course, results are determined by when the toxin was first given and for how long, and the dose.

Even more frightening is what one world-renowned scientist discovered: Fluoride can accumulate in the brain. With every drink of water,

the fluoride levels in the brain increase — and so does the danger to you.

The Truth About Studying Fluoride

Dr. Phyllis Mullenix, a leading neurotoxicologist, developed a sophisticated method to study behavioral patterns using a computer. She would photograph interactions of test rats given fluoride and feed the results into a computer program.

Much to her surprise, she discovered that the fluoride was causing significant behavioral problems, not only when rats were exposed in the mother's womb, but also soon after birth and even as adults. Upon examining seven areas of the animals' brains she found that the longer an animal drank fluoridated water, the higher the brain level of fluoride. She also found that a high accumulation of toxins over time reaches levels that always cause brain injury.

Critics charged Dr. Mullenix with using doses of fluoride much higher than people are commonly exposed to. But researchers should know that rats have difficulty absorbing fluoride. In comparing rats to people, the only thing that should be looked at is the blood level; the amount of fluoride in the blood determines the amount of fluoride reaching the brain.

The blood levels in Dr. Mullenix's rats equaled that seen in humans exposed to fluoride levels approved by the Environmental Protection Agency (EPA) as safe. Approved levels of fluoride in drinking water are up to 4 parts per million, or 4 ppm.

After presenting her findings to the EPA and National Institute of Dental Health, Dr. Mullenix faced great opposition from colleagues. Fellow scientists who once clamored to use her computerized system now eschewed any communication with her.

Her very expensive computerized behavioral analysis equipment was destroyed by a contrived "accident". In addition, all of her lab animals were killed and their bodies incinerated.

More Studies Confirm Brain Damage

The number of studies showing significant damage to various parts of the brain continues to grow,

most of the studies coming from Mexico, China, Japan, Spain, Italy, Ireland, Sweden, Canada and England. Very few studies come from labs in the United States, but those that do find fluoride to be very toxic to the brain.

Entities such as National Institutes of Health and National Institute of Dental Health are to blame for fewer U.S. studies as they refuse to fund fluoride safety research.

What we do know is that in China, children who drink fluoridated water have lower IQs than those who don't. Many villages and cities in China have natural fluoride levels that are high, and Chinese scientists have found a drop of 10 points in IQ in fluoridated cities.

But some challengers say these scientists didn't account for possible lead exposure, so tests were redone. The Chinese scientists made careful measurements of all factors including lead and fluoride. The end result? They found the same lowering of IQ caused by fluoride in the drinking water.

Mexican studies fared no better. An article in the journal *Epidemiology* showed that children drinking water with EPA-approved fluoride levels had problems with reading and writing.

Again, care was taken to control for factors that might adversely affect the results. In fact, urine fluoride levels were measured to prove that the greater the fluoride exposure the worse the tests results. Note that most cities set fluoride levels in drinking water well below EPA-approved levels.

The Alzheimer's Connection

What is the connection between Alzheimer's disease and fluoride? Studies show plenty. While drinking fluoridated water is not the cause of Alzheimer's, there is a link.

One study found that fluoride in the drinking water of rats caused significant reduction of a brain receptor critical for learning and memory, which are the same receptors reduced very early in Alzheimer's disease.

Scientists including Dr. Phyllis Mullenix and Dr. Albert Burgstahler, an organic chemist and editor of *Fluoride*, indicated to me yet another study showing

water were within the "safety guidelines" established by the EPA. No other causes for this damage were found.

Individuals who counter these results say there was up to 4.5 ppm of fluoride in the water, and guidelines call for only 1 ppm. I object to their finger-pointing and say it doesn't take a brain surgeon to see that this does not leave much of a margin of safety, especially when the EPA usually uses a 100-times margin of safety for such toxins.

And we have seen that fluoride accumulates in the brain, reaching levels equal to these studies. Yet most important is the fact that even their estimates found that the average person is taking in 3 ppm per day through foods, drinks and pesticide exposure. More accurate estimates found an average daily consumption of fluoride of 4 to 8 ppm.

Here's a great example of how fluoride can sneak up on you. In the South, most people drink iced tea with their meals. All teas contain very high levels of fluoride as well as aluminum. Because the summers are so hot, a large number of people are drinking large volumes of this fluoride-laden tea.

Many foods and drinks also are high in fluoride, such as de-boned meats, gelatin and American wines, especially California wines.

Pesticides, too, are a problem, because they contain cryolite, a compound containing aluminum and fluoride in high concentrations. Interestingly, workers in cryolite industrial plants have been found to have a high incidence of thinking disorders as well as genetic damage.

Fluoride and Cancer

In 1975, Dr. Dean Burk, the former chief chemist of the National Cancer Institute, and Dr. John Yiamouyiannis conducted a study comparing cancer death rates in the 10 largest fluoridated cities matched with the 10 largest non-fluoridated cities. These cities were matched for equal cancer death rates before the fluoridation experiment was begun.

They found that once cities began including fluoride in their drinking water, cancer death rates began to climb. After 13 to 17 years of fluoridation of their drinking water, these cities experienced a 10

percent increase in cancer death rates compared with the non-fluoridated cities.

The incidence of cancer would be even higher than the cancer death rates, since many people with cancer will not die of the disease during the years studied.

The Centers for Disease Control and Prevention (CDC) repeated the study using a larger number of cities and found similar results. Interestingly, both scientists proved their case in court against representatives from the National Cancer Institute.

Several other doctors found even more frightening associations between fluoridation of drinking water and cancer incidences. Dr. Donald Austin of the California Tumor Registry discovered the cancer death rates in California were 40 percent higher in fluoridated communities and Dr. Victor Ceilioni showed the cancer death rates in Canadian cities were 15 percent to 25 percent higher in fluoridated Canadian cities compared with non-fluoridated cities.

Although a heavy proponent of fluoridation, the U.S. Public Health Service discovered similar results as Drs. Austin and Ceilioni after following up its initial fluoridation program.

In the first of the fluoridated cities in the U.S. — Grand Rapids, Michigan — the Public Health Service found a 22 percent increase in cancer death rates compared with the non-fluoridated control city of Muskegon, Michigan.

We can now show a strong connection between fluoridated drinking water and cancer death rates. And the evidence gets even stronger. As a result of these studies and the fact that the U.S. Public Health Service could not defend fluoride safety, Congress ordered a study of the problem to be conducted by the Battelle Memorial Institute in Columbus, Ohio.

The Battelle Institute announced its findings and released proof of the connection between fluoride and cancer of the mouth in February of 1989.

The study showed:

→ At 45 ppm, there was a 12 percent increased incidence of oral cancers, such as cancers of the tongue and gums. Subsequent studies did indeed

that fluoride added to water in the presence of even small amounts of aluminum caused severe destruction of brain cells in the part of the brain controlling learning and memory, the hippocampus.

Clearly, these studies demonstrate that fluoride could cause an early onset of the disease and make it progress more rapidly. In fact, when combined with other toxins we all are exposed to, it can make matters worse.

Alzheimer's patients also have dramatic increases in gut absorption of aluminum, as do children with Down syndrome. In one study, fluoride increased by seven times absorption of aluminum from the gut and significantly increased the entry of aluminum into the brain.

The Toxic Effect of Fluoride and Aluminum

All of us are exposed to numerous sources of aluminum – in foods, canned drinks, aluminum cans and cookware, deodorants, vaccinations, medications and pesticides. And, as we all may know, there is further compelling evidence that aluminum plays a major role in Alzheimer's disease and possibly Parkinson's and Lou Gehrig's diseases.

