Vancouver City Council

Anne McEnerny-Ogle, Mayor
Bart Hansen - Ty Stober - Erik Paulsen
Sarah J. Fox - Diana H. Perez - Kim D. Harless

City Council Meeting Agenda
June 1, 2026

In accordance with the Open Public Meetings Act (OPMA), the Vancouver City Council meeting will be open to in-person attendance. Options for viewing and/or participating in the meeting remotely will also be accommodated. The City Council will be attending this meeting in person.

All City Council workshops and meetings are broadcast (live closed captioning available), CVTV cable channels 23 / HD 323.

Public testimony will be accepted regarding any matter on the agenda below. Advance registration will be required.

Unless otherwise announced by the Presiding Officer, each speaker may testify once for up to three minutes under each public testimony opportunity below and will be asked to provide their name and city of residence for the record.

Testimony will be accepted in the following manner:

- **Written comments submitted in advance**: Email comments to the City Council until 12:00 p.m. June 1, 2026. Comments will be compiled and sent to the City Council and entered into the record.
- **In-person or remote testimony during the meeting**: Register in-person at City Hall. In-person registration is open until 6:30 p.m. on June 1, 2026. Instructions will be provided on-site. Register to testify online. Online registration is open until 12:00 p.m. on June 1, 2026.

Visit the city's website for more information and to register under Community Testimony or call the City Manager's Office at (360) 487-8600.

Further instructions for accessing the virtual meeting (for remote testimony) will be provided upon registration.

Upon request, printouts of agenda materials will be provided, including large print.

Workshops: 4:00-6:00 p.m.

Vancouver City Hall - Council Chambers - 415 W 6th Street, Vancouver WA

Inspire Vancouver Program Update
(Approximately 30 minutes)

Stacey Donovan, Cultural Services Manager, stacey.donovan@cityofvancouver.us

Clark County Sustainable Funding Team Update
(Approximately 30 minutes, to immediately follow the previous workshop)

David Perlick, Director of Parks, Recreation and Cultural Services, david.perlick@cityofvancouver.us

Transportation Improvement Program (TIP) 2027-2032
(Approximately 1 hour, to immediately follow the previous workshop)

Kate Drennan, Transportation Planning Program Manager, Ryan Lopossa, Streets and Transportation Manager, kate.drennan@cityofvancouver.us, ryan.lopossa@cityofvancouver.us

Council Dinner / Administrative Updates (6:00 - 6:30 PM)

Regular Council Meeting

6:30 PM
Vancouver City Hall - Council Chambers - 415 W 6th Street, Vancouver WA

Pledge of Allegiance

Call to Order and Roll Call

Approval of Minutes

Proclamations

Pride Month

National Pollinator Week

Great Outdoors Month

National Gun Violence Awareness Day

Community Communication
This is the place on the agenda where the public is invited to speak to Council regarding any matter on the Agenda not already scheduled for Public Hearing. (Separate instructions are provided for offering testimony on Public Hearing when applicable.) This includes the option to testify about Workshops. Members of the public addressing Council are requested to give their name and city of residence for the audio record. Speakers are to limit their testimony to a total of three minutes for all items combined.

Consent Agenda
The following items will be passed by a single motion to approve all listed actions and resolutions. There will be no discussion on these items unless requested by Council. If discussion is requested, the item will be moved from the Consent Agenda and considered separately – after the motion has been made and passed to approve the remaining items.

1. Contract Award - 2026 Resurfacing Project - C-102284

Staff Report: 106-26

Request: On Monday, June 1, 2026, award a construction contract for the 2026 Resurfacing Project to the lowest responsive bidder, Granite Construction Company, of Vancouver, WA, at the bid price of $2,205,896, which includes Washington State Sales tax, and authorize the City Manager, or designee, to finalize and execute the contract and authorize any legal action necessary to enforce the terms of the same.

Chris Sneider, Senior Civil Engineer, chris.sneider@cityofvancouver.us

2. Service Agreement - NE 18th Street - NE 138th Street to NE 162nd Street for Design Services- C-102271

Staff Report: 107-26

Request: On Monday, June 1, 2026, authorize the City Manager, or designee, to finalize and execute a professional services agreement with Harper Houf Peterson Righellis Inc. for a contract amount of $2,817,466.52.

Leslie Degenhart, Civil Engineer 3, Hassan Abdalla, Engineering Manager, Leslie.Degenhart@cityofvancouver.us, hassan.abdalla@cityofvancouver.us

3. Contract Amendment - Increase the Maximum Expenditures for State of Washington DES 00819: Fleet Card Services - C-100675

Staff Report: 108-26

Request: On Monday, June 1, 2026, authorize the City Manager, or designee, to finalize and execute a contract amendment with WEX Bank to increase the current maximum approval from $300,000 to $600,000. The amended amount would be used to purchase fuel and EV charging.

Jacob Mahan, Senior Management Analyst, jacob.mahan@cityofvancouver.us

4. Interstate Bridge Replacement Intergovernmental Agreement Amendment

Staff Report: 109-26

Request: On Monday, June 1, 2026, authorize the City Manager, or designee, to execute Amendment No. 3 to contract GCB 3544 between the City of Vancouver and Washington State Department of Transportation. Extend the termination date to June 30, 2027.

Katherine Kelly, Program and Policy Development Manager, katherine.kelly@cityofvancouver.us

5. Vancouver Police Command Guild Collective Bargaining Agreement 2026-2028

Staff Report: 110-26

Request: On Monday, June 1, 2026, authorize the City Manager, or designee, to sign the collective bargaining agreement with the Vancouver Police Command Guild for 2026-2028.

Antoinette Gasbarre, Human Resources Director, Robert Prociak, People and Labor Strategy Manager, Antoinette.Gasbarre@cityofvancouver.us, Rob.Prociak@cityofvancouver.us

6. 2025 Affordable Housing Fund Temporary Shelter Contract Extensions

A RESOLUTION relating to temporary shelter; providing for adoption of an increased funding

award and timeline extension for the 2025 Share WHAT Shelter and YWCA SafeChoice Shelter agreements and authorizing the City Manager to execute agreements and other related documents and disburse funds in accordance with those agreements on behalf of the City of Vancouver consistent with the Affordable Housing Fund Council-approved funding awards.

Staff Report: 111-26

Request: On Monday, June 1, 2026, finalize and approve the resolution of the 2025 Affordable Housing Fund Temporary Shelter contract amendments, authorizing the City Manager, or designee, to execute agreements and other related documents and disburse funds in accordance with those agreements on behalf of the City of Vancouver consistent with the Affordable Housing Fund 2025 Council-approved contract funding increase and timeline extension.

Kimberly Kerlee, Senior Support Specialist, Samantha Whitley, Housing Programs Manager, kimberly.kerlee@cityofvancouver.us, samantha.whitley@cityofvancouver.us

7. Washington State Historic Society Heritage Capital Projects Grant

A RESOLUTION authorizing the City of Vancouver to apply for a Heritage Capital Projects grant from the Washington State Historical Society to fund rehabilitation of four buildings on Officers Row; providing for severability and an effective date.

Staff Report: 112-26

Request: On June 1, 2026, adopt a resolution supporting the City applying for a 2027-2029 Heritage Capital Projects grant from Washington State Historic Society to support structural preservation of Officers Row buildings 3, 4, 12, and 18.

David Perlick, Director of Parks, Recreation and Cultural Services, david.perlick@cityofvancouver.us

8. Approval of the Claim Vouchers

Request: Approve claim vouchers for June 1, 2026.

Public Hearings

The following item(s) are scheduled for public hearing. Members of the public addressing Council are requested to give their name and city of residence for the audio record. Unless otherwise announced by the Presiding Officer, speakers are to limit their testimony to three minutes for each public hearing.

9. Ordinance Adopting the Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Vancouver Municipal Code Title 20 Land Use and Development Code

AN ORDINANCE updating and amending the City of Vancouver 2026-2045 Comprehensive Plan, called Our Vancouver, repealing and replacing the City of Vancouver Zoning Map, and repealing and replacing Title 20 Land Use and Development Code of the Vancouver Municipal

Code, providing for severability and an effective date.

Staff Report: 103-26

Request: On Monday, June 1, 2026, upon second reading and a public hearing, finalize and approve the ordinance adopting the Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Vancouver Municipal Code Title 20 Land Use and Development Code.

Rebecca Kennedy, Deputy Community Development Director, Mark Person, Senior Planner, rebecca.kennedy@cityofvancouver.us, mark.person@cityofvancouver.us

Communications

A. From the Council

B. From the Mayor

C. From the City Manager

Community Forum

This is the place on the agenda where the public is invited to speak to Council regarding any matter. Members of the public addressing Council are requested to give their name and city of residence for the record. Speakers are to limit their testimony to a total of three minutes. Up to 90 minutes will be allotted for the Community Forum.

Adjournment

City Hall is served by C-TRAN. Route information and schedules are available online at www.c-tran.com. You also may reach C-TRAN at (360) 695-0123 for more information on times, fares, and routes.

Anyone needing language interpretation services or accommodations with a disability at a Vancouver City Council meeting may contact the City Manager's staff at (360) 487-8600 (RELAY: 711). Assistive listening devices and live Closed Captioning are available for the deaf, hard of hearing and general public use. Please notify a staff person if you wish to use one of the devices. Every attempt at reasonable accommodation will be made. To request this agenda in another format, please also contact the phone numbers listed above.

Inspire Vancouver

Inspire Vancouver Update

Stacey Donovan
Cultural Services Manager
Parks, Recreation and Cultural Services
June 1, 2026

Agenda

- Inspire Vancouver overview
- Progress to date
- Community engagement
- Work ahead and next steps

What is Inspire Vancouver?

Arts

Visual arts, music, dance, theater and literary arts

Culture

Shared traditions, values, languages, and creative expressions

Heritage

History, landmarks, folklore and passed down cultural resources

Science

Physical, natural, life, earth and space sciences and engineering and technology

Who Can Apply for Inspire Vancouver Grants?

Eligibility Requirements

- Primary purpose to advance or preserve arts, culture, heritage or science
- 501(c)3 nonprofit or individual with an eligible nonprofit fiscal sponsor
- Located within Vancouver city limits or provide at least 55% of your programs within Vancouver city limits
- Provide public programs or experiences for Vancouver residents

Not Eligible

- State and local government agencies
- Organizations that redistribute funds
- TV, radio, newspapers, magazines and internet-based media

Inspire Vancouver Work to Date

2025	Q1 2026	Q2 2026	Q3 2026	Q4 2026
• Begin cultural access tax collection • Create community-informed draft policy • Adopt cultural access policy	• Establish grant processes and procedures • Create program brand and identity • Establish available funding pool	• Hire staff • Launch website and social media channels • Design grant application portal • Community outreach and education	• Recruit and train grant review committee • Continued community outreach • Limited Innovation, Impact and Comprehensive grants open	• Distribute school funds • Award year one grants • Announce Capital grant timing for 2027 • Reporting

Community Outreach

- Focus on eligible individuals and organizations
- Grow social networks and program ambassadors
- Community info sessions
- Continue to develop communications around real time feedback
- Expand public outreach after grants are awarded

Work Ahead

Staff and commission

- Launch online grant management software
- Applications, scoring rubrics and guidelines
- Grant application workshops and one-on-one support
- Select grant review committee(s)

Staff Roles

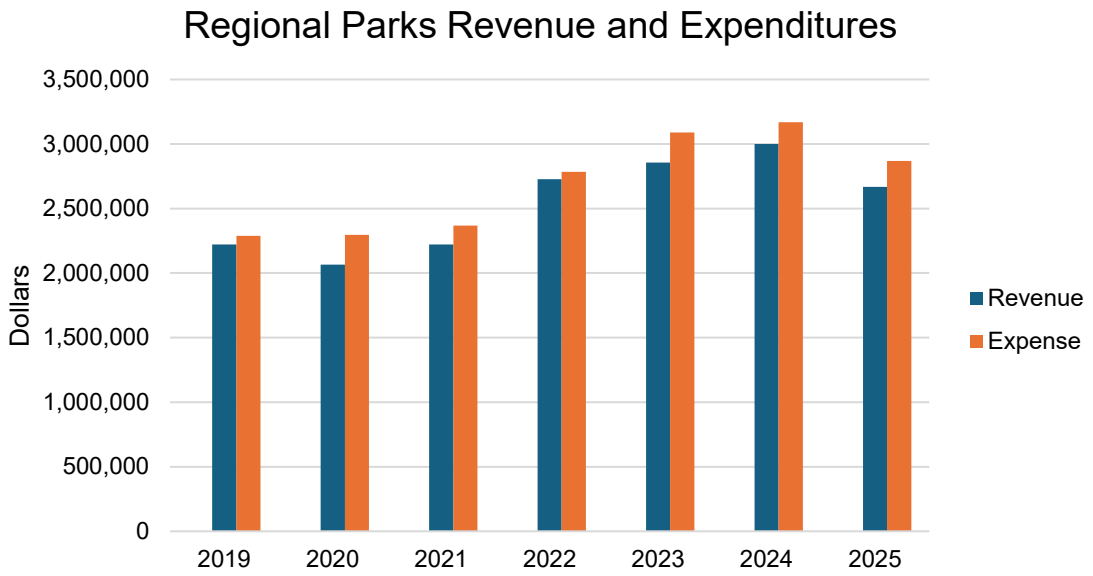
- Program supervisor
- Grant coordinator (2)
- Communications specialist
- High levels of direct support and communication are community and commission priorities

Discussion

Parks:
Regional Funding Task Team

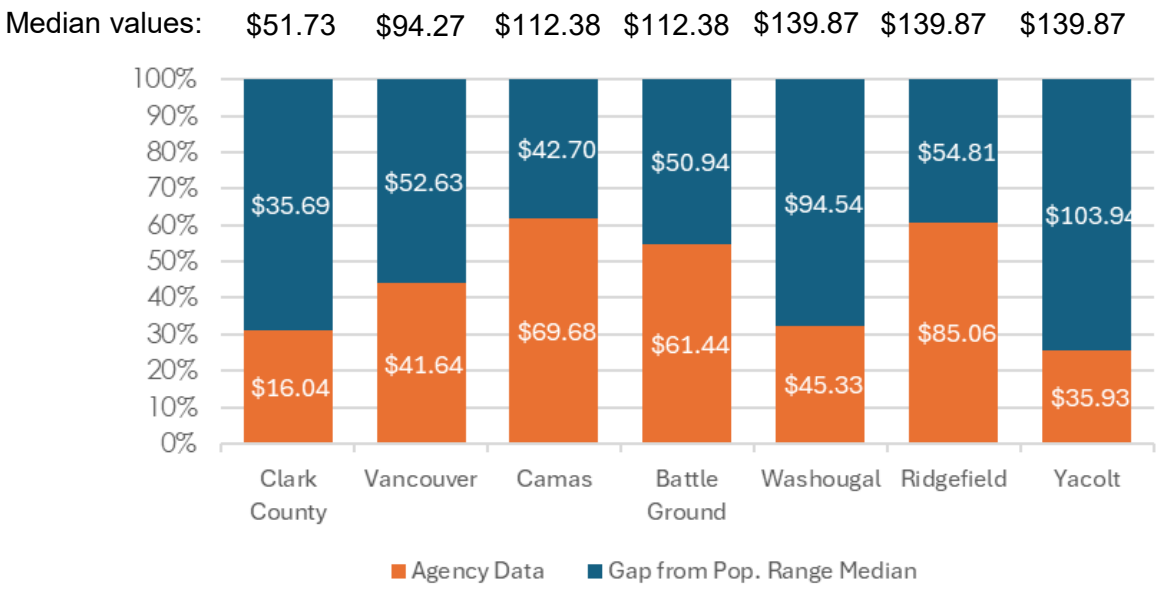
Clark County Public Works - Parks and Nature Division

June 1, 2026



Agenda

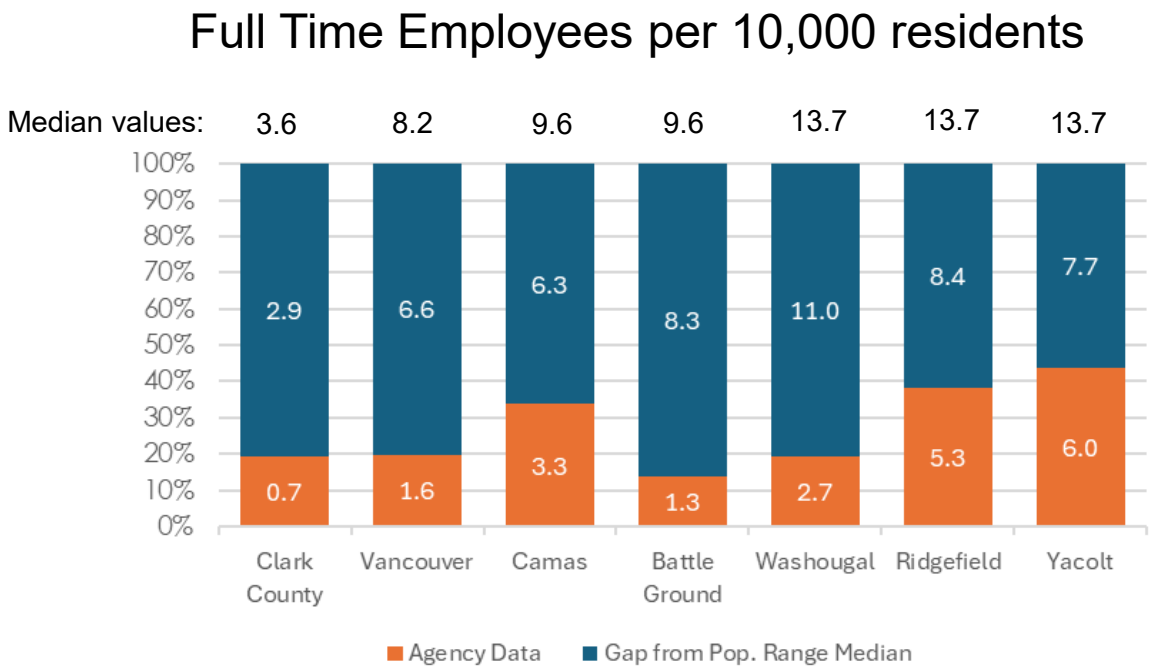
- Summary of Needs
- National Benchmarking
- Funding Models Comparison
- Recommended Next Steps



Summary of Needs – Clark County

- Clark County parks system is not meeting its existing needs due to a lack of available funding, rising costs, and rapid population growth.
- For the past 5 years, the County has had to use reserve funds just to cover the basic services at our Regional Parks.

National Benchmarking – Regional Expenditures

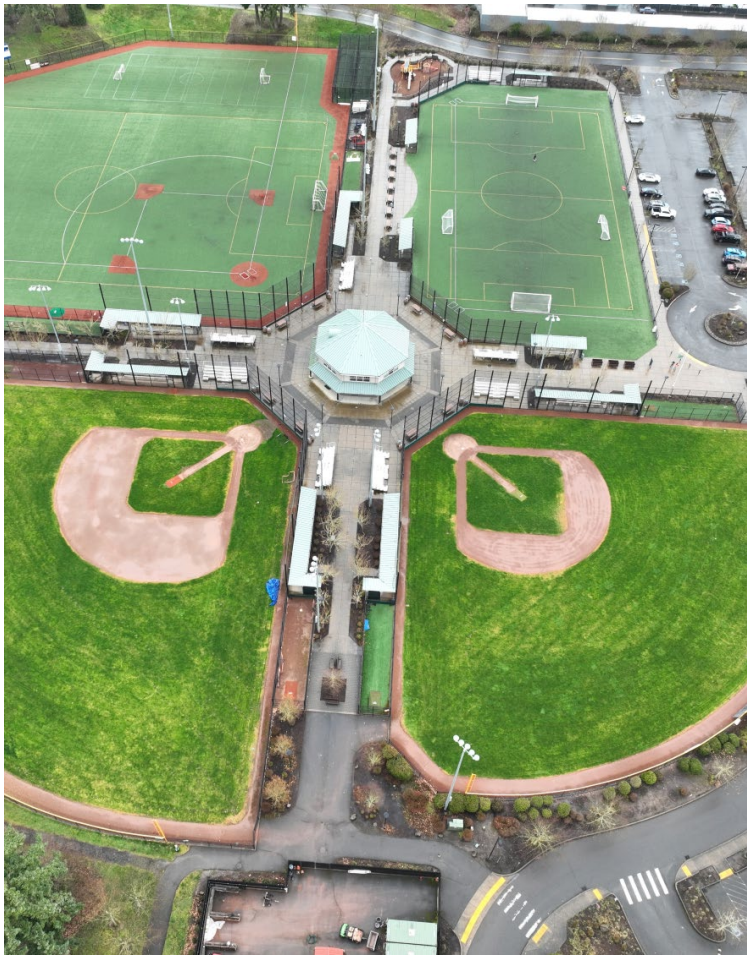


Parks Operating Expenditures Per Capita

All park systems are below the national median for operating expenditures of similar populations.

Each park system compared their metrics to the national median for communities of their size. Park system data are plotted in orange and the gap to meet the national median is plotted in navy blue.

National Benchmarking – Regional FTEs

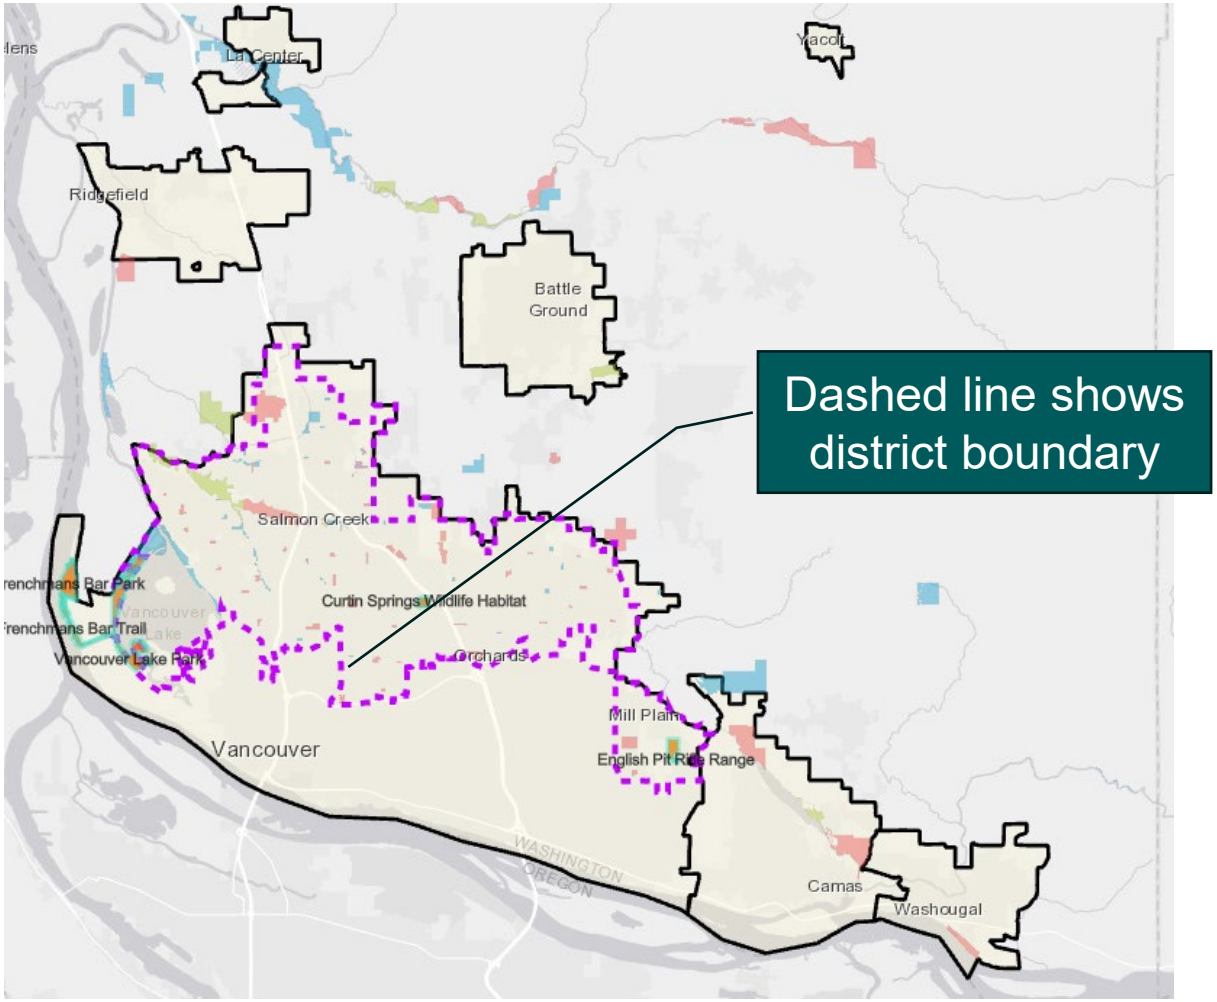


All park systems are below the national median for full time employees (FTE) per 10,000.

Each park system compared their metrics to the national median for communities of their size. Park system data are plotted in orange and the gap to meet the national median is plotted in navy blue.

Future Needs

- County expected to grow 34% over the next 20 years
- Parks systems need to grow to match these needs



Funding Models Comparison

	Metropolitan Parks District - funding structure	Regional Levy (county-wide)
Requires voter-designated boundary	●	
Funds cannot leave district	●	
Permanent levy	●	Voter renewal required
Board/Council oversight	●	●
Potential for shared revenue	●	●
Potential for shared resources	●	●
Funds can be used for operations (both parks and recreational services) and capital	●	●

Existing MPD: Greater Clark Park District

RECOMMENDED ACTIONS

1. **Conducting market research** to provide the data, feasibility evaluations, and **conducting public education** and other preparatory work needed for County Council to make a decision on a potential future ballot measure.

2. **Determining viability and process** for adopting either funding mechanism by conducting formal legal reviews.

3. **Developing a framework for revenue sharing** by directing county staff to continue to work with city representatives so that city park providers can also benefit from a potential revenue source dedicated to parks.

Next Steps

- Do you feel the process will provide the appropriate information for further Council consideration?
- What specific information will be helpful for your decision-making?

CITY OF Vancouver WASHINGTON

Transportation Improvement Program 2027 - 2032

Kate Drennan
Transportation Planning Manager
Community Development

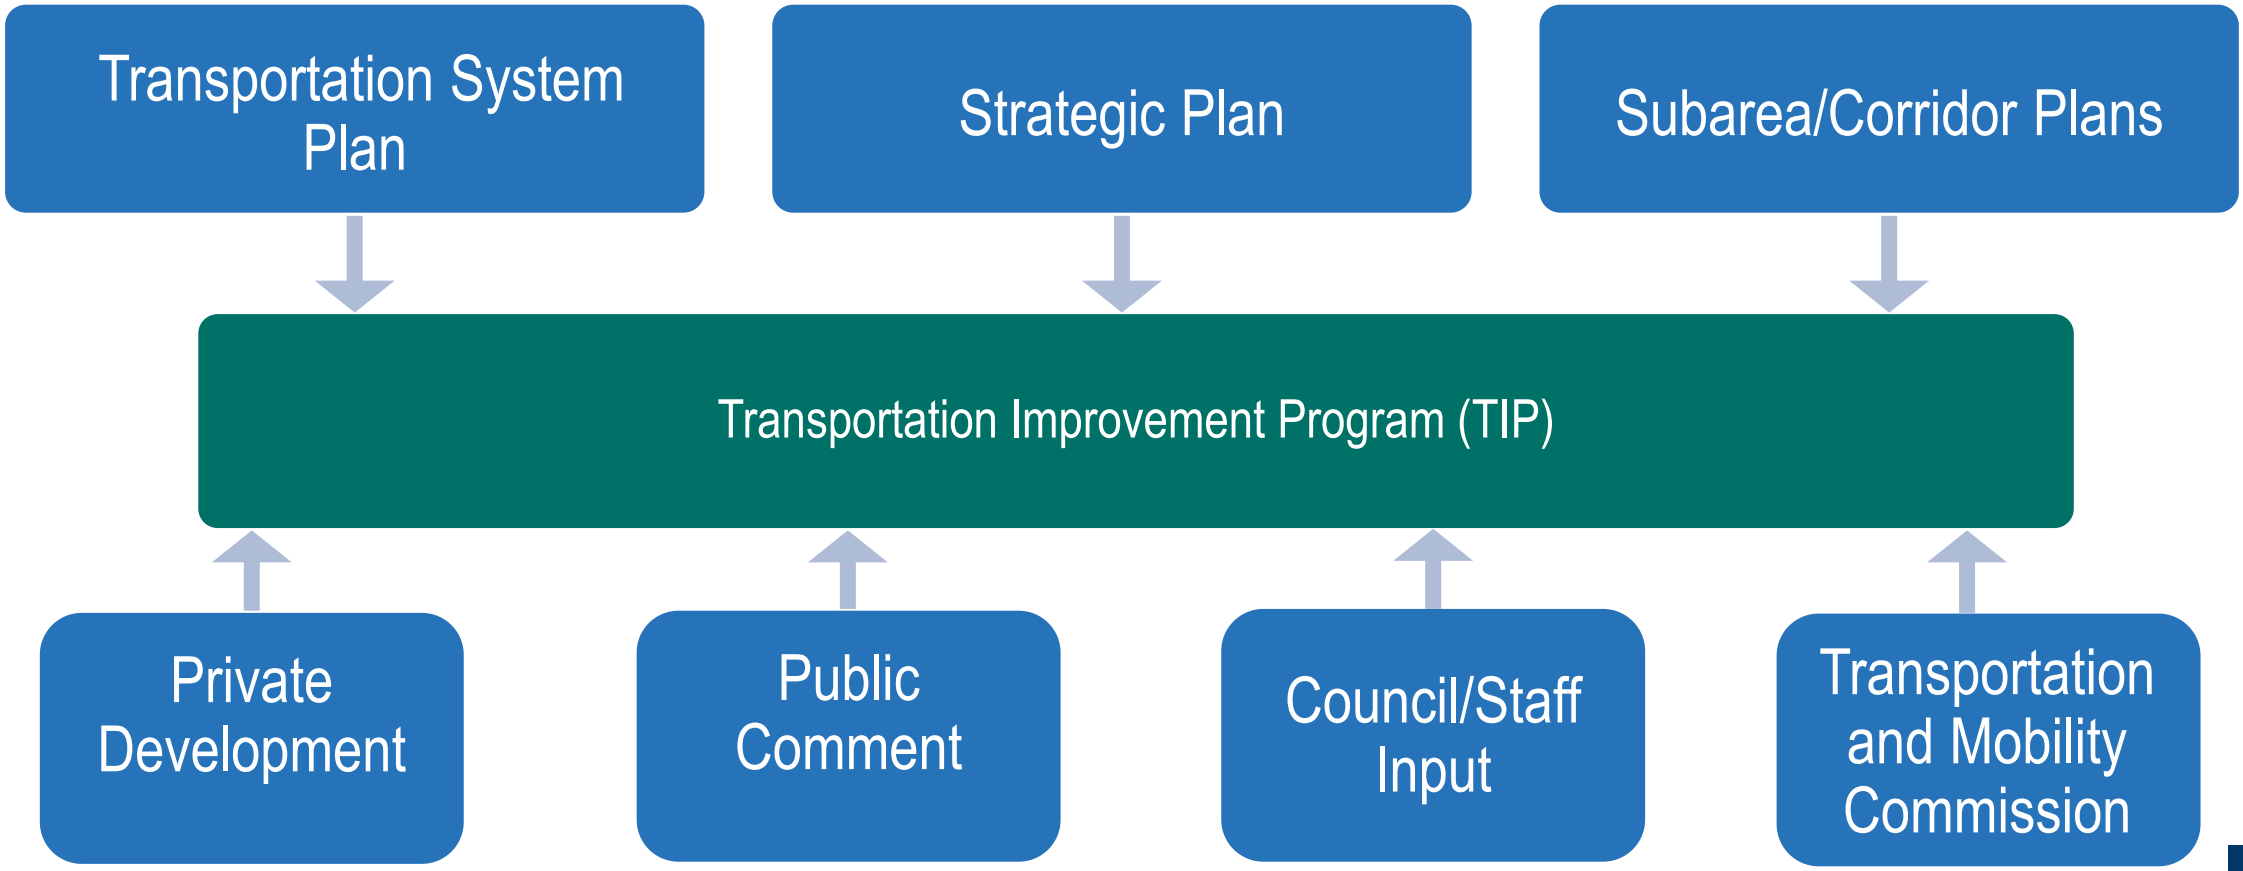
Ryan Lopossa
Transportation Division Manager
Public Works

June 1, 2026

Agenda

- Transportation Improvement Program (TIP) overview
- 2027-2032 updates
- Key projects
- Project prioritization
- Finances
- TIP Next Steps

Transportation Improvement Program Overview



What is the TIP?

- Six-year plan for future transportation capital projects and programs.
- Current draft is for 2027-2032.
- Updated annually per WA law.
- City Council approval by July 1.
- Helps with coordinated planning.
- Projects with State and/or Federal grants are required to be included.

What is in the TIP document?

- Introduction, finances, project lists, project detail sheets and maps
- Funded, partially funded, and unfunded project lists.
- Arterial, signal/lighting, and active transportation project lists.
- Projects added, removed and changes for the TIP this year.

Transportation Improvement Program Inputs

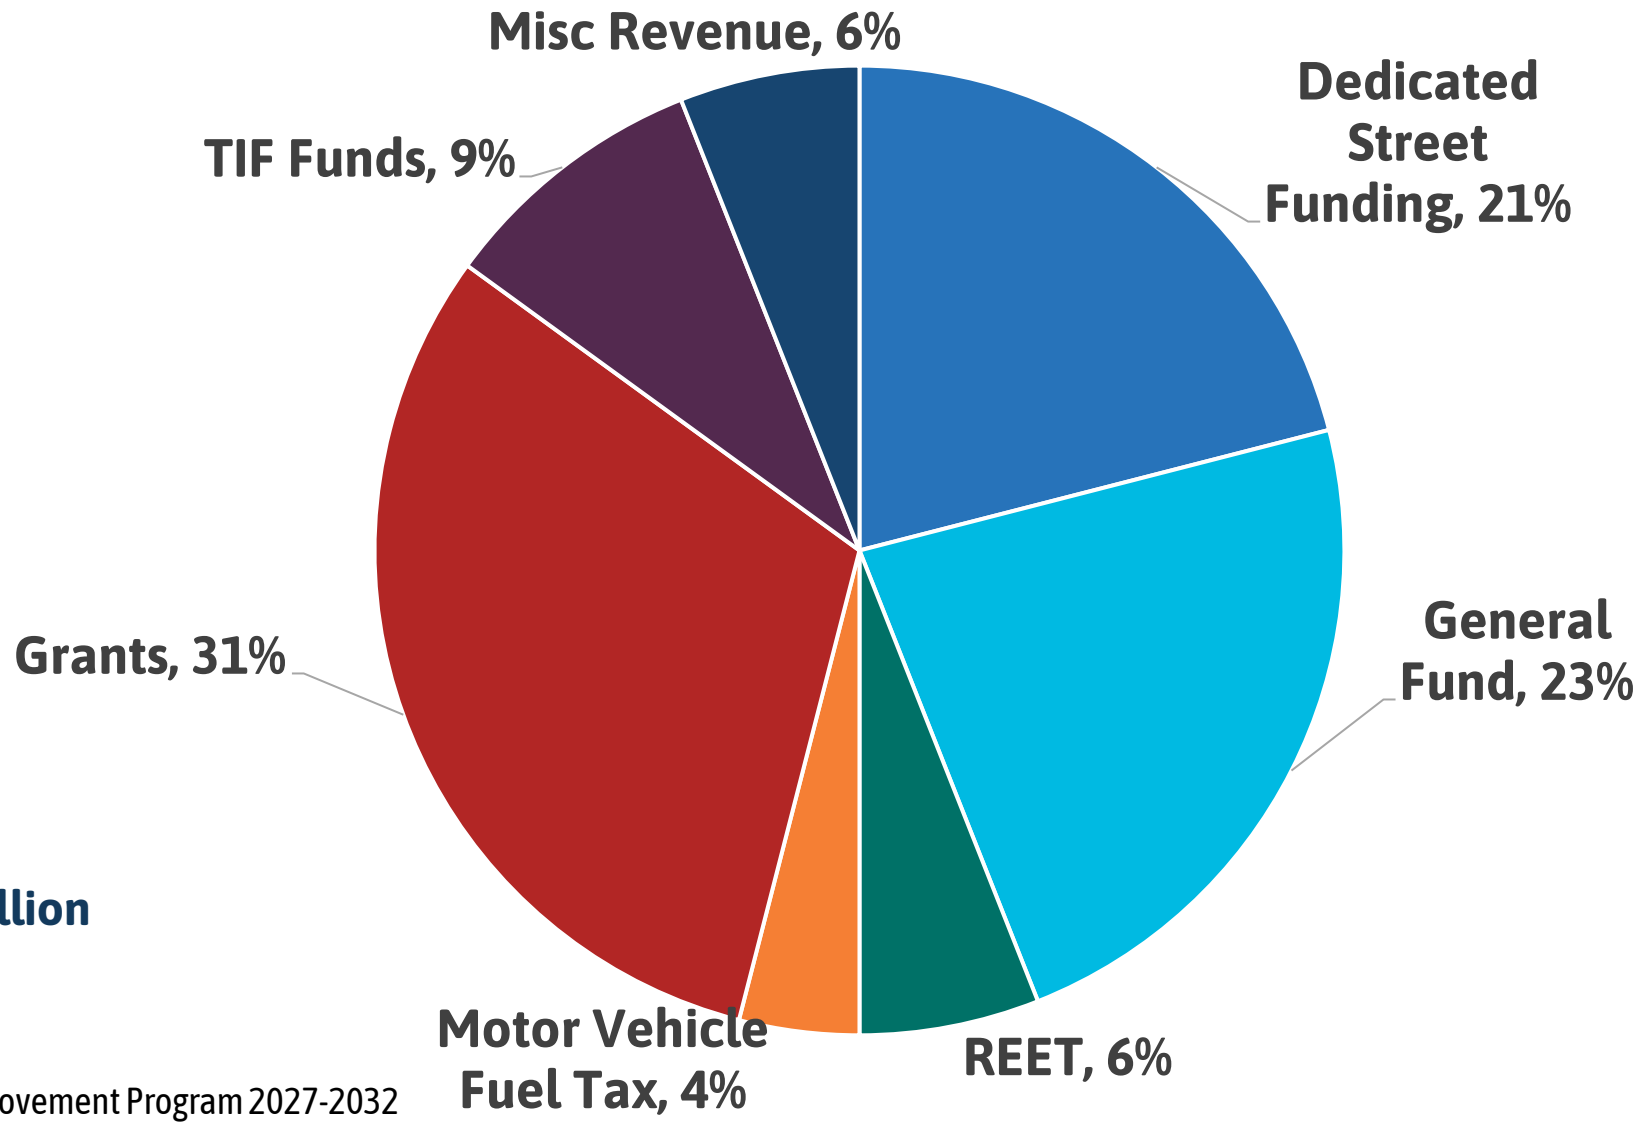
Transportation Improvement Program Update

What are the proposed changes for 2027-2032 TIP?

- Final TIP with projects beyond the 6-year horizon; post-Comprehensive Plan adoption the 'long-term' projects will reside on the Capital Facilities Plan.
- Updated project scoring and prioritization – on pages 36-37
- Projects added/removed – on pages 39-42
- Arterial map classification changes - on page 174
- Public comments – on pages 14-20
- Full TIP document found at: City of Vancouver Transportation Improvement Program Document

Key Project Highlights

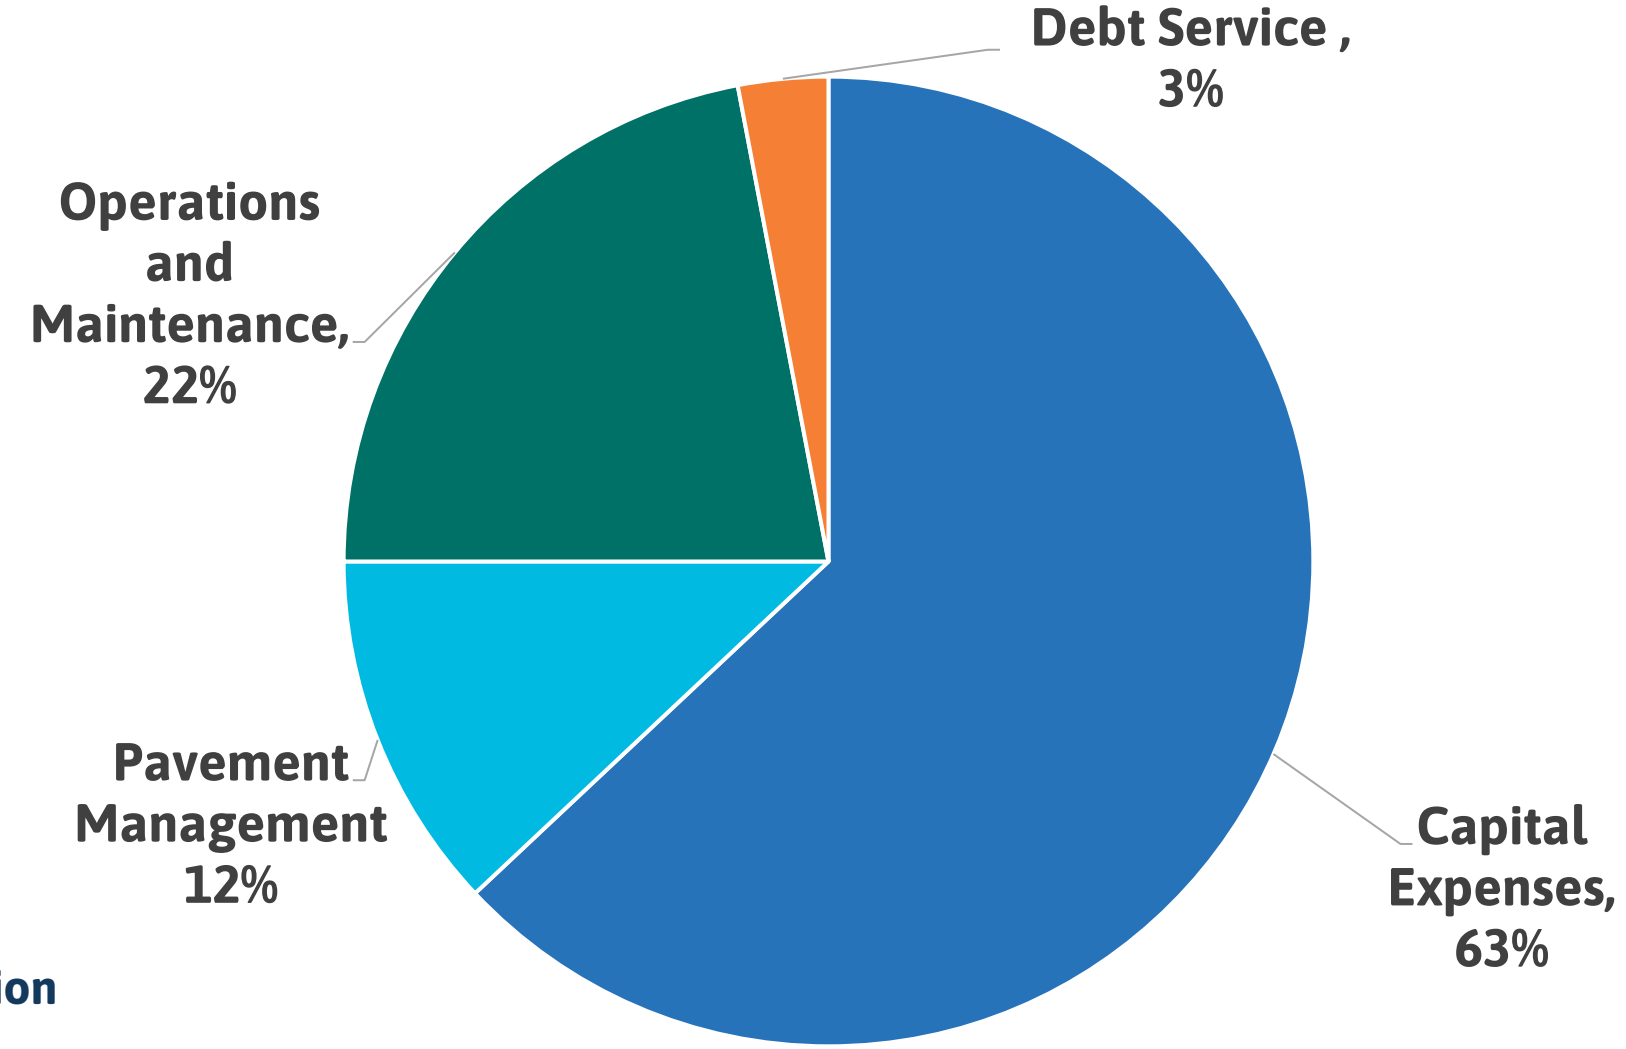
- Heights Mill Plain/ MacArthur Intersection
- Heights Grand Loop Project
- 18th Street (NE 97th to NE 107th)
- 192nd Avenue (SE 1st to NE 18th Street)
- NE 18th Street (NE 141st Avenue to NE 162nd Avenue)
- Multiple corridor improvement projects to create complete streets



Project Scoring and Prioritization

Categorize projects into near-, medium-, and long-term groups

Phase 1	Phase 2	Phase 3
Where to Invest	**When to Invest**	**Cost v. Benefit**
Equity Index	Pavement Opportunities	Cost *(Estimated Project Total)*
Collisions	Coordination	
Essential Places	Quick Wins	Benefit *(Equals Phase 1 Score Plus Phase 2 Score)*
Future Growth Areas	Right-of-Way Impacts	
	Environmental Impacts	



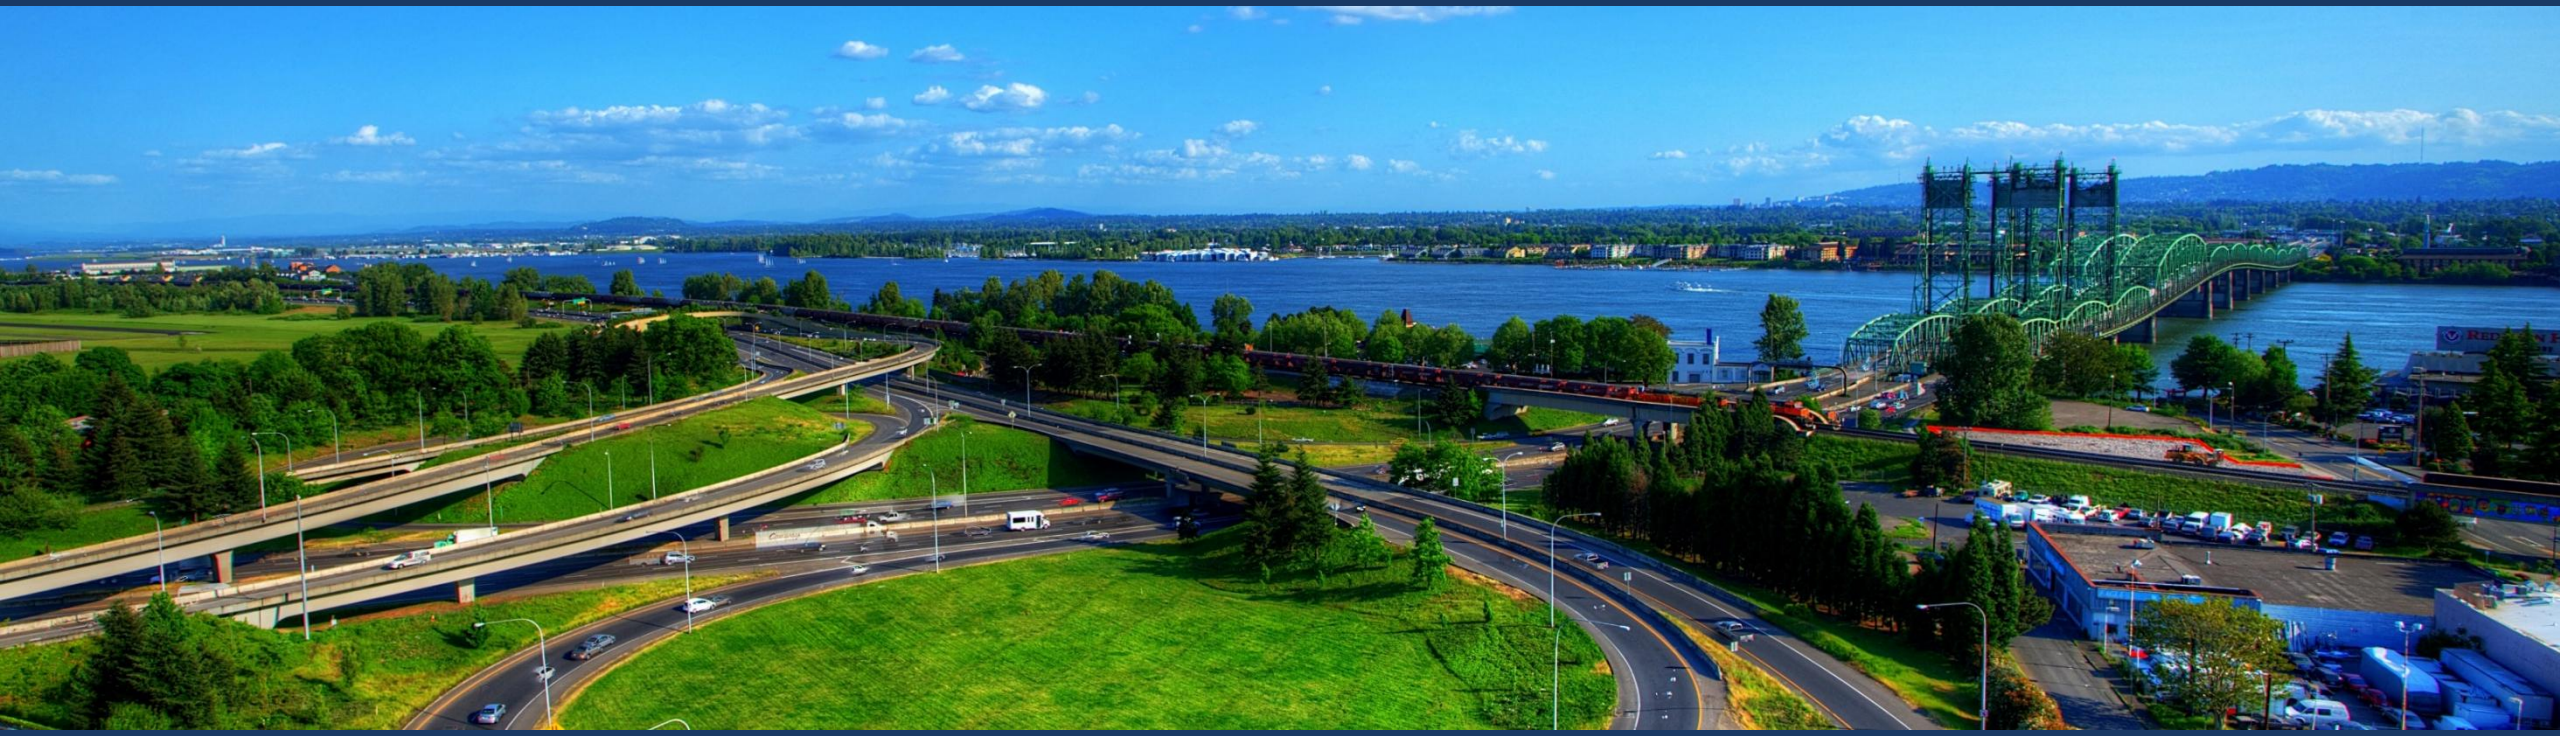
Priority
Groups
Near-Term
Medium-Term
Long-Term

Streets Revenue Operating and Capital (2025)

Total: $77.4 Million

Streets Expenses Operating and Capital (2025)

Total: $92.6 Million



Next Steps

Public Hearing on Council Agenda for June 15, 2026 for adoption

Transportation and Mobility Commission made formal recommendation to adopt on May 5, 2026.

www.cityofvancouver.us/tip

Discussion & Thank You

RESOLUTION NO._____

A RESOLUTION adopting the City of Vancouver's Comprehensive Six-Year Transportation Improvement Program for 2027-2032 and the City's Arterial Street System and Classification Map.

WHEREAS, pursuant to RCW 35.77.010, the Vancouver Department of Public Works has prepared the Comprehensive Six-Year Transportation Improvement Program for 2027-2032 ("2027-2032 TIP"); and

WHEREAS, the purpose of the 2027-2032 TIP is to ensure that the City will have available advance plans as a guide in carrying out a coordinated street construction program; and

WHEREAS, the City's Arterial Street System and Classification Map ("Arterial Classification Map") is maintained within the 2027-2032 TIP; and

WHEREAS, City Council annually reviews proposals and makes classification designation changes on the map where the use of a roadway is inconsistent with its current arterial designation; and'

WHEREAS, notice of the time and place for a hearing on the 2027-2032 TIP was published in accordance with law; and

WHEREAS, the City Council conducted a public hearing on June 15, 2026 at 6:30 p.m., where it considered the 2027-2032 TIP and determined to adopt it.

NOW, THEREFORE,

BE IT RESOLVED BY THE CITY OF VANCOUVER:

Section 1. Legislative Findings. The above recitals are adopted as the legislative findings of Vancouver's City Council in support of adoption of this Resolution.

Section 2. City Council adopts the attached Exhibit A, the 2027–2032 Comprehensive Six-Year TIP, including the Arterial Street System and Classification Map. Staff are further authorized to pursue grants and loans, and to acquire real property rights through any legal means for projects listed in this Six-Year TIP.

Section 3. The City Manager or their designee is hereby directed to file the 2027-2032 Comprehensive Six-Year TIP with Arterial Street System and Classification Map with the Washington State Department of Transportation within 30 days of adoption of this Resolution.

ADOPTED at regular session of the Council of the City of Vancouver on June 15, 2026.

_____
Anne McEnerny-Ogle, Mayor

Attest:

_____
Natasha Ramras, City Clerk

Approved as to form:

_____
Nena Cook, City Attorney

Letter from Transportation Leadership

Hello neighbors,

Thank you for your interest in Vancouver's Transportation Improvement Program (TIP). This plan plays a vital role in shaping a safe, efficient, and sustainable transportation network for our community.

Each year, we update our Six-Year TIP to plan for future projects that enhance mobility, safety, and accessibility across the city. These projects range from planning studies to construction of major infrastructure improvements, all supporting Vancouver's Strategic Plan and ensuring that our transportation system serves everyone—whether traveling by car, bike, transit, or on foot.

The 2027-2032 TIP builds on key efforts, including the recent adoption of the Transportation System Plan (TSP) and ongoing city-wide comprehensive planning efforts, which will guide policies, programs, and projects with a strong emphasis on safety, access, sustainability, and equity. This update also continues investments in neighborhood traffic calming, multimodal safety, and accessibility improvements, while pursuing grant opportunities to expand active transportation connections and upgrade key corridors.

Funding for these projects comes from various sources, including local and state taxes, vehicle license fees, and state and federal grants. We encourage you to explore the TIP, share your feedback, and help shape Vancouver's transportation future by visiting the TIP website.

Your voice is essential as we work to enhance transportation options and improve the quality of life in our city. Thank you for being part of this effort!

Steven R. Wall, P.E.
Public Works Director

Ryan Lopossa, P.E.
Transportation Division Manager

Transportation Improvement Program Overview

The City of Vancouver's 2027-2032 Transportation Improvement Program (TIP) is an update of the City's 2026-2031 TIP. The TIP is a technical document for transportation improvements over a six-year period. For more information about our street system, how it is funded, and how money is spent, visit Street System - Needs and Strategies website.

The State of Washington law (RCW 35.77.010) requires the City to prepare a TIP annually that is consistent with and implements our adopted comprehensive growth management plan. The TIP identifies capital transportation system improvement projects and includes a policy to work with affected property owners to preserve railroad right-of-way in the event a railroad ceases to operate.

For information about the City's Comprehensive Plan, contact Vancouver Planning at 360-487-7803 or visit the Comprehensive Plan website. For questions or more information about specific transportation projects, please contact Vancouver Public Works at 360-487-7130, or visit the City's website.

Projects are added to the TIP each year as needed based on input from staff, the development community, adopted subarea plans, other agencies, advocacy groups, community and as new grant opportunities arise. Projects are removed from the TIP each year once they are constructed. In some cases, a project is removed because the project is no longer needed although this is rare. TIP suggestions and questions can be submitted on the TIP Comment Form for consideration.

A City of Vancouver Arterial Street System and Classification Map which designates roadways functionally classified as Arterials pursuant to VMC 11.80.040 and VMC 9.02.040 is adopted and attached hereto.

The 2027-2032 TIP is utilizing a similar prioritization process that was used to score the Transportation System Plan (TSP) projects. Scoring criterion are created to reflect the strategic goals, city policies, and management directives. The scored priority groups are near-term, medium-term, and long-term; and can be found on the left side of the partially funded and unfunded project within 6-year lists.

2027-2032 TIP Highlights

Neighborhood Traffic Calming Program: Funded at $300,000 annually, this program works with community members to enhance neighborhood safety and livability.

Multimodal Safety and Accessibility Program: For 2026-2027, the program will focus on implementing key safety and mobility improvements along Upper Main Street, McGillivray Blvd., Garrison Rd. and the Burnt Bridge Creek Trail Crossing on Hazel Dell Ave.

Grant Efforts:
We are pursuing opportunities to fund active transportation connections, fill sidewalk gaps, increase crossing safety, and upgrade arterials from state and federal sources.

Other Major Projects: The 2027-2032 TIP identifies funding for many projects, which require several years for planning, design, right-of-way, and construction phases. These include:

- Heights Mill Plain/MacArthur: Project is fully funded with construction anticipated to commence in early 2026.

- Heights Grand Loop Project: Project is fully funded with construction anticipated to commence in 2027.

- NE 18th Street (NE 97th Avenue to NE 107th Avenue): Right-of-way acquisition and final engineering design is currently underway with construction planned for early 2027.

- NE 192nd Avenue (SE 1st Street to NE 18th Street): Project is partially funded with preliminary engineering underway in 2024, and the right-of-way phase is anticipated to get underway in 2027.

- NE 18th Street (NE 141st Avenue to NE 162nd Avenue): Project is partially funded with preliminary engineering underway in 2026 and continuing into 2027.

Policies

Key Policies from Transportation System Plan

Adopted Jan. 8, 2024

TN1 - 15-Minute Neighborhoods: Make walking, rolling, and small mobility convenient through mixed-use zoning and investment in complete corridors to serve all travel modes. Foster redevelopment within strategic development nodes to support 15-minute neighborhoods.

TN2 - Climate Corridors: Develop climate corridors to mitigate climate impacts through greener streets, street tree canopies, natural plantings for stormwater management, linear parks, and other climate resilient techniques. Use City-owned right-of-way to create a network of corridors that support climate adaptation and safe and healthy mobility as climate change occurs.

TN3 - Community Streets: Develop guidance and encouragement for community use of the right-of-way, including plazas, parklets, “streateries,” open streets events, public art, and demonstration projects.

CC1 - Complete Corridors: Create complete corridors throughout the city that connect growth areas, support business, serve transit, and increase safety. Corridors connect destinations and include identifying parallel options.

CC2 - People-Based Metrics: Plan, design, and evaluate projects and developments using people-focused metrics that prioritize person throughput, safety and comfort. Use the metrics to evaluate facility performance and post-project evaluations.

CC3 - Street Standards: Adopt street standards that create comfortable, inviting multimodal streets. Use NACTO standards as primary guidance and integrate the latest best practices from WSDOT, AASHTO, and MUTCD for facility selection and design, traffic control, and signage and striping. Adopt into standard plans referenced in VMC Title 11.

CC4 - Vision Zero: Adopt a Vision Zero policy committing to end traffic fatalities and serious injuries on Vancouver streets by 2040. This policy would be a resolution to address the intersecting factors that lead to fatal crashes, such as unsafe behavior, alcohol and drug impairment, street design, and traffic speeds.

CC5 - Project Delivery: Deliver maintenance, capital, and development projects in an effective, efficient manner with clear and transparent communication to the community.

T1 - Access to Transit: Prioritize sidewalk and crosswalk gaps adjacent to transit stops, particularly along equity routes. Identify first/last mile barriers to major transit stops and address on a rolling basis.

T2 - Enhanced Transit Corridors: In coordination with C-TRAN, build a network of Enhanced Transit Corridors where higher level of transit service (frequency, hours of operation, stop amenities) are desired based on existing and future density and equity needs.

T3 - Transit and Land Use: Support transit through compact land uses and policies that incentivize transit use.

T4 - Microtransit: Integrate shared and emerging mobility technology and tools with C-TRAN microtransit zones to provide a suite of mobility options, especially in lower-density areas without high-frequency transit.

LS1 - Low-Stress Bicycle and Small Mobility Network: Adopt a citywide low-stress BSM network that prioritizes safety and comfort for people of all ages and abilities. Target a density of low-stress facilities every half-mile.

LS2 - Pedestrian Priority Streets: Adopt a network of Pedestrian Priority streets where safety and comfort for people walking and rolling is prioritized. Assign categories (primary, secondary) based on the roadway classification, level of demand, and existing and planned land uses. Use these categories to recommend desired facilities and amenities (shade, lighting, seating, etc.).

LS3 - Active Transportation Navigation: Support walking, rolling, and small mobility by making it easy and intuitive to navigate the city and find destinations.

LS4 - Small Mobility and Walking/Rolling Programming: Complement infrastructure with robust programming that encourages and educates people about the benefits of walking, rolling, and small mobility.

G1 - Development Review: Work with development community to establish a shared set of requirements and expectations for how development can support transportation.

G2 - Citywide Parking Policy & Code: Update parking code and policies to right-size the amount of parking developed with future growth and create safe streets, compact urban form, and encourage non-driving forms of transportation.

G3 - Parking Management: Effectively manage on and off-street parking resources through adoption of policies, systems, and tools throughout the city.

G4 - Downtown Parking: For those who drive downtown, create a user-friendly, well-managed, and rightsized “park once” environment where people can walk or roll between destinations without moving their car.

G5 - Transportation Demand Management (TDM): Require transportation demand management to reduce drive-alone trips, offer all travelers more mobility choices, and incentivize behavior change to more walking and rolling, biking, carpooling, and transit trips.

F1 - Data Collection and Monitoring: Use data to track travel pattern changes over time.

F2 - Climate Impacts: Adopt policies that will help meet the City's goal of zero carbon emissions by 2040.

F3 - Technology for System Management: Embrace technology as a way of managing the transportation system without expanding capacity.

F4 - Electric/Autonomous Vehicles: Set City policy around EV / AV usage and role in achieving climate goals.

F5 - Emerging Mobility: Update City policies for how shared mobility and emerging mobility vendors shall operate in Vancouver. Create data standards, data sharing agreements, and vendor requirements. Integrate equity through reduced costs for people with low incomes.

F6 - Curb Management: Develop policies and programs that efficiently manage valuable curb space, recognizing how changing travel patterns have placed high demands on this resource.

Comprehensive Plan Policy for Asset Management

"Vancouver Comprehensive Plan 2011-2030", Adopted Dec. 16, 2013

PFS-35 - City public facility assets shall be systematically managed to balance full life cycle costs, performance, risk, and service levels, using best management practices and data.

Financial Policies for Capital Planning and Asset Management

Adopted Dec. 2, 2024

Asset management is a systematic process whereby the assets of the City (e.g., water system, sewer system, transportation system, property, buildings, etc.) are operated, maintained, replaced and upgraded cost-effectively. It includes operations and maintenance costs, as well as capital investments which can take the form of new construction, rehabilitation, or replacement.

1. In pursuit of an asset management strategy that prioritizes safety, equity and climate action, the City will:

    - Consider the climate impacts of asset investments and pursue asset management strategies that reduce its contribution to climate change over time.

    - Consider equity impacts of capital projects and asset management strategies and prioritize investments that improve equity within the City.

    - Consider the potential improvements to community safety associated with capital investments and prioritize investments that improve community safety, particularly in the transportation system.

2. Asset management best practice involves managing the performance, risk, and expenditures on infrastructure assets in an optimal and sustainable manner throughout their lifecycle covering planning, design, construction, operation, maintenance, and disposal. The City shall integrate the principles and best practices of asset management such as those embodied in the International Infrastructure Management Manual or equivalent methodology in the management of its assets. Asset inventory will be maintained with maintenance, repair and deferred maintenance costs identified and updated on an annual basis. Maintenance of City assets shall be addressed on a current need, rather than deferred into the future.

3. The resources that support current outstanding debt on street improvement projects shall, once that debt is retired, be dedicated to ongoing support of the capital program of the City's street fund. Eligible uses shall be consistent with the City's adopted Transportation System Plan, Comprehensive Plan, and annually updated six-year transportation improvement program.

4. A **six-year city-wide Capital Improvement Program** shall be developed annually and shall provide a prioritized list of reasonably funded projects and those in process of securing funding. Capital improvement plans for utility assets shall be updated no less frequently than every two years. The comprehensive plan will identify longer-term capital needs by program area.

5. Funding for capital projects, including major facilities maintenance projects, will be allocated in a manner that balances community needs with city priorities, the potential for attracting matching funds, and the ability to reduce or limit expenses in future years.

6. The City's objective is to incorporate a "pay-as-you-go" approach (using available cash and current resources) in the Capital Improvement Program. Proceeds from the sale of city capital assets no longer utilized in operations will be deposited consistent with the initial ownership of the asset and invested in the highest priority city capital projects. Debt funding shall be considered for large capital projects with long useful life to better reflect inter-generational equity.

7. The capital budget will be adopted at the same time the City operating budget is adopted. The capital budget will only include fully funded projects. The capital budget will only contain projects identified in the Capital Improvement Program.

8. A **capital repair appropriation** will be maintained for unanticipated major repairs of general operating facilities and for emergency replacement of general fund equipment. Additions to the capital repair contingency reserve will be made based on council directions.

9. Impacts on net annual operating and maintenance costs will be identified as part of the funding considerations for new capital projects such as buildings, parks, and street enhancements. This includes identifying potential reductions in maintenance costs if improvements are funded. The necessary funds to operate the capital facility will be identified at the time the capital budget is adopted.

10. To provide long-term sustainable utility services, the City will structure utility rates so that system reinvestment including major repair, rehabilitation and replacement of utility assets can be fully funded on an ongoing basis in accordance with the City's "pay as you go" policy. This will be achieved through a plan of smaller incremental rate increases to maintain affordability. As identified by the utility capital improvement plan, rates will also include an investment component for capacity improvements and system expansion.

11. A **system development reserve** will be maintained to fund growth related capital costs. All systems development charge revenue will be contributed to the fund.

Title VI Policy Statement

It is the policy of City of Vancouver that no person shall, on the grounds of race, color, and national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination in any operation of City of Vancouver as provided by Title VI of the Civil Rights Act of 1964 and related statutes.

This policy applies to all operations of City of Vancouver, including its contractors and anyone who acts on behalf of City of Vancouver. This policy also applies to the operations of any department or agency to which City of Vancouver extends federal financial assistance. Federal financial assistance includes grants, training, equipment usage, donations of surplus property, and other assistance.

Prohibited discrimination may be intentional or unintentional. Seemingly, neutral acts that have disparate impacts on individuals of a protected group and lack a substantial legitimate justification are a form of prohibited discrimination. Harassment and retaliation are also prohibited forms of discrimination.

Examples of prohibited types of discrimination based on race, color, or national origin include: Denial to an individual any service, financial aid, or other benefit; Distinctions in the quality, quantity, or manner in which a benefit is provided; Segregation or separate treatment; Restriction in the enjoyment of any advantages, privileges, or other benefits provided; Discrimination in any activities related to highway and infrastructure or facility built or repaired; and Discrimination in employment.

Title VI compliance is a condition of receipt of federal funds. The Title VI Coordinator is authorized to ensure compliance with this policy, Title VI of the Civil Rights Act of 1964, 42 USC § 2000d and related statutes, 42 USC 4601 to 4655; 23 USC 109(h); 23 USC 324; DOT Order 1050.2; EO 12250; 28 CFR 50.3 and 49 CFR part 21.

Public Outreach Section

Public Outreach

The City of Vancouver engages and educates the public on current and future projects in hopes to gain feedback and comments. There is an online Project Dashboard available for reviewing all projects listed in the TIP as well as all utility projects in our 6-Year Capital Improvement Program. There have been efforts to reach out to community organizations and partners serving historically excluded and underrepresented communities. Our outreach channels include, but are not limited to neighborhood associations, community-based organizations, Be Heard website, newsletters, and social media. The Transportation and Mobility Commission and City Council are informed of the overall progress of the TIP throughout the year and provide feedback and suggestions. TIP suggestions and questions can be submitted on the TIP Comment Form for consideration.

Public Comments and Responses for 2027-2032 TIP

Comment 3/6/2025:
I'm unsure if this is the correct channel for this request, but I believe Andresen, north of Mill Plain, would benefit from traffic calming. Specifically, I think a radar speed sign would work well, but I am not a professional! The road is 35MPH, but folks really accelerate from Mill Plain, north on Andresen, toward Burnt Bridge Creek. There is no specific time, it is quite frequent. A motor cycle was completely destroyed a few weeks ago. The rider was taken away in an ambulance. I encourage you to come out and see how fast people take off on Andresen, down the hill toward Mill Plain, and back.

Response:
Thanks for sharing your concerns regarding speeding on Andresen. We've noticed that as well – especially in the more recent years. We typically do not put traffic calming on our arterial streets due to the large volumes of traffic on these corridors as well as these corridors serving as primary EMS response routes. As such, we look for other measures to help reduce speeding such as targeted enforcement and radar feedback signs that remind drivers how fast they're travelling. I will initiate the process to have one of those signs installed for the northbound direction since I suspect that is where many are exceeding the limit. I'll also share this information with our VPD Traffic Unit so they can add this to their targeted enforcement list.

Comment (follow-up to response above) 5/26/2025:
Checking in on this as nicer weather seems to encourage speeders. I totally understand there may be a lengthy process to install a radar feedback sign, but would like to know the likelihood of one being installed and an approximate timeline, if possible.

Response:
The radar feedback signs have been ordered. These are taking about 4-5 months for delivery.

Comment 5/13/2025:
Project location to include in TIP:
Techcenter, I work in the area and do t always geel safr walking die to people driving, especially at the 4 way stop near HP that needs some looking at and really a lpt of that area. People are hardly going 25, usually 40+ through there, with other area closures lots of people are cutting through there. Speed bumps would be a great addition through there!!!!

Typically travel around the community by:
Drive and walk

> **Response:**
> Thank you for sharing your concerns regarding traffic conditions on Tech Center Drive. We've recently added mobility lanes to this corridor between Tech Center Place and Mill Plain Blvd to improve the safety of those that travel using a bicycle or other small mobility device. We will evaluate the speeds of cars travelling along the corridor to see if additional improvements are needed to address pedestrian safety.

Comment 5/14/2025:
Remove from TIP:
NE 112th Ave. – McGillivary

Need the most improvement:
Everywhere. Especially NE 112th between 18th & SR 500. And NE 28st between NE 112th and NE 138th

Typically travel around the community by:
Car

Community's transportation needs:
Stop the happy projects and fix what we got. Our roads are falling apart before our eyes. Getting weary of dodging potholes on almost every street in East Vancouver.

> **Response:**
> Thank you for your feedback. NE 112th Avenue between Mill Plain Blvd and NE 28th Street is scheduled for pavement resurfacing and other corridor improvements in 2027. The segment of NE 112th Avenue from NE 28th Street to SR-500 will be resurfaced in the coming years. The segment of NE 28th Street from NE 112th Avenue to NE 138th Avenue is scheduled for pavement resurfacing in 2028.

Comment 8/27/2025:
Project location to include in TIP:
I live in Lincoln neighborhood and am most concerned about 39th Street between Main and Fruit Valley Road. Particularly after the light at Columbia going to Fruit Valley Road -- drivers are going too fast. It feels unsafe to cross as a pedestrian, even at times of day I would expect to be quiet. We need more speed limit signs, maybe some more of those blinky "slow down" ones, some sort of traffic calming, flashing lights or similar for crosswalks for bikes and pedestrians, a traffic light maybe at Kauffman.

Proposed project in TIP most benefit our community:
Lots of good ones. The interactive map is a great resource. Love seeing the recent speed bumps on Lincoln between 39th and however far they go.

Need the most improvement:
Traffic control to slow vehicles or safer crossing at 39th and Kauffman. More speed control on NW 45th street between Main and Lincoln. People go really fast and the elementary schools create a lot of traffic. 39th and Main Street are pretty backed up during rush hour but I think that's growing in the community.

Typically travel around the community by:
Mostly car and walking. Drive to 99th street transit center for CTRAN commute to Portland.

Response:
Thank you for your feedback. Over the past two decades, the City has made significant investments in the 39th Street corridor between I-5 and Fruit Valley Road to make this corridor safer for pedestrians, bicyclists and other vulnerable roadway users. We're continuing that work with the installation of a new enhanced pedestrian crossing on 39th Street at its intersection with Daniels Street to improve safety for pedestrians crossing 39th Street to access nearby Lincoln Elementary School. We're also evaluating the actual speed of vehicles moving through the corridor to determine if additional measures are needed to address speeding.

Comment 9/1/2025:
Proposed project in TIP most benefit our community:
39th and Fruit Valley RD. needs an all-around signal/ crosswalk light. This would increase safety by a busy industrial intersection near a 39th and Fruit Valley RD. needs an all-around signal/ crosswalk light. This would increase safety by a busy industrial intersection near a school zone which has high truck traffic.