The combination of fluoride and aluminum is so toxic that even in concentrations half those added to drinking water will cause severe destruction of critical brain cells. You will have a hard time thinking, remembering and performing normal brain functions with this toxic duo.

The same can be true for your children. Combining aluminum and fluoride may very well increase the risk of ADD, ADHD, dyslexia and other developmental brain disorders of children, especially when combined with other toxins from the environment. These studies are compelling and frightening.

The Pineal Gland: Another Area of Concern

A recent study by Dr. Jennifer Luke at the School of Biological Sciences at the University of Surrey in England found that fluoride accumulates in the pineal gland in the brain. Of the pineal

glands she obtained from six elderly people dying of unrelated causes, she found fluoride levels 2,500% higher than other areas of the brain. The fluoride was accumulating in enormous amounts in the calcium deposits normally found in the pineal of older people.

So, why is this important? The pineal gland is the source of the very important hormone melatonin, the same hormone sold in health food stores to aid in sleep. Melatonin regulates the onset of puberty in boys and girls, it regulates the onset of sleep and it protects the brain against damage by free radicals and what is known as lipid peroxidation, the main destructive reactions seen in all degenerative brain diseases.

In fact, individuals with Alzheimer's disease commonly have lower melatonin levels than do individuals of similar age.

But it is the latest findings that are so startling:

→ Young girls who live in cities with fluoride in the water have been known to begin menstruating five months sooner than their counterparts in non-fluoridated towns.

→ Newborns with the lowest melatonin levels had the most problems with behavioral development.

→ Brain protection in adults is being altered.

Fluoride and Baby's Brain Development

Since baby animals exposed to fluoride develop high levels of free radicals in their brains, it makes one wonder what happens to human babies. Unfortunately, it is the same damage.

Researchers examined the brains of aborted babies five to eight months into a pregnancy who were from areas having naturally high fluoride levels in the drinking water.

What researchers found was alarming: The brain cells of the babies were grossly abnormal and nerve fibers were not even compatible with typical human nerve fibers. The brain cells in the babies were grossly abnormal and the nerve fibers were misplaced and swollen. These brains were miswired. Keep in mind the fluoride levels in the drinking

show that the incidence of oral cancers in fluoridated vs non-fluoridated cities was 33 percent to 50 percent greater.

- Toothpaste can contain between 1,000 and 1,500 ppm fluoride.
- Fluoride gels used in dental offices contain up to 15,000 ppm.
- New fluoride varnishes release a high concentration of fluoride continuously in the mouth.

Fluoride, Bone Cancer and Young Men

The bones accumulate more fluoride than any other tissue with the exception of the pineal gland. The Battelle study found that the longer one lives in a fluoridated community, the higher one's bone fluoride levels are.

In fact, animals exposed to 45 ppm of fluoridated drinking water showed an increase in a rare form of bone cancer called osteosarcoma -- in human studies the fluoride concentrations in bones found levels greater than 2,000 ppm.

Osteosarcoma is a tumor most commonly seen in young men in their late teens and twenties. If the Battelle study was accurate, one would expect to see a rise in osteosarcoma in young men in fluoridated communities.

All one has to do is look to the reports by the National Cancer Institute and a 1992 study by the New Jersey Department of Health that show heavy increases, some as high as 50 percent, of the occurrence in osteosarcoma in young men. A New Jersey study found a 3 to 7X higher incidence of this cancer in young men in fluoridated communities vs. non-fluoridated.

Even more shocking is the fact that the Proctor & Gamble Company's own scientists found a link between fluoride ingestion and bone cancer risk before they began adding fluoride to Crest toothpaste. This information was not released voluntarily but required a Freedom of Information lawsuit to pry it loose.

Another P&G study shows that scientists also found genetic damage to cells exposed to just 1 ppm of fluoride, the same dose added to drinking water. This relation to genetic damage has been confirmed

by several independent researchers.

Other types of cancers associated with fluoride exposure include:

- Industrial exposure to airborne fluoride shows a 35 percent increase in lung cancer.
- There is also a 129 percent higher incidence in laryngeal cancer.
- Significant data show an 84 percent increase in bladder cancer.

In fact, in the Battelle study fluoride caused a rare liver tumor that can be produced in experimental animals by only one other toxin -- uranium.

Does Fluoride Cause Crippling?

Skeletal fluorosis is a rarely used term in the United States but often discussed in medical journals overseas. Not that it doesn't occur in the U.S., it's just shrouded in secrecy. Few American doctors have even the slightest understanding of the condition.

As you have learned, the bones accumulate fluoride in very high concentrations and continue to do so the longer you drink fluoridated water. Dr. Hardy Limeback, a professor of dentistry at the University of Toronto who also conducted studies on fluoride levels in the bones of people living in fluoridated communities versus non-fluoridated communities, found that the former had fluoride bone levels two times higher than the latter.

In 1993 the National Academy of Sciences admitted that when bone fluoride levels reached 7,500 to 8,000 ppm, stage 2 and 3 skeletal fluorosis was likely to occur.

So, what is skeletal fluorosis? When fluoride accumulates in bones it stimulates the bone-generating cells, known as osteoblasts, to over-produce bone calcium in what are commonly known as bony overgrowths or bone spurs. These can appear over the joints, within ligaments and especially within the spinal bones. With extensive overgrowth (stage 2 and 3) a person becomes crippled.

Of particular concern is the bone overgrowth on the spinal bones, because they can compress spinal nerves and even the spinal cord. We call this condition spinal stenosis.

Spinal stenosis is a very common disease that can affect the young as well as the elderly. It is much more common after age 50. I have operated on hundreds of people with this condition. Compression of the spinal cord in the neck can result in quadriplegia -- permanent paralysis from the neck down.

I have examined the spines of people from India with this condition proven to be caused by fluoride excess in the drinking water, and it is exactly the same as we are seeing in this country. Incredibly, no one has conducted studies in this country measuring fluoride bone levels in this crippling condition. It is not even mentioned in our medical textbooks.

Bone Fractures and Fluoride

One of the worst things that can happen to an elderly person is to fracture a hip. With mortality rates of up to 50 percent of those who do fracture their hips, many who survive never walk again. Any type of bone fracture is very painful and unfortunately quite common among the elderly.

When fluoride is present in the bones it is shown to weaken the cortical bone, that part that gives the bone strength -- bad news for fracture sufferers. One study among Utah's Mormon community found that fluoridation of the drinking water increased the incidence of hip fractures by 27 percent in women and 41 percent in men.

Fluoride and the Thyroid

In the past, medical doctors used fluoride tablets to reduce the activity of overactive thyroid glands (hyperthyroidism). Subsequent studies have found that fluoride also suppresses the activity of the normal thyroid as well, inducing a condition called hypothyroidism or goiter.

A study done in China found that thyroid enlargement was almost 10 times greater in areas with high fluoride levels in the drinking water. Since the thyroid accumulates more fluoride than any other gland, studies were done and confirmed on animals that fluoride in drinking water inhibits the thyroid gland. It gets worse when iodine levels are very low or very high.

Pregnant women with low thyroid function are at

a greater risk for their babies having severe mental retardation, thereby impacting the fetuses' brain development, according to an article published last year in *The Journal of Clinical Investigation*.

The article indicates that a child's mental development was directly related to the mother's thyroid function during the 12th week of pregnancy. With fluoride's ability to suppress thyroid function, even mild depression of the thyroid can cause a significant increase in the incidence of mental retardation in children in fluoridated communities. This may explain the finding of significant increases in Down syndrome in fluoridated communities.