Need the most improvement:
39th and Fruit Valley RD. needs an all-around signal/ crosswalk light. This would increase safety by a busy industrial intersection near a 39th and Fruit Valley RD. needs an all-around signal/ crosswalk light. This would increase safety by a busy industrial intersection near a school zone which has high truck traffic.

Typically travel around the community by:
Both e-bike and drive people driving too fast and people and bikes need a safer condition.

Response:
Thank you for your feedback. The City is currently analyzing the Fruit Valley Road corridor to determine what additional safety measures are needed to address both vehicle and pedestrian/mobility safety. This analysis will consider additional enhanced (signalized) pedestrian crossings of Fruit Valley Road including the intersection with W. 39th Street. We will also analyze this intersection to determine

whether the warrants for a new traffic signal are being met. We're also advancing a project that will eventually construct a parallel freight route west of Fruit Valley Road. This new route would take most of the freight traffic off Fruit Valley Road, lessening the impacts to the school, park and neighborhood and making the Fruit Valley Road corridor safer for everyone.

Comment 1/7/2026:
Need the most improvement:
The traffic light on 5th St. for the on ramp to I-5 is way too short. It is only 10 seconds and at most gets two cars through it before it turns red again. When traffic is heavy from Washington St. south, cars blocking the intersection don't even have time to clear out before the light for 5th St. goes red again. Can you please assess this and modestly lengthen the time of this light? Thanks for your consideration.

Typically travel around the community by:
Walk, but occasionally need to go into Portland and we are tied up with the short on ramp light.

Response:
Thank you for your feedback. City staff reviewed the intersection and determined it was under the jurisdiction of the Washington State Department of Transportation (WSDOT). WSDOT was made aware of the issue and has since made corrections to the signal timing and phasing.

Comment 4/8/2026:
Project location to include in TIP:
Evergreen Highway from Columbia Hatchery to 164th

Proposed project in TIP most benefit our community:
YES, Project 714 in the TIP is listed as unfunded. I am requesting that it be placed as "partially funded'. I am requesting a final engineering study be performed on the road to supplement our pre-engineering study and our neighborhood action plan. With this and agency write-offs, the Evergreen Highway Multi-Use Path would be shovel-ready, and our project would be completed in 5-6 years. Evergreen Highway in 2025 has had 3 deaths and a very high number of serious injuries. We have more traffic on this 714 route than on the route west of Ellsworth. In addition to high traffic, we have a high number of DUI arrests in our neighborhood. All working toward a very unsafe road for pedestrians, children, and bicyclists.

Need the most improvement:
Evergreen Highway, from the hatchery to 164th, needs a multi-use path.

Typically travel around the community by:
Car for groceries, walk for exercise, bike for fun

Community's transportation needs:
As a community, we were asked to participate in many action plans from the City. We participated. We are listed on every major action plan as a point of pride that we are a bike and pedestrian-friendly city. Yet since 2011, our neighborhood has been promised,

but other projects are now ahead of us. I would ask that the City prioritize our project and fulfill the promises to an overburdened community. We want to help, but we need this status change to take place so we can help. Otherwise, we are unable to gain grants from the Federal and State governments, and more people will die and be seriously injured on the Evergreen Highway. If our status were moved to partially funded, we could complete this project in 5 years because we are very close to being shovel-ready.

Response:
Thank you for your feedback. Over the past 20 years, the City has been working to advance multiple sections of the Evergreen Highway trail as funding becomes available. We are currently working on the segment between Chelsea Avenue and Image Road with the assistance of federal funding through the Southwest Washington Regional Transportation Council. We will continue to pursue additional funding opportunities for the remaining sections of the trail including the section between the Columbia Springs Fish Hatchery and SE 164th Avenue and once those funds have been secured, we can advance those projects into construction.

Comment 4/8/2026:
Project location to include in TIP:
Evergreen Highway from Columbia Hatchery to 164th

Proposed project in TIP most benefit our community:
YES, Trans ID #0741 in the TIP is listed as unfunded. I am requesting that it be placed as "partially funded'. I am requesting a final engineering study be performed on the road to supplement our pre-engineering study and our neighborhood action plan. With this and agency approvals, the Evergreen Highway Multi-Use Path would be shovel-ready, and our project would be completed in 5-6 years.

Need the most improvement:
Evergreen Highway, from the hatchery to 164th, needs a multi-use path.

Typically travel around the community by:
Car for groceries, walk for exercise, bike for fun

Community's transportation needs:
Yes, please move project 741 from the TIP to partially funded. This has been our community's #1 goal since 2011. We have cooperated with the city all along and have seen other projects completed before our project. We are listed on every major action plan of the city, yet we wait. Although we are grateful for the work that should be completed in 2026 for funding, this section of the road has fewer deaths and serious injuries, lighter traffic loads and DUI than Trans ID#0741. Literally, people are dying and seriously injured crossing the street. It has been this way for years. By moving Trans ID #0741, we will qualify for grants from the federal and state governments. It will save people's lives.

Response:
Thank you for your feedback. Over the past 20 years, the City has been working to advance multiple sections of the Evergreen Highway trail as funding becomes available. We are currently working on the segment between Chelsea Avenue and

Image Road with the assistance of federal funding through the Southwest Washington Regional Transportation Council. We will continue to pursue additional funding opportunities for the remaining sections of the trail including the section between the Columbia Springs Fish Hatchery and SE 164th Avenue and once those funds have been secured, we can advance those projects into construction.

Comment 4/16/2026:
Project location to include in TIP:
Build Project #0741, the current roadway is very dangerous for pedestrians

Proposed project in TIP most benefit our community:
Build Project #0741, the current roadway is very dangerous for pedestrians

Need the most improvement:
Evergreen highway

Response:
Thank you for your feedback. Over the past 20 years, the City has been working to advance multiple sections of the Evergreen Highway trail as funding becomes available. We are currently working on the segment between Chelsea Avenue and Image Road with the assistance of federal funding through the Southwest Washington Regional Transportation Council. We will continue to pursue additional funding opportunities for the remaining sections of the trail including the section between the Columbia Springs Fish Hatchery and SE 164th Avenue and once those funds have been secured, we can advance those projects into construction.

Comment 4/17/2026:
Project location to include in TIP:
07140

Proposed project in TIP most benefit our community:
0714

Need the most improvement:
East Old Evergreen Highway from the Fish Hatchery to 164th

Typically travel around the community by:
Car

Response:
Thank you for your feedback. Over the past 20 years, the City has been working to advance multiple sections of the Evergreen Highway trail as funding becomes available. We are currently working on the segment between Chelsea Avenue and Image Road with the assistance of federal funding through the Southwest Washington Regional Transportation Council. We will continue to pursue additional funding opportunities for the remaining sections of the trail including the section

between the Columbia Springs Fish Hatchery and SE 164th Avenue and once those funds have been secured, we can advance those projects into construction.

Comment 4/27/2026:
Project location to include in TIP:
~ AI conversation with commenter on City's bike network not included. ~
Yes this was a conversation with AI but its point is that the city is not doing its part to make a cohesive network. So, I suggest that we complete on project instead of starting new ones and more new and more new ones. Finish what is started first.

Need the most improvement:
Mill Plain and Brant, Andresen and Fourth Plain

Typically travel around the community by:
I make it a point to drive the same amount of miles as I ride my bike, Effectively turning my car into a hybrid.

Community's transportation needs:
Complete one project before starting a new one. The new three bike lanes near Burton road are lanes to no where. I understand they are probably federally funded but stop lollygaging. If the city wants to create a multi modal city then they have to start with completing a project. Connect the corridors.

Response:
Thank you for sharing your concerns. The city is implementing new and improved mobility lanes along our city streets through a number of programs and processes including our pavement management program, our capital improvement program and our complete streets program. By leveraging the funding from these existing programs, the city is able to implement a greater number of mobility improvements throughout our community. However, this does result in somewhat of a patchwork of improvements with a lot of disconnect. Over time, the City will endeavor to link all of these routes together to create a cohesive mobility network.

Financial Analysis Section

Financial Analysis

Funding Overview

The City of Vancouver's Transportation Improvement Program consists of three different project lists: funded projects, partially funded projects, and unfunded projects. Projects on the funded list are considered fully funded for design, right-of-way acquisition, and construction. Projects on the partially funded list have funding for design and/or right-of-way acquisition, but do not have full funding for the construction phase. Projects on the unfunded list do not have any funding allocated to them at this time. The City has refined the unfunded project list to projects that may receive funding in the 6-year horizon. Projects outside the 6-year horizon are on a separate project list.

Street Funding Strategy (now called Dedicated Street Funding)

Prior to 1995, the City began a street funding strategy for local revenue to use for transportation capital improvements. This strategy involved identifying a revenue source and then committing that revenue source for debt service on bonds. Proceeds from the bond sale were then leveraged with grant revenues to the maximum extent possible for transportation improvements. Coupled with impact fees and developer contributions, this strategy generated hundreds of millions worth of capital improvements but resulted in a cyclical search for new revenues to address the continued need for capital improvements. Since 2015, City Council searched for a reasonable mix of new revenue sources that could be used on a "pay-as-you-go" basis to fund capital improvements as well as halt the gradual decline in our system pavement condition index. Early in 2015, City Council established a goal to complete, by year-end *"an adopted street funding program that provides reliable, dedicated, long-term funding for streets, including pedestrian, bike and accessible infrastructure."* In late 2015, City Council enacted several revenue sources for streets including:

- Transportation Benefit District (TBD) and City Council enacted a revenue source; a $40 Vehicle License Fee. In summer 2025, the Vehicle License Fee increased to $50.
- Business License Surcharge (BLS) $20 per employee. In 2023, the City Council updated the business license surcharge calculation to said rate which was anticipated to provide additional revenue for transportation.
- Increased the Utility Tax on city-owned utilities dedicating additional revenue for streets.
- Dedicated the revenue sources used to pay debt service on bonds (as described above) would continue to be dedicated for street purposes on a pay-as-you-go basis as debt is retired.
- Dedicated the revenue from the increased gas tax resulting from the 2015 state gas tax increase would be used for median maintenance and street sweeping to accomplish service level increases for esthetic purposes.
- In 2023, the City Council and the TBD implemented a 0.01% increase to the sales tax which will bring in additional revenue for transportation.

The current Annual Report to the Vancouver Community and more information about the TBD can be found on the Transportation Benefit District website.

Local Funding Sources

Public Sources

- **Vehicle License Fee:** Fee authorized by the Vancouver Transportation Benefit District and collected by the Washington State Department of Licensing. Fee paid at time of license renewal, resulting in estimated annual revenue of $6.5 million.
- **0.01% Sales Tax:** Authorized by the Vancouver Transportation Benefit District and collected by the Washington State Department of Revenue. Tax paid on the sale of goods within the Vancouver City limits, resulting in estimated annual revenue of $6 million.
- **Motor Vehicle Fuel Tax, also known as State Gas Tax:** Typically, about $3.5 million per year.
- **Real Estate Excise Tax (REET)**: Varies per year, depending on real estate transactions.
- **Bonds (debt)**: Periodically, we sell bonds for transportation construction projects. Revenues to pay those debts come from several sources including gas tax, general fund, REET, and business license surcharge.
- **Business License Surcharge (BLS):** Beginning in 2023, we overhauled the way the BLS is calculated. Revenues are still uncertain due to the recent changes. Staff will continue to monitor revenues and plan future work accordingly.
- **Utility Tax:** 1.5% Utility Tax on gross receipts for city-owned utilities including water, sewer, surface water and solid waste. This tax raises $1.5 million annually.

Private Sources

- **Direct Construction**: Private developers are required to build or improve on-site roadways and may also be required to make off-site improvements to comply with concurrency or SEPA impacts.
- **Traffic Impact Fees (TIF)**: The City maintains a TIF program (fees paid by a developer per new trip) which historically covers about 10% of the annual construction program.
- **Proportionate Share Contributions**: Developer contributions toward an improvement project to meet concurrency or safety requirements.

Grant Programs

Federal Grant Programs

- **BUILD**: Better Utilizing Investment to Leverage Development (BUILD) Grant program from U.S. Department of Transportation for surface transportation infrastructure projects with significant local or regional impact.
- **Earmarks**: Earmarks are federal discretionary spending funds allocated by Congress for specific projects that are not required to go through the competitive grant allocation process.
- **CDBG**: Community Development Block Grant—periodically available for public street infrastructure (typically used for small sidewalk and ADA ramp improvements).

- **STBG**: Surface Transportation Block Grant funds are allocated by the SW Washington Regional Transportation Council and then, through a competitive grant process, to jurisdictions in the region.
- **USDOT Safe Streets and Roads for All (SS4A)**: To support planning, infrastructure, behavioral, and operational initiatives to prevent death and serious injury on roads and streets involving all roadway users, including pedestrians; bicyclists; public transportation, personal conveyance, and micro mobility users; motorists; and commercial vehicle operators.
- **USDOT Thriving Communities Program**: Planning, technical assistance, and capacity building support to enable communities to advance a pipeline of transformative infrastructure projects that will increase mobility, reduce pollution, and expand affordable transportation options, connecting communities to the essential opportunities and resources that will help them thrive.
- **USDOT Reconnecting Communities Program**: Advance community-centered transportation connection projects, with a priority for projects that benefit low-capacity communities, focusing on improving access to daily needs such as jobs, education, healthcare, food, nature, and recreation, and foster development and restoration, and provide technical assistance to further these goals. The primary goal is to reconnect communities harmed by past transportation infrastructure decisions, through community-supported planning activities and capital construction projects that are championed by those communities.
- There are other federal funding sources that are not listed.

State Grant Programs

- **Freight Mobility Strategic Investment Board (FMSIB):** This program provides resources to make strategic investments that support freight capacity and movement.
- **Transportation Improvement Board (TIB)**: Funded with a small portion of the state gas tax, TIB is the main source for state grant funds to state agencies. Vancouver competes with other urban jurisdictions in Washington State for funds from several TIB grant programs. For example: urban arterial; urban sidewalk; and complete street programs.
- **WSDOT Safety Routes to School**: Improve safety and mobility for children by enabling them to walk and bicycle to school. Funding from this program is for projects within two-miles of primary, middle and high schools (K-12).
- **WSDOT Pedestrian and Bicycle Program**: Improve the transportation system to enhance safety and mobility for people walking, biking, and rolling.
- **WSDOT City Safety Program**: Federal Highway Safety Improvement Program funds are allocated by the Washington State Department of Transportation (WSDOT) on a competitive basis to reduce fatal and serious injury crashes on city streets using engineering improvements and countermeasures.
- **WSDOT Regional Mobility Grant**: Supports local efforts to improve connectivity between counties and regional population centers and reduce transportation delays. The program funds: new transit services, park and ride lots, transportation demand management programs, transit speed and reliability improvements, new buses, transit service expansion.
- **WSDOT Sandy Williams Connecting Communities Program**: Improve active transportation connectivity for people walking, biking and rolling along and across

current and former state and legacy highways, focusing on communities with high equity needs, which are those communities most affected by barriers to opportunity and environmental health disparities.
- There are other state funding sources that are not listed.

Regional Programs

- **Transportation Alternative Program (TAP)**: Provides funding for alternative modes of transportation projects (i.e. modes other than vehicles) as a competitive grant process by the SW Washington Regional Transportation Council.
- There are other regional funding sources that are not listed.

Transportation Financial Data

The table and graphs on the next few pages show the historical and forecasted revenues and expenses for streets in the City of Vancouver.

STREET MAINTENANCE (Funds 102 & 103)

Street Maintenance Expenses	**2020**	**2021**	**2022**	**2023**	**2024**	**2025**
Pavement Management	5,861,428	15,826,629	13,959,111	16,522,743	16,129,836	11,315,692

Project Implementation Section

Project Implementation

Transportation capital improvement projects are added to the TIP through various sources. Sources may include the Transportation System Plan, Strategic Plan, Subarea/Corridor Plans, safety issues identified through the Local Road Safety Plan, congestion issues, private development, and public comments. Projects are vetted by transportation planning and public works staff and added to the TIP accordingly.

After projects are added to the TIP, opportunities are explored for funding and coordination with other work (for example pavement management or utility work). Project prioritizations are based on policy priorities, community impacts, feasibility and funding availability. Public outreach is most robust during the creation of the plans that identify these projects but are continued throughout the entire life cycle of the project. Once projects are fully funded and designed, construction can commence.

Community Engagement

The City is committed to equitable, accessible and transparent community engagement as a core part of development transportation plans and policies and complies with the Title VI of the Civil Rights Act of 1964, which requires equitable, fair and non-discriminatory community engagement.

The TIP Program is comprised of projects that have been identified through earlier processes and programs. As part of the annual TIP updated, the City reaches out to stakeholders, provides an interactive project dashboard for exploring the TIP projects, and responds to comments.

Updated information is provided on projects during construction through city websites, list serves, and other communication channels. Directly impacted community members are notified about construction projects in their area.

TIP Prioritization Section

TIP Prioritization Process

The City is utilizing a similar prioritization process that was used to score the Transportation System Plan (TSP) projects in 2023. The TIP Prioritization process organizes existing and potential transportation projects for the City in alignment with our strategic goals and policies. Scoring criterion are created to reflect our strategic goals, policies, and management directives. Each project is scored on all the criteria which helps ensure fair comparisons. The result is a transparent and defensible decision-making tool to allocate limited resources to long list of worthy project priorities.

The partially funded and near-term unfunded projects are scored. The scores for those projects can be found on the left side of the project lists. Fully funded projects are not scored because we have already obtained the resources necessary to construct them.

Prioritization Tool

The prioritization tool includes three phases. Phase 1 is geographic screening, phase 2 is implementation, and phase 3 is a correlation between the cost and benefits.

Phase 1 is geographic screening which helps determine where to focus the investment. The criteria consist of equity index, collisions, essential spaces and places, and future growth areas. Essential places may include schools, parks, trails, natural areas, community centers or other factors.

Phase 2 is implementation which helps determine when to invest. The criteria consist of pavement opportunities, coordination, quick wins, right-of-way impacts, environmental impacts. Quick wins may be extending a bike network or closing a sidewalk gap. Environmental impacts refer to critical and archeological areas.

Phase 3 is a correlation between the cost and benefits. Phase 1 and 2 added together are the benefits. The cost is the estimated total project cost. Grants and other funding (e.g. developer contributions) are incorporated if applicable. The table below is how the correlation between cost and benefits are utilized in determining the priority groups.

Cost and Benefit Correlation Table

	Very Low Benefit	Low Benefit	Medium Benefit	High Benefit	Very High Benefit
Very High Cost	Long-term	Long-term	Long-term	Medium-term	Near-term
High Cost	Long-term	Long-term	Medium-term	Near-term	Near-term
Medium Cost	Long-term	Medium-term	Medium-term	Near-term	Near-term
Low Cost	Long-term	Medium-term	Near-term	Near-term	Near-term
Very Low Cost	Medium-term	Medium-term	Near-term	Near-term	Near-term

Prioritize Projects

The final step of the TIP prioritization process consists of organizing the projects into priority groups: near-, medium-, and long-term. The near-term projects should be prioritized and included in the 6-year TIP. The medium- and long-term priority projects will be completed in

the 6 to 20-year horizon as funding allows. Although there are instances where medium- and long-term priority projects receive funding and are added to the 6-year TIP. Staff will continually evaluate the prioritization process to ensure that the priorities align with City goals.

2027-2032 TIP Priority Group Scoring Summary

1. Funded List – Not scored since we already have dedicated funds committed to build.
2. Partially Funded List
    - Near-term: TRANS-0274, 0279, 0603, 0607, 0898, 1368, 0839, 0879, 0888, 0946, 1350, 1357, 1358, 1359
    - Medium-term: TRANS-0444
    - Long-term: TRANS-0887
3. Unfunded List within 6-year
    - Near-term: TRANS-0723, 0880, 0891, 0907, 0936, 1367, 1427, 0843, 0873, 0924, 1351, 1353, 1354, 1428, 1429, 0719, 1430
    - Medium-term: TRANS-0716, 0927, 0937
    - Long-term: TRANS-0928
4. Unfunded List outside 6-year – Not scored since it is outside the six-year period.
5. Program List – Programs are citywide, therefore not scored.

TIP Changes Section

2027-2032 TIP Changes

This section provides an overview of the changes from the previous 6-year project list (2026-2031) to this year's 6-year project list (2027-2032). The changes are segmented by: projects removed; projects added; and other changes.

Projects Removed	TIP ID	Project Type	Comments
Northeast 137th Avenue - Northeast 49th Street to Northeast Fourth Plain Boulevard	TRANS-0275	Arterial Improvements	Project will be completed in 2026
Jefferson Street - West Evergreen to West Mill Plain Boulevard	TRANS-0531	Arterial Improvements	Project will be completed in 2026
Northeast 184th Avenue - Southeast 1st Street to Northeast 4th Street	TRANS-1347	Arterial Improvements	Project will be completed in 2026
E 33rd Street Complete Street and Paving Project - Interstate-5 Overpass to Saint Johns Boulevard	TRANS-0922	Active Transportation	Project will be completed in 2026
E 29th Street Complete Street and Paving Project - Interstate-5 Overpass to Saint Johns Boulevard	TRANS-0923	Active Transportation	Project will be completed in 2026
Waterfront Way Traffic Calming/ADA	TRANS-1113	Active Transportation	Project will be completed in 2026
Fort Vancouver High School Pedestrian Connection between Fourth Plain Boulevard and Northeast Campus Drive (SS4A)	TRANS-1126	Active Transportation	Removed from funded list due to right-of-way constraints
Saint Johns Boulevard Complete Street and Paving Project – State Route 500 to Northeast Minnehaha Street	TRANS-1365	Active Transportation	Project will be completed in 2026
Burton Road/ Northeast 28th Street Complete Street and Paving Project - Northeast Andresen Road to Northeast 127th Avenue	TRANS-1355	Active Transportation	Removed from partially funded list, to be completed as part of the pavement preservation program
Northeast 122nd Avenue Complete Street and Paving Project - Northeast 39th Street to Northeast 49th Street	TRANS-1356	Active Transportation	Removed from partially funded list, to be completed as part of the pavement preservation program

Van Plaza Drive Enhanced Pedestrian Crossing	TRANS-1144	Active Transportation	Project will be completed in 2026
Pavement Reconstruction Program	TRANS-0421	Program	Removed from program list, combined with the pavement preservation program
Main Street Promise	TRANS-0495	Arterial Improvements	Project will be completed in 2026
Fourth Plain Boulevard and East Reserve Street Enhanced Pedestrian Crossing (SS4A)	TRANS-1125	Active Transportation	Removed from funded list, combined with the TRANS-0899
Fourth Plain Boulevard and BBC Trail Crossing Intersection Mural	TRANS-1130	Active Transportation	Mural projects are not capital improvements

Projects Added	**TIP ID**	**Project Type**	**Comments**
Northeast 78th Street and Northeast 72nd Avenue Intersection Improvements	TRANS-1427	Signal and Lighting Improvements	New project added to the unfunded within 6-year list
West 11th Street/BNSF Crossing Grade Separation Project	TRANS-1428	Active Transportation	New project added to the unfunded within 6-year list
Northeast 112th Avenue Off Street Path – Northeast 18th Street to Northeast 51st Street	TRANS-1429	Active Transportation	New project added to the unfunded outside 6-year list
Northeast 112th Avenue/ Southeast Chkalov Drive Complete Street Project - Northeast 2nd Street to Southeast 3rd Street	TRANS-1430	Active Transportation	New project added to the unfunded within 6-year list

Other Changes	**TIP ID**	**Project Type**	**Comments**
Northeast Fourth Plain Boulevard - Enhanced Pedestrian Crossings (SS4A)	TRANS-0899	Active Transportation	Changed name to reflect project more accurately
Fourth Plain for All (ARPA)	TRANS-1364	Active Transportation	Changed name to reflect project more accurately
McGillivray Boulevard and Village Loop Drive Intersection Improvements	TRANS-0880	Signal and Lighting Improvements	Changed project type to reflect project more accurately, moved arterial to signal and lighting
Northeast 49th Street - Northeast 122nd Avenue to Northeast 137th Avenue	TRANS-0279	Arterial Improvements	Moved from unfunded outside 6-year to partially funded list

Northeast 112th Avenue/ Southeast Chkalov Drive Complete Street and Paving Project - Northeast 28th Street to Northeast 51st Street	TRANS-1350	Active Transportation	Moved from funded to partially funded list due to funding constraints
Northeast 112th Avenue/ Southeast Chkalov Drive Complete Street Project - Southeast 3rd Street to Southeast McGillivray Boulevard	TRANS-1351	Active Transportation	Moved from funded to unfunded within 6-year list due to funding constraints, changed name to reflect project more accurately
Mill Plain and Devine Intersection Improvements	TRANS-1368	Arterial Improvements	Moved from unfunded within 6-year to partially funded list, changed name to match Workday
Upper Main Street Complete Street and Paving Project - East 39th to Northeast 45th Street/Hazel Dell	TRANS-1352	Active Transportation	Changed name to reflect project more accurately
McGillivray Complete Street and Paving Project - Chkalov Drive to Southeast 164th Avenue	TRANS-0920	Active Transportation	Changed name to reflect project more accurately
Northeast 112th Avenue - East Mill Plain Boulevard to Northeast 28th Street Safety and Mobility Complete Street	TRANS-0719	Arterial Improvements	Moved from unfunded outside 6-year to unfunded within 6-year
Grand Loop Infrastructure Improvements	TRANS-0944	Arterial Improvements	Changed name to match Workday
North Devine Road - south of Mill Plain Boulevard to MacArthur Boulevard	TRANS-0893	Arterial Improvements	Changed name to reflect project more accurately
Northeast 86th/ Northeast 87th Avenues Safety and Mobility Complete Street	TRANS-1357	Active Transportation	Changed name to match Workday
Northeast 72nd Avenue Safety and Mobility Complete Street	TRANS-1358	Active Transportation	Changed name to match Workday
Northeast 97th/98th Avenues Safety and Mobility Complete Street	TRANS-1359	Active Transportation	Changed name to match Workday
Mill Plain/MacArthur Intersection Improvements	TRANS-0938	Arterial Improvements	Changed name to match Workday
Fourth Plain Boulevard and Watson Avenue Pedestrian Crossing (SS4A)	TRANS-1115	Signal and Lighting Improvements	Changed name to match Workday
Evergreen Trail - Chelsea to Image	TRANS-0740	Active Transportation	Changed name to match Workday

Northeast 18th and Devine Pedestrian Improvements	TRANS-0889	Active Transportation	Changed name to match Workday
Hazel Dell Avenue and Burnt Bridge Creek Trail Crossing Improvements	TRANS-0910	Active Transportation	Changed name to match Workday
Lincoln Elementary School Crossing Improvements (STRS)	TRANS-0914	Active Transportation	Changed name to match Workday
Garrison Road Sidewalk Infill - Mill Plain to Northeast 12th Street	TRANS-0943	Active Transportation	Changed name to match Workday
Walnut Grove Elementary School Sidewalk and Pedestrian Crossing Improvements (SRTS)	TRANS-1119	Active Transportation	Changed name to match Workday
MacArthur and Leiser Improvements	TRANS-0603	Arterial Improvements	Changed name to match Workday
Fruit Valley and Lakeshore Avenue Roundabout	TRANS-0887	Arterial Improvements	Changed name to match Workday
192nd Avenue On-Ramp to State Route 14 Signal	TRANS-0888	Signal and Lighting Improvements	Changed name to match Workday
Fourth Plain - 62nd - Andresen Multiuse Path	TRANS-0946	Active Transportation	Changed name to match Workday
Traffic Signal Sustainability2	TRANS-0237	Program	Changed name to match Workday
Neighborhood Traffic Management Program	TRANS-0240	Program	Changed name to match Workday
Multi Modal Safety and Accessibility Program	TRANS-0844	Program	Changed name to match Workday
Citywide Street Light Program	TRANS-0869	Program	Changed name to match Workday
Safe Routes to School	TRANS-1131	Program	Changed name to match Workday
Pavement Management Program	TRANS-0241	Program	Changed name to match Workday
Evergreen Highway Pathway - Southeast Image Road to Southeast 100th Court	TRANS-0843	Active Transportation	Changed name to reflect project more accurately

Non-City Projects Removed	**Agency**	**Comments**
State Route 500 Northeast Fourth Plain Boulevard to Northeast 76th Street – Complete Street (Planning Phase)	WSDOT	Completed

Six-Year Project Lists Section

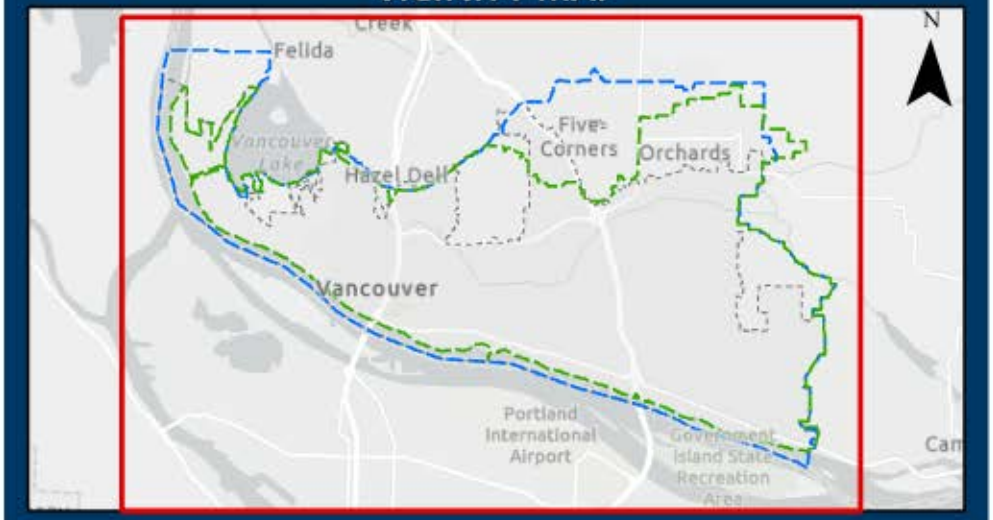
2027-2032 TRANSPORTATION IMPROVEMENT PROGRAM

Project: Traffic Signal Sustainability2



Project Extent: Citywide

To:

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Program
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
Ongoing program to update traffic signals at locations throughout the City. Updates may include but are not limited to adding left-turn phasing, signal heads, pedestrian push-button and detectors, as well as removing a type of operation, changing detector setup or making other improvements. Dedicated Street Funding contribute $200,000 per year, with annual program budget totaling $415,000 per year.

Justification:
Traffic signals need to be upgraded or replaced as they reach the end of their useful lives. This program reflects the implementation of that philosophy.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

FUNDING & SCHEDULE

Project Number: PRJ072330

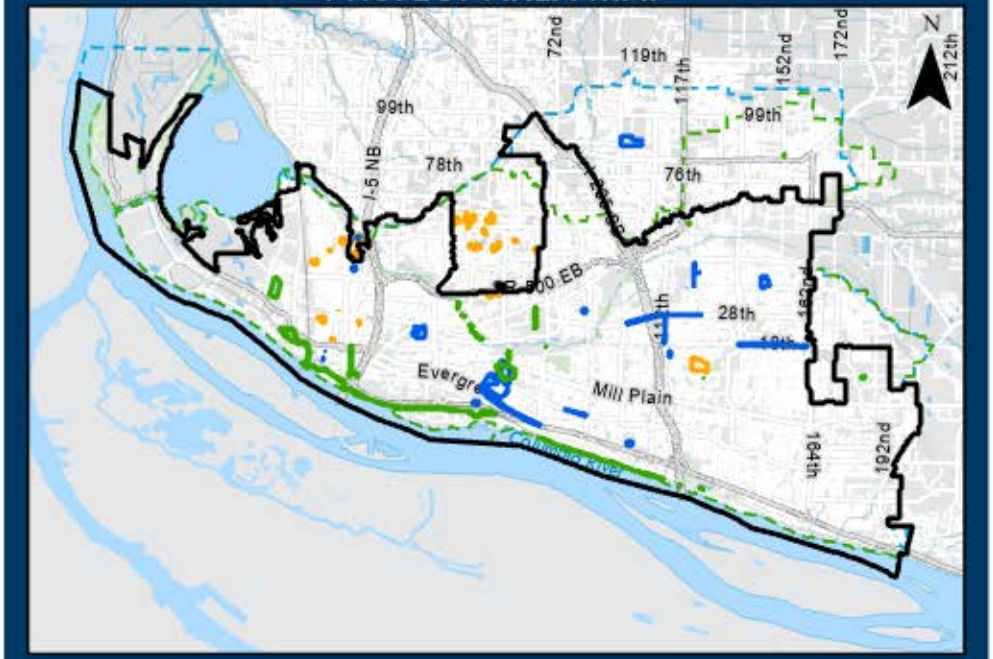
Grant Funded: No

Grant Amount: $

Total Project Cost: $

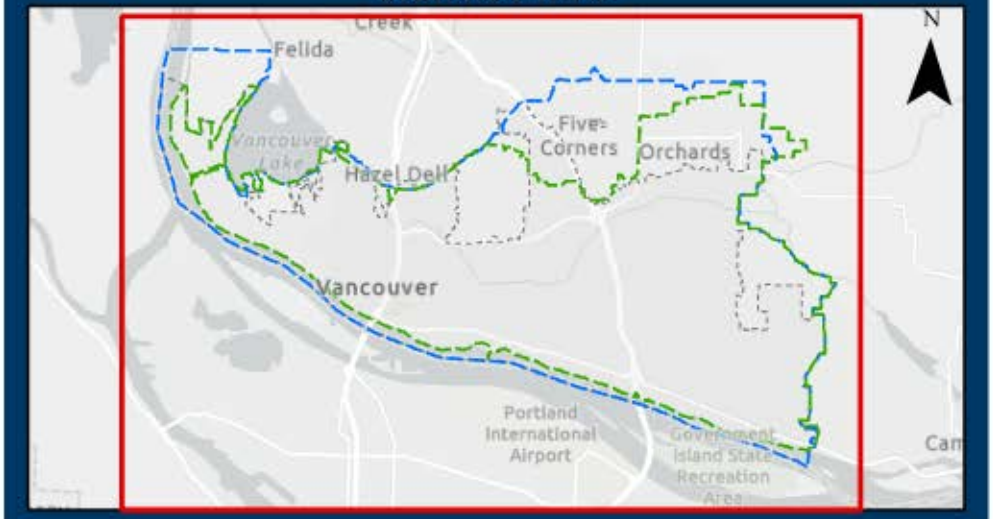
Start of Const. (year): Ongoing

*All project timing will be dependent on coordination with other departments including streets, pavement management, wastewater, water, and surface water.
**Utility CIP projects (WTR-XXX, SS-XXX, SW-XXX, SCIP-XXX) can be found in the 6 Year Public Works Capital Improvement Plan (CIP) document.



2027-2032 TRANSPORTATION IMPROVEMENT PROGRAM

Project: Neighborhood Traffic Management Program



Project Extent: Citywide

To:

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Program
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
Projects implemented as part of the ongoing Neighborhood Traffic Management (Calming) Program are intended to help slow traffic and enhance neighborhood livability. These projects may include education or infrastructure to reduce driver speeds; new or improved facilities for people walking, biking, and using mobility devices; and other strategies to increase safety and mobility in Vancouver neighborhoods. Dedicated Street Funding contribute $130,000 per year, with annual program budget totalling $300,000 per year.

Justification:
The Neighborhood Traffic Management (Calming) Program is important to reaching our Community Vision of "...Safe neighborhoods with a distinct quality and proud identities linked by parks and greenspace as well as a transportation system that provides mobility option".

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

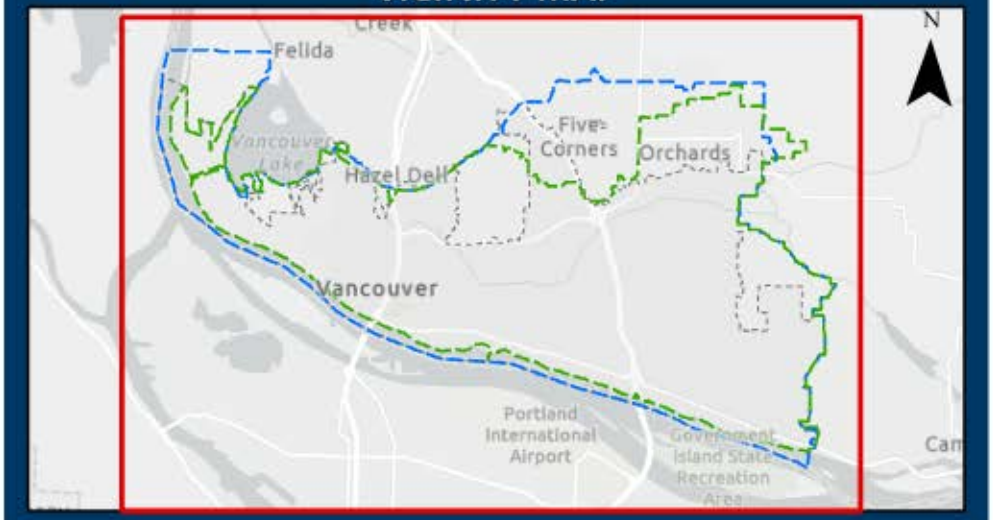
2027-2032 TRANSPORTATION IMPROVEMENT PROGRAM

Project: Pavement Management Program



Project Extent: Citywide

To:

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Program
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
This ongoing program improves and maintains pavement surfaces through surface overlay, micro surfacing and slurry treatments citywide. Upgrades may include new ADA ramps, traffic striping and markings. Annual budget of approximately $12M in existing money plus approximately $600,000 in Dedicated Street Funding dollars for a total annual budget of approximately $12.6M.

Justification:
To improve and maintain pavement surfaces citywide. Program identified in the Vancouver Comprehensive Plan (2011-2030).

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

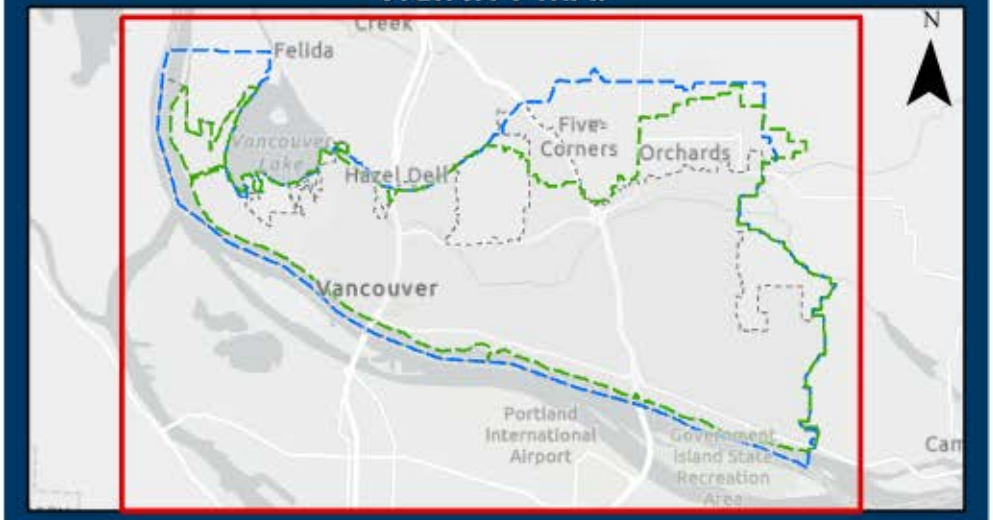
2027-2032 TRANSPORTATION IMPROVEMENT PROGRAM

Project: Bridge Inspection Program



Project Extent: Citywide

To:

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Program
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
Ongoing citywide inspection and maintenance of our bridges, as required to meet state and federal regulations. This program, formerly contracted with Clark County, is being dropped by the county and now requires hiring professional services to complete federally mandated bridge inspections and load ratings. Program budgeted at $50,000 per year.

Justification:
Maintain safe bridges in compliance with state and federal regulations. Program identified in the Vancouver Comprehensive Plan (2011-2030).

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

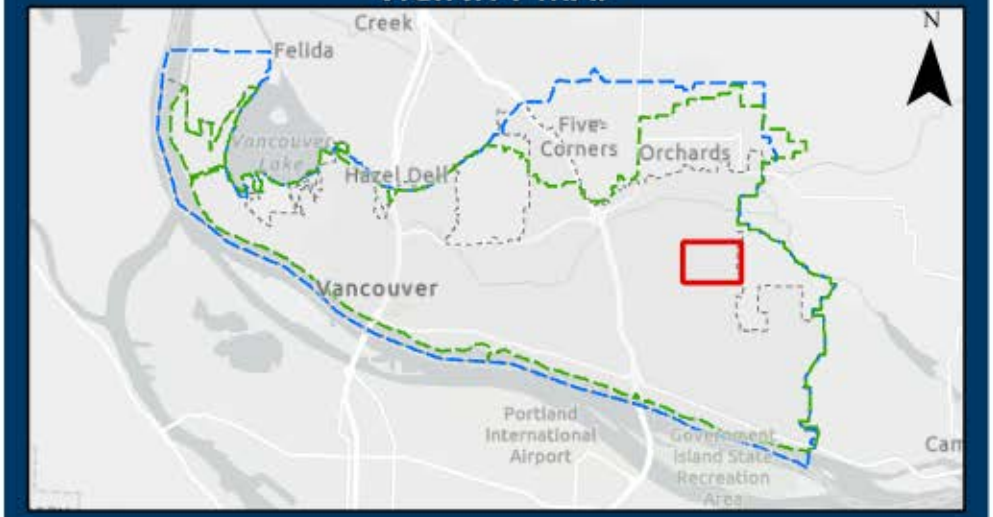
2027-2032 TRANSPORTATION IMPROVEMENT PROGRAM



Project: Northeast 28th Street - Northeast 142nd Avenue to Northeast 162nd Avenue

Project Extent: Northeast 142nd Avenue **To:** Northeast 162nd Avenue

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Arterial Improvements
Project Status:	Future
Funding Status:	Partially Funded

PROJECT

Description:
Upgrade of existing 2-lane former rural road to urban 3-lane minor arterial (1 lane each direction plus center turn lane) with sidewalks, mobility lanes, streetlights, signals, school crossings, stormwater and sound walls where required. Project addresess capacity and improves pavement and safety conditions.

Justification:
Upgrade of substandard urban arterial with level of service, poor pavement and safety deficiencies. Project identified in Vancouver Comprehensive Plan (2011-2030). Based on 2012 safety report this project has potentially high safety benefits.

Priority Score:
Near-term

2027-2032 TRANSPORTATION IMPROVEMENT PROGRAM

Project: Northeast 18th Street - Northeast 87th Avenue to Northeast 97th Avenue

Project Extent: Northeast 87th Avenue **To:** Northeast 97th Avenue

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Arterial Improvements
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
Long-planned construction of new minor arterial street (1 lane each direction plus turn lane) with mobility lanes, streetlights, sound walls (where required), a sidewalk on north side and shared use pathway on south side of street. Project provides planned east-west circulation. This is one of 5 phases to improve 18th Street from 87th Avenue to 192nd Avenue (Outside 6-year horizon)

Justification:
New roadway segment which provides planned east/west circulation. Project identified in Vancouver Comprehensive Plan (2011-2030). Environmental Assessment and alignment study completed and approved in 2004.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

Project Extent: Northeast 141st Avenue **To:** Northeast 162nd Avenue

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Arterial Improvements
Project Status:	Future
Funding Status:	Partially Funded

PROJECT

Description:
Long-planned urban upgrade of 2-lane road to principal arterial standards. Originally built at rural standards to improve service and safety. Improvements include 5-lane principal arterial (2 lanes each direction plus turn lane) with separated and protected mobility lanes, streetlights, sound walls (where required), sidewalk and ADA ramps, and shared use pathway on south side of street. This is one of 5 phases to improve 18th Street from 87th Avenue to 192nd Avenue.

Justification:
Substandard urban arterial with level of service and safety deficiencies. Environmental Assessment alignment study completed and approved in 2004. Project identified in the Vancouver Comprehensive Plan (2011-2030).

Project Extent: Northeast 97th Avenue **To:** Northeast 107th Avenue

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Arterial Improvements
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
Long-planned new urban arterial and upgrade of existing segments to current arterial standards. The improvement will be a multimodal facility including travel lanes, evaluation of roundabouts at intersections, mobility lanes, streetlights, ADA accessible pedestrian ramps, sound walls (where required), sidewalk, and a multi-use pathway. The east end of the project will connect to the recently constructed WSDOT/Interstate-205 on ramp and roundabout. Design/ROW phases are continuing. This is one of 5 phases to improve 18th Street from 87th Avenue to 192nd Avenue. Identified by regional arterial improvement plan.

Justification:
Identified by regional arterial improvement plan.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

2027-2032 TRANSPORTATION IMPROVEMENT PROGRAM

Project: Northeast 59th Street - Northeast 147th Avenue to Northeast 162nd Avenue

Project Extent: Northeast 147th Avenue **To:** Northeast 162nd Avenue

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Arterial Improvements
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
New minor arterial street (1 lane each direction plus turn lane) with sidewalks, ADA ramps, mobility lanes, streetlights and surface water treatment. Project will address circulation needs, improve safety, mobility, accessiblity and stormwater management. (Outside 6-year horizon)

Justification:
New roadway segment needed to address circulation needs within sub district. Project identifed as part of the Bircher area redevelopment.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

2027-2032 TRANSPORTATION IMPROVEMENT PROGRAM

Project: Southeast 10th Street Sidewalks - Southeast 98th Avenue to Southeast Ellsworth Road

Project Extent: Southeast 98th Avenue **To:** Southeast Ellsworth Road

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
Install sidewalks and ADA ramps along Southeast 10th Street from Southeast 98th Avenue to Ellsworth Road, including on the north side between Ellsworth Road and Interstate-205. (Outside 6-year horizon)

Justification:
Sidewalks along 10th Street would improve pedestrian safety, currently there are no sidewalks. Identified by staff and public. Remaining connection on the City's major east/west active transportation network corridor with McLoughlin, MacArthur, McGillivray and Southeast 34th Street.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

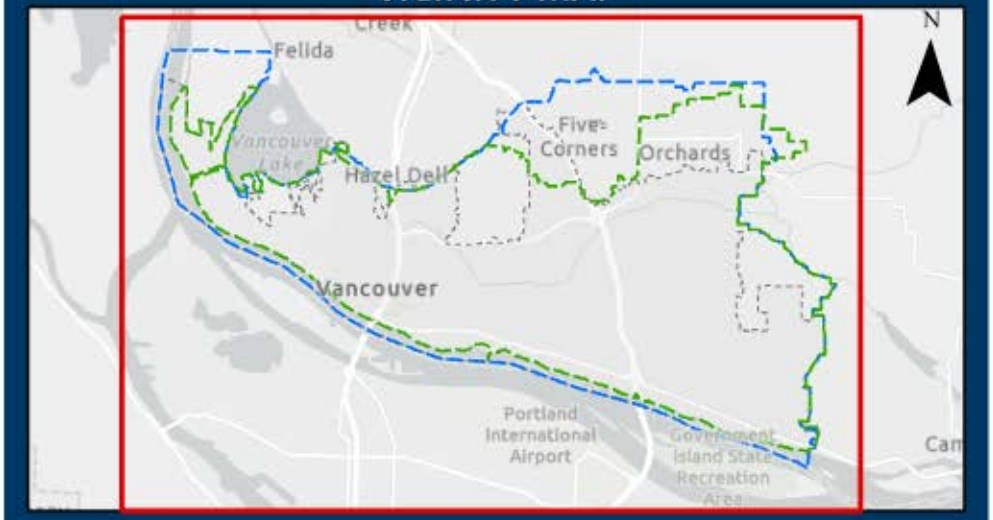
Project: Sidewalk Management Program



Project Extent: Citywide

To:

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Program
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
Program manages all sidewalks and ADA curb ramps within the City limits. Includes notification and assistance to land owners to correct sidewalk and ADA curb ramp deficiencies along their property frontage. Program is budgeted for $500,000 per year.

Justification:
To improve how we provide safe sidewalks and manage our sidewalk inventory.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

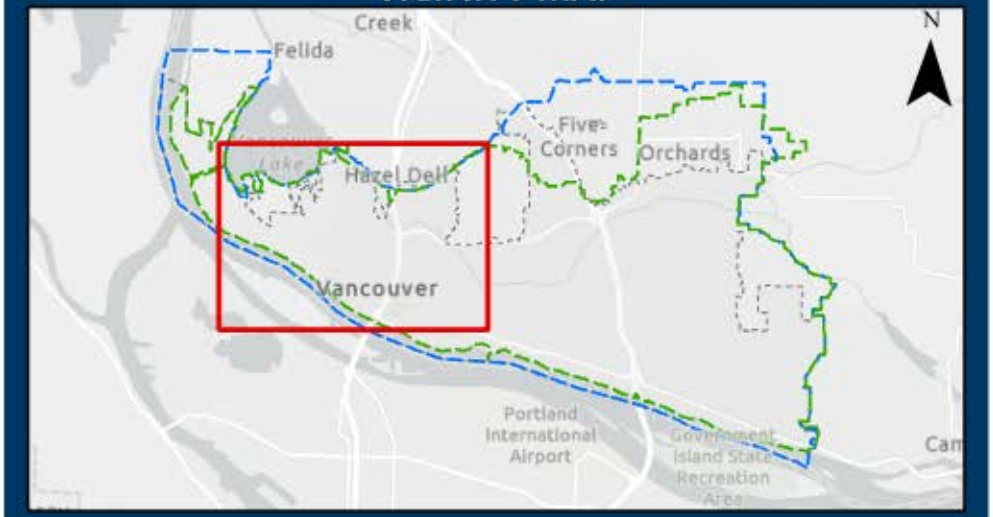
Project: Westside Bike Mobility



Project Extent:

To:

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
First phase of implementation was focused on the Columbia corridor, completed in 2022. Project recommendations from the planning study included traffic calming, mobility lanes and pedestrian improvements throughout the westside of downtown Vancouver. Implementation of other routes will occur as funding allows. (Outside 6-year horizon)

Justification:
The Westside Bike Mobility study recommended multiple bicycle enhancements in the downtown area.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

Project: Northeast 115th Avenue Extension - 16th Street to 18th Street

Project Extent: Northeast 16th Street **To:** Northeast 18th Street

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Arterial Improvements
Project Status:	Active
Funding Status:	Partially Funded

PROJECT

Description:
This project proposes a new road connecting Northeast 16th Street and Northeast 18th Street in the vicinity of Four Seasons Lane and Joe's Place Farms. This is partially funded through $250,000 developer contribution and will require ROW from Joe's Place Farms and Bonneville Power Administration.

Justification:
Complete street network connection and loop two dead end streets. Identified through the development review process.

Priority Score:
Near-term

Project: Northeast Fourth Plain Boulevard - Enhanced Pedestrian Crossings (SS4A)

Project Extent: **To:**

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
Pedestrian and ADA accessible improvements on East Fourth Plain Boulevard east of Fort Vancouver Way. Improvements include a HAWK beacon and pedestrian refuges on Fourth Plain Boulevard west of Reserve Street and Fourth Plain Boulevard at Neals Lane.

Justification:
Northeast Fourth Plain enhanced pedestrian crossings to improve pedestrian safety and transit access. Originated from Fourth Plain Corridor Subarea Plan (2007), Fourth Plain Forward Action Plan (2015), Fourth Plain Pedestrian Safety and Access Implementation Strategy (2017).

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

2027-2032 TRANSPORTATION IMPROVEMENT PROGRAM

Project: Hazel Dell Avenue and Burnt Bridge Creek Trail Crossing Improvements

Project Extent: **To:**

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
The Burnt Bridge Creek Trail Crossing at Hazel Dell Avenue does not have mobility crossings between the BBC trail in the City on the east side of Hazel Dell Avenue and the BBC trail in the County on the west side of Hazel Dell Avenue Safety is a major concern for users of the facility as there are not designated crossings and the curvature of the road at this location and operating speed of vehicles is dangerous for non-driving, vulnerable road users.

Justification:
The Project would increase safety for current and future users to access trails and recreation opportunities and increase connections between City and County resources for all users across the facility. Identified by staff and the public.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

Project: McGillivray Complete Street and Paving Project - Chkalov Drive to Northeast 164th Avenue

Project Extent: Chkalov Drive **To:** Northeast 164th Avenue

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
The McGillivray Boulevard Complete Street Project explored opportunities to make McGillivray Boulevard safer and more comfortable for everyone to travel between Southeast Chkalov Drive and Southeast 164th Avenue. The Project evaluated how McGillivray Boulevard can better meet the needs of people walking, biking, using a mobility device, and driving. The Project explored opportunities and examine tradeoffs to improve safety on the corridor ahead of the pavement project planned to occur in 2026.

Justification:
Improving safety, mobility, and providing additional modal choices for road users. Identified by project team and recommended by the Transportation and Mobility Commission.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

Project: Northeast 112th Avenue Complete Street and Paving Project - Mill Plain Boulevard to Northeast 28th Street

Project Extent: Mill Plain Boulevard **To:** Northeast 28th Street

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
The Northeast 112th Avenue Complete Street Project between Mill Plain Boulevard and 28th Street will repave and restripe to one general purpose lane, center turn lane, widen travel lanes and add buffered/protected mobility lane between Mill Plain Boulevard and 18th Street. Repave road and match existing configuration between 18th and 28th Streets.

Justification:
The Northeast 112th Avenue Complete Street Project explore the major street retrofit on 112th Avenue between Mill Plain Boulevard and 28th Street, a street with well documented safety issues and vulnerable street users. Identified by 112nd Avenue Subarea Plan.

Priority Score:

Project: Saint Johns/Saint James Complete Street and Paving Project - Fourth Plain Boulevard to City Limits

Project Extent: Fourth Plain Boulevard **To:** City Limits

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
The Saint Johns/Saint James Complete Street and Paving Project includes design concept options to create and implement safety and mobility improvements. The project limits include Saint Johns Boulevard from Fourth Plain Boulevard to State Route-500, Saint James Road from State Route-500 to City Limits, and Fort Vancouver Way from Fourth Plain Boulevard to Saint Johns Boulevard.

Justification:
These streets have documented safety issues and vulnerable street users. This project was identified by City Council as a priority corridor in the Complete Streets Policy and as a commercial corridor in the Comprehensive Plan. Concept Design Options Corridor Plan outlines improvements over time and was recommended by the TMC.

Priority Score:
Near-term

Project: Southeast 164th Avenue Safety/Mobility Improvements - Tech Center Drive to Southeast 1st Street

Project Extent: Tech Center Drive **To:** Southeast 1st Street

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
Southeast 164th Avenue is the site of two top priority crash locations, the segment between Southeast 1st Street and Mill Plain Boulevard and the intersection with Southeast Tech Center Drive/12th Street. There have been three fatalities and two severe injuries on the segment and at the intersection, and four additional pedestrian injuries at the intersection. The project will include elements to address crash factors, such as treatments related to signal phases, intersection configurations, pavement markings, installation of refuge islands or raised crossings, and other measures. (Outside 6-year horizon)

Justification:
Improving safety and mobility. Identified from the Transportation System Safety Analysis (2018) and Local Road Safety Plan (2022).

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

Project: Mill Plain Boulevard and Hearthwood Boulevard Intersection Improvements

Project Extent: **To:**

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Signal & Transportation
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
Mill Plain Boulevard and Hearthwood Boulevard are each wide arterials whose intersection had seen crashes that resulted in severe and fatal injuries. The confluence of transit, heavy vehicle traffic on Mill Plain Boulevard, and permissive left turns across the path of pedestrians and mobility users have led to crashes that resulted in severe and fatal injuries. The project will include elements to address crash factors, such as treatments related to signal phases, intersection configurations, pavement markings, and other measures.

Justification:
Improving safety, mobility, and providing additional modal choices for road users. Identified from the Transportation System Safety Analysis (2018) and Local Road Safety Plan (2022).

Priority Score:
Near-term

Project: Mill Plain/MacArthur Intersection Improvements

Project Extent: East Mill Plan Boulevard **To:** Blandford Drive

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Arterial Improvements
Project Status:	Active
Funding Status:	Funded

PROJECT

Description:
Heights District Plan recommended roadway changes to improve safety, support multi-modal mobility, and add a linear greenbelt. Includes moving vehicle travel to the east side of the median and converting the west side to separated mobility lanes and pedestrian facilities, and open space. Will include improved ADA access and pedestrian crossings at Blanford, Phoenix, Texas and Burdick.

Justification:
Provide economic development and improve access and mobility. Originated from Heights District Plan (2020).

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

Project: Fourth Plain Boulevard Safety and Mobility - 121st Avenue to 127th Avenue

Project Extent: 121st Avenue **To:** 127th Avenue

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
Fourth Plain Boulevard is one of the most dangerous roadways in the City, with high frequency and severity of crashes at several segments and intersections. The multimodal roadway sees people traveling in all modes, including vis bus rapid transit service. While the Fourth Plain Safety and Mobility Project will address several dangerous segments and intersections, the remaining intersection and segment are identified for safety improvements that could include roadway reconfigurations, changing signal phasing, installing lighting, and reducing crash exposure for vulnerable users. (Outside 6-year horizon)

Justification:
Improving safety, mobility, and providing multimodal choices for road users. This project was identified in the Local Roads Safety Plan (2022) and Transportation System Safety Analysis (2018).

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

2027-2032 TRANSPORTATION IMPROVEMENT PROGRAM

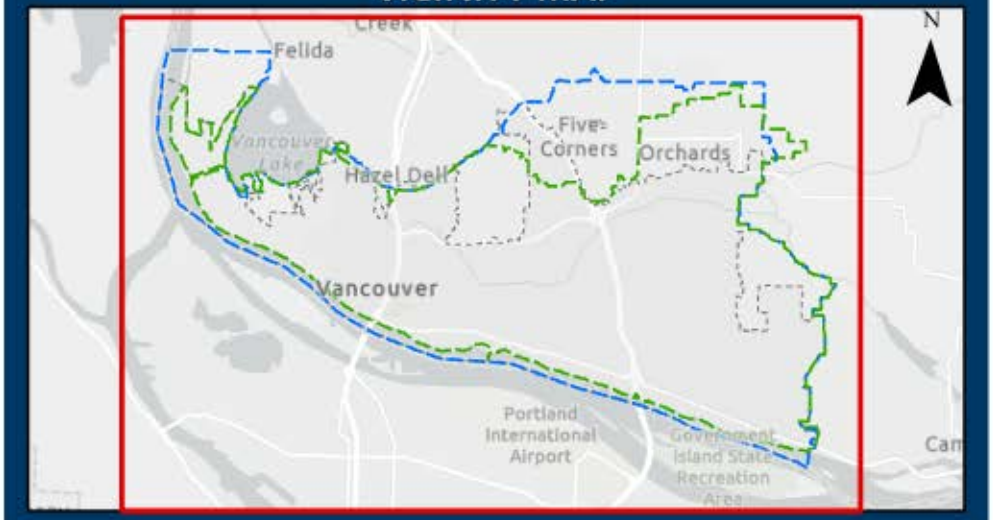
Project: City Safety Program



Project Extent: Citywide

To:

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Program
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
New program to be implemented Citywide. Provide resources to develop a comprehensive City safety program, which would include: management of the citywide collision dashboard, regular review of safety data and design of rapid response projects, response to collision hotspots identified through the Local Road Safety Plan, and high collision corridor. Program budget to be determined.

Justification:
To improve overall traffic safety by identifing patterns and high collusions areas, then ulitmately resulting in future TIP projects to resolve these issues.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

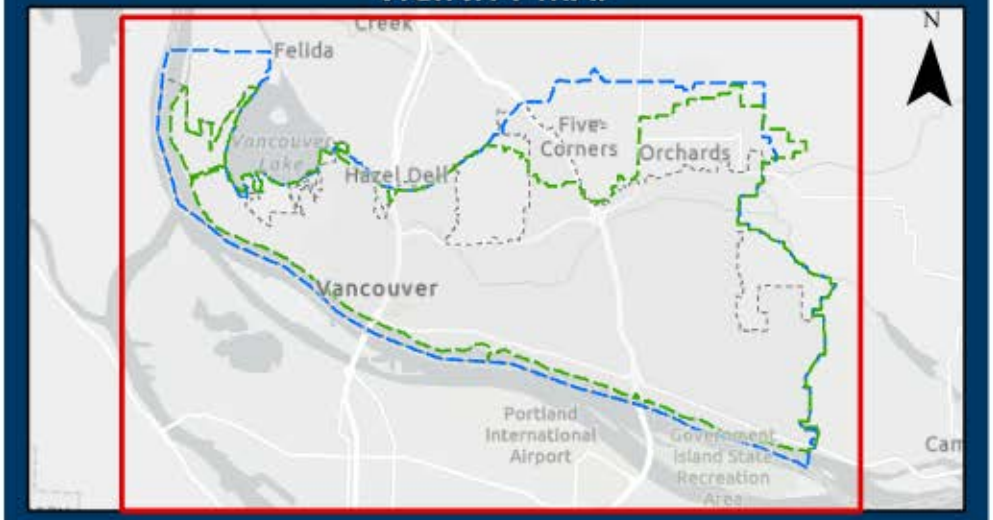
Project: Lighting for Pedestrian Safety Program



Project Extent: Citywide

To:

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Program
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
New program to be implemented Citywide. Create GIS inventory of high-need locations based on pedestrian activity, locations of mid-block enhanced pedestrian crossings, locations that need additional crossings/lighting, high ridership bus stops, roadway characteristics, and crash data. Develop policy to prioritize installation and incorporate into development review. Program budget to be determined.

Justification:
To improve pedestrian safety by identifing patterns and high need areas, then ulitmately resulting in future TIP projects to resolve these issues.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

Project: Upper Main Street Complete Street and Paving Project - East 39th to Northeast 45th Street/Hazel Dell

Project Extent: East 39th Street **To:** Northeast 45th Street/Hazel Dell

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Future
Funding Status:	Funded

PROJECT

Description:
The Upper Main Street Complete Street Project between 37th Street to City Limits will repave and restripe. Strategic improvements are incorporated throughout the length of the project and they include: curb ramp upgrades, a southbound mobility lane between 39th and 40th Streets, a two way bikeway between 40th and the Covington House driveway exit, a multiuse path between the Covington House driveway and 45th Street, new marked crossings, a RRFB beacon and median island at 39th and F Street, shared lane markings along F Street between 39th and 40th Street, new marked crossings at 40th and F Street and removal of a northbound travel lane and widen other travel lanes to accommodate buses. Improvements to be coordinated with C-TRAN Highway 99 BRT project.

Justification:
Improving safety, mobility, and providing additional modal choices for road users. Identifed by staff.

Priority Score:
Funded, unfunded projects outside the 6-year horizon, and programs were not scored.

Project: East 33rd Street Complete Street & Paving Project - I-5 to Kauffman Avenue and Saint Johns Boulevard to Grand Boulevard

Project Extent: **To:**

PROJECT AREA MAP

VICINITY MAP

PROJECT SUMMARY

Project Type:	Active Transportation
Project Status:	Future
Funding Status:	Unfunded

PROJECT

Description:
The East 33rd Street Complete Street Project is between Interstate-5 overpass to Kauffman Avenue and Saint Johns Boulevard to Grand Boulevard will repave and restripe. Improvements will include: lower speed limits, remove on street parking east of Main Street except for the north side of 33rd Street between Main and F Street and add buffered mobility lanes, remove median island at F Street and add RRFB beacon with a raised crossing or speed cushions approaching the crossing, intersection improvements at 33rd and Grand, and add speed humps and shared lane markings between Kauffman and Main Street. Consider removing on street parking and adding buffered mobility lanes between Main and Columbia based on traffic volumes and speeds.

Justification:
This project will explore major mobility improvements and complete streets retrofits as there are well documented safety issues and vulnerable street users. This will be a combined efforts with East 29th Street Complete Street Project. Identified by staff and recommended by the Transportation and Mobility Commission.

2027-2032 TIP Arterial Classification Updates

New Designation	Recommendations
None	

Redesignation	Recommendations
Main Street - McLoughlin Boulevard to City limits	Change from principal arterial to minor arterial, matching federal functional classifications (FFC) changes
Broadway Street - McLoughlin Boulevard to Main Street	Change from principal arterial to minor arterial, matching FFC changes
McLoughlin Boulevard - Columbia Street to C Street	Change from principal arterial to minor arterial, matching FFC changes
Washington Street - West 3rd Street to McLoughlin Boulevard	Change from principal arterial to minor arterial matching FFC changes
C Street - East 6th Street/State Route 14 off ramp to McLoughlin Boulevard	Change from principal arterial to collector, matching FFC changes
Northeast Saint Johns/Saint James – East 33rd Street to Northeast 68th Street	Change from principal arterial to minor arterial, matching FFC changes
Grand Boulevard - Fourth Plain Boulevard to Columbia House Boulevard	Change from principal arterial to minor arterial, matching FFC changes
Evergreen Boulevard - Columbia Street to State Route 14 off ramp	Change from minor arterial to collector, matching FFC changes
Northeast Stapleton Road - Fourth Plain Boulevard to State Route 500	Change from minor arterial to collector, matching FFC changes
East 18th Street - Northeast Andresen Road to Northeast Burton Road	Change from minor arterial to collector, matching FFC changes
Southeast 34th Street - Southeast 164th Avenue to City limits	Change from principal arterial to minor arterial, matching FFC changes
Northeast 97th/98th Avenue – Southeast Mill Plain Boulevard to Northeast Burton Road	Change from local road to collector due to error

Other	Recommendations
West Mill Plain Boulevard – Northwest 26th Avenue to Interstate-5	Added additional State Route 501 symbol to indicate the continuation of the route

Glossary Section

Glossary

FREQUENTLY USED TERMS AND ACRONYMS

Access

Access is a means of approach to provide vehicular, bicycle, small mobility device or pedestrian entrance or exit to a property or public use such as transit or schools.

Access Management

Access management is the process of providing and managing access to land development while preserving the regional flow of traffic in terms of safety, capacity and speed.

ADA

Americans with Disabilities Act, a landmark civil rights law prohibiting discrimination against individuals with disabilities in all areas of public life, including jobs, schools, transportation, and public/private places open to the public. It ensures equal opportunities and access, covering employment, state/local government services, and public accommodations.

ADT

Average Daily Traffic is the total volume of vehicle traffic passing a specific highway point or segment over a 24-hour period, averaged over a specific time frame shorter than a year. It measures how busy a road is, helping with short-term traffic planning, operations, and impact studies

A.M. Peak Hour

Identified by a one-hour period in the morning when traffic flow increases. The A.M. peak hour typically occurs between 6:30 a.m. and 9 a.m. Traffic volumes occurring during the A.M. peak hour are used to calculate the overall operation of a roadway or intersection.

ARPA

American Rescue Plan Act. The act was designed to boost the economic recovery, assist households, help schools reopen safely, and aid small businesses in responding to and recovering from the COVID-19 pandemic.

Arterial

An arterial is a major street carrying the traffic of local and collector streets to and from freeways and other major streets. Arterials generally have traffic signals at intersections and may have limits on driveway spacing and street intersection spacing. Further details can be found in the Vancouver Municipal Code (11.80.040).

BBC

Burnt Bridge Creek trail is fully paved, and mostly flat, multi-use trail in the City, linking Fruit Valley to NE 90th Avenue. This traverses diverse landscapes, including heavily

wooded areas, open grasslands, and tranquil wetlands near the creek, making it ideal for walking, running, and biking.

BNSF

Burlington Northern Santa Fe Railway

BRT

Bus Rapid Transit

Capacity

The maximum rate of flow at which vehicles can be reasonably expected to traverse a point or uniform segment of a lane or roadway during a specified time period under prevailing roadway, traffic, and control conditions; usually expressed as vehicles per hour. In the project list spreadsheets *Capacity* is a term used to describe a subset of projects that upgrade existing substandard streets to urban arterial standards. This subset of projects typically improves more than just vehicle capacity. They also improve the pavement section, street lighting, bicycle, pedestrian and ADA facilities.

CCRP

Corridor Congestion Relief Program is a state funding source that provides competitive federal grants to cities, municipalities, and Metropolitan Planning Organizations in urban areas with populations over 1 million, aiming to reduce highway congestion, enhance transit, and fund innovative, multimodal solutions.

CDBG

Community Development Block Grant is a federal funding source. Block grants are targeted for low and moderate-income areas. Improvements typically consist of sidewalk and capital improvement programs.

CIP

Capital Improvement Program is a 6-year, strategic document that includes schedules and funds for major utility projects. It bridges long-term planning with budgeting, ensuring financial capacity to build and maintain public utility assets.

CMAQ

Congestion Mitigation and Air Quality Improvement (Federal funding source). This funding is for projects that create a direct air quality benefit, leading toward attainment or maintenance of a National Ambient Air Quality Standard (NAAQS).

CN

Construction

Collector Streets – Urban Collector

Collectors – Urban Collector. *Urban collector* provides for land access and traffic circulation within and between residential neighborhoods, and commercial and industrial areas. Direct access to adjacent land uses, however, is still subordinate to traffic

movement. Access to abutting properties is controlled through the use of raised channelization, driveway spacing and pavement markings. Typically, collectors are not continuous for any great length, nor do they form a connected network by themselves.

Comprehensive Plan

Long-range plan, typically looking 20 to 50 years into the future, which is intended to guide growth and development of a community. Comprehensive Plans are required by the Washington State Growth Management Act for specific counties and cities in Washington State. The Plans establish goals and policies for managing population growth and land development while ensuring that the growth is adequately served by public facilities.

Concurrency

The Concurrency ordinance (VMC 11.95) was adopted in response to the Washington State Growth Management Act, which required local jurisdictions to adopt level-of-service (LOS) standards for the arterial road system and to ensure maintaining those standards when considering new development. This process is called *Concurrency*. Concurrency applies to any development, land division, site plan and conditional use permit approvals.

C-TRAN

Clark County Public Transportation Benefit Area Authority, the transit agency for Clark County, Washington.

DSF

Dedicated Street Funding (DSF) used to be called SFS (Street Funding Strategy). Refers to any revenue sources approved in 2015. Including Utility tax increase of 1.5%, Business License Surcharge increase, Transportation Benefit District (TBD) licensing fee revenues, and/or retired debt service being redirected to transportation improvements.

EA

Environmental Assessment a planning and decision-making tool used to evaluate the potential environmental, social, and economic impacts of a proposed project or development.

Environmental Review

The consideration of environmental factors as required by the Washington State Environmental Policy Act (SEPA). The environmental review process is the procedure used by agencies and others under SEPA for giving appropriate consideration to the environment in agency decision-making. (WAC 197-11-746).

Enhancement

Projects that upgrade pedestrian or bicycle facilities, or otherwise enhance the livability of the community through upgrades to the street system.

ESA

The Endangered Species Act was established in 1973 to preserve ecosystems of endangered and threatened species. The Act was recently amended to include various species of fish, wildlife, and plants throughout the United States.

GIS

Geographic Information System

Growth Management

A group of strategies used by a government to direct the timing, location and type of development in a community

Growth Management Act (GMA)

The State of Washington's Growth Management Act was adopted in 1990 to address the negative consequences of unprecedented population growth and suburban sprawl in the State. The GMA requires all cities and counties in the State to plan for future growth, with more extensive requirements for the largest and fastest-growing counties and cities in the State. Its requirements include guaranteeing the consistency of transportation and capital facilities plans with land use plans.

HAWK beacon

High intensity activated sidewalk (HAWK) beacon is a traffic control device used to stop traffic and allow pedestrians to cross safely.

HES

Hazard Elimination System/Safety (Federal Funding Source). The objective of this fund is to improve specific locations which constituted a danger to vehicles or pedestrians as shown by frequency of accidents.

HISP-HRRP

In 2008, a portion of the funding provided through Federal Transportation Act SAFETEA-LU was made available for safety grants. Funds were provided through the Highway Safety Improvement Program (HSIP) and the High Risk Rural Roads Program (HRRRP).

HOV

High-Occupancy Vehicle is a car, van, or bus carrying a minimum number of occupants (typically two or more) allowed to use designated carpool lanes on highways.

Impacts

Impacts are the effects or consequences of actions. Environmental impacts are effects upon the elements of the environment.

Interchange

A system of interconnecting roadways in conjunction with one or more grade separations, providing for the movement of traffic between two or more roadways on different levels

Intersection

The general area where two or more roadways join or cross, within which are included the roadway and roadside facilities for traffic movements in that area.

ITS

Intelligent Transportation System are advanced technologies applied to transportation infrastructure and vehicles to improve safety, mobility, and efficiency. They enable real-time traffic management, vehicle-to-infrastructure communication, and smoother, safer travel by reducing congestion and accidents.

Land Use

This type of activity associated with a specific geographic area. Land-use categories can be broad (e.g., residential, retail, office, industrial, and recreational), or they can be very specific (e.g., single-family residential, convenience market, or elementary school). In order to estimate trip generation characteristics for a specific geographic area, it is necessary to know both the type and intensity of land use (e.g., single-family residential land use at a development intensity of eight units per acre).

Level of Service (LOS)

The Level of Service is a grading system developed by the transportation profession to quantify the degree of comfort (including such elements as speed, travel time, number of stops, total amount of stopped delay, and impediments caused by other vehicles) afforded to drivers as they travel through an intersection or roadway segment. LOS is expressed as a letter grade that ranges from “A”, indicating that drivers will experience little, if any delay, to “F”, indicating significant traffic congestion and driver delay will occur.

Mitigation

(1) Avoiding impacts altogether by not taking a certain action or parts of an action; (2) minimizing impacts by limiting the degree or magnitude of the action and its implementation by using appropriate technology, or by taking affirmative steps to avoid or reduce impacts; (3) rectifying impacts by repairing, rehabilitating, or restoring the affected environment; (4) reducing or eliminating impacts over time by preservation and maintenance operations during the life of the action; (5) compensating for impacts by replacing, enhancing or providing substitute resources or environments; and/or, (6) monitoring impacts and taking appropriate corrective measures (WAC 197-11-768).

Mode

The means by which travel is accomplished. Alternative modes of travel include walking, bicycling, auto, bus, light rail, airplane, ferry, etc.

Multi Modal Level of Service (MMLOS)

Transportation planning framework that measures the quality, speed, and convenience of travel for all users (pedestrians, cyclists, transit riders, and drivers) rather than focusing solely on vehicle traffic.

MVFT

Motor Vehicle Fuel Tax is an excise tax levied by federal, state, and local governments on the sale of gasoline, diesel, and other motor fuels.

NAAQS

The National Ambient Air Quality Standards were set up by the Environmental Protection Agency (EPA) to help mitigate the health impacts of air pollution. EPA established NAAQS measure for six pollutants that include carbon monoxide, ozone, particulate matter, lead, sulfur dioxide, and nitrous oxide.

Non-attainment Area

Geographic area in which air pollution levels exceed the NAAQS.

PCI

Pavement Condition Index (PCI) provides a snapshot of the pavement health of a road. It is measured on a scale of 0 to 100 (where 100 means a newly paved road).

Peak Hour

A period of 60 consecutive minutes during which an intersection or roadway system experiences the greatest amount of traffic volume

PE

Preliminary Engineering is the crucial pre-construction phase that defines a project's scope, feasibility, and estimated costs. It bridges conceptual ideas and final design by conducting site investigations, environmental studies, and initial design sketches. This phase minimizes risks by establishing project alignment, budget, and schedule before full funding is authorized.

P.M. Peak Hour

A one-hour period in the afternoon or evening when traffic flow increases. The P.M. peak hour typically occurs between 4 and 6 p.m. Traffic volumes occurring during the P.M. peak hour are used to calculate the overall operation of a roadway or intersection.

PSE

Plans, Specifications and Estimates

PWB

Public Works Board. The Public Works Board was created by the 1985 State Legislature. The Board is composed of local government officials, special purpose district representatives and private sector members. The mission of the Washington State Public Works Board is "to assist Washington's local governments and private water systems in meeting their public works needs to sustain livable communities." The Board is authorized to loan money to counties, cities, and special purpose districts to repair, replace, or create domestic water systems, sanitary sewer systems, storm water systems, roads, streets, solid waste and recycling facilities and bridges.

PWTF

Public Works Trust Fund. This trust fund is administered by the Public Works Board. The PWTF Construction and Pre-construction Loan Programs provide funds to design, repair, replace or create a facility. These loans have a 5- to 20-year term with an interest rate of one-half percent. Maximum for any agency is $10 million per biennium.

RCW

Revised Code of Washington. Contains all laws of the state of general and permanent nature.

REET

Real-estate Excise Tax is a transaction-based tax imposed on the sale or transfer of real property, such as homes, land, or commercial buildings.

RRFB

Rectangular Rapid Flashing Beacons are pedestrian-activated, high-intensity LED lights paired with pedestrian warning signs at uncontrolled, marked crosswalks. They flash in a rapid, alternating "stutter" pattern to increase driver awareness.

RTC

Southwest Washington Regional Transportation Council. RTC is the regional transportation planning agency for Clark, Klickitat and Skamania counties.

Right-of-Way/ROW

Right-of-way is property held by the City for existing or future public roads or other public improvements.

Roadway

A roadway is the improved portion of an easement or right-of-way, excluding curbs, sidewalks and ditches. Road, roadway and street are used as interchangeable terms.

Roadway Conditions

The geometric characteristics of the street or highway, including the type of facility and its development environment, the number of lanes (by direction), lane and shoulder widths, lateral clearances, design speed, and horizontal and vertical alignments.

Roadway Section

A roadway section is a cross-section of a roadway which displays, travel lanes, turning lanes, bike lanes, sidewalks and medians with their respective dimensions. Each classification of roadway has a corresponding roadway section.

SEPA

State Environmental Policy Act. SEPA is a state law requiring agencies to consider the environmental consequences of their decisions. (WAC 197-11-790).

SFS

Street Funding Strategy (SFS) now being referred to as DSF (Dedicated Street Funding). Refers to any revenue sources approved in 2015. Including Utility tax increase of 1.5%, Business License Surcharge increase, Transportation Benefit District (TBD) licensing fee revenues, and/or retired debt service being redirected to transportation improvements.

Signal Warrant

A criterion that must be met before the installation of a traffic signal can be considered.

Significant/Significance

- Significant as used in SEPA means a reasonable likelihood of more than a moderate adverse impact on environment quality.
- Significance involves context and intensity and does not lend itself to a formula or quantifiable test. Context may vary with the physical setting. Intensity depends on magnitude and duration of an impact. Severity of an impact should be weighed along with the likelihood of its occurrence. An impact may be *significant* if its chance of occurrence is not great, but the resulting environmental impact would be severe if it occurred. (WAC 197-11-794).

SS4A

Safe Streets and Roads for All

SRTS

Safe Routes to School

SWCAA

Southwest Washington Clean Air Agency. A government agency responsible for air pollution control and planning in Clark, Cowlitz, Lewis, Skamania and Wahkiakum Counties.

TBD

Transportation Benefit District (TBD). In the state of Washington, a Transportation Benefit District is a quasi-municipal corporation and independent taxing district that can raise revenue for specific transportation projects, usually through vehicle license fees or sales taxes. RCW 36.73 authorizes cities (see also RCW 35.21.225) and counties to form TBDs. In other uses, TBD is a common term meaning “to be determined.”

TDM

Transportation Demand Management. A demand-based technique for reducing traffic congestion, such as ride-sharing programs and flexible work schedules enabling employees to commute to and from work outside of peak hours.

TIB

Transportation Improvement Board. A state funding agency that administers several state funding programs. The mission of the TIB is to assist local agencies to preserve and improve transportation systems by providing financial assistance, supporting economic development, promoting multi-jurisdictional and multi-modal coordination and to promote public/private cooperation.

TIF

Transportation Impact Fee. TIF is the traffic impact component of a development impact fee. An impact fee is a fee levied on a developer by the county as compensation for expected effects of the development.

TIP

Transportation Improvement Program is a 6-year, strategic document that includes schedules and funds for major transportation projects. It bridges long-term planning with budgeting, ensuring financial capacity to build and maintain public transportation assets.

TMC

Transportation and Mobility Commission advises the City Council and staff on transportation policies, infrastructure, and planning to ensure safe, sustainable, and equitable mobility. It focuses on improving multimodal options, such as walking, biking, and transit, as well as reviewing the 6-year Transportation Improvement Program (TIP).

TS

Traffic Signal Project

TSO

Traffic Signal Optimization is the process of adjusting traffic light timing to improve traffic flow, minimize delays, and reduce stops for vehicles, pedestrians, and cyclists. It maximizes existing infrastructure capacity, reducing congestion and emissions.

TSP

Transportation System Plan guides investments in our transportation system for the next 20 years. Vancouver's transportation system includes our network of streets, sidewalks, bicycle routes, bus routes, trails, and ADA-accessible facilities.

USDOT

United States Department of Transportation

V/C Ratio

Ratio of volume to capacity for a traffic facility.

Volume

Number of vehicles passing a point on a lane or roadway during some time interval, often taken to be one hour, but may also be expressed in terms such as sub-hourly, daily or annually.

WAC

Washington Administrative Code. The WAC is laws adopted by state agencies to implement state legislation.

WSDOT

Washington State Department of Transportation. WSDOT is a department of the State of Washington responsible for transportation-related planning, management and coordination.

WWRP

Washington Wildlife and Recreation Program is the state's largest public funding source for outdoor recreation and habitat conservation, providing matching grants for parks, trails, and wildlife habitat protection. Administered by the Washington State Recreation and Conservation Office, it supports local and state projects, including land acquisition, restoration, and facility development.

Zoning

A map and ordinance text which divides a city or county into land use "zones" and specifies the types of land uses, setbacks, lot size, and size restrictions for buildings within each zone.

Supplementary Document Section

This section is intended for those using screen readers and complements the 6-Year Project Lists Section and Project Details Section of the Transportation Improvement Plan.

Project ID	Workday ID	Project Name	Project Extent - Start	Project Extent - End	Project Type	Project Status	Funding Status	Project Description	Project Justification	Priority Score	Grant Fund?	Grant Amount	Estimated Total Cost	Traffic Impact Fees Area	Estimated Start of Construction
TRANS-0237	PRJ072330	Traffic Signal Sustainability2	Citywide		Program	Active	Funded	Ongoing program to update traffic signals at locations throughout the City. Updates may include but are not limited to adding left-turn phasing, signal heads, pedestrian push-button and detectors, as well as removing a type of operation, changing detector setup or making other improvements. Dedicated Street Funding contribute $200,000 per year, with annual program budget totaling $415,000 per year.	Traffic signals need to be upgraded or replaced as they reach the end of their useful lives. This program reflects the implementation of that philosophy.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Ongoing
TRANS-0240	PRG0102	Neighborhood Traffic Management Program	Citywide		Program	Active	Funded	Projects implemented as part of the ongoing Neighborhood Traffic Management (Calming) Program are intended to help slow traffic and enhance neighborhood livability. These projects may include education or infrastructure to reduce driver speeds; new or improved facilities for people walking, biking, and using mobility devices; and other strategies to increase safety and mobility in Vancouver neighborhoods. Dedicated Street Funding contribute $130,000 per year, with annual program budget totalling $300,000 per year.	The Neighborhood Traffic Management (Calming) Program is important to reaching our Community Vision of "...Safe neighborhoods with a distinct quality and proud identities linked by parks and greenspace as well as a transportation system that provides mobility option".	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Ongoing
TRANS-0241	Varies	Pavement Management Program	Citywide		Program	Active	Funded	This ongoing program improves and maintains pavement surfaces through surface overlay, micro surfacing and slurry treatments citywide. Upgrades may include new ADA ramps, traffic striping and markings. Annual budget of approximately $12M in existing money plus approximately $600,000 in Dedicated Street Funding dollars for a total annual budget of approximately $12.6M.	To improve and maintain pavement surfaces citywide. Program identified in the Vancouver Comprehensive Plan (2011-2030).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Ongoing
TRANS-0245	PRG0256	Bridge Inspection Program	Citywide		Program	Active	Funded	Ongoing citywide inspection and maintenance of our bridges, as required to meet state and federal regulations. This program, formerly contracted with Clark County, is being dropped by the county and now requires hiring professional services to complete federally mandated bridge inspections and load ratings. Program budgeted at $50,000 per year.	Maintain safe bridges in compliance with state and federal regulations. Program identified in the Vancouver Comprehensive Plan (2011-2030).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Ongoing
TRANS-0274	TBD	Northeast 28th Street - Northeast 142nd Avenue to Northeast 162nd Avenue	Northeast 142nd Avenue	Northeast 162nd Avenue	Arterial Improvements	Future	Partially Funded	Upgrade of existing 2-lane former rural road to urban 3-lane minor arterial (1 lane each direction plus center turn lane) with sidewalks, mobility lanes, streetlights, signals, school crossings, stormwater and sound walls where required. Project addresess capacity and improves pavement and safety conditions.	Upgrade of substandard urban arterial with level of service, poor pavement and safety deficiencies. Project identified in Vancouver Comprehensive Plan (2011-2030). Based on 2012 safety report this project has potentially high safety benefits.	Near-term	Yes	$ 5,750,000	$ 14,494,000	Pacific	Unknown
TRANS-0279	TBD	Northeast 49th Street - Northeast 122nd Avenue to Northeast 137th Avenue	Northeast 122nd Avenue	Northeast 137th Avenue	Arterial Improvements	Future	Partially Funded	Upgrade of existing 2-lane street to 3-lane urban minor arterial (1 lane each direction and turn lane) with sidewalks, ADA Ramps, mobility lanes, and streetlights. Project helps improve capacity and safety.	Upgrade of substandard urban arterial with level of service and safety deficiencies. Project identified in Vancouver Comprehensive Plan (2011-2030).	Near-term	Yes	$ 562,500	$ 11,000,000	Pacific	Unknown
TRANS-0281	TBD	Northeast 18th Street - Northeast 87th Avenue to Northeast 97th Avenue	Northeast 87th Avenue	Northeast 97th Avenue	Arterial Improvements	Future	Unfunded	Long-planned construction of new minor arterial street (1 lane each direction plus turn lane) with mobility lanes, streetlights, sound walls (where required), a sidewalk on north side and shared use pathway on south side of street. Project provides planned east-west circulation. This is one of 5 phases to improve 18th Street from 87th Avenue to 192nd Avenue (Outside 6-year horizon)	New roadway segment which provides planned east/west circulation. Project identified in Vancouver Comprehensive Plan (2011-2030). Environmental Assessment and alignment study completed and approved in 2004.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 16,000,000	Columbia & Cascade	Unknown
TRANS-0349	TBD	Northeast 18th Street - Northeast 164th Avenue to Northeast 192nd Avenue	Northeast 164th Avenue	Northeast 192nd Avenue	Arterial Improvements	Future	Unfunded	Long-planned upgrade of 2-lane principal arterial, originally at rural standards, to increase safety and improve service levels. Improvements include additional travel lanes, mobility lanes, streetlights, sound walls, sidewalk on north side and shared use pathway on south side of street. This is one of 5 phases to improve 18th Street from 87th Avenue to 192nd Avenue. (Outside 6-year horizon)	Substandard urban arterial with level of service and safety deficiencies. Project identified in the Vancouver Comprehensive Plan (2011-2030). Environmental Assessment alignment study completed and approved in 2004.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 20,000,000	Columbia & Cascade	Unknown
TRANS-0444	PRJ100788	Northeast 18th Street - Northeast 141st Avenue to Northeast 162nd Avenue	Northeast 141st Avenue	Northeast 162nd Avenue	Arterial Improvements	Future	Partially Funded	Long-planned urban upgrade of 2-lane road to principal arterial standards. Originally built at rural standards to improve service and safety. Improvements include 5-lane principal arterial (2 lanes each direction plus turn lane) with separated and protected mobility lanes, streetlights, sound walls (where required), sidewalk and ADA ramps, and shared use pathway on south side of street. This is one of 5 phases to improve 18th Street from 87th Avenue to 192nd Avenue.	Substandard urban arterial with level of service and safety deficiencies. Environmental Assessment alignment study completed and approved in 2004. Project identified in the Vancouver Comprehensive Plan (2011-2030).	Medium-term	Yes	$ 7,500,000	$ 18,350,000	Pacific & Cascade	2027
TRANS-0527	PRJ071616	Northeast 18th Street - Northeast 97th Avenue to Northeast 107th Avenue	Northeast 97th Avenue	Northeast 107th Avenue	Arterial Improvements	Active	Funded	Long-planned new urban arterial and upgrade of existing segments to current arterial standards. The improvement will be a multimodal facility including travel lanes, evaluation of roundabouts at intersections, mobility lanes, streetlights, ADA accessible pedestrian ramps, sound walls (where required), sidewalk, and a multi-use pathway. The east end of the project will connect to the recently constructed WSDOT/Interstate-205 on ramp and roundabout. Design/ROW phases are continuing. This is one of 5 phases to improve 18th Street from 87th Avenue to 192nd Avenue. Identified by regional arterial improvement plan.	Identified by regional arterial improvement plan.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 10,000,000	$ 25,000,000	Pacific & Cascade	2026
TRANS-0603	PRJ101230	MacArthur and Leiser Improvements			Arterial Improvements	Future	Partially Funded	Intersection project to modify an existing 4-way-stop intersection that is operating at near maximum capacity. Improvements include new traffic signal or roundabout, upgraded sidewalks, ADA ramps and streetlights to improve traffic system, safety, mobility, and accessibility.	Identifed through community feedback, roadway operational analysis, and also identified through the Heights District Plan (2020).	Near-term	No		$ 4,729,400	Cascade	Unknown
TRANS-0607	PRJ100868	Northeast 192nd Avenue - Northeast 18th Street to Southeast 1st Street	Northeast 18th Street	Southeast 1st Street	Arterial Improvements	Future	Partially Funded	Urban upgrade of existing 2-lane street. Improvements include additional travel lanes, sidewalks, mobility lanes, ADA ramps and streetlights to improve system, safety, mobility, and accessibility. Received a federal grant to begin the design phase and RTC grant for ROW.	This project originated from Section 30 Subarea Plan (2009).	Near-term	Yes	$ 7,250,000	$ 21,242,000	Cascade	Unknown
TRANS-0680	TBD	Columbia Shores Boulevard at Columbia Way - BNSF Undercrossing Widening			Arterial Improvements	Future	Unfunded	Project to widen existing railroad undercrossing portal and improve Columbia Shores/Columbia Way intersection to address service levels and increase pedestrian and mobility access. Total scope of project is undefined. (Outside 6-year horizon)	Level of service deficiency and sub-standard pedestrian and bicycle access conditions. Identified by staff and through the development review process.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 30,000,000	Columbia	Unknown
TRANS-0712	TBD	Northeast 59th Street - Northeast 147th Avenue to Northeast 162nd Avenue	Northeast 147th Avenue	Northeast 162nd Avenue	Arterial Improvements	Future	Unfunded	New minor arterial street (1 lane each direction plus turn lane) with sidewalks, ADA ramps, mobility lanes, streetlights and surface water treatment. Project will address circulation needs, improve safety, mobility, accessiblity and stormwater management. (Outside 6-year horizon)	New roadway segment needed to address circulation needs within sub district. Project identifed as part of the Bircher area redevelopment.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 9,000,000	Pacific	Unknown
TRANS-0716	TBD	Northeast 9th Street - Northeast 172nd Avenue to Northeast 192nd Avenue	Northeast 172nd Avenue	Northeast 192nd Avenue	Arterial Improvements	Future	Unfunded	New urban collector street (1 lane each direction plus turn lane), including sidewalks, ADA ramps, mobility lanes, and streetlights.	This priority east-west circulation route is part of Section 30 Subarea Plan (2009) and also where this project originated.	Medium-term	No		$ 12,000,000	Cascade	Unknown
TRANS-0717	TBD	Northeast 184th Avenue - Northeast 4th Street to Northeast 18th Street	Northeast 4th Street	Northeast 18th Street	Arterial Improvements	Future	Unfunded	New urban collector street (1 lane each direction plus turn lane), including sidewalks, ADA ramps, mobility lanes and streetlights. Developer will construct the section from Southeast 1st Street to 4th Street. (Outside 6-year horizon)	This priority north to south circulation route is part of Section 30 Subarea Plan (2009) and also where this project originated.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 14,000,000	Cascade	Unknown
TRANS-0718	TBD	Northeast 162nd Avenue - Southeast 1st Street to Northeast 9th Street	Southeast 1st Street	Northeast 9th Street	Arterial Improvements	Future	Unfunded	Upgrade of 5-lane road to 7-lane principal arterial street (3 lanes each direction plus turn lane), including sidewalks, ADA ramps, mobility lanes and streetlights. Roadway cross section will match Northeast 162nd Avenue to the north and south. (Outside 6-year horizon)	Improvement listed in Vancouver Comprehensive Plan (2011-2030).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 13,000,000	Cascade	Unknown
TRANS-0719	TBD	Northeast 112th Avenue - East Mill Plain Boulevard to Northeast 28th Street Safety and Mobility Complete Street	East Mill Plain Boulevard	Northeast 28th Street	Arterial Improvements	Future	Unfunded	Corridor improvements to bring Northeast 112th Avenue up to urban arterial standards, and address safety and accessibility issues for all modes of travel.	Originated from 112th Corridor Subarea Plan (2011) and the Northeast 112th Safety and Mobility Project (2024).	Near-term	No		$ 3,000,000	Columbia & Cascade	Unknown
TRANS-0722	TBD	Northeast Saint Johns Boulevard and Northeast 68th Street			Signal & Transportation Improvements	Future	Unfunded	Modify existing intersection to improve traffic safety and level of service. (Outside 6-year horizon)	Level of service deficiency. Identified through the development review process and included in the Saint Johns/Saint James Safety and Mobility Project for active transportation improvements.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 1,000,000	Columbia	Unknown
TRANS-0723	TBD	Southeast 20th Street and Southeast 176th Avenue			Arterial Improvements	Future	Unfunded	Modify existing intersection to improve traffic safety, operations and level of service.	Level of service deficiency. Identified through the development review process.	Near-term	No		$ 1,000,000	Cascade	Unknown
TRANS-0740	PRJ071455	Evergreen Trail - Chelsea to Image	Southeast Chelsea Avenue	Southeast Image Road	Active Transportation	Active	Funded	Upgrade roadway with 6 to 10 foot pedestrian pathway on south side, a priority east-west pedestrian and mobility lane corridor.	Substandard roadway and shoulder conditions, priority east/west pedestrian and bicycle corridor. Originated from Clark County Parks and Recreation Scenic Evergreen Trail Plan (1994), Evergreen Highway Trail Project Scoping Report (2009), and Evergreen Corridor Management Strategy (2016).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 2,500,000	$ 4,000,000	Cascade	2026

(Outside 6-year horizon)	Substandard Roadway and shoulder conditions, priority east/west pedestrian and bicycle corridor. Originated from Clark County Parks and Recreation Scenic Evergreen Trail Plan (1994), Evergreen Highway Trail Project Scoping Report (2009), and Evergreen Corridor Management Strategy (2016).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 7,000,000	Cascade	Unknown
TRANS-0742	TBD	Evergreen Highway Pathway - Southeast 164th Avenue to East City Limits	Southeast 164th Avenue	East City Limits	Active Transportation	Future	Unfunded	Upgrade roadway with 6 to 10 foot pedestrian pathway on south side, a priority east-west pedestrian and mobility lane corridor. (Outside 6-year horizon)	Substandard Rdway and shoulder conditions, priority east/west pedestrian and bicycle corridor. Originated from Clark County Parks and Recreation Scenic Evergreen Trail Plan (1994), Evergreen Highway Trail Project Scoping Report (2009), and Evergreen Corridor Management Strategy (2016).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 7,000,000	Cascade	Unknown
TRANS-0746	PRJ071251	Southeast McGillivray Boulevard and Southeast 166th Avenue			Signal & Transportation Improvements	Future	Unfunded	Improve intersection with urban roundabout, including upgrades to ADA ramps and streetlights. (Outside 6-year horizon)	Level of service deficiency. Identified through the development review process.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 500,000	Cascade	Unknown
TRANS-0818	TBD	Northeast Burton/28th Street - Northeast Andresen Road to Northeast 138th Avenue	Northeast Andresen Road	Northeast 138th Avenue	Signal & Transportation Improvements	Future	Unfunded	Installation of fiber and connections between fiber optic cables to traffic signal controllers to improve signal operations along the corridor. (Outside 6-year horizon)	Identified by regional arterial improvement plan.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 2,000,000	Pacific	Unknown
TRANS-0819	TBD	Northwest Fruit Valley Road at La Frambois Road			Signal & Transportation Improvements	Future	Unfunded	Upgrade existing signal to current standards. (Outside 6-year horizon)	Identifed by staff and through the development review process.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 1,000,000	Columbia	Unknown
TRANS-0825	TBD	Northeast 54th Street - Northeast 15th Avenue to Northeast Saint James Road	Northeast 15th Avenue	Northeast Saint James Road	Arterial Improvements	Future	Unfunded	Upgrade of existing 2-lane road to an urban arterial (1 lane each direction plus turn lane), including sidewalks, ADA ramps, mobility lanes and streetlights to improve safety, mobility, accessibility, and level of service. New signal to be added at Northeast 54th Street and Saint Johns Boulevard.(Outside 6-year horizon)	Upgrade of substandard urban arterial with level of service and safety deficiencies. Identified through the development review process.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 14,000,000	Columbia	Unknown
TRANS-0826	TBD	Northeast 104th Avenue - Southeast Mill Plain Boulevard to Northeast 14th Street	Southeast Mill Plain Boulevard	Northeast 14th Street	Arterial Improvements	Future	Unfunded	Upgrade of existing 2-lane road to an urban arterial (1 lane each direction plus turn lane), including sidewalks, ADA ramps, mobility lanes and streetlights. (Outside 6-year horizon)	Upgrade of substandard urban arterial with level of service and safety deficiencies. Identified through the development review process.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 12,000,000	Cascade	Unknown
TRANS-0827	TBD	Northeast 104th Avenue - Northeast 14th Street to Northeast 18th Street	Northeast 14th Street	Northeast 18th Street	Arterial Improvements	Future	Unfunded	New arterial street (1 lane each direction plus turn lane), with sidewalks, ADA ramps, mobility lanes and streetlights, to increase safety, mobility, accessiblity and level of service. (Outside 6-year horizon)	New urban arterial will address level of service and accessibility issues. Identified through the development review process.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 12,000,000	Cascade	Unknown
TRANS-0836	TBD	East Evergreen Boulevard Bridge over South Blandford Drive			Arterial Improvements	Future	Unfunded	Replace existing bridge along Evergreen Blvd. at Blandford with new structure. Project will address safety and accessibility for all modes of travel. (Outside 6-year horizon)	Existing bridge is nearing the end of its useful life and bridge inspection reports indicate that the bridge should be planned for replacement in the near future. Identified through our Bridge Inspection Program.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 15,000,000	Columbia	Unknown
TRANS-0839	PRJ100351	Fourth Plain and 152nd Avenue Signal			Signal & Transportation Improvements	Future	Partially Funded	Install new signal to accommodate future growth.	Intersection is ancipated to have a below standard LOS in the near future due to growth. Originated with Bircher area redevelopment.	Near-term	No		$ 1,200,000	Pacific	Unknown
TRANS-0843	PRJ071448	Southeast Evergreen Highway Pathway - Southeast Image Road to Southeast 100th Court	Southeast Image Road	Southeast 100th Court	Active Transportation	Active	Unfunded	Upgrade street with 6 to 10 foot pedestrian pathway on south side of roadway, a priority east/west pedestrian and mobility lane corridor. Design and ROW funded. No funding for construction.	Substandard roadway and shoulder conditions, priority east/west pedestrian and bicycle corridor. Originated from Clark County Parks and Recreation Scenic Evergreen Trail Plan (1994), Evergreen Highway Trail Project Scoping Report (2009), and Evergreen Corridor Management Strategy (2016).	Near-term	No		$ 1,000,000	Cascade	Unknown
TRANS-0844	PRJ072459	Multi Modal Safety and Accessibility Program	Citywide		Program	Active	Funded	Ongoing program budgeted at $1.5 million per year, to address safety and accessibility for people walking, biking, and rolling.	Program will be used to address safety and accessibility deficiencies throughout the City including, but not limited to, pedestrian, bicycles, and Americans with Disability Act.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Ongoing
TRANS-0848	TBD	Southeast 164th Avenue and Southeast 12th Street Intersection Improvements			Signal & Transportation Improvements	Future	Unfunded	Increase left-turn movement capacity at intersection of Southeast 164th Avenue and Southeast 12th Street to improve overall Level of Service. (Outside 6-year horizon)	Left turn demand exceeds left turn capacity on certain legs of the intersection. Identified by staff.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 1,000,000	Cascade	Unknown
TRANS-0856	TBD	Northeast 18th Street and Northeast 172nd Avenue Intersection Improvements			Arterial Improvements	Future	Unfunded	Install additional turn lanes and other signal improvements at the intersection of Northeast 18th Street and Northeast 172nd Avenue. (Outside 6-year horizon)	Currently the intersection of Northeast 18th Street and Northeast 172nd Avenue is signalized, but the intersection needs additional turn lanes and signal improvements. Identified through the development review process.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 500,000	Cascade	Unknown
TRANS-0857	TBD	Southeast 10th Street Sidewalks - Southeast 98th Avenue to Southeast Ellsworth Road	Southeast 98th Avenue	Southeast Ellsworth Road	Active Transportation	Future	Unfunded	Install sidewalks and ADA ramps along Southeast 10th Street from Southeast 98th Avenue to Ellsworth Road, including on the north side between Ellsworth Road and Interstate-205. (Outside 6-year horizon)	Sidewalks along 10th Street would improve pedestrian safety, currently there are no sidewalks. Identified by staff and public. Remaining connection on the City's major east/west active transportation network corridor with McLoughlin, MacArthur, McGillivray and Southeast 34th Street.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 2,000,000	Cascade	Unknown
TRANS-0859	PRG0138	Sidewalk Management Program	Citywide		Program	Active	Funded	Program manages all sidewalks and ADA curb ramps within the City limits. Includes notification and assistance to land owners to correct sidewalk and ADA curb ramp deficiencies along their property frontage. Program is budgeted for $500,000 per year.	To improve how we provide safe sidewalks and manage our sidewalk inventory.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Ongoing
TRANS-0861	TBD	Westside Bike Mobility			Active Transportation	Future	Unfunded	First phase of implementation was focused on the Columbia corridor, completed in 2022. Project recommendations from the planning study included traffic calming, mobility lanes and pedestrian improvements throughout the westside of downtown Vancouver. Implementation of other routes will occur as funding allows. (Outside 6-year horizon)	The Westside Bike Mobility study recommended multiple bicycle enhancements in the downtown area.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 5,000,000	Columbia	Unknown
TRANS-0868	TBD	Saint Johns Boulevard and Fort Vancouver Way Intersection Improvements			Signal & Transportation Improvements	Future	Unfunded	Install enhanced stop control at Saint Johns Boulevard and Fort Vancouver Way as well as associated civil roadway improvements. (Outside 6-year horizon)	Intersection needs modifications in order to accommodate current and future traffic volumes and improve safety for all modes. Identified through the development review process with concept designs recommended and developed in the Saint Johns/Saint James Safety and Mobility Project.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 2,000,000	Columbia	Unknown
TRANS-0869	PRJ100786	Citywide Street Light Program	Citywide		Program	Future	Funded	Program to install new street lights, including all fixtures and power, and replace old street lights citywide. This program is different than TRANS-853 which is intended to upgrade bulbs only.	Needed program to install new street lights and replace old street lights citywide.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Ongoing
TRANS-0873	TBD	Upper Main Street Complete Street and Paving Project - Fourth Plain Boulevard to East 37th Street	Fourth Plain Boulevard	East 37th Street	Active Transportation	Future	Unfunded	The Upper Main Street Complete Street Project between Fourth Plain Boulevard to 37th Street will restripe to improve traffic flow. Strategic improvements are incorporated throughout the length of the project and they include: new marked crossings with median islands at 31st and 35th Streets, removal of a northbound travel lane, wayfinding signage and speed limit reduction from 30 to 25 mile per hour. Improvements to be coordinated with C-TRAN Highway 99 BRT project.	Improving safety, mobility, and providing additional modal choices for road users. Identifed by staff and recommended by the Transportation and Mobility Commission.	Near-term	No		$ 1,000,000	Columbia	Unknown
TRANS-0879	PRJ100352	Columbia House Boulevard and Grove Street Signal Upgrade			Signal & Transportation Improvements	Future	Partially Funded	This project will add a dedicated northbound right-turn lane on the westbound off-ramp; and add a second westbound through lane. Reconstruct ADA ramps and move signal poles as necessary. Striping and signalization changes as necessary. Funded by proportionate share program.	Improvements are necessary to mitigate future localized development impact identified by developer's traffic study. Identified through the development review process.	Near-term	No		$ 658,000	Columbia	Unknown
TRANS-0880	TBD	McGillivray Boulevard and Village Loop Drive Intersection Improvements			Signal & Transportation Improvements	Future	Unfunded	New stop controlled device at intersection. Conduct signal warrant and analysis to determine stop control device (roundabout or signal).	The all-way stop controlled intersection is experiencing long vehicle delays during the peak hours and needs safety improvements for active transportation users. Identified through the development review process and recommended as part of the McGillivray Boulevard Safety and Mobility Project (2024).	Near-term	No		$ 500,000	Cascade	Unknown
TRANS-0883	TBD	Northwest 32nd Avenue and Lower River Road Roundabout			Arterial Improvements	Future	Unfunded	Phase 2 of the Northwest 32nd Avenue Freight Access project proposes a roundabout at the intersection of State Route-501 and Northwest 32nd Avenue to improve traffic operations. (Outside 6-year horizon)	Substandard roadway conditions and reported safety concerns. Originated from Westside Mobility Strategy (2016).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 2,000,000	Columbia	Unknown
TRANS-0884	PRJ100717	Northwest 32nd Avenue Freight and Mobility - Lower River Road to Northwest 61st Street	State Route-501	NW 61st Street	Arterial Improvements	Future	Unfunded	Phase 5 of the Northwest 32nd Avenue Freight Access project proposes a new segment that will consist of three travel lanes, mobility lanes, planter strips and ADA accessible sidewalks. The sidewalk along the west side of the roadway is 10 feet wide to accommodate a multi-use path facility. (Outside 6-year horizon)	Substandard Roadway conditions and reported safety concerns. Originated from Westside Mobility Strategy (2016).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 64,000,000	Columbia	Unknown
TRANS-0885	TBD	Northwest 32nd Avenue Freight and Mobility - Northwest 61st Street to Burnt Bridge Creek	Northwest 61st Street	Burnt Bridge Creek	Arterial Improvements	Future	Unfunded	Phase 4 of the Northwest 32nd Avenue Freight Access project proposes rebuilding Lakeshore Avenue/Fruit Valley Road and the existing bridge over the BNSF right-of-way. The cross section will consist of three travel lanes, mobility lanes, planter strips and ADA accessible sidewalks. The sidewalk along the west side of the roadway is 10 feet wide to accommodate a multi-use path facility. (Outside 6-year horizon)	Substandard roadway conditions and reported safety concerns. Originated from Westside Mobility Strategy (2016).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 49,000,000	Columbia	Unknown

TRANS-0886	TBD	Northwest 32nd Avenue Freight and Mobility - Burnt Bridge Creek to Northwest 78th Street	Burnt Bridge Creek	Northwest 78th Street	Arterial Improvements	Future	Unfunded	Phase 3 of the Northwest 32nd Avenue Freight Access project proposes rebuilding Lakeshore Avenue/Fruit Valley Road to a cross section consisting of three travel lanes, mobility lanes, planter strips and ADA accessible sidewalks. The sidewalk along the west side of the roadway is 10 feet wide to accommodate a multi-use path facility. (Outside 6-year horizon)	Substandard Roadway conditions and reported safety concerns. Originated from Westside Mobility Strategy (2016).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 10,000,000	Columbia	Unknown
TRANS-0887	PRJ100787	Fruit Valley and Lakeshore Avenue Roundabout			Arterial Improvements	Future	Partially Funded	Phase 1 of the Northwest 32nd Avenue Freight Access project proposes a new roundabout to improve traffic operations at the intersection of Northwest Lakeshore Avenue, Northwest 78th Street, and Fruit Valley Road.	Substandard Roadway conditions and reported safety concerns. Originated from Westside Mobility Strategy (2016).	Long-term	No		$ 5,236,000	Columbia	Unknown
TRANS-0888	PRJ100443	192nd Avenue On-Ramp to State Route-14 Signal			Signal & Transportation Improvements	Future	Partially Funded	Install a new traffic signal, on the westbound on-ramp from Southeast 192nd Avenue to State Route-14. Partially funded by Proportionate Share money.	This signal is needed to improve safety and Level of Service. Improvements triggered by proposed development in the area including the Columbia Palisades development.	Near-term	No		$ 2,016,000	Cascade	2026
TRANS-0889	PRJ100592	Northeast 18th and Devine Pedestrian Improvements (SS4A)			Active Transportation	Active	Funded	Project improvements for improved ADA access at the intersection of Northest 18th Street and Devine Road. Funded through TRANS-844 - Multimodal Safety and Accessibility.	Originated from Fourth Plain Corridor Subarea Plan (2007) and included in the City's USDOT Safe Streets and Roads for All grant package.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 550,000	Columbia	2026
TRANS-0890	TBD	Northeast Fourth Plain Boulevard and Grand Boulevard - Pedestrian Improvement Southwest Corner			Active Transportation	Future	Unfunded	Increase radius of southwest corner to improve pedestrian safety and ADA access, and accommodate truck turns. Project requested by City of Vancouver Traffic Engineering. (Outside 6-year horizon)	To improve pedestrian safety at this corner, for pedestrian movement and sight distance for safe crossing both eastward and northward. Originated from Fourth Plain Corridor Subarea Plan (2007) and Fourth Plain Forward Action Plan (2015).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 700,000	Columbia	Unknown
TRANS-0891	TBD	East Mill Plain Boulevard - Boise Avenue to North Andresen Road	Boise Avenue	North Andresen Road	Arterial Improvements	Future	Unfunded	Heights District Plan recommended roadway changes to improve safety, support multimodal mobility and accommodate future Bus Rapid Transit line. Includes reducing lane widths, adding protected mobility lanes, improving sidewalks, adding planter strips, and adding and/or improving ADA access and pedestrian crossings at Ogden, Missoula and Helena.	Heights District Plan recommendations for redevelopment. Roadway changes to improve safety and support multi-modal mobility. Originated from Heights District Plan (2020).	Near-term	No		$ 10,000,000	Columbia	Unknown
TRANS-0892	TBD	MacArthur Boulevard - Blandford Drive to Lieser Road	Blandford Drive	Lieser Road	Arterial Improvements	Future	Unfunded	Heights District Plan recommended roadway changes to improve safety, support multi-modal mobility, and add a linear greenbelt. Includes moving vehicle travel to the east side of the median and converting the west side to separated mobility lanes and pedestrian facilities, and open space. Will include improved ADA access and pedestrian crossings at Blanford, Phoenix, Texas and Burdick. (Outside 6-year horizon)	Heights District Plan recommendations for redevelopment. Roadway changes to improve safety and support multi-modal mobility. Originated from Heights District Plan (2020).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 15,000,000	Columbia & Cascade	Unknown
TRANS-0893	TBD	North Devine Road - South of Mill Plain Boulevard to MacArthur Boulevard	South of Mill Plain Boulevard	MacArthur Boulevard	Arterial Improvements	Future	Unfunded	Heights District Plan recommended roadway changes to improve safety and support multi-modal mobility, including a two-way protected mobility lane on the west side of the street, improved ADA access and sidewalks, larger planter strips, and enhanced crossings. Sidewalk improvements along Devine being constructed as part of TRANS-871. (Outside 6-year horizon)	Heights District Plan recommendations for redevelopment. Roadway changes to improve safety and support multi-modal mobility. Originated from Heights District Plan (2020).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 4,000,000	Columbia	Unknown
TRANS-0894	TBD	Andresen Road - East Mill Plain Boulevard to Highland Drive	East Mill Plain Boulevard	Highland Drive	Arterial Improvements	Future	Unfunded	Roadway changes to improve safety and support multi-modal mobility. Includes reducing the travel lanes from four to two just south of Mill Plain, adding protected mobility lanes, widening sidewalks and adding planter strips, improving ADA access pedestrian crossings at Wichita, Missouri and Louisiana. (Outside 6-year horizon)	Heights District Plan recommendations for redevelopment. Roadway changes to improve safety and support multi-modal mobility. Originated from Heights District Plan (2020).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 10,000,000	Columbia & Cascade	Unknown
TRANS-0895	TBD	MacArthur Boulevard at North Devine Road Roundabout			Arterial Improvements	Future	Unfunded	Heights District Plan recommended roadway changes - Construct roundabout to optimize multimodal traffic safety and operations with additional trips generated by redevelopment in the Heights District. (Outside 6-year horizon)	Heights District Plan recommendations for redevelopment. Roadway changes to improve safety and support multi-modal mobility. Originated from Heights District Plan (2020).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 2,000,000	Columbia	Unknown
TRANS-0896	TBD	MacArthur Boulevard at North Andresen Road Roundabout			Arterial Improvements	Future	Unfunded	Heights District Plan recommended roadway changes. Construct roundabout to optimize multimodal traffic safety and operations with additional trips generated by redevelopment in the Heights District. (Outside 6-year horizon)	Heights District Plan recommendations for redevelopment. Roadway changes to improve safety and support multi-modal mobility. Originated from Heights District Plan (2020).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 2,000,000	Columbia & Cascade	Unknown
TRANS-0898	PRJ100386	Northeast 115th Avenue Extension - 16th Street to 18th Street	Northeast 16th Street	Northeast 18th Street	Arterial Improvements	Active	Partially Funded	This project proposes a new road connecting Northeast 16th Street and Northeast 18th Street in the vicinity of Four Seasons Lane and Joe's Place Farms. This is partially funded through $250,000 developer contribution and will require ROW from Joe's Place Farms and Bonneville Power Administration.	Complete street network connection and loop two dead end streets. Identified through the development review process.	Near-term	No		$ 970,500	Cascade	Unknown
TRANS-0899	PRJ100672	Northeast Fourth Plain Boulevard - Enhanced Pedestrian Crossings (SS4A)			Active Transportation	Active	Funded	Pedestrian and ADA accessible improvements on East Fourth Plain Boulevard east of Fort Vancouver Way. Improvements include a HAWK beacon and pedestrian refuges on Fourth Plain Boulevard west of Reserve Street and Fourth Plain Boulevard at Neals Lane.	Northeast Fourth Plain enhanced pedestrian crossings to improve pedestrian safety and transit access. Originated from Fourth Plain Corridor Subarea Plan (2007), Fourth Plain Forward Action Plan (2015), Fourth Plain Pedestrian Safety and Access Implementation Strategy (2017).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 770,000	Columbia	2026
TRANS-0903	TBD	Northeast 9th Street Infill Sidewalk - Northeast 112th Avenue to Northeast 136th Avenue	Northeast 112th Avenue	Northeast 136th Avenue	Active Transportation	Future	Unfunded	This project will add new sections of sidewalk infill along Northeast 9th Street, between Northeast 112th Avenue and Northeast 136th Avenue. (Outside 6-year horizon)	Identified through our Sidewalk Management Program.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 500,000	Cascade	Unknown
TRANS-0905	TBD	Amtrak Multimodal Access - West 11th Street	Hill Street (Amtrak Station)	King Street	Active Transportation	Future	Unfunded	This project will provide multimodal mobility lanes and pedestrian access along West 11th Street from King Street to the Amtrak Station.	Provides multi-modal access to the Amtrak Station. Originated from Vancouver City Center Vision Plan (2007).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 10,000,000	Columbia	Unknown
TRANS-0907	TBD	Northeast 124th Avenue - Northeast 28th Street to Northeast 39th Street	Northeast 28th Street	Northeast 39th Street	Arterial Improvements	Future	Unfunded	Reconstruction/Upgrade existing two lane Collector roadway to current standards, to include sidewalks, ADA ramps, mobility lanes and streetlights.	Upgrade existing two lane Collector roadway to increase safety, mobility, accessiblity and level of service. Identified through the development review process.	Near-term	No		$ 10,000,000	Pacific	Unknown
TRANS-0909	TBD	Southeast 29th Street - Southeast 176th Avenue to Southeast 192nd Avenue	Southeast 176th Avenue	Southeast 192nd Avenue	Arterial Improvements	Future	Unfunded	New 3-lane road built to principal arterial standards, to improve capacity, service and safety. Improvements include 3-lane principal arterial (1 lane each direction plus turn lane) with mobility lanes, streetlights, sound walls (where required), sidewalk and ADA ramps, and shared use pathway on south side of street. Developer built through developer contributions for the Vancouver Innovation Center project. (Outside 6-year horizon)	Long planned new east-west arterial for capacity, demand management and bike/pedestrian access inside the Vancouver Innovation Center project area.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 10,000,000	Cascade	Unknown
TRANS-0910	PRJ100914	Hazel Dell Avenue and Burnt Bridge Creek Trail Crossing Improvements			Active Transportation	Active	Funded	The Burnt Bridge Creek Trail Crossing at Hazel Dell Avenue does not have mobility crossings between the BBC trail in the City on the east side of Hazel Dell Avenue and the BBC trail in the County on the west side of Hazel Dell Avenue Safety is a major concern for users of the facility as there are not designated crossings and the curvature of the road at this location and operating speed of vehicles is dangerous for non-driving, vulnerable road users.	The Project would increase safety for current and future users to access trails and recreation opportunities and increase connections between City and County resources for all users across the facility. Identified by staff and the public.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 700,000	$ 1,000,000	Columbia	2026
TRANS-0911	TBD	Northeast Padden Expressway and Northeast Andresen Road Intersection Improvements			Active Transportation	Future	Unfunded	Intersection improvements for capacity, pedestrian safety and traffic standards. Intial planning phase to include congestion and collision study, to propose traffic improvements and alternatives to improve safety and reduce collisions. (Outside 6-year horizon)	Southbound Andreson to eastbound Padden turn volumes currently exceed the intersection capacity. Identified by staff.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 10,000,000	Pacific	Unknown
TRANS-0913	TBD	MacArthur Boulevard and South Blandford Drive Pedestrian Crossing			Active Transportation	Future	Unfunded	Install enhanced pedestrian crossing to improve pedestrian safety and accesssibility in the area. Originated from Heights District Plan (2020). (Outside 6-year horizon)	Heights District Plan recommendations for redevelopment. Roadway changes to improve safety and support multi-modal mobility. Originated from Heights District Plan (2020).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 1,000,000	Columbia	Unknown
TRANS-0914	PRJ101245	Lincoln Elementary School Crossing Improvements (SRTS)			Active Transportation	Future	Funded	Install high-visibility crosswalk, stop line at uncontrolled crosswalks, rectangular rapid flashing beacon, "Stop for Pedestrian" signs, ADA curb ramps, accessible pedestrian signals near Lincoln Elementary School at West 39th Street and Daniels Street.	Improve safety and accessiblity. Identified by staff and the public.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 300,000	$ 300,000	Columbia	2026
TRANS-0915	TBD	Fruit Valley Road and Firestone Lane Pedestrian Crossing			Active Transportation	Future	Unfunded	Install enhanced pedestrian crossing to improve pedestrian safety and accesssibility in the area. (Outside 6-year horizon)	Originated from Fruit Valley Subarea Plan (2010).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 1,000,000	Columbia	Unknown
TRANS-0916	TBD	West 16th Street at Northwest Packing Company Pedestrian Crossing			Active Transportation	Future	Unfunded	Install enhanced pedestrian crossing to improve pedestrian safety and accesssibility in the area. (Outside 6-year horizon)	Originated from Fruit Valley Subarea Plan (2010).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 1,000,000	Columbia	2023

TRANS-0920	PRJ100802	McGillivray Complete Street and Paving Project - Chkalov Drive to Northeast 164th Avenue	Chkalov Drive	Northeast 164th Avenue	Active Transportation	Active	Funded	The McGillivray Boulevard Complete Street Project explored opportunities to make McGillivray Boulevard safer and more comfortable for everyone to travel between Southeast Chkalov Drive and Southeast 164th Avenue. The Project evaluated how McGillivray Boulevard can better meet the needs of people walking, biking, using a mobility device, and driving. The Project explored opportunities and examine tradeoffs to improve safety on the corridor ahead of the pavement project planned to occur in 2026.	Improving safety, mobility, and providing additional modal choices for road users. Identified by project team and recommended by the Transportation and Mobility Commission.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 7,500,000	Cascade	2026
TRANS-0921	PRJ100923	Northeast 112th Avenue Complete Street and Paving Project - Mill Plain Boulevard to Northeast 28th Street	Mill Plain Boulevard	Northeast 28th Street	Active Transportation	Active	Funded	The Northeast 112th Avenue Complete Street Project between Mill Plain Boulevard and 28th Street will repave and restripe to one general purpose lane, center turn lane, widen travel lanes and add buffered/protected mobility lane between Mill Plain Boulevard and 18th Street. Repave road and match existing configuration between 18th and 28th Streets.	The Northeast 112th Avenue Complete Street Project explore the major street retrofit on 112th Avenue between Mill Plain Boulevard and 28th Street, a street with well documented safety issues and vulnerable street users. Identified by 112nd Avenue Subarea Plan.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 4,000,000	$ 3,500,000	Pacific & Cascade	2027
TRANS-0924	PRJ100805	Saint Johns/Saint James Complete Street and Paving Project - Fourth Plain Boulevard to City Limits	Fourth Plain Boulevard	City Limits	Active Transportation	Future	Unfunded	The Saint Johns/Saint James Complete Street and Paving Project includes design concept options to create and implement safety and mobility improvements. The project limits include Saint Johns Boulevard from Fourth Plain Boulevard to State Route-500, Saint James Road from State Route-500 to City Limits, and Fort Vancouver Way from Fourth Plain Boulevard to Saint Johns Boulevard.	These streets have documented safety issues and vulnerable street users. This project was identified by City Council as a priority corridor in the Complete Streets Policy and as a commercial corridor in the Comprehensive Plan. Concept Design Options Corridor Plan outlines improvements over time and was recommended by the TMC.	Near-term	No		$ 8,000,000	Columbia	Unknown
TRANS-0926	TBD	Southeast 164th Avenue Safety/Mobility Improvements - Tech Center Drive to Southeast 1st Street	Tech Center Drive	Southeast 1st Street	Active Transportation	Future	Unfunded	Southeast 164th Avenue is the site of two top priority crash locations, the segment between Southeast 1st Street and Mill Plain Boulevard and the intersection with Southeast Tech Center Drive/12th Street. There have been three fatalities and two severe injuries on the segment and at the intersection, and four additional pedestrian injuries at the intersection. The project will include elements to address crash factors, such as treatments related to signal phases, intersection configurations, pavement markings, installation of refuge islands or raised crossings, and other measures. (Outside 6-year horizon)	Improving safety and mobility. Identified from the Transportation System Safety Analysis (2018) and Local Road Safety Plan (2022).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 2,000,000	Cascade	Unknown
TRANS-0927	TBD	Northeast 187th Avenue - Southeast 1st Street to Northeast 18th Street	Southeast 1st Street	Northeast 18th Street	Arterial Improvements	Future	Unfunded	New 3-lane collector/minor arterial (1 lane each direction plus center turn lane) with sidewalks, mobility lanes, streetlights, signals, school crossings, stormwater and sound walls where required.	Project addresess capacity, safety conditions and providing multimodal access. Identified by Section 30 Subarea Plan.	Medium-term	No		$ 13,000,000	Cascade	Unknown
TRANS-0928	TBD	Northeast 13th Street - Northeast 172nd Avenue to Northeast 187th Avenue	Northeast 172nd Avenue	Northeast 187th Avenue	Arterial Improvements	Future	Unfunded	New 3-lane collector/minor arterial (1 lane each direction plus center turn lane) with sidewalks, mobility lanes, streetlights, signals, school crossings, stormwater and sound walls where required.	Project addresess capacity, safety conditions and providing multimodal access. Identified by Section 30 Subarea Plan.	Long-term	No		$ 18,000,000	Cascade	Unknown
TRANS-0931	TBD	Northeast 162nd Avenue and Northeast 9th Street Intersection Improvements			Signal & Transportation Improvements	Future	Unfunded	The Northeast 162nd Avenue and Northeast 9th Street Intersection Improvements will include a signalized intersection and the east leg of the intersection will be striped to provide a westbound left-turn lane. (Outside 6-year horizon)	Improving safety and mobility. This project is taking on the recommendations from the Section 30 Traffic Study.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 500,000	Cascade	Unknown
TRANS-0932	TBD	Northeast 172nd Avenue and Northeast 9th Street Intersection Improvements			Signal & Transportation Improvements	Future	Unfunded	The Northeast 172nd Avenue and Northeast 9th Intersection Improvements will include a signalized intersection or a single lane roundabout. (Outside 6-year horizon)	Improving safety and mobility. This project is taking on the recommendations from the Section 30 Traffic Study.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 500,000	Cascade	Unknown
TRANS-0936	TBD	Mill Plain Boulevard and Hearthwood Boulevard Intersection Improvements			Signal & Transportation Improvements	Future	Unfunded	Mill Plain Boulevard and Hearthwood Boulevard are each wide arterials whose intersection had seen crashes that resulted in severe and fatal injuries. The confluence of transit, heavy vehicle traffic on Mill Plain Boulevard, and permissive left turns across the path of pedestrians and mobility users have led to crashes that resulted in severe and fatal injuries. The project will include elements to address crash factors, such as treatments related to signal phases, intersection configurations, pavement markings, and other measures.	Improving safety, mobility, and providing additional modal choices for road users. Identified from the Transportation System Safety Analysis (2018) and Local Road Safety Plan (2022).	Near-term	No		$ 500,000	Cascade	Unknown
TRANS-0937	TBD	Southeast Westridge Boulevard and Southeast 1st Street Intersection Improvements			Signal & Transportation Improvements	Future	Unfunded	The Southeast Westridge Boulevard and Southeast 1st Street intersection improvements will include a signalized intersection.	Improving safety and mobility. Identified through the development review process.	Medium-term	No		$ 1,500,000	Cascade	Unknown
TRANS-0938	PRJ101031	Mill Plain/MacArthur Intersection Improvements	East Mill Plan Boulevard	Blandford Drive	Arterial Improvements	Active	Funded	Heights District Plan recommended roadway changes to improve safety, support multi-modal mobility, and add a linear greenbelt. Includes moving vehicle travel to the east side of the median and converting the west side to separated mobility lanes and pedestrian facilities, and open space. Will include improved ADA access and pedestrian crossings at Blanford, Phoenix, Texas and Burdick.	Provide economic development and improve access and mobility. Originated from Heights District Plan (2020).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 4,000,000	$ 10,000,000	Columbia	2026
TRANS-0941	TBD	Fourth Plain Boulevard Safety and Mobility - 121st Avenue to 127th Avenue	121st Avenue	127th Avenue	Active Transportation	Future	Unfunded	Fourth Plain Boulevard is one of the most dangerous roadways in the City, with high frequency and severity of crashes at several segments and intersections. The multimodal roadway sees people traveling in all modes, including vis bus rapid transit service. While the Fourth Plain Safety and Mobility Project will address several dangerous segments and intersections, the remaining intersection and segment are identified for safety improvements that could include roadway reconfigurations, changing signal phasing, installing lighting, and reducing crash exposure for vulnerable users. (Outside 6-year horizon)	Improving safety, mobility, and providing multimodal choices for road users. This project was identified in the Local Roads Safety Plan (2022) and Transportation System Safety Analysis (2018).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 1,000,000	Pacific	Unknown
TRANS-0942	TBD	Southeast 192nd Avenue and Mill Plain Boulevard Intersection Improvements			Signal & Transportation Improvements	Future	Unfunded	Project elements will look at crash countermeasures related to high traffic volumes, number of commercial driveways, roadway configurations and insufficient infrastructure for pedestrians or mobility users. (Outside 6-year horizon)	Improve safety, mobility and provide mulitmodal access. Originated from Transportation System Safety Analysis (2018) and Local Road Safety Plan (2022).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 500,000	Cascade	Unknown
TRANS-0943	PRJ100922	Garrison Road Sidewalk Infill - Mill Plain to Northeast 12th Street	Mill Plain Boulevard	Northeast 12th Street	Active Transportation	Active	Funded	Install sidewalks and ADA ramps along Garrison Road from Mill Plain to David Douglas Park/Northeast 12th Street.	Improve safety and mobility. Identified by staff and public with support from WSDOT.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 1,000,000	$ 1,600,000	Cascade	2026
TRANS-0944	PRJ101098	Grand Loop Infrastructure Improvements			Arterial Improvements	Active	Funded	Pursuant to the Heights District Master Plan, construct a network of street, pedestrian and mobility improvements that form a loop around the central core of the Tower Mall Redevelopment Area, providing connections between MacArthur Boulevard, Devine Road and Mill Plain Boulevard.	Improve safety, mobility and provide mulitmodal access. Project originated from the Heights District Master Plan (2020).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 20,000,000	Columbia	2026
TRANS-0945	TBD	East 18th Street Mobility Lane Improvements and Traffic Calming - Grand Boulevard to Northeast Burton Road	Grand Boulevard	Northeast Burton Road	Active Transportation	Future	Unfunded	Improve safety and comfort of mobility lanes on East 18th Street between Grand Boulevard and Northeast Burton Road through the addition of a buffer zone and vertical elements where feasible. Explore narrowing existing travel lanes to slow vehicle traffic and create space for buffer, as well as other traffic calming treatments such as lowering the posted speeds. (Outside 6-year horizon)	Improve safety and mobility. This project originated in the Fourth Plain and Fort Vancouver Way Safety and Mobility Project (2023).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 2,000,000	Columbia & Cascade	Unknown
TRANS-0946	PRJ100959	Fourth Plain - 62nd - Andresen Multiuse Path	East 62nd Avenue	Andresen Road	Active Transportation	Future	Partially Funded	Build an off-street multiuse facility between Northeast 62nd Avenue and Northeast Andresen Road to serve mobility users traveling along the corridor. Expand existing sidewalk on either north or south side of the road at the back of sidewalk to create additional space to be share with other mobility users. Use emblems or materials to differentiate between pedestrian and mobility user zones.	Improve safety, mobility and provide mulitmodal access. This project originated in the Fourth Plain and Fort Vancouver Way Safety and Mobility Project (2023).	Near-term	No		$ 8,400,000	Columbia	Unknown
TRANS-1115	PRJ101246	Image Elementary School Pedestrian Crossing Improvements (SRTS)	Northeast 52nd Street	Northeast 135th Avenue	Signal & Transportation Improvements	Future	Funded	Install high-visibility crosswalk, stop line at uncontrolled crosswalks, "Stop for Pedestrian" signs, rectangular rapid flashing beacon, pedestrian and bicyclist crossing illumination, pedestrian and bicyclist segment illumination, and curb extension at Image Elementary School from Northeast 52nd Street and Northeast 135th Avenue.	To improve pedestrian safety and access. Identified by staff and the public.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 292,000	$ 292,000	Pacific	2027
TRANS-1117	PRJ101190	Fourth Plain Boulevard and Laurel Place Pedestrian Crossing (SS4A)			Signal & Transportation Improvements	Active	Funded	Install enhanced pedestrian crossing to improve pedestrian safety and accessiblity.	To improve pedestrian safety and access. Identified in the Fourth Plain Forward Pedestrian Safety and Access Implementation Strategy and funding in the City's USDOT Safe Streets and Roads for All package.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 400,000	$ 500,000	Columbia	2026
TRANS-1118	PRJ101190	Fourth Plain Boulevard and Watson Avenue Pedestrian Crossing (SS4A)			Signal & Transportation Improvements	Active	Funded	Install enhanced pedestrian crossing to improve pedestrian safety and accessiblity.	To improve pedestrian safety and access. Identified in the Fourth Plain Forward Pedestrian Safety and Access Implementation Strategy and funding in the City's USDOT Safe Streets and Roads for All package.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 400,000	$ 500,000	Columbia	2026

To improve pedestrian safety and access in the Fourth Plain Forward Pedestrian Safety and Access Implementation Strategy and funding in the City's USDOT Safe Streets and Roads for All package.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 535,000	$ 635,000	Columbia	2026
TRANS-1122	PRJ101190	Rossiter Lane to Burnt Bridge Creek Pedestrian Connector (SS4A)			Active Transportation	Future	Funded	This project will add a pedestrian bridge crossing to create a new connection to the Burnt Bridge Creek Trail.	To improve pedestrian safety and access in the Fourth Plain Forward Pedestrian Safety and Access Implementation Strategy and funding in the City's USDOT Safe Streets and Roads for All package.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 1,000,000	$ 1,647,500	Columbia	2026
TRANS-1123	PRJ101190	Todd Road Sidewalk Infill - Fourth Plain Boulevard to 18th Street (SS4A)	Fourth Plain Boulevard	18th Street	Active Transportation	Future	Funded	This project will add new sections of sidewalk infill along Todd Road from Fourth Plain Boulevard to 18th Street.	To improve pedestrian safety and access in the Fourth Plain Forward Pedestrian Safety and Access Implementation Strategy and funding in the City's USDOT Safe Streets and Roads for All package.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 535,000	$ 635,000	Columbia	2026
TRANS-1124	PRJ101190	Stapleton Road Mobility Improvements - State Route-500 to 18th Street (SS4A)	Fourth Plain Boulevard	18th Street	Active Transportation	Future	Funded	Restripe Stapleton Road from State Route-500 to 18th Street to create a buffered mobility lanes in both north and sourthbound directions by eliminating existing vehicle center turn lane.	To improve mobility access in the Fourth Plain Forward Pedestrian Safety and Access Implementation Strategy and funding in the City's USDOT Safe Streets and Roads for All package.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 800,000	$ 1,000,000	Columbia	2026
TRANS-1127	PRJ101190	34th Street Sidewalk Connection (SS4A)	Fourth Plain Boulevard	Northeast 34th Street	Active Transportation	Future	Funded	New north-south pedestrian access between Fourth Plain Boulevard and Northeast 34th Street (within Northeast 57th Avenue and Northeast 62nd Avenue). Exact location have not yet been determined.	To improve pedestrian safety and access in the Fourth Plain Forward Pedestrian Safety and Access Implementation Strategy and funding in the City's USDOT Safe Streets and Roads for All package.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 335,000	$ 435,000	Columbia	2027
TRANS-1128	TBD	Brandt Road Traffic Calming - Fourth Plain Boulevard to East 18th Street	Fourth Plain Boulevard	East 18th Street	Active Transportation	Future	Unfunded	Install traffic calming treatments on Brandt Road to improve safety for users. Improve safety and visibility of mobility lanes by restriping where needed and refreshing bicycle road markings. (Outside 6-year horizon)	To improve safety and mobility access. Originated from the Fourth Plain and Fort Vancouver Way Safety and Mobility Project (2023).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 100,000	Columbia	Unknown
TRANS-1129	TBD	North Grand Boulevard Traffic Calming - Fourth Plain Boulevard to East 18th Street	Fourth Plain Boulevard	East 18th Street	Active Transportation	Future	Unfunded	Install traffic calming treatments on Grand Boulevard to improve safety for users. (Outside 6-year horizon)	To improve safety and mobility access. Originated from the Fourth Plain and Fort Vancouver Way Safety and Mobility Project (2023).	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 100,000	Columbia	Unknown
TRANS-1131	TBD	Safe Routes to School	Citywide		Program	Future	Funded	New program implemented Citywide in 2025. Work with schools to analyze school walking routes, gaps and safety issues to develop safe route projects. Program budget $200,000 per year.	Develop safety and education programs in partnership with schools, neighbors, community organizations and agencies to increase safety and improve health for students and their families.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Ongoing
TRANS-1132	TBD	City Safety Program	Citywide		Program	Future	Unfunded	New program to be implemented Citywide. Provide resources to develop a comprehensive City safety program, which would include: management of the citywide collision dashboard, regular review of safety data and design of rapid response projects, response to collision hotspots identified through the Local Road Safety Plan, and high collision corridor. Program budget to be determined.	To improve overall traffic safety by identifing patterns and high collusions areas, then ulitmately resulting in future TIP projects to resolve these issues.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Unknown
TRANS-1133	TBD	Lighting for Pedestrian Safety Program	Citywide		Program	Future	Unfunded	New program to be implemented Citywide. Create GIS inventory of high-need locations based on pedestrian activity, locations of mid-block enhanced pedestrian crossings, locations that need additional crossings/lighting, high ridership bus stops, roadway characteristics, and crash data. Develop policy to prioritize installation and incorporate into development review. Program budget to be determined.	To improve pedestrian safety by identifing patterns and high need areas, then ulitmately resulting in future TIP projects to resolve these issues.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Unknown
TRANS-1134	TBD	Automated Enforcement Program	Citywide		Program	Future	Unfunded	New program to be implemented Citywide. Develop program, community outreach, pilot testing, coordinate with Vancouver Police Department, and address equity considerations. Program budget to be determined.	Included in TSP and now enabled for expanded use at state level.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Unknown
TRANS-1135	TBD	Pedestrian/Bike/Small Mobility Wayfinding Program	Citywide		Program	Future	Unfunded	New program to be implemented Citywide. Program budget to be determined.	To improve pedestrian safety and mobility access.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No			N/A	Unknown
TRANS-1143	TBD	Northeast Andresen Road Sidewalk - Northeast 78th Street to Northeast 84th Street	Northeast 78th Street	Northeast 84th Street	Active Transportation	Future	Unfunded	This project includes new sidewalk and mobility improvements along Northeast Andresen Road from Northeast 78th Street to Northeast 84th Street. (Outside 6-year horizon).	To improve pedestrian safety and mobility access. Identified by staff and public.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	No		$ 1,000,000	Pacific	Unknown
TRANS-1350	TBD	112th Avenue/Chkalov Drive Complete Street and Paving Project - Northeast 28th Street to Northeast 51st Street	Northeast 28th Street	Northeast 51st Street	Active Transportation	Future	Partially Funded	The Northeast 112th Avenue Complete Street Project between 28th Street and 51st Street will repave and restripe to add standard bicycle and small mobility lane. Configure alternate route Neighborhood Greenway with traffic calming treatments, and wayfinding signage. Shared lane markings between: 106th and 110th Avenue, Morrow Road, Four Seasons Lane, and two-way 12 foot shared use path one east side between 18th and 51st Streets (long term).	The Northeast 112th Avenue Complete Street Project will explore a major street retrofit on 112th Avenue between 28th Street and 51st Street, a street with well documented safety issues and vulnerable street users. Identified by 112nd Avenue Subarea Plan.	Near-term	No		$ 3,975,000	Pacific	2028
TRANS-1351	TBD	112th Avenue/Chkalov Drive Complete Street Project - Southeast 3rd Street to McGillivray Boulevard	Southeast 3rd Street	Southeast McGillivray Boulevard	Active Transportation	Future	Unfunded	The project will include road reconfiguration, protected bike and small mobility lane, pavement markings, signage, traffic signal modification, enhanced pedestrian crossing, ADA ramps.	The Northeast 112th Avenue Complete Street Project will explore a major street retrofit on 112th Avenue between Southeast 3rd Street and McGillivray Boulevard, a street with well documented safety issues and vulnerable street users. Identified by 112nd Avenue Subarea Plan.	Near-term	No		$ 1,300,000	Cascade	Unknown
TRANS-1352	PRJ101097	Upper Main Street Complete Street and Paving Project - East 39th to Northeast 45th Street/Hazel Dell	East 39th Street	Northeast 45th Street/Hazel Dell	Active Transportation	Future	Funded	The Upper Main Street Complete Street Project between 37th Street to City Limits will repave and restripe. Strategic improvements are incorporated throughout the length of the project and they include: curb ramp upgrades, a southbound mobility lane between 39th and 40th Streets, a two way bikeway between 40th and the Covington House driveway exit, a multiuse path between the Covington House driveway and 45th Street, new marked crossings, a RRFB beacon and median island at 39th and F Street, shared lane markings along F Street between 39th and 40th Street, new marked crossings at 40th and F Street and removal of a northbound travel lane and widen other travel lanes to accommodate buses. Improvements to be coordinated with C-TRAN Highway 99 BRT project.	Improving safety, mobility, and providing additional modal choices for road users. Identifed by staff.	Funded, unfunded projects outside the 6-year horizon, and programs were not scored.	Yes	$ 1,500,000	$ 4,000,000	Columbia	2026
TRANS-1353	TBD	East 33rd Street Complete Street & Paving Project - I-5 to Kauffman Avenue and Saint Johns Boulevard to Grand Boulevard			Active Transportation	Future	Unfunded	The East 33rd Street Complete Street Project is between Interstate-5 overpass to Kauffman Avenue and Saint Johns Boulevard to Grand Boulevard will repave and restripe. Improvements will include: lower speed limits, remove on street parking east of Main Street except for the north side of 33rd Street between Main and F Street and add buffered mobility lanes, remove median island at F Street and add RRFB beacon with a raised crossing or speed cushions approaching the crossing, intersection improvements at 33rd and Grand, and add speed humps and shared lane markings between Kauffman and Main Street. Consider removing on street parking and adding buffered mobility lanes between Main and Columbia based on traffic volumes and speeds.	This project will explore major mobility improvements and complete streets retrofits as there are well documented safety issues and vulnerable street users. This will be a combined efforts with East 29th Street Complete Street Project. Identified by staff and recommended by the Transportation and Mobility Commission.	Near-term	No		$ 2,000,000	Columbia	Unknown
TRANS-1354	TBD	East 29th Street Complete Street and Paving Project - I-5 to Kauffman Avenue and Saint Johns Boulevard to Neals Lane			Active Transportation	Future	Unfunded	The East 29th Street Complete Street and Paving Project between Interstate-5 overpass to Kauffman and Saint Johns Boulevard to Neals will lower speed limit. Add speed cushions and shared lane markings. Improve crossing at Grand Boulevard with pedestrian island and bicycle crossing. Install traffic circles at Franklin, F and Z Streets and Watson Ave. Fill sidewalk gaps east of X Street. Remove on street parking at intersection corners of Columbia and Kauffman. Add wayfinding signage for people walking, rolling and biking.	This project will explore major mobility improvements and complete streets retrofits as there are well documented safety issues and vulnerable street users. This will be a combined efforts with East 33rd Street Complete Street Project. Identified by staff and recommended by the Transportation and Mobility Commission. CITY OF Vancouver WASHINGTON

Staff Report: 106-26

To: Mayor and City Council
From: City Manager
Date: June 1, 2026

Subject
Contract Award - 2026 Resurfacing Project - C-102284

Key Points

- The City maintains approximately 1,900 lane miles of streets in its system.
- The City's annual resurfacing and preventive maintenance contracts are the primary way that asphalt streets receive maintenance work.
- City maintenance crews do not have the capacity to do this amount of paving work during the paving season of late-spring to early-fall.

Strategic Plan Alignment
Transportation and Mobility – a safe, future-ready and convenient transportation system

Present Situation
The 2026 Resurfacing Project is being constructed as part of the Pavement Management program. This project involves paving with hot mix asphalt on residential streets at various locations throughout the City. This year's total pavement management program includes two separate resurfacing contracts. A total of 18 lane miles of street would be paved under those contracts. These contracts include the "2026 Resurfacing Project" and the "W Fourth Plain Blvd – Mill Plain to Main St NHS (National Highway System) Resurfacing Project". This staff report is only for the 2026 Resurfacing Project. The second paving project was approved under a previous staff report.

The attached vicinity map shows which streets would be paved. The project includes paving streets in Edgewood Park, Vancouver Heights, Cascade Southeast and Cascade Highlands neighborhoods.

On April 28, 2026, the City received two bids for this project. The low bidder was responsive with a bid of $2,205,896. The bids are as follows:

SUMMARY OF BIDS	
BIDDER	**AMOUNT**
Granite Construction Company, Vancouver, WA	$2,205,896.00
Lakeside Industries, Vancouver, WA	$2,273,444.00
Engineers Cost Estimate	$2,800,000.00

There is a minimum apprenticeship goal of 15% of the utilized labor hours for this project. Granite Construction Company of Vancouver, WA, has submitted an Apprenticeship Utilization Plan to meet or exceed this goal by using approximately 369 hours of apprentice time of the estimated total of 2,454 applicable labor hours for this project.

Advantage(s)

1. Would result in new pavement on approximately 10 lane miles on City streets, protecting the City's investment in its street network.
2. Would reduce higher future maintenance costs on city streets.
3. Would follow through on commitments and improve neighborhood livability.

Challenge(s)

1. Neighborhood residents, businesses and local traffic will be inconvenienced during the construction period along the corridors; however, the construction duration is short, and lane closures will be limited, which will minimize the temporary inconvenience.
2. Construction will generate noise and dust in the work areas. To mitigate for noise, the contractor would be required to comply with a noise variance for nighttime work, although none is anticipated. The contractor will be required to implement a dust control and erosion control strategy at all locations.

Budget Impact

The project is funded through the Pavement Management Program ($2,205,896.00). Sufficient funds are budgeted to construct the project.

Prior Council Review

None

Action Requested

On Monday, June 1, 2026, award a construction contract for the 2026 Resurfacing Project to the lowest responsive bidder, Granite Construction Company, of Vancouver, WA, at the bid price of $2,205,896, which includes Washington State Sales tax, and authorize the City Manager, or designee, to finalize and execute the contract and authorize any legal action necessary to enforce the terms of the same.

CONSTRUCTION CONTRACT # C-102284
BID 26-18: 2026 RESURFACING PROJECT

This Contract (hereinafter referred to as the "Contract") is entered into by and between the City of Vancouver, Washington, a municipal corporation organized under the laws of the State of Washington (hereinafter referred to as the "City") and Granite Construction Company, 16821 SE McGillivray Blvd, Vancouver, WA 98683 (hereinafter referred to as the "Contractor"). The City and the Contractor may be collectively referred to herein as the "Parties" or individually as a "Party."

WHEREAS, the City desires to engage the Contractor to provide public works construction and other related services for the work described herein;

WHEREAS, Contractor has agreed to offer its services to perform said work per the City issued Invitation to Bid (ITB) No. 26-18 and all addenda thereto, Contractor's Bid to said ITB, the Project Plan Set and Special Provisions, and City Council's approval on Monday, June 1, 2026 per Staff Report No. ##-##; and

WHEREAS, the Contractor represents by entering into this Contract that it is fully qualified to perform the work to which it will be assigned in a competent and professional manner, and to the standards required by the City.

NOW, THEREFORE, in consideration of the terms, conditions, covenants, and performance contained herein, or attached an incorporated and made a part hereof, the parties hereto agree as follows:

1. **STATEMENT OF WORK**: The Contractor hereby agrees to furnish all materials, labor, tools, machinery and implements of every description necessary to complete the work in a professional manner within the time limits stated in this Contract for the construction and installation of the following improvements and will make all necessary arrangements for the obtaining of permits from the United States, State of Washington, and/or any of its agencies as may be necessary to do the work required and covered by this Contract.

   This Contract provides for the improvement of streets within the City of Vancouver including pavement repairs, planing of roadways, paving of existing roads, minor utility adjustments, and temporary striping and other work, all in accordance with the attached Contract Plans, these Contract Provisions and the Standard Specifications, herein referred to as "Work".

   The Contract Work shall be Physically Complete within 25 Working Days from the Notice to Proceed.

2. **EFFECTIVE DATE:** This Contract is effective as of the last signature of the Contract.

3. **E-VERIFY PROGRAM:** Contractor shall register and enter into a Memorandum of Understanding (MOU) with the Department of Homeland Security E-Verify program within sixty days after execution of this Contract. Contractor shall ensure all Contractor employees and any subcontractor(s) assigned to perform work under this Contract are eligible to work in the United States. Contractor shall provide verification of compliance upon City request. Failure by Contractor to comply with this subsection shall be considered a material breach.