Fluoride, Male Infertility and Impotence

Reduced sperm counts and infertility in men who work in cryolite (50% fluoride) and aluminum factories have been reported. Supporting evidence shows that fluoride added to the drinking water of experimental animals causes significant reductions in sperm counts, lower testosterone levels and a dramatic increase in abnormal, mutated sperm. This has been shown in many animal species as well as in humans.

Male fertility has been hampered by free-radical generation in the areas of the testes that produces sperm. This could explain not only infertility in many men living in fluoridated areas but also genetic defects in their offspring should they be able to conceive, especially those with higher intakes of fluoride.

What About the Teeth?

Let us not lose sight of the reason for fluoridating drinking water in the first place: preventing cavities. After all, didn't the American Dental Association promote the idea that fluoridating drinking water could reduce cavities by as much as 50 percent? In fact, subsequent examination of these studies found no reduction in cavities.

One dentist commissioned by the U.S. Public Health Service found that people in high-fluoride areas had fewer cavities but they also suffered from a condition called dental fluorosis, which leaves the teeth brown and mottled.

I would recommend avoiding the use of spray cans, such as hair spray, and getting rid of aluminum cans, such as those containing diet colas.

Health food stores offer toothpaste without flouride. One type is Tom's of Maine Natural Fluoride-Free Toothpaste.

The best way to remove pesticide and herbicide residues from vegetables is simply to wash them. California wines also should be passed up, since they contain high amounts of fluoride.

Soy products, which are high in fluoride, aluminum, glutamate and manganese, are all known neurotoxins and should be avoided.

It is critical that mothers avoid all soy-based infant formulas, especially if they are reconstituted by water in a fluoridated water system. Soy-based formula has very high levels of these brain toxins, and a baby's brain is the most vulnerable until the age of two years.

What You Can Do to Protect Yourself

Certain supplements protect against the harmful effects of fluoride and aluminum. These include (adult levels):

→ Magnesium malate. Take 1,000 mg. with each meal to prevent aluminum absorption.

→ Calcium citrate. Take only between meals to prevent increasing aluminum absorption. Calcium citrate protects against aluminum toxicity and helps remove aluminum from body tissues. Calcium also protects against fluoride toxicity by binding to the

fluoride. Another form of calcium you can use is calcium pyruvate. The calcium neutralizes the fluoride and the pyruvate binds the aluminum, preventing absorption.

→ Vitamin E succinate or natural from vitamin E (mixed tocopherols), 400 IU. Take one or two a day. Discard the gelatin capsules as they contain fluoride and glutamate as well as cow protein.

→ Vitamin C as magnesium or calcium ascorbate. Take 1,000 mg twice a day. Reduces fluoride toxicity.

→ Vitamin D. Take 2,000 IU a day. Protects against fluoride toxicity, especially in pregnant women. To be safe, if pregnant take 1,000 IU a day.

→ Selenium. Take 200 ug a day. Selenium has been shown to protect against fluoride toxicity. Higher doses add to fluoride toxicity.

→ Multivitamin/mineral. This should be as a powder in a capsule. It should not contain iron.

→ Curcumin. 500mg dissolved in 2 tablespoons of extra virgin olive oil. Take twice a day with meals. It is a powerful antioxidant and shown to protect the brain against many neurotoxins.

Additionally, to get the most protection against free radicals you should eat at least three to five servings of fruits and vegetables a day. They should be fresh and eaten mostly raw.

It is also wise take 200 mg. of DHA twice a day. Simply remove the gelatin capsule as you do with vitamin E. You also can get high levels of Omega-3 fatty acids by eating Christopher eggs daily and

Recent studies have shown an incidence of dental fluorosis from 30 percent to 60 percent in fluoridated communities. With so many generations having been exposed to high fluoride levels over a lifetime, the problem can only get worse.

In essence, does fluoridation of drinking water prevent cavities? The largest study ever done in this country, involving 39,000 schoolchildren, found no overall reduction in cavities in communities with fluoride in their water.

Additionally, the largest worldwide study shows that children who live in areas with no fluoride in the water had lower cavity rates.

In fact, cavity rates dramatically fell even before fluoride was added to toothpaste. It is also important to note that virtually all European countries have banned water fluoridation. The most heavily fluoridated country by government policy in the world is the United States.

Another study, by Dartmouth University, shows that children living in fluoridated communities

have blood lead levels twice that of non-fluoridated communities. That could mean more incidences of poor learning ability, increased violence, higher suicide rates and greater drug use among children.

What Products Should You Avoid?

Simply put, stop using fluoride in its many forms. This includes avoiding:

- Teas high in fluoride
- Fluoridated water
- Toothpaste with fluoride
- Vaccinations, since they contain fluoride and aluminum
- Pesticides or herbicides near or in your home
- Medications containing fluoride

Also, do not use lemon in your tea, since it will increase aluminum absorption enormously.

Do not cook in aluminum or Teflon-coated cookware, and avoid using Teflon products. →

John Holdren, Obama's Science Czar, says: Forced abortions and mass sterilization needed to save the planet

Book he authored in 1977 advocates for extreme totalitarian measures to control the population

Forced abortions. Mass sterilization. A "Planetary Regime" with the power of life and death over American citizens.

The tyrannical fantasies of a madman? Or merely the opinions of the person now in control of science policy in the United States? *Or both?*

These ideas (among many other equally horrifying

recommendations) were put forth by John Holdren, whom Barack Obama has recently appointed Director of the White House Office of

Science and Technology Policy, Assistant to the President for Science and Technology, and Co-Chair of the President's Council of Advisors on Science and Technology -- informally known as the United States' Science Czar. In a book Holdren co-authored in 1977, the man now firmly in control of science policy in this country wrote that:

- Women could be forced to abort their pregnancies, whether they wanted to or not;
- The population at large could be sterilized by infertility drugs intentionally put into the nation's drinking water or in food;
- Single mothers and teen mothers should have their babies seized from them against their will and given away to other couples to raise;
- People who "contribute to social deterioration" (i.e. undesirables) "can be required by law to exercise reproductive responsibility" -- in other words, be compelled to have abortions or be sterilized.
- A transnational "Planetary Regime" should assume control of the global economy and also dictate the most intimate details of Americans' lives -- using an armed international police force.

Impossible, you say? That must be an exaggeration or a hoax. No one in their right mind would say such things.

Well, I hate to break the news to you, but it is no hoax, no exaggeration. John Holdren really did say those things, and this report contains the proof. Below you will find photographs, scans, and transcriptions of pages in the book Ecoscience, co-authored in 1977 by John Holdren and his close colleagues Paul Ehrlich and Anne Ehrlich. The scans and photos are provided to supply conclusive evidence that the words attributed to Holdren are unaltered and accurately transcribed.

[UPDATE: Make sure to read the new statements issued by the White House and by John Holdren's office in response to the controversy raised by this essay -- you can see them below following the

www.LearnTheRisk.org

DO YOU KNOW WHAT'S IN A VACCINE?

NONE OF THESE SHOULD BE INJECTED INTO YOUR BODY

Aluminum

Known to cause brain damage at all doses, linked to ALZHEIMER'S DISEASE, dementia, seizures, autoimmune issues, SIDs and cancer. This toxin accumulates in the brain and causes more damage with each dose.

Beta-Propiolactone

Known to cause CANCER. Suspected gastrointestinal, liver, nerve and respiratory, skin and sense organ POISON.