4. **CONTRACTOR RESPONSIBLITIES FOR SUBCONTRACTOR:** The Contractor shall include the language of this section in all tier subcontracts and shall require each of its subcontractors to include the same language of this section in each of their subcontracts, adjusting only as necessary the terms used for the contracting parties. The requirements of this section apply to all subcontractors regardless of tier. The Contractor shall require all subcontractors to comply with all federal, state and municipal laws, rules and regulations whatsoever.

   At any time of the subcontract execution, the Contractor shall verify that all tier subcontractors meet the following bidder responsibility criteria:

   a. Have a current certificate of registration in compliance with Chapter 18.27 RCW, which must have been in effect at the time of subcontract bid submittal.
   b. Have a current Washington Unified Business Identifier (UBI) number.
   c. Have received training on the requirements related to public works and prevailing wage as required by RCW 39.04.350.
   d. Within the three-year period immediately preceding the date of the bid solicitation, not have been determined by a final and binding citation and notice of assessment issued by the department of labor and industries or through civil judgement entered by a court of limited or general jurisdiction to have willfully violated, as defined in RCW 49.48.082, any provision of Chapter 49.46, 49.48 or 49.52 RCW.
   e. If applicable, have:
      i. Industrial Insurance (worker's compensation) coverage for the subcontractor's employees working in Washington, as required in Title 51 RCW.
      ii. A Washington Employment Security Department reference number, as required in Title 50 RCW.
      iii. A Washington Department of Revenue state excise tax registration number, as required in Title 82 RCW.
      iv. An electrical contractor license, if required by Chapter 19.28 RCW.
      v. An elevator contractor license, if required by Chapter 70.87 RCW.
   f. Not be disqualified from bidding on any public works contract under RCW 39.06.010 or 39.12.065(3).

5. **DELINQUENT STATE TAXES**: The Contractor shall not owe delinquent taxes to the Washington State Department of Revenue without a payment plan approved by the Department of Revenue.

6. **COMPENSATION AND SCHEDULE OF PAYMENTS**: In consideration of the promises and agreements of the Contractor as set forth herein, and in consideration of the faithful performance and furnishing of the work and materials required by this Contract to the satisfaction of the City, the City agrees to pay to the Contractor as prescribed in the solicitation and Contractor's Bid, and in accordance with the ordinances of the City of Vancouver and the laws of the State of Washington, the following sum as indicated, which amount does include 8.9% Washington State Sales Tax (if applicable) $ 2,205,896.00 USD.

   The amount finally to be paid is, however, variable upon the Work actually performed, and final payment will be made upon the basis of the amount of work performed and the materials furnished, and at the lump sum or unit prices fixed in the Contractor's Bid as modified by any and all approved Change Orders.

7. **CONTRACTOR'S INSURANCE**: The Contractor agrees to the following requirements relating to insurance coverage. Provide a Certificate of Liability Insurance. Said certificate must be provided on a standard "ACORD" form, or its equivalent, and must provide that coverage shall not be canceled or modified without 30 days prior written notice to the City of Vancouver.

   The City of Vancouver may inspect all policies, and copies shall be provided to the City upon request. The Contractor shall obtain the insurance described in this section from insurers approved by the State Insurance Commissioner pursuant to RCW Title 48. The insurance must be provided by an insurer with a rating of A-: VII or higher in the A.M. Best's Key Rating Guide, which is licensed to do business in the state of Washington (or issued as a surplus line by a Washington Surplus lines broker). The City reserves the right to approve or reject the insurance provided, based on the insurer (including financial condition), terms and coverage, the Certificate of Insurance, and/or endorsements.

   The Contractor agrees to procure insurance coverage as required below:

COVERAGE	LIMITS OF LIABILITY
I. Commercial General Liability:	
Policy shall include Bodily Injury, Property Damage, Personal Injury and Broad Form Contractual Liability	
Each Occurrence	$1,000,000
General Aggregate Per Occurrence	$2,000,000
Products & Completed Operations Aggregate	$2,000,000
Personal and Advertising Injury	$1,000,000
Blanket Contractual Liability	$1,000,000
II. Commercial Automobile Liability	
Policy shall include Bodily Injury and Property Damage, for any owned, Hired, and/or non-owned vehicles used in the operation, installation and maintenance of facilities under this Contract.	
Combined Single Limit	$1,000,000
III. Workers' Compensation (applicable to the State of Washington)	
Per Occurrence	Statutory
Employer's Liability	$1,000,000

COVERAGE	LIMITS OF LIABILITY
Disease Each Employee	$1,000,000
Disease Policy Limit	$1,000,000
Each Claim	$1,000,000
Annual Aggregate	$2,000,000
IV. Pollution Legal Liability	
Each Claim	$3,000,000
Annual Aggregate	$6,000,000

In addition to the coverage and limits listed above the Contractor's insurance must all contain the following:

a. City Listed as Additional Insured. The City of Vancouver, its Agents, Representatives, Officers, Directors, Elected and Appointed Officials, and Employees must be named as additional insured. The required Additional Insured endorsements shall be at least as broad as ISO CG 20 10 11 85, or its equivalent CG 20 10 07 04 and CG 20 37 07 04 must be included with the Certificate of Insurance.

b. Either the Commercial General Liability or the Worker's Compensation policy must be endorsed to include "Washington Stop Gap" insurance. The limits and aggregates referenced must apply to the Stop Gap coverage as well and must be indicated on the certificate.

c. Commercial General Liability insurance shall be written on coverage forms at least as broad as ISO occurrence form CG 00 01, including but not limited to liability arising from premises, operations, stop gap liability, independent contractors, products-completed operations, personal and advertising injury, and liability assumed under an insured contract. There shall be no exclusion for liability arising from explosion, collapse or underground property damage. The Commercial General Liability insurance shall be endorsed to provide a per project general aggregate limit, using ISO form CG 25 03 05 09 or an equivalent endorsement.

d. The City of Vancouver shall be listed on the Certificate as Certificate Holder.

e. Cover Trigger: The insurance must be written on an "occurrence" basis. This must be indicated on the Certificate.

f. Contractor shall ensure that each subcontractor of every tier obtains and maintains at a minimum the insurance coverages required for Commercial General Liability and Auto Liability. Upon request of the City, the Contractor shall provide evidence of such insurance.

g. The Contractor shall keep this insurance in force during the term of the Contract and for thirty (30) days after the Physical Completion date. The Contractor shall provide the City and all Additional Insured with written notice of any policy cancellation, within two business days of their receipt of such notice.

h. Failure on the part of the Contractor to maintain the insurance as required shall constitute a material breach of contract, upon which the City may, suspend work or terminate the contract.

i. All costs for insurance shall be incidental to and included in the unit or lump sum prices of the contract and no additional payment will be made.

8. **CONTRACTOR'S BOND**: The Contractor agrees that before it undertakes performance of this Contract, it will file with the City a Performance Bond and a Payment Bond, in the forms prescribed by the City of Vancouver, in the full amount of the Contract price with a company authorized to do business in the State of Washington as a surety. The bonds shall comply with the laws of the State of Washington, especially with the provisions of Chapter 39.08 RCW.

9. **DISPUTE RESOLUTION**: In the event of a dispute between the Parties which cannot be resolved by the contract managers, the Contractor and the City shall review such dispute and may attempt to resolve the dispute. Any controversy or claim arising out of or relating to this Contract or alleged breach of this Contract that cannot be resolved by the Parties within 30 days of receipt of written notice may be submitted to mediation. If the dispute cannot be resolved through mediation, either party may initiate litigation pursuant to the governing law and venue provisions of this Contract. The Parties agree to pay their own attorneys' fees and expenses.

10. **GOVERNING LAW/VENUE**: This Contract shall be deemed to have been executed and delivered within the State of Washington, and the rights and obligations of the parties hereunder shall be construed and enforced in accordance with, and governed by, the laws of the State of Washington without regard to the principles of conflict of laws. Any action or suit brought in connection with this Contract shall be brought in the Superior Court of Clark County, Washington.

11. **EMPLOYMENT OF LABOR**: The Contractor agrees that all persons employed by the Contractor and by any of its subcontractor and any of their lower tier contractors in work performed pursuant to this Contract shall not be employed in excess of eight (8) hours in any day, except as provided or allowed by Chapter 49.28 RCW and WAC 296.127 and any amendment thereto.

12. **PAYMENT OF LABOR**: The Contractor agrees that all laborers, workers, or mechanics employed by it or by any subcontractor in the performance of this Contract will be paid not less than the prevailing wage rate for an hour's work, in accordance with the provisions of Chapter 39.12 RCW, and all rules and regulations promulgated pursuant thereto.

    The prevailing wage rates in effect at the time of the bid submittal deadline shall apply for the duration of the project, no matter how long it lasts. However, if the Contract is awarded more than six (6) months after the bids were due, the prevailing wage rates in effect on the award date shall apply.

    In case any dispute arises as to what the prevailing rate of wages for work of a similar nature are and such dispute cannot be adjusted by the parties involved, the matter shall

be referred to the director of the Department of Labor and Industries of the State of Washington for arbitration, and the director's decision shall be final, conclusive and binding on all parties involved in the dispute.

13. **PAYMENT TO THE CONTRACTOR**: Progress payments to the Contractor shall be made within 30 days of a fully executed Pay Estimate pending all compliance with all contractual requirements. A sum equal to 5% may be reserved and retained from monies earned by the Contractor in accordance with Chapter 60.28 RCW. The City reserves the right to require Contractor to correct any submitted or paid erroneous invoices according to the rates set forth herein. City and Contractor agree that any amount paid in error by City does not constitute a change in the agreed upon amount; Contractor agrees to issue a refund of any of any overages paid in error by the City.

    Release of the retained percentage or the retainage bond shall be in accordance with Chapter 60.28 RCW. Every person performing labor or furnishing supplies toward the completion of said improvement of work shall have a lien upon said monies so reserved; provided, that such notice of the lien of such claimant shall be given in the manner provided in RCW 39.08.030 and within the time provided in Chapter 60.28 RCW as now existing and in accordance with any amendments that may hereafter be made thereto.

    No payment shall be made to the Contract, however, until the Contractor and all subcontractors who have performed work shall have filed and received approval of a Statement of Intent to Pay Prevailing Wage as required by RCW 39.12.040 from the Washington State Department of Labor and Industries. Said Contractor and all subcontractors shall also keep accurate payroll records for three years from the date of acceptance as described in RCW 39.12.120. A Contractor and all subcontractors shall, file a copy of its certified payroll records using the Department of Labor and Industries online system on a monthly basis. A Contractor's noncompliance with this section shall constitute a violation of RCW 39.12.050.

14. **INDEMNIFICATION**: Contractor agrees to indemnify, defend, save and hold harmless the City, its officials, employees and agents from any and all liability, including but not limited to demands, claims, causes of action, suits or judgements, claims of copyright or patent infringement, including costs, attorney fees and expenses incurred in connection therewith, or whatsoever kind or nature, arising out of, or in connection with, or incident to, the performance of services by Contractor pursuant to this Contract.

    In the event that any suit based on such a claim, demand, loss, damage, cost or cause of action is brought against the Contractor, the City retains the right to participate in said suit.

    This indemnity and hold harmless shall include any claim made against the City by an employee of the Contractor or subcontractor or agent of the Contractor, even if Contractor is thus otherwise immune from liability pursuant to worker's compensation statute, Title 51 RCW. To the extent that such liability arises from the concurrent negligence of both the City and the Contractor, such cost, fees and expenses shall be shared between the City and the Contractor in proportion to their relative degrees of negligence. This indemnity and hold harmless shall NOT apply in the case where liability arises from the sole negligence of the City. The Contractor specifically acknowledges that the provisions

contained herein have been mutually negotiated by the Parties and it is the intent of the Parties that Contractor provide the broadest scope of indemnity permitted by RCW 4.24.115.

15. **OWNERSHIP OF RECORDS AND DOCUMENTS**: Any and all work product prepared by the Contractor in the course of performing this Contract shall immediately become the property of the City. In consideration of the compensation provided for by this Contract, the Contractor hereby further assigns all copyright interests in such work product to the City. A copy may be retained by the Contractor. Previously owned intellectual property of Contractor or any third party, and any know-how, methodologies or processes used by Contractor to provide the services or project deliverables under this Contract shall remain property of the original City.

16. **PUBLIC DISCLOSURE COMPLIANCE**: The parties acknowledge that the City is an "agency" within the meaning of the Washington Public Records Act, Chapter 42.56 RCW, and that materials submitted by the Contractor to the City become public record. Such records may be subject to public disclosure, in whole or part and may be required to be released by the City in the event of a request for disclosure. In the event the City receives a public record request for any data or deliverable that is provided to the City and that is licensed from the Contractor, the City shall notify the Contractor of such request and withhold disclosure of such information for not less than five business days, to permit the Contractor to seek judicial protection of such information, provided that the Contractor shall be responsible for attorney fees and costs in such action and shall save and hold harmless the City from any costs, attorney fees or penalty assessment under Chapter 42.56 RCW for withholding or delaying public disclosure of such information.

17. **COOPERATIVE PURCHASING**: The Washington State interlocal Cooperation Act, Chapter 39.34 RCW, authorizes public agencies to cooperatively purchase goods and services if all parties agree. By having executed this Agreement, the Contractor agrees that other public agencies may purchase goods and services under this solicitation or contract at their own cost and without the City incurring any financial or legal liability for such purchases. The City agrees to allow other public agencies to purchase goods and services under this solicitation or contract, provided that the City is not held financially or legally liable for purchases and that any public agency purchasing under solicitation or contract file a copy of this invitation and such contract in accordance with RCW 39.34.040.

18. **AMENDMENTS**: All changes to this Contract, including changes to the statement of work and compensation, must be made by written Change Order and/or Amendment and signed by all parties to this Contract.

19. **AUTHORIZATION AND COMPLIANCE WITH THE LAW**: The Contractor certifies that the person signing the Contract is legally authorized to enter into this binding Contract and that the Contractor shall fully comply with all relevant, federal, state and municipal laws, rules, regulations and policies.

20. **CITY BUSINESS AND OCCUPATION LICENSE**: The Contractor will be required to obtain a business license when contracting with the City unless allowable exemptions apply. The Contractor shall contact the State of Washington Business License Service website or by

phone at 800-451-7985, or the City's website to determine whether a business license is required pursuant to the Vancouver Municipal Code (VMC) Chapter 5.04.

21. **RELATION OF PARTIES**: The Contractor, its subcontractors, agents and employees are independent contractors performing services for the City and are not employees of the City; shall not as a result of this Contract, accrue leave, retirement, insurance, bonding or any other benefits afforded to City employees; and, shall not have the authority to bind the City in any way except as may be specifically provided in the Statement of Work.

22. **ASSIGNMENT**: This Contract is binding on each party, its successors, assigns, and legal representatives and may not, under any circumstances, be assigned or transferred by either party without the other party's express written authorization.

23. **TERMINATION FOR CONVENIENCE**: The City, at its sole discretion, may terminate this Contract for convenience at any time for any reason deemed appropriate. Termination is effective immediately upon notice of termination given by the City.

    In the event this Contract is terminated prior to the completion of Work, Contractor will only be paid for the Work completed at the time of termination of the Contract.

24. **TERMINATION FOR CAUSE**: In the event the Contractor is, or has been, in violation of the terms of this Contract, including the solicitation, the City reserves the right, upon written notice to the Contractor, to cancel, terminate or suspend this Contract in whole or in part for default. Termination shall be effected by serving a notice of termination on the Contractor setting forth the manner in which the Contractor is in default. The Contractor will be paid only the contract price for services performed in accordance with the manner of performance set forth in the Contract.

    If it is later determined by the City that the Contractor had an excusable reason for not performing, such as a strike, fire or flood, or events which are not the fault of or are beyond the control of the Contractor, the City after setting up a new delivery or performance schedule, may allow the Contractor to continue work or treat the termination as a termination for convenience.

25. **OPPORTUNITY TO CURE**: The City at its sole discretion may in lieu of a termination allow the Contractor to cure the defect(s), by providing a "Notice to Cure" to Contractor setting forth the remedies sought by the City and the deadline to accomplish the remedies. If the Contractor fails to remedy to the City's satisfaction the breach or default of any of the terms, covenants, or conditions of this Contract within the time stated time, the City shall have the right to terminate the Contract without any further obligation to the Contractor. Any such termination for default shall not in any way operate to preclude the city from also pursuing all available remedies against the Contractor and its sureties for said breach or default, including but not limited to, termination of this Contract for convenience.

26. **WAIVER AND REMEDIES**: City's failure to enforce the terms or conditions herein or to exercise any right or privilege, or the City's waiver of any breach hereunder shall not thereafter waive any other term, condition or privilege, whether of the same or similar

type. Remedies under this Contract are cumulative; the use of one remedy shall not be taken to exclude or waive the right to use another.

27. **ENTIRETY OF CONTRACT:** This Contract incorporates all the agreements, covenants and understanding between the parties hereto and are merged into this written Contract. No prior agreement or prior understanding, verbal or otherwise, of the parties or their agents shall be valid or enforceable unless set forth in this Contract.

28. **USE OF CITY'S NAME:** Contractor may not use any of City's name, trademark, service marks, or logo in connection with the services contemplated by this Contract or otherwise without the prior written permission of City, which permission may be withheld for any or no reason and may be subject to certain conditions.

29. **DEBARMENT:** The Contractor certifies that that it is not presently debarred, suspended, proposed for debarment, and declared ineligible or voluntarily excluded from covered transactions by any Federal, State or local department or agency.

30. **NON-DISCRIMINATION AND EQUAL EMPLOYMENT OPPORTUNITY**: During the term of this Contract, Contractor will not discriminate against any employee or applicant for employment in accordance with RCW Chapter 49.60, including, but not limited to creed, religion, race, color, age, sex, marital status, sexual orientation, sexual identity, pregnancy, military status, political ideology, ancestry, national origin, or the presence of any sensory, mental or physical disability, unless based upon a bona fide occupational qualification. The Contractor will take affirmative action to ensure that applicants and employees are treated fairly, without regard to their creed, religion, race, color, sex, national origin, or the presence of any sensory, mental or physical disability. Such action shall include all terms and conditions of employment, compensation and benefits, including apprenticeship.

31. **BINDING EFFECT:** The provisions, covenants and conditions in this Contract bind the parties, their legal heirs, representatives, successors and assigns.

32. **RATIFICATION:** Acts taken pursuant to this Contract but prior to its effective date are hereby ratified and confirmed.

33. **CONTRACT DOCUMENTS AND ORDER OF PRECEDENCE:** The complete Contract includes these parts, all of which are incorporated herein by reference, and any inconsistency in the parts of the contract shall be resolved by following this order of precedence (e.g., 1 presiding over 2, 2 over 3, 3 over 4, and so forth):

    1. Amendments to the Contract,
    2. This Contract,
    3. Contractor's Bid including all Addenda to the Solicitation,
    4. Special Provisions,
    5. Contract Plan Set,
    6. City of Vancouver Amendments to the specified WSDOT Standard Specifications,
    7. City of Vancouver Standard Plans,
    8. WSDOT Standard Specifications,

9. WSDOT Standard Plans.

On the Contract Plans, Working Drawings and Standard Plans, figured dimensions shall take precedence over scaled dimensions.

Whenever reference is made in these Specifications or the Special Provisions to codes, rules, specifications and standards, the reference shall be construed to mean the code, rule, specification or standard that is in effect on the Invitation to Bid advertisement date, unless otherwise stated or as required by law.

If any part of the Contract requires Work that does not include a description for how the Work is to be performed, the Work shall be performed in accordance with standard trade practice(s). For purposes of the Contract, a standard trade practice is one having such regularity of observance in the trade as to justify an expectation that it will be observed by the Contractor in doing the Work.

34. NOTICES: All notices which are given or required to be given pursuant to this Contract shall be hand delivered, mailed postage paid or sent by electronic mail as follows:

Staff Report: 107-26

To: Mayor and City Council
From: City Manager
Date: June 1, 2026

Subject

Service Agreement - NE 18th Street - NE 138th Street to NE 162nd Street for Design Services- C-102271

Key Points

- In 2006, the City completed an Environmental Assessment (EA) on NE 18th Street between NE 87th Avenue to NE 192nd Avenue and issued a Finding Of No Significant Impact (FONSI) on April 18, 2006.
- Since that time, the City has improved sections of NE 18th Street, mainly the between I-205 and NE 138th Avenue. The City has scheduled the section west of I-205 (between NE 97th Avenue and NE 107th Avenue) for construction in fall 2026.
- This professional agreement with HHPR, would provide final design engineering, traffic modeling and multi-model analysis, environmental process and permitting, public involvement process, and coordination with the Bonneville Power Administration (BPA) for the section of 18th Street between NE 138th Avenue and NE 162nd Avenue. This project would also include the continuation of the 18th Street multi-use pathway.
- The project is not currently funded for right-of-way or construction. However, a fully designed and permitted, shovel-ready project will be more attractive for grant opportunities.

Strategic Plan Alignment

Transportation and Mobility – a safe, future-ready and convenient transportation system

Economic Opportunity – a place where a wide variety of businesses of all sizes grow and thrive

Vibrant and Distinct Neighborhoods – a variety of accessible places and spaces

Present Situation

A Request for Qualifications (RFQ 12-25) for the NE 18th Street Improvement Project was issued on March 7, 2025. The scope of work identified the necessary traffic and design engineering, environmental process, public involvement process and other related professional services to be performed. In addition to its standard RFQ notification process, the City notified and requested qualification statements from firms on the MRSC consultant list including veteran-, minority-, and women-owned firms. On April 11, 2025, the City received four statements of qualifications for the NE 18th Street project (RFQ 18-25). The submitted materials were evaluated based on experience, project understanding and approach, public process, and interviews. Harper Houf Peterson Righellis Inc. of Vancouver, Washington was selected from the four proposals. The amount of the contract shall not exceed $2,817,466.52 and will be billed on a time and material basis in accordance with the attached scope and fee schedule. This is project TRANS-0444 in the City's Six Year Transportation Improvement Program.

Advantage(s)

1. Provides a construction-ready project, including design, permitting, specifications and construction cost estimates.
2. Creates an opportunity for the public to provide significant input into the project.
3. Consistent with the City's long-range planning and economic development goals.

Challenge(s)

Requires local funding which was approved as part of the spring Supplemental Budget.

Budget Impact

The project is funded through the Transportation Capital Fund.

Prior Council Review

1. Approval of the 2026-2031 Transportation Improvement Program on June 16, 2025, Resolution number M-4341, including NE 18th Street (NE 138th Avenue to 162nd Avenue) TRANS-0444 Project.
2. Approval of the 2025-2026 biennial budget on December 2, 2024, which contained the project, NE 18th Street. The spring supplemental budget, approved on April 6, 2026, also includes additional funding for this project.

Action Requested

On Monday, June 1, 2026, authorize the City Manager, or designee, to finalize and execute a professional services agreement with Harper Houf Peterson Righellis Inc. for a contract amount of $2,817,466.52.

CITY OF VANCOUVER
SERVICES AGREEMENT
No. C-102271
RFQ 12-25 NE 18TH STREET – NE 138TH AVE TO 162ND AVE

This Services Agreement ("Agreement"), effective on the date last signed below (the "Effective Date") is entered by the City of Vancouver, Washington, a municipal corporation organized under the laws of the State of Washington ("City") and Harper Houf Peterson Righellis, Inc a Foreign Profit Corporation organized under the laws of the State of Oregon ("Contractor"). The City and Contractor are collectively referred to as the "Parties" or individually as a "Party".

RECITALS

A. The City desires to engage the Contractor to perform Services as described in this Agreement; and
B. The City advertised and issued a request for qualifications, numbered 12-25 ("Solicitation") and after evaluation of the Contractor's responsive proposal, found the Contractor capable of performing the required Services.

AGREEMENT

In consideration of the terms and conditions in this Agreement, the Parties agree as follows:

1. **SCOPE OF SERVICES:** The Contractor agrees to provide the City with all services and materials provided in the Scope of Services, attached as Exhibit A, and in the City's Solicitation, if any, and the Contractor's responsive proposal to the City's Solicitation, if any (the "Services"). Contractor shall obtain City Project Manager's written approval prior to starting the Services.

2. **COMPENSATION: Payment** to the Contractor for the Services described in this Agreement shall not exceed $ 2,817,466.52 USD.

This payment shall be the maximum compensation for all Services including labor, materials, supplies, equipment, and incidentals necessary to complete the Services. And it shall not be exceeded without the City's prior written authorization in the form of a negotiated and executed amendment. Contractor agrees this compensation is adequate and sufficient for the timely provision of all Services under this Agreement.

City will limit compensation to the amount specified for each specific task and/or sub-task, unless amended in writing. Contractor shall complete the Services stated within the number of hours identified for each task, and/or sub-task, or for the lump sum amount associated with a task. If compensation is made on an hourly basis and the Services requires fewer hours than those estimated, the Contractor will be paid for the actual worked hours necessary to complete that task and/or sub-task. If Contractor underestimated the number of hours required to perform the Services, Contractor shall be paid up to the maximum number of hours stated for the task and/or sub-task. Compensation may be amended, at the City's sole discretion, for documentable circumstances not reasonably foreseeable to either party at the time the task and/or subtask is initiated, or for changes to the scope of services requested by City. All Deliverables (as defined in Section 6) must be acceptable to City in its sole discretion.

City will reimburse Contractor for the following travel expenses identified in its proposal upon submission of receipts to City: airfare, mileage at the approved IRS rate and lodging at the U.S. General Services Administration rates. For the avoidance of doubt, City will not reimburse Contractor wages incurred during travel time.

3. **PAYMENT FOR CONTRACTOR SERVICES**: The Contractor shall submit monthly invoices to City covering both professional fees and project expenses, if any, from the previous month. Invoices must be submitted to the Project Manager, Leslie Degenhart, by email to leslie.degenhart@cityofvancouver.us and accpay@cityofvancouver.us or by mail to City of Vancouver, Leslie Degenhart, PO Box 1995, Vancouver, WA 98668.

   City shall pay Contractor within 30 days of receipt of Contractor's invoice. The City will pay Contractor pursuant to Exhibit "B." The City may correct any invoice overpaid in error.

   The Parties agree that any amount paid in error by City does not alter the fee schedule. City's contract/purchase order (PO) number on the notice to proceed must be referenced on any invoice submitted for payment.

4. **TERM OF AGREEMENT**: The term of this Agreement begins on June 15, 2026 and continues until June 14, 2031. The term and any renewal term are collectively the "Term."

5. **CITY DATA; DATA SECURITY**

5.1 City Data. Contractor may obtain and process City Data in connection with the Services. "City Data" means the data City provides to Contractor in connection with the receipt of the Services and any data generated by Contractor in connection with providing the Services to City. City owns all City Data. City licenses City Data to Contractor solely for the purposes of providing the Services to City or improving the Services for City. Contractor shall not use City Data for any other purpose, including as artificial intelligence training data. Contractor acknowledges that compliance with Applicable Laws under Section 17 of the Agreement includes compliance with all applicable federal, state, and local data protection laws in its provision of the Services.

5.2 Data Security. If Contractor maintains City Data on Contractor systems it will comply with the following data security requirements.

5.2.1 Security Practices. Contractor shall develop, implement, and maintain appropriate administrative, physical, and technical safeguards that are designed to ensure the confidentiality, integrity and availability of City Data. Contractor will enact safeguards that are compliant with industry best practices for the specific City Data obtained by Contractor in connection with the Services.

5.2.2 Location of City Data. Contractor shall maintain City Data solely in data centers located in the United States.

5.2.3 Security Breaches. A "Security Breach" is any suspected or actual unauthorized access to or use of City Data in Contractor's possession.

a. Notice. Contractor will notify City within 24 hours of any Security Breach. Notice will include details regarding the Security Breach including impacted parties, specific data, and mitigation. Contractor will call 360.487.8888 (if after hours, follow prompt to connect to on-call personnel); email City with a read receipt to help.desk@cityofvancouver.us; and email to the City personnel contact for the Agreement.
b. Coordination. Immediately after Contractor provides notification of a Security Breach the Parties will begin working together to contain, mitigate, investigate, respond to and remediate the Security Breach. Contractor will

cooperate with all City requests in relation to the Security Breach in compliance with Applicable Law.

c. Root Cause Analysis. As soon as possible following the Security Breach, Contractor will complete a root cause analysis and will provide a plan to City for remediation and prevention.
d. Third-Party Notice. Contractor will work together with City to ensure compliance with RCW 19.255.010 if necessary and will make no statement or send notice to any third party regarding the Security Breach without City's prior written consent.
e. Costs. In addition to its indemnification obligations, Contractor will reimburse City for all costs City incurs associated with any Security Breach, including forensic investigation, costs of providing notice to impacted parties, call centers and credit monitoring as applicable. Contractor will pay or reimburse City for all regulatory fines and other legal costs the City incurs associated with the Security Breach.

6. **DELIVERABLES - INTELLECTUAL PROPERTY** Contractor may create documents or other work product in connection with providing the Services ("Deliverables"). Contractor assigns and will assign to City all right, title, and interest in and to any Deliverables it creates in connection with providing the Services. Contractor may retain a copy of any Deliverable for its internal business purposes. Contractor's know-how, methodologies and processes are Contractor intellectual property. Contractor grants City a perpetual, irrevocable, royalty-free, worldwide license to use all Contractor intellectual property in connection with the Deliverables for any City purpose.

7. **AUDIT RIGHTS:** Contractor shall maintain records of all matters related to this Agreement in accordance with generally accepted accounting principles. Contractor shall provide the records to City or any other governmental agency with jurisdiction for audit, at such reasonable times and places as City designates.

8. **PUBLIC DISCLOSURE COMPLIANCE:** Records relating to Agreement are subject to the following:

8.1 Confidential Information. Any record of City business, including this Agreement, related records, and City Data, is a public record under the Washington Public Records Act, codified at chapter 42.56 RCW ("PRA"). City may be required to disclose this Agreement or related records, including records in Contractor's possession, pursuant to a public disclosure request. City will provide third-party notice to Contractor before disclosing records. Public records may be subject to exemptions from disclosure under the PRA. City agrees to withhold its release of the requested

records in dispute for a reasonable amount of time (approximately 10 days) to allow Contractor an opportunity to seek judicial protection pursuant to RCW 42.56.540 as adopted or amended.

8.2 Public Disclosure Compliance. City will comply with the PRA in its receipt of and response to any public disclosure request for responsive records related to this Agreement, subject to applicable exemptions. Under RCW 42.56.060, City will have no liability to Contractor for disclosure of Contractor information acting in good faith pursuant to its obligations under the PRA.

8.3 Subpoenas. If either Party receives a subpoena requiring the disclosure of the other Party's information, that Party will notify the other party and provide a reasonable time for the affected party to obtain a protective order prior to disclosing information. If a Party is prohibited by a court with jurisdiction over the matter from disclosing the subpoena, that Party will provide only the specific information required to be released under the subpoena on the advice of counsel.

8.4 City Data Confidentiality. Notwithstanding Section 8.1-3, Contractor will maintain the confidentiality of all City Data in its possession in conformance with Section 8.

9. STANDARD OF CARE: Contractor shall exercise the degree of skill and diligence normally employed by consultants in the same industry, performing the same or similar services. Contractor will re-perform any Services that breach this provision at no cost to City.

10. DISPUTE RESOLUTION: City and Contractor agree to negotiate in good faith for a period of 30 days from the date of notice of all disputes between them prior to exercising their rights under this Agreement or under law. All disputes between City and Contractor not resolved by negotiation between the Parties may be mediated only by mutual agreement of both Parties. If not mutually agreed to resolve the claim by mediation, the claim will be resolved by legal action. The Parties agree that if litigation is necessary to enforce any of the provisions of this Agreement, each party shall pay all of their own attorney fees and costs related to the litigation.

11. TERMINATION FOR CONVENIENCE: City may terminate this Agreement at any time for convenience. City will pay Contractor for all Services completed up to the date of termination for convenience. A decision by City to terminate for convenience does not waive any legal rights City has to enforce the Agreement.

12. TERMINATION FOR MATERIAL BREACH: If Contractor materially breaches by failing to perform any of the obligations of the Agreement, including violating any law,

regulation, rule, or ordinance applicable to this Agreement, or becomes insolvent or declares bankruptcy, or makes an assignment for the benefit of creditors, Contractor shall not be entitled to receive any further payments under the Agreement until the Services are completed to City's satisfaction. City may provide Contractor a cure period in its sole discretion or may terminate the Agreement and, at City's option, obtain performance of the Services elsewhere.

13. **INDEMNIFICATION:** Contractor shall indemnify, defend, and hold harmless City and its officers, councilmembers, commissioners, employees, volunteers, and agents, from any claim, liability, loss, cost, expense, suit, and damages, including attorney's fees and consulting fees relating to (a) a third party claim for intellectual property infringement relating to the Contractor's Services or the Deliverables; (b) Contractor's negligence or willful misconduct; (c) Contractor's material breach of the Agreement; (d) Contractor's non-compliance with applicable law; (e) a third-party Washington Public Records Act claim involving Contractor information; and (f) Contractor's court action to enjoin release of Contractor information under the Washington Public Records Act.

    City will promptly notify Contractor of a claim under this Section 13 and will provide reasonable cooperation to Contractor in the defense of the claim. Contractor will have control over defense and settlement of the claim, except that Contractor will not enter any settlement or related agreement without City's prior written consent. Notwithstanding the preceding sentence, City may participate in the defense or settlement of any claim with counsel of its own choosing.

    Solely for negligence indemnification claims under (b) above, if Contractor is providing architectural, landscape architectural, engineering, or land surveying services as the Services under this Agreement, and Contractor and City are concurrently negligent, then Contractor will be required to indemnify City only to the extent of Contractor's negligence and will have no obligation to indemnify City for City's sole negligence, pursuant to RCW 4.24.115.

    If Contractor or Contractor's employee is a licensed architect, professional engineer, land surveyor, or landscape architect and the Services are related to a construction project, Contractor expressly waives its industrial insurance immunity under the Washington Industrial Insurance Act Title 51 RCW. Contractor acknowledges this waiver has been mutually negotiated and the Parties desire to incorporate this waiver pursuant to RCW 4.24.115(1)(b).

14. INSURANCE: Contractor shall maintain liability insurance for all claims for damages to the City, persons or property that arise from Contractor's performance during the Term of this Agreement.

Contractor shall maintain the following insurance coverage.

COVERAGE	LIMITS OF LIABILITY
I. Commercial General Liability:	
Policy shall include Bodily Injury, Property Damage, Personal Injury and Broad Form Contractual Liability	
Each Occurrence	$1,000,000
General Aggregate Per Occurrence	$2,000,000
Products & Completed Operations Aggregate	$2,000,000
Personal and Advertising Injury	$1,000,000
Blanket Contractual Liability	$1,000,000
II. Commercial Automobile Liability	
Policy shall include Bodily Injury and Property Damage for any owned, hired, and/or non-owned vehicles arising from the performance of this Agreement.	
Combined Single Limit	$1,000,000
III. Workers' Compensation (applicable to the State of Washington)	
Per Occurrence	
Employer's Liability	$1,000,000
Disease Each Employee	$1,000,000
Disease Policy Limit	$1,000,000
Each Claim	$1,000,000
Annual Aggregate	$1,000,000
V. Professional Liability	
Policy shall include coverage for all claims for damages to person or property arising from the performance of this Agreement.	$2,000,000

In addition to the coverage and limits listed above the Contractor's insurance must all contain the following:

a. Compliance with other Insurance Policies - Contractor will remain compliant with all other insurance obligations it may have pursuant to its personnel or applicable law.

b. Coverage Trigger - Contractor's insurance must be on an "occurrence" basis rather than claims made. This type of coverage must be indicated on the Certificate of Insurance.

c. Additional Insured Requirement - The City of Vancouver, its Agents, Representatives, Officers, Directors, Elected and Appointed Officials, and Employees must be named as additional insureds where permissible under applicable law. The required Additional Insured endorsements shall be at least as broad as ISO CG 20 10 11 85, or its equivalent CG 20 10 07 04 and CG 20 37 07 04 must be included with the Certificate of Insurance.

d. Certificates - The City of Vancouver shall be listed on the Certificate of Insurance as the Certificate Holder. Contractor will provide the Certificate of Insurance to City upon request on an ACORD or comparable form.

All policies shall be issued by an insurance company authorized to do business as an insurance company in the State of Washington.

15. **RELATIONSHIP OF THE PARTIES**. The relationship of the Parties under this Agreement is that of independent contractors. Contractor is solely responsible for the manner, method, and means of providing the Services. Contractor and its employees are not City employees and will not be entitled to or receive any benefits under this Agreement. Contractor will pay all Contractor personnel and pay all taxes, contributions, and benefits that may be required related to its personnel. Neither Party may bind the other except as expressly stated in this Agreement.

16. **SUBCONTRACTING***:* Contractor may subcontract for Services with City's prior written approval in its sole discretion. Contractor is solely responsible for its subcontractors' compliance with this Agreement and will pass through the terms of this Agreement to all subcontractors.

17. **COMPLIANCE WITH APPLICABLE LAW:** Contractor shall comply with all applicable federal, state, and local laws, rules, and regulations ("Applicable Laws"). Contractor shall modify the Services as necessary to comply with Applicable Laws.

18. **E-VERIFY:** Contractor shall enter into and register a Memorandum of Understanding with the Department of Homeland Security E-Verify program within 60 days of executing this Agreement. Contractor shall ensure all Contractor employees and any subcontractors assigned to perform Services under this Agreement are eligible to work in the United States. Contractor shall provide compliance verification upon City's request.

19. **TITLE VI COMPLIANCE**: Depending on the Services Contractor provides, the City may use federal funds to compensate Contractor. If federal funds are used. the City, Contractor, and any approved subcontractor must comply with the provisions of Title VI of the Civil Rights Act of 1964, (78 Stat. 252, 42 U.S.C. 2000d to 2000d-4) (CRA) and the Civil Rights Restoration Act of 1987, Pub. L. No. 100-259, 102 Stat. 28 (1988) (CRRA). Contractor must confirm with City whether Title VI is applicable under this Agreement.

20. **EQUAL EMPLOYMENT OPPORTUNITY**: The City is an equal opportunity employer. Contractor shall not discriminate against any of its employees or applicants for employment on the basis of race, color, creed, religion, sex (including gender identity, sexual orientation, and pregnancy), national origin, citizenship or immigration status, age (40 or older), the presence of any sensory, mental, or physical disability or the use of a trained dog guide or service animal by a person with a disability, genetic information, honorably discharged veteran or military status, or any other class protected by federal, state, or local employment discrimination laws.

21. **ANTI-KICKBACK**. City officers and employees shall not have or acquire an interest in the Agreement or solicit, accept, or give any item of value from a person or entity with an interest in this Agreement.

22. **PERMITS, LICENSES, AND CERTIFICATIONS**. Contractor is solely responsible for any license, permit or certificate that may be required by any federal, state or local law in connection with the performance of Contractor's obligations under this Agreement, including any business license. Contractor may contact the State of Washington Business License Service (BLS) at: 800-451-7985, www.bls.dor.wa.gov/cities/vancouver.aspx or visit the City's website found at www.cityofvancouver.us/businesslicense for assistance with the determination.

23. **COOPERATIVE PURCHASING:** The Washington State Interlocal Cooperation Act, chapter 39.34 RCW, authorizes public agencies to cooperatively purchase goods and services if all parties agree. By executing this Agreement, Contractor agrees that other public agencies may purchase goods and services under this Agreement at their own cost. City will have no liability or obligation related to Contractor related to that separate agency agreement. Therefore, City agrees to allow other public agencies to purchase services under this Agreement so long as City is not held financially or legally liable for any separate agency services received pursuant to

the Agreement, and that any public agency purchasing under this Agreement file a copy of it in accordance with RCW 39.34.040.

24. **DEBARMENT**: Contractor certifies that it is not presently debarred, suspended, proposed for debarment, and declared ineligible or voluntarily excluded from covered transactions by any federal, state or local department or agency.

25. **NOTICES:** All notices will be hand delivered, certified mail, or sent by electronic mail if agreed by the Parties. Notice will be effective when received if hand delivered, on the delivery date if certified mail, or when an email is sent. Notice must be addressed to the Parties at:

For the City:	For the Contractor:
Anna Vogel	Bruce Haunreiter, PE
City of Vancouver	Harper Houf Peterson Righellis, Inc.
415 W 6th Street	1220 Main Street, Suite 150
P O Box 1995	Vancouver WA 98660
Vancouver WA 98668-1995	Email: bruce@hhpr.com
Email: anna.vogel@cityofvancouver.us	

Either Party may update its address for notice by giving written notice to the other Party.

26. **ASSIGNMENT.** Contractor shall not assign this Agreement without the express written consent of City. Any assignment in violation of this subsection is void. All terms of this Agreement are binding on any assignee.

27. **ORDER OF PRECEDENCE:** If there is a conflict between the terms of any document, the order of precedence is as follows: Amendments to this Agreement; this Agreement; Contractor's responsive proposal to City's solicitation; and City's solicitation. The Parties agree that terms included on any Purchase Order or other document provided by Contractor are not part of this Agreement.

28. **SURVIVAL**. Sections 15 - 35 will survive any termination of this Agreement.

29. **WAIVER**. A Party's waiver of any term of this Agreement must be in writing and signed by the Party waiving compliance.

30. **THIRD PARTY BENEFICIARIES**. There are no third-party beneficiaries under this Agreement.

31. **GOVERNING LAW**: This Agreement is governed by the laws of the State of Washington without regard to its conflicts of laws provisions. Venue for any action arising under this Agreement will be the state or federal courts for Clark County, Washington. The Parties waive any claim of inconvenient forum.

32. **SEVERABILITY**. If a court with jurisdiction over the matter determines any clause of this Agreement is unenforceable, it shall revise the clause to reflect the intent of the Parties as closely as possible. If revision is not possible, the Court shall strike the clause and the remainder of the Agreement will remain in full force and effect.

33. **AMENDMENTS:** Any amendments to this Agreement must be in writing and signed by all Parties to this Agreement.

34. **ENTIRE AGREEMENT**: This Agreement, together with any amendments, is the entire agreement between the Parties, and supersedes any other agreement or discussion between them, whether written or oral in nature.

35. **COUNTERPARTS**. This Agreement may be signed in counterparts. Each counterpart will be deemed an original and together the separate parts will form one Agreement.

City and Contractor enter the Agreement as of the Effective Date.

EXHIBIT "A":
Scope of Work

The Contractor will perform design and traffic engineering, environmental processes, public involvement processes and other related professional services for the NE 18th Street Corridor Improvements – NE 138th Avenue to NE 162nd Avenue project.

Professional services will include evaluation of alignment options, traffic engineering including evaluation of roundabouts and traffic signal options, lighting design, landscape design, multimodal section, structural design, environmental process and permits, construction plans and specifications, surface water report, water/sanitary sewer/surface water designs and utility coordination. Additionally, project coordination and required federal documentation will be performed.

The project team includes:

- Harper Houf Peterson Righellis (HHPR) – Project management, survey, civil engineering, hydraulics and stormwater management, utility coordination, landscape design, structural design, environmental process and permits.
- Global Transportation Engineering (GTEng)– Traffic analysis and design, street lighting, signage and striping
- Columbia West (CWE) – Geotechnical exploration and hazardous materials assessment
- Archaeological Services (ASCC) – Cultural resources analysis
- Michael Minor & Associates (MMA) – Noise and air quality analysis
- Point North (PN) - Public outreach
- Morgan Holen & Associates (MHA) – Tree Evaluation

The NE 18th Street project is expected to have federal funding in the right of way and construction phases and is intended to improve safety and multimodal travel in the project area.

Federal permitting will be based on an Environmental Assessment (EA) from 2006, which may require an update to the National Environmental Policy Act (NEPA) Categorical Exclusion documentation. A City Critical Areas Ordinance and a State Environmental Policy Act (SEPA) checklist shall be prepared for the Project. Also the Consultant shall prepare the National Pollutant Discharge Elimination System (NPDES) application and Storm Water Pollution Prevention (SWPP) Plan for the Project.

PROJECT DESCRIPTION/BACKGROUND

Currently, the corridor is a two-lane paved road with minimal shoulders and turn pockets at intersections. The existing roadway has no center turn lanes, medians, bike lanes or continuous sidewalks. There are intermittent portions of the roadway with curb, gutter and sidewalk, but the improvements may not be in the proper location.
Other elements of this Project include evaluation of traffic signals vs. roundabouts for intersection control, multimodal lane configuration and alignment determination, right-of-way requirements, storm drainage, environmental evaluation, pedestrian facilities, utility and agency coordination, and public involvement.

An agency coordination process will be performed as part of the Consultant contract. The Project will include coordination with various stakeholders including Bonneville Power Administration, Evergreen Public School District, WSDOT, local neighborhood associations, commercial and residential properties and other agencies. This coordination will be essential to the success of this Project.

LANE CONFIGURATIONS

This project will widen NE 18th Street to urban arterial standards. Per the results of the traffic analysis, the ultimate lane configurations through the corridor may be a 3-lane or 5-lane section utilizing signalized intersections or roundabouts at key locations. Multimodal facilities meeting the City of Vancouvers Complete Street Standards may be located outside of the carriageway and designed as part of the larger Burnt Bridge Creek Trail system. A traffic study and a strong public engagement process will be utilized before deciding on the final cross section configuration through the corridor. Proposed roadway improvements must be weighed against environmental impacts, available funds, and impacts to adjacent property owners to optimize community value. The consultant will review the proposed cross sections in the 20-year Transportation Improvement Plan and compare these classifications to existing transportation modeling. The consultant shall prepare a supporting Access Management Plan.

INTERSECTION CONFIGURATION

The following intersections will be evaluated for improvements and preferred configuration to meet travel demands.

NE 18th St/NE 138th Avenue – Improvements to this existing signalized intersection are expected to be minimum.

NE 18th St/NE 141st Avenue – The existing signal will be upgraded to accommodate traffic needs as part of this project. A roundabout may also be considered.

NE 18th St/NE 148th Avenue – Travel demand will be reviewed at this intersection to determine if a signal or roundabout option are warranted.

NE 18th St/NE 155th Avenue – The existing signal will be upgraded to accommodate traffic needs as part of this project. A roundabout may also be considered.

NE 18th St/NE 162nd Avenue – Improvements to this existing signalized intersection are expected to be minimum.

Existing stop-controlled intersections will be reviewed to determine recommended intersection type for access to NE 18th St.

HORIZONTAL AND VERTICAL ALIGNMENT

The horizontal and vertical curves along the corridor will be designed to meet the current City of Vancouver's Street Standards. This section of the roadway has level to moderately rolling terrain and a straight alignment. Both horizontal and vertical alignments will primarily follow the existing terrain.

UTILITY IMPROVEMENTS

It is anticipated that storm sewer, water, sanitary sewer (City of Vancouver utilities), power, phone, gas and cable (private utilities) will all be protected, installed or improved as part of this Project. There are large power towers near that parallel NE 18th Street on the south side of the roadway. The Consultant shall coordinate the project design with the City utilities and the franchise utilities.

SURFACE WATER - LOW IMPACT DEVELOPMENT (LID)

The project will include improvements for the treatment of surface water quality and quantity. Based upon the requirements of the Washington State Department of Ecology Stormwater Management Manual for Western Washington, the entire impervious area of the roadway corridor must be treated for water quality for stormwater runoff. Infiltration potential will need to be investigated. Currently, the location of treatment facilities and the treatment methods (such as mechanical treatment or low impact development) have not yet been determined. The Consultant shall perform infiltration investigation and testing and shall coordinate and obtain approval with the City's Surface Water division. It is possible that the planter strips along NE 18th Street could be locations for Low Impact Development (LID) surface water treatment facilities.

WATER

The City of Vancouver has an older 12-inch water main that runs the length of the project along NE 18th Street, from NE 138th Avenue to NE 162nd Avenue. This main connects to smaller mains that serve individual neighborhoods, except for NE 155th Avenue. A new 24-inch water transmission line is anticipated to be part of the final design.

City of Vancouver in-house utility staff will provide direction for the consultant to design the utility size, type, and typical locations. The Consultant will include this information in the final design plans.

SANITARY SEWER

The City of Vancouver has an 8-inch sewer main that extends from NE 146th Avenue east to a manhole on the south side of NE 18th Street, just east of NE 148th Ave. This manhole is a key junction, with an 18-inch pipe coming in from the southeast and an 8-inch pipe from the east, before the flow is routed north across NE 18th Street. At the intersection of NE 155th Avenue and NE 18th Street, an additional manhole with 8-inch pipes services the homes on the north side of the street, with its outlet also heading north. It is anticipated that the sewer will require some minor adjustments but otherwise is to be protected.

City of Vancouver in-house utility staff will provide directions for the consultant to design the sewer size, type, and typical locations. The Consultant will include this information in the final design plans.

RIGHT-OF-WAY

The design challenges/issues mentioned above will likely have significant impact on the right-of-way needs along the corridor. The right-of-way costs and impacts will need to be part of the equation when considering the lane configuration and intersection design. It is anticipated that right-of-way plans, legal descriptions and right-of-way exhibits will be completed by the Consultant; and acquisition will be completed by the City of Vancouver. It is possible that, pending final design, one side of the proposed NE 18th Street would have more right-of-way allocated for the proposed multi-use trail.

TASK 1: PROJECT MANAGEMENT AND ADMINISTRATION (HHPR)

Subtask 1.1 Contract Administration, Invoicing, Scheduling and Progress Reporting

- The Consultant shall provide management, coordination, and direction to the Project team to complete the project on time and within budget. The City fosters

a partnership approach with all stakeholders in the Project. The Consultant shall integrate this strategy into the overall management approach. Project duration is estimated at 24 months.

- The Consultant shall prepare and submit monthly invoices. Each invoice will include: date period covered by invoice, number of hours worked during the billing period with billing rates shown; expenses and associated mark-ups; total cost for labor and expenses for the billing period; subconsultants fees including markups for the billing period; and a total amount summarizing labor, expenses, and subconsultant fees. The only markup for subconsultants will be for the B&O Tax no additional markup will be included in the billing by HHPR.
- The Consultant shall prepare a Contract Summary Report to accompany the monthly invoices. The Contract Summary Report will list each invoice as well as current invoice with an itemized summary of invoice numbers, dates, and amounts billed for labor, expenses, and subconsultants as well as total amounts for each invoice. The Contract Summary Report will also list the total amount billed to date, total amount remaining under contract, and contract expiration date
- The Consultant shall prepare a brief Project Status Report to accompany the monthly invoices. The Project Status Report will include: date period covered by Status Report, brief summary of work performed during the billing period, a notice to CITY raising any issues or concerns that could require a contract amendment/supplement, a brief summary of completed and/or upcoming project milestones, and action items needed from CITY for project delivery. CONSULTANT shall monitor the status of the budget and take corrective actions to correct undesirable budget trends involving the CITY if scope is impacted.
- The Consultant shall establish a quality management program and designate responsibility for review of technical work and other deliverable products.
- The Consultant shall maintain all contract-required documentation. Provide copies of project files and records to the CITY for audits and public information requests. All final documents shall be provided in electronic format as requested.

Project Scheduling

- The Consultant shall prepare and submit an activities list and schedule to the City immediately following the Notice to Proceed. The schedule shall show appropriate milestones for the Project, including intermediate and final submittal dates for design documents and key decision points.

- The Consultant shall prepare and maintain the project design schedule. The schedule shall identify CONSULTANT tasks and items provided by CITY and other consultants. The schedule shall be updated every month or as circumstances require or as requested by the CITY.
- At the 75% design stage, the City will assess the remaining project budget and funding status to determine a timeline for proceeding with the 90% design, 100% design/construction documents, and the construction phase of the project. Currently the project is not funded for right of way acquisition or construction.

Subtask 1.2 Meetings

This item includes the coordination and meetings necessary to successfully complete the project.

1) Attend project kickoff meeting with City Staff
2) Bi-weekly internal HHPR design team coordination and meetings
3) Preparation and submittal of a pre-design memorandum
4) Monthly project coordination meeting with City staff (assumed 24 months total)
5) Meet with City staff after the review of the 30%, 50%, 90%, and Final plan submittals
6) Public involvement meetings (assumed up to 24 monthly coordination meetings and 24 Public engagement meetings)
7) Meetings shall be held virtually by default

The Consultant shall schedule Project team meetings and prepare meeting agendas. This includes a Project kick-off meeting, monthly progress meetings, provide information and attend public meetings and open houses, review meetings and coordination meetings. The Consultant is expected to attend public meetings and open houses to explain and discuss the Consultant tasks on the Project, the Consultant shall prepare maps and exhibits associated with their tasks on the Project.

Project Coordination

- The Consultant shall organize and hold Project meetings with key Project team members, as well as representatives from the City of Vancouver and other agencies as needed. These meetings shall have specific agendas addressing and resolving Project issues as they are encountered.
- The Consultant shall coordinate Consultant tasks and activities with the City. This shall include using monthly meetings to plan and coordinate upcoming activities.
- The Consultant shall coordinate with private and public utilities, including power, phone, cable, gas and other utilities.

- The Consultant shall coordinate with Clark County Public Transit Benefit Area Authority (C-TRAN), Washington State Department of Transportation (WSDOT), the Evergreen Public School District (ESD), and the Bonneville Power Administration (BPA).
- The Consultant shall coordinate with property owners adjacent to the Project who will be affected by the roadway design. Prior approval from the City's Project Manager will be required before any contact with neighborhood associations or private property owners occurs.
- Prior to the 90% design stage, the City will assess the remaining project budget and funding status to determine a timeline for proceeding with the 90% design, 100% design/construction documents, and the construction phase of the project. Currently the project is not funded for right of way acquisition or construction. This scope and fee includes final design/construction documents.

Task 1 Deliverables

- Monthly invoices, Contract Summary Reports and Project Status Reports
- Meeting Agendas and Meeting Summaries
- Project Design Schedule & Schedule Updates

TASK 2: TRAFFIC ENGINEERING - TRAFFIC ANALYSIS (GTEng)

Subtask 2.1 Traffic Engineering Project Management

Subtask 2.1.1 Project Coordination and Meetings

This task is associated with Consultant's project management of the traffic analysis, functional design, and design phases associated with this project.

- Prepare up to 24 monthly progress reports associated with Traffic Analysis and Design Phases. To be provided with monthly invoicing of project.
- Support consultant team in preparing meeting agendas and minutes related to traffic elements of the project.
- Project kickoff meeting with City staff.
- Prepare for and participate in up to 24 project team meetings with City staff.
- Internal consultant team meetings:
    - Prepare for and participate in up to 24 consultant team meetings.

Subtask 2.1.2 Public Involvement

This task is associated with traffic engineering and planning support for the public involvement process.

- Sounding Board Group Meetings (Tier 1 Stakeholder Engagement).
  - Preparation for and attendance of a senior transportation engineer and transportation analyst at the design charrette.
  - Preparation for and attendance of a senior transportation engineer at second and third sounding board group meetings.
  - Provide meeting summary notes regarding traffic related items.
- Communications and Media Relations (Tier 1-3 Stakeholder Engagement).
  - Provide traffic-related information for mailers.
  - Provide traffic-related information for press releases.
- Project Website (Tier 1-3 Stakeholder Engagement).
  - Support development of graphics for website (Up to 8 hours of GTE staff support assumed).
  - Provide roundabout related narrative.
- Three Open Houses (Tier 1-3 Engagement).
  - Prepare for and attend three public open house meetings.

Subtask 2.2 Traffic Analysis Report

The City will provide traffic counts and traffic forecasting.

Subtask 2.2.1 Existing Transportation Facilities and Traffic Conditions

Existing transportation facilities shall be inventoried, including the following:

- Roadway facilities, consisting of the number of travel lanes lane and shoulder widths, presence of curbs and sidewalks along NE 18th Street and its intersecting roadways.
- Public and private access along NE 18th Street between NE 138th Avenue to NE 162nd Avenue.
- Location and width shall be identified and spacing between access points calculated. (See “Access Management” section below.)
- Pedestrian facilities, including the location and width of existing sidewalks, crosswalks and pathways. Any interaction/connection with the City’s current or proposed trail system shall be reviewed.
- Transit routes that run along or intersect NE 18th Street. The location of routes and transit stops shall be identified.
- Weekday AM and PM peak hour and midday weekend turning movement counts shall be collected at key locations. These will include NE 18th Street at the following locations:

a. NE 138th Avenue
b. NE 141st Avenue
c. NE 148th Avenue
d. NE 155th Avenue
e. NE 162nd Avenue

- Two Twenty-four-hour vehicle classification counts shall be collected on NE 18th Street between NE 138th Ave to NE 162nd Ave.
- Prepare existing conditions operational analysis of the key intersections and driveways, including documentation of performance measures including level of service, delay, queues, etc.
- Summarize the existing conditions analysis in Technical Memorandum #1 that will be incorporated into Traffic Analysis Report (see Subtask 2.2.4).

Subtask 2.2.2 Future Traffic Conditions

- Review base year and future year 2045 traffic forecasts and turning movements at key intersections using the model operated by the Southwest Washington Regional Transportation Council (RTC).
    - City of Vancouver will coordinate required model runs with RTC.
- Prepare an assessment of future demand and operations for approved in-process development that may affect the NE 18th Street project.
- Coordination with Evergreen High School about any future construction of facilities.
- Develop future weekday PM peak hour traffic volume projections at the study intersections.
- Travel Demand Validation: Future travel demand shall be estimated at key intersections along NE 18th Street. Future intersection operations shall be evaluated to determine how they will operate with the projected traffic demand. Potential mitigations shall be identified to accommodate future traffic demand. The following intersections along NE 18th Street:
    a. NE 138th Avenue
    b. NE 141st Avenue
    c. NE 148th Avenue
    d. NE 155th Avenue
    e. NE 162nd Avenue
    - Preliminary traffic signal warrants shall be evaluated at the unsignalized study intersections to determine whether new traffic signals will be needed in the future and when those signals will be needed (sensitivity analysis). If warranted, the operation of the study intersections assuming signalization shall also be evaluated.

    - Analyze roundabout operations at intersections under 2045 traffic conditions during the weekday AM and PM peak hours. The capacity, delay, and queue lengths will be evaluated for each roundabout approach to confirm the appropriate roundabout size and number of lanes needed to service the forecast traffic volumes.
    - A combination of signalized intersections and roundabouts may be used together throughout the corridor.
- Perform all required traffic analysis and demand forecasting.
- Intersection layout requirements shall be identified at the study intersections, including lane configuration and queue distances.
    - Evaluate left-turn lane warrants and right-turn lane warrants at the unsignalized study intersections, as appropriate.
    - Conduct a queuing analysis of projected 2045 weekday AM and PM peak hour conditions to determine storage length needs at the project study intersections, as appropriate.
- Summarize the future traffic conditions in the Future Traffic Conditions Technical Memorandum #2 that will be incorporated into the Traffic Analysis Report (see Subtask 2.2.4)
    - This memorandum will document the preferred intersection traffic control for the key intersections (signals versus roundabouts).

Subtask 2.2.3 Access Management Plan (HHPR & GTE)

- The Consultant will assist the City with the development of an Access Management Plan (AMP) for the Project corridor. This will include a description of the relationship of access management to the daily operational safety of vehicular travel, as well as multi-modal features of the proposed roadway. The effect of driveway design on traffic operations and safety will also be analyzed and reported.
- The Consultant will work with City staff and other stakeholders to provide advice and to respond to concerns on the proposed AMP.
- The AMP will be developed taking into consideration current conditions, land uses, agreements, signals vs. roundabouts options as well as other projected and anticipated transportation plans.
- The Consultant will Coordinate their effort with the City's Traffic Engineering Division's on-going Access Management research and development program. This research, which involves a survey of other jurisdiction's ordinances, Access Management Plans and standards, will provide technical background for the Consultant's recommendations to the City for the Project corridor.

The Consultant will review the City's existing design and development codes, identifying any shortcoming(s) in these codes which would limit the implementation of the AMP.

This work will include the following:

- A review and evaluation of the City's Comprehensive Plan and Development Ordinance
- A review and evaluation of the applicable sections of the City of Vancouver Municipal Code
- Coordination with City's Public Works Department Traffic division to determine applicability of the AMP to the Project corridor
- A report of necessary changes to existing codes to be submitted to the City for their evaluation and recommendation
- Identification of all existing and approved access points and the uses that they serve.
- Property owner outreach and engagement to understand individual needs, plans, and aspirations.
- Identification of operational and safety implications of the existing access points and their potential relationship to the proposed roadway improvement project.
- Evaluation of existing land uses, potential redevelopment opportunities, and the impacts and opportunities of potential future land uses.
- Identification of access consolidation and closure opportunities, including potential near-term and long-term opportunities.
- Identification of traffic volume and speed implications along the NE 18th Street corridor and local residential streets surrounding as they relate to AMP alternatives. Preparation of a draft and final Access Management Plan (AMP), including identification of potential City code or policy improvement needs, which will be incorporated in the Traffic Analysis Report (see Subtask 2.2.4).

City staff will provide the following information:

- Comprehensive Plan
- Land Use and Development Ordinance
- Adopted or draft area plans
- Other relevant planning information

Subtask 2.2.4 Traffic Analysis Report

- Preparation of a draft and final Traffic Analysis Report that summarizes the project elements above and integrates with the Access Management Plan.
- Submit the draft report to the City for review and comment.
- Respond to City comments and submit a final Traffic Analysis Report.
- Coordination with noise team of the report findings and provide traffic volume information and preliminary channelization requirements for their analysis.

Task 2 Deliverables

- Roundabout related materials and graphics as described above in support of the Public Involvement effort.
- Existing Traffic Conditions Technical Memorandum #1
- Future Traffic Conditions Technical Memorandum #2
- Draft and Final Access Management Plan
- Travel demand validation
- Ultimate lane configuration recommendation along the corridor
- Roundabouts vs. Signals documentation
- Draft and Final Traffic Analysis Report

TASK 3: DESIGN ENGINEERING - PLANS, SPECIFICATIONS & ESTIMATE (PS&E); EVALUATION OF ALIGNMENT OPTIONS INCLUDING OPTIONS FOR TRAFFIC SIGNALS VS. ROUNDABOUTS

Subtask 3.1 Design

The Consultant will advance the design at the conclusion of the preferred intersection control and configuration to preliminary (30%), 50%, and 90%, and Final construction contract documents as part of this task. The HHPR Team, including GTEng and Columbia West, will be responsible for design engineering services and for delivering the submittals as outlined below.

The design shall conform to the City of Vancouver drafting Standards and Specifications, including incorporating City-provided survey data and drafting standards.

The City will provide the Consultant with all required field survey work, including topographic and existing right of way mapping. The City will provide electronic files of the existing survey data, digital terrain model and topography in AutoCAD format.

Subtask 3.1.1 Preliminary (30%) Design

The Consultant will develop preliminary construction documents to the 30% design stage. These documents will assist in the permit process and will consist of plan sheets, a preliminary opinion of probable construction cost, and a conceptual stormwater and utility design. At this design level, the overall project layout, footprint, and geometrics are established, and key design decisions are made.

- Based on the results of the Traffic Analysis, the Consultant will prepare sketch-level design concepts for 5 study intersections: NE 138th Avenue
    - NE 141st Avenue
    - NE 148th Avenue
    - NE 155th Avenue
    - NE 162nd Avenue

    a. Using the topographic survey base map, prepare scaled, sketch-level design roundabout/signalized geometric design concepts for up to 23 alternatives per intersection. Sketch concepts will depict critical intersection features and will consider:
        - Size and location relative to right-of-way and geometric constraints
        - Alignment of approaches and number of lanes
        - Design speed and speed consistency
        - Design vehicle turning movements
        - Pedestrian, bicycle, and transit accommodations
        - Local access impacts
        - Basic channelization

    b. Review and discuss sketch concepts with the project design team. Prepare alternative analysis memorandum, specifying recommended section and intersection options with decision matrix. Work collaboratively with the City and project design team to identify preferred intersection concept for further refinement.

- Initial CAD Intersection and Corridor Design.

    a. Prepare 15%-level preliminary intersection designs at the study intersection and corridor, in AutoCAD, for up to two preferred sketch layouts. The designs will include basic horizontal geometric design elements, including edges of travel way, channelization striping and islands, sidewalks, crosswalks, and truck apron. The designs will ensure the geometry incorporates key operational and safety features including

design speed objectives, speed consistency principles, design vehicle accommodations, and bicycle/pedestrian treatments.

b. Prepare sketch-level drawings showing "fastest path" design speeds for all critical approaches of the roundabout(s) in accordance with NCHRP Report 672.
c. Prepare engineering drawings showing vehicle paths through critical turning movements of the intersection for the design vehicle.
d. Evaluate stopping and intersection sight distances at roundabout in accordance with guidelines from NCHRP Report 672. Determine the sight distance triangles needed at each roundabout approach and within the central island as a guideline for potential easements and landscape design. Prepare an exhibit showing the recommended sight lines.

The 30% plans shall include:

- Cover Sheet
- General Notes and Legend Sheet
- Plan and Profile Sheets showing basic roadway geometry information and incorporating recommended intersection geometry, lane configurations, median locations and access management.
- Preliminary Retaining and Sound Wall Plans
- Preliminary Utility Plans showing conceptual stormwater, water and sanitary sewer layouts

Deliverables

- 30% Plans
- 30% Construction Cost Estimate

Subtask 3.1.2 60% Design (PS&E)

The consultant will develop construction documents to the 60% design stage. These documents will consist of plans, draft specifications, a bid item list, an opinion of probable construction cost, and an anticipated construction schedule.

Traffic Signal Design

- Design conference with the City Project Manager and Traffic Engineer at design kick-off.
- Identification and confirmation of the traffic signal phasing and operations plan, turn lane storage needs, detection requirements, pedestrian and bicycle elements, and other key assumptions.

- Preparation of preliminary signal equipment layout for City review and approval, including revisions as needed.
- Fiber optic interconnect plan along NE 18th St from SE 138th Avenue to NE 167th Avenue, as appropriate for network communication purposes.

Channelization and signing Design

- Field reviewing the existing signing and striping within the vicinity of the project from the City (if available).
- Conduct a site visit to inventory the existing conditions and verify the survey.

Street Lighting Design

- Participate in a design conference with the City Traffic Engineer and Clark Public Utilities at before street lighting design kick-off.
- Review the existing street lighting as-built drawings within the vicinity of the project from the City and explore the opportunity to extend existing system if possible.
- Identification and confirmation of the desired lighting poles and fixtures.

Specifications

- The Consultant shall prepare Project Special Provisions, and a proposal sheet as required by the design. The Contractor shall submit draft specifications at the 60% design stage. Project specifications shall comply with the City of Vancouver Standard Specification format. The Contractor shall be responsible for updating the Amendments and General Special Provisions to current Washington State Department of Transportation Standard Specifications for Road, Bridge, and Municipal Construction.

The 60% plans shall include:

- Cover Sheet
- General Notes and Legend Sheet
- Preliminary Site Prep/Demolition Plans
- Typical Section
- Plan and Profile Sheets showing basic roadway geometry information
- Intersection Plan showing roundabout layouts and ADA grading
- Miscellaneous details
- Utility Plan – Updated general concepts for stormwater, water and sanitary systems and facilities.
- Preliminary Erosion Control and Grading Plans

- Preliminary Retaining Wall and Sound Wall Plan and Profile
- Preliminary Retaining Wall and Sound Wall Details
- Preliminary Signing and Striping Plans
  Preliminary Signal Equipment Layout
- Preliminary Fiber Optic Interconnect Plans
- Preliminary Streetlighting
- Preliminary Joint Utility Trench Plans
- Conducting a photometric analysis to determine a conceptual-level street light pole layout.
  - It is assumed that standard Type A cobra lighting will be provided based on the Principal Arterial classification.
  - This assumes roadway lighting along the entire length of the project study corridor.
- Preliminary Landscape Plans
- Preliminary Construction Staging Plans
- Preliminary Construction Signing

Other documents to submit with the 60% plans:

- Preliminary cut and fill line determination.
- Preliminary stormwater analysis, preliminary basin delineation map, and conceptual layout.
- Comment response log (include comments on 30% submittal and responses)

Deliverables

- 60% Plans
- 60% Construction Cost Estimate
- 60% Specifications

Subtask 3.1.3: 90% Design (PS&E)

The consultant will address review comments from the 60% plans and develop construction documents to the 90% design stage. These documents will consist of plans, specifications, a bid item list, an opinion of probable construction cost, and an anticipated construction schedule.

Stormwater / Hydrology

- Available data relating to the drainage and water resources for the Project area shall be collected and reviewed from Federal, State and local agencies. Existing and proposed drainage features and information on drainage problem areas

shall be incorporated into the Project plan and profile sheets, along with establishing groundwater elevations.

- A preliminary Hydrology Report shall be prepared containing all drainage calculations for the Project. Two (2) copies shall be submitted for City review and comment. Three (3) copies of the final report shall be submitted when revised.

The 90% plan set shall include the following:

- Cover Sheet
- General Notes and Legend Sheet
- Site Prep/Demolition Plans
- Typical Sections
- Plan and Profile Sheets
- Intersection Plans
- Miscellaneous Details
- Utility Plan and Profile for water and sanitary sewer
- Storm Drain Plan and Profile
- Stormwater Facility Plan and Detail Sheet
- Erosion Control and Grading Plans
- Retaining Wall and Sound Wall Plan and Profile
- Wall Details
- Signing and Striping Plans
- Traffic Signal Plans
- Fiber Optic Interconnect Plans
- Streetlighting
- Joint Utility Trench Plans
- Landscape Plans
- Landscape Detail Sheets
- Preliminary Irrigation Plans
- Preliminary Irrigation Detail Sheets
- Construction Staging Plans
- Construction Signing Plan
- Site Specific Traffic Control Plans

Other documents to be submitted with the 90% plans:

- Compile stormwater analysis from 60%, update the analysis to match the 90% level design and prepare the preliminary stormwater / Hydrology report.

- Identify which bid items will require special provisions.
- Prepare 90% Level Project Specifications including GSP's and special provisions necessary for this project.
- Comment response log (include comments on 30%, and 60% submittal and responses)

Deliverables

- 90% Plans
- 90% Construction Cost Estimate
- 90% Specifications
- Preliminary Stormwater / Hydrology Report

Subtask 3.1.4 Final Design (PS&E)

The consultant will address review comments from the 90% plans and develop construction documents to the 100% and Final design stage. These documents will consist of plans, specifications, a bid item list, an opinion of probable construction cost, and an anticipated construction schedule. Final documents will be sealed as appropriate for jurisdictional engineering review.

Address the 90% comments. 100% and final design phase plan set shall include:

- Cover Sheet
- General Notes and Legend Sheet
- Site Prep/Demolition Plans
- Typical Sections
- Plan and Profile Sheets
- Intersection Plans
- Miscellaneous Details Sheet
- Utility Plan for water, sanitary sewer
- Storm Drain Plan and Profile
- Stormwater Facility Plan and Detail Sheet
- Erosion Control and Grading Plans
- Retaining Wall Plan and Soundwall Plan and Profile
- Wall Details
- Signing and Striping Plans
- Traffic Signal Plans
- Fiber Optic Interconnect Plans
- Streetlighting and Joint Utility Trench Plans

- Landscape Plans
- Landscape Detail Sheets
- Preliminary Irrigation Plans
- Preliminary Irrigation Detail Sheets
- Construction Staging Plans
- Construction Signing Plan
- Site Specific Traffic Control Plans
- Standard Detail Sheets

Other documents submitted with the final plans:

- Address preliminary stormwater report comments and submit final stormwater report for approval.
- Prepare final special provisions as needed for nonstandard items shown on the plans, and compile the project specifications.
- Address City review comments regarding the plans, specs, and estimate.
- Comment response log (include comments on 30%, 60%, and 90% submittal and responses)
- Preparation of the project NPDES permit application, and posting the Notice of Intent (N.O.I.) in an appropriate local news paper
- Preparation of the project SWPPP
- Prepare and submit final bid package

Deliverables

- 100% Plans
- 100% Construction Cost Estimate
- 100% Specifications
- Contract Documents in word format and cost estimate in excel.
- Final CAD drawings and Civil 3D.
- Copies of Bid Package, assume a maximum of 30 copies to bidders
- Final Stormwater Report
- Copy of NPDES Permit Application
- Copy of SWPPP

Subtask 3.2 Site Investigation, Utility Data Collection, and Coordination

Subtask 3.2.1 Site Investigation

Perform a site investigation to review existing information and applicable standards to gain a complete understanding of the project area, known issues, and established

utility processes. The Consultant shall obtain all available utility records within the project boundaries from individual utility companies and review them. The Consultant shall work directly with the owners of existing utilities to identify requirements related to their relocation or modification.

Subtask 3.2.2 Utility Coordination
Identify utilities within the project limits, then obtain and review their system mapping. Conduct a utility reconnaissance of the project area to verify the presence of aboveground and underground utility facilities, confirm the utility-provided maps, and ensure consistency with the project base map.

Serve as the Single Point of Contact throughout the design phase for utility coordination. Address utility requests for project information and design documents, including the distribution of design plans. Serve as liaison between utilities and the Project Design Team. Identify and discuss with each utility any special requirements associated with their facility relocation or modification. Assume up to 1 hour per week throughout the duration of the project. Assume coordination with six utility operators.

Design plans shall be sent to the utility companies at the completion of preliminary design (30%),50%, 90%, and Final design stages.

Prepare a Utility Report for utilities within the project corridor. The report will outline:

- Potential utility conflicts within the project area
- General location, type, size, material, and typical depth of existing facilities
- Project construction requirements and probable conflict resolution
- General description of potential conflicts and caveats related to the relocation process

Submit a draft report electronically for review and a final report electronically upon
Submit a monthly utility coordination report with each invoice.

Subtask 3.2.3 Utility Meetings
Prepare for and attend up to three meetings, not including the overall project kickoff meeting, to strategize and plan utility coordination and relocations with the City and/or Project Design Team.

Organize up to three group and up to five individual utility meetings, as necessary, to share current project information. Meeting topics will include known facilities, potential impacts, timing required for potential relocations, and reimbursable

requirements. Meetings will also provide a forum for utilities to share their relocation plans with one another to promote compatibility between relocation designs and construction sequencing. Prepare and distribute meeting agendas and meeting summaries to all attendees. If a temporary shutdown of BPA facilities is required during construction, additional meetings with BPA will be necessary for planning and coordination.

Subtask 3.2.4 Conflict Identification, Analysis, and Recommended Resolution
Identify and analyze utility conflicts. Compile and distribute utility conflict lists, including aboveground, surface, and underground facilities. Make recommendations to utilities for conflict resolution.

Prepare utility conflict plan sheets based on 50% design plans. Include utility conflict spreadsheets indicating conflict item number, utility type, conflict status, average cover during and after construction, location relative to right-of-way, and additional comments.

Prepare a Utility Conflict Report summarizing identified utility conflicts. Send conflict letters to each affected utility identifying the specific conflicts and required adjustments. Prepare a schedule for the necessary adjustments to be made prior to the start of construction.

Revise conflict analysis and associated spreadsheets based on 90% design plans.

Revise conflict analysis and associated spreadsheets based on 100% design plans.

Subtask 3.2.5 Conflict Notification and Utility Relocations
Notify impacted utility companies and coordinate their efforts in developing and implementing relocation plans that resolve conflicts with the project design.

- Prepare and deliver Conflict Notices to each involved utility owner. Notices will include a conflict list and conflict map. Assume up to six utility operators. Notices shall request a utility response, including a proposed facility adjustment plan and schedule for completing the work. Allow each utility a 30-day response period from the date of notice.
- Review utility relocation plans to verify that identified conflict items have been addressed and that the plans are compatible with the Project's construction requirements. Provide written approvals of the utility relocation plans. Assume a total of nine reviews (average of 1.5 reviews per utility).

Assumptions

- The City will provide utility plans, GIS, and other available records for City-owned utilities within the project area.
- The City will provide pertinent franchise utility system mapping and agreements in its possession.
- Utility design location fees, if required, are not included in the Consultant's scope and will be paid by the City.
- Utilities are responsible for providing designating and locating information for their facilities at their own expense.
- Any additional right-of-way or easements required for relocated utilities will be the responsibility of the utilities or the City, depending on prior rights.

Deliverables

- Meeting agendas and summaries for each utility meeting
- Monthly utility coordination reports
- 30% submittal: Existing utilities identified and marked on survey base mapping
- Utility Report based on 30% plans, submitted within 20 days of the 30% submittal
- Preliminary utility conflict analysis based on 50% plans, submitted within 20 days of the 50% submittal
- Utility Conflict Report
- 90% utility conflict analysis based on 90% plans, submitted within 20 days of the 90% submittal
- Conflict notice letters and attachments for each utility
- 100% utility conflict analysis based on final plans, submitted within 15 days of the 100% submittal
- Review comments on utility relocation plans

Subtask 3.3 Geotechnical Engineering (CW)

Columbia West will conduct a geotechnical investigation to evaluate subsurface soil conditions along the project alignment and develop geotechnical design recommendations and construction guidelines for the proposed roadway widening and improvements, including roadway embankments, stormwater infiltration and detention facilities, retaining walls, traffic signals, and sound walls (if necessary). The work will be conducted in general conformance with Washington State Department of Transportation's (WSDOT's) Geotechnical Design Manual, Washington State Department of Ecology's (WSDOE's) Stormwater Management Manual for Western Washington (SMMWW), and the City of Vancouver's (City's) Surface Water/Stormwater Design and Construction Requirements.

Specifically, Columbia West will provide the following services:

1. Review readily available geologic, groundwater, and soil survey maps that cover the project vicinity.
2. Conduct a site reconnaissance.
3. Mark the proposed exploration locations in the field and notify the "One Call" service for public utility locates. Also, engage services of private utility locating subcontractor specific boring locations.
4. Prepare traffic control plans for and provide traffic control during completion of field explorations. Traffic control plans will be approved by City Public Works staff prior to performing work.
5. Advance up to 15 mechanically drilled borings to characterize subsurface soil conditions, provide recommendations for the project. We anticipate that between 5 and 7 days will be required for drilling. Borings will be drilled to depths up to 10 or 25 feet below grade. Final depths will be based on anticipated depths of infiltration systems and locations of signal poles, retaining walls, and sound walls.
6. Maintain a log of the soils encountered in the explorations and collect soil samples for laboratory testing.
7. Groundwater is mapped as more than 100 feet below existing grades. Based on this, Columbia West will not install monitoring wells.
8. Conduct up to 9 infiltration tests at up to 6 exploration locations. Tests will be conducted at locations and depths proposed by HHPR. We anticipate that up to 3 locations may have infiltration tests at two depths (e.g. shallow and deep).
9. Restore the explorations in the following manner:
    a. Borings - Backfill the drilled borings/monitoring wells in accordance with WSDOE standards. In paved areas, the surface of the boreholes will be patched with concrete or asphalt. Excess soil cuttings from the borings will be left adjacent to the boreholes in open fields, and removed from the site in developed areas.
10. Conduct a program of laboratory testing on select soil samples, including up to:
    a. 12 particle-size distribution tests (sieve analyses)
    b. 25 percent fines determinations (percent passing the No. 200 sieve)
    c. 25 moisture content and/or density determinations
    d. 6 Atterberg Limits determinations
    e. 9 cation exchange capacity determinations
    f. 9 organic content determinations
    g. 2 one-dimensional consolidation tests
11. Conduct engineering analyses to evaluate: Embankment construction alternatives.
    a. Stability of pond and roadway embankments.

b. Settlement potential in organic soils for roadway embankments (if present).
c. Retaining wall earth pressure design parameters (including active, at-rest, and passive pressures).
d. Retaining wall foundation design parameters (if necessary).
e. Traffic signal foundation design parameters (if necessary).
f. Seismic design parameters.
g. Liquefaction and earthquake-induced ground settlement potential.
h. Design criteria for pond liners and ballast (if needed).

12. Prepare a draft geotechnical report summarizing the results of the subsurface exploration and laboratory testing programs, and presenting appropriate recommendations and conclusions.
13. Prepare a final geotechnical report incorporating requested changes/updates from the project team's review of the draft report.
14. Prepare a memorandum documenting groundwater level readings.
15. Provide project management and support for our work, including coordinating Columbia West staff and subcontractors, invoicing, email and telephone communications with the project team, other incidental administrative services required for the project, and attendance at up to two project meetings.

Assumptions

The above scope of work and attached fee estimate are based upon the following assumptions:

- The City or others in the Consultant team will obtain right of entry permission for all explorations and monitoring well installations.
- Field work will be performed during daylight hours with approved traffic control.
- If contaminated soils are encountered, then additional charges will be incurred for equipment decontamination, testing, and soil disposal.
- If needed, the City will issue a street use permit at no cost to the Consultant.
- Abandonment of the groundwater monitoring well is not included in our scope. We have assumed that this task will be completed during construction by the project contractor.

Deliverables

- Site plan with proposed boring locations
- Traffic control plan for City approval
- Draft geotechnical report
- Final geotechnical report

Subtask 3.4 Structural Engineering

Sound Walls Along NE 18th Street: The consultant will prepare 30%, 50%, and 90% and final construction contract documents for sound walls along NE 18th Street. HHPR will provide the plan and profile drawings for the sound walls, and the Consultant

structural engineer will provide the structural engineering and details, and unit cost data for the cost estimate.

Assumptions

- Soil conditions are such that shallow spread-footing-type foundations can be used.
- Sound walls are anticipated to be constructed out of reinforced concrete with decorative reliefs achieved with form liners.

Deliverables

- Design documents (details) in electronic format at each of the 30%, 50%, 90% and final design stages
- Review comments provided to HHPR regarding the plan and profile sheets prior to submittal of documents at the stages listed above
- Final design documents in full-size paper copies; quantities sufficient for submittal to City of Vancouver for review
- Structural calculations at the final design stage

Subtask 3.5 Landscape Architecture

The Consultant will prepare 30%, 50%, and 90% and final construction contract documents for tree preservation, planting, and irrigation along NE 18th Street. The Consultant will provide the plans, special provisions and estimate for all landscape related bid items. It is anticipated that drawings will include details for center of roundabout designs, street trees, plantings, irrigation, and site furnishings.

Assumptions

- Retaining and/or sound walls will be designed by the structural engineer. The Landscape Architect may provide artistic consultation.
- Planting and irrigation for storm water treatment is included in the Landscape Architect's scope.
- The Landscape Architect will coordinate planting design with project stakeholders as requested by the City of Vancouver.

Deliverables

- Exhibits, including renderings, as requested for public outreach meetings.

Subtask 3.6 Right-of-Way (ROW) Plans

The Consultant shall review the preliminary ROW plans, and provide necessary information to the City about the project designs at the 30 – 50% design stage. The City will use the information to develop the ROW plans for the project.

All necessary ROW plans, exhibits for right of way takes, easements and temporary construction permits will be prepared by City staff. The City will also provide services for legal descriptions, property appraisals, negotiations, and acquisitions. (Please

note: this Project does not have ROW funding at this time therefore ROW needs may change as a result of future development contributions or due to funding constraints).

Subtask 3.7 Grade Sheets
The Consultant shall prepare grade sheets for Project construction using station-offset format. The grades shall be tabulated for top surface and sub-grade at centerline, midpoints of roadway, gutters and tops of curbs. The grades shall be provided at 25-foot intervals longitudinally and at points of horizontal and vertical curvature.

Deliverables
- Grade sheets electronic format

Task 3 Deliverables
- Utility Conflict Report
- Geotechnical Report
- Hydrology Report
- Travel Demand Validation
- Ultimate lane configuration recommendation along the corridor
- Roundabouts vs. Signals documentation
- Roadway Plans (as needed)
- Storm Drain Plans
- Water and Sanitary Sewer Plans
- Structure Plans (noise walls)
- Specifications and Cost Estimate

TASK 4: ENVIRONMENTAL EVALUATION AND PERMITTING (HHPR)
The City of Vancouver has completed an Environmental Assessment (EA) and Section 4(f) evaluation for the entire corridor (NE 86th/87th Avenue to 192nd Avenue). The Finding of No Significant Impact (FONSI) was signed by the FHWA on April 18, 2006 . The Consultant shall use the EA for the corridor as the basis for the final design. The EA includes a grade-separated intersection at NE 18th Street and NE 112th Avenue. Both WSDOT and the City of Vancouver would like to change this to an at-grade intersection, which may require an update to the EA. Additionally, several parcels along the corridor have been redeveloped since the approval of the EA, which may require an update to the EA's noise study. The EA addresses NEPA compliance issues. Additionally, the Consultant shall provide documentation to comply with the City of Vancouver Critical Areas Ordinance, Cultural Resources Ordinance, and prepare a SEPA Checklist. The Consultant shall prepare the NPDES application and SWPP Plan for the Project.

Subtask 4.1 Review of Previous Environmental Studies

The Consultant will be required to follow the mandated Environmental Procedures outlined below:

- Update and verify all aspects of the Environmental studies and Cultural Resource Report prepared for the corridor. This task shall be accomplished through agency consultation, use of existing databases, and, where necessary, additional fieldwork. The update will be essential to minimize unanticipated permitting or consultation requirements late in the process. Of particular importance will be determining the status of the Project area with regard to Threatened and Endangered Species (see below).
- Reevaluate the listed wildlife and plant species during the design process, to identify which species and designated critical habitat occur within the Project area. The EA prepared for the Project includes evaluations of both proposed critical habitat and candidate species. Over the course of the design it is necessary to ensure that no new proposed listings have occurred for species within the Project area. This includes monitoring and identifying permitting changes during design and/or due to design changes from the original EA.
- Contact City, County, and State environmental staff to obtain and review previous studies completed for other projects in the vicinity of the proposed NE 18th Street improvements, including the following:
    - Environmental documentation and reports for the NE 18th Street Improvement Project
    - Environmental documentation and reports for the Burton Road/28th Street Improvement Project.
    - Environmental documentation and reports for the NE 138th Avenue 18th to 28th Street Project.
    - City and County critical resource area designation information
    - Natural Heritage Program Database and critical habitat information
- Determine requirements for updating environmental studies and identify any gaps in the data. The Consultant shall prepare a memorandum summarizing previous environmental studies, and what each covers. This information shall be used to avoid duplicating efforts. To the extent feasible, the previous studies shall be used to update the Local Agency Environmental Classification Summary (LAECS) approved by WSDOT for the corridor.
- Technical Studies
- The technical studies described below shall supplement existing studies and shall be used for the design and permitting efforts. The Consultant shall contact staff at the various agencies to obtain information for the area, and conduct the analysis needed to support the assessment documentation.

Deliverables

- Draft Permit Summary Memo (one electronic copy)
- Final Permit Summary Memo (one electronic copy)

Subtask 4.2 Noise Analysis (MMA)

The existing noise study within the environmental assessment for the NE 18th Street project was performed in 2005 and is no longer valid. Revisions to the state and federal regulatory framework for noise studies requires a completely new noise analysis. Because this project will likely seek federal funding, this new noise analysis will follow Title 23 of the Code of Federal Regulations (CFR) Part 772, *Procedures for Abatement of Highway Traffic Noise and Construction Noise* July 2010, as administrated by the Federal Highway Administration (FHWA). This federal law is further regulated by the Washington State Department of Transportation (WSDOT). WSDOT has a set of rules provided in the Chapter 446, Noise, Environmental Manual, M 31-11.29, WSDOT December 2024. By Federal Law, all noise studies for roadways and highways receiving federal funds must follow the procedures and methods found in these documents.

As part of the noise study, a reconnaissance of the project area will be performed to identify all land use types and locate noise-sensitive properties within 300 to 350 feet of the project area. The noise study area of 300 to 350 feet is typically more than sufficient to assure all potential traffic noise impacts are identified when analyzing a five lane main arterial roadway with speeds of 35 mph or less. If necessary, the study area may be expanded to include properties close to the study area limits. Physical and terrain features that affect noise propagation and features that may be altered during construction shall be identified and included in this analysis.

Noise validation measurements and traffic counts will be conducted at several sites along the existing corridor as needed to validation the FHWA Traffic Noise Model (TNM version 2.5). The data can also be used to assist with providing a description of existing noise levels that are representative of the land uses along the proposed alignments. An estimate of 6 noise monitoring sites will be needed for this project. The noise measurements will be conducted for a 15-minute sampling period during daytime off-peak hours (10 AM to 4 PM) when traffic is moving freely. Traffic counts and vehicle type classifications (cars, medium trucks and heavy trucks) will be conducted concurrently with the noise measurements. All noise sources will be noted and those that may interfere with a determination of noise abatement will be identified.

Traffic noise levels at each validation measurement site will be predicted using the TNM with the existing roadway configuration and the traffic counts taken during the

noise measurement survey. The sound level predictions from TNM will be compared with the measured sound levels to reach an agreement of ± 2 dB as required by WSDOT.

Based on site inspections, a review of aerial mapping, and area land use, a set of representative noise modeling sites will be located throughout the project area and added to TNM. Frequently, one modeling location will be used to represent two or more nearby locations expected to have similar or slightly lower noise levels than the modeling location. The number of modeling sites will be sufficient to accurately predict traffic noise levels for the existing conditions, future (year 2045?) No-Build conditions, and the future Build traffic conditions. It is estimated that up to 70 individual noise modeling sites may be needed to represent traffic noise levels along the project corridor.

Using the validated TNM, existing peak hour traffic volumes from project traffic engineers will be used with posted speed limits to calculate existing peak hour noise levels at each of the modeling sites. Traffic noise level projections will also be performed for the same sites using the future No-Build traffic volumes. These predicted noise levels will be used to establish the existing conditions and for comparison with the future Build noise levels. The existing and future N-Build noise levels will also be used to aid in the understanding of the potential change in project area noise levels without the project.

Future Build peak hour traffic noise levels will be modeled at the same selected noise-sensitive sites with the proposed Build roadways and ancillary facilities included. Future Build traffic volumes and vehicle mixture will be provided by project traffic engineers, and will be modeled using the proposed future speed limits. The future Build traffic noise levels will be compared to the approach or exceed and allowable increase noise criteria using the WSDOT policy. For residences, noise impacts occur if future traffic noise levels approach or exceed 66 dBA Leq during peak hours, or increase by 10 dB or more over the existing conditions.

In accordance with FHWA and WSDOT requirements, noise abatement measures will be considered under the Build alternative at locations within the study area where traffic noise impacts are predicted. Noise abatement measures FHWA and WSDOT will consider include noise walls and berms. Other noise reducing measures, including project design measures, must be included as part of the project design. The noise analysis will provide the location, length, height, profile, estimated cost (using WSDOT policy), and number of benefiting noise-sensitive properties for any proposed barrier(s). The barrier information will be used for comparison with WSDOT criteria for

reasonable and feasible noise abatement. If noise abatement meets the WSDOT criteria, it must be recommended for consideration. The final decision on noise abatement construction will be determined by WSDOT in conjunction with outreach and input from the affected residences using a voting process.

Frequently, there are areas with noise impacts and no reasonable and feasible noise abatement measures available. The analysis will provide a discussion of these impacts and specifically outline reasons for not including noise abatement.

The analysis will include a detailed discussion as related to local laws applying to construction noise. A construction noise analysis will be included in the noise report. Construction activities that may cause annoyance at nearby noise-sensitive land uses will be qualitatively assessed in accordance with WSDOT's procedures.

A noise technical report summarizing the finding of the noise study will be prepared. The report will follow the WSDOT policy for a traffic noise technical analysis. The contents will include an introduction to acoustics and discuss land use, methodology, existing noise levels, future No- Build and Build noise levels, noise impacts, and recommended noise abatement and a basic construction noise analysis.

Existing and proposed roadway alignments will be provided on vicinity-scaled maps. Traffic noise impacts, monitoring locations, and sensitive receivers will also be shown on area maps at an appropriate scale. Tables, with comparisons, will be prepared to aid in the understanding of existing and future noise levels, project impacts and mitigation. A discussion of potential impacts on future land uses in the context of existing and planned land uses will be provided. Construction noise impacts and local regulations, as described above, will be discussed.

This scope and fee assumes 6 additional 2-hour meetings and discussions regarding noise abatement and noise reducing design options for consideration of construction with the project. Meeting preparation time is also included in the fee.

The initial report will be submitted in Microsoft (MS) Word format for review and comments. After revisions based on the comments are completed, a final report will be produced in PDF electronic format.

Noise Analysis Assumptions:

- CAD files in AutoCAD or MicroStation for the existing roadway alignment and proposed roadway alignment will be provided by the project engineers.

- Traffic data, including turning movements at the intersection of NE 18th Street with: NE 138th Avenue, NE 141st Avenue, NE 162nd Avenue along with NE 148 and NE 15th Avenues if volume warranted evaluation), will be provided by project traffic engineers, and will include peak hour volumes for existing, future No-Build and future Build, with posted speed limits, and percentage of vehicle types (e.g., passenger vehicles, medium trucks, and heavy trucks).

Noise Analysis Deliverables:

- Noise analysis technical report (draft and final)
- Noise monitoring sheets and details
- Noise wall locations and heights (if and where applicable)
- TNM files

Subtask 4.3 Cultural Resources (ASCC)

The project will require archeological approval from the City and shall meet Section 106 of the National Historic Preservation Act of 1966.

- The Consultant will work to ensure compliance with the cultural resource requirements as outlined in the EA & the FONSI for the corridor. Given that the FONSI was signed in 2006, the Consultant expects that additional research and consultation will be necessary to meet current standards for cultural resources review.
- The Consultant will coordinate WSDOT to establish the project's area of potential effects (APE) and methodology for the cultural resource investigation, producing an APE/methodology memo as needed. Given the nature of the project and its urban setting, it is expected that the cultural resource study will be concerned only with the APE for direct effects rather than the APE for indirect (e.g. visual or auditory) effects.
- Once the APE and methodology are established, the Consultant will coordinate with project stakeholders (including WSDOT, the City, the Washington Department of Archaeology and Historic Preservation [DAHP], Native American Tribes, and land managing and permitting agencies) to ensure that all applicable notifications, permissions, laws, and regulations related to the cultural resources study are addressed.
- The Consultant will research the project's environmental, archaeological, ethnographic, and historical context to establish a localized probability model and interpretive context for any cultural resources which may be encountered

during the field investigation. This research will include a thorough review of previous cultural resource studies in the vicinity of the study area.

- The Consultant will undertake a two-phase field investigation consisting of a pedestrian survey and a subsurface survey.
- The pedestrian survey will entail a walkover of the entire study area, the goal being to identify and document any exposed cultural resources which may be directly affected by the proposed project.
- The subsurface survey will sample points along the project area where excavation is permitted by ground conditions, i.e. areas without pavement, buried utilities, or other signs of heavy ground disturbance. The subsurface survey is expected to entail the excavation of up to 40 shovel test probes (STPs), each excavated as a circular hole measuring 45 cm in diameter and at least 50 cm in depth, barring impasse. All excavated sediments will be screened using 1/4-inch and 1/8 inch (6-mm and 3-mm) hardware cloth to recover any archaeological data.
- All identified cultural resources will be inventoried with DAHP and subject to a preliminary assessment of significance, to the extent possible within the current scope of work. The Consultant will make recommendations as to any further study or treatment for each resource identified and for the larger project.

Subtask 4.4 Tree Evaluation/Preservation Process (MHA)

- Locate and evaluate trees measuring at least six inches (6”) in diameter at breast height (DBH). An existing conditions plan shall be generated locating the existing trees by survey point number and trees will be visually assessed by an ISA Board Certified Master Arborist in terms of species, size, condition, and potential for construction impacts. A tree preservation plan shall be prepared by HHPR in collaboration with MHA that identifies protection measures proposed for trees to be retained. A street tree work
- permit application shall be completed, and a liaison established with the City Urban Forester.
- This work is based upon utilizing the proposed alignment, and includes evaluation of potential construction impacts, critical root zone analysis, the design of tree protection measures, or the modification to roadway alignment, slopes, retaining walls, or Right of Way for the protection of healthy trees. This scope includes coordination and drafting of tree protection measures on the roadway grading plans, and location of trees outside the Right of Way adjacent to proposed construction, if necessary.

- Special care will be taken to evaluate all trees individually and as a grove. Creativity in road design will be valued in different approaches to preserve quality mature trees.

Subtask 4.5 Permit Facilitation and Tracking (HHPR)
Monitor progress of the relevant reviewing agencies so that questions or concerns during review are addressed quickly. This will enable the permit application to be processed in a timely manner.

Subtask 4.6 Critical Areas Reporting
The previous wetland delineation and critical area assessment that cover the Project area were completed in 2000 and require verification and updating. HHPR will delineate wetlands and waters within and adjacent to the Project area.

For this task HHPR will:

- Conduct a field visit to evaluate the subject property and the areas within 300 feet for critical areas.
- Flag boundaries of wetlands and streams and map within the Project area with GPS.
- Complete wetland rating forms for any wetlands identified and determine City of Vancouver buffer widths.
- Prepare a Wetland Delineation and Critical Areas Report for City of Vancouver and WSDOT review.
- Coordinate with City of Vancouver during review.

Assumptions:

- HHPR will have safe access to the study area.
- Field work can be completed in two field days by a two-person team.
- HHPR will prepare Critical Area Report exhibits using GIS or AutoCAD.
- City, State, or other agencies will not require additional field work or a site visit.
- No permit is required from the US Army Corps of Engineers, the Washington Department of Ecology, or Washington Department of Fish and Wildlife.

Deliverables:

- Draft Critical Areas Report (one electronic copy)
- Final Critical Areas Report (one electronic copy)

Subtask 4.7 SEPA

HHPR will complete a SEPA Environmental Checklist for the Project. It is anticipated that the City will be SEPA lead agency, and that the agency determination will be a Determination of Non-Significance (DNS).

Assumptions:

- Revisions and comments on the SEPA checklist will be minor and do not require additional technical analysis.
- The SEPA threshold determination is anticipated to be a DNS or Mitigation DNS. A SEPA EIS is not required.
- The City will be the lead agency and will prepare the SEPA threshold determination.

Deliverables:

- Draft SEPA Checklist (one electronic copy)
- Final SEPA Checklist (one electronic copy)

Subtask 4.8 NEPA Categorical Exclusion (Contingency)

The Consultant will complete the NEPA ECS form and compile the NEPA environmental documentation in accordance with Chapter 24 of the LAG Manual and other appropriate WSDOT and/or FHWA guidance documents.

FHWA-funded projects require the local agency to prepare and compile a list of environmental commitments required of the Project. As a consequence, the Consultant will compile and provide the City with a matrix of environmental commitments made through the permitting of the Project.

Assumptions:

- NEPA documentation is assumed to be a PCE, and the preparation of an EA or environmental impact statement (EIS) is not included in this task.
- Document preparation will begin upon the selection of a preferred alternative.
- One round of City revisions and WSDOT comments on the ECS will occur. These will require minor edits and will not require additional technical analysis.
- After final delivery of the matrix of environmental commitments, the City will be responsible for managing and maintaining the matrix, including any subsequent permit updates and will be responsible for providing the register to FHWA if requested.

Deliverables:

- Draft ECS form
- Final ECS form
- Draft matrix of permit commitments
- Final matrix of permit commitments

Subtask 4.9 No Effect Memorandum (Contingency)

The Consultant will confirm which National Marine Fisheries Service (NMFS) and the U.S. Fish and Wildlife Service (USFWS) listed species and critical habitat could occur within the Project area. The Consultant will also research and identify listed species and habitat information from the Washington State Department of Fish and Wildlife (WDFW) Priority Habitats and Species Program, the Washington State Department of Natural Resources (WDNR) Washington Natural Heritage Program, and the City and/or County geographic information systems in addition to other existing literature and data resources and field reconnaissance.

The Consultant will complete a field review and verify the presence of potential habitat for listed species in the Project Action Area.

The Consultant will prepare the required documentation for Endangered Species Act (ESA) compliance. Based on the anticipated increase in impervious surfaces and on-site stormwater infiltration a "No Effect" determination is anticipated. A No Effect Memorandum (NEM) will be prepared consistent with WSDOT Local Agency Guidelines (LAG) Manual.

It is expected that the Consultant will meet one time with WSDOT Local Agency staff for this task. This meeting would occur once the preliminary design is completed, including stormwater design, and would be intended to confirm the "No Effect" determination.

Assumptions:

- The only potential Project impacts to ESA-listed species are associated with stormwater runoff reaching ESA-listed fish bearing waters.
- Stormwater can be treated and fully infiltrated onsite, resulting in a "No Effect" determination for ESA.
- Consultation with the agencies is not required.
- Formal species surveys are not necessary and not included in this scope of work.

- WSDOT comments on the draft and final NEM are minor edits and will not require additional technical analysis or field visits.
- The meeting with WSDOT Local Agency staff will be held virtually.

Deliverables:

- Up to one meeting with WSDOT staff to discuss the "No Effect" determination.
- Draft NEM for City review (one electronic copy)
- Final draft NEM for City and WSDOT review (one electronic copy)
- Final NEM submitted to WSDOT (one electronic copy)

Subtask 4.10 Update NEPA EA (Contingency)

If changes to the proposed Project are determined through coordination with relevant agencies that are substantial enough to require a re-evaluation or a supplemental assessment, the Consultant will prepare an updated EA. The Supplemental Assessment or re-evaluation will document the trigger for re-evaluation, describe the changes, focus the scope (clarify the area for re-evaluation), analyze impacts, and identify any required mitigation measures.

The EA will be prepared consistent with the WSDOT Local Agency Guidelines (LAG) Manual. The area of indirect effects studied with the Project will be determined and examined in accordance with the guidance in WSDOT's EA preparation training manual.

It is expected that the Consultant will meet up to two times with WSDOT and BPA agency staff for this task. The first meeting will be to address and reach an agreement on the content of the EA update, and the second meeting will be to review and discuss mitigation measures that would be incorporated into the Project design.

Assumptions:

- Agency comments on the draft and final EA are minor edits and will not require additional technical analysis.
- Meetings with agency staff will be in Vancouver. No formal meeting minutes will be prepared from these meetings.
- Agencies will have one round of comments and updates to report will be minimal

Deliverables:

- Draft EA for City review (one electronic copy)
- Final draft EA (one electronic copy to City and WSDOT)

- Final EA (one electronic copy to City and WSDOT)
- Up to two meetings with WSDOT staff to discuss the content of the EA and to discuss proposed Project mitigation

Subtask 4.11 Update BA (Contingency)
If a stormwater design utilizing 100% infiltration is not feasible, or if other unavoidable impacts negate a "No Effect" determination, the Consultant will prepare a biological assessment (BA). The BA will be prepared consistent with the WSDOT Local Agency Guidelines (LAG) Manual. The area of indirect effects studied with the Project will be determined and examined in accordance with the guidance in WSDOT's BA preparation training manual.

It is expected that the Consultant will meet up to two times with WSDOT agency staff for this task. The first meeting will be to address and reach an agreement on the content of the BA, and the second meeting will be to review and discuss mitigation measures that would be incorporated into the Project design.

Assumptions:
- After coordination with relevant agencies, it is determined that the previous ESA coverage can be updated and amended.
- Formal species surveys are not necessary and not included in this scope of work.
- Agency comments on the draft and final BA are minor edits and will not require additional technical analysis.
- Meetings with agency staff will be in Vancouver. No formal meeting minutes will be prepared from these meetings.
- Up to two meetings with WSDOT staff to discuss the content of the BA and to discuss proposed Project mitigation
- Agencies will have one round of comments and updates to report will be minimal

Deliverables:
- Draft BA for City review (one electronic copy)
- Final draft BA (one electronic copy to City and WSDOT)
- Final BA (one electronic copy to City and WSDOT)

Subtask 4.12 Mitigation Plan

- If the final design impacts buffers of designated critical areas, including wetlands, streams, and protected wildlife habitat, buffer mitigation will be required.
- For this task HHPR will:
- Prepare a mitigation plan to address Project impacts at an appropriate mitigation site provided by the City.
- Attend up to one pre-application meetings and one field visit with the City.

Assumptions:

- Wetland and stream impacts not included in this Project.
- Buffer mitigation will consist of vegetation enhancement on a City owned property.
- City revisions and comments will be minor and do not require additional technical analysis.
- Delineation of the mitigation site not included in this task.

Deliverables:

- Draft Critical Areas Mitigation Plan (one electronic copy)
- Final Critical Areas Mitigation Plan (one electronic copy)

Subtask 4.13 JARPA (Contingency)

- Any proposed impacts to wetlands and waterways will require a permit from USACE and/or the Washington State Department of Ecology (DOE), as well as from the City of Vancouver.
- For this task HHPR will prepare a JARPA Form and required exhibits for impacts to Waters of the US and Waters of the State Attend up to two pre-application meetings and up to two field visits with USACE, Ecology, and City biologists. HHPR will be available to answer questions from USACE, Ecology, and the City throughout review and permit issuance. HHPR will prepare a bank use plan to DOE for approval to purchase credits at the Terrace Mitigation Bank.

Assumptions:

- No impacts below the Ordinary High Water Mark of fish bearing streams.
- No HPA required from WDFW.
- Wetland and buffer impacts will be addressed using mitigation bank credit
- Mitigation for other critical areas not included in this task.
- The analysis will be based on the 60% design or equivalent.

- Any post-60% design changes will not change impacts or analysis or require revisions.
- City will obtain signatures of surrounding property owners, if requested by agencies.
- City will submit documents and coordinate with USACE and Ecology.

Deliverables:

- Draft JARPA (form and exhibits)
- Final JARPA (form and exhibits)
- Draft Bank Use Plan (one electronic copy)
- Final Bank Use Plan (one electronic copy)

Task 4 Deliverables

- Memorandum summarizing relevant previous environmental studies
- Update to NEPA CE, if required
- NPDES Permit Application and SWPPP
- Update to Noise impact report
- Update to BA, if required
- SEPA Checklist
- Tree Preservation Plan, Tree Inventory Data, and Tree Protection Specifications
- City Critical Area Ordinance Permit

TASK 5: PUBLIC INVOLVEMENT AND AGENCY COORDINATION (PN)

Subtask 5.1 Project Management & Contract Administration

Contract Administration, Invoicing, Scheduling & Progress Reporting

- The Consultant shall prepare and submit monthly invoices accompanied by brief project progress reports. Each invoice will include date period covered by invoice; number of hours worked during the billing period with billing rates shown; expenses and associated mark-ups; total cost for labor and expenses for the billing period; subconsultants fees including markups for the billing period; and a total amount summarizing labor, expenses, and fees.
- The Consultant shall maintain all contract-required documentation. Provide copies of project files and records to the CITY for audits and public information requests. All final documents shall be provided in electronic format as requested.
- The Consultant shall prepare and submit an activities list for Public Involvement related activities/key deliverables and schedule. The schedule shall show key

communications and public involvement milestones that support the all-up project.

Discovery & Project Team Meetings
The Consultant review all project discovery (history, current conditions, alternative analysis, design guidelines/policies, City documentation, demographic data) and shall support and participate meetings necessary to successfully complete the project. Including:

- All-up project kickoff meeting with City Staff and Consultant team.
- One Engagement and Comms kickoff meeting with a subset of the project team.
- Bi-weekly internal consultant team meetings and project coordination.
- Participate in monthly project coordination meeting with City staff (assumed 24 months total)
- Attend meetings with Consultant team and City staff after the review of the 30%, 60%, 90%, and Final plan submittals.
- The Consultant shall input relevant public involvement items for meeting agendas. This includes a Project kick-off meeting, monthly progress meetings, review meetings and coordination meetings.

Project Management & Coordination

- The Consultant shall prepare for Project meetings with key Project team members, as well as representatives from the City of Vancouver and other agencies as needed. These meetings shall have specific agendas addressing and resolving Project issues as they are encountered. Consultant shall prepare meeting recap with actions and decisions made related to Communications and Engagement work.
- The Consultant shall coordinate Consultant tasks and activities with the City. This shall include using monthly meetings to plan and coordinate upcoming activities.

Subtask 5.2 Public Engagement Plan & Management
The Consultant shall coordinate and assist the City in the development of a Public Involvement and Agency Coordination Program for the Project. The Consultant shall meet with the City's Project Manager, Community Relations Specialist as well as other project team members to review and refine the overall public involvement strategy—the Public Engagement Plan—and to agree on roles and responsibilities, goals, outcomes, timeline, communications and activities.

Additionally, the consultant team will gather input and feedback on the engagement plan with a small group of community champions from the 18th Street Coalition via one small group session hosted in-person at a convenient location for Coalition members. A virtual option will also be made available to attend the meeting.

The purpose of the Public Involvement Program includes the following:

- To develop an environment of trust between the City and citizens who are directly and indirectly affected by the Project
- Coordination with the NE 18th Street Coalition will be incorporated into our public involvement – from the beginning of the project including the development of the engagement plan.
- To give citizens timely opportunities to comment upon various aspects of the Project as the work progresses
- To provide information about public attitudes and issues related to the Project
- To facilitate public meetings and provide logical and easily understood information to the public
- To define and implement an ongoing public information program directed toward an outreach effort which will answer questions and provide a direct link between the community and the technical data created by the consulting team

The following Neighborhood Associations are located along the project corridor:

- Burton Evergreen
- Landover Sharmel
- North Garrison Heights
- Fircrest
- North Hearthwood
- Emerald Landing
- First Place
- Cimarron
- Countryside Woods

Subtask 5.3 Communication & Outreach Material Development

Also included in the process will be the dissemination of project information to the general public, businesses, neighborhood groups, partners and community champions. The consultant will also work with the City to write, design and distribute material to promote engagement events and opportunities to speak directly to the project team. Public information and promotional material may include a mix of:

- Community mailings corresponding to and notifying the community of outreach events.
- A comment form shall be included with each mailing and/or be provided at engagement events.
- A final mailing shall give information to the public regarding the outcome of engagement events and shall include the anticipated final design and construction schedule.
- Press releases for the Project.
- Project fact sheet(s) and/or project area signage.
- The open houses and community engagement activities shall be well-publicized through City-owned channels, including news releases, social media, the project website, newsletters signage or flyers.

Web Page and Electronic Communications: The Consultant shall provide Project information to the City (using the City's format) for a Project web page linked to the City's website. The Project specific page will include the Project schedule, process steps, committee information, issues gathered and information about the design as it develops. This site will be updateds throughout the design process, keeping the public informed as the project progresses through key design milestones. The consultant will provide content for the City to publish on the website.

Subtask 5.4 Engagement Activities & Coordination

Interested and potentially impacted parties as well as the broader Vancouver community will be invited to participate in the preliminary design and the environmental evaluation process.

Project Advisory Group

- In close collaboration with the City, the consultant will support the recruitment, set up, communications with and management of a project advisory group.
- The group shall meet throughout the design phase of the project in advance of key design milestones.

Public Outreach Events

- Arrange and facilitate up to three (3) Project open houses. These meetings shall follow the format of an open house and shall be held in the Project area in order to foster a partnership approach and to enhance Project credibility. The first open house shall be held at the beginning of the preliminary design process. The purpose of the first open house will be to introduce the Project to the public,

listen to concerns and gather information relative to issues which need to be addressed.
    - The second open house may be held at the 60% design completion. The purpose of the second open house will be to present and discuss the proposed alignment and design choices and to receive public feedback.
    - The third open house may be held at completion of the design. The purpose of the third and final open house will be to present the proposed design, answer questions about the design, environmental impacts and proposed mitigation and other matters of interest to citizens.
- Identify and execute a mix of in-person or virtual opportunities to engage with the community and increase project awareness. These activities include:
    - Small group meetings/briefings to provide project updates
    - Project area canvassing
    - 1:1 meetings / interviews

Task 5 Deliverables

- Public Engagement input on project design schedule & schedule updates
- Draft and final Public Engagement Plan
- List of Interested & Potentially Impacted Parties
- Preparation, facilitation, and attendance of up to two consultant public engagement specialists at public outreach activities and events
- Day-of event materials such as sign-in sheets, presentation, displays/engagement posters and comment forms as needed (one electronic copy plus hard copies for the meeting)
- Fact Sheets / Notices
- Meeting Minutes
- Newsletter Insert
- Social Media Content and Supporting Visuals
- Press Releases
- Web Page Messaging, Supporting Visuals and Updates
- Draft and final public engagement reports (up to three) at key project milestones

Task 5 Assumptions

- Public engagement services listed in this scope of work covers anticipated work through project design and does not include construction coordination services.
- Assumes 24 months of active work and a contingency for an additional six months.

- All deliverables assume one round of review by the City.
- Task 5.1 Assumes participation and prep for one project kickoff meeting
- Task 5.1 assumes monthly City and consultant team meetings + prep material and comms
- Task 5.1 Assumes bi-weekly consultants-only team meetings + prep material and comms
- Task 5.1 Assumes Consultant will have two public involvement staff at project meetings identified for this task
- Task 5.2 Assumes the City will provide any additional available information regarding minority and low-income communities, and any known stakeholders or partners that should be engaged in the outreach process
- Task 5.3 Assumes the City Public Works Communications will respond to all media inquiries and serve as the public information officer for this project
- Task 5.3 Assumes the City Communication Relation Staff (CRS) will distribute press releases
- Task 5.3 Assumes the consultant will provide print-ready digital file of all communications and outreach material to the City, and the City will handle all printing and distribution
- Task 5.3 Assumes the City will accept and respond to all media requests
- Task 5.3 Assumes all communications to be approved by City Public Works Communications
- Task 5.3 Assumes up to three press releases
- Task 5.3 Assumes Consultant will provide messaging and supporting visuals and the City will create, maintain and host the website with its own web-hosting capabilities
- Task 5.4 Assumes the City will staff all potential tabling events
- Task 5.4 Assumes the Consultant will identify and secure an appropriate venue (location) for the open houses/in-person activities. Venue fees, if any, will be paid and approved by the City.
- Task 5.4 Assumes The City will provide key staff to attend the open houses.
- Task 5.4 Assumes alternative language contact number(s) for inclusion in promotional material to be provided by the City.
- Task 5.4 Assumes catering coordination and costs to be covered by the City.

TASK 6: DESIGN ENGINEERING SERVICES DURING CONSTRUCTION

Note this Project does not have construction funding at this time therefore Task 6 services will be scoped but may not be used due to funding constraints. If the City

receives funding for this project these services will be added to the contract via an amendment.

The Consultant during the construction of the Project shall provide limited bidding and engineering services. The anticipated construction engineering services are described as follows:

Pre-Bid Opening Responsibilities: The Consultant shall respond to questions from prospective bidders and city staff before bid opening in reference to the bid package.

Preconstruction Conference: The City will provide notification of the preconstruction conference, provide location for the meeting, lead the preconstruction conference and prepare meeting minutes. The Consultant shall attend and participate in the preconstruction conference.

Construction Contract Administration: The Consultant shall provide limited administration of the contract during construction of the Project that may include:

- Assisting the City by acting as a liaison with the Consultant, design team, appropriate agencies, property owners and utility franchises.
- Participating in Project meetings. Assume (6) meetings.
- Responding to Requests for Information (RFIs), plan interpretation and/or changes.
- Assisting the City in the preparation, negotiation and settlement of change orders.

Review Submittals: The Consultant shall review submittals that may include shop drawings, samples, traffic control plans, test reports and other data submitted by the Construction Consultant for compliance with the information required by the contract documents.

Monitor Permit Requirements: The Consultant shall monitor permitting issues during construction, which are impacted by the evolving situation with the new listings of threatened and endangered species and designated critical habitat within the Project area. The BA's prepared for the Project includes evaluations of both proposed critical habitat and candidate species. These listing and designation issues may be resolved creating changes in Project affects. In addition, over the course of the construction it is necessary to ensure that no new proposed listings have occurred for species within the Project area. This includes monitoring and identifying permitting changes during construction and does not cover the potential permitting needs associated with

modification of design implementation through changes in impact areas or construction timing.

Task 6 Deliverables

- Answer pre-bid questions
- Attend preconstruction conference
- Provide limited construction contract administration
- Review construction contract submittals
- Monitor permit requirements

CITY DELIVERABLE TO THE CONSULTANT

Sample Projects: The City will provide copies of sample City Projects, environmental documentation, and design guidelines. The City will also provide electronic files of title blocks, ortho and aerial drawings and standard details for streets, traffic signal, street lighting and other available details.

Project Coordination: The City will assist the Consultant in managing relationships with other jurisdictions involved in the Project, adjacent property owners and the public. The City will provide staff to meet and discuss the Project with the Consultant as needed. The City will provide written comments pertaining to the design submittals.

Survey Work and Preliminary plans: The City will provide survey data, digital terrain modeling and alignment information to the Consultant in AutoCAD format. The City will provide the Consultant with a preliminary design for the Project.

Right of Way (ROW)

- The City will prepare ROW plans, exhibits and legal descriptions.
- The City will acquire all ROW and easements necessary for the construction of the Project.

Right of Entry Permits: The City will obtain the right of access to private parcels for all Project developments. The Consultant shall coordinate access.

Pavement Design: The City will select the pavement type and structural sections based on the pavement recommendation provided by the Consultant.

Utility List: The City will provide the Consultant with a list of local contacts for utilities within the Project limits. Design and plan preparation for the addition or relocation of utilities within the Project limits will be done by others.

Water and Sewer Design: The City will provide information regarding the size and materials for the consultant to design water and sewer plans and specifications.

Street Light and Traffic Signal Requirements: The City will provide the illumination type, the minimum illumination levels and uniformity ratios to be used in the Project design. The City will also provide traffic signal design concepts, standards, and policies, including traffic interconnect schemes, as needed.

City Deliverables

- Sample projects
- Project Coordination
- Survey work and preliminary plans
- Right of Way plans, exhibits and legal descriptions
- Right of Entry Permits
- Pavement type & structural sections selection
- Utility List
- Water and Sewer Design
- Street light and Traffic Signal Requirements

CITY OF Vancouver WASHINGTON

Staff Report: 108-26

To: Mayor and City Council
From: City Manager
Date: June 1, 2026

Subject
Contract Amendment - Increase the Maximum Expenditures for State of Washington DES 00819: Fleet Card Services - C-100675

Key Points

- The City contracts with WEX Bank under Contract C-100675 for purchasing fuel and EV charging.
- Purchases from this contract would exceed the current purchasing threshold of $300,000.
- This contract is set to expire on December 31, 2027.

Strategic Plan Alignment
Transportation and Mobility – a safe, future-ready and convenient transportation system.

Present Situation
WEX fuel cards provide city departments with flexibility to purchase fuel and electric vehicle charging when fleet vehicles are operating outside the City or when vehicles are unable to return to one of the City's fueling sites. In the event of a fuel supply disruption or catastrophic emergency, these cards also provide a critical contingency resource, allowing continued access to fuel and EV charging allowing vehicles to remain in service until normal fueling and charging operations are restored.

Advantage(s)

1. This contract allows for purchasing fuel and EV charging at participating fuel stations nationwide.
2. The approval for continued use of this contract will enable Fleet Services to take advantage of this contract's competitive pricing and rebates.

Challenge(s)
None

Budget Impact
The City will utilize the contract for purchasing fuel and EV charging and will stay within the current authorized budget.

Prior Council Review
None

Action Requested

On Monday, June 1, 2026, authorize the City Manager, or designee, to finalize and execute a contract amendment with WEX Bank to increase the current maximum approval from $300,000 to $600,000. The amended amount would be used to purchase fuel and EV charging.

State of Washington Contracts & Procurement Division – Internal Contracts Department of Enterprise Services P.O. Box 41411 Olympia, WA 98504-1411	**NASPO VALUE POINT MASTER AGREEMENT AMENDMENT**	
	Contract No.:	00819
WEX Bank 111 East Sego Lily Drive, Suite 250 Sandy, UT 84070	Amendment No.:	1
	Effective Date:	April 1, 2024

FIRST AMENDMENT
TO
NASPO VALUEPOINT MASTER AGREEMENT NO. 00819
FLEET CARD SERVICES

This First Amendment ("Amendment") to NASPO ValuePoint Master Agreement No. 00819 is made and entered into by and between the State of Washington acting by and through the Department of Enterprise Services, a Washington State governmental agency ("Enterprise Services") and WEX Bank, a Utah Corporation ("Contractor") and is dated and effective as of April 1, 2024.

R E C I T A L S

A. Enterprise Services and Contractor (collectively the "Parties") entered into that certain NASPO ValuePoint Master Agreement No. 00819 dated effective as of October 1, 2020 ("Contract").

B. The Parties now desire to amend the Contract, to clarify defined terms, replace subsection 8.1, and insert additional exhibits "H" and "I" as specified herein.

C. The amendment set forth herein is within the scope of the Contract.

A G R E E M E N T

NOW THEREFORE, in consideration of the mutual covenants and agreements set forth herein, the Parties hereby agree to amend the Contract, as follows:

1. CLARIFICATION OF DEFINED TERMS.
   a. The definition of "File Turn" set forth in "Exhibit F" is hereby deleted and replaced with:

      "File Turn", "File Turn Days" or "file turn days" (as the case may be): the number of days from the date an invoice is generated to the date that such invoice is paid in full, and this change is effective October 1, 2020.

   b. The definition of "National Annual Volume Incentive" set forth in "Exhibit F" is hereby deleted, as such term is defined and clarified within "Exhibit B" and this change is effective October 1, 2020.

2. CONTRACTOR SALES REPORTING; ADMINISTRATIVE FEE; & CONTRACTOR REPORTS. Subsection 8.1 is hereby removed in its entirety and replaced with the following:

   8.1. NASPO VALUEPOINT ADMINISTRATIVE FEE. Contractor shall pay to NASPO ValuePoint, or its assignee, a NASPO ValuePoint Administrative Fee of one-quarter (1/4 or 25%) of one basis point (0.0025% or 0.000025) of the National Annual Volume no later than sixty (60) days following the end of each calendar quarter. The NASPO ValuePoint administrative fee is not negotiable. This fee may not be adjusted in any Participating Addendum. This fee is to be included as part of the pricing submitted with the bid.

3. ADDITION OF EXHIBIT H
   a. The attached Exhibit H "EV Charging En Route Solution Enrollment Form" is hereby added as Exhibit H of the Contract.

4. ADDITION OF EXHIBIT I
   a. The attached Exhibit I "Home EV Charging Reimbursement Solution Enrollment Form" is hereby added as Exhibit I of the Contract.

5. NO CHANGE OTHER THAN AMENDMENT. Except as amended herein, the Contract is unaffected and remains in full force and effect.

6. INTEGRATED AGREEMENT; MODIFICATION. This Amendment constitutes the entire agreement and understanding of the Parties with respect to the subject matter and supersedes all prior negotiations and representations. In the event of any conflict between this Amendment and the Contract or any earlier amendment, this Amendment shall control and govern. This Amendment may not be modified except in writing signed by the Parties.

7. AUTHORITY. Each party to this Amendment, and each individual signing on behalf of each party, hereby represents and warrants to the other that it has full power and authority to enter into this Amendment and that its execution, delivery, and performance of this Amendment has been fully authorized and approved, and that no further approvals or consents are required to bind such party.

8. ELECTRONIC SIGNATURES. An electronic signature of this Amendment or any other ancillary agreement shall be deemed to have the same legal effect as delivery of an original executed copy of this Amendment or such other ancillary agreement for all purposes.

9. COUNTERPARTS. This Amendment may be executed in one or more counterparts, each of which shall be deemed an original, and all of which counterparts together shall constitute the same instrument which may be sufficiently evidenced by one counterpart. Execution of this Amendment at different times and places by the parties shall not affect the validity thereof so long as all the parties hereto execute a counterpart of this Amendment.

EXECUTED AND EFFECTIVE as of the day and date first above written.

GOVERNMENT -- EV CHARGING EN ROUTE SOLUTION
ENROLLMENT FORM

This En Route EV Charging Solution Enrollment Form ("**Enrollment**") is submitted by the entity listed below ("**Company**"). Upon WEX Bank's ("**Issuer**") approval of Company's enrollment, this Enrollment will govern the provision of the Solution (as defined hereunder) by Issuer to Company, and will incorporate the terms of the Business Charge Account Agreement between Company and Issuer ("**Agreement**"). The Company and Issuer are referred to individually as a "**Party**" and jointly as the "**Parties**". Capitalized terms used in this Enrollment that are not otherwise defined shall have the meanings set forth in the Agreement.

Company Name:	
Company Address:	City/State/Zip:
☐ New Customer	☐ Existing Customer Account Number:
☐ Tax Exempt Organization	

EV CHARGING EN ROUTE SOLUTION ("SOLUTION")

Company wishes to enable Card acceptance or payment via an Authorized Payment Device (defined below) at certain electric vehicle ("**EV**") charging stations operated by charge point operators participating in the WEX Inc. card network (each, a **"CPO Merchant"**) pursuant to the terms set forth in this Enrollment and the terms of the Agreement.

FEES, BILLING, AND PAYMENT

EV Enabled Card Fee. The Company will pay a **monthly fee of $5.00** (the "**EV Fee**") for **each** Card that is enabled for Transactions at EV charging stations. The EV Fee applies for each Card enabled on any day of a given calendar month.

Authorized Payment Device Replacement Fee. Company will be provided one radio frequency identification (RFID) device to use as an Authorized Payment Device (as defined below) for each enabled Card at no additional cost. If an RFID device needs to be replaced, an additional RFID device will be provided and Company will be charged $10.00 per additional RFID device, with the original RFID to be disabled.

Payment Terms. Billing for purchases made with an Authorized Payment Device shall be pursuant to the terms of the Agreement.

No Rebates. Any purchases made through use of an Authorized Payment Device shall not be eligible for any Rebate provided under the Agreement.

TERMS AND CONDITIONS

1. **Solution Description.** Pursuant to the terms of this Enrollment and the Agreement, Company will use an Authorized Payment Device to purchase EV charging from CPO Merchants. An "**Authorized Payment Device**" means any RFID device, a physical form of payment or a mobile application, in any case specified and provided by Issuer. Subject to completing the request in section 2.1, Company authorizes Issuer to connect an EV-enabled Card to an Authorized Payment Device to initiate and complete purchases from CPO Merchants. All terms and conditions of the Agreement applicable to "Cards" or to Transactions using a Card shall also apply to the Authorized Payment Devices and Transactions using an Authorized Payment Device, except to the extent expressly set forth otherwise in this Enrollment.

2. Company Responsibilities

2.1 Upon acceptance and approval of this completed Enrollment by Company, Issuer will enable one or more Cards designated by Company for use for purchases from CPO Merchants. Upon such enablement by Issuer, any individual that uses the Authorized Payment Device linked to that Card shall be considered an "**Authorized EV Charging User**." Company may add or change Cards or Authorized EV Charging Users, or request additional RFID devices in the online portal.

2.2 Company will comply with, and shall ensure all Authorized EV Charging Users to comply with, any reasonable instructions provided by Issuer or the applicable CPO Merchant pertaining to use of EV charging, the EV charging station equipment and related applications, any mobile applications intended for use with the Solution, and any Authorized Payment Devices.

2.3 ChargePoint Charging. This section applies if Company or Authorized EV Charging Users purchase EV charging or related products and services from ChargePoint and its network operators. The Authorized Payment Device provided to Company or any Authorized EV Charging User may include or utilize services, software and/or other proprietary materials of ChargePoint, Inc. ("**ChargePoint**") in connection with Company's or any Authorized EV Charging User's accessibility to electric vehicle charging services provided via ChargePoint and its network (collectively, "**ChargePoint Technology**"). Company hereby represents and warrants that its use and/or any Authorized EV Charging User's use of any of the Charge Technology shall be governed by and subject to the following: (i) ChargePoint Terms of Service (found at: https://na.chargepoint.com/terms_mobile?instance=NA-US&country_id=233&locale=en) (collectively, "**ChargePoint Terms**"); and (ii) ChargePoint,

as a third-party beneficiary with respect to the ChargePoint Terms, shall be entitled to enforce any of the ChargePoint Terms against Company with regards to Company's use or any Authorized EV Charging User's use of the ChargePoint Technology.

With sole respect to the Enrollment, the following Special Terms apply if a Company is a state or local government entity ("**Special Entity**") and only to the extent that any offerings provided under the Enrollment are being used in a Company's official capacity as a state or local government entity ("**Special Purpose**"). In the event of any conflict or inconsistency between the Enrollment terms, including the ChargePoint Terms of Service for ChargePoint® Accounts and the Special Terms, the following Special Terms shall prevail for the Special Purpose.

Special Terms:

I. Governing law and venue shall be those of the respective state of the Special Entity;
II. Limitation of liability terms in the Enrollment terms shall not apply to the Special Entity;
III. Indemnification terms in the Enrollment terms shall not apply to the Special Entity; and
IV. Arbitration terms in the Enrollment terms shall not apply to the Special Entity.

2.4 Company will immediately notify Issuer when an Authorized EV Charging User leaves the Company, retires or is absent for an extended period of time.

3. Issuer Responsibilities. Upon receipt of a request in the online portal to enable a Card for EV charging, Issuer will enable the applicable Account for EV charging and provide an Authorized Payment Device if requested by Company. Upon enablement of the Account, Company may use a mobile application designated by Issuer for EV charging upon downloading and/or updating the mobile application, as applicable. If an Authorized EV Charging User already has access rights to use EV charging with an CPO Merchant, Issuer may "link" preexisting account information. Use of a mobile application may be subject to additional terms and conditions as set forth in the relevant application. Company must comply and must ensure that its Authorized EV Charging Users comply with the policies and terms of use posted on such mobile applications or otherwise provided to Company by Issuer.

4. Data Collection and Usage

4.1 Issuer owns all data collected by or on behalf of Issuer in connection with Company's use of the Solution, including but not limited to transactional data collected at EV charging stations. Any feedback provided by Company in connection with its use of the Solution shall be owned by Issuer, including any suggested improvements to the Solution.

4.2 Activation of an Authorized Payment Device may require Issuer to share certain Company and Authorized EV Charging User information with the applicable CPO Merchant, including contact information, VIN information and usage associated with Company's Account. Additionally, for Cards issued with the name of an Authorized EV Charging User, Issuer may ask for personally identifiable information from the Authorized EV Charging Users and may share this information with the applicable CPO Merchant in order for it to provide and support services related to the access to and provision of the Solution.

5. Controls. The application of any Controls may not be available for purchases on an Authorized Payment Device when an RFID is used and Company agrees to be liable for purchases made with a CPO Merchant even if a Control has been exceeded for any Transaction. Subject to the terms of the Agreement, Company remains liable for all EV charging session fees billed to its Account.

6. Term; Termination. The term of this Enrollment will commence on the date this signed Enrollment is submitted to Issuer ("**Enrollment Effective Date**") and will continue on an ongoing basis until either Party terminates as set forth in this section. Either Party may terminate this Enrollment at any time for any reason upon thirty (30) days' prior written notice to the other Party, provided that Company will not be entitled to a refund of any EV Fees paid and must pay all amounts due through the effective date of termination. Issuer may also suspend usage of any Authorized Payment Device in its sole discretion, including if it reasonably believes it is being used for any unauthorized or fraudulent purpose. Upon termination of this Enrollment, Company shall return all Authorized Payment Devices to Issuer within 30 days of the effective date of termination.

7. Miscellaneous. This Enrollment will also be subject to and governed by the Agreement and any subsequent amendments, modifications, or replacements thereto. If there is any conflict between the provisions in this Enrollment and the provisions in the Agreement, the provisions in this Enrollment shall prevail but only with respect to the Solution. Issuer may modify the terms and conditions of this Enrollment, including any applicable fees, pursuant to the terms of the Agreement. No course of dealing between the Parties will be construed as a waiver of any breach or right, and no waiver of any breach or right arising under this Enrollment will be effective unless consented to in writing in the form of an amendment signed by both Parties, nor shall it be construed as a waiver of any breach or right subsequently. This Enrollment may be executed electronically.

The undersigned hereby executes this Enrollment on behalf of Company as an authorized representative of Company. Company understands that Company's participation in the Solution is subject to acceptance by the approval of Issuer. Upon such approval, which may be evidenced by Issuer's commencement of services, the terms and conditions above, in addition to the relevant terms of the Agreement, shall govern the provision of services and products hereunder.

IN WITNESS WHEREOF, Company agrees to comply with the terms and conditions of this Enrollment.

Exhibit I

HOME EV CHARGING REIMBURSEMENT SOLUTION

ENROLLMENT FORM

This Home EV Charging Reimbursement Solution Enrollment Form ("**Enrollment**") is submitted by the entity listed below ("**Company**"). Upon Issuer's approval of Company's enrollment, this Enrollment will govern the provision of services by WEX Inc. ("**WEX**") and Issuer to Company, and will incorporate the terms of the Business Charge Account Agreement between Company and WEX Bank ("**Agreement**"). WEX Inc. shall be the service provider of the services provided pursuant to these terms unless otherwise specified.

Company Name:	
Company Address:	City/State/Zip:
☐ New Customer*	☐ Existing Customer Account Number:
☐ Tax exempt organization	

***If New Customer this enrollment form must be accompanied by the applicable account application and agreement**

OVERVIEW

Company has employees, each of which may be a "**Designated Driver**" (as defined below) who from time to time will initiate electric vehicle charging ("**EV Charging**") on an electric vehicle ("**EV**") through use of EV Charging equipment located at the residence of the Designated Driver. Company would like WEX and/or WEX Bank (also referred to as "**Issuer**") to (i) capture the EV Charging session data; (ii) calculate the amounts to pay the Designated Driver for an EV charging session; and (iii) make payments to the Designated Driver in amounts specified by the Company.

FEES

Subscription Fee. As a participant in the Program, the Company will be charged a **monthly $12.00** fee for **each Designated Driver** for the following services provided by WEX:

- Utilize the WEX Online portal to initiate account creation for Designated Drivers to be paid EV Charging Costs for Charging Sessions
- Calculate recommended EV Charging Costs for each Charging Session
- Mobile applications for Designated Drivers to set up accounts to support the calculation and receipt of EV Charging Costs

Card-related Fees. The following fees and fee exemptions will be charged to Company for services provided by WEX Bank and will apply with respect to activity on card accounts issued to Designated Drivers:

Type		
Load Fee	$waived	Fee per load to each card- ***Paid by Company***
Instant Issue Card Packet Fee	$waived	Fee per instant issue card packet ordered- ***Paid by Company***

Cardholder-paid fees that apply to all cardholder activity are set forth in **Table 1**.

TERMS AND CONDITIONS

DEFINITIONS. Unless otherwise specified in the Agreement, capitalized terms used in these terms shall have the following meanings**:**

"Card" means the prepaid card issued by Issuer to a Designated Driver onto which funds will be loaded at the direction of Company for payment of EV Charging Costs.

"Charging Session" means the EV charging session completed at the Residence of the Designated Vehicle.

"Charging Session Authorization" means the authorization provided by the Designated Driver to: (i) the CPO that instructs the CPO to share all Charging Session Data with WEX; or (ii) to WEX that it has the rights to access the Charging Session Data from the CPO.

"Charging Session Data" means all data provided by CPO (or a third party designated by WEX) to WEX in connection with a Charging Session.

"CPO" means the third-party supplier of the EV Charging equipment located at the Residence that collects Charging Session Data and provides other EV Charging related services to the Designated Driver.

"Designated Driver" means an employee of the Company who has been designated by Company to be paid EV Charging Costs for Charging Sessions in accordance with the terms of this Enrollment and has been setup to receive EV Charging Costs in accordance with the terms of this Enrollment, including being issued a Card.

"Designated Vehicle" means the EV specified by Company in the setup for which a Designated Driver may claim EV Charging Costs.

"EV Charging Costs" means the amounts specified by the Company to be paid to the Designated Driver.

"Program" means the Home EV Charging Reimbursement Solution which is the provision of services by WEX and WEX Bank as set forth in this Enrollment.

"Residence" means the Designated Driver's residence where the EV Charging equipment is located.

"Utility" means the Designated Driver's electricity provider at the Residence.

EFS MASTERCARD CARD ACCOUNTS. Under the Program, Designated Drivers will be issued Cards funded by Company to reimburse Designated Drivers for their EV Charging Costs.

Once funds are loaded to an EFS MasterCard card account, for purposes of this Program, ownership of the funds transfers from Company to the applicable Designated Driver. Accordingly, Company may not dictate to Issuer the disposition of such funds, and Issuer may restrict Company's ability to see transaction activity, balances, or any other activity specific to the Designated Drivers' EFS MasterCard card account.

COMPANY RESPONSIBILITIES. Company must set up an account for each Designated Driver within WEX Online and must specify information for each Designated Driver as requested by WEX which at a minimum shall include: Name, email, residence address, including zip code, telephone number, and Designated Vehicle**.** Each Designated Driver must: (i) complete any documentation required to use the Card; and (ii) download (a) the WEX DriverDash mobile application or update the application if already used by the Designated Driver; (b) the WEX PayControl mobile application; and (c) the applicable CPO mobile application, activate the EV charger, and indicate that charging sessions must be shared with WEX.

Upon review of the recommended EV Charging Costs for each Charging Session, Company shall indicate whether the recommended EV Charging Costs are "approved" or "denied" through use of the process set up in WEX Online. Designated Drivers will be able to indicate whether a Charging Session is for personal or professional use; however, during the Pilot this option will not be available.

Company shall deposit the funds due to Designated Drivers into an account designated by Issuer ("**Issuer Controlled Account**") by wire transfer or ACH transfer or other means approved in advance by Issuer. Company shall transfer funds into the Issuer Controlled Account, for the purpose of disbursing funds to the Designated Driver Cards. Company shall provide, in the format specified by Issuer, the identity of, and the amount of such funds due to, each Designated Driver ("**Disbursement Detail**"). Company acknowledges that Issuer will make funds available to Designated Drivers commencing on the business day Issuer receives cleared funds and the corresponding Disbursement Detail. Issuer shall not have any obligation to make any funds available to Designated Drivers for whom the Disbursement Detail is missing or incomplete or if Issuer's records indicate that insufficient funds are available to complete a transaction. Company shall be able to make instant loads to Cards as needed with no requirement for a minimum balance to be maintained in the account, except that Company must maintain sufficient funds in the Issuer Controlled Account to cover the disbursements that it is directing Issuer to make to Designated Drivers.

ENROLLMENT MATERIALS. The Enrollment Materials include, without limitation, the Short Form Disclosure, Cardholder Agreement, a Card and any disclosures provided by Issuer or as may be required by applicable law and regulation.

Company represents and warrants that all payment data submitted to Issuer and WEX in connection with Designated Drivers and the Program is true, accurate and complete, and is sufficient to enable Issuer to allocate the funds among the various Designated Drivers and honor withdrawal requests by Designated Drivers. Company confirms that Issuer and WEX may rely on such data without any obligation to verify it.

Company shall comply with applicable law and card network rules in connection with its obligations under the Agreement. Company represents and warrants that it shall not use the Program, and shall use its best efforts to prevent itself from being used, for any illegal purpose or activity, including without limitation, money laundering.

Company shall keep records of all transactions and activities performed under this Enrollment for a period of not less than six (6) years after the expiration or termination of this Enrollment.

Where the Designated Driver is using any EV Charging equipment, services, software and/or other proprietary materials provided by ChargePoint Inc. ("**ChargePoint**") for EV Charging Sessions (collectively, "ChargePoint Technology"), Company hereby represents and warrants that each Designated Driver shall agree to the following terms (to be provided during the setup or update of the DriverDash application):
(i) ChargePoint Privacy Policy (found at: https://na.chargepoint.com/privacy_policy); (ii) ChargePoint Terms of Service (found at: https://na.chargepoint.com/terms_mobile?instance=NA-US&country_id=233&locale=en); and (iii) ChargePoint Connection: (found at: https://na.chargepoint.com/connection_tnc?instance=NA-US&locale=en-US&region_code=NA-US&company_id=192871&company=WEX). (collectively, "**ChargePoint Terms**") ChargePoint, as a third-party beneficiary with respect to the ChargePoint Terms, shall be entitled to enforce any of the ChargePoint Terms against Company with regards to any Designated Driver's use of the ChargePoint Technology.

ISSUER RESPONSIBILITIES. Except for services provided directly by WEX to the Company, Issuer shall provide or contract for all such functions and services necessary to, create, operate and administer the Program including but not limited to, account set up and enrollment assistance for all Designated Drivers. Issuer shall grant user-level access to Company and Designated Drivers to the systems used to support the Program.

Issuer shall comply with applicable law and, as applicable, card network rules in connection with its obligations under the Agreement.

WEX RESPONSIBILITIES. In addition to the provision of certain services provided to Issuer to support its operation and administration of the Program, WEX shall provide certain services directly to Company as set forth below.

WEX shall confirm that the Designated Driver Authorization has been set up with the CPO so that WEX can receive Charging Session Data for that Designated Driver.

In order to calculate EV Charging Costs for a Charging Session, WEX must receive Charging Session Data from the CPO. Upon receipt of the Charging Session Data:

- if the "Utility Rate Option" is selected by Company, WEX calculates the recommended EV Charging Cost for a Designated Driver by reviewing the Charging Session Data and the applicable utility tariffs for the Residence at the time of each Charging Session, utilizing data collected by third parties. For the Utility Rate Option, WEX cannot guarantee the accuracy of the data collected by third parties when calculating the EV Charging Cost. WEX will provide utility rates gathered by such third parties upon request by the Company. To the extent that either WEX or Company identify any errors in the calculation, WEX shall update the calculation and notify Company and adjust any EV Charging Costs, as applicable.
- If the "Flat Rate Option" is selected by the Company, WEX will advise Company of the length of a Charging Session and Company will then designate a flat rate amount per kilowatt hour based on parameters provided by WEX in WEX Online to be used to calculate the EV Charging Costs for that Charging Session.
- To the extent that the Designated Driver indicates that any Charging Session is for personal use, WEX will reduce from the calculated amount.

The EV Charging Costs shall be displayed in WEX Online for Company to review and approve as set out above. Based on approvals provided by Company, WEX shall notify Company of the amount to be paid to Issuer.

WEX shall comply with applicable laws in connection with its obligations under the Enrollment.

FEES AND CHARGES. Company acknowledges that certain fees and charges are to be paid by Company and that other fees and charges are to be paid by Designated Drivers, and that the Designated Driver fees and charges will be set forth in the Cardholder Agreement statement that will be included in the Enrollment Materials. The current fees for: (i) Company are set forth above; and (ii) Designated Drivers are set forth in Table 1. Issuer reserves the right to change the Designated Drivers' fees with appropriate prior written notice to Designated Drivers.

TERM. The term of Customer's Enrollment will commence on the date of Customer's signature below and will continue for a period of twelve (12) months ("**Initial Term**") and shall automatically renew for annual terms (each a "**Renewal Term**") thereafter until terminated in accordance with this section. Any party may terminate this Enrollment at any time after the Initial Term for any reason upon sixty (60) days' prior written notice to the other party, subject to the payment of any damages as set forth below. Upon termination of this Enrollment, Company may cancel any agreement with a Designated Driver once all approved EV Charging Costs have been paid by Issuer to the Designated Driver. Either party may terminate this Enrollment upon thirty (30) days' prior written notice to the other party, if such party breaches or violates any provision of this Enrollment and any such default, breach or violation, as described in such notice with specificity and in

reasonable detail, is not remedied in all material respects within the applicable thirty (30) day notice period. This Enrollment will terminate automatically upon termination of the Agreement. If this Enrollment is terminated for any reason prior to the end of the Initial Term or any Renewal Term other than due to a default or breach by WEX or Issuer, Company must pay liquidated damages in the amount of the monthly fee for each month remaining in the Initial Term or Renewal Term, as applicable.

SYSTEM AND TRANSACTION MONITORING. Issuer reserves the right to monitor Card activity, and to refuse to issue a Card, cancel a Card previously issued to a Designated Driver or temporarily suspend usage of a Card due to actual or suspected fraudulent use, illegal use, or unauthorized use, and to comply with applicable law, card network rules, and bank safety and soundness requirements. Except as prohibited by applicable law, Issuer shall disburse to the Designated Driver any funds remaining on a canceled Card.

COMPLIANCE WITH LAWS. Issuer complies with federal law which requires all financial institutions to obtain, verify, and record information that identifies each Company or Designated Driver who opens an account. Issuer may ask Company or Designated Driver for the name, address, date of birth, and other information that will allow Issuer to identify the Company and/or Designated Driver. Company shall reasonably cooperate with Issuer in providing such information. Issuer reserves the right to not open an account or suspend an existing account as required for compliance with these rules.

Each Designated Driver shall be required to enroll in the Program by submitting certain information to Issuer, and his or her participation shall be contingent on Issuer's successful completion of its "know your customer" due diligence and other legal requirements. The terms and conditions governing the use of the Cards and the accounts associated with such Cards will be supplied by Issuer. Accounts shall be opened only for Designated Drivers that are residents of the United States and its territories.

As between the parties, Company is solely responsible for ensuring that its practices pertaining to the reimbursement of its employees comply with all federal, state, and local laws, including, without limitation, that use of the EFS MasterCard Card services for reimbursing employees is permissible in the jurisdictions in which Company operates. Company acknowledges and agrees that Issuer is not responsible and has not advised Company, regarding such compliance. Company hereby represents, warrants, and covenants to Issuer that (i) Company's reimbursement practices will comply with all applicable law, (ii) each employee agreeing to receive reimbursements on the EFS Mastercard Card is doing so voluntarily, and such agreement was not made a condition of such employee's employment, and (iii) that prior to the initial payment to a Designated Driver, Company has provided such Designated Driver with a copy of the Issuer's EFS Mastercard Cardholder Agreement. Company will indemnify, defend, and hold harmless Issuer and Issuer's officers, directors, employees, affiliates, and agents from any and all liability, losses, costs, fines, penalties or damages (including court costs and reasonable attorneys' fees) in the event of any third party claim (including any claim or enforcement action brought by any governmental entity) arising out of or relating to any breach by Company of the provisions of this paragraph.

TAXES. Company is responsible for any local, state, federal or foreign tax, fee, assessment, surcharge and/or penalty imposed, assessed or levied against or with respect to the EV Charging Costs or the services provided by WEX or the Issuer pursuant to this Enrollment. This includes the funding, remittance, and determination of the amount due for EV Charging Costs. In the event that WEX or Issuer is required to pay any such tax, fee, assessment, surcharge and/or penalty on behalf of Company, WEX or Issuer shall report the payment to Company along with documentation of the payment, and Company shall promptly reimburse WEX or Issuer (as applicable) for the full amount. This reimbursement would be in addition to the fees described above. The calculation of EV Charging Costs does not take any consideration as to what is a reimbursable cost by an employer to an employee for tax purposes. Further, the parties agree that neither WEX nor Issuer provides any legal, tax or accounting advice to Company. WEX and Issuer are at all times responsible for all the taxes based upon each of their net income and their property ownership.

DATA COLLECTION AND USAGE. Issuer, WEX, CPO merchants, and other third parties will collect data in connection with the provision of the Home EV Charging Reimbursement Solution including but not limited to transactional data collected during Charging Sessions. This transactional data and all other data that is collected in connection with the Home EV Charging Reimbursement Solution shall be owned by the applicable CPO, WEX and/or other third parties. Any feedback provided by Company in connection with its use of the Home EV Charging Reimbursement Solution shall be owned by WEX, including any suggested improvements to the Home EV Charging Reimbursement Solution. Activation of a Designated Driver may require WEX to share certain Company and Designated Driver information with the applicable CPO, including contact information. Additionally, WEX or Issuer may ask for personally identifiable information from Designated Drivers to activate the services provided under this Enrollment and may share this information with the applicable CPO and other third parties in order for WEX or Issuer to provide and support services related to the access to and provision of the Home EV Charging Reimbursement Solution.