Gentamicin Sulphate & Polymyxin B [antibiotics]

ALLERGIC reactions can range from mild to life-threatening.

Genetically Modified Yeast, Animal, Bacterial and Viral DNA

Can be incorporated into the recipient's DNA and cause unknown GENETIC MUTATIONS.

Glutaraldehyde

Poisonous if ingested. Causes BIRTH DEFECTS in animals.

Formaldehyde [formalin]

Known to cause CANCER in humans. Probable gastrointestinal, liver, respiratory, immune, nerve and reproductive system POISON. Banned from injectables in most European countries.

Human and Animal Cells

Human DNA from aborted BABIES. Pig blood, horse blood, rabbit brains, dog kidneys, cow hearts, monkey kidneys, chick embryos, calf serum, sheep blood & more. Linked to childhood leukemia and diabetes.

Mercury [thimerosal]

One of the most toxic substances known. Even if a thermometer breaks, the building is cleared and HAZMAT is called. Tiny doses cause damage to the brain, gut, liver, bone marrow, nervous system and/or kidneys. Linked to autoimmune disorders, and neurological disorders like AUTISM.

Monosodium Glutamate [MSG]

A toxic chemical that is linked to birth defects, developmental delays and infertility. Banned in Europe.

Neomycin Sulphate [antibiotic]

Interferes with vitamin B6 absorption which can lead to epilepsy and brain damage. Allergic reactions can range from mild to life-threatening.

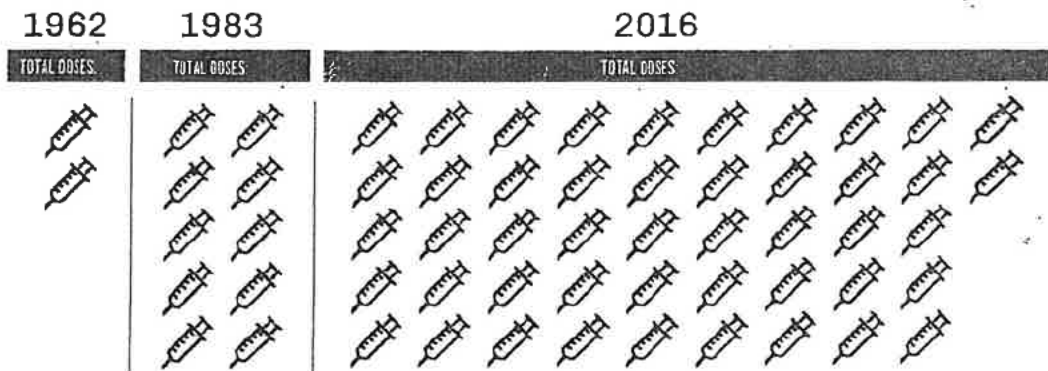

Phenol/Phenoxyethanol [2-PE]

Used as anti-freeze. TOXIC to all cells and capable of destroying the immune system.

Polysorbate 80 & 20

Known to cause CANCER in animals and linked to numerous autoimmune issues and infertility.

VACCINES DOSES for U.S. CHILDREN

The US gives 2-3x more vaccines than most developed countries, yet we have the sickest population -- with skyrocketing rates of health issues like asthma, childhood diabetes, food allergies, leukemia, developmental delays, ADHD, autism, lupus, arthritis, eczema, epilepsy, brain tumors, Alzheimer's and more. **It's NOT a coincidence.**

In 1986, Pharmaceutical manufacturers producing vaccines were freed from ALL liability resulting from vaccine injury or death by the Childhood Vaccine Injury Act. With this, vaccines became HIGHLY profitable. There are 271 vaccines in development and mandatory vaccine laws for children — and ADULTS — being pushed in most states.

also infected vaxxed Capitol Hill staffers, as it did Representative Vern Buchanan, a GOP congressman from Florida.

Apropos of Berenson's work, the *Times of Israel* has reported that 56 percent of new cases in the country are among the vaxxed. In a second story, the newspaper reported that the vaccine apparently loses effectiveness after about six months, given that breakthrough cases have occurred mostly in those vaccinated in January 2021.

At least 47 percent of new virus cases in England as of mid-July were among the partially or fully vaccinated, the *Daily Mail* reported, and more than 100 sailors aboard a British aircraft carrier contracted the virus after two jabs, as did the country's health minister.

"This is worrying me quite a bit," mRNA vaccine inventor Robert W. Malone tweeted about breakthrough data from Europe. No wonder "scientists have backed proposals for Covid boosters in the autumn after blood tests on hundreds of people revealed that protective antibodies can wane substantially within weeks of second vaccine shots being given." As Britain's leftist *Guardian* reported:

Falls in antibodies after vaccination are expected and do not necessarily mean people are more vulnerable to disease, but the researchers are concerned that if the declines persist the effectiveness of the vaccines may diminish...

"We know levels of antibodies start high and drop substantially," said Prof Rob Aldridge, an infectious disease epidemiologist at University College London. "We're concerned that if they carry on dropping at the rate we've seen, the protective effects of the vaccines will start to drop too, and the big question is, when is that going to happen?"...

Prof Matthew Snape, a vaccinologist at Oxford University, said: "Studies such as this do not in themselves provide evidence of waning protection from vaccines but are really important to help us understand what's going on if population-based studies showed any drop-off in protection with increasing time since immunisation.

"A decline in antibodies in the blood following immunisation is to

be expected, and does not necessarily correspond to an increased risk of disease. Protection against infection could well be down to whether or not there are antibodies.... However, it's clear that ongoing protection from vaccines for months to years after immunisation can't be assumed, hence the importance of ongoing vigilance for any increase in breakthrough infections."

None of this means the vaccines "don't work." Even if they don't provide complete protection against all SARS-Cov-2 variants, they lessen the severity of infections. The question is for how long. They might not be as effective long-term as fully-tested vaccines for other diseases.

As well, the vaccines are *experimental*. Aside from not knowing how long they provide protection, we don't know what the side effects might be a year from now, one reason some Americans don't want to risk the inoculation.

The point is, a claim from Governor Ivey, which others blithely repeat — "the new cases of Covid are because of unvaccinated folks" — is risibly false.

Vaccine Adverse Events

Data about the vaccines show not only large numbers of breakthrough cases but also an inordinate number of adverse events compared to other vaccines.

Using an "all-locations" search parameter, as of July 31, CDC's Vaccine Adverse Event Reporting System records nearly 500,000 adverse events after the COVID vaccine, including:

- 11,940 deaths;
- 11,198 life-threatening events; and
- 40,991 hospitalizations.

More than 65,000 people have landed in the emergency room.

Using a search parameter for the "United States/Territories/Unknown" returns 481,594 events, including 5,612 deaths, 7,279 life threatening events, and 25,297 hospitalizations.

The events include the potentially fatal conditions myocarditis and pericarditis, inflammation of the heart muscle and lining of the heart. As of July 26, the CDC had received 1,194 reports of the two conditions and had confirmed 699, particularly in teenage boys.

Trouble across the pond: Though England boasts a high COVID-19 vaccination rate, nearly half of the new COVID cases are among vaccinated individuals. This worries some scientists.

began the reporting system.

CDC insists that the vaccines, two of which monkey with RNA, are "safe and effective" despite those data. "The known and potential benefits of COVID-19 vaccination outweigh the known and potential risks." Malone isn't so sure, at least when it comes to young people. "I don't think the benefits outweigh the risks in that cohort," Malone told Fox talker Tucker Carlson of 18- to 22-year-olds. "The risk-benefit analysis is not being done."

Continued Malone, "My concern is I know there are risks but we don't have access to the data. And so, I am of the opinion that people have the right to decide whether to accept vaccines or not, especially since these are experimental vaccines."

Perhaps more worrisome is that governments at all levels, along with big business, seem ready to mandate the jab by forcing Americans to carry "vaccine

your daily routine, you'll have to prove you're vaxxed. New York city now requires proof of vaccination for all workers and customers of gyms, restaurants, and entertainment venues.

Banks, groceries, and other businesses display signs that "require" customers to wear a mask if they aren't jabbed, yet customers needn't prove it in most places. How long that will hold true is unknown. A good guess though, is not long at all. Businesses in California have already begun requiring customers to prove they're vaxxed.

Pro-vaxxers are even ready for mandates and penalties for refuseniks. Consider the aforementioned Shea, who cited Psalm 32:8-11, and then Proverbs 26:3: "A whip for the horse, a bridle for the donkey, and a rod for the back of fools."

"About half the country, some due to ignorance and poor education, some due to pig-headed selfish spite, some due to paranoid fear, some due to boneheaded

willfully evading or absolutely refusing to be vaccinated," Shea began his jeremiad. "The epicenter of this is the MAGA 'prolife' Murder/Suicide Cult."

Thus has Shea planted the idea that the unvaxxed are murderers.

He continued:

I have no trouble at all with the state and corporate America richly rewarding the vaccinated and punishing the stupidly unvaccinated. Vaccine passes, barring the unvaccinated from businesses, restaurants, theatres, sporting events. Punishing places like [the restaurant that banned the vaxxed] with closure for health code violations, vaccine requirements for school and work and travel are all great ideas. Employers can and should imitate Biden, who recently made vaccination compulsory if you want to work for the Feds.

There should also be tax breaks for the vaccinated and penalties for the unvaccinated. Lower insurance for the vaxxed, higher premiums for the unvaxxed. Also, as the City of New York recently required, there should be weekly testing for the unvaxxed...

Also, people should face fines and penalties for deliberately spreading disinformation and lies about vaccines and public health, particularly if they work in media.

Shea helpfully included a World War II wanted-for-murder poster that was part of the "loose lips sink ships" propaganda campaign.

Thus are the unvaxxed not just to be hectorated, bullied, and vilified — and dehumanized. If Shea and his ilk get their way, the "murder/suicide cult" will hear the hob-nailed boot of a Jab KGB kicking in the door, or feel the thudding lash of a blackjack to the back of the skull at a police station in the middle of the night.

For those tempted to agree with this proposal for fear of the virus, a caution: If the government-industrial complex can mandate compliance on this vaccine, other intrusive mandates will follow. So will punishment for those who refuse to obey. ■

AP Images

No shot, no mask, no service: Businesses around the country are beginning to require unvaccinated customers to wear masks. How much longer until unvaccinated individuals no longer have access to essential services?

SECTION 2 : Hazards identification**Classification of the substance or mixture:****Irritant**Skin irritation, category 2
Eye irritation, category 2A**Toxic**

Acute toxicity (oral, dermal, inhalation), category 3

Hazards Not Otherwise Classified - Combustible Dust

Acute toxicity - Oral - Acute Tox. 3

Skin corrosion/irritation - Skin Irrit. 2

Serious Eye Damage/Eye Irritation - Eye Irrit. 2

HNOC: Contact with acids liberates very toxic gas

Signal word : Danger**Hazard statements:**

Causes skin irritation

Causes serious eye irritation

Toxic if swallowed

Precautionary statements:

If medical advice is needed, have product container or label at hand

Keep out of reach of children

Read label before use

Do not eat, drink or smoke when using this product

Wash skin thoroughly after handling

Wear protective gloves/protective clothing/eye protection/face protection

Specific treatment (see supplemental first aid instructions on this label)

Rinse mouth

Most important symptoms and effects, both acute and delayed:

After inhalation: Loosen clothing as necessary and position individual in a comfortable position. Move exposed to fresh air. Give artificial respiration if necessary. If breathing is difficult give oxygen. Get medical assistance if cough or other symptoms appear.

After skin contact: Rinse/flush exposed skin gently using soap and water for 15-20 minutes. Seek medical advice if discomfort or irritation persists.

After eye contact: Protect unexposed eye. Rinse/flush exposed eye(s) gently using water for 15-20 minutes. Remove contact lens(es) if able to do so during rinsing. Seek medical attention if irritation persists or if concerned. Do NOT allow victim to rub eyes or keep eyes closed.

After swallowing: Rinse mouth thoroughly. Do not induce vomiting. Have exposed individual drink sips of water. Seek medical attention if irritation, discomfort or vomiting persists. Never give anything by mouth to an unconscious person. DO NOT use mouth-to-mouth resuscitation without a barrier device to prevent responder from receiving burns.

 IF ON SKIN: Wash with soap and water
 Take off contaminated clothing and wash before reuse
 IF EYE IRRITATION PERSISTS GET MEDICAL ADVICE/ATTENTION
 Continue rinsing
 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do.
 IF SWALLOWED: Immediately call a POISON CENTER or doctor/physician

Sodium Fluoride, Lab Grade

Safety Data Sheet

according to 29CFR1910/1200 and GHS Rev. 3

Effective date : 10.24.2014

Page 3 of 7

Sodium Fluoride, Lab Grade

May cause burning, salivation, vomiting, abdominal pain, nausea, fever, cardiac arrest, respiratory paralysis, labored breathing; systematic toxic effects on the heart, kidneys, and liver; calcium depletion leading to hypocalcemia and death. May cause burns, pulmonary edema, perforation of the nasal septum. Nausea, Headache, Shortness of breath. Irritation/burns, all routes of exposure. chemical conjunctivitis. burns, skin rash, cold and clammy hands with pale color or cyanosis; May cause weight loss, anemia, stiff joints, weakness, brittle bones and lung damage. Chronic inhalation and ingestion may cause chronic fluoride poisoning characterized by weight loss, anemia, stiff joints, weakness, and brittle bones. Chronic exposure may cause lung damage. Laboratory experiments have resulted in mutagenic effects. Chronic exposure to fluoride compounds may cause systemic toxicity. Skeletal effects may include bone brittleness, teeth discoloration, osteosclerosis, joint stiffness, tendon calcification. Animal studies have reported the development of tumors

Indication of any immediate medical attention and special treatment needed:

If seeking medical attention, provide SDS document to physician. Physician should treat symptomatically. Individuals who suffer from diabetes insipidus or some form of renal impairment may be at increased risk from the effects of fluoride. Due to delayed and persistent symptoms, observe patient closely for 48 hours. Treat symptomatically

SECTION 5 : Firefighting measures**Extinguishing media**

Suitable extinguishing agents: Use appropriate fire suppression agents for adjacent combustible materials or sources of ignition. Do NOT get water inside containers

For safety reasons unsuitable extinguishing agents:

Special hazards arising from the substance or mixture:

Combustion products may include carbon oxides or other toxic vapors. Thermal decomposition can lead to release of irritating gases and vapors.

Advice for firefighters:

Protective equipment: Use NIOSH-approved respiratory protection/breathing apparatus.