MISCELLANEOUS. This Enrollment will also be subject to and governed by the Agreement and any subsequent amendments, modifications, or replacements thereto. If there is any conflict between the provisions in this Enrollment and the provisions in the Agreement, the provisions in this Enrollment shall prevail but only with respect to the products and services provided in this Enrollment. Issuer may modify the terms and conditions of this Enrollment, including any applicable fees, pursuant to the terms of the Agreement. No course of dealing between the Parties will be construed as a waiver of any breach or right, and no waiver of any breach or right arising under this Enrollment will be effective unless consented to in writing in the form of an amendment signed by both Parties, nor shall it be construed as a waiver of any breach or right subsequently. This Enrollment may be executed electronically.

The undersigned hereby executes this Enrollment on behalf of Customer as an authorized representative of Customer. Customer acknowledges and agrees that Customer's participation in this program is subject to the review and approval of Issuer. Upon such approval, which may be evidenced by WEX and/or Issuer's commencement of services, the terms and conditions above, in addition to the relevant terms of the Agreement, shall govern the provision of services hereunder.

IN WITNESS WHEREOF, Customer has executed this Enrollment as of the date set forth below.

TABLE 1

The following table shows cardholder-paid fees that will apply to all cardholder activity on the EFS MasterCard card accounts issued to Designated Drivers. Designated Drivers will be given notice of these fees via separate communication including through the Short Form Disclosure and Cardholder Agreement. References to "you" and "your" in the following table refer to the employee cardholder, and not to Company.

All fees	Amount	Details
Get started		
Activation enrollment fee	$0	
Monthly usage		
Monthly fee	$0	
Spend money		
Purchase (EFS merchant)	$0	To find an EFS merchant, use the EFS PayControl mobile phone application or call 1-888-824-7378.
Purchase (PIN authentication)	$0	Per purchase at a non-EFS merchant when you enter your PIN to complete a transaction.
Purchase (signature authentication)	$0	Per purchase at a non-EFS merchant when you give your signature to complete a transaction.
Merchant purchase decline	$0	Per attempted purchase transaction at a merchant terminal that is declined for insufficient funds.
Get cash		
Register an EFS check	$4	Per check when you obtain an authorization code to register an EFS check, by calling 1-888-824-7378 or visiting www.efsllc.com. Fee does not apply to first EFS check you register per pay period.
Cash an EFS check	$0	Per check when you cash an EFS check. This is our fee. You may be charged a fee by the party that cashes your EFS check.
EFS check void	$25	Per request to void an EFS check or if a balance remains on an uncashed check after 180 days from the date of registration.
EFS Network Cash	$1.50	Receive cash at a participating EFS merchant. To find an EFS merchant, use the EFS PayControl mobile phone application or call 1-888-824-7378.
Teller-Assisted Cash Withdrawal	$4	Withdraw funds at banks displaying the MasterCard Acceptance Mark. Fee does not apply to first teller-assisted cash withdrawal per pay period.
ATM withdrawal	$2	This is our fee. You may also be charged a fee by the ATM operator, even if you do not complete a transaction.
Surcharge Free ATM Withdrawal	$2	This is our fee. ATM withdrawals within the AllPoint ATM network are surcharge free from the ATM operator. Find AllPoint locations at www.allpointnetwork.com.
ATM withdrawal decline	$1	Per attempted ATM withdrawal or Surcharge Fee ATM withdrawal that is declined for insufficient funds.
Information		
ATM balance inquiry	$0	You may be charged a fee by the ATM operator, even if you do not complete a transaction.
Written account histories	$3	Per each written account history requested. Fee does not apply to first written account history request per calendar month.
Using your Card outside the U.S.		
International transaction	2%	Of the U.S. dollar amount of each purchase transaction.
Other		
Inactivity	$0	
Transfer funds from Card to your checking or savings account	$0	To make a transfer from your Card to your checking or savings account, call 1-888-824-7378 or visit www.efsllc.com.
Card replacement	$5	Per request for a replacement Card.
Card replacement shipping	$10 or $25	Based on whether a replacement Card is sent via standard (7-10 day) shipping or overnight shipping.
Request a copy of an EFS check	$5	Per request for a copy of an EFS check.

Your funds are eligible for FDIC insurance. Your funds will be held at or transferred to WEX Bank, an FDIC-insured institution. Once there, your funds, in the aggregate with any other deposits you maintain at WEX Bank, are insured up to $250,000 by the FDIC in the event WEX Bank fails, if specific deposit insurance requirements are met. See *fdic.gov/deposit/deposits/prepaid.html* for details.

No overdraft/credit feature.

Contact WEX Bank by calling 1-888-824-7378 or the number on the back of your Card, by mail at WEX Bank, c/o EFS Customer Service, 1104 Country Hills Drive, Suite 600, Ogden, UT 84403, or visit www.efsllc.com.

AMENDED AND RESTATED

COOPERATIVE PURCHASING MASTER AGREEMENT

NO. 00819

FLEET CARD SERVICES

For Use by Eligible Participating States

By and Between

STATE OF WASHINGTON
DEPARTMENT OF ENTERPRISE SERVICES

and

WEX BANK

Dated October 1, 2020

COOPERATIVE PURCHASING MASTER AGREEMENT

NO. 00819

FLEET CARD SERVICES

This Amended and Restated Cooperative Purchasing Master Agreement ("Master Agreement") is made and entered into by and between Enterprise Services acting by and through the State of Washington ("Enterprise Services") and WEX Bank, a Utah corporation ("Contractor") and is dated as of October 1, 2020.

RECITALS

A. Pursuant to Legislative authorization, Enterprise Services, on behalf of the State of Washington, is authorized to develop, solicit, and establish master contracts for goods and/or services to support Washington state agencies. *See* RCW 39.26.050(1); RCW 39.26.080(3). The Washington State Legislature has authorized Enterprise Services to make these master contracts available, pursuant to an agreement in which Enterprise Services ensures full cost recovery, to any other local or federal government agency or entity, any public benefit nonprofit organizations, or any tribes located in the State of Washington. *See* RCW 39.26.050(1) & (2).

B. The Washington State Legislature also has authorized Enterprise Services to participate in, sponsor, conduct, or administer certain cooperative purchasing agreements for the procurement of goods or services. *See* RCW 39.26.060(1). One of the approaches that Enterprise Services utilizes to participate in cooperative purchasing agreements with other states is NASPO ValuePoint.

C. NASPO ValuePoint is the cooperative contracting arm of the National Association of State Procurement Officials (NASPO). NASPO ValuePoint is led by state procurement officers from member states. NASPO ValuePoint does not award contracts, rather, it assists states, for an administrative fee, in their collaboration pertaining to solicitations and the resulting Master Agreements.

D. Pursuant to the NASPO ValuePoint cooperative purchasing model, a state serves as the 'lead state' to conduct a competitive procurement in compliance with that state's procurement laws and award a Master Agreement with a contractor for the specified goods or services. States (including the District of Columbia and the organized territories of the United States), including the lead state, then may participate in that Master Agreement by executing a Participating Addendum with the awarded contractor. Until a Participating Addendum is executed by the applicable state (a 'participating state'), no agency or other eligible organization (a 'purchasing entity') may utilize the products and services offered pursuant to the cooperative purchasing Master Agreement. Under Washington law, at the time of solicitation, states may provide supplemental substantive terms and conditions to inform the competitive procurement. In addition, pursuant to their Participating Addendum, states may require certain administrative terms and conditions (e.g., a vendor management fee for sales within the state, state registration and reporting). Contractor, however, has no obligation to condition execution of a Participating Addendum on substantive terms and conditions that were not competitively procured.

E. Enterprise Services, as a part of a cooperative purchasing competitive governmental procurement, with administrative support from NASPO ValuePoint, issued Competitive Solicitation No. 00719/00819 dated June 4, 2019 regarding Commercial Card Services, resulting

in two separate Cooperative Purchasing Master Agreements. Eleven (11) states indicated an intent to utilize the resulting cooperative purchasing Master Agreement.

F. Enterprise Services and a stakeholder team consisting of representatives from Washington, Oregon, California, Colorado, and Minnesota evaluated all responses to the Competitive Solicitation and identified Contractor as the Apparent Successful Bidder (ASB) Category 2 – Fleet Card Services.

G. Enterprise Services determined that entering into this Master Agreement will meet the cooperative purchasing needs and be in the best interest of the State of Washington.

H. The purpose of this Master Agreement is to enable Participating or Purchasing Entities to utilize Commercial Card Services – Fleet Card Services as set forth herein.

I. Enterprise Services and WEX Bank entered into an agreement for the products and services listed herein dated September 21, 2020 (the "Prior Agreement"), and now the parties desire to amend and restate the Prior Agreement in its entirety to modify and supplement certain terms and conditions for the purpose of clarifying the parties' original intent as of the time of the Prior Agreement.

J. For Participating States (or Participating Entities) that have already executed a Participating Addendum that references the Master Agreement, such Participating Addenda/Addendum shall be deemed to refer to this Amended and Restated Master Agreement.

AGREEMENT

NOW THEREFORE, in consideration of the mutual promises, covenants, and conditions set forth herein, the parties hereto hereby agree as follows:

1. TERM. The term of this Master Agreement starts on October 1, 2020 and ends on December 31, 2025; The Fleet Card services provided pursuant to this Master Agreement start January 1, 2021 and end on December 31, 2025; provided, however that, the contract term shall be extended for twenty-four (24) months if, in Enterprise Services' sole, reasonable judgement, Contractor meets the following performance metrics:

- Reports: Contractor provides timely and accurate reports as detailed in this Master Agreement and Participating Addendums; and
- Rebate: Contractor provides timely and accurate rebates as detailed in this Master Agreement and Participating Addendums.

Provided, further however, Contractor shall provide implementation and transition support to Participating States who wish to utilize the Master Agreement, beginning upon the Participating Addendum execution date so as to effectuate a smooth transition for Participating States and Purchasing Entities for Fleet Card services to start on January 1, 2021.

2. PARTICIPANTS. Use of this Master Agreement may be authorized by Participating States for use by Purchasing Entities as set forth herein.

2.1. PARTICIPATING STATES. For the purpose of this Master Agreement, a Participating State shall mean: any state, or U.S. territory (e.g., District of Columbia, Puerto Rico, etc.) ("State") that executes a Participating Addendum with the Contractor. Such Participating Addendum will authorize Purchasing Entities for such Participating State and must be executed by the chief procurement

officer for the applicable Participating State; *provided however*, that some States, with state authority to do so and permission from such state chief procurement officer, may authorize local governments, political subdivisions, and other entities to execute a Participating Addendum. Contractor may not provide Fleet Card Services under this Master Agreement until a Participating Addendum acceptable to the Participating State and Contractor is executed.

2.2. PURCHASING ENTITIES. For the purpose of this Master Agreement, a Purchasing Entity is any eligible entity authorized by a Participating State to participate in the Master Agreement (i.e. to purchase from the Master Agreement) pursuant to a Participating Addendum. Purchasing Entities may be required to execute a Card User Agreement (CUA) as outlined in this Master Agreement and shall be financially committed to the card account unless otherwise agreed to in the Participating Addendum.

2.3. PARTICIPATING ADDENDUM. For the purpose of this Master Agreement, a Participating Addendum is the document executed between a Participating State and Contractor that enables eligible Purchasing Entities to utilize the Master Agreement. The terms and conditions set forth in the Master Agreement are applicable to any Purchasing Entity except to the extent altered, modified, supplemented, or amended by a Participating Addendum. The Participating Addendum enables Participating States to specify state specific administrative terms and conditions to enable utilization of the Master Agreement. In no event shall a Participating Addendum change the material terms and conditions set forth in this Master Agreement. Contractor shall email a fully executed PDF copy of each Participating Addendum to PA@naspovaluepoint.org to support documentation of participation and posting in appropriate databases.

2.4. PARTICIPATING ADDENDUM CHANGES. Participating Addenda shall not be construed to amend the Master Agreement provisions pertaining to NASPO ValuePoint program requirements.

3. SCOPE – INCLUDED GOODS/SERVICES AND PRICE.

3.1. SCOPE. Pursuant to this Master Agreement, Contractor is authorized to provide only those goods and services set forth in *Exhibit A – Fleet Card Products* and *Exhibit G Fleet Card Requirements* and provide the Rebate/Incentive Share as set forth in *Exhibit B – Rebate/Incentive Share*. Contractor shall not represent to any Participating or Purchasing Entity under this Master Agreement that Contractor has contractual authority to provide any goods and services beyond those set forth in *Exhibit A – Fleet Card Products* and *Exhibit G Fleet Card Requirements*.

3.2. LEAD STATE'S ABILITY TO MODIFY SCOPE OF MASTER AGREEMENT. Subject to mutual written agreement between the parties, Enterprise Services reserves the right to modify the goods and services included in this Master Agreement; *Provided*, however, that any such modification shall be effective only upon thirty (30) days advance written notice; and *Provided further*, that any such modification must be within the scope of this Master Agreement.

3.3. INCENTIVE SHARE ADJUSTMENT. Incentive share and fees shall remain firm and fixed for the term of the Agreement. Enterprise Services reserves the right to negotiate a greater incentive share at any time during the life of the Agreement. A greater incentive share must be mutually agreed between the Parties. A Participating State may negotiate the specifics of the Incentive Share Component, but shall not exceed the total basis points offered by the Contractor.

3.4. PRICE CEILING. Contractor's Basis Points as set forth in this Master Agreement shall be fixed. Contractor's fees (e.g. overnight card delivery and international transactions) set forth in this

Master Agreement shall be the maximum fees Contractor may charge during the term of the Master Agreement.

3.5. MASTER AGREEMENT INFORMATION. Enterprise Services shall maintain and provide information regarding this Master Agreement, including scope and pricing, to the eligible Participating Entities.

4. CONTRACTOR REPRESENTATIONS AND WARRANTIES. Contractor makes each of the following representations and warranties as of the effective date of this Master Agreement and at the time any Card User Agreement (CUA) is placed pursuant to this Master Agreement and Participating Addendum. If, at the time of any such agreement, Contractor cannot make such representations and warranties, the Contractor shall not process any additional CUA and shall notify Enterprise Services, in writing, of such breach as soon as commercially reasonable but, in no event, later than ten (10) days after Contractor has knowledge of any such breach.

4.1. QUALIFIED TO DO BUSINESS. Contractor represents and warrants that it is in good standing and qualified to do business in the State of Washington and that, if required to by law, it will register with the Washington State Department of Revenue and the Washington Secretary of State, that it possesses and shall keep current all required licenses and/or approvals, and that it is current, in full compliance, and has paid all applicable taxes owed to the State of Washington. Contractor further represents and warrants that it will do the equivalent, to the extent required, for any Participating State for which it executes a Participating Addendum.

4.2. SUSPENSION & DEBARMENT. Contractor represents and warrants that neither it nor its principals or affiliates presently are debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in any governmental contract by any governmental department or agency within the United States.

4.3. WAGE VIOLATIONS. Contractor represents and warrants that, during the term of this Master Agreement and the three (3) year period immediately preceding the award of the Master Agreement, it is not determined, by a final and binding citation and notice of assessment issued by the Washington Department of Labor and Industries or through a civil judgment entered by a court of limited or general jurisdiction, to be in willful violation of any provision of Washington state wage laws set forth in RCW chapters 49.46, 49.48, or 49.52.

4.4. PAY EQUALITY. Contractor represents and warrants that, among its workers, similarly employed individuals are compensated as equals. For purposes of this provision, employees are similarly employed if the individuals work for the same employer, the performance of the job requires comparable skill, effort, and responsibility, and the jobs are performed under similar working conditions. Job titles alone are not determinative of whether employees are similarly employed. Contractor may allow differentials in compensation for its workers based in good faith on any of the following: a seniority system; a merit system; a system that measures earnings by quantity or quality of production; a bona fide job-related factor or factors; or a bona fide regional difference in compensation levels. A bona fide job-related factor or factors may include, but not be limited to, education, training, or experience, that is: consistent with business necessity; not based on or derived from a gender-based differential; and accounts for the entire differential. A bona fide regional difference in compensation level must be consistent with business necessity; not based on or derived from a gender-based differential; and account for the entire differential. Notwithstanding any provision to the contrary, upon breach of warranty and Contractor's failure to provide satisfactory evidence of compliance within thirty (30) days, Enterprise Services may suspend or terminate this Master Agreement and any Participating Entity hereunder similarly may suspend

or terminate its use of the Master Agreement and/or any Participating Addendum entered into pursuant to the Master Agreement.

4.5. EXECUTIVE ORDER 18-03 WORKERS' RIGHTS (MANDATORY INDIVIDUAL ARBITRATION). Contractor represents and warrants, as previously certified in Contractors bid submission, that Contractor does NOT require its employees, as a condition of employment, to sign or agree to mandatory individual arbitration clauses or class or collective action waivers. Contractor further represents and warrants that, during the term of this Master Agreement, Contractor shall not, as a condition of employment, require its employees to sign or agree to mandatory individual arbitration clauses or class or collective action waivers.

4.6. INTENTIONALLY DELETED.

4.7. INTENTIONALLY DELETED.

4.8. QUALITY OF GOODS AND SERVICES. Contractor represents and warrants that any goods and services provided pursuant to this Master Agreement, shall conform to this Master Agreement and Cardholder User Agreement, and shall be provided in full compliance with applicable law.

4.9. NO EFFECT OF ADDITIONAL TERMS AND CONDITIONS. Other than the terms and conditions listed in *Exhibit E - WEX Forms and Specific Terms & Conditions*, attached hereto, the terms of which shall govern the parties' relationship with respect to the relevant subject matter, Contractor represents and warrants that any Authorized Users agreement to "click through" or other terms and conditions shall not be binding and shall have no force or effect as to the Services of this Master Agreement or Participating Addendum, unless agreed to in writing between the parties. Without prejudice to first sentence of this Section 4.9, the parties agree that the terms and conditions listed in Exhibit E do not modify, amend or change the Master Agreement in any way and if there is a conflict between Master Agreement and any of the terms in Exhibit E, Master Agreement will govern. The parties agree that the "WEX Click Through Agreement" as set forth in Exhibit E shall apply with respect to any Purchasing Entity's use of the WEX website, notwithstanding anything to the contrary in the click-through terms and conditions that any Purchasing Entity shall click to approve in order to access such website.

4.10. PROCUREMENT ETHICS & PROHIBITION ON GIFTS. Contractor represents and warrants that it complies fully with all applicable procurement ethics restrictions including, but not limited to, restrictions against Contractor providing gifts or anything of economic value, directly or indirectly, to Participating Entity's employees. Contractor further represents and warrants that it will do the equivalent for any Participating State for which it executes a Participating Addendum.

4.11. WASHINGTON'S ELECTRONIC BUSINESS SOLUTION (WEBS). Contractor represents and warrants that it is registered in Washington's Electronic Business Solution (WEBS), Washington's contract registration system and that, all of its information therein is current and accurate and that throughout the term of this Master Agreement, Contractor shall maintain an accurate profile in WEBS.

4.12. STATEWIDE PAYEE DESK. Contractor represents and warrants that, prior to conducting any transactions under this Master Agreement, Contractor will register with Washington's Statewide Payee Desk, which registration is a condition to invoice payment for the State of Washington.

4.13. MASTER AGREEMENT PROMOTION; ADVERTISING AND ENDORSEMENT. Contractor represents and warrants that it shall use commercially reasonable efforts both to promote and market the use of this Master Agreement with eligible Participating Entities and ensure that those entities that utilize this Master Agreement are eligible Participating Entities. Contractor understands and acknowledges that neither Enterprise Services nor any Participating Entity are endorsing Contractor's goods and/or

services or suggesting that such goods and/or services are the best or only solution to their needs. Accordingly, Contractor represents and warrants that it shall make no reference to Enterprise Services, the State of Washington, or any Participating or Purchasing Entity in any promotional material without the prior written consent of Enterprise Services.

4.14. MASTER AGREEMENT TRANSITION. Contractor covenant that, in the event this Master Agreement or a similar contract, is transitioned to another contractor (e.g., Master Agreement expiration or termination), Contractor shall use commercially reasonable efforts to assist Enterprise Services for a period of nine (9) months to effectuate a smooth transition to another contractor to minimize disruption of service and/or costs to the State of Washington and all other Participating Entities.

5. USING THE MASTER AGREEMENT – ESTABLISHING A CARD USER AGREEMENT.

5.1. ESTABLISHING A CARD USER AGREEMENT (CUA). Purchasing Entities shall establish a Card User Agreement as described in Exhibit D or as modified by the Participating State's Participating Addendum in order to receive cards, establish access to the online system, and leverage any other goods and services from this Master Agreement.

5.2. EXTENSION OF CREDIT. Contractor in its sole discretion extends credit and establishes accounts for Purchasing Entities. Contractor may research the financial condition of any Purchasing Entity. If requested, Purchasing Entity agrees to furnish Contractor copies of its official and finalized financial statements or other applicable financial information no later than 120 days following the end of each of its fiscal years. The financial statements shall have been prepared, consistently year over year and shall be in accordance with the books and records of Purchasing Entity. Any financial information submitted shall be kept strictly confidential by Contractor.

(a) Purchasing Entities or any other entity or individual authorized by a Purchasing Entity to use an account opened pursuant to this Master Agreement or, as applicable, a Participating Addendum, or cards issued by Contractor pursuant to this Master Agreement or, as applicable, a Participating Addendum (each such entity or individual an "Account User") can make purchases up to the credit limit that is assigned by Contractor. The credit limit appears on the billing statement and can be monitored via WEXOnline®. Each Purchasing Entity shall not to exceed its credit limit. Contractor may change the credit limit without prior notice. Contractor will use its best efforts to provide advance notice of any changes to the credit limit. If Contractor is unable to provide advance notice, Purchasing Entity will receive notification promptly following any such change. If Contractor has previously permitted Participating Entity to exceed its credit limit, it does not mean that Contractor will permit Participating Entity to exceed its credit limit again.

(b) Contractor may suspend an account or refuse to authorize any transaction in its sole discretion and specifically in the event that: (i) any balance is past due more than 60 days (Purchasing Entity are contacted by WEX strategic receivables team prior to suspension. Should the authorized contact not respond, WEX strategic receivables will notify the Purchasing Entity's WEX premium fleet account manager to escalate concern to other contacts within that Purchasing Entity); and/or (ii) the amount of the transaction plus the outstanding balance (including transactions authorized but not yet posted) exceeds the credit limit. Contractor shall notify the Purchasing Entity prior to account suspension for past due balances or exceeding credit limits. Each Purchasing Entity shall, immediately upon request, pay the amount over the limit and any associated fees or the

entire balance due on the account. Nothing contained in this Master Agreement prevents Purchasing Entity or an Account User from requesting a modification of the credit limit.

5.3. ACCOUNTS AND ACCOUNT USERS.

(a) Purchasing Entity shall designate its Account Users as well as those contacts authorized to: (i) provide Contractor with the information necessary to establish and maintain Account(s), Cards, and DINs; (ii) provide vehicle, driver and other information; (iii) receive all Account numbers, Cards or reports; (iv) receive other Account information; and (v) select additional products and/or services that may be offered. Purchasing Entity will provide notice of any change or removal of any contact or Account User either in writing, by telephoning Contractor's customer service department or through Contractor's online system. Purchasing Entity remains liable for any unauthorized use until Contractor receives notice of any change in or removal of any Account User or contact. Contractor is authorized to take instruction from any Account User or contact with apparent authority to act on Purchasing Entity's behalf. Unless Purchasing Entity reports any errors in Account information or Cards, Contractor is entitled to rely on that information for servicing the Account.

(b) Purchasing Entity is responsible for notifying Contractor of any revocation of any Account User's authority and Purchasing Entity shall remain liable for any charges made by an Account User until notice of revocation of authority is received by Contractor. Purchasing Entity agrees that use of a Card and the applicable DIN is deemed authorized use of the Account. Purchasing Entity assumes all risk if Purchasing Entity chooses to leave a Card at an accepting location for use by its drivers or Account Users and as such, agrees to pay for all charges made with that Card or on that Account. Purchasing Entity agrees to keep DINs confidential and to provide for its employees or Account Users to not disclose any DIN. If Account Users or other employees disclose a DIN or write a DIN on a Card, then Purchasing Entity is liable for any fraudulent use that may result even if the disclosure is inadvertent or unintentional.

(c) All Cards will be valid through the expiration date listed on the Card. Participating Entity will automatically receive new Cards prior to the expiration date of their current Cards. Standard delivery time for renewal cards is 30 to 45 days prior to the card expiration. Purchasing Entity's may request an earlier renewal timeframe if necessary.

(d) Accounts and Cards will only be used for the purchase of products and services for business or commercial purposes and not for personal, family or household purposes. Purchasing Entity shall adopt internal policies and controls to ensure that the Accounts and Cards are used strictly for business or commercial purposes. Purchases of lottery tickets or other games of chance, gift cards, pre-paid cards or other cash equivalent charges are prohibited. Purchasing Entity agrees that Purchasing Entity's use of Cards or Accounts is deemed acceptance by Purchasing Entity of this Agreement's terms.

(e) Contractor is not responsible in the event a merchant does not accept or honor a Card or Account number as payment.

5.4. DISPUTED AMOUNTS.

(a) Purchasing Entity shall use its best efforts to resolve purchase disputes directly with the relevant merchant particularly such disputes arising out of quality or warranty issues.

(b) "During dispute a temporary or permanent credit may be placed on Purchasing Entity's account. All disputed items must be submitted in writing within sixty (60) days from the billing date or they will be final and binding. Purchasing Entity may dispute an amount reflected on a billing statement if: (i) the amount does not reflect the face value of the Transaction; (ii) the amount being disputed is a fee that is not properly accrued under this Agreement; or (iii) Purchasing Entity does not believe it is liable for that amount. Dispute credits and temporary credits shall be issued to a Purchasing Entity's account within the billing cycle in which the dispute is identified, reported to and processed by the Contractor. For disputes occurring within a billing cycle, the total amount due on the invoice shall be reduced by the amount in dispute. For disputes occurring after the relevant billing cycle has closed, where an invoice has been created, the permanent or temporary credit shall be reflected on the subsequent billing cycle's invoice. Purchasing Entities shall pay the exact amount due set forth on each invoice."

(c) Transactions made at an island card reader where the Purchasing Entity or Account User did not obtain a receipt at the time of sale are eligible for dispute. However, the receipt may provide the only opposing record to the transaction information submitted by the merchant. It is also important to note that island card reader transactions require both a valid card and DID to be authorized.

(d) Transactions in dispute may qualify for charge back to the merchant. Contractor shall attempt to charge the Transaction back to the merchant in accordance with its procedures under its merchant acceptance agreements. Any accepted charge back will be credited to the relevant Account. The Purchasing Entity may be liable for the Transaction if the disputed item is found to be no fault of the merchant and therefore cannot be charged back to the merchant.

5.5. NOTICE OF LOSS, THEFT OR UNAUTHORIZED USE. In the event that Purchasing Entity or an Account User knows of or suspects the loss, theft or possible unauthorized use of a Card or Account or if Purchasing Entity would like to terminate an Account User, Contractor must be immediately notified by calling 1-800-492-0669.

5.6. CONTROLS. Purchasing Entity may request that Controls be applied to its Account(s).

5.7. UNAUTHORIZED USE AND UNAUTHORIZED TRANSACTIONS.

(a) The availability and effectiveness of Controls is dependent upon each merchant's adoption of card specifications and the information, including product codes that the merchant transmits to Contractor. The product codes are assigned by each merchant and not by the Contractor. In addition, some Controls are not enforceable at island card readers due to equipment restrictions at the merchant location.

(b) Default Control values are only assigned by Participating Entity through the online product. More detailed information related to Controls and their limitations is available online. Contractor is not responsible for the prudence of any particular Control level selected by Participating Entity. Contractor shall use reasonable efforts to deny requests for Transaction authorizations that fall outside the selected Control parameters. Purchasing Entity remains responsible for payment in full of Transactions

which fall outside of the Control parameters selected, if such Transactions are made with a valid Card and are processed by Contractor. The existence and/or use of Controls will not affect Purchasing Entity's liability for Unauthorized Transactions in certain circumstances and is more fully described in the guidance information provided when Purchasing Entities make Control elections. Only transactions submitted for authorization are subject to Controls and those Controls can only be enforced when the merchant provides sufficient information as part of the authorization.

(c) Contractor may, in its sole discretion and/or without prior notice, modify Authorization Controls for the purpose of the prevention of suspected fraudulent activity, see Exhibit G Section 15 Fraud Protection. Contractor will notify Purchasing Entity after any modification is made. Purchasing Entity agrees it is responsible for reviewing fraud control data provided by Contractor for the purpose of detecting fraud that may occur within Control parameters.

5.8. REPORTS AND OTHER PRODUCT FEATURES.

(a) Contractor provides transaction data for each Account to the Purchasing Entity as transmitted by merchants. Purchasing Entity is responsible for reconciling that data. Contractor will report the data received from merchants and as such is not liable for accuracy or completeness of the data received, posted or contained in any specialty reports, management reports, data services or other information services provided. In addition, Purchasing Entity understands that in the event an error is identified in a report, such as incorrect product code, Purchasing Entity is still liable for the Transaction, but may follow the dispute process to obtain clarifying information.

(b) Except as otherwise expressly provided below, Purchasing Entity will be liable to Contractor for all unauthorized use or Unauthorized Transactions that occur: (i) when a Card is lost or stolen, for the period prior to which a Purchasing Entity gives notice to Contractor as provided in this Agreement; (ii) if such use or suspected use occurs as a result of the Purchasing Entity's lack of reasonable security precautions and controls surrounding the Cards or Accounts as described in this Agreement; or (iii) if such use results in a benefit, directly or indirectly, to the Purchasing Entity or Account User. Misuse as defined by Purchasing Entity internal Purchasing Entity policy by an Account User or other employee does not constitute fraud, unauthorized use, or an Unauthorized Transaction.

(c) Purchasing Entity may purchase dyed special fuel using its Account or Cards. Purchasing Entity acknowledges that all dyed special fuel purchases will be used exclusively for off-road purposes and according to all applicable laws governing its use. Contractor is not liable in any way for any misuse or mishandling by Purchasing Entity of any dyed special fuel. Upon request from applicable governmental authorities, Contractor may provide information regarding Participating Entity's dyed special fuel purchases without prior authorization from Purchasing Entity.

5.9. DELIVERY REQUIREMENTS. Contractor must ensure that delivery of goods and/or services will be made as required by this Master Agreement, the Participating Addendum or as otherwise mutually agreed in writing between the Purchasing Entity and Contractor.

(a) On-Site Requirements. Contractor, its agents, employees, or subcontractors shall comply, in all respects, with Purchasing Entity's physical, fire, access, safety, or other security requirements required by any Participating State or Purchaser Entity while on their

premises. Purchase Entities shall clearly communicate any such requirements to Contactor in the event Contractor is on their premises.

5.10. INTERNATIONAL USE OF CARDS/CURRENCY CONVERSION.

(a) Cards are issued for use by Purchasing Entity's United States based operations, but may be used in Canada. Purchasing Entity may not distribute Cards to employees based in countries other than the United States. If Cards are used in any other country other than the United States, Purchasing Entity will: (i) be billed in US Dollars; and (ii) receive reporting in English.

(b) Contractor will convert any purchase made in a foreign currency into a U.S. Dollar amount before the Transaction is posted to the Account. The exchange rate between the Transaction currency (the foreign currency) and the billing currency (U.S. Dollars) used for processing international Transactions is a rate selected by Contractor using rates available from the Oanda Index for the date that the Transaction is posted by Contractor, which rate may vary from the rate Contractor itself receives, or the government mandated rate in effect at that time.

6. STATEMENTS & PAYMENT.

6.1. CONTRACTOR STATEMENT. Contractor shall submit to Purchasing Entity's designated statement contact properly itemized account statements on a monthly basis. Such statements shall itemize the following:

(a) Master Agreement No. 00819

(b) Participating Addendum No.

(c) Contractor name, address, telephone number, and email address for billing issues (i.e., Contractor Purchasing Entity Service Representative)

(d) Contractor's Federal Tax Identification Number

(e) Statement amount; and

(f) Payment terms, including any available prompt payment discounts.

Statements will not be processed for payment until receipt of a complete statement as specified herein.

6.2. PAYMENT.

(a) Payment is the sole responsibility of, and will be made by, the Purchasing Entity. Payment is due in full within the earlier of (a) forty-five (45) days of statement or (b) the date required pursuant to the applicable Participating Entity's prompt pay act or similar legislation, in each case on or before the relevant cutoff time on or before the Due Date. If Purchasing Entity fails to make timely payment(s) (i.e., by the applicable Due Date) in full, such failure shall constitute a "Payment Default." "Due Date" means the date on which the repayment of the balance of the account is due as provided on a billing statement. In the event of a Payment Default, Contractor may invoice in the amount of up to one percent (1%) per month on the amount overdue or a minimum of $1 (or as otherwise agreed in the applicable Participating Addendum) (the "Late Fee"). The Late Fee will be applied to the Total Outstanding Balance (as defined below) on the Calculation Date, not to exceed the amount allowable by applicable law]. The "Calculation Date" is the earlier of (a) the posting date for the Purchasing Entity's payment in full of the invoiced amount to its account, or (b) the last day of the Billing Cycle during which the Payment Default occurred.

The "Total Outstanding Balance" is the invoiced amount, plus the amount of any unbilled transactions delivered by a merchant to Contractor, and minus any credits that have posted to the account, through the Calculation Date.

(b) Each Purchasing Entity shall be liable for all Transactions on the account to the fullest extent permitted by applicable law, except as expressly provided in this Agreement. Purchasing Entities may pay the entire balance of the account or a portion of it, at any time prior to its Due Date without penalty.

(c) Payments made via paper check are posted to the account after processing and must arrive at Contractor at least three Business Days before the Due Date on the billing statement. It can take up to three Business Days to process a check from the time the envelope containing a check arrives at Contractor's facility to posting of the check amount to the account.

(d) For payments not made by paper check, payments on a Business Day before the cut-off time (the "Cut-off Time") will be posted on that Business Day. Payments after the Cut-off Time on a Business Day, or on a day other than a Business Day, will be posted on the following Business Day. The Cut-off Times for payments not made by check are as follows: a payment transaction made via Contractor's online payment portal must be completed by 3:00 p.m. ET; a payment transaction made via IVR must be completed by 3:00 p.m. ET; and a payment transaction made via ACH must arrive to Contractor by 3:00 p.m. ET.

(e) Regardless of payment method, each Purchasing Entity must ensure that Purchasing Entity's account number is provided with the payment. Failure to do so will cause processing delays in posting the payment to the account. Payments that are received at locations other than the address specified on the billing statement, or that do not otherwise comply with instructions on the billing statement or this Master Agreement, may be delayed in posting.

(f) Each Purchasing Entity shall: (i) pay all fees set forth herein; (ii) pay all amounts payable for transactions on each card issued by Contractor, and (iii) perform all obligations, covenants, and warranties in this Master Agreement.

(g) Payments will be applied first to unpaid Late Fees and then to any unpaid balances. Each Participating Entity may pay their account balance or a portion of it, at any time prior to its due date without penalty.

6.3. OVERPAYMENTS. Contractor promptly shall refund to Purchasing Entity the full amount of any erroneous payment or overpayment. Such refunds shall occur promptly upon discovery by Contractor or within thirty (30) days of written notice to Contractor; *Provided*, however, that Purchasing Entity shall have the right to elect to have either direct payments or written credit memos issued. If Contractor fails to make timely payment(s) or issuance of such credit memos, Purchasing Entity may impose a one percent (1%) per month on the amount overdue thirty (30) days after notice to the Contractor.

6.4. NO ADDITIONAL CHARGES. Unless otherwise specified herein, Contractor shall not include or impose any additional charges including, but not limited to, charges for shipping, handling, or payment processing.

6.5. TAXES/FEES. Contractor promptly shall pay all applicable taxes on its operations and activities pertaining to this Master Agreement.

7. MASTER AGREEMENT MANAGEMENT.

7.1. MASTER AGREEMENT ADMINISTRATION & NOTICES. Except for legal notices, the parties hereby designate the following administrators as the respective single points of contact for purposes of this Master Agreement. Enterprise Services' contract administrator shall provide Master Agreement oversight. Contractor's contract administrator shall be Contractor's principal contact for business activities under this Master Agreement. The parties may change contractor administrators by written notice as set forth below.

Any notices required or desired shall be in writing and sent by U.S. mail, postage prepaid, or sent via email, and shall be sent to the respective addressee at the respective address or email address set forth below or to such other address or email address as the parties may specify in writing:

Enterprise Services	**Contractor**
Attn: WA Dept. of Enterprise Services PO Box 41411 Olympia, WA 98504-1411 Tel: (360) 407-2218 Email: DESContractsTeamCypress@des.wa.gov	Attn: Ryan Kelly WEX Inc. – North American Fleet 1 Hancock Street Portland, ME 04101 Tel: (952)-922-1104 Email: ryan.kelly@wexinc.com

Notices shall be deemed effective upon the earlier of receipt, if mailed, or, if emailed, upon transmission to the designated email address of said addressee.

7.2. CONTRACTOR RELATIONSHIP MANAGER. In each Participating Addendum, Contractor shall designate a Relationship Manager who shall be responsible for addressing Purchasing Entity issues pertaining to this Master Agreement and Participating Addendum. Notwithstanding any provision to the contrary, Contractor agrees that upon written notice from Participating State it shall collaborate with such State to transition the Relationship Manager duties to an alternative representative so as to achieve the mutually beneficial relationship intended by this Master Agreement.

7.3. ACCOUNT COORDINATOR. In each Participating Addendum, Contractor shall designate an Account Coordinator who shall be responsible for addressing Purchasing Entity issues pertaining to this Master Agreement and Participating Addendum. Notwithstanding any provision to the contrary, Contractor agrees that upon written notice from Participating State it shall collaborate with such State to transition the Account Coordinator duties to an alternative representative so as to achieve the mutually beneficial relationship intended by this Master Agreement.

7.4. LEGAL NOTICES. Any legal notices required or desired shall be in writing and delivered by U.S. certified mail, return receipt requested, postage prepaid, or sent via email, and shall be sent to the respective addressee at the respective address or email address set forth below or to such other address or email address as the parties may specify in writing:

Enterprise Services
Attn: Legal Services Manager
Washington Dept. of Enterprise Services

Portland, ME 04101

Email: greg.tolbert@des.wa.gov Email: gabriel.weiss@wexinc.com

Notices shall be deemed effective upon the earlier of receipt when delivered, or, if mailed, upon return receipt, or, if emailed, upon transmission to the designated email address of said addressee.

8. CONTRACTOR SALES REPORTING; ADMINISTRATIVE FEE; & CONTRACTOR REPORTS.

8.1. NASPO VALUEPOINT ADMINISTRATIVE FEE. Contractor shall pay to NASPO ValuePoint, or its assignee, a NASPO ValuePoint Administrative Fee of one-quarter (1/4 or 25%) of one basis point (0.0025% or 0.000025) of the National Annual Volume no later than sixty (60) days following the end of the calendar year. The NASPO ValuePoint administrative fee is not negotiable. This fee may not be adjusted in any Participating Addendum. This fee is to be included as part of the pricing submitted with the bid.

8.2. PARTICIPATING STATE ADMINISTRATIVE FEE. Some states may require an additional fee be paid directly to the state only on PURCHASES made by Purchasing Entities within that state. The fee level, payment method and schedule for such reports and payments will be incorporated into the Participating Addendum that is made a part of the Master Agreement. The Contractor may adjust the Master Agreement pricing accordingly for purchases made by Purchasing Entities within the jurisdiction of the state. All such agreements shall not affect the NASPO ValuePoint Administrative Fee percentage or the prices paid by the Purchasing Entities outside the jurisdiction of the state requesting the additional fee. The NASPO ValuePoint Administrative Fee set forth above shall be based on the gross amount of all sales (less any charges for taxes or shipping) at the adjusted prices (if any) in Participating Addenda**.**

9. NASPO VALUEPOINT SUMMARY AND DETAILED USAGE REPORTS. In addition to other reports that may be required by the Master Agreement, Contractor shall provide the following NASPO ValuePoint reports.

9.1. SUMMARY SALES DATA. Contractor shall submit quarterly sales reports directly to NASPO ValuePoint using the NASPO ValuePoint Quarterly Sales/Administrative Fee Reporting Tool found at https://calculator.naspovaluepoint.org. Any/all sales made under this Master Agreement shall be reported as cumulative totals by state. Even if Contractor experiences zeros sales during a calendar quarter, a report is still required. Reports shall be due no later than thirty (30) days following the end of the calendar quarter (as specified in the reporting tool).

9.2. DETAILED SALES DATA.

Contractor also shall report the following detailed sales data elements:

1. Portfolio Name
2. Year
3. Quarter
4. Vendor Name
5. Vendor Contract Number
6. Customer Name
7. Customer Number
8. Customer Type (State Government, K12 Education, Higher Education, Local Government, NonProfit, Other)
9. Customer Address
10. Customer City
11. Customer State
12. Customer Zip
13. Transaction Date

14. Transaction Amount

Reports are due on a quarterly basis and must be received by Enterprise Services and NASPO ValuePoint no later than thirty (30) days after the end of the reporting period. Reports shall be delivered to Enterprise Services and to NASPO ValuePoint electronically through a designated portal or other method as determined by Enterprise Services and NASPO ValuePoint. Detailed sales data reports shall include sales information for all sales under participating addenda executed under this Master Agreement. The file format for the detailed sales data report shall be CSV or XLSX. A template shall be provided by NASPO ValuePoint to Contractor.

9.3. NATIONAL ANNUAL SALES INCENTIVE REPORT. Contractor shall provide the NASPO ValuePoint Cooperative Development Coordinator and Enterprise Services Contract Administrator with a National Annual Sales Volume Incentive Report reflecting each State's total annual spend, National Annual Volume Rebate earned no later than thirty (30) days after the end of the calendar year.

9.4. NASPO VALUEPOINT EXECUTIVE SUMMARY. Contractor shall provide NASPO ValuePoint an executive summary each quarter that includes, at a minimum, a list of states with an active Participating Addendum, states that Contractor is in negotiations with and any Participating Addendum roll out or implementation activities and issues. NASPO ValuePoint and Contractor will determine the format and content of the executive summary. The executive summary is due thirty (30) days after the conclusion of each calendar quarter.

9.5. REPORT OWNERSHIP. Timely submission of these reports is a material requirement of the Master Agreement. Enterprise Services and NASPO ValuePoint shall have a perpetual, irrevocable, non-exclusive, royalty free, transferable right to display, modify, copy and otherwise use reports, data and information provided under this section.

9.6. CONFIDENTIALITY OF DETAILED SALES DATA AND PARTICIPATING ADDENDA.

(a) Participating Addenda, as well as transaction data relating to purchases under this Master Agreement that identify the entity, transaction dates, line item descriptions and volumes, and prices/rates, shall be Confidential Information. Except as required by law, Contractor shall hold Confidential Information in confidence and shall not transfer or otherwise disclose Confidential Information to third parties or use Confidential Information for any purposes whatsoever other than what is necessary to the performance of purchase transactions under this Master Agreement. Contractor shall advise each of its employees and agents of their obligations to keep Confidential Information confidential. This provision does not apply to disclosure to the Lead State, a Participating State or any governmental entity exercising an audit, inspection, or examination pursuant to this Master Agreement. To the extent permitted by law, Contractor shall notify the Lead State of the identity of any entity seeking access to the Confidential Information described in this subsection.

(b) Contractor shall use and disclose Data solely and exclusively for the purpose of providing the services; and not use, sell, rent, transfer, distribute, or otherwise disclose or make available Data for Contractor's own purposes or for the benefit of anyone other than the Participating Entity without their prior written consent.

10. NASPO VALUEPOINT COOPERATIVE PROGRAM MARKETING AND PERFORMANCE REVIEW.

10.1. NASPO VALUEPOINT COOPERATIVE PROGRAM. Contractor agrees to work cooperatively with NASPO ValuePoint personnel. Contractor agrees to present plans to NASPO ValuePoint for the education of Contractor's contract administrator(s) and sales/marketing workforce regarding the Master Agreement, including the competitive nature of NASPO ValuePoint procurements, the Master Agreement and Participating addendum process, and the manner in which qualifying entities can participate in the Master Agreement.

10.2. LOGOS. NASPO ValuePoint logos may not be used by the Contractor in sales and marketing until a logo use agreement is executed with NASPO ValuePoint.

10.3. ANNUAL CONTRACT REVIEW. Contractor agrees to participate in an annual contract performance review at a location selected by Enterprise Services and NASPO ValuePoint, which may include a discussion of marketing action plans, target strategies, marketing materials, as well as Contractor reporting and timeliness of payment of administration fees.

11. RECORDS RETENTION & AUDITS.

11.1. RECORDS RETENTION. Contractor shall maintain books, records, documents, and other evidence pertaining to this Master Agreement and Card User Agreements (CUA) entered into by Participating or Purchasing Entities under it to the extent and in such detail as shall adequately reflect performance and administration of payments and fees. Contractor shall retain such records for a period of six (6) years following expiration or termination of this Master Agreement or final payment for any order placed by a Participating or Purchasing Entity against this Master Agreement, whichever is later; *Provided*, however, that if any litigation, claim, or audit is commenced prior to the expiration of this period, such period shall extend until all such litigation, claims, or audits have been resolved.

11.2. AUDIT**.** Enterprise Services reserves the right to audit, or have a designated third party audit, applicable records to ensure that Contractor has properly issued the Purchasing Entity the applicable rebate/incentive share. Accordingly, no more than once per calendar year (or more frequently to the extent agreed between the parties), upon advance written notice of no fewer than 60 days from Enterprise Services, Contractor shall permit Enterprise Services, any Participating or Purchasing Entity, and any other duly authorized agent of a governmental agency, to audit, inspect, examine, copy and/or transcribe Contractor's books, documents, papers and records directly pertinent to this Master Agreement or agreements entered into by Participating and/or Purchasing Entities under it for the purpose of making audits, examinations, excerpts, and transcriptions. This right shall survive for a period of six (6) years following expiration or termination of this Master Agreement or final payment for any account under this Master Agreement, whichever is later; *Provided*, however, that if any litigation, claim, or audit is commenced prior to the expiration of this period, such period shall extend until all such litigation, claims, or audits have been resolved.

11.3. OVERPAYMENT OF PURCHASES OR UNDERPAYMENT OF FEES. Without limiting any other remedy available to any Participating or Purchasing Entity, Contractor shall (a) reimburse Participating or Purchasing Entity for any overpayments inconsistent with the terms of this Master Agreement, at a rate of 100% of such overpayments, found as a result of the examination of the Contractor's records; and (b) reimburse Purchasing Entity for any underpayment of fees, at a rate of 100% of such fees found as a result of the examination of the Contractor's records.

Underpayment of Rebate/Incentive Share. Without limiting any other remedy available to any Participating or Purchasing Entity, in the event of a material underpayment of the Rebate/Incentive Share, in addition to compensating such Participating or Purchasing Entity for the deficiency, Contractor shall reimburse such Participating or Purchasing Entity for its reasonable out-of-pocket

expenses incurred to discover and calculate the amount of such deficiency, or 25% of the amount of the deficiency, whichever is less, up to a maximum of $15,000 per calendar year.

12. INSURANCE.

12.1. REQUIRED INSURANCE. DURING the term of this Master Agreement, Contractor, at its expense, shall maintain in full force and effect the insurance coverages set forth in *Exhibit C – Insurance Requirements*.

12.2. WORKERS COMPENSATION. Contractor shall comply with applicable workers compensation statutes and regulations (e.g., RCW Title 51, Industrial Insurance). If Contractor fails to provide industrial insurance coverage or fails to pay premiums or penalties on behalf of its employees as may be required by law, Enterprise Services may terminate this Master Agreement. This provision does not waive any of the Washington State Department of Labor and Industries (L&I) rights to collect from Contractor. In addition, Contractor waives its immunity under RCW Title 51 to the extent it is required to indemnify, defend, and hold harmless the State of Washington and its agencies, officials, agents, or employees.

12.3. INSURANCE CERTIFICATE. Prior to commencement of performance, Contractor shall provide to Enterprise Services a written endorsement to the Contractor's general liability insurance policy or other documentation evidence acceptable to the Lead State that (1) names the Participating States identified in the Competitive Solicitation as additional insureds, (2) provides for written notice of cancellation shall be delivered in accordance with the policy provisions, and (3) provides that the Contractor's liability insurance policy shall be primary, with any liability insurance of any Participating State as secondary and noncontributory. Unless otherwise agreed in any Participating Addendum, other Participating States' rights and Contractor's obligations are the same as those specified in the first sentence of this subsection except the endorsement is provided to the applicable Participating State.

13. PUBLIC INFORMATION. This Master Agreement, all related documents, and all records created as a result of the Master Agreement are subject to public disclosure as required by Washington's Public Records Act, RCW chapter 42.56. In addition, Participating Addendums and related records shall be subject to public disclosure as required by applicable law pertaining to such Purchasing Entity. Consistent with the Public Records Act, to the extent that any such Contractor document or record – in whole or in part – includes information exempted or protected from disclosure by the Public Records Act, Contractor may mark such document or record – the exempted or protected portions only – with the specific basis for protection under the Public Records Act. In the event that Enterprise Services receives a public records disclosure request that pertains to such properly marked documents or records, Enterprise Services shall notify Contractor of such disclosure request and of the date that the records will be released to the requester unless Contractor, at Contractor's sole expense, timely obtains a court order enjoining such disclosure, Enterprise Services shall release the requested documents on the date specified. Contractor's failure properly to identify exempted or protected information or timely respond after notice of request for public disclosure has been given shall be deemed a waiver by Contractor of any claim that such materials are protected or exempt from disclosure.

14. CLAIMS.

14.1 ASSUMPTION OF RISKS; CLAIMS BETWEEN THE PARTIES. Contractor assumes sole responsibility and all risks of personal injury or property damage to itself and its employees, and agents in connection with Contractor's operations under this Master Agreement. Enterprise Services has made no representations regarding any factor affecting Contractor's risks. Contractor shall pay for all

damage to any Purchasing Entity's property resulting directly from its grossly negligent or fraudulent acts or omissions, or acts of willful misconduct under this Master Agreement.

14.2 THIRD-PARTY CLAIMS; INDEMNITY. Contractor shall defend, indemnify, and hold harmless Enterprise Services and any Purchasing Entity and their employees and agents from and against all claims, demands, judgments, assessments, damages, penalties, fines, costs, liabilities or losses including, without limitation, sums paid in settlement of claims, reasonable attorneys' fees, consultant fees, and expert fees (collectively "claims") directly arising from any grossly negligent act or omission, or willful misconduct, of Contractor or its agents and subcontractors under this Master Agreement, except claims caused solely by Enterprise Services or any Purchasing Entity's gross negligence. Contractor shall take all steps needed to keep Purchasing Entity's property free of liens arising from Contractor's activities, and promptly obtain or bond the release of any such liens that may be filed.

14.3 THIRD- PARTY CLAIMS; INDEMNITY - INTELLECTUAL PROPERTY. Contractor shall defend, indemnify and hold harmless Enterprise Services and any Purchasing Entity, along with their officers and employees, from and against claims, damages or causes of action brought against Enterprise Services or any Purchasing Entity including reasonable attorney fees and related costs arising out of the claim that Contractor's operations/products or their use, infringes Intellectual Property rights of any person or entity.

(a) The Contractor's obligations under this section shall not extend to any combination of the Product with any other product, system or method, unless the Product, system or method is:

i. Provided by the Contractor or the Contractor's subsidiaries or affiliates;

ii. Specified by the Contractor to work with the Product; or

iii. Reasonably required, in order to use the product in its intended manner, and in the infringement could not have been avoided by substituting another reasonably available product, system or method capable of performing the same function; or

iv. It would be reasonably expected to use the Product in combination with such product, system, or method.

(b) The indemnified party shall notify the Contractor within a reasonable time after receiving notice of an intellectual property claim. Even if the indemnified party fails to provide reasonable notice, the Contractor shall not be relieved from its obligations unless the Contractor was prejudiced in defending the intellectual property claim resulting in increased expenses or loss to the Contractor. If the Contractor promptly and reasonably investigates and defends any intellectual property claim, it shall have no control over the defense and settlement of it. However, the indemnified party must consent in writing for any money damages or obligations for which it may be responsible. The indemnified party shall furnish, at the Contractor's reasonable request and expense, information and assistance necessary for such defense. If the Contractor fails to vigorously pursue the defense or settlement of the intellectual property claim, the indemnified party may assume the defense or settlement of it and the Contractor shall be liable for all costs and expenses, including reasonable attorneys' fees and related costs, incurred by the indemnified party in the pursuit of the intellectual property claim. Unless otherwise agreed in writing, this section is not subject to any limitations of liability in this Master Agreement or in any other document executed in conjunction with this Master Agreement.

14.4 THIRD-PARTY CLAIMS; INDEMNITY: NASPO. Contractor's indemnity obligations set forth above shall extend to an obligation to defend, indemnify, and hold harmless, NASPO and NASPO ValuePoint) to the same extent as Enterprise Services and any Purchasing Entity.

15. DISPUTE RESOLUTION. The parties shall cooperate to resolve any dispute pertaining to this Master Agreement efficiently, as timely as practicable, and at the lowest possible level with authority to resolve such dispute. If, however, a dispute persists and cannot be resolved, it may be escalated within each organization. In such situation, upon notice by either party, each party, within five (5) business days shall reduce its description of the dispute to writing and deliver it to the other party. The receiving party then shall have three (3) business days to review and respond in writing. In the event that the parties cannot then agree on a resolution of the dispute, the parties shall schedule a conference between the respective senior manager of each organization to attempt to resolve the dispute. In the event the parties cannot agree, either party may resort to court to resolve the dispute. For the avoidance of doubt, this Section 15 shall not apply to disputed transactions, which shall be governed by Exhibit G Section 16.

16. DEFAULTS AND REMEDIES.

16.1 SUSPENSION & TERMINATION FOR DEFAULT BY CONTRACTOR. Enterprise Services may suspend Contractor's operations under this Master Agreement immediately by written cure notice of any default. Suspension shall continue until the default is remedied to Enterprise Services' reasonable satisfaction; *Provided*, however, that, if after thirty (30) days from such a suspension notice, Contractor remains in default, Enterprise Services may terminate Contractor's rights under this Master Agreement. In such event, except as otherwise set forth herein, each of the parties' obligations to each other survive termination of this Master Agreement, until such obligations have been fulfilled.

16.2 DEFAULT BY CONTRACTOR. Each OF the following events shall constitute default of this Master Agreement by Contractor:

(a) Contractor materially fails to perform or comply with any of the terms or conditions of this Master Agreement;

(b) Contractor breaches any representation or warranty provided herein; or

(c) Contractor enters into proceedings relating to bankruptcy, whether voluntary or involuntary.

16.3 REMEDIES FOR DEFAULT BY CONTRACTOR.

(a) Enterprise Services' rights to suspend and terminate Contractor's rights under this Master Agreement are in addition to all other available remedies.

(b) In the event of termination for default, Enterprise Services may exercise any remedy provided by law including, without limitation, the right to procure replacement goods and/or services. In such event, Contractor shall be liable to Enterprise Services for damages as set forth in this Master Agreement.

16.4 LIMITATION ON DAMAGES.

(a) Notwithstanding any provision to the contrary, the parties agree that in no event shall Contractor be liable to Enterprise Services or any Participating Entity for special, consequential, exemplary or punitive damages. Except as otherwise required under applicable law, Contractor makes no warranty with respect to goods, products, merchantability, or services purchased with a card or the account, or through Contractor. Contractor is not responsible for any failure of a merchant to accept a card issued by Contractor hereunder.

(b) Contractor's liability with respect to each Participating Entity under this Master Agreement for actual damages shall not exceed three times the sum of: (a) all fees paid by such Participating Entity to Contractor under this Agreement in the twelve (12) month period

prior to the date when any claim is made against Contractor; plus (b) all other revenue earned by Contractor for all of Enterprise Services' transactions made in the twelve (12) months prior to the date of any claim made against Contractor; provided, however, that in the case of claims (as such term is defined and limited pursuant to and in accordance with Sections 14.2 and 14.3) directly resulting from a data breach (i.e., any access, destruction, loss, theft, use or disclosure of Enterprise Services' Data by an unauthorized party), Contractor's liability with respect to each Participating Entity under this Master Agreement for such damages shall not exceed six times the sum of: (a) all fees paid by such Participating Entity to Contractor under this Agreement in the twelve (12) month period prior to the date when any claim is made against Contractor; plus (b) all other revenue earned by Contractor for all of Enterprise Services' transactions made in the twelve (12) months prior to the date of any claim made against Contractor.

16.5 GOVERNMENTAL TERMINATION.

(a) Termination for Withdrawal of Authority. Enterprise Services may suspend or terminate this Master Agreement if, during the term hereof, Enterprise Services' procurement authority is withdrawn, reduced, or limited such that Enterprise Services, in its judgment, would lack authority to enter into this Master Agreement; *Provided*, however, that such suspension or termination for withdrawal of authority shall only be effective upon twenty (20) days prior written notice; and *Provided further*, that such suspension or termination for withdrawal of authority shall not relieve any Participating Entity or Purchasing Entity from payment for purchases on account (and any related fees or other amounts owed to Contractor) as of the effective date of such notice. Except as stated in this provision, in the event of such suspension or termination for withdrawal of authority, neither Enterprise Services nor any Participating Entity or Purchasing Entity shall have any obligation or liability to Contractor.

(b) Termination for Public Convenience. Enterprise Services, for public convenience, may terminate this Master Agreement; *Provided*, however, that such termination for public convenience must, in Enterprise Services' judgment, be in the best interest of the State of Washington; and *Provided further*, that such termination for public convenience shall only be effective upon sixty (60) days prior written notice; and *Provided further*, that such termination for public convenience shall not relieve any Participating Entity or Purchasing Entity from payment for purchases on account (and any related fees or other amounts owed to Contractor) as of the effective date of such notice. Except as stated in this provision, in the event of such termination for public convenience, neither Enterprise Services nor any Participating Entity or Purchasing Entity shall have any obligation or liability to Contractor.

16.6 TERMINATION PROCEDURE. Regardless of basis, in the event of suspension or termination (in full or in part), the PARTIES shall cooperate to ensure an orderly and efficient suspension or termination. Unless directed by Enterprise Services to the contrary, Contractor shall not process any orders after notice of suspension or termination inconsistent therewith.

16.7 IF A PURCHASING ENTITY DEFAULTS: (i) it will not have any further right to borrow under the relevant PARTICIPATING Addendum; (ii) all outstanding amounts under the account shall be immediately due and payable; (iii) Contractor may terminate the relevant Purchasing Entity Cardholder Agreement; and (iv) Contractor will have the right to bring suit and exercise all rights and remedies available under applicable law. Alternatively, Contractor MAY, in its sole discretion: (i) suspend all services and obligations; (ii) shorten the billing cycle; or (iii) change the payment terms. The suspension of services and/or obligations will not be deemed a waiver of any right to terminate the Purchasing Entity Cardholder

Agreement, whether as a result of the default to which such suspension of services or obligations relates or otherwise. For purposes of this Section 16.7, "default" means if: (a) Purchasing Entity fails to perform any obligation hereunder or, as applicable, the Purchasing Entity Cardholder Agreement; (b) a representation or warranty by Purchasing Entity in connection with this Master Agreement or, as applicable, the Participating Addendum, was incorrect or misleading when made; (c) any petition in bankruptcy, insolvency, receivership, or reorganization or proceeding pursuant to any other debtor relief law is filed by or against Purchasing Entity; (d) any order is entered appointing a receiver, custodian, trustee, liquidator, or any other person with similar authority over the assets of Purchasing Entity; (e) there is an insolvency, dissolution, reorganization, or assignment for the benefit of creditors with respect to Purchasing Entity, or any other material adverse change in the financial condition of Purchasing Entity; or (f) any adverse judgment, order or award is entered against Purchasing Entity that has a material adverse impact on the financial condition of Purchasing Entity or a detrimental effect on the ability of Purchasing Entity to perform its obligations to Contractor.

17. GENERAL PROVISIONS.

17.1 TIME IS OF THE ESSENCE. Time is of the essence for each and every provision of this Master Agreement.

17.2 FORCE MAJEURE. Neither party to this Master Agreement shall be held responsible for delay or default caused by any unforeseeable acts of God including, but not limited to, fire, riot, unusually severe weather, epidemics or pandemics, or war which are beyond that party's reasonable control which said party provides written notice within three (3) calendar days to the other specifying such force majeure event and their detailed plan to resume normal operations; *Provided*, however, that, in the event Contractor declares force majeure, Enterprise Services shall have the right to terminate this Master Agreement if such force majeure event interferes, in Enterprise Services' judgment, with the successful performance of Contractor's obligations under this Master Agreement for more than thirty (30) days; *Provided further*, that this Section 17.2 shall not apply to Enterprise Services' or any Participating Entity's obligation to pay the balance on its account under this Master Agreement or, as applicable, any Participating Addendum.

17.3 COMPLIANCE WITH LAW. Each of the parties shall comply with all applicable law.

17.4 INTEGRATED AGREEMENT. This Master Agreement (including all exhibits, schedules and attachments hereto) constitutes the entire agreement and understanding of the parties with respect to the subject matter and supersedes all prior negotiations, representations, and understandings between them. There are no representations or understandings of any kind not set forth herein.

17.5 AMENDMENT OR MODIFICATION. Except as set forth herein, this Master Agreement may not be amended or modified except in writing and signed by a duly authorized representative of each party hereto.

17.6 AUTHORITY. Each party to this Master Agreement, and each individual signing on behalf of each party, hereby represents and warrants to the other that it has full power and authority to enter into this Master Agreement and that its execution, delivery, and performance of this Master Agreement has been fully authorized and approved, and that no further approvals or consents are required to bind such party.

17.7 NO AGENCY. The parties agree that no agency, partnership, or joint venture of any kind shall be or is intended to be created by or under this Master Agreement. Neither party is an agent of the other party nor authorized to obligate it.

17.8 ASSIGNMENT. Neither party may assign its rights under this Master Agreement without the other party's prior written consent and any attempted assignment without such consent to be void.

17.9 BINDING EFFECT; SUCCESSORS & ASSIGNS. This Master Agreement shall be binding upon and shall inure to the benefit of the parties hereto and their respective permitted successors and assigns.

17.10 ASSIGNMENT OF ANTITRUST RIGHTS REGARDING PURCHASED GOODS/SERVICES. Contractor irrevocably assigns to Enterprise Services, on behalf of the State of Washington, any claim for relief or cause of action which the Contractor now has or which may accrue to the Contractor in the future by reason of any violation of state or federal antitrust laws in connection with any goods and/or services provided in Washington for the purpose of carrying out the Contractor's obligations under this Master Agreement, including, at Enterprise Services' option, the right to control any such litigation on such claim for relief or cause of action. Contractor irrevocably assigns to a state Participating Entity outside the State of Washington any claim for relief or cause of action as described in this subsection, and the same right to control such litigation, in connection with any goods and/or services provided in the Participating Entity's state.

17.11 SEVERABILITY. If any provision of this Master Agreement is held to be invalid or unenforceable, such provision shall not affect or invalidate the remainder of this Master Agreement, and to this end, the provisions of this Master Agreement are declared to be severable. If such invalidity becomes known or apparent to the parties, the parties agree to negotiate promptly in good faith in an attempt to amend such provision as nearly as possible to be consistent with the intent of this Master Agreement.

17.12 WAIVER. Failure of either party to insist upon the strict performance of any of the terms and conditions hereof, or failure to exercise any rights or remedies provided herein or by law, or to notify the other party in the event of breach, shall not release the other party of any of its obligations under this Master Agreement, nor shall any purported oral modification or rescission of this Master Agreement by either party operate as a waiver of any of the terms hereof. No waiver by either party of any breach, default, or violation of any term, warranty, representation, contract, covenant, right, condition, or provision hereof shall constitute waiver of any subsequent breach, default, or violation of the same or other term, warranty, representation, contract, covenant, right, condition, or provision. Similarly, failure of any party to insist upon the strict performance of any of the terms and conditions of any Participating Addendum, or failure to exercise any rights or remedies provided therein or by law, or to notify the other party in the events of breach, shall not release such party of any of its obligations under such Participating Addendum, nor shall any purported oral modification or rescission of such by either party operate as a waiver of any such terms thereof.

17.13 SURVIVAL. All covenants, agreements, and indemnities set forth in or otherwise made pursuant to this Master Agreement shall survive and remain in effect following the expiration or termination of this Master Agreement, Provided, however, that nothing herein is intended to extend the survival beyond any applicable statute of limitations periods.

17.14 GOVERNING LAW. The validity, construction, performance, and enforcement of this Master Agreement shall be governed by and construed in accordance with the laws of the State of Washington, provided that 12 U.S.C. 1831d shall apply on the basis of the location of the Contractor, without regard to its choice of law rules. The validity, construction, and effect of any Participating Addendum pertaining to the Master Agreement or order placed pursuant to such Participating Addendum shall be governed by and construed in accordance with the laws of the Participating Entity or Purchasing Entity's State, provided that 12 U.S.C. 1831d shall apply on the basis of the location of the Contractor.

17.15 JURISDICTION & VENUE. In the event that any action is brought to enforce any provision of this Master Agreement, the parties agree to submit to exclusive jurisdiction in Thurston County Superior Court for the State of Washington and agree that in any such action venue shall lie exclusively at Olympia, Washington; Provided, however, that venue for any claim, dispute, or action concerning this Master Agreement or the effect of a Participating Addendum shall be in the Participating Entity's State.

17.16 SOVEREIGN IMMUNITY. In no event shall this Master Agreement, any Participating Addendum, or any act of the lead State, a Participating Entity, or Purchasing Entity be a waiver of any form of defense or immunity, whether sovereign immunity, governmental immunity, immunity based on the Eleventh Amendment to the Constitution of the United States or otherwise, from any claim or from the jurisdiction of any court. This section applies to a claim brought against the Participating Entities who are states only to the extend Congress has appropriately abrogated the state's sovereign immunity and is not consent by the state to be sued in federal court.

17.17 ATTORNEYS' FEES. Should any legal action or proceeding be commenced by either party in order to enforce this Master Agreement or any provision hereof, or in connection with any alleged dispute, breach, default, or misrepresentation in connection with any provision herein contained, the prevailing party shall be entitled to recover reasonable attorneys' fees and costs incurred in connection with such action or proceeding, including costs of pursuing or defending any legal action, including, without limitation, any appeal, discovery, or negotiation and preparation of settlement arrangements, in addition to such other relief as may be granted.

17.18 FAIR CONSTRUCTION & INTERPRETATION. The provisions of this Master Agreement shall be construed as a whole according to their common meaning and not strictly for or against any party and consistent with the provisions contained herein in order to achieve the objectives and purposes of this Master Agreement. Each party hereto and its counsel has reviewed and revised this Master Agreement and agrees that the normal rules of construction to the effect that any ambiguities are to be resolved against the drafting party shall not be construed in the interpretation of this Master Agreement. Each term and provision of this Master Agreement to be performed by either party shall be construed to be both a covenant and a condition.

17.19 FURTHER ASSURANCES. In addition to the actions specifically mentioned in this Master Agreement, the parties shall each do whatever may reasonably be necessary to accomplish the transactions contemplated in this Master Agreement including, without limitation, executing any additional documents reasonably necessary to effectuate the provisions and purposes of this Master Agreement.

17.20 EXHIBITS. All exhibits referred to herein are deemed to be incorporated in this Master Agreement in their entirety.

17.21 CAPTIONS & HEADINGS. The captions and headings in this Master Agreement are for convenience only and are not intended to, and shall not be construed to, limit, enlarge, or affect the scope or intent of this Master Agreement nor the meaning of any provisions hereof.

17.22 ELECTRONIC SIGNATURES. A signed copy of this Master Agreement or any other ancillary agreement transmitted by facsimile, email, or other means of electronic transmission shall be deemed to have the same legal effect as delivery of an original executed copy of this Master Agreement or such other ancillary agreement for all purposes.

17.23 COUNTERPARTS. This Master Agreement may be executed in any number of counterparts, each of which shall be deemed an original and all of which counterparts together shall constitute the same instrument which may be sufficiently evidenced by one counterpart. Execution of this Master

Agreement at different times and places by the parties shall not affect the validity thereof so long as all the parties hereto execute a counterpart of this Master Agreement.

EXECUTED as of the date and year first above written.

FLEET CARD PRODUCTS

This exhibit details the type of Fleet Card products and services that are within the scope of this Master Agreement. Fleet Card Types include:

- Fleet Card – Physical specialized Commercial Card used to capture fleet-related expenses (e.g., fuel, vehicle maintenance, aviation, marine, electric, repair and service).
- Cardless Account (WEXPay) – Virtual card (no plastic) account used for maintenance services.

WEX CARD PROGRAM

WEX is offering the Universal WEX Fleet Card, a corporate liability card that offers acceptance in all 50 states, at more than 95% of U.S. retail fueling locations, all of which provide Level III data. The card is accepted by all major oil companies and fuel retailers as well as independent merchants, in urban, rural, and remote locations.

The WEX Fleet Card is also accepted at more than 4,000 locations in Canada.

WEX customers can be billed using centralized or decentralized invoicing across agencies and departments as desired. The program supports nine levels of hierarchy, offering robust reporting and billing flexibility.

1. THE WEX FLEET CARD

The WEX Fleet Card program offers best-in-class card functionality, reporting and customer service. Our technology and services include:

- Level III data capture on 99.8% of transactions, including remote sites that may only transmit Level I or II using MasterCard, for greater insight and fraud protection
- Nine levels of hierarchy for more flexible reporting and billing options
- Advanced card-to-PIN functions; ability to tie one card to one PIN, etc.
- More flexible prompting options at point of sale
- Acceptance at more than 95% of all retail fuel sites in the U.S., plus expanded acceptance through virtual MasterCard technologies
- Comprehensive Federal and State tax exemption, reporting and recovery program
- Robust online reporting tools through WEXOnline®, including ability to schedule and share custom reports
- Ability to customize data fields and add GL codes for accounts, drivers, vehicles or cards for greater financial control and visibility
- Control user access to the online system, with advanced administrative functions

2. WEXPAY™

Along with the flagship Fleet card, WEX is offering **WEXPay™**, a tool that enables out-of-network purchases at an additional 398,000 merchants in the MasterCard® network by utilizing a virtual card interface. Typically used for independent or geographically remote fuel and service sites, WEXPay™ provides the control of a fleet card with the convenience of a credit card.

This out-of-network tool reduces the number of out-of-network sites where drivers would have to use an alternative form of payment.

Using WEXPay™ in conjunction with a Custom Control fleet card lets Purchasing Entity set the rules for drivers. Custom Control cards allow Purchasing Entity to set merchant, transaction, and even product type limits. WEX apply those limits to both WEX Fleet Card and WEXPay™ MasterCard transactions. Expanded coverage combined with integrated reporting and invoicing will further streamline Purchasing Entity fleet purchasing and operations.

How WEXPay Works: As a MasterCard issuing bank, WEX uses Single-Use Account Number technology to authorize a one-time payment to a merchant. The account number provided to the merchant by phone is fast and secure — good only for that one purchase.

When the merchant calls for authorization, WEX applies the Purchasing Entity's purchase controls and collect the same level of purchase detail, including Prompt ID and odometer. WEX integrate the purchase details into Purchasing Entity WEX Fleet Card invoice and reports. One card, one invoice, one report with the same controls and service our Purchasing Entity's expect from WEX.

** Purchases are subject to the MasterCard transaction processing rules and terms of use, including tax exemption rules.*

3. WEX SERVICE NETWORK

WEX also offers acceptance for service and maintenance needs through the **WEX Service Network**. WEX Custom Control cards can be used to purchase tires, transmissions, brakes, mufflers, oil changes, glass replacement, car washes, and other routine vehicle maintenance products and services at national brand and local service stations, including Goodyear, Sears, Jiffy Lube, Valvoline, and Bridgestone/Firestone. The WEX card is currently accepted at more than 32,000 locations that provide service.

4. WEX EV FLEETCHARGE

The WEX Fleet card also helps government fleets in their sustainability and greening initiatives. If a Purchasing entity is facing mandates to cut emissions, **WEX EV FleetCharge**, WEX's partnership with ChargePoint, allows a Purchasing Entity to use their WEX Fleet card to pay for charges at more than 66,000 Electric Vehicle charging sites. Purchasing Entities will also get reporting on EV charges that integrates with their traditional liquid fueling activity for a total fleet view of their fuel usage.

5. AVCARD PROGRAM

Purchasing Entities can manage their aircraft fueling, maintenance, and activity as easily as they manage their ground fleet with the **AVCARD program**. AVCARD — a complete purchasing solution for fuel and related aviation services — is a credit card and contract fuel program used by corporate and private flight departments at both domestic and international airport locations. In addition to the Purchasing Entity's WEX Fleet Card account, WEX can set them up with an AVCARD account, which is integrated with the Purchasing Entity's WEX account.

AVCARD cards function as both a credit card and a contract fuel card. Purchasing Entities only need one card program for purchasing fuel and services from all AVCARD acceptors and/or contract fuel suppliers.

AVCARD is the most widely accepted aviation credit card, providing fuel access at 7,500 locations in more than 190 countries. With an AVCARD account, a Purchasing Entity automatically participate in their Contract Fuel Program, which allows them to receive significant savings on jet fuel virtually everywhere in the world. AVCARD's 24/7 Fuel Dispatch team is available to find, prearrange and quote, Contract Fuel prices worldwide for all trips.

Look up accepting locations by individual IATA/ICAO codes or geographically by country, state and city at WFSCORP.com. Purchasing Entities can also:

- View and download contact information and a detailed listing of specific services provided (catering, rental cars, hangar, etc.)
- Prearrange fuel and services
- Log in to obtain contract fuel pricing
- Request a firm Price Quote by email
- Report a lost or stolen card online or use the toll-free number during business hours

Purchasing Entities can sign up and use the convenient features of the AVCARD program at no additional charge.