Additional information (precautions): Move product containers away from fire or keep cool with water spray as a protective measure, where feasible. Use spark-proof tools and explosion-proof equipment. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard. Avoid inhaling gases, fumes, dust, mist, vapor, and aerosols. Avoid contact with skin, eyes, and clothing. Not considered to be a fire or explosion hazard

SECTION 6 : Accidental release measures**Personal precautions, protective equipment and emergency procedures:**

Wear protective equipment. Use spark-proof tools and explosion-proof equipment. Ensure that air-handling systems are operational. Ensure adequate ventilation.

Environmental precautions:

Prevent from reaching drains, sewer or waterway. Collect contaminated soil for characterization per Section 13. Should not be released into environment.

Methods and material for containment and cleaning up:

Keep in suitable closed containers for disposal. Wear protective eyewear, gloves, and clothing. Refer to Section 8. Always obey local regulations. Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Collect solids in powder form using vacuum with (HEPA filter). Evacuate personnel to safe areas.

Reference to other sections:**SECTION 7 : Handling and storage**

Appearance (physical state,color):	Solid	Explosion limit lower: Explosion limit upper:	Not determined Not determined
------------------------------------	-------	--	----------------------------------

SECTION 9 : Physical and chemical properties

General hygienic measures:
Perform routine housekeeping. Wash hands before breaks and at the end of work. Avoid contact with skin, eyes, and clothing. Before wearing wash contaminated clothing.

Eye protection:
Wear equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). Safety glasses or goggles are appropriate eye protection.

Protection of skin:
Select glove material impermeable and resistant to the substance. Select glove material based on rates of diffusion and degradation. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Use proper glove removal technique without touching outer surface. Avoid skin contact with used gloves. Wear protective clothing.

Respiratory protection:
Not required under normal conditions of use. Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. When necessary use NIOSH approved breathing equipment.

Appropriate Engineering controls:
Emergency eye wash fountains and safety showers should be available in the immediate vicinity of use/handling. Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapor or dusts (total/respirable) below the applicable workplace exposure limits (Occupational Exposure Limits-OELs) indicated above. It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment). Use under a fume hood.

Control Parameters:
OSHA PEL TWA (Total Dust) 15 mg/m³ (50 mppcf*)
ACGIH TLV TWA (inhalable particles) 10 mg/m³

SECTION 8 : Exposure controls/personal protection

Precautions for safe handling:
Minimize dust generation and accumulation. Follow good hygiene procedures when handling chemical materials. Refer to Section 8. Use under fume hood. Do not eat, drink, smoke, or use personal products when handling chemical substances. Avoid contact with eyes, skin, and clothing.

Conditions for safe storage, including any incompatibilities:
Store away from incompatible materials. Protect from freezing and physical damage. Keep away from food and beverages. Provide ventilation for containers. Avoid storage near extreme heat, ignition sources or open flame. Store in cool, dry conditions in well sealed containers. Store with like hazards.

BIDEN'S DOOR-TO-DOOR VACCINE PUSH — AND BEYOND

The push to get every person vaccinated is intensifying. Are mandated vaccines — if not *de jure*, then *de facto* — coming? If you don't want the shot, what can you do?

by C. Mitchell Shaw

On July 6, the Biden administration announced that the federal government will start a door-to-door campaign to boost the number of Americans who have been vaccinated against COVID-19. In a White House press conference, the current resident of 1600 Pennsylvania Avenue addressed Americans who have not received the experimental vaccines, saying, "Do it now."

Biden said that people will be "knocking on doors" to get "help to the remaining people" who have not been vaccinated. He also said, "We're intensifying efforts to meet people out where they are" and that the teams sent out by the White House will be made up of officials from the CDC, the Federal Emergency Management Agency (FEMA), and other federal health agencies.

Despite the federal arm-twisting, many Americans will refuse to get vaccinated. But don't expect the Nanny State to be content with a "no." The government is determined to get every American vaccinated, one way or another — "voluntarily" or otherwise.

C. Mitchell Shaw, a freelance writer, is a strong advocate of both the free market and privacy. He addresses a wide range of issues related to the U.S. Constitution and liberty.

"Every Single Person"

The Biden administration's implementation of a door-to-door plan is at least partially due to the fact that the White House missed its self-imposed deadline to have 70 percent of American adults at least partially vaccinated by July 4. Granted, it did not miss that goal by much: According to CDC data, more than 67 percent of American adults have received at least one shot. But Biden's administration will press on to that goal and beyond. White House Press Secretary Jen Psaki said, "You don't just give up just because you haven't reached every single person."

The implication is clear: The full weight of the Biden administration will be used to pressure and cajole people into getting the shots. That he made his announcement the day after the long Independence Day weekend is an example of both cruel irony

and this administration's absolute disconnect from logic, reason, and the founding principles of America. It reads more than a little like, "Now that you have had your July 4 celebration, fall back in line, do what you're told, and get the shot." As Biden said, "Do it now." And just to put the Red, White, and Blue wrapping on it, he added, "It's the patriotic thing to do."

This writer will perhaps be forgiven if he declines to take advice on patriotism from the likes of Joe Biden.

Though the White House has been conspicuously scant with details, Psaki said the plan would include "door-to-door outreach to get remaining Americans vaccinated" and that the "outreach" would be "targeted by community." The "targeted" part of that comes in where Psaki said that the administration will first focus on communities with lower vaccination rates.

This, of course, raises at least two important points. First, it indicates that — far from only having general data on numbers of people who have been vaccinated — the government has *specific* information including demographics and location information. This smacks of a list of who has (and conversely, who has not) been vaccinated.

And while it may seem (and would, in fact, be) extreme for the federal government to maintain a database of the vaccination status of Americans, keep in mind that this is the same government that *already* illegally harvests the browsing histories, phone calls, texts, maps, calendars, and more on every American who does not take technological steps to prevent that data-harvesting. This latest violation would not even cause them to stop and think.

Furthermore, Health and Human Services (HHS) Secretary Xavier Becerra made it clear during a July 8 appearance on CNN that the federal government does not care about your privacy where this is concerned. He told CNN's *New Day*, "The federal government has spent trillions of

keep Americans alive during this pandemic. So it is absolutely the government's business [to know who is vaccinated.] It is taxpayers' business if we have to continue to spend money."

The second important point is that such a list could easily be used for making COVID vaccinations mandatory. How else could the Biden regime hope to get this vaccine into the bloodstream of "every single person" in the United States?

And, to put in the for-what-it's-worth column, the push for mandating vaccinations would not necessarily have to come directly from Washington. Mandates may not even require that the experimental vaccines receive full FDA approval.

On July 11, Dr. Anthony Fauci — whose title is director of the National Institute of Allergy and Infectious Diseases, but whose role is essentially High Priest of the Religion of Bogus Science — appeared on CNN. In that appearance, Fauci said he believes that "at the local level" "there should be more mandates." He went on to say, "There really should be. We're talking about [a] life and death situation." Fauci said he believes the "hesitancy"

among states, counties, and cities for putting vaccine mandates in place is caused by the fact that "the vaccines have not been *officially, fully* approved." [Emphasis in original.] But, says Fauci, that is a small matter that should be overlooked. Invoking the power of his office as High Priest of the Religion of Bogus Science, Fauci said, "People need to understand that the amount of data right now that shows a high degree of effectiveness and a high degree of safety is more than we've ever seen with emergency-use authorization."

So, Fauci would have vaccines mandated by law and would have people accept — as an article of faith — that *even without FDA approval*, the vaccines are both safe and effective. This is a tactic used in sales and negotiations of all types: Ask for something completely ridiculous and when rebuffed, back down to something only mildly ridiculous by comparison. Here the tactic appears to be for the Biden regime to push for local mandates before FDA approval of the vaccines and when the people (and some states) push back, have the FDA approve the shots. Then the Biden regime can mandate them at the federal level.

The Pentagon has already indicated that this is the direction the military will take. Though soldiers, sailors, airmen, and Marines have been cajoled into getting the shots "voluntarily," with the result being that all military branches boast high numbers of vaccinated members compared to the public at large, the powers-that-be want more. The Pentagon has now announced that it is taking steps to mandate vaccines for all military personnel, without waiting for FDA approval.

The implication is clear: The full weight of the Biden administration will be used to pressure and cajole people into getting the shots.

Moving Toward Mandates

So, while Fauci pushes for local mandates even without FDA approval, the Pentagon is mandating the shots for military personnel. Pause and let that sink in: Military personnel will be required to get an experimental vaccine that has not been approved by the FDA and Fauci plans the same for the rest of us. The reality for average Americans — as it plays out — will likely be a little of both: Some states (mostly blue) may move toward an "emergency power" to require vaccines for people to shop, dine, go to work, or otherwise live their lives, likely even requiring "vaccine passport" as proof of com-

AP Images

Trust us, we're experts: U.S. Department of Health and Human Services (HHS) Secretary Xavier Becerra told CNN that "it is absolutely the government's business" to know who is and who is not vaccinated.

control for years have died within weeks of a stage IV cancer following vaccination.

Molecular biologists examined several vials of the COVID-19 “vaccine” and found thousands of fragments of foreign DNA — most likely from the cells used to grow the virus. This was reported at the time, and the study has been repeated, with new researchers finding the exact same thing: thousands of bits of foreign DNA in each vaccine vial.

They also found a promoter/enhancer gene for the SV40 cancer virus in each of the vials.

Research has demonstrated that DNA fragments from vaccines can be incorporated into a person’s DNA and be transmitted to their offspring.

Even the mRNA producing the spike protein (the toxic part of the virus) has been shown to be incorporated into an injected person’s DNA, thus producing the deadly spike protein, possibly for a lifetime. That would also enable it to be transmitted to the person’s offspring.

In another comprehensive study based on 325 autopsy studies reported in the medical literature, Dr. James Lyons-Weiler (a friend of mine) along with nine other experts representing many scientific fields looked for a possible connection to the COVID vaccine as a cause of death. They found most of the deaths occurred within one week after getting the injection. The most common cause of death was cardiovascular (49 percent).

The other common causes of death included:

- Hematological (17 percent)
- Respiratory (11 percent)
- Multiple organ system failure (7 percent)

Some 73.9 percent of the deaths (240) were deemed to be secondary to the injection. Three or more organ systems were involved in 21 cases.

The average time between the injection and death was 14.3 days.

Why wasn’t the “vaccine” pulled at that point as being too dangerous? In the past, a vaccine — especially if it was a new design — was withdrawn even after a few deaths were reported.

Why did the Centers for Disease Control and Prevention (CDC) do everything in its power to

prevent any autopsies from being performed on the deceased? The pathologists were literally screaming to do them.

Autopsies are the best way to discern the various aspects of a new disease or infection.

The refusal to perform autopsies was not caused by a fear that the pathologists would get infected, as none were shown to be linked to autopsying these cases.

In my opinion, there were two reasons for the

CDC’s decision. First, with the actual infection, they didn’t want proof that most of the deaths were caused by the COVID protocol all hospitals were told to follow — not the virus itself. Second, they didn’t want anyone having proof that many died as a result of neglect by the hospitals.

With the vaccines the motivation was different. They didn’t want proof that these “vaccines” were killing people, though that is exactly what the autopsies showed.

Now we have proof, and we have proof that the authorities and the mainstream media hid the truth about

virtually every aspect of this sordid episode.

‘Studies have shown that by the third injection with a COVID vaccine, a person’s immune system is virtually destroyed.’

COQ10 Improves Heart Function

Coenzyme Q10 is a naturally occurring substance found in every cell in the body. Without it, we would all die. Objective studies of cardiac output, stroke volume, ejection fraction, and cardiac index showed improvement with CoQ10 treatment.

Most studies have focused on patients with mild to moderate congestive heart failure, but one found that giving 100 mg of CoQ10 a day to advanced heart failure patients improved symptoms in 82 percent of the patients.

Another finding was equally impressive: Two years after CoQ10 therapy, the survival rate was 62 percent — compared to 25 percent for patients receiving conventional medical treatment.

There is no question that using higher doses — such as 350 mg to 600 mg three times a day — would produce even better results. The best thing about CoQ10 is that there are no side effects; it is completely safe in any amount. ■

soaked in arsenic to protect the wood from insects. Unfortunately, the lumber is often still wet when the arsenic is applied, and workers handling it can become seriously contaminated.

Arsenic is a serious poison that can cause cancer. Safer lumber is soaked in boric acid (borate) instead of arsenic.

The same can be said for termite protection. If the soil making up the foundation is mixed with boric acid, it will kill the termites and protect the house.

Eating organically grown food has been shown to dramatically lower these pesticide residues in children. All vegetable and fruits should be thoroughly washed with a vegetable wash before consuming.

Curing *H. Pylori* With Natural Compounds

Infection with *Helicobacter pylori* bacteria, which is common around the world, is a common cause for both malignancy of the stomach and ulcers of the duodenum.

It is also considered to be the most common association with gastric lymphoma and adenocarcinoma of the stomach, a fatal disease.

In developing countries, it has been estimated that most children are infected with *H. pylori* by the age of 10. The rate varies in developed countries, but it has been estimated to affect 30 percent of the U.S. population.

The relationship between *H. pylori* and several diseases — including encephalopathy and heart disease — remains controversial. Some people feel that the strain of *H. pylori* is important. Others think the age of infection is what matters.

Most people are infected before age 10, and carry the organism without any effects.

The infection has been shown to be associated with gastric and duodenal ulcers, as well as adenocarcinomas and lymphomas of the stomach. There is a weaker association with:

- Heart disease
- Atherosclerosis
- Diarrhea
- Encephalopathy

Inflammation caused by *H. pylori* accounts for most of its symptoms, especially cases of cancer.

Treatment by a gastroenterologist generally involves prescription of several antibiotics and repeated tests to see if the infection has been eliminated. It can be quite difficult to get rid of an *H. pylori* infection.

In addition to the major problems caused by *H. pylori*, the infection can also lead to iron-deficiency and anemia. That's because the bacteria cause a slow gastric bleeding and utilize iron from the diet and blood.

In addition, *H. pylori* bacteria are encased in a biofilm that protects it against many commonly prescribed antibiotics. Some flavonoids, such as nano-bacopa, work to destroy this biofilm.

Other plant extracts shown to be effective against *H. pylori* include:

- Baicalein
- Nano-Triphala (from One Planet Nutrition)
- Liposomal apigenin
- Nano-berberine
- Liposomal luteolin

Oregano oil also kills the organism and can be mixed with the other plant extracts. It is taken as two capsules with meals.

Meanwhile, nano-curcumin has been found to exercise a twofold effect on *H. pylori* infections, reducing the stomach inflammation caused by the infection, and directly inhibiting the bacteria.

In addition, butyrate promotes healing of the stomach and duodenum.

Update on the COVID 'Vaccines'

Studies have shown that by the third injection with a COVID vaccine, a person's immune system is virtually destroyed. This occurs because a factor called IgG4 is drastically increased by these injections, and IgG4 suppresses immunity.

This explains why so many people who have been "vaccinated" have suffered from multiple bouts with COVID-19 and other infections, including bacterial pneumonia.