6. MARINE FUEL

Fleets can purchase gasoline and diesel fuel at **marine fueling locations** through a combination of direct acceptance of the WEX Fleet Card at marinas with branded oil locations through electronic point of sale systems, and at any of the more than 9,500 marina locations that accept MasterCard worldwide. The WEX Fleet Card and WEX*Pay™* would be used at these accepting locations just like any other fueling location to purchase fuel and related services. Additional terms and conditions apply.

7. ALTERNATIVE FUEL & ADDITIONAL ACCEPTANCE

Certain WEX-accepting merchants supply ethanol, natural gas (CNG, LNG), propane (LPG), hydrogen, biodiesel, methanol, and other alternative fuels. So WEX has created an **Alternative Fuel Directory** using transaction information passed to WEX by accepting merchants, and from external sources such as the Department of Energy. This directory contains more than 6,000 WEX-accepting sites that carry at least one alternative fuel type. This directory is available through a download from WEX*Online®*, or can be provided in hard copy for use in vehicles. WEX uniquely reports ethanol, methanol, CNG, LNG, and biodiesel.

WEX is always **increasing its acceptance coverage** for fuel, marina and service locations. Because WEX currently have acceptance at more than 95% of all U.S. fuel sites, our merchant acquisition strategy is driven by the needs of our fleet customers requiring service in remote areas or acceptance outside of domestic coverage. If a fleet customer identifies specific fueling needs, WEX will work toward signing any needed location

If the customer has merchants that they would like to be part of the WEX accepting network who do not already have direct acceptance or cannot utilize the WEX*Pay™* tool, WEX will request the following information from the fleet:

- Merchant name
- Merchant address
- Merchant contact person
- Phone and fax numbers
- Expected utilization/volume from a Purchasing Entities fleet
- Name and phone number of fleet employee requesting WEX card acceptance

WEX will work with all interested parties toward gaining acceptance at the location. This includes either direct agreements or acceptance through our partnerships with network sales organizations and acquirers.

WEX OPTIONAL PRODUCTS /SERVICES

1. **WEX FLEET CLEARVIEW™** is a suite of powerful, cloud-based analytic solutions that automatically organizes, interprets, and intuitively displays fleet-related information. Critical data is presented in an intentional layout of simple and informative visualizations, helping fleet managers monitor operations, understand trends, benchmark performance, investigate anomalies, and recognize cost-saving opportunities.

   With an eye toward designing solutions for fleets with a wide range of needs, WEX ClearView products present complex fleet data in straight-forward and compelling graphics turning information into insights.

   ClearView Essentials. With ClearView™ Essentials, a Purchasing Entity will enjoy actionable insights into fuel expense and driver purchasing that they have not experienced before. Purchasing Entities will quickly see a gain in time savings due to the elimination of manual manipulation and analysis of spreadsheets and identify opportunities to reduce their fuel expense. ClearView™ Essentials, the cornerstone of the ClearView™ analytics product suite, provides a comprehensive range of analysis opportunities: Within the five ClearView™ Essentials modules there are many key pieces of functionality that can be utilized to more comprehensively and accurately analyze vehicles and the employees driving those vehicles each day.

   ClearView™ Advanced. ClearView™ Advanced gives a Purchasing Entity all the data analytics power of ClearView™ Essentials and more. It offers exceptional opportunities for fuel price optimization. In addition, ClearView™ Advanced provides an entirely new channel for communicating with drivers and/or managers, enabling the Purchasing Entity to implement, track, and evaluate the effectiveness of driver messaging campaigns.

   Identify and eliminate costly and unwanted driver purchasing behaviors: ClearView™ Advanced helps Purchasing Entities hone in on which drivers' purchasing habits represent the greatest opportunities for savings. Quickly spot drivers who purchase unnecessary fuel grades or consistently buy from high-priced merchants. Once the drivers are identified, they can be targeted with behavior-specific messaging campaigns delivered via email or text from the ClearView™ platform. Customers using ClearView™ Advanced have experienced success in reducing unwanted driver purchasing behaviors and have realized thousands of dollars in savings. ClearView™ Advanced is add-on feature to ClearVeiw and is optional. The fee is **$0.25/month** (.25 cents) **per active card.**

   ClearView Snap. ClearView™ Snap gives a Purchasing Entity a quick snapshot of their agency's fueling activity in easy-to-interpret charts and graphs that are delivered directly to their inbox on a monthly and/or weekly basis. No login is required. These simple, clean visuals display prior period actuals, period comparisons, and trends over time. Easily share key fueling metrics with senior leadership and the field building awareness and oversight of their fuel card program.

   ClearView Snap™ includes an Alexa voice skill which offers a new delivery channel, daily updates, and limited amounts of transaction-level information. Alexa will verbally relay information about dollars spent, gallons purchased, highest-spending employees, and tracks six savings opportunity and potential misuse exceptions, such as non-regular fuel purchases, exceeding tank capacity, and weekend fueling.

2. TAX EXEMPTION, RECOVERY, AND REPORTING PROGRAM

Federal Gasoline and Diesel Excise Tax-Exempt Program. WEX will invoice a Purchasing Entity net of all Federal excise taxes on gasoline and diesel, at the transaction level, regardless of merchant participation if they are qualified as tax-exempt.

State Sales, County and Local Taxes at Participating Merchants. WEX currently offers eligible tax-exempt entities a comprehensive tax exemption and reporting program for applicable motor fuel transactions based on merchant participation. The program supports the following levels of tax, including:

- State Primary (Excise Tax)
- State Secondary (Sales Tax)
- State Special
- County Primary (Excise Tax)
- County Secondary (Sales Tax)
- County Special
- City Primary (Excise Tax)
- City Secondary (Sales Tax)
- City Special

Tax-exempt reporting through WEXOnline®, WEX*Link*™ 300, and the paper PAR (Purchase Activity Report) shows:

- Exempted Tax, at the transaction level
- Reported Tax, at the transaction level
- Summary of tax types by product for both exempted and reported transactions (available on the paper PAR only)

State Sales Tax and County Tax at Non-Participating Merchants. For fueling transactions with those fuel marketers that do not participate in the WEX tax-exempt program, but for which the fleet is eligible to receive tax exemption, WEX reports applicable taxes as "Reported Tax." "Reported Tax" transactions list transactions and tax amounts that WEX does not exempt so the fleet can file for exemption. Many fleets use their WEX*Link™* data file to aid in the recovery of taxes that could not be excluded through the tax-exempt program. Reporting shows:

- Exempted tax, by transaction
- Reported tax, by transaction
- Summary of tax types by product for both exempted and reported transactions

Tax Exemption for Non-Fuel Purchases. For non-fuel transactions, merchants may provide transactional data to WEX net of tax on a fleet-by-fleet basis at the merchants' discretion. Drivers must supply the merchant with proper documentation of the organizations tax-exempt status at the point of sale. The merchant will send the transaction to WEX, net of tax, for billing.

Qualification. Any fleet participating in this contract will be required to complete a certification process affirming its qualification to receive the tax exemption based upon the rules and criteria set by the appropriate taxing jurisdiction.

Required Data. Tax Exemption processing requires that the merchant provide electronically to WEX the following data points:

- Account Number

- Account Name
- Type of Fuel
- Gallons
- Price per gallon
- Total gross sale

Not all transactions may have exemptions applied to them. WEX is not able to exempt applicable fuel taxes on transactions that are provided with certain data elements that are missing and may be autocorrected. Taxing jurisdictions require documentation from the party providing the exemption of the type of fuel, gallons purchased, and price per gallon. There are occasions where the merchant is unable to provide all the required documentation, therefore these transactions will not go through our tax processing. However, if a Purchasing Entity provides WEX with a copy of the sales receipt, WEX can repost these transactions and apply the applicable exemptions.

3. PRIVATE SITE AND BULK FUEL SOLUTIONS

For fleets with private site and bulk fueling needs, WEX offers secure, live authorizations and integrated reporting for onsite bulk fueling transactions. A Purchasing Entity can select one of two options.

Private Site Program. WEX's private site program allows a Purchasing Entity to use the WEX Fleet Card to activate pumps at their onsite bulk fuel tanks, allowing for increased security and asset-level fuel usage reporting on their bulk fuel. WEX captures Driver ID and odometer information, authorizes the card swipe, and provides integrated reporting of the private site transactions with the Purchasing Entities retail transactions while excluding onsite fuel transactions from their invoice.

Private Site Reporting. Private Site Reporting consolidates tracking of onsite and retail fuel transactions into one comprehensive report and allows the Purchasing Entity to monitor private transactions for abuse through purchase controls at the point of sale using their WEX card.

This program provides in-depth reporting of onsite fuel transactions at the vehicle level, integrated with retail fuel purchases. Onsite fuel transactions are excluded from the Purchasing Entity's invoice while providing consolidated comprehensive vehicle level paper and electronic reporting along with their retail transactions.

Once installed, a Purchasing Entity's card readers will be required to retain reportable information so they don't have to. Just like a retail transaction, the driver initiates the data capture by entering the Driver ID and odometer. The card reader will provide the fuel type, gallons, PPG as programmed in the card reader, and total sale. Upon receipt, WEX integrates this key information into the Purchasing Entity's fleet's usage reporting. Card security features help mitigate fuel theft, and comprehensive tracking of usage and consumption will help them better control costs.

Using private site card readers with the WEX Fleet Card Program quickly gets Purchasing Entities on track to minimize time, effort and cost of administering fuel usage.

Transactions that occur at a private site location, utilizing a local (non-networked/non-WEX) authorization, carry no additional costs from WEX. If a site owner were to network their transactions from their owned private site locations to WEX (run each translation through a network to WEX for authorization), there is a **$0.15/transaction** (.15 cent) cost. This is a pass-through cost of using a network.

4. WEX EMERGENCY FUEL PROGRAM

WEX Emergency Fuel is an optional service may be offered, negotiated and mutually agreed in Participating Addendum.

High Level Overview of program: For public safety and public works vehicles that require 100 percent uptime, guaranteed, **WEX Emergency Fuel** provides peace of mind to public fleet administrators who cannot be caught without fuel in an emergency. Sign up for WEX Emergency Fuel and when weather or a disaster disrupts a Purchasing Entities fuel supply, WEX will connect them with one of our approved partners to get their fleet back on the road with the fuel they need. Guaranteed. Because WEX partners with the leading providers of emergency fueling services, WEX has the necessary supply sources and logistical network to guarantee 100% uptime, including fuel dispensing equipment, mobile fueling trailers, military-grade rapid deployment equipment, high-water fueling vehicles, mini-mobile fueling stations, diesel and gasoline generators and more.

FLEET CARD REBATE/INCENTIVE SHARE

This Exhibit includes the Rebate/Incentive Share components for Fleet Card Services.

Rebate amounts will be based on total spend less write-offs, returns, and fraudulent charges.

A single payment combining Incentive Share Components 1 and 2 will be paid directly to the Participating State/Purchasing Entity on a quarterly basis as determined in the Participating Addendum. Incentive Share Payments can be made via account credit, mailed check, ACH or EFT payment (standard or non-standard format) as determined in the Participating Addendum. Incentive Share Payments must be received no later than the 60th day following the end of each calendar quarter.

Incentive Share Component 3 will be paid to the Participating State on an annual basis. Incentive Share Payment can be made via mailed check, ACH, or EFT as determined in the Participating Addendum. Incentive Share Payment must be received no later than the 60th day following the end of each calendar year.

Delivery of the rebate may be adjusted in any Participating Entity's Participating Addendum.
1 Basis Point = .0001 or .01%

INCENTIVE SHARE COMPONENTS

1. **INCENTIVE SHARE #1 – STANDARD VOLUME INCENTIVE**

   Each Participating Entity will receive a basis point (percentage) of their quarterly standard sales volume. The formula for calculating the Standard Volume Incentive is:

   Quarterly Total Volume x basis points = Quarterly Standard Volume Incentive.

   Basis Points Offered: 170 basis points (1.70%)

   Conditions. The Rebate set forth herein is expressly conditioned on the following: (1) monthly billing; (2) payment in full within 45 calendar days of the billing date appearing on the Purchasing Entity's invoice; (3) credit approval.

   Quarterly Total Volume spend by all Purchasing Entities for all card liability products in a Quarter. "Quarterly Total Volume" includes the total amount of all purchases made using Cards at retail locations that appear on invoices provided to the Purchasing Entity in three calendar months. Quarterly Total Volume shall not include: (i) those amounts representing credits, disputed items, fees, late fees or charges posted to their accounts (such as returned check fees, collection costs, administrative fees and reporting fees), (ii) fuel purchased at Tier 1 Truck Stop locations* (currently Flying J, Loves, TA, Petro, and Pilot), or (iii) any amounts posted to an account with respect to which a Card has been reported lost or stolen. **Purchasing Entities will be charged the posted cash price at Tier 1 truck stops.*

2. **INCENTIVE SHARE #2 – PROMPT PAYMENT INCENTIVE**

Each Participating Entity will receive a basis point (percentage) of their Quarterly Total Volume based on the entity's average speed of pay. The formula for calculating the Prompt Payment Incentive is:

Quarterly Total Volume x Basis Points for Entity average file turn days = Quarterly Prompt Payment Incentive.

Note: The payment terms for the Master Agreement is forty-five (45) days.

Conditions. The Prompt Payment Incentive set forth herein is expressly conditioned on the following: (1) electronic reporting (i.e. no paper reports); and (2) our receipt of payment in full in accordance with one of the Average File Turn Days in the Prompt Payment Table.

Basis Points Offered:

Avg File Turn Days	Basis Point	Avg File Turn Days	Basis Point	Avg File Turn Days	Basis Point
1	20	21	7.375	41	1.25
2	19	22	7	42	1
3	18	23	6.625	43	0.75
4	17	24	6.25	44	0.5
5	16	25	5.875	45	0.25
6	15	26	5.5	46	0
7	14	27	5.125	47	0
8	13.5	28	4.75	48	0
9	13	29	4.375	49	0
10	12.5	30	4	50	0
11	12	31	3.75	51	0
12	11.5	32	3.5	52	0
13	11	33	3.25	53	0
14	10.5	34	3	54	0
15	10	35	2.75	55	0
16	9.5	36	2.5	56	0
17	9	37	2.25	57	0
18	8.5	38	2	58	0
19	8.125	39	1.75	59	0

20	**7.75**	**40**	**1.5**	**60**	**0**

3. INCENTIVE SHARE #3 – NATIONAL ANNUAL VOLUME INCENTIVE

Each Participating State will receive an incentive based on the total National Annual Volume (total annual sales for all Participating States/Participating Entities). The formula for calculating the National Annual Sales Volume Incentive is:

National Annual Volume (for all Fleet products) x basis points = National Annual Sales Volume Incentive.

Conditions. The Rebate set forth herein is expressly conditioned on the following: (1) monthly billing; (2) payment in full within 45 calendar days of the billing date appearing on the Purchasing Entity's invoice; (3) credit approval.

Total annual volume spend by all Participating States/Purchasing Entities for all card products in a calendar year. "National Annual Volume" includes the total amount of all purchases made using Cards at retail locations that appear on invoices provided to the Purchasing Entity in a calendar year. National Annual Volume shall not include: (i) those amounts representing credits, disputed items, fees, late fees or charges posted to their accounts (such as returned check fees, collection costs, administrative fees and reporting fees), (ii) fuel purchased at Tier 1 Truck Stop locations* (currently Flying J, Loves, TA, Petro, and Pilot), or (iii) any amounts posted to an account with respect to which a Card has been reported lost or stolen. **Purchasing Entities will be charged the posted cash price at Tier 1 truck stops.*

Basis Points Offered:

Total Annual Spend	Basis Points
$50,000,000 – $100,000,000	**10**
$100,000,001– $200,000,000	**15**
$200,000,001– $300,000,000	**20**
$300,000,001– $400,000,000	**25**
$400,000,001+	**30**

FEES

Below is a list of fees allowed under this Master Agreement.

Fee Type	Fee Amount
Foreign Transaction Fee	1.5% of the total transaction value
Overnight Delivery Fee	$15.00 per occurrence

EXHIBIT C

INSURANCE REQUIREMENTS

1. **INSURANCE OBLIGATION**. During the Term of this Master Agreement, Contractor obtain and maintain in full force and effect, at Contractor's sole expense, the following insurance coverages:

   a. COMMERCIAL GENERAL LIABILITY INSURANCE. Commercial General Liability Insurance (and, if necessary, commercial umbrella liability insurance) covering Bodily Injury and Property Damage on an 'occurrence form' in the amount of not less than $2,000,000 per occurrence and $4,000,000 general aggregate. This coverage shall include Contractual Liability insurance for the indemnity provided under this Master Agreement.

   b. COMMERCIAL AUTOMOBILE LIABILITY INSURANCE. 'Symbol 1' Commercial Automobile Liability coverage (and, if necessary, commercial umbrella liability insurance) included coverage for all owned, hired, and non-owned vehicles. The combined limit per occurrence shall not be less than $1,000,000.

   c. WORKERS' COMPENSATION INSURANCE & EMPLOYER'S LIABILITY (STOP GAP). Contractor shall comply with applicable Workers' Compensation or Industrial Accident Insurance providing benefits as required by law, including Employer's or Stop-Gap Liability with a minimum limit of $1,000,000 per accident.

   d. PROFESSIONAL LIABILITY (ERRORS & OMISSIONS) INSURANCE. Professional Liability insurance in the amount of not less than $2,000,000 combined single limit per occurrence, $4,000,000 general annual aggregate for malpractice or errors and omissions coverage against liability for damages because of personal injury, bodily injury, death, or damage to property, including the loss of use thereof, and damages because of negligent acts, errors, and omissions in any way related to this Master Agreement.

   e. CRIME INSURANCE/EMPLOYEE DISHONESTY. Employee Dishonesty and (when applicable) Inside/Outside Money and Securities coverage for State of Washington and/or purchaser owned property in the care, custody, and control of Contractor, including computer fraud. Coverage limits shall not be less than $2,000,000.

   f. CYBER RISK LIABILITY INSURANCE. Cyber Risk Insurance, on an occurrence form. This coverage shall include Contractual Liability Insurance for the indemnity provided under this Master Agreement. Limits are $8,000,000 per claim/annual aggregate.

   The limits of all insurance required to be provided by Contractor shall be no less than the minimum amounts specified. Coverage in the amounts of these minimum limits, however, shall not be construed to relieve Contractor from liability in excess of such limits.

   A cross-liability clause or separation of insured condition shall be included in all general liability, professional liability, and errors and omissions policies required by this Master Agreement.

2. **INSURANCE CARRIER RATING**. Coverages provided by the Contractor must be underwritten by an insurance company deemed reasonably acceptable to the State of Washington's Office of Risk Management. Insurance coverage shall be provided by companies authorized to do business within the State of Washington and rated A- Class VII or better in the most recently published edition of Best's Insurance Rating. Enterprise Services reserves the right to reasonably reject all or any insurance carrier(s) with an unacceptable financial rating.

3. **ADDITIONAL INSURED**. Except for Workers' Compensation, Professional Liability, and Commercial Automobile Liability, all required insurance shall include the State of Washington and all authorized Purchasers (and their agents, officers, and employees) as an Additional Insureds evidenced by copy of the Additional Insured Endorsement, including blanket Additional Insured Endorsements, attached to the Certificate of Insurance on such insurance policies.

4. **CERTIFICATE OF INSURANCE**. Upon request by Enterprise Services, Contractor shall furnish to Enterprise Services, as evidence of the insurance coverage required by this Master Agreement, a certificate of insurance satisfactory to Enterprise Services that insurance, in the above-stated kinds and minimum amounts, has been secured. A renewal certificate shall be delivered to Enterprise Services within 10 business days of the renewal of any required insurance. Failure to provide proof of insurance, as required, and upon 10 business days prior written notice to Contractor's Risk Manager, could result in contract cancellation. All policies and certificates of insurance shall include the Master Agreement number stated on the cover of this Master Agreement.

5. **PRIMARY COVERAGE**. Contractor's insurance shall apply as primary and shall not seek contribution from any insurance or self-insurance maintained by, or provided to, the additional insureds listed above including, at a minimum, the State of Washington and/or any Purchaser; but only to the extent an indemnity is owed pursuant to this Agreement. All insurance or self-insurance of the State of Washington and/or Purchasers shall be excess of any insurance provided by Contractor; but only to the extent an indemnity is owed by Contractor pursuant to this Agreement.

6. **SUBCONTRACTORS**. Contractor shall include all subcontractors as insureds under all required insurance policies, or shall furnish separate Certificates of Insurance and endorsements for each subcontractor. Each subcontractor must comply fully with all insurance requirements stated herein. Failure of any subcontractor to comply with insurance requirements does not limit Contractor's liability or responsibility.

7. **WAIVER OF SUBROGATION**. Contractor waives all rights of subrogation against the State of Washington and any Purchaser for the recovery of damages; but only to the extent Contractor is legally liable to indemnify the State of Washington and any Purchaser under this Agreement.

8. **NOTICE OF CANCELLATION**. Contractor or its insurer representative shall use best efforts to provide 30 days prior written notice of cancellation of any policy required under this Agreement.

EXHIBIT D

ESTABLISHING A CARD ACCOUNT AGREEMENT

INTRODUCTION

This exhibit explains the process and documentation for establishing an account for an individual Purchasing Entity. Participating States may edit this via the Participating Addendum process.

NEW ACCOUNT & CARD SET-UP: STATE AGENCY ACCOUNTS

In the initial implementation phase, a universal credit line will be established for a Participating Entity based on the Participating Entity's needs and spend requirements. WEX has the ability to place protection against credit lines to ensure a Participating Entity does not experience any service interruptions due to sudden increased spending that can be caused by seasonal, emergency or other unexpected occurrences. This universal credit line then applies to all applicable accounts under the Participating Entity's hierarchy, allowing them to set up accounts without needing to seek a new credit line for each new card set-up.

For new accounts under a Participating Entity's hierarchy, an electronic template is completed and tax exemption information is collected, either through a blanket tax exemption for the Participating Entity, or individually by agency depending on how the Participating Entity is set up with tax identification numbers.

The information required for a new account set-up typically includes account name, DBA account name, account level within the existing Participating Entity's hierarchy, shipping address, and if there are any other further requirements specific requirements a given Participating Entity may have, like ERP integration, etc. Once the information is captured and processed by WEX, an account number is generated and provided to the Participating Entity to complete the proper tax exemption paperwork for enrollment in the WEX Tax Program, assuming it is a financially liable account.

FLEET CARD ENROLLMENT PROCESS: EXISTING PARTICIPATING ENTITY ACCOUNTS

Program administrators can add cards and drivers via the Fleet Manager module of WEXOnline®, WEX's web-based account management and reporting tool, or through WEX customer service or the Participating Entity's Premium Fleet Services Account Manager. The Premium Fleet Services Account Manager is a one-to-one point of contact assigned to the Participating Entity for day-to-day operational support and account needs. The Fleet Manager module allows the fleet manager to add, edit, suspend, reactivate, and terminate cards and drivers, to add and manage card controls, and to view and download invoice details.

Purchasing Entities can also:

- Assign card to driver, vehicle or location
- Transfer cards from one account to another
- Group cards into authorization profiles to enforce their purchasing policies
- Create organizational units or departments to better organize cards, vehicles and drivers for reporting and management purposes (initially added during the implementation phase)
- Edit account information

Card orders: WEX will process requests for replacement cards for lost, damaged, or stolen cards within one business day. If notification is received by 3:30 p.m. Eastern Time, Purchasing Entities can have

cards sent that day. They can use their own shipping account number, or be charged a fee to cover the shipping costs. The WEX overnight fee, is included in Exhibit B. If a WEX card is lost or stolen, it should be reported immediately to WEX's Customer Service Department by calling the toll-free number**.** The Customer Service Department is available 24 hours a day, 365 days a year. The fleet can also notify WEX of the loss, theft, or unauthorized use of any card or account electronically through WEXOnline®.

NEW ACCOUNT AND CARD SET-UP: POLITICAL SUBDIVISION ACCOUNTS

Eligible new accounts using this Master Agreement under a Participating Entity's Participation Addendum (i.e. cities, counties, schools, etc.) will need to complete a Credit Application that references the Master Agreement/Participating Entity's Participating Addendum and have their credit adjudicated independent of the State's line of credit. WEX will collect both the credit application and tax exemption form, both of which can be completed electronically or manually, from the interested entities prior to their account set-up.

*See the WEX Credit Application, attached in Exhibit E, for a political subdivision participation under this Master Agreement.

Note: This Credit Application can be customized and can be discussed with each Participating State during the discussion of their Participation Addendum. A Credit Application will be made for each Participating State to account for the Master Agreement and that state's individual Participation Addendum to the Master Agreement.

EXHIBIT E

WEX FORMS AND SPECIFIC TERMS & CONDITIONS

This exhibit includes form templates and specific terms and conditions for certain WEX products and services.

Required Forms for Fleet Card Products and Services

- Addendum to the Fuel Card Services Agreement (Credit Application)
- WEXOnline Click through Terms & Conditions

Optional Products and Services Forms

- Tax Exemption and Reporting Program
- WEX ClearView Enrollment Packet
- Private Site Enrollment Packet
- WEXPay Enrollment Packet

ADDENDUM TO THE FUEL CARD SERVICES AGREEMENT BETWEEN WEX BANK AND THE STATE OF (the "STATE")

CREDIT INFORMATION				
Participating Entity agrees that in the event the account is not paid as agreed, WEX Bank may report the undersigned's liability for and the status of the account to credit bureaus and others who may lawfully receive such information.				
Participating Entity			Phone #	Fax#
Headquarters Name and Physical Address (Do not include PO Box)				Applicant's Taxpayer ID # (TIN, FEIN or SSN)
In Business Since (yyyy)	Year of Incorporation	Number of Veh	Avg Monthly Fuel Expenditure $	Avg Monthly Service Expenditure $

ACCOUNT SETUP INFORMATION				
Write Participating Entity name as it should appear on cards. Limit of 20 characters & spaces. Unless specified, no Purchasing Entity name will appear on cards. ☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐☐				
Billing Contact	Billing Address	City	State	Zip+4
Designate the Fleet Contact authorized to receive all charge cards, reports, and other such information WEX provides from time to time and to take actions with respect to your account and account access. This is also the person designated by the Purchasing Entity to provide all fleet vehicles, driver and other information WEX may request.				
Authorized Fleet Contact Name	Title	Phone #	Fax #	
Mailing Address (if different from billing address)		City	State	Zip+4
Email address (required to take advantage of product type card controls)				
Card Controls: To help WEX estimate the Purchasing Entity's credit needs, indicate the types of cards they anticipate using. If the Purchasing Entity provides a valid email address above, they can select from these product type options: ☐ All Products ☐ Fuel & Service ☐ Fuel & Fluids with Roadside Assistance ☐ Fuel with Roadside Assistance ☐ Mix of card types				
☐ Check here if business is exempt from motor fuels tax				
TERMS				

DEFINITIONS:

"Agreement" means: **Contract No. XXXX effective** for Fuel Cards and Fuel Management Services (the "Agreement") between the **(State of XXXX and NASPO Value Point** and **WEX Bank**.

"Participating Entity" shall mean the Participating Entity as defined in the Agreement permitted to purchase services under the Agreement, as specified in the Credit Information above.

All other capitalized terms used in this Addendum without definition have the meanings set forth in the Agreement.

AGREEMENTS OF WEX BANK AND PARTICIPATING ENTITY:

1. This Addendum is to allow the Participating Entity to participate under the Agreement between WEX BANK and the State. It does not modify, amend or change the Agreement in any way. The parties agree to comply with the terms and conditions of Contract No. XXXX which is referenced and made a part of this transaction.
2. Participating Entity represents that it is authorized or allowed by the laws of its home state to enter into this Addendum and to participate under the Agreement.
3. Participating Entity hereby requests the services of WEX BANK described in the Agreement and agrees to perform all duties of a Participating Entity under the Agreement, including, without limitation, payment of all charges on its account(s) within the time periods provided under the Agreement, payment of any fees provided in the Agreement, and cooperation with respect to providing all necessary information for the administration of the Agreement. Participating Entity agrees to be bound by the terms and conditions of the Agreement, including, without limitation, rules for authorized and unauthorized use of cards, disputes of charges, reporting lost and stolen cards, and all other rules and provisions relating to use of Participating Entity's account.
4. Participating Entity acknowledges that its failure to make timely payment in accordance with the terms of the Agreement and/or the Addendum may result in suspension or cancellation of the account(s). The undersigned represents and warrants that he/she is duly authorized to execute this Addendum on behalf of the Participating Entity and this Addendum is the valid and binding obligation of the Participating Entity, enforceable in accordance with its terms.

INFORMATION SHARING DISCLOSURE: Information regarding Purchasing Entity's transactions may be provided to accepting merchants or their service providers to facilitate discounts or other promotional campaigns of interest to them.

COMPLIANCE WIATH FEDERAL LAW: WEX Bank complies with federal law which requires all financial institutions to obtain, verify, and record information that identifies each company or person who opens an account. Issuer may ask for name, address, date of birth, and other applicable information to identify the Company and/or Account Users.

DISCLAIMER: **THIS IS AN APPLICATION FOR SERVICES AND SHALL NOT BE BINDING UPON WEX BANK UNTIL FINAL CREDIT APPROVAL HAS BEEN GRANTED BY WEX BANK.**

CONTRACTING AGENCY AUTHORIZED SIGNATURE REQUIRED

Any person signing on behalf of the Participating Entity has been duly authorized by all necessary action of Applicant's governing body, and that the undersigned is authorized to make this application on behalf of the Participating Entity.

WEX ONLINE CLICK-THROUGH TERMS AND CONDITIONS

1. General

WEX Inc., the parent company of Contractor ("WEX") provides this web site subject to the following terms of use ("Terms"). WEX owns and operates this site. Any Purchasing Entity's continued use of this website constitutes its acceptance of these Terms.

2. Purpose of the Website

The goal of the web site is to provide Any Purchasing Entity with access to information about WEX products and services, and certain functionality with respect to the Business Charge Accounts under or any Purchasing Entity's program. Continued use of the site constitutes the Purchasing Entity's acceptance of these terms and conditions.

3. Trademarks, Service Marks and Copyrighted Materials

WEX controls and operates the website. All content on the website, including, but not limited to, text, photographs, images, illustrations, audio clips, and video clips, is protected by copyrights, trademarks, service marks, and/or other intellectual property rights (which are governed by United States and worldwide copyright laws and treaty provisions, privacy and publicity laws, and communication regulations and statutes). The content is owned and controlled by WEX, its affiliates, or by third party content providers, merchants, sponsors and licensors (collectively the "Providers") that have licensed their content or the right to market their products and/or services to users of this site using this site. Purchasing Entity agrees to abide by all additional copyright notices, information, or restrictions contained in any content that is presented on this site.

Purchasing Entity's may not use any registered or unregistered trademarks, service marks or copyrighted materials appearing on the website, including but not limited to any logos or characters, without the express written consent of the owner of the mark or copyright. Purchasing Entity may not frame, deep link, or otherwise incorporate into another website any of the content or other materials on this website without WEX's express prior written consent.

Violation of trademark and copyright laws may result in significant civil liability or criminal penalties under United States and/or worldwide copyright and trademark laws. Purchasing Entity recognizes that any reproduction or use of content, except as authorized by these Terms, is considered intentional infringement.

4. Use of the Site

Purchasing Entity is are accessing this site using the Internet and Purchasing Entity's Internet service provider. Security cannot be guaranteed. WEX hereby disclaims all liability for any security breaches of online communications or for any electronic, computer or other system failures. WEX shall not be liable to any person for loss, liability or damages, including consequential or special damages, arising as a result of any security breaches or system failures or any other defect of the electronic online communication procedures, including, without limitation, loss due to data modification or destruction.

Purchasing Entity agrees not to use this site for any purpose except (a) access to descriptions of WEX products and services and (b) to the extent agreed with WEX, certain specified functionality with respect to the Business Charge Accounts under Purchasing Entity's program. In using this site Purchasing Entity' agrees not to disrupt or interfere with the site, its services, system resources, nor to upload, post or otherwise transmit any viruses or other harmful, disruptive, inappropriate, illegal or destructive files. Purchasing Entity' also agrees not to use, attempt to use, or access other accounts,

or create or use a false identity on the site.

For the avoidance of doubt, the indemnification provisions set forth above are in addition to those set forth in (i) for Fleet Customers, their Business Charge Account agreement(s) and/or terms and conditions and (ii) for Partners, their Program Agreement(s).

WEX reserves the right to terminate or suspend access to wexinc.com, in whole or in part, at any time, without notice.

This site and the information provided on this site is provided "AS IS" without any representation or warranty, express or implied, of any kind, including, but not limited to, warranties of merchantability, noninfringement, or fitness for a particular purpose. WEX, its subsidiaries and affiliates, make no warranty that use of the site or the materials will be uninterrupted, timely, secure, or error free or that defects, if any will be corrected and WEX assumes no responsibility for any damages that may be suffered by any Purchasing Entity, including, but not limited to, losses from delays, nondelivery of content or any communications, errors, system down time, network or system outages, file corruption or service interruptions.

5. Governing Law

WEX Inc. operates this website (excluding linked sites) from our offices within the state of Maine. The website can be accessed from all 50 states, as well as from other countries around the world. These Terms and Purchasing Entity's use of the web site shall be governed by the laws of the State of Washington, without regard to conflict of laws provisions and shall not be governed by the United Nations Convention on the International Sale of Goods. WEX makes no representation that materials on this web site are appropriate or available for use in other locations, and accessing them from territories where the content is illegal is prohibited. Customers who choose to access this web site from other locations do so at their own risk and are responsible for compliance with local laws, including laws regarding the transmission of technical data exported from the United States or the country in which the user resides.

6. Questions

For questions concerning these terms or the products described online please call the following number: 1-800-492-0669, or send inquiries to: WEX Inc., P.O. Box 639, Portland, ME 04104.

TAX EXEMPTION AND REPORTING PROGRAM

The WEX Tax Exemption and Reporting Program can significantly reduce accounting and administrative time for qualified fleets exempt from motor fuel excise taxes or certain sales taxes — at Federal, state, county or local levels.

Benefits include:

- Net billing of federal excise tax on applicable fuel purchases at any location.
- Net billing of state, local, county and special tax on applicable fuel purchases at participating merchant brands based on local tax laws.
- Detailed reporting of the purchase data and tax exemption.

Exemptions are dependent upon several factors, such as the Purchasing Entity's tax-exempt status for fuel purchases, the taxing jurisdiction's laws, regulations and requirements, and for most state, county and local taxes, require merchant participation. In the event that a transaction cannot be billed "net of tax", a Purchasing Entity will receive detailed reporting showing the full purchase price and the tax paid.

Before WEX can start billing a Purchasing Entity net of applicable taxes on fuel transactions based upon their eligibility, they will need to complete the following required documentation:

1. Tax Exemption and Reporting Program Enrollment form (enclosed)
2. Certificate of Buyer of Taxable Fuel form for federal exemptions (enclosed)
3. Any required State forms – obtain these from the appropriate state governing body.

Please review the enclosed Frequently Asked Questions sheet for helpful information on the program.

IMPORTANT: Purchasing Entities must fill out all forms completely and accurately in order to avoid delays in their program enrollment, so please follow the instructions on the enrollment form carefully.

IRS regulations require that WEX Inc. obtain from a Purchasing Entity, their certification that they are eligible to receive exemptions from federal excise taxes. For all other taxing jurisdictions (state, county, local) a Purchasing Entity may need to submit similar certifications as required by the different taxing jurisdictions. The state certifications may, in most cases, be obtained from the appropriate state's tax department. WEX must have all applicable documents on file prior to providing a Purchasing Entity with exemptions. It is the customer's responsibility to make sure WEX has all of the necessary current forms properly filled out in order to be billed "net of tax".

If a Purchasing Entity has any questions about the program or the enclosed materials, please call WEX at **1-866-841-3542.**

TAX EXEMPTION & REPORTING PROGRAM FREQUENTLY ASKED QUESTIONS

Q: If my fleet begins fueling before I have provided all necessary tax exemption paperwork, what will occur?

WEX will not be able to bill a Purchasing Entity net of taxes or report tax exemptions until WEX has received all necessary forms and completed the qualification and setup process.

Q: When will taxes begin to be exempted?

Once WEX receive all the properly completed forms, WEX will complete the tax exemption setup in approximately 3 business days. WEX will then begin calculating applicable exemptions. It is a Purchasing Entity's responsibility to notify WEX of any errors or omissions that they feel may have occurred. If a Purchasing Entity notices any problems, contact the WEX tax department at 1-866-841-3542.

Q: How can a Purchasing Entity determine their fleet's tax-exempt status for fuel, as well as what type of forms they need?

Purchasing Entities should contact their local Department of Revenue for free help and answers regarding their tax-exempt status for fuel and necessary forms. This agency can best assist a Purchasing Entity with questions of this nature.

Q: Will a Purchasing Entity's fleet be exempted from federal fuels excise taxes?

Yes, if the Purchasing Entity is a qualified entity. Federal law effective January 1, 2006 allows a card issuer to invoice qualified fleets net of federal gasoline and federal diesel excise tax for transactions that occur wherever cards are accepted in all 50 states. In order to be exempted from federal fuels excise taxes, a Purchasing Entity will need to complete a Certificate of Buyer of Taxable Fuel in the name of the card issuer.

Q: Does Purchasing Entity's tax-exempt status apply in all states and localities?

The local Department of Revenue, in each state that a Purchasing Entity's fleet will be fueling, will be able to help determine exemption eligibility for each state and locality respectively.

Q: Will a Purchasing Entity receive state and local exemptions anywhere they can fuel with the card?

Not necessarily. Merchant brand participation in the WEX tax program is optional in most states. Merchant participation is not necessary in the following states: Maine, Georgia, Michigan, North Carolina, Alabama, New York and New Jersey.

Q: What should a Purchasing Entity do if their tax-exempt status changes?

The Purchasing Entity should immediately notify WEX by calling the WEX Inc. Tax Exempt Department at 1-866-841-3542.

Q: Do any of these forms expire and if so will a Purchasing Entity be notified prior to the expiration?

Yes. Federal forms expire every 24 months and certain state forms expire as well. Starting at 120 days prior to the expiration of a Purchasing Entity's tax exemption form(s), WEX will send the Purchasing Entity three monthly reminders that renewed forms are required. If WEX has not received renewed tax exemption forms by the expiration date, the tax exemption process will cease until WEX receives the necessary paperwork and no credits will be given.

Q: Will a Purchasing Entity's fleet be exempted from taxes on non-fuel products?

The Tax Exemption Program provides applicable tax exemption and reporting for **motor fuel taxes only**; however, merchants may provide WEX with non-fuel transaction data net of tax on a fleet-by-fleet basis at their discretion. The fleet will need to supply the merchant with proper documentation of their tax-exempt status at the point of sale for this to occur.

Q: What if a Purchasing Entity's fleet is entitled to a refund for motor fuel taxes that cannot be exempted up front through the WEX program?

In these instances, the "non-exemptible" tax is reported (not exempted) on the Purchasing Entity's fleet report. These reported taxes appear at the transaction level and at a summary level, providing them with supporting documentation, which can help them when filing for a refund of the non-exempted taxes.

Q: What types of tax information reporting will a Purchasing Entity receive?

At the transaction level, a fleet report will provide Gross Cost, Exempted Amount, Net Cost and Reported Taxes (for non-applicable taxes). Additionally, a Tax Exemption Summary will provide a detailed list of all taxes exempted, sorted by state and by tax type. Finally, a Tax Reported Summary will provide a detailed list of all taxes reported, sorted by state and by tax type.

Q: How does a Purchasing Entity know how many forms to send in?

If a Purchasing Entity qualifies for Federal exemptions, they need to send in one form per account or one form with a letter certifying all accounts belong to the same FEIN. If a new account is added in the future, a new form or amended certification letter will need to be sent. For state exemptions, each state is different and will be addressed on an individual basis.

Q: What if a Purchasing Entity believes there is an error with their exemptions?

The Purchasing Entity must notify WEX in writing within sixty (60) days of the billing date of the alleged error. WEX requests that the customer provide as many details regarding the error as possible including, but not limited to: transaction date and time, dollar amount and reason for alleging an error.

CERTIFICATE OF BUYER OF TAXABLE FUEL FOR USE BY A STATE OR NONPROFIT EDUCATIONAL ORGANIZATION

(To support credit card issuer's claim for a credit, refund, or payment under § 6416(a) (4) (B) or § 6427(l) (6) (D) of the Internal Revenue Code.)

WEX Account Number (if known):
Federal Tax Identification Number:
Certification:

The undersigned hereby certifies under penalties of perjury that I am the (Title of Officer):

_____

Of (Certifying Entity): _____

Entity Physical Address: _____

Entity Phone Number: _____

And that I am authorized to execute this certificate and that all purchases, are, or will be, purchased using a credit card issued by

(Credit Card Issuer): WEX BANK
7090 Union Park Center, Suite 350
Midvale, UT 84047

Buyer will use the taxable fuel to which this certificate relates for the exclusive use of: (check one)

☐	State government	☐	American Red Cross or Blood Collection Center
☐	Local government	☐	Indian Tribe
☐	Public nonprofit educational organization	☐	Volunteer Fire/Rescue
☐	Private nonprofit educational organization	☐	Foreign Diplomat (they must provide a copy of their PID Card)

and it applies to all exempt purchases of gasoline and diesel fuel, if eligible, using charge cards issued by the Credit Card Issuer named above. Information including the nature and quantity of each purchase of gasoline and diesel fuel (the subject of this Certificate) are evidenced by periodic reports provided by WEX BANK, the above- named Credit Card Issuer.

Certification will be valid for twenty-four consecutive calendar months commencing upon completion and remittance of this Certificate. WEX Inc. may extend the certificate period upon its discretion for an additional period not to exceed four months.

I understand that by signing this certificate, I, as an authorized representative of the entity named above, give up our right to claim a credit or payment for the taxable fuel purchased with the credit card to which this Certificate relates. I understand that the exemption from tax, in this case of sales of articles under the exemption Certificate, is limited to the sale of articles purchased for our exclusive use. I understand that the fraudulent use of this Certificate for the purpose of securing this exemption will subject us, and all parties making such fraudulent use of this Certificate, to fines or imprisonment, or both, together with the costs of prosecution.

The parties agree that a signed transmission shall be considered valid for purposes of this certification and that the parties hereby waive any claim that a transmission does not satisfy the requirements of a signature or writing under applicable law.

TAX EXEMPTION & REPORTING ENROLLMENT FORM

C. TERMS AND CONDITIONS

This Tax Exemption and Reporting Enrollment Form modifies a Participating Entity's charge card agreement based on their participation in the Tax Exemption and Reporting Program ("Program"). Signature on this form and a Participating Entity's continued use of their account constitutes acceptance of these terms and conditions. All capitalized terms contained herein shall have the same meaning as in the Master Agreement with the Contractor unless otherwise expressly provided herein. Except as amended hereby, the charge card agreement governing your account remains in full force and effect.

TAX EXEMPTION AND REPORTING PROGRAM

a. The tax exemption and reporting program (the "program") permits qualified tax-exempt Participating Entities to be billed net of certain "Applicable Taxes" (as defined herein and in Exhibit F). By completing this enrollment form the Participating Entity is electing to participate in the program. The Contractor will enroll a Participating Entity in the program upon receipt by Contractor of all of the Participating Entity's enrollment materials, including all required certificates, and validation of the Participating Entity's tax-exempt status. Upon completion of the Participating Entity's enrollment, their invoices will reflect the net amount due with a line item indicating total "Applicable Taxes" (as defined herein and in Exhibit F). The Participating Entity's reporting will provide a specific breakdown of Applicable Taxes deducted for each taxing authority or jurisdiction. Applicable Taxes are those federal, state, county and/or local taxes levied on the purchase of gasoline or diesel fuel for which the Participating Entity has provided the proper documentation to the Contractor showing their exempt status, and for which such documentation has been accepted by us and for which the Program provides exemption[1].

b. As the Participating Entity's credit card issuer, the Contractor has elected to provide Participating Entities with net billing of Federal excise taxes on fuel based upon the participation requirements in section (a) above. The Contractor will file a claim for refund with the Internal Revenue Service for these taxes. The Participating agrees that they may not file a claim for refund of any federal excise tax exempted by the Contractor and not billed to the Participating Entity by the Contractor.

c. For state, county, special and local taxes, merchants have the option of electing to participate or not to participate in the Contractor's program based on their own preferences and ability to obtain refunds from state/local taxing authorities. Transactions that occur at merchant locations not participating in this program will be billed to Participating Entities with the tax included regardless of their exempt status. In these instances the Participating Entity's reporting will contain a detailed listing of their transactions and the taxes charged to them. This information may assist a Participating Entity in filing their own claims for refunds if they so desire. Participating Entities agree that they may not file a claim for refund of any state, county, special or local taxes exempted by a participating merchant and not billed to them by the Contractor.

d. The tax certificates and other pertinent documentation on which a Participating Entity's exemption is based must be received by the Contractor from the Participating Entity in

order for the Contractor to provide the Participating Entity with net billing of any Applicable Taxes. These documents are required to be completed prior to any net billing of Applicable Taxes in order for the Contractor or a participating merchant to recover such exempted taxes from the applicable taxing jurisdiction. The Contractor shall have no responsibility to verify the correctness of the certificate supplied by a Participating Entity and shall be entitled to rely thereon in preparing the reports and tax exemptions until such time as the Contractor is notified by a Participating Entity in writing of a change in any such data. The Contractor reserve the right to terminate a Participating Entity's participation in the program, provided, however, that such termination shall not terminate the underlying Mater Agreement between the Participating Entity and the Contractor.

e. The Contractor shall calculate tax exemptions based on Internal Revenue Service or other applicable taxing authority guidelines for transactions made by the Participating Entity. For state, county and local taxes, only those transactions agreed upon by the participating merchant shall be treated as tax exempt[1]. If the Contractor is obligated to reimburse a participating merchant for any actual loss incurred or rebill a Participating Entity for any taxes previously exempted (including refunds denied and assessments of previously made refunds and penalties) attributable to the provision of a tax exemption to them, they hereby agree to reimburse the Contractor for said losses incurred.

f. For non-fuel transactions, merchants may provide transaction data to the Contractor net of tax at their sole discretion. Participating Entities would need to supply the merchant with proper documentation of their tax-exempt status at the point of sale. The merchant will send the transaction to the Contractor and the Contractor will bill the Participating Entity net of tax for those transactions. The Participating Entity will not receive reporting of taxes levied or exempted for non-fuel purchases.

g. The Contractor shall comply with reasonable requests for information retrieval made by the Participating Entity.

h. The Contractor cannot apply exemptions to transactions that occurred prior to the Contractor's receipt and acceptance of the Participating Entity's completed certificates.

i. The Contractor shall use reasonable efforts to correctly calculate the amount of tax included in each account arising from a tax exempt sale. The Contractor shall recalculate taxes only in cases where the Contractor miscalculated the original taxable transaction.

j. The Contractor disclaims all warranties in connection with tax-exempt reporting and invoicing and shall not be responsible for the accuracy or completeness of such reports. In no event shall the Contractor be responsible for loss, liability or damages, including consequential or special damages, costs and expenses, including taxes, penalties, interest and attorney's fees that arising as a result of any inaccurate or incomplete report which the Participating Entity may suffer or incur in connection with or arising out of the tax-exempt reporting/invoicing service offered hereunder.

WEX FLEET CLEARVIEW ENROLLMENT PACKET

1. Complete parts A and B.
2. Be sure to sign and date the form at the bottom.
3. Email to the Purchasing Entity's WEX Relationship Manager, (Fill in name and email address)

A. ACCOUNT INFORMATION

Company Name:	**Account Number:**
Authorized Fleet Contact Name:	
Fleet Contact Phone Number:	Fleet Contact Fax Number:
Authorized Fleet Contact Email:	

B. SERVICE OPTIONS

1. Please choose the ClearView product Purchasing Entity plans to enroll in at this time:
   - ☐ **ClearView Essentials** — Volume & Spend, Exceptions, Reports, Community, and Admin modules, Driver and Vehicle Detail, product code and odometer cleansing algorithms, and VIN decoding.
   - ☐ **ClearView Advanced** — Includes Essentials services plus additional functionality such as Fuel Price Explorer, Cost Outliers, Driver Fuel Purchasing Analysis, Driver Messaging, and Campaign Management and Tracking.

2. ClearView Essentials and ClearView Advanced customers can elect to enroll in ClearVieaw Snap for free by checking the box below:
   - ☐ **ClearView Snap** — Key purchasing information and analysis displayed in visual dashboards delivered automatically by email on a weekly and/or monthly basis. Instant voice command access and accompanying visuals using Snap's Alexa Skill.

C. FEES

WEX shall charge the following fee based on the Purchasing Entity's product election above:

(i) ClearView Essentials and ClearView Snap: $0.00 per month

(ii) ClearView Advanced: $0.25 per active card per month.

(Active card is defined as a card that is in active status vs. suspended or terminated status).

WEX reserves the right to change fees with prior written notice.

The ClearView program term will coincide with the Purchasing Entity's card program contract term.

By signing this form, the purchasing Entity agrees to the ClearView (and, if applicable, ClearView Snap) Terms of Use, which supplement the terms of the Purchasing Entity's credit agreement, included herein. The Purchasing Entity further represent that they are authorized to sign on behalf of their company.

Please read the terms on the following pages carefully before using this product.

WEX FLEET CLEARVIEW™ TERMS OF USE

1. **General:** WEX Inc. ("we," "us" and "our") will provide the ClearView platform ("CV") to the Purchasing Entity named in this Enrollment Form (also known as "you", and "your") subject to the following terms of use (the "Terms"). These Terms supplement the general terms of use for our online products as well as your credit agreement with WEX Bank or an approved WEX Issuer and may be used by you only for the purposes set forth in these Terms. You agree to abide by the Terms which shall be applicable to you upon your completion of this Enrollment Form. If you have any questions, please call our Customer Service department at 1-800-492-0669.

2. **Purpose of WEX Fleet ClearView:** The goal of CV is to allow you to perform data analysis for your Accounts (the "Purpose") through the use of this platform. You agree not to use CV for any purpose except to perform analysis on your Account data.

3. **Link and License:** You may access CV using the user login information we provide. We grant you a non-exclusive, non-transferable, limited right to log in and access CV. You agree not to purposefully interrupt or attempt to interrupt the operation of CV, its services or system resources in any way and you may not modify CV in any way nor upload, post or otherwise transmit any viruses or other harmful, disruptive, inappropriate, illegal or destructive files.

4. **Access and Security:** You will access CV using the Internet and your Internet service provider through portals provided by WEX and subject to the terms previously agreed to under your credit agreement with WEX Bank and any online terms previously agreed to for access to our products and features via our online portals.

5. **Important Disclosures:** The availability and effectiveness of portions of CV is dependent upon product codes that the merchant transmits to us. The product codes are assigned by each merchant, and as such, we are not responsible for inappropriate product code assignment, or any claims arising or damages resulting therefrom.

   ClearView includes machine learning algorithms that cleanse erroneous data we receive from third parties. WEX assumes no responsibility for any damages that may be suffered by you due to the use of CV's correction algorithms, in particular but not limited to any subsequent tax filings that you may make using reporting features on CV. WEX does not recommend that you use CV to submit for any fuel tax exemption reimbursements as revenue agencies may not accept this as evidence of your purchase and may still require actual sales receipts. Machine learning algorithms delivered in CV are not integrated with any other WEX systems or reporting.

   On occasion, we will make new products, modules, and functionality available to customers during a free trial, pilot, or beta test. We make no warranty that this new functionality will be error free or that defects, if any will be corrected, and we assume no responsibility for any damages that may be suffered by you due to the use of this functionality. Further, we reserve the right to alter and/or discontinue any new products, modules, and functionality that are offered as part of a free trial, pilot, or beta test.

   CV works best with more current versions of internet browsers, such as Chrome and Firefox. Use of older browsers, more specifically Internet Explorer (IE), is not recommended and should not be used to access and use CV. We assume no responsibility for sub-optimal CV use that may result by using a non-recommended browser.

   We will make an attempt to port in data from other programs and systems, such as customer-generated or third party data. We make no warranty that we will be able to successfully import non-WEX originated data into CV or that if successful this data will be error-free or that defects, if any, will

be corrected, and we assume no responsibility for any damages that may be suffered by you due to the use of this data.

Data, such as transactional data from a card swipe, could take up to 24-48 hours to load into CV.

6. **Modifications:** We reserve the right to modify, change or discontinue any aspect of CV and the products and services accessed via CV at any time upon 15 days prior written notice. We may also impose limits on certain features and services or restrict your access to parts or all of CV without liability.

7. **Versions:** New Versions: We may publish revised and/or new versions of both modules and documentation, such as the CV Quick Start Guides, from time to time ("New Version" or "New Versions").

   Effect of New Versions: When a New Version is published and/or revised, we may modify the Terms applicable to the New Version. You may commence using the New Version once published and/or revised at your election. You will be required to agree to any additional terms of use for a New Version prior to using any New Versions.

   Retirement of Versions: We may make CV product obsolescence and retirement decisions that maximize customer and marketplace benefits. We will notify you of such planned obsolescence and retirement decisions.

8. **Representations and Warranties:** CV is provided "AS IS" without any representation or warranty, express or implied, of any kind, including, but not limited to, warranties of merchantability, or fitness for a particular purpose. Notwithstanding the foregoing, we represent and warrant that to the best of our knowledge and belief: (i) the content developed by us available through CV: (a) does not and will not infringe any copyright, trademarks or trade secrets of any third party; and (b) does not and will not constitute a defamation or invasion of the rights of privacy or publicity of any kind of any third party, and (ii) CV does not violate the laws, statutes or regulations of any jurisdiction.

9. **Assignment:** You may not sell, assign, transfer or otherwise convey any of your rights or delegate any of your duties under these Terms without our prior written consent.

10. **Independent Parties:** Nothing in these Terms shall be deemed to constitute, create, give effect to, or otherwise recognize a partnership, joint venture or formal business entity of any kind or create a fiduciary or similar relationship between the parties not in existence prior to the effective date of these Terms; and the rights and obligations of the parties shall be limited to those expressly set forth herein.

11. **Questions:** For questions concerning these Terms, please call the following number: 1-800-492-0669, or send inquiries to: WEX Inc., 97 Darling Avenue, South Portland, ME 04106. Be sure to include your account number with all inquiries. For questions concerning CV, please email WEX at support@wexclearview.com.

ADDITIONAL CLEARVIEW™ PRIVACY ISSUES

1. Consumer Privacy Rules

The objective of this Privacy Policy is to provide you with a clear, concise and accurate statement of how WEX handles customer information. Please note that our products and services are intended to be used only for commercial and business purposes. As our products and services are not intended to be used for personal, family or household purposes, consumer privacy protection laws and regulations do not apply to our information handling practices for these programs. This Privacy Policy is not a statement of intent to be bound by or comply with such laws and regulations.

2. Security

WEX recognizes the importance of secure online interaction, and we utilize a number of methods to safeguard your transmissions. Our Website is hosted on secure servers with firewall protection. WEX uses Secure Socket Layer (SSL) encryption technology on our Website and information that is gathered is stored within secure databases protected by multiple firewalls. As effective as current encryption technology is, however, no security system is impenetrable. We cannot guarantee the security of our databases, nor can we guarantee that the information provided via our Website will not be intercepted while being transmitted to WEX over the Internet.

3. Children

WEX provides only business services and does not intend to collect or knowingly collect any information from or about children. It is possible that a child may impersonate a company representative and attempt to access or use this Website and, in so doing, provide the child's name, address, phone number, fax number, email address and other identifying information. When such information is received and WEX is aware that the individual providing the information is a child, the information is used only to reject the child's application and is immediately deleted by WEX. Such information is never shared with third parties. WEX cannot always determine if a visitor to its Website or the sender of an email is a child.

4. Cookies

Our Website makes use of a standard feature of browser software called a "cookie" to assign each visitor a unique, random number. A cookie is a file that identifies a computer as a unique user. Cookies may be used to facilitate your use of our Website, to maintain site security and to improve our Website. Most browsers are initially set up to accept cookies. You may be able to reset your browser to refuse all cookies or to indicate when a cookie is being sent. If cookies are disabled, however, our Website (and other Websites) may be harder to use. A cookie cannot read data stored on the hard drive of a computer.

5. Links to Other Websites

Our Website contains links to other sites whose information practices may be different than ours. If you click on a banner or other hyperlink, you may be transferred off of this Website. Our inclusion of hyperlinks to these websites does not imply any endorsement of the material on such web sites or associations with the operators of the websites. Our Privacy Policy does not extend to these sites or the internet. You should consult the other sites' privacy notices as WEX has no control over information that is submitted to, or collected by, these third parties and how that information is used.

6. Security of your Data in Cloud-Based Storage

ClearView uses cloud-based databases and employs a sophisticated firewall that protects from hackers and intruders attempting to gain access to your fleet data. As a protective measure, ClearView does NOT store full card numbers.

7. Security of Your Data across the Internet

A third layer of security is data encryption, or SSL, between the web server and your browser. Encryption helps prevent technically sophisticated individuals who have the desire, tools, and opportunity from intercepting your data as it travels over the Internet.

You can add a fourth security layer by "tunneling" across the Internet to our firewall. Tunneling requires installation of additional software and a fixed IP address, which may be acquired from your local systems

Technical questions and concerns relating to security should be directed to the WEX Inc. Webmaster at webadmin@wexinc.com. For questions relating to usage, please email support@wexclearview.com.

WEX PRIVATE SITE ENROLLMENT PACKET

Secure, live authorizations and integrated reporting for onsite bulk fueling transactions.

Choose Between Two Program Options:

1. **Private Site Program:** Allows Purchasing Entity to use the WEX Fleet Card to activate pumps at Purchasing Entity's onsite bulk fuel tanks allowing for increased security and asset-level fuel usage reporting on Purchasing Entity's bulk fuel. WEX captures Driver ID and odometer information, authorizes the card swipe, and provides integrated reporting of the Private Site transactions with Purchasing Entity's retail transactions while excluding onsite fuel transactions from Purchasing Entity's invoice.

2. **Private Site Rebilling Program:** Combines the same features and functionality of the private site program with the ability to allow other WEX Universal fleets to fuel at Purchasing Entity 's onsite bulk tank.* Purchasing Entity will receive a private site report that details all of Purchasing Entity transactions—both non-financial and rebilled. WEX will handle the reconciliation and settlement on Purchasing Entity behalf. WEX will bill the visiting fleet. Funds from the visiting fleet transactions will be automatically deposited in Purchasing Entity's bank account via ACH 30 days after the transaction posts in the WEX system.

   How It Works:
   - Fleet must have or install certified card readers (see certified equipment vendor list)
   - Drivers, who fuel at the site, are prompted for Driver ID and Odometer reading
   - Card reader provides fuel type, gallons, PPG, and total sale
   - WEX integrates the information into Purchasing Entity's fleet's reports
   - Depending on Purchasing Entity's set-up, certain fees may apply

   The Benefits:
   - Consolidates tracking of Purchasing Entity's onsite and retail fuel transactions into one comprehensive report.
   - Minimizes time, effort, and cost of administering fuel usage.
   - Purchase controls available through the Purchasing Entity's WEX card monitor private site transactions for card abuse and misuse.

   Easy Processing:
   - Driver swipes their WEX fuel card at the onsite card reader.
   - Card reader prompts driver for Driver ID and odometer reading on vehicle.
   - Card reader dials out via network to WEX for authorization.
   - WEX authorizes sale and pump activates.
   - Driver fuels vehicle.
   - Card reader sends final sale to WEX via network.
   - WEX processes this information and posts the information in Purchasing Entity's fleet reporting.

   *Rebilling functionality is only available for certain types of programs. Please contact the Purchasing Entity's WEX Sales Representative for more information.

Set-up and Maintenance

1. Customer contacts certified equipment providers found in the Private Site Agreement Packet
   - Customer obtains quotes, makes a purchase, and has the equipment installed
   - If the customer already owns equipment; they contact the vendor to confirm they have what is needed to process WEX
2. Customer completes the WEX Private Site Agreement Packet*
3. Customer emails the packet to MerchantApplications@wexinc.com
4. WEX begins the setup in WEX Systems**
5. WEX reaches out to the network to obtain a terminal ID number
6. WEX uses the terminal ID number to complete the setup
7. WEX emails a checklist containing the terminal ID and WEX Site ID to the customer
8. Customer reaches out to equipment provider or tech, and provides them with the checklist
9. Using the checklist, the tech contacts the network number provided to complete the setup

*Agreement is sent to WEX after the equipment has been installed
**Steps 3 – 7 are completed in 3-5 business days. WEX is unable to completed same-day setups.

PRIVATE SITE OWNER	*WEX*	NETWORK
SETUP		
1. Purchase or validate existing POS equipment and software with Purchasing Entity's vendor. All equipment must be certified by WEX. See the attached list of vendors to ensure a certified equipment purchase.		
2. Provide a completed and signed Private Site Agreement (see attached) to WEX. *If participating in Rebilling, complete the Rebilling portion of the agreement as well.	**3.** WEX Merchant Operations updates the fleet accounts, including transaction pricing, setup costs and site(s), and works with the Network to obtain the Purchasing Entity's Private Site Merchant / Terminal ID. *If participating in Rebilling, Merchant Operations will set up the banking information needed for settlement.	
	4. Confirms set up of all locations and sends the Purchasing Entity the Welcome Packet that includes Purchasing Entity's Network assigned and WEX Site ID's.	
5. Contact Purchasing Entity's Equipment Provider to initiate a software download to complete the setup process.		
6. Run connectivity test with equipment vendor and network to assure transactions are authorizing and posting correctly.		
ONGOING		

Maintain the POS equipment.	Provide reporting of private site transactions in purchase reports	Provide processing support for the private site owner/operator
Notify WEX Merchant Operations of equipment changes, new additions, or software updates.		
Ensure security at the site.		

CERTIFIED EQUIPMENT VENDOR LIST

Below is a list of the current contacts at each of the respective equipment providers WEX works with for private site set-ups:

FUELMASTER	
Edye Michelle Coxwell Distributor Relations Coordinator	(800) 888-9136, ext. 1444 edye.coxwell@myfuelmaster.com www.myfuelmaster.com

E. WEX BANKING AUTHORIZATION FORM (Rebilling Only)

BANK ACCOUNT INFORMATION

Private site owner/operator hereby authorizes and requests WEX to make payments of amounts owing to private site owner/operator by WEX by initiating credit entries to private site owner/operator's demand deposit account at the Bank indicated below ("private site owner/operator's bank"), and authorizes and requests private site owner/operator's bank to accept any credit entries initiated by WEX to such account without responsibility for the correctness thereof. In the event of an overpayment or payment in error, private site owner/operator hereby authorizes WEX to initiate a debit entry to the account for each overpayment or payment in error. It is understood that for purposes of this Agreement, the term "private site owner/operator's bank" shall mean and include the bank identified below by private site owner/operator and any successor bank identified to WEX (i) in a Notice of Change provided to WEX by any Automated Clearing House Association processing credit or debit transactions under this Agreement, or (ii) by private site owner/operator, whether orally or by other non-written means. Any such notification to WEX shall be effective only with respect to entries credited to private site owner/operator's account by the Bank after receipt of such notification and a reasonable time to act upon such notice. Private site owner/operator agrees and acknowledges that WEX will not be liable to private site owner/operator for any damages resulting from the performance or the failure to perform of any Automated Clearing House Association. Funds from the visiting fleet transactions will be automatically deposited in the private site owner/operator's bank account via ACH 30 days after the transaction posts in the WEX system.

WEX must receive a completed W-9 and Form 590 in order to process application.

AUTHORIZED SIGNATURE

PRIVATE SITE OWNER/OPERATOR: The undersigned represents and warrants to WEX that all of the terms and conditions of this WEX Private Site Program Application consisting of this entire document in addition to any other document or addendum including the EX Private Site Program Application have been reviewed in their entirety, are true and correct, and set forth the agreement between WEX and the private site owner/operator. Additionally, the undersigned represents and warrants that he or she has authority to sign and to bind Merchant to the terms of this Application. Also, the undersigned represents that the undersigned has the authority to provide information and execute this Application on behalf of the private site owner/operator. The Agreement shall only become effective upon WEX's acceptance of the Agreement and the Application at its headquarters following approval, and the assignment to private site owner/operator of a private site owner/operator processing identification number. The private site owner/operator further affirms that they are establishing a credit card processing relationship with the processor indicated on the attached WEX private site application. Once WEX begins processing credit cards through this processor, our company does not intend to process any transactions through a processing agreement with a branded petroleum marketer.

By signing and submitting this Private Site Agreement, the Purchasing Entity agrees to adhere to the WEX Private Site Card Sale Procedures incorporated herein as Exhibit A.

G. FEES

WEX shall charge the following fees:

(i) a set-up fee waived per site; and

(ii) a transaction fee of $0.15 for each card sale that is made using the private site owner/operator WEX charge card account.

(iii) a transaction fee of $0.15 for each WEX card sale that is made by a visiting fleet ("Foreign Transaction Fee") will be assessed to such visiting fleets for (iv) the purchases that they make using the sites set forth herein.

(v) WEX may increase the transaction fees, in its sole discretion.

☐ Check box if the Purchasing Entity has a separate negotiated rate under a Master Contract. Include the contract with their Private Site Agreement submission.

The contract is needed in order for set up to be completed.

H. MISCELLANEOUS

The parties agree that a signed facsimile transmission shall be considered valid for purposes of this enrollment form and satisfies the requirements of a signature or writing under applicable law. The undersigned represents and warrants to WEX that all the terms and conditions have been reviewed in their entirety, all information provided in this request form is true and correct, and he or she has been duly authorized to sign and to bind the private site owner/operator to the terms of this agreement.

WEX PRIVATE SITE CARD SALE PROCEDURES

1. Method of Transmission Of Card Sales To WEX

A. MERCHANT shall have the necessary equipment to permit the electronic acceptance of the Card at its Distribution Sites including but not limited to their point of sale equipment and networking services.

B. MERCHANT shall collect and transmit the Card Sale data in accordance with the WEX Technical Specification. Merchant shall obtain from WEX the necessary acceptance certification for its network and equipment that will be used for processing sales transaction.

2. Minimum Card Sale Processing Requirements

A. Card Sale data sent to WEX shall include: account number, vehicle number, driver identification number, sales date, sales time, site identification number, authorization number, product code(s), quantity, total sales amount (in dollars), odometer, ticket number and any other information as WEX and MERCHANT may mutually agree upon. MERCHANT is responsible for the inclusion of any applicable taxes on the fuel when allowing a non-tax exempt fleet to utilize the fuel at its locations. WEX will not add any taxes to the total PPG of any private site transactions transmitted by MERCHANT.

B. All Card Sales require an authorization or approval from WEX. MERCHANT shall request such authorization from WEX for the total Card Sale amount prior to sending the Card Sale to WEX for processing.

C. WEX does not provide pre-authorizations, nor does it place available credit on "hold". If MERCHANT calls prior to completion of the services being provided to the cardholder, MERCHANT still needs to obtain an authorization number upon completion of the services or Card Sale to obtain payment from WEX.

D. An authorization or other approval code is not a guarantee that MERCHANT will receive payment. WEX does not provide payment to merchants based upon receipt of information during the authorization process. MERCHANT is still required to submit the completed Card Sale, including the authorization or other approval code, to WEX. Obtaining an authorization without submitting the completed Card Sale to WEX may result in non-payment by WEX for such Card Sale.

E. MERCHANT shall not accept payment through use of an expired Card or when advised upon authorization inquiry, that the Card is not to be honored.

F. MERCHANT shall never make a Card Sale when MERCHANT believes or has reason to believe that the Card may be counterfeit or stolen or the Card Sale is in any way fraudulent or otherwise suspicious.

G. Merchant shall maintain a record of all information required in Section 1.3.A above.

H. If the Card Sale is not an island card reader transaction ("pay-at-the-pump"), MERCHANT shall require the cardholder to sign the transaction receipt unless the total for the Card Sale is less than $25.

I. Any Card Sale data received by WEX from MERCHANT by 5:00 p.m. Eastern Time ("ET") shall be treated as having been received on the next business day.

J. MERCHANT shall not divide the price of goods and services purchased in a single transaction among two (2) or more transaction receipts for billing to WEX.

K. Merchant must not submit Card Sales until Products are delivered.

L. A Card must be present at the time of purchase. In the event that MERCHANT processes a Card Sale when the Card is not presented, MERCHANT bears the risk of the sale being charged back.

M. MERCHANT shall maintain a record of the Card Sale, including all sales data required for a period of **one (1) year**. Upon the reasonable request of WEX, such records shall be provided to WEX within **thirty (30) calendar days** of WEX's request. Failure to provide the requested record will result in a charge back of the Card Sale to MERCHANT.

3. Data Input and Transmission

A. Merchant is responsible for the data entry of Card Sale information by its personnel, or representatives. All data shall meet the WEX Technical Specification and shall be in good and usable condition.

B. If information pertaining to any Card Sale is garbled in transmission such that part or all of the record is likely to vary from what MERCHANT transmitted, WEX may advise MERCHANT of the suspected inaccuracy and request retransmission of the record or other appropriate confirmation. WEX may, with notice to MERCHANT, withhold payment for such Card Sales until the record is retransmitted or MERCHANT provides other appropriate confirmation.

C. If MERCHANT has not provided WEX with required information or that WEX needs to interpret, verify, or validate a Card Sale, WEX may, withhold payment for such Card Sale until MERCHANT sends WEX the necessary information. WEX may make appropriate adjustments in its settlements with MERCHANT to reflect the receipt or correction of any such Card Sale information. WEX shall provide notice to MERCHANT of any Card Sales that it is not able to process due to errors or missing information through its daily settlement reports.

D. MERCHANT shall submit all Card Sales to WEX for processing within **thirty (30)** days of the transaction date. WEX may accept transactions up to **one hundred and twenty (120) days** from the date of the transaction for processing and billing to the fleet, however, reserves the right to chargeback any such transaction that is disputed by a fleet customer.

E. MERCHANT authorizes WEX to refer to a default price per gallon table, which may be used when the calculated price per gallon for the transaction falls outside of WEX's acceptable range of pricing which is updated from time to time by WEX based upon market conditions. The table is based upon average price per gallon data collected from all merchants who accept WEX Cards.

F. MERCHANT authorizes WEX to refer to the authorization log to obtain information to complete the processing of transactions in the event that errors are detected by WEX during processing. It is understood by the parties that the information contained in the authorization log is the "actual, real-time" information received by WEX from the MERCHANT at the time the use of the charge card was authorized. If sufficient information is not available in the authorization log to correct any errors in the transaction file received by WEX from MERCHANT, then these transactions will be returned back to MERCHANT for correction.

G. Use of the defaults in Section 1.3.E and 1.3.F above does not affect the total transaction value submitted for settlement and is only used to facilitate reporting to fleet customers. It does not relieve MERCHANT of its requirements to provide accurate and complete data as set forth in 1.2.A for Card Sales.

WEX PRIVATE SITE CARD SALE FREQUENTLY ASKED QUESTIONS

How does it work?

Drivers swipe their WEX fuel cards through the Purchasing Entity's WEX-certified equipment reader and enter a Driver ID and the vehicle's odometer reading. The transaction information is transmitted by the network to WEX for approval. In a matter of seconds, a driver using an authorized card can begin fueling. All of the Purchasing Entity's transaction information appears on their WEX purchase report.

What equipment will a Purchasing Entity need?

A purchasing Entity will need to purchase a card reader (or upgrade existing equipment) to match WEX and network requirements (see certified equipment vendor list).

What is the cost?

There is a one-time set up fee that is waived and a $0.15 per transaction fee. Costs to purchase new card readers (or upgrade current equipment) vary by vendor so the Purchasing Entity will need to negotiate their purchase.

Are there other costs that might be associated with set up?

Depending on Purchasing Entity's chosen network and equipment vendors, there could be additional hardware and software costs. Please contact the Purchasing Entity's providers for more information.

How does a Purchasing Entity sign up?

Just complete the enclosed Private Site Agreement and submit it to WEX.

What equipment provider would WEX recommend?

WEX provides the Purchasing Entity with a certified equipment vendor list to choose from. The Private Site Owner/operator is responsible for the purchase and upkeep of the equipment.

Who do I contact with issues regarding incorrect product coding or reporting from the Purchasing Entity's equipment?

The Purchasing Entity's vendor or network will be able to ensure proper downloads and configurations are reporting correctly.

What is a network?

A network is a third party processor who sends a transaction files from the Purchasing Entity's equipment to WEX for electronic processing.

What information should a Purchasing Entity provide the network helpdesk if they need to call?

Be sure to have the Merchant/Terminal ID for the location the Purchasing Entity is calling for. This along with the Network Contact numbers can be found on the Welcome Packet received from WEX.

If a Purchasing Entity participates in Rebilling, how do they receive the funds for the fuel used by visiting fleets?

Upon enrollment, WEX will collect the Purchasing Entity's banking information to set up ACH payment. The funds for visiting fleet transactions will be automatically deposited in their account under the payment term of their contract.

If I allow visiting fleets to fuel at my location, how will I be able to keep track of those transactions?

Each month, WEX will send you a private site merchant report. The report will provide detail on all visiting fleet transactions. In addition, your transaction detail report will include both local and visiting fleet transactions.

WEXPAY ENROLLMENT PACKET

FAX to: _____ **FAX #: _____**

1. Complete parts A and B.
2. Be sure to sign the form and keep a copy for the Purchasing Entity's records.
3. Fax completed form to: 1-800-516-7536.