It also explains, in part, the emergence of what are called "turbo" cancers — the appearance of fatal, stage IV cancers within weeks or even days of injection. Pathologists all over the world have stated that they've never seen cancers grow this fast (hence the turbo label).

In addition, people who have had their cancer under

**"Fluoridated water prevents tooth decay."
THIS IS A DEADLY,
DISGRACEFUL LIE...**

First of all, the reverse is true. One of the last cities in Europe to permit fluoridation was Basel, Switzerland, and they just stopped. Why? Because after they started fluoridating, kids' cavity rates increased. By contrast, rates in the rest of fluoride-free Europe declined. So why, you may ask, did anyone fluoridate in the first place?

FOLLOW THE MONEY. Fluoride is a byproduct of aluminum production...

And aluminum producers must dispose of it. But this was a very expensive proposition prior to fluoridation. Back then, the only approved uses for fluoride were as an INSECTICIDE or a RAT POISON.

So what did they do? I don't exactly have a smoking gun (yet), but one of the first studies "proving" the anti-cavity power of fluoridated water was funded by the aluminum industry.

ingenious, huh? If you can't dispose of a toxin, just delude health authorities that it's healthy, and presto....

Now we pay them to pour rat poison into our water supply...

And what's the result? Fluoridated water doesn't prevent cavities, but it definitely

Fluoride/Sodium Fluoride: Found in toothpastes and most city water supplies. Interestingly enough, the American Dental Association's own papers show that fluoride is helpful only to little children with developing teeth. It is a carcinogen and has been shown to cause behavioral changes, the most prominent change being lassitude. For the real poop on fluoride, you should examine Adolph Hitler's own archives: the Third Reich added fluoride to the general water supply primarily to control the population, keeping them apathetic and listless. Recent studies have shown that fluoride can combine with aluminum and aid the aluminum in crossing the brain blood barrier...an Alzheimer's aid, in effect. The union of federal scientists who work with the EPA (Environmental Protection Agency) has called an end to the practice of fluoridation. Don't look to the pharmaceutical industry for any help: because fluoride crosses the blood brain barrier, it is used to boost the impact of neuro-psychic drugs such as Prozac. According to Wm C Douglas, MD, this chemical was once classified as a toxic waste and the only approved uses were as an insecticide and rat poison. He further points out that, "In one of the biggest studies ever undertaken on the subject (using data from 39,000 school children in 84 metropolitan areas around the U.S.), there was no statistically significant difference in rates of tooth decay between fluoridated and non-fluoridated water supplies."

can prevent a long, healthy life. I could show you evidence linking it to cancer, osteoporosis...

Plus, if you want to slash your Alzheimer's risk overnight...

Starting tomorrow, drink no fluoridated water.

Why? Because fluoride makes your body absorb extra aluminum. And where does the aluminum go? Your brain. And what metal shows up alarmingly in the brains of Alzheimer's victims?

You guessed it.

In your FREE BONUS GIFTS, I'll explain the cheapest and easiest way to filter out all this toxic junk, along with several even easier ways to cut your Alzheimer's risk.

Then we'll put to rest all your needless fears about cancer... (Continued on page 6)

JUDICIAL WATCH VICTORY

Judicial Watch Lawsuit Causes San Francisco to Shut Down Woke Racist Program

The City of San Francisco, in a 7-3 vote by the Board of Supervisors of the City and County of San Francisco, authorized a settlement agreement in a taxpayer lawsuit brought by Judicial Watch against the City, agreeing to discontinue its discriminatory guaranteed-income program funded by taxpayer money in favor of transgender individuals with a PREFERENCE for biological Black and Latino men who identify as women. The agreement commits the city to pay \$3,250 in attorney's

fees and costs and not to create a new guaranteed income program with the same eligibility criteria.

Ordinance No. 290-24 as passed by the Board of Supervisors of the City and County of San Francisco and signed by Mayor London Breed states:

The [San Francisco] City Attorney is hereby authorized to settle the action entitled "*Michael Phillips, et al., v. London Breed, et al.*," San Francisco Superior Court, Case

388 Noncitizens Voted in Washington, D.C.'s Nov. 2024 Election

ASSOCIATED PRESS

Judicial Watch received a spreadsheet from the District of Columbia Board of Elections revealing that 388 noncitizens voted in D.C.'s November 2024 general election.

While federal law prohibits noncitizens from voting in federal elections, states and localities may allow noncitizens to vote in local elections. In 2023, the D.C. Council amended the District of Columbia Election Code of 1955 to allow all noncitizen residents, including illegal aliens, to vote in its local elections.

More than 230 of the noncitizens who voted are registered Democrats, the list shows. Less than 20 are registered Republicans. The remainder did not register with a party or registered with a third party. The list does not

No. CGC-24-611915, on substantially the same terms as set forth in the Settlement Agreement.

The Settlement Agreement provides: (1) payment of \$3,250 in attorney's fees and costs; and (2) injunctive relief agreeing that the City will not continue the guaranteed income program that Paul Wildes and Reed Sandberg alleged to be unlawful beyond September 2024 and an agreement that the City will not create a new guaranteed income program with the same eligibility criteria.

The settlement agreement comes in a lawsuit filed by Judicial Watch on January 9, 2024, on behalf of taxpayers against San Francisco Mayor London Breed, City Treasurer José Cisneros, the director of the city's Office of Transgender Initiatives, and City Administrator Carmen Chu for violating the Equal Protection Clause of the California Constitution (*Phillips et al. v. Breed et al.* (No. 24-611915)). Mayor Breed announced the launch of the Guaranteed Income for Trans People

“This settlement is a huge victory for taxpayers who oppose taxpayer-funded woke racism and transgender extremism. The settlement agreement puts a stop to the illegal use of taxpayer money to hand out free cash to transgender individuals based on race and sex in blatant violation of California’s constitution.”

(GIFT) program on November 16, 2022. The mayor's office stated in a press release that the city would “provide low-income transgender San Franciscans with \$1,200 each month, up to 18 months to help address financial insecurity within trans communities.”

“This settlement is a huge victory for taxpayers who oppose taxpayer-funded woke racism and transgender extremism,” said Judicial Watch President Tom Fitton. “The settlement agreement puts a stop to the illegal use of taxpayer money to hand out free cash to transgender individuals based on race and sex in blatant violation of California’s constitution.”

In October 2023, a Judicial Watch open records request forced the release of records from the City of San Francisco showing the city prioritized tax money for Black and Latino transgenders (biological men) in the (GIFT) program, which also allowed illegal aliens to apply; allowed people who “engage in survival sex trades” to apply; and the use of the funds by participants was virtually unrestricted.

In May 2022, Judicial Watch won a court battle against California’s gender quota law for corporate boards. The verdict came after a 28-day trial. The verdict followed a similar ruling in Judicial Watch’s favor in April finding California’s race, ethnicity and LGBT quotas for corporate boards unconstitutional.

The City of Asheville, NC, in January 2022 settled a Judicial Watch federal civil rights lawsuit after agreeing to remove all racially discriminatory provisions in a city-funded scholarship program. Additionally, the city agreed to remove racially discriminatory eligibility provisions in a related program that provides grants to educators. 

Judicial Watch

Because no one is above the law!

Judicial Watch is a conservative, nonpartisan American educational foundation that promotes transparency, accountability and integrity in government, politics and the law. Judicial Watch advocates high standards of ethics and morality in America’s public life and seeks to ensure that public officials do not abuse the powers entrusted to them by the American people.