A. ACCOUNT INFORMATION

Authorized Fleet Contact:	Phone No.:
Fleet Contact email:	Fax No.:

B. SETUP INFORMATION

Complete the below items:

_____ Number of Alternative Authorization Instruction cards needed. (WEX recommend at least one per driver using WEX*Pay*)

$_____ How much spend does the Purchasing Entity anticipate? (Credit line may need to be reviewed)

C. TERMS AND CONDITIONS

These terms and conditions supplement the WEX ® Business Charge Account Agreement (the "Agreement") between the Purchasing Entity and WEX Bank ("Issuer"). The following additional terms and conditions shall be applicable to their account upon their completion and WEX's acceptance of this WEX*Pay*™ Request form. The Participating Entity's continued use of their account and the product referenced herein constitutes acceptance of these terms and conditions. All capitalized terms shall have the same meaning as in the Agreement, as amended from time to time.

Issuer will provide single use virtual MasterCard® Cards for purchases made by the Purchasing Entity only at U.S. merchant locations that do not accept the WEX® Universal Fleet Card. A virtual card is one where there is no plastic issued, only card numbers. Single use virtual cards may be used for purchases one time only. MasterCard International's chargeback rules apply. The Purchasing Entity's MasterCard purchases will appear on their WEX® Universal Fleet invoices. The Purchasing Entity agrees to
pay and/or perform, as the case may be, when due all indebtedness, obligations and liabilities of each MasterCard account established pursuant to this request of every kind, nature and character whatsoever, including, without limitation, (i) all amounts payable under each account, (ii) all obligations, covenants, and agreements contained herein. Purchases are due and payable in full by the Purchasing Entity upon billing in accordance with the terms of credit Agreement with Issuer.

In the event the Purchasing Entity currently participates in any rebate or discount program offered by Issuer for the WEX® Universal Fleet card purchases, their purchases made using WEX*Pay*™ will apply to such rebate or discount provided they meet any conditions of such rebate or discount program.

Issuer reserve the right to modify or terminate WEX*Pay*™ at any time upon 15 days notice to the Purchasing Entity.

Issuer will provide WEX*Pay*™ Alternative Authorization Instruction card for the Purchasing Entity's distribution to their drivers. When their drivers present the Alternative Authorization Instruction card to a merchant, the merchant may, at the merchant's discretion and their own risk, either complete the work or contact Issuer to validate the Purchasing Entity's account. Issuer will not pre-authorize the transaction if the work has not been completed but WEX will provide the merchant with a reference number so that they may contact WEX upon completion of the work for payment authorization. In order to validate the Purchasing Entity's account WEX must preview their account information and this may affect their control limits, if the Purchasing Entity has set them on their account, including the number of transactions available per day and the total daily dollar limits. The Purchasing Entity should check their current controls (if any) to be certain that they have sufficient limits for these transactions. If they make any changes or set any control limits, the Purchasing Entity agrees that WEX is authorized to rely on such changes and WEX will not be responsible for any losses resulting from such changes. The Purchasing Entity will also agree that WEX will not be liable to the Purchasing Entity for any loss, liability or damages they suffer which arise from, are related to, or are in any way connected with any fraud control or purchase restrictions such as Authorization Controls which WEX implements from time to time. WEX is not liable on account of any merchant's refusal to honor the MasterCard or to participate in the WEX*Pay*™ process, regardless of the reason.

The person signing this Out-of-Network Authorization Process Request represents and warrants that he/she is authorized to execute this Request.

EXHIBIT F

DEFINITIONS

This exhibit provides definitions of terms used throughout this Master Agreement and exhibits.

Account: For purposes of this Master Agreement, cards do not represent an individual account. Accounts are established within the WEX system in the Participating Entity's hierarchy where the cards are issued from. The Account contains the overall credit line and authorization controls that are applied to one or many cards.

Account Coordinator: Employee of the Contractor assigned to a Participating State or Purchasing Entity to provide day-to-day assistance with regard to program card maintenance.

Annual Volume: Total volume spend by all Purchasing Entities within a Participating State for all card liability products in a calendar year.

Applicable Taxes: Federal, state, county and/or local taxes levied on the purchase of gasoline or diesel fuel that may be eligible for tax emption by the Contractor.

ASC X12: Official designation of the U.S. national standards body for the development and maintenance of Electronic Data Interchange (EDI) standards. Also known as ANSI ASC X12.

Associations: Group of card-issuing banks or organizations that set common transaction terms for merchants, issuers, and acquirers. Some major associations are Visa, MasterCard American Express and Discover. Also referred to as Network.

Authorization Controls: Controls that are established in the WEX system and assigned to every card to determine the purchasing rules for cards assigned to the given control profile. Like an Emergency Card, emergency authorization controls can also be established.

Authorized User/User: Representative of Purchasing Entity that leverages a Commercial Card, manages Commercial Cards, and/or accesses the online system

Automated Clearing House (ACH): Central distribution point for transferring funds electronically for participating depository financial institutions. Transactions are accumulated and sorted by destination for transmission during a predetermined period. It includes small dollar payments in large transaction volume.

Bank Overrides: A transaction that has been pushed through by the Contractor.

Basis Points: Unit of measure for incentive share/rebate rates. One basis point is equal to $1/100^{th}$ of 1% or 0.01% or 0.0001.

Bidder: Any entity submitting a bid or response to the solicitation

Billing Cycle: A specific recurring time period between the time statements of account/invoices are processed.

Card Issuer: Financial institution issuing a Commercial Card or account. Also referred to as a card issuer, card provider or bank. For the avoidance of doubt, Contractor shall be the sole Card Issuer under the Master Agreement and Participating Addenda.

Card User Agreement: Agreement between the Purchasing Entity and awarded Contractor verifying credit availability, account information, and agreeing to the terms and conditions of the Master Agreement and Participating Addendum.

Cardholder: An employee, contractor, or representative of a Purchasing Entity to whom a Commercial Card is issued for making designated business purchases/payments on behalf of his or her organization.

Card-less Accounts/Ghost Cards: Accounts that have no plastic card issued, only an account number to which the acquisition of goods and services are charged.

Centrally Billed Account: Card accounts are billed to the Purchasing Entity or program within a Purchasing Entity. CBA accounts are paid directly by the Purchasing Entity.

Client-held Days: Number of days from the billing cycle date to the date payment is received.

Commercial Card: Generic term for any card product used by organizations for making payments for various goods, services and business expenses.

Contractor: The entity/entities awarded a Master Agreement and/or Participating Addendum(s) as a result of the evaluation of the bids received in response to a solicitation.

Corporate Liability: Purchasing Entity is liable for all card transactions and fees.

Credit Application: WEX form to establish a credit line with WEX Bank and adhere the contractual terms & conditions of this Master Agreement to the Purchasing Entity.

Declined Transaction: Transaction where authorization has been refused by the Card Issuer's transaction authorization system.

Duplicate Transaction: a transaction that has been processed twice for the same purchase.

Department: Functional business unit of an organization such as purchasing, accounting, human resources, etc.

Department Card: Card issued to a department rather than a specific cardholder.

Declining Balance/Managed Spend Card: Specialized Purchase Card with a pre-set spend limit and expiration date that is typically non-replenishing. Also referred to as a Controlled Value Card.

Electronic Payables: A form of electronic payment, utilizing the card infrastructure, managed centrally within an organization, typically by accounts payable. Also known as electronic accounts payable (EAP), automated payables, e-payables, Virtual Payment Cards, push payments, straight through payments 9STP), buyer-initiated payments (BIP), supplier/vendor card, single-use accounts and

electronic invoice presentment and payment (EIPP). Each provider has a proprietary name for its solution; functionality and processes vary for each.

Eligible Purchaser: A Purchasing Entity authorized pursuant to the execution of a Participating Addendum.

Emergency Card: A type of Commercial Card that is always open, active and ready for use. Usually equipped with high or no credit limits and are used in emergency response situations.

Entity Program Administrator(s): A common role responsible for various administrative tasks (i.e., ongoing operations) in a typical Commercial Card program, including card issuance, account maintenance, card cancellation and reporting.

File Turn: Number of days from the date a transaction is posted to an account to the date payment is received.

Fleet Card: Specialized Commercial Card used to capture fleet-related expenses and vehicle data (e.g., fuel, vehicle maintenance, repair, and service).

Foreign Transaction Fee: A charge applied to purchase made in foreign countries (outside the United States). Purchases made online from your home country where the vendor is foreign and processes the transaction in its local currency.

Fraud: Unauthorized use of a card, resulting in an acquisition whereby the Purchasing Entity does not benefit.

Implementation: Process of putting all card program functions and activities into place.

Interchange Rate: A rate, set by the Network (i.e., Visa, MasterCard, Discover, American Express), collected by the card issuer to cover the cost of processing the transaction.

Lead State: State responsible for soliciting for and managing the awarded Master Agreement.

Level 1 Data: Standard commercial transaction data that includes the total purchase amount, the date of purchase, the merchant category code, merchant's name, city/state, debit/credit indicator, date transaction/credit was processed by the Contractor, Contractor processing/transaction reference number for each transaction/credit, and other data elements as defined by the Associations or similar entity.

Level 2 Data: In addition to Level 1 data, includes sales tax amount, company information, and other data elements as defined by the Associations or similar entity.

Level 3 Data: In addition to the Level 2 data includes cost, quantiles, unit of measure, product codes, product descriptions, and ship to/from zip codes, freight amount, duty amount, order date, discount amount, order number and other data elements as defined by the Associations or similar entity.

Master Agreement: Underlying agreement executed by and between the Lead State and the Contractor, as now or hereafter amended. May also be referred to as contract or Master Contract.

Master Agreement Administrator: Employee of the Lead State responsible for soliciting for and managing the awarded Master Agreement

Master Agreement Authorized Representative: Employee of the Bidder authorized to sign bid submittal documents, provide bid clarification responses, and function as the primary point of contact during the solicitation and evaluation.

Merchant Category Codes (MCC): A system of four-digit codes, maintained by networks, used to identify a merchant's principle trade, profession or line of business; a MCC is assigned to a merchant by the merchant or merchant acquirer.

Merchant Negotiated Transaction: Transaction completed with a merchant that has an agreement with the Association to complete theirs at a lower than standard interchange rate.

Merchant Negotiated Volume: Total quarterly merchant negotiated volume spend by a Purchasing Entities for all card liability products in a Quarter.

Merchant Overrides: A transaction that has been pushed through by a merchant location.

National Annual Volume: Total annual volume spend by all Participating States/Purchasing Entitles for all card products in a calendar year.

National Annual Volume Incentive: Rebate or Incentive Share earned by a Participating State based on their contribution to the National Annual Volume.

Network: Entity that facilities the movement of transactional data between the Card Issuer and acquirer and sets merchant rules for card acceptance. Organizations in this role include Visa, MasterCard, American Express and Discover. Also referred to as Association.

Non-Standard Volume: Transactions that are processed using Reduced Interchange Rate as determined through an agreement between the merchant and the Association.

Participating Addendum: An agreement signed by the Contractor and a Participating State that incorporates the Master Agreement and any other additional Participating State specific terms and conditions.

Participating Addendum Administrator: Employee of the Participating State responsible for the management and administration of the Participating Addendum.

Participating Addendum Authorized Representative: Employee of the Participating State authorized to sign the Participating Addendum.

Participating State: Any State, territory or entity (authorized by a state's chief procurement officer) that chooses to execute a Participating Addendum under the awarded Master Agreement. May also be referred to as Participating Entity.

Participating State Annual Volume: Total annual volume spent by a Participating States for all card products in a calendar year.

Product Code (PC): A unique identifier, assigned to product types (e.g. maintenance, tires, etc.) within a Fleet management system.

Program Administrator(s): Refers to Participating Entity, Purchasing Entity, or Statewide Program Administrators.

Program Administrator Overrides: A transaction that has been pushed through by a Program Administrator.

Prompt Payment Incentive: Rebate or Incentive earned by a Purchasing Entity based on their average speed of pay/file turn days.

Purchasing Entity: Any eligible organization executing a Card User Agreement as allowed by a Participating Addendum under the Master Agreement.

Quarter: Three (3) month period based on the yearly calendar as follows:

Quarter 1(Q1) – January, February & March
Quarter 2 (Q2) – April, May & June
Quarter 3 (Q3), July, August, September
Quarter 4(Q4) – October, November & December.

Quarterly Non-Standard Volume: Total Non-Standard Volume sales for a Quarter.

Quarterly Non-Standard Volume Incentive: Rebate or Incentive Share earned by a Purchasing Entity based on their Non-Standard Volume sales for a Quarter.

Quarterly Standard Volume: Standard Volume sales for a Quarter.

Quarterly Standard Volume Incentive: Rebate or Incentive Share earned by a Purchasing Entity based on their Quarterly Standard Volume.

Quarterly Total Volume: Total quarterly volume spend by all Purchasing Entities for all card liability products in a Quarter.

Relationship Manager: Employee of the Contractor assigned to a Participating State or Purchasing Entity to provide day-to-day assistance with regard to program card maintenance.

Reduced Interchange Rate: A lower interchange rate for processing Commercial Card transactions.

Standard Volume: All transactions, less Non-Standard Volume, fees, cash advances, convenience checks, Fraud, chargebacks and net of Write-Off Adjustments.

Statement/Invoice: Document reflecting account details for the billing period including debits, credits, transaction detail and balance due.

Statewide Program Administrator: Employee of the Participating State who administers the State's Purchase Card and or Fleet Card Program(s)

Transaction: Exchange between cardholder and merchant, payment for goods and/or services.

Virtual Cards/Single Use Card: One time use account numbers.

Write-Off: A cancelled account with an unpaid balance determined to be uncollectible by the Contractor. Accounts are considered uncollectible once delinquent for one-hundred-eighty (180) days after billing cycle close date. At the Contractor's discretion, collection action may continue on these accounts.

EXHIBIT G

FLEET CARD SERVICE REQUIREMENTS

This exhibit details Fleet Card service requirements and Contractor responses to how these requirements will be met as submitted with their bid.

1. RESERVED – Identifies card products available in Exhibit A.

2. ADMINISTRATION OF ACCOUNTS

2.1 System must allow for Program Administrator to setup new accounts online – including ordering and registering cards, establishing User ID and password.

2.2 System must allow for Program Administrator to add, edit, or remove single or multiple Product Codes (PC) or Merchant Category Codes (MCC) from multiple card accounts at once.

2.3 System must allow for Program Administrator to initiate one-time overrides per transaction.

2.4 System must allow for Program Administrator to establish roles, access, and authority levels for all user types (i.e. managers, approvers, cardholders) within the Purchasing Entity.

2.5 System must allow for Program Administrator to unlock system access, reset User ID and reset password for any User within the Purchasing Entity.

2.6 System must allow for Program Administrator to see changes made to a card profile and who made those changes.

2.7 System must allow for system to allow Program Administrator to view cancelled, deactivated and suspended cards within the Entity.

2.8 System must allow for Program Administrator to order and issue replacement cards (singular or multiple simultaneously) online.

2.9 System must allow for Program Administrators and Cardholders to access statements online.

2.10 System must allow for Program Administrators and Cardholders to mark accounts for paper or paperless statement delivery.

2.11 System must notify Program Administrators and Cardholders of statement availability.

2.12 System must allow for Program Administrator and Cardholders to check status of cards and view account information including but not limited to:

- balances
- limits
- charges
- declined transactions
- spend history
- default accounting codes
- demographics

2.13 System must allow for the Program Administrator to choose the billing cycle close date for the Purchasing Entity. The billing cycle date will be established at account implementation and will be set for the Purchasing Entities' agreement period.

2.14 System must have the ability to roll-up billing to managing account level or bill at department level as determined by the Purchasing Entity.

2.15 System must display all transactions in US Dollars.

2.16 System must be able to restrict fuel type at the card and/or vehicle level by not allowing the wrong fuel type to be purchased and by being able to report exceptions for wrong fuel type.

2.17 System must be able to apply hard limits on quantity (gallons) of fuel dispensed.

2.18 System must be able to restrict maintenance purchases.

2.19 System must allow for Program Administrator to reset Driver PIN online and in real time.

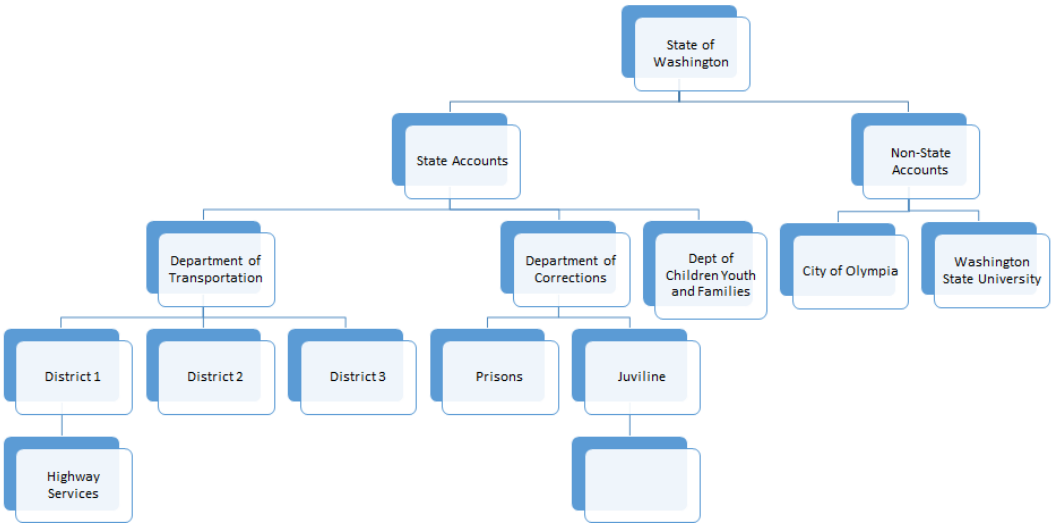
2.20 System must have the ability for Program Administrator to set/change PIN for each driver and/or vehicle.

2.21 System must be able to provide federal fuel tax exemption prior to invoicing.

2.22 Reserved, see Exhibit D Establishing an Account.

2.23 System must allow for Program Administrator to edit User ID, role and authority level online.

WEXOnline® allows the Program Administrator, or other individuals with appropriate permission levels, to add/edit new online users, manage existing users, and manage online enrollment requests. The module also allows for a prospective user to self-enroll online and have their request route to a Program Administrator to be approved and have the appropriate level of access assigned to them by the Administrator. A prospective user is not granted any level of access until after their request has been approved by a Program Administrator and their level of access is assigned.



The administrator retains ultimate control over access and assignment of roles, authority level and privileges allowed online. The module contains prepopulated templates for roles with varying levels of permissions available online to control the access an individual may have for their given job duty. The module also allows for users to create custom roles for levels of access specific to an individual or job duty. This creates appropriate account and system access, based on user responsibilities; ultimate control over who has access to the module, what level of access, and to what accounts; and the ability to track user logins.

Additionally, WEXOnline® allows users to reset their passwords on their own should they need to do so. This allows for a greater level of control at the user level and helps minimize the need to reach out for assistance with a reset.

2.24 System must have a minimum of seven (7) program hierarchies.

WEX's system allows for robust account structures and reporting functionality. WEXOnline® supports nine (9) levels of hierarchy, providing a high level of detail and flexibility. The levels of hierarchy are customizable to the set-up of an individual entity participating in the contract to meet their specific needs.

For example, the State of Washington could be set up as a level 1 (L1) account with multiple L2 accounts hanging off of the overall contractual relationship. The accounts under the L2 would then have the ability to structure the departmental breakdown unique to that agency or entity.

- Identifying accounts:
  - Accounts can be identified in multiple ways in WEXOnline®. WEX offers custom reporting, account search functionality, and visual hierarchy layouts that are collapsible for finding and identifying accounts. Reporting can also offer account details about the account with the hierarchy regarding addresses (shipping, billing, primary and physical) total drivers and/or vehicles, total cards, default authorization profile, and primary shipping method and carrier.

- Reporting rebate earnings:
  - WEX does offer rebate reporting that provides a full breakdown of rebate for a given time period. WEX will work with states at implementation to get the appropriate rebate reporting set-up to cover their needs.

- Reporting transaction data:
  - All WEX transaction data is available within WEXOnline® to view and is reportable through the system. Additionally, WEX offers custom files and file interfaces to provide transactional data to customers. Below are several templated examples of how transactional data as well as authorization data can be accessed in WEXOnline®.
    - Custom Report/ Authorization Activity – This template helps users build a custom report with a direct view of authorization activity, including declines transactions.
    - Custom Report/ Transaction Management – This template permits users to generate a transactional-level report, whereby a user may analyze usage at certain merchants, or within certain timeframes, or exceeding specified dollar amounts and more.

2.25 System must allow for a Statewide Program Administrator account with access to view and pull reports for all transactions made by Purchasing Entities within the Participating State under this Master Agreement.

WEXOnline® allows for a Statewide Program Administrator with access to view and pull reports for all transactions made by Purchasing Entities within the Participating State under this Master Agreement. This would be accomplished by providing the administrator with an access role rooted at the top of the hierarchy. This can be accomplished through either the templated roles available within the module or creating a custom role should it be required.

2.26 System must allow for Program Administrator to simultaneously activate, deactivate, suspend, and terminate cards online.

WEXOnline® allows the Program Administrator to update cardholder and vehicle information online, including simultaneously activating, deactivating suspending or terminating cards. This is accomplished by providing the administrator with edit access to vehicle/cards and driver information. The administrator can select multiple cards and then choose to activate, deactivate, suspend or terminate these cards simultaneously. Additionally, through the account support provided by WEX, an agency can also send large amounts of data to the WEX Premium Fleet Services Account Manager to handle for them on their behalf. For example, if a State's motor pool had a large amount of new vehicles incoming or old vehicles being sold, the agency's fleet manager could send a spreadsheet of the information to WEX to activate, deactivate, suspend or terminate cards on the State's behalf. This often helps save time, energy and resources in a given agency.

2.27 System must allow for Program Administrator to update all cardholder information online, unless barred by Federal Regulation.

WEXOnline® allows the Program Administrator to update all cardholder and vehicle information online. This is accomplished by providing the administrator with edit access to cardholder/driver information. Additionally, through the account support provided by WEX, an agency can also send large amounts of data to the WEX Premium Fleets Services (PFS) Account Manager to handle for them on their behalf. For example, if a State agency had a large amount of seasonal workers coming on again to work, the agency's fleet manager could send a spreadsheet of the information to WEX to activate, deactivate, suspend or terminate drivers/card holders on the State's behalf. This often can help save time, energy and resources in a given agency. WEX Fuel cards are not individual liability cards, so WEX is not aware of any Federal Regulations preventing the editing of cardholder information online.

2.28 Throughout the life of the Master Agreement and associated Participating Addendums, Purchasing Entities may have reason(s) to cancel a card (or a group of cards).

Cards or groups of cards can easily be canceled within the WEXOnline® module. Cards can be found under the Fleet Manager tab, administrator can search to find the card or group of cards an authorized user may want to cancel. Once a card has been reported lost, stolen, canceled, suspended or otherwise inactive, it is immediately invalidated in the WEX system. As stated above, this can be accomplished in WEXOnline® or by contacting the fleets Premium Fleet Services Account Manager or by calling WEX's 24/7 customer service. After cancellation, all electronic authorizations associated with the card are declined at the time a purchase is attempted. Additionally, once WEX receives proper notification, the fleet is relieved from liability for any subsequent charges.

2.29 When a card (or group of cards) is closed, a credit may be due to the card based on an overpayment, transaction credit, or something similar.

WEX's receivables department reviews all credits on termed accounts and cards 90 days after termination. If the credit qualifies for a refund, WEX will process that transaction and send a check for closed accounts or post a credit to an account, if it is a cancelled card within an active account.

The timeline for a credit to post to an account can vary. This is due to the nature of the credit. For example, in some cases a WEX representative may be able to confirm immediately that a credit is owed. In other cases WEX may need to do additional research or contact a merchant to

verify additional information. WEX always works to resolve any owed credits as quickly as possible. Once the credit is confirmed to be owed to the customer, it is posted to the account and it will be reflected as a credit on the next invoice in the billing cycle. Should the customer require payment for the credit, WEX will process the credit for payment which typically takes 3-5 business days.

2.30 Foreign Transaction Fee

For US-based WEX card programs, the WEX system recognizes an assigned originating site ID and/or country code, provided to WEX by the merchant, for the corresponding country of origin of a transaction.

For example, if an agency transacted in Canada, WEX would receive the transactional data that would include a site ID, country code or similar identifying code, provided to WEX by the merchant, for the site. The WEX system would then compare that transaction's location against the merchant location's country of origin, in this case being Canada.

The check in the WEX system is also tied to the currency. For US-based WEX card programs, the currency is based in US Dollars. If a transaction comes through in Canadian Dollars, the WEX system would flag that transaction and assess the associated Foreign Transaction Fee.

Foreign Transaction Fees are denoted in WEX reporting to reflect the appropriate amount invoiced to a customer, versus what may show on a customer's point of sale receipt from a merchant.

2.31 System must be able to route transactions through approval/workflow path as established by the Program Administrator.

WEXOnline® provides the ability to route transactions through an approval workflow path. The user roles required for this functionality and the process flow is outlined below.

An eligible approver is a User within a hierarchy who

- has the Approve Transactions permission
- has opted in to receive approval emails
- is an active online user
- a Fleet Manager/Program Administrator. A Fleet Manager will have all of the Manage Transactions features and functionality including the Approve Transactions permission
- or, have a Custom Role that includes the Approve Transactions permission only.

For those responsible for *reviewing* transactions:

These users will have Manage Transactions without the Approve Transactions permission. They:

- can filter transactions
- can view transactions
- can change transaction status as follows:
  - None → Follow Up
  - None → Reviewed
  - Follow Up → None
  - Follow Up→ Reviewed
  - Reviewed → None
  - Reviewed → Follow Up
  - will have all other existing manage transaction functionality (including upload receipt,

reallocate, notes, view history)
- If there is an eligible approver at and/or above the reviewing user in the hierarchy, the user can see the "Email Approval Request" button and send an email to those Approvers.

For those responsible for approving transactions:

These users will have a Custom Role with the Approve Transactions permission that allows them to:

- filter transactions
- view transactions
- change transaction status as follows:
  - reviewed → approved
  - reviewed → follow up
  - approved → reviewed
- receive and read approval emails sent from a User at and/or below their level in the hierarchy as long as long as the user has opted in to receive Approval Emails

Or, they can be assigned a Fleet Manager/Program Administrator role so they:

- can do everything available in the Manage Transactions
- Fleet Manager/Program Administrators also have the ability to change permissioning or access to allow for substitution scenarios when the approver role maybe out on vacation or leave allowing another user who is either new or would have a lesser role normal to step in an approve transactions in the Fleet Manager/Program Administrators absence.

2.32 System must allow for Program Administrator to add, edit, or remove security features (temporarily or permanently) in real time at the card account level including, but not limited to:

- dollar per transaction limit
- maximum daily/weekly/monthly spend
- transactions per day/week/month limit
- pay at pump only
- tank capacity limit
- type of fuel, by individual vehicle
- authorized State or Province
- Product Code (PC) blocks

The WEX system and the Fleet Manager module of WEXOnline® allows the fleet manager to add, edit, suspend, reactivate, and terminate cards and drivers, to add and manage card controls, and to view and download invoice details, card by card or simultaneously among a grouping of cards. The Program Administrator has all the capabilities requested above, the ability to do so in real-time and simultaneously to multiple cards. Pay-at-pump ONLY functionality is systematically supported by WEX but cannot be done online. This is supported by the WEX Customer Service team on request or during account set-up at the time of implementation. Product code blocks are achieved by our product-type controls in the authorization profile card is assigned. These can be changed, created and applied in real-time and simultaneously to multiple cards.

Users can also:

- Assign card to driver, vehicle or location
- Transfer cards from one account to another
- Group cards into authorization profiles to enforce purchasing policies

- Create organizational units or departments to better organize cards, vehicles and drivers for reporting and management purposes (initially added during implementation phase)
- Edit account information

WEXOnline® is structured to provide the ultimate flexibility to meet unique account program needs. The Administration module of WEXOnline® allows the fleet manager to create custom roles that can be assigned to online users to limit or broaden access into the system. The fleet manager can create custom roles which provide users with access to different sections – like the driver section. This setup allows them to focus on their defined tasks without giving broader permissions that could be abused.

Authorization profiles are the purchasing control parameters, or limits, that fleet managers assign to cards. This allows for easy management of the program to ensure purchasing policies are enforced each time a card is used.

WEX offers the flexibility for the fleet manager to name the authorization profiles via numeric or alphabetic naming scheme. For example, one group of profiles could be named "sedan," and the profile could be applied to that group of vehicles. Or, the profile could be called "delivery driver," and be set up for that type of employee. The fleet manager can assign as few or as many profiles as necessary

Fleet managers can add new profiles, view existing profiles, view cards assigned to each profile, clone, edit or modify the values, change the status of the profile, set account defaults, and reassign cards to other profiles.

Authorization control profiles allow the fleet manager to edit a profile and have that change impact all cards associated with that profile. There is no limit to the number of cards that can be assigned to a certain profile and this functionality eliminates the need to manually edit each driver or vehicle record when a policy changes.

Benefits include centralized account management; efficient administration of cards, driver, vehicles and authorization controls; and quick link navigation to all management features and functions.

2.33 System must allow for Program Administrator to assign card (with an identifying PIN or VIN number) to a driver, vehicle, department, etc. as determined by the Program Administrator.

A WEX card can be assigned to a vehicle/asset, driver, or organizational unit (or cost center) in the fleet, enabling the card to capture and track all purchase activity. This flexibility allows a Fleet Manager/Program Administrator to assign a card (with an identifying PIN (Driver/Vehicle ID) or VIN number) to a driver, vehicle, department or any other entity, asset or individual needing a card as determined by the Program administrator. When the card is swiped at the point-of-sale device, the driver is prompted to enter a Driver ID (DID), or PIN as referenced in the requirement, and the odometer reading of the vehicle in order to receive authorization for the ensuing transaction.

Each DID can be assigned to one, many, or all cards on the WEX account and can be generated by WEX at random, or assigned by the fleet customer. This 4- or 6-digit DID can be assigned to a driver, vehicle/asset, or organizational unit on the WEX account (based on the type of card preferred to use). For example, if Purchasing Entity decides to assign the card to the driver, the driver would typically enter a DID associated with the vehicle. If Purchasing Entity prefers to assign the card to a vehicle, typically the DID is associated with the driver.

The DID, combined with the card and account validation rules, is queried against the WEX database for verification and transaction authorization. If valid, the transaction is authorized. The WEX card cannot be electronically activated without entering a valid DID, making the card useless to someone who has found or stolen it and does not know the DID. The authorization process acts as a security measure, and provides a layer of protection against fraudulent activity.

2.34 System must allow for Program Administrator to create an approval path of setting specific card limits higher than Entity established limits.

2.35 System must allow for Program Administrator and/or Cardholder to mark transactions sent to accounting for payment.

2.36 System must be able to send notifications of pending approval(s) based on established approval path.

2.37 System must allow for Program Administrator to lock transaction accounting code data from editing.

2.38 If capable, system must allow for Program Administrator to create templates for card/account set up (i.e. same billing address, TIN, workflow, etc.).

The WEX system allows for templates with different functions within the site as well as the ability to utilize "clone" functionality, which acts in the same manner as a template. Cloning functionality exists for card and authorization profile information to leverage like information (address, cost center, TIN, org/department, user defined fields, etc.) associated between card or driver types.

- Templated default limits for authorization profile & set-up
- Clone function

The WEX team lead by an assigned Strategic Relationship Manager and Premium Fleet Services Account Manager will work to set-up and establish these with customer during the initial implementation. For needs that arose after implementation the Premium Fleet Services Account Manager will be able to assist in setting up these functions.

2.39 If capable, system must allow for Users, with multiple roles within a program, (i.e., Cardholder & Program Administrator) to opt to have one login to be able to access all aspects of their accounts (dual role). If yes, provide details on how that functionality works/is implemented.

The flexibility of the WEXOnline® module allows for each user's User ID to have one assigned role. However, this requirement can be met by creating a Custom Role with all necessary levels of permissions to support scenarios where a user maybe both a cardholder and Program Administrator or have other roles and responsibilities with a given agency. Another example is when the user is a cardholder who also carries financial responsibilities and also need to access the system for pulling invoices and reporting, and making payments. The module allows for this user's access to be customized to the specifications specific to their job function.

3. DATA COLLECTION AND MANAGEMENT

3.1 System must capture and display transaction data at the following minimum levels:

- Cardholder
- Approving official
- Entity office or unit
- Account/billing (available at different levels)

- Entity Program Administrator or alternates (available at different levels)
- Participating State (all state entity transactional data, statewide administrative level and compliance review group)

3.2 System must have the ability to view transaction authorization/declines in real time.

3.3 System must post transactions within twenty-four (24) to forty-eight (48) hours of receipt from merchant.

3.4 System must have the ability to capture and display Level 1, Level 2, and Level 3 transaction data as made available from the merchant.

3.5 System must allow for Users to add notes, comments, and additional descriptions to a transaction in a separate field. This field must:

- Allow for alpha, numeric, and special characters.
- Be searchable
- Be reportable
- Be accessible to all hierarchies within the system

3.6 System must be able to capture and display merchant Tax Identification Number (TIN) or similar unique identifier.

3.7 System must allow for user to input a minimum of 150 character of Entity defined accounting code structure/segments at the transaction level.

3.8 System must allow for the Purchasing Entity to set requirements for accounting code segments (i.e. mandatory, non-mandatory, etc.)

3.9 System must allow for Purchasing Entity to define, edit, maintain, and upload valid value tables for each accounting code segment.

3.10 System must actively validate accounting segment data against valid value table data as determined by the Purchasing Entity.

3.11 System must allow for Program Administrator to assign, edit, and delete "default" accounting codes for all program hierarchies within the Purchasing Entity.

3.12 System must allow for User to save and edit frequently used accounting codes.

3.13 System must allow for a minimum of 99 accounting code splits per transaction.

3.14 System must allow for User to manually enter tax detail at the transaction level.

3.15 System must allow Program Administrator to download the entire Fleet Card number for use in other systems.

3.16 Participating States and Purchasing Entities have a need to access past transaction detail data in real time for a minimum of thirty-six (36) months throughout the life of the Master Agreement and Participating Addendum.

WEX's system maintains past transactional data for a period of seven years (84 months). In the WEXOnline® module, files are retained for a period of 24 months. WEX's Premium Fleet Services Account manager can fulfill requests from NASPO participating entities for transaction details going back to 84 months.

In addition, WEX Fleet ClearView™ data analytics module has no cap on accessible data, so users of WEX Fleet ClearView™ Essentials and Snap modules, offered as part of WEX's core product

offering at no extra cost, are able to access past transaction data for a minimum of 36 months throughout the life of the Master Agreement, as required.

3.17 Templates/defaults

At the time of account set-up and during implementation, WEX can establish user-defined fields with a State or Agency. User-defined fields can be used for any information or data the State or Agency may wish to capture. For example, as it relates to accounting information, a user defined field can be created for a particular GL Codes or set of GL codes and made a mandatory field as part of the card set-up template a user will have to complete in order to place a card order. This ensures the data will be assigned to it can be reported against. These fields can also be added, removed or edited after the account set-up as well given the user has the appropriate permissions to do so.

3.18 System must allow for user to upload and attach supporting documentation to the transaction in the following formats (at a minimum): pdf, jpg, png.

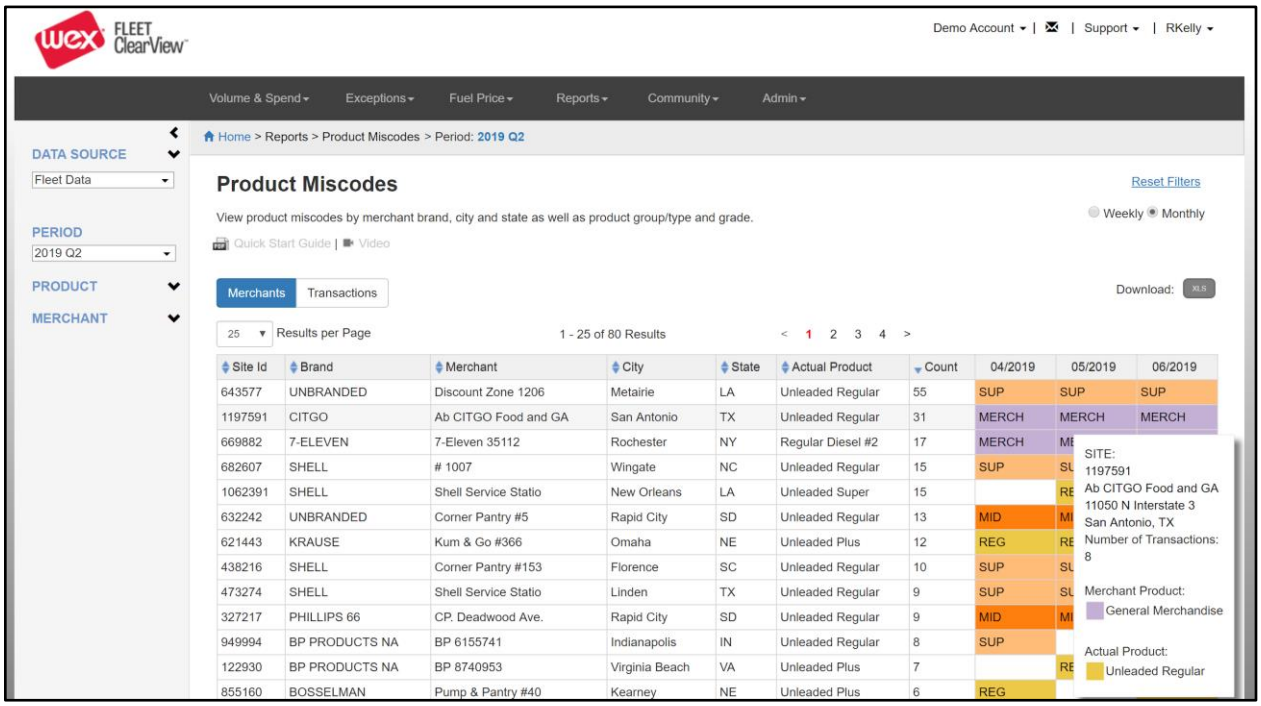
WEXOnline® Receipt Upload feature supports the uploading of supporting documentation to a transaction in the following file formats: .png, .jpg, .gif, and .pdf. Additionally, WEX has the ability to add support for more file types for upload should an agency require it. WEX will work with agencies should there be a file format they may need.

3.19 Contractor will be required to work directly with Participating State to develop effective strategies to address product code errors with merchants.

WEX routinely works with merchants, the processing networks, and point-of-sale providers to ensure product code accuracy and address issues. Once WEX becomes aware that there is an issue with a merchant(s), we work with all parties involved to identify the root cause and remediate it. For customers whose tax exemptions may be negatively impacted by a product code error, if WEX is able to definitively validate the product that was actually purchased, WEX will perform a transaction correction to ensure that either the exemption or reported taxes are accurate.

WEX also employs other tools, like WEX Fleet ClearView™, to assist both our Merchant Services Team, this team is responsible for working with merchants, networks and point of sales providers to remediate issues like product coding errors, and our customers to actively catch errors in merchant data, like bad product codes.

WEX Fleet ClearView™ is a dynamic a suite of powerful, cloud-based analytics solutions that automatically organizes, interprets, and intuitively displays fleet-related information. Critical data is presented in an intentional layout of simple and informative visualizations, helping fleet managers monitor operations, uncover card misuse and potential driver theft, understand trends, benchmark performance, investigate anomalies, and recognize cost-saving opportunities.



WEX offers the ClearView™ Essentials and ClearView™ Snap modules as part of our core product offering with extra no charge. Included in the ClearView™ Essentials module is a live product code cleansing algorithm fleets can utilize to proactively catch and see corrected product types.

Product Code Cleansing: The data scientists on the ClearView™ Team solved a long-standing, industry-wide issue by designing and developing a proprietary machine learning algorithm, which automatically detects and corrects inaccurate product codes transmitted by fuel merchants. The algorithm can make the following determinations with a 0.3% error rate:

- Categorize transactions by Product Group: fuel and non-fuel

- Categorize fuel transactions by Product Type: gasoline and diesel
- Categorize gasoline transactions by Product Grade: regular, mid-grade, premium

Corrected values are used in ClearView™ analysis, calculations, and exceptions reporting. Purchasing Entity can trust their product-related data displayed in ClearView™ and use it to make informed and confident decisions. This corrected information is aggregated in the Reports Module and displayed in ClearView™ transaction tables. ClearView™ displays both the type, grade and product level information provided by the merchant and the corrected values enabled by the algorithm. This information can be downloaded into Excel.

For information about how WEX handles disputed transactions, see 16.1.

3.20 Controls and Non-Vehicle Spending

The WEX Fleet card was developed to provide control and transparency. The card allows for fuel spending, non-vehicle spending at accepting locations within WEX's closed-loop network, and non-fuel vehicle spending -- along with the ability to discern between those various types of purchases -- to allow ONLY purchases that comply with an agency's policy or those that have been approved by a reviewer with permission to grant that level of approval.

One of the most significant advantages the WEX proprietary closed-loop card offers over an open-loop solution is our custom-built network that operates on product codes and not Merchant Category Codes (sometimes referred to as MCC codes). The WEX Fleet card can only be used at fuel and maintenance locations that accept the WEX card. This is the first line of defense against unauthorized or fraudulent spending, either of which could more easily occur with an open-loop credit card that can be used at any type of retailer.

WEX can ensure that all vendors accepting our cards comply with the same requirements and that data capture is tailored specifically to meet fleet customer needs.

WEX Fleet Cards and open-loop credit cards both offer fleet managers the ability to track and set controls on fuel spend. However, the WEX closed-loop solution provides more in-depth transaction data, greater flexibility and security, and tighter controls than open-loop credit cards.

Greater Access to Level III Data: All WEX-accepting merchants are required to be capable of transmitting Level III data, and that level of data is transmitted on 99.8% of transactions. When a driver swipes the card, the point-of-sale device prompts him or her to enter the Authorization Prompt ID and odometer reading. Level III line-item detail allows fleet managers to better track expenditures and facilitates cost analyses, vehicle life-cycle analyses, and overall fleet management.

For example, entering the correct odometer reading helps provide valuable vehicle information such as cost per mile, miles per gallon, vehicle operating costs, and intelligence for preventive maintenance schedules and vehicle replacements. It can also help streamline administrative operations, reducing the time and resources devoted to accounting.

Additionally, the WEX proprietary closed-loop network removes the need for fleets to have to perform site lockouts for merchants that do not transmit Level III Data on open-loop networks. Site lockouts can significantly reduce the number of accepting locations of an open-loop network card. This can be highly problematic for drivers utilizing open-loop solutions as they may pull up to a station that will decline their card due to merchant not being able to transmit Level III Data on an open loop solutions. This is not an issue for WEX's proprietary closed-loop network.

The WEX closed-loop proprietary network has an added advantage for government fleets eligible fuel tax exemptions. The IRS requires Level III Data to be included in that transaction data in order for a Credit Card Issuer to invoice a fleet net of the eligible taxes. These are typically Federal Excise Taxes for unleaded and diesel fuel and can have a significant impact to the bottom line for a fleet if they are not exempted up front by the fuel card provider. Transactions on an open-loop network where Level III Data is not present are not eligible for tax exemptions by the fuel card issuer.

Greater Security: The cardholder is required to enter an Authorization Prompt ID for each transaction. This helps prevent the card's use in case of loss or theft. Authorization Prompt IDs make fleet cards more secure and help limit internal and external fraud.

The Authorization Prompt ID can be linked to a specific purchase profile in WEXOnline®, providing further security by limiting expenditures to certain types of purchases, at specific dollar levels, and during specific timeframes.

Contrast this to a typical credit card, which usually requires no additional verification.

WEX customer have the ability to choose between Fuel Only cards and Custom Control cards.

Fuel Only cards permit the purchase of fuel -- such as gasoline, diesel, or alternative fuels -- based on the coding in the card's magnetic strip. Non-fuel purchases are not permitted when non-fuel items are identified at the time of authorization. It does not prevent items such as car washes paid for at the pump as merchant devices do not send this authorization request to us.

Custom Control cards permit all allowed types of purchases, based on the coding in the magnetic strip, at WEX accepting locations. This includes fuel, maintenance, and other items, such as general merchandise. Fleet managers have the option to apply Product Type Controls, allowing certain product categories to be allowed or blocked. For example, "General Merchandise" could

be deselected, allowing only Fuel and Parts/Service-related purchases. Custom Control Cards and Product Type Controls provide control over *what* drivers buy, not just *where* they buy it.

WEX accounts may be comprised of all Fuel Only cards, all Custom Control cards, or a mix of the two. This enables fleet managers to issue the appropriate card type based on a variety of purchasing needs.

Purchasing Controls: WEX developed its own closed-loop acceptance network among merchants and can control transactions at the merchant-type level. The WEX card is accepted at approximately 135,000 fuel and maintenance locations across the US.

Most generic credit cards can control the type of merchant. However, WEX goes a level deeper and is able to control the product type being purchased.

Product Type Controls: Product Type Controls are groupings of like products separated by type such as services, fuels, oil and fluids, food, etc. These controls enable or disable access to specific product categories, within WEX's closed-loop network of fuel and service merchants. WEX uses Level III data to allow customized card controls that allow use only at certain times and/or on specific product types.

Product Type Controls
Fuel (always on)
Parts & Service
Quick Lube
Oil & Fluids
Roadside Assistance
General Merchandise

Fleet managers can then set spending limits at the transaction level: dollar limits, fuel quantity limits, and timeframe of purchase.

Product Type Controls enable the fleet manager to limit transactions within WEX's pre-determined network of fuel and service vendors. For example, the fleet can allow drivers to purchase fluids, like washer fluid or oil, and disallow general merchandise, like snacks and soft drinks. A typical credit card would be open to all gas stations, and any merchandise that is available in this retail channel. For example, a driver could purchase electronics or snack food. This opens up the business to unauthorized expenses and program abuse.

Transaction Level Limits
Dollar Limits (Limit to specific daily and weekly amounts)
Fuel Quantity (Limit the amount of fuel purchased in a day)
Timeframe of Purchase (Limit to certain days, weeks, or hours of the day)

Purchase Controls: WEX Purchase Controls allow fleet managers to control the amount and frequency of purchases at the card level. Defining limits helps a fleet manager detect and prevent unauthorized transactions, potentially saving Purchasing Entity money by limiting unauthorized purchases. Fleet managers can use these tools to establish daily, weekly, twice monthly, or monthly limits for fuel and service expenditures. If a transaction is outside of the set limit, it is logged and recorded at the point of sale or, in the case of hard controls, declined at the point of sale.

Purchase Control Tools *	Level
Per transaction dollar limit	Card
Per period dollar limits (daily, weekly, twice monthly, monthly)	Card
Per period # of transactions (daily, weekly, twice monthly, monthly)	Card

Total Fuel per period (daily, weekly, twice monthly, monthly)	Card
Total Non-Fuel per period (daily, weekly, twice monthly, monthly)	Card
Total Gallons per period (daily, weekly, twice monthly, monthly)	Card
Time of day (subject to server location's time zone)	Card
Day of week (subject to server location's time zone)	Card

**Enforcement of some limits depends upon adoption of specification and merchant participation.*

3.21 Account Maintenance Services

The WEX system works off product codes that discern between what is being purchased. This includes maintenance services. If the WEX Product Type controls allow for maintenance services to be purchased in the card's assigned profile, then the corresponding product/service being purchased will be reported as any other transaction would. The controls in place are stated in 3.20 and maintenance services can be opted out of entirely as well should those types of purchase be not allowed. All of these controls can be accessed through the WEXOnline® module.

Additionally, WEX also offers a tool we call WEXPay™ to provide drivers a mechanism that enables out-of-network purchases at an additional 398,000 merchants in the MasterCard® network. Typically used for independent or geographically remote fuel and service sites, WEXPay™ utilizes a virtual card interface to provide the control of a fleet card with the convenience of a credit card. This out-of-network tool reduces the number of out-of-network sites where drivers would have to use an alternative form of payment.

Using WEX*Pay™* in conjunction with a Custom Control fleet card lets Purchasing Entity set the rules for their drivers. Custom Control cards allow Purchasing Entity to set merchant, transaction, and even product type limits. WEX applies those limits to both WEX Fleet Card and WEX*Pay*™ MasterCard transactions. Expanded coverage combined with integrated reporting and invoicing will further streamline Purchasing Entity's fleet purchasing and operations.

How It Works

As a MasterCard issuing bank, WEX uses Single-Use Account Number technology to authorize a one-time payment to a merchant. The account number provided to the merchant by phone is fast and secure — good only for that one purchase.

When the merchant calls for authorization, WEX applies Purchasing Entity's purchase controls and collect the same level of purchase detail, including Prompt ID and odometer. WEX integrates the purchase details into Purchasing Entity's WEX Fleet Card invoice and reports. One card, one invoice, one report with the same controls and service our customers expect from WEX.

As an additional option for fleets that operate a call center type operation for maintenance approvals, WEX offers Purchase Log to facilitate payments to merchants that accept MasterCard®.

Lastly, WEX does offer an ancillary product that is separate from our fuel card offering that and completely optional for use that we call Purchase Log. Purchase Log is a web-based interface that allows fleet-designated staff to securely log in to WEX's MasterCard® settlement website and enter pertinent Level III data associated with a transaction (or invoice). This can include up to six entry fields for the fleet-specific data such as billing codes. Once the transaction information and

payment amount is entered, a virtual card/single use ghost account with expiration dates and CVC2 values is presented. The fleet provides this to the merchant for payment. The Purchase Log product typically works well for fleets that operate a call center or central garage locations where an authorized fleet or service manager is working directly with service merchant locations who is servicing an asset of theirs. Purchase Log helps facilitate safe, secure, quick and easy payment. Additionally, it allows for maximum data capture to feed fleet management systems and removes the need for having to invoice on account, issue checks or other forms of payment.

Using the MasterCard® payment network, Purchasing Entity's see all requests and approve all transactions before they take place. Purchasing Entities can give their managers different levels of approval, while maintaining control over larger purchases.

Purchase Log uses Single Use Virtual Accounts to make secure payments to vendors. It is a safe and secure method of paying vendors that lowers the possibility of misuse or fraud, and significantly reduces paperwork.

Purchase Log transactions appear on their own invoice and report since the program is separate from WEX Fleet Card account. Reports can often be formatted to be imported into most customer accounting programs.

**Purchase Log purchases are subject to the MasterCard transaction processing rules and terms of use, including tax exemption rules and would be a separate account set-up.*

3.22 Level 3 Data

When a driver swipes the card, the point-of-sale device prompts him or her to enter the Authorization Prompt ID (required) and odometer reading. Level III data line-item detail allows fleet managers to better track expenditures and facilitates cost analyses, vehicle life-cycle analyses, and overall fleet management. The Authorization Prompt ID is flexible to allow for the input of driver ID information for cards assigned to vehicles or department or the input of asset/vehicle ID information for cards assigned to a person or department, yet this Prompt ID is required for authorization.

For example, entering the correct odometer reading helps provide valuable vehicle information such as cost per mile, miles per gallon, vehicle operating costs, and intelligence for preventive maintenance schedules and vehicle replacements. It can also help streamline administrative operations, reducing the time and resources devoted to accounting.

Requiring the cardholder to enter an Authorization Prompt ID, typically referred to as a Driver/Asset ID or PIN, for each transaction helps prevent the card's use in case of loss or theft. Authorization Prompt IDs make fleet cards more secure and help limit internal and external fraud.

The Authorization Prompt ID can be linked to a specific purchase profile in WEXOnline®, providing further security by limiting expenditures to certain types of purchases, at specific dollar levels, and during specific timeframes.

Contrast this to a typical credit card, which usually requires no additional verification. Additionally, if a merchant is not set-up to pass Level III Data on an open-loop network most times this additional prompting is non-existent.

WEX also offers flexible prompting at merchants who have adopted and coded to our most recent point of sale specification. This flexible or 3rd prompting allows fleets the option to ask for an additional field of data that is prompted at the pump. For example, this could be for a job number,

cost center, department code or any other piece of data a fleet may want to capture. This is an optional feature that can be opted in or out of.

3.23 If capable, System will provide accurate Merchant latitude and longitude. WEX complies with this requirement.

3.24 Participating States and Purchasing Entities have the need to capture their state's specific merchant diversity information (i.e. small business, minority owned, etc.) including Federal Diversity information.

WEX has all of the source data behind our merchant diversity information and standard reporting. Should a Participating State or Purchasing Entity have a need to capture information specific to their state, WEX can provide this information on a state-by-state basis by building and delivering a custom report based on the individual state's specifications.

3.25 Ability for Contractor to initiate/create one-time overrides after hours with follow-up notification to Program Administrator.

The WEX Customer Service Department is open 24 hours a day, 365 days a year (366 days in leap years), the WEX Customer Service Department are WEX Employees hired by WEX, US based, fleet-trained in-house through a WEX training program, located in several call centers across multiple states and time zones and are always available to handle the needs of the fleet by calling the toll-free number 800-492-0669.

WEX has a No Driver Stranded (NDS) policy and will work with States and Agencies to tailor that policy at the time of account set-up to ensure it complies with that given fleets needs and own policies. This policy will be put into the WEX account notes available to our customer service representatives for account so that representative can follow the stated policy to assist a driver in need, help safeguard against possible misuse and appropriately notify a fleet when an occurrence may happen. NDS policy can include scenarios such as:

- Emergency and/or Extenuating Situations
- Out of Network
- Specific Agencies: State Police/Patrol, DOT, etc.
- Exceeding Authorization Controls
- Lost/Stolen Card
- Terminated Card
- Card Suspended for Fraud
- Card Suspended
- Driver is unsure of Vehicle ID but it is active
- Driver is unsure of Vehicle ID and it is not active
- Vehicle ID is terminated

In addition to the WEX NDS policy, WEX also offers a virtual card option to facilitate out of network payments called WEXPay™. WEXPay™ can also be used to facilitate a No Driver Stranded program. WEX*Pay*™ is a tool that enables out-of-network purchases at an additional 398,000 merchants in the MasterCard® network by utilizing a virtual card interface. Typically used for independent or geographically remote fuel and service sites, WEX*Pay*™ provides the control of a fleet card with the convenience of a credit card. This out-of-network tool reduces the number of out-of-network sites where drivers would have to use an alternative form of payment.

Using WEX*Pay™* in conjunction with a Custom Control fleet card lets Purchasing Entity set the rules for drivers. Custom Control cards allows the ability to set merchant, transaction, and even product type limits. WEX applies those limits to both WEX Fleet Card and WEX*Pay*™ MasterCard transactions. Expanded coverage combined with integrated reporting and invoicing will further streamline Purchasing Entity's fleet purchasing and operations.

The merchant would call the number on the back of the WEX Fleet Card, and the merchant will be routed MasterCard for a virtual payment. Use of WEX*Pay*™ is subject to MasterCard terms & conditions and enrollment at the time of account set-up.

3.26 Roadside Assistance.

WEX Emergency Roadside is an existing WEX service delivered through partnership with National Automobile Club (NAC), one of the premier service motor clubs in the United States. Their mission since they were founded in 1924 has been to render Emergency Road Service promptly, courteously, safely and efficiently. WEX Emergency Roadside is available to all WEX Fleet Card users, and it's free until it is used. Users must "opt in" using settings in their online profile. Service is available for any class of vehicle, including Class 7 and 8 vehicles.

Services include winching, fluid delivery, lockout services, towing, tire change, jumpstart and more. Benefits include no out-of-pocket expense for drivers, 24/7/365 service with toll-free call or by placing a digital service request, preferred rates and ease of pay through the WEX Fleet Card, coverage across the United States, Canada and Puerto Rico, with service right from the driver's seat using available mobile app access. Drivers can also call WEX customer service connected to NAC or call NAC directly. All they will need is their WEX card.

NAC will advise the driver of the quoted response time and an estimated amount for the needed service from the vendor they identify who is able to assist with their breakdown need. These times can vary, depending on the type of service needs and other circumstances like weather or emergency events.

3.27 Many states require Fleet Card services in rural areas and marinas where separate/proprietary network are not always available.

WEX offers tool called WEX*Pay*™ to address out-of-network instances where a driver maybe in a rural area and the merchant is not set-up to accept our proprietary WEX Fleet card. WEX*Pay*™ is a tool that enables out-of-network purchases at an additional 398,000 merchants in the MasterCard® network by utilizing a virtual card interface. Typically used for independent or geographically remote fuel and service sites, WEX*Pay*™ provides the control of a fleet card with the convenience of a credit card. This out-of-network tool reduces the number of out-of-network sites where drivers would have to use an alternative form of payment.

Using WEX*Pay™* in conjunction with a Custom Control fleet card lets Purchasing Entity set the rules for drivers. Custom Control cards allow Purchasing Entity to set merchant, transaction, and even product type limits. We apply those limits to both WEX Fleet Card and WEX*Pay*™ MasterCard transactions. Expanded coverage combined with integrated reporting and invoicing will further streamline fleet purchasing and operations.

How It Works

As a MasterCard issuing bank, WEX uses Single-Use Account Number technology to authorize a one-time payment to a merchant. The account number provided to the merchant by phone is fast and secure — good only for that one purchase.

When the merchant calls for authorization, WEX applies Purchasing Entity purchase controls and collects the same level of purchase detail, including Prompt ID and odometer. WEX integrates the purchase details into Purchasing Entity's WEX Fleet Card invoice and reports. One card, one invoice, one report with the same controls and service our customers expect from WEX.

WEX is always increasing its acceptance coverage for fuel, marina and service locations. Because we currently have acceptance at more than 95% of all U.S. fuel sites, our merchant acquisition strategy is driven by the needs of our fleet customers that require service in remote areas or acceptance outside of domestic coverage.

If a customer needs specific merchants added to the WEX accepting network, we will request the following information from the fleet:

- Merchant name
- Merchant address
- Merchant contact person
- Phone and fax numbers
- Expected utilization/volume from Purchasing Entity's fleet
- Name and phone number of fleet employee requesting WEX card acceptance

WEX will work with all interested parties in an attempt to gain acceptance at the location. This includes either direct agreements or acceptance through our partnerships with network sales organizations and acquirers.

** Purchases are subject to the MasterCard transaction processing rules and terms of use, including tax*

3.28 Non-proprietary Network

When the merchant calls for authorization, WEX applies purchase controls and collects the same level of purchase detail and Level III Data including Prompt ID and odometer. WEX integrates the purchase details into Purchasing Entity's WEX Fleet Card invoice and reports alongside all other purchases made with Purchasing Entity's WEX Fleet Card. WEXPay™ transactions are denoted in reporting with MC to show they were processed using a MasterCard.

3.29 Primary vs. Non-proprietary Transactional Data

See response to 3.28.

3.30 Ability for a purchase to be executed via the standard (non-proprietary) network with Driver ID/PIN prompting.

When a driver is utilizing WEXPay™, the merchant will call into WEX customer service to receive a one-time use virtual card account number. When the merchant calls for authorization, WEX applies purchase controls and collects the same level of purchase detail, including Prompt ID and odometer from the driver that is verified by the WEX Customer Service Representative while the merchant is on the phone with them. WEX then integrates the purchase details into Purchasing Entity's WEX Fleet Card invoice and reports. One card, one invoice, one report with the same controls and service our customers expect from WEX.

3.31 Electric Vehicles

WEX has partnered with ChargePoint to provide Drivers and Fleet Managers/Program Administrators utilizing the WEX EV FleetCharge solution the ability to tie their WEX Fleet Card to an RFID tag or Mobile application. This integration allows fleets to obtain an EV charge at more than 66,000 ChargePoint locations.

The customer logs into the ChargePoint portal to connect the WEX card to the RFID card/fob provided by ChargePoint. The data needed to link a WEX account in the ChargePoint online system will be the WEX account number found on the card (13 digits), the WEX card number found on the card (5 digits) and the expiration date found on the card (MM/YY). WEX will facilitate all needed payments to ChargePoint and integrate the available data with all other available transaction data through WEX. All verification comes through ChargePoint and the associated data with transaction is reported through WEX as we receive it from ChargePoint.

WEX is also varying stages of talks with other charging providers to bring on additional acceptance. Future integrations will include mobile and other applications to allow for additional prompting and authorizations. Should there be particular vendors/charging providers States or Agency identify as wanting to have card acceptance with, WEX will work with those various providers to establish acceptance wherever possible.

3.32 Electric Vehicle Charging Stations

ChargePoint controls authorization for its charging stations. They send WEX a daily sales file containing all transactions made on a WEX Fleet Card and transactional data they have available for reporting. Transactions typically post to the customer's account within 48 hours. Customers will not see these transactions in the authorization details in WEXOnline for ChargePoint transactions, but all the details of the transaction available in the transaction detail (Excel/CSV) once the transaction has posted. The transaction will also show within the standard report set (PDF reports) WEX provides to fleet customers. Typical transactional data along with kilowatt hours and other available information is included in WEX reporting.

3.33 Parking Stations

Almost all parking station point of sale (POS) devices are not currently capable of passing along Level III data as part of a transaction. To solve for this POS hurdle, WEX is currently in the process of applying our mobile payment capabilities, via the WEX Fleet DriverDash mobile application. Using mobile technology is a way to overcome POS limitations and facilitate payments that also include the requisite data. Currently, WEX mobile payments are accepted at 25,000 US fueling locations, and WEX is in the process of talking to several national parking providers. WEX's plan is to bring acceptance for parking, with Level III data, to customers in the near future.

4. SYSTEM UPGRADES

4.1 Participating States/Purchasing Entities understand that as technology and regulations change, system changes will have to occur. Participating States/Purchasing Entities also assume that as a good partner, Contractor will actively and continuously improve the systems capabilities, functionality and usability including platform transition. Changes/upgrades will be made at no additional cost to the Participating States/Purchasing Entities.

When changes are made Contractor must, at a minimum, notify the Master Agreement Administrator (Lead State) and Statewide Program Administrator (Participating States), prior to changes being put in place. Master Agreement Administrator and Statewide Program Administrator must provide approval of any notification communication prior to distribution to Users.

4.2 Online Transaction Management

WEX engages with our customers in both the public and private sector on a regular basis to collaboratively create and improve WEX products and solutions. WEX product managers seek fleet input directly from customers through WEX's relationship management team for online input and improvements among many other WEX products and system. Products like WEX Fleet ClearView™ have grown directly from customer feedback and input.

WEX holds an annual Lead User Group conference. The Fleet Lead User Group is a broad group of fleet administrators and managers representing more than 50 organizations and government agencies nationwide. This group includes WEX's largest and most demanding fleets, and is focused on providing WEX direction on near-term products and services (typically 1-3 years out). In some cases, these fleets serve as WEX "beta testers" for new initiatives, and help identify important needs that might be unmet. The group conferences annually at WEX headquarters in Maine, and teleconferences regularly. Additionally, the group responds to "rapid-fire surveys" several times per year, answering questions regarding satisfaction with WEX products and services. This forum enables WEX to stay close to its largest fleet customers and maintain a clear understanding of the requirements necessary to keep products current and competitive.

As part of our Lead User Group, WEX also employs a Fleet Advisory Board. This is a targeted group made up of a cross-section of WEX's largest fleets. Its role is to represent the fleet industry with WEX senior leadership, and to provide key input, ideas and direction to advance WEX's leadership position in the marketplace. This group meets once or twice a year, and corresponds regularly via conference calls and email. Its focus is on strategic initiatives, looking out 3-5 years or more, to support WEX's continued growth efforts.

WEX will also employ frequent surveys to our largest customers. States' fleet and purchasing managers interact with our Strategic Relationship Managers (SRM) on a regular basis. Through these interactions and account review with SRMs, they will seek feedback or currently or desired products and online enhancement to bring back to WEX's product managers.

For users of WEX Fleet ClearView™, the Community Module allows Purchasing Entity to network, collaborate, participate in discussion groups on fleet-related topics (i.e. positively impacting driver behavior or reducing fraudulent spend), pose questions, and share best practice information with fellow analytics peers.

This module features Discussion Forums on a variety of fleet-related topics where users can collaborate and share information, a news feed of recent Community activity, the ClearView University and an Events calendar, and a Resources section where content can be downloaded.

The Summary Dashboard (default or home view) contains important announcements, a news feed of recent posts from WEX Fleet ClearView™ users, and a schedule of upcoming training and events.

The Discussion Forums view contains a list of available forums. Navigate to this view by using the top navigation menu.

The Calendar view contains a list of free events and training that is open to all WEX Fleet ClearView™ users. Navigate to this view by using the top navigation menu. There are four different ways to view the events: Month, Week, Day, and Event Stream.

The Resources view contains informational assets, such as, Quick Start Guides, white papers, articles, images, and release notes. Navigate to this view by using the top navigation menu.

4.3 System Upgrades/Changes Communication

WEX conducts routine, frequent and multichannel messaging to customers, from posting news in the WEXOnline® module's landing page, to sending emails, invoice inserts, mailers, and regular communications from the WEX Relationship Management Team in order to communicate system changes. Any major changes, either systematic or policy related, are communicated well in advance of any change being implemented and WEX typically seeks feedback from fleets to measure what, if any impacts they experience.

Online Outage Notification: Display on Home Screen

English example

Due to scheduled maintenance, online access will not be available from 11:00 pm ET Friday, November 16 to approximately 8:00 am ET, Sunday, November 18.

French example

En raison de l'entretien prévu du site Web, l'accès en ligne ne sera pas disponible à partir du vendredi 16

Novembre, de 23 h (heure de l'Est) et du dimanche 18 Novembre à 8 h (de l'Est)

4.4 Participating States/Purchasing Entities Top-Down Communication to the online transaction management system when changes are made

WEX does not engage in forced system changes without prior notice to the customer and collecting customer feedback as part of our assessment. WEX is proud of our long history of developing solutions and policies in close consultation and collaboration with our customers. We employ our Lead User Group, the advice of our Fleet Advisory Board and WEX Relationship Management Team to create and facilitate conversation and feedback around any potential changes with customers to make sure they are engaged and have a voice in any decisions that may occur. As an example, WEX was able to avoid implementing extreme policies that could have proved detrimental to our Fleet Customers with the large increase in White Plastic Fraud (card skimming) the industry has seen over the past several years. Through this collaborative process WEX was able to manage implementing manageable safeguards with our customers where possible and at the same time WEX implemented new technologies to more effectively identify and catch fraud early on after a card had been compromised.

4.5 System Changes Communication and Access to Data

Similar to our responses in requirements 4.3 and 4.4, WEX employs advanced notification for system changes. These notifications are posted in the WEXOnline® module prior to going into effect. Additionally, participating states in this agreement would each have the services of a Premium Fleet Services Account Manager and Strategic Relationship Manager assigned to their account. As such, outreach of this kind would occur at least one week prior, via phone call and/or email to the primary contact at each participating entity from this team to ensure proper notification is received and there is time for questions.

4.6 Training for System Changes

WEX provides multiple options and formats for training when system changes are made. Training can be customized as well to make sure they are relevant to at State or Agency's specific needs. The WEX Relationship Management Team will work with States and Agencies to ensure a training

model is put in place that works to cover their needs. Examples of what is available include but are not limited to:

- advice from the Premium Fleet Account Manager and/or the Strategic Relationship Manager;
- in-Person or video conference calls;
- recorded training sessions that can be saved and shared on State or Agencies local libraries or intranet sites;
- online self-help videos
- contextual Help within the WEXOnline® and ClearView™ modules;
- "What's New" indicators/information embedded where relevant in WEXOnline® with each release; and
- contextual help tutorials and walk-throughs to support right in line with what managers are attempting to do online in WEXOnline® and ClearView™.

4.7 Participating States will not accept forced/pushed 'top-down' process changes unless required by federal law. An example of a forced/pushed 'top-down' process change would be automatic shut off of cards on weekends, block purchases on specific days of the week.

WEX does not engage in forced system changes without prior notice to the customer and collecting customer feedback as part of our assessment. WEX is proud of our long history of developing solutions and policies in close consultation and collaboration with our customers. Although we can't foresee every scenario out there, WEX does not engage in forced process changes like the automatic shutoff of cards on the weekends, blocking of purchases on specific days or other drastic measures of this kind. We employ our Lead User Group, the advice of our Fleet Advisory Board and WEX Relationship Management Team to create and facilitate conversation and feedback around any potential changes with customers to make sure they are engaged and have a voice in any decisions that may occur. As an example, WEX was able to avoid implementing any policies that proved extremely detrimental to our Fleet Customers with the large increase in White Plastic Fraud (card skimming) the industry has seen over the past several years. Through this collaborative process WEX was able to manage this process with our customer while WEX implemented new technologies to more effectively identify and catch fraud early on after a card had been compromised.

5. REPORTING

Participating States and Purchasing Entities must have the ability to generate reports including detailed transaction data. A system with robust reporting capabilities is required.

5.1 System must time-stamp authorizations and reports according to the time zone of the authorization location or report request.

5.2 System must allow Program Administrator or Cardholder to run a transaction detail report which includes all User-inputted data.

5.3 System must allow for reports to be accessible as defined by roles and access levels.

5.4 System must have the ability for reports to be available in multiple formats (e.g. PDF, text, Excel, HTML, browser).

5.5 System must have the ability to provide program and transaction data reports at various frequencies to meet each Participating State/Purchasing Entity's requirements including but not limited to:

- Daily
- Weekly
- Monthly (billing cycle and calendar)
- Quarterly
- Annually (fiscal and calendar)

5.6 System must have the ability to extract/download data at any given time so that a report can be generated. The data can be downloaded by the following areas:

- Purchasing Entity Name
- Department/program Name
- Cardholder name (if applicable)
- Last 4 -6 digits of Credit Card number
- Merchant Name
- Merchant Spend
- Merchant transaction number
- Product Code
- Date transaction occurred
- Date transaction processed
- Charge Amount
- Transaction reference number
- City in which the transaction occurred
- State in which the transaction occurred
- Accounting string (Fund, Organization, Account, Program, Activity, etc.)

5.7 System must have the ability to provide "exception reports" including, but not limited to:

- Merchant Overrides
- Bank Overrides
- Program Administrator Overrides
- Back-to-back transactions
- Fuel type
- Over tank capacity
- Maintenance transactions
- Odometer input
- Decline report
- Miscellaneous transactions
- Split Transactions
- Duplicate Transactions

5.8 Contractor must provide quarterly rebate report no later than sixty (60) days after the end of the quarter to the Statewide Program Administrator or other representative designated by the Participating State. This report, at a minimum must include:

- Participating State
- Purchasing Entity legal name
- Purchasing Entity Type (Agency, City, etc. as defined by the Participating State)
- Gross spend for the rebate period

- Any credits for the rebate period
- Any write-offs for the rebate period
- Net spend for the rebate period
- Net spend for each rebate type
- Incentive Share/Rebate Rate per rebate type
- Rebate amount by rebate type
- Total rebate paid to the Purchasing Entity and/or Participating State.

5.9 Contractor must be able to provide a rebate report that reflects the type of rebate applied to each transaction no later than sixty (60) days after the end of the quarter. This report, at a minimum, must include:

- Purchasing Entity legal name,
- Entity Type (Agency, City, etc. as defined by the Participating State)
- Transaction date
- Merchant name
- Merchant TIN
- Transaction amount
- Applicable rebate type
- Applicable rebate BPS
- Rebate amount earned

5.10 Participating States and Purchasing Entities may have additional transaction data and rebate reporting requirements, detailed in each Participating Addendum.

5.11 Contractor must provide an annual report to the Lead State reflecting total spend and National Annual Volume Rebate earned by Participating States for the calendar year.

5.12 System must have the ability to schedule on-demand and Ad Hoc reports.

The WEXOnline® module offers a suite of reports, both standard and Ad Hoc, to help slash the administrative time involved with managing fleet expenses and operations. These reports can be scheduled for timely delivery to users or to a Fleet Manager/Program Administrator, they can be scheduled to run daily, weekly or monthly. The suite of standard and Ad Hoc reports allows users the flexibility to access system generated reports quickly, or build a report to the specifications important to them, their job responsibilities and/or reporting requirements. Additionally, through WEX's relationship management team can work with Purchasing Entity to build customized reporting for many different kinds of specialized or specific reporting needs a State or Agency may have. WEX requires all accepting merchants to be Level III capable, a level of transaction data capture that provides the foundation for our superior reporting tools.

The major report categories we offer are:

- Management Reports
- Profile Reports
- Transaction Reports
- Exception Reports
- Benchmark Reports
- Billing Cycle Reports
- Ad Hoc Reports
- Authorization Detail Reports
- Standard Reports

- Customizable Reports

In addition to these reports, contact Premium Fleet Services Account Manager, who has advanced query tools that satisfy complex reporting needs not covered by our standard reports, to order custom reports. WEX will be able to demonstrate this functionality in a Demo setting should the evaluation like to see what our WEXOnline® module is capable of.

5.13 Reports When Data is not available

Average turnaround times can vary depending on the type of data/report being requested and when the request is made of WEX. However, typical requests and responses usually take less than 24 business hours and are answered the same business day. The WEX Relationship Management team will work with Purchasing Entity on the initial request to ensure we are aware of any timelines, restraints or deadlines that the requesting State or Agency faces. Furthermore, whenever possible we communicate how long we anticipate a specific request to take. Some requests may require WEX to, for example, reach back out to a merchant for clarification or more information. This can add time, but is something WEX will work to communicate upfront with the requesting entity.

5.14 Standard or 'canned' reports available and who has authority to view them. Include description of search capabilities criteria and methods available.

The standard reports available in the WEXOnline® Reporting module are provided and described below. The authority to view various reports depends on the permissions assigned to a user within WEXOnline®. Search criteria and methods can vary based on the types of reports but they are typically searchable over a various levels in the hierarchy. Users can be limited to show only the levels of access they have within the hierarchy. Search criteria can include date ranges, report types, filter options, billing cycle, transaction date, posting date various other measures to populate the necessary data from the module.

Management Reports provide a view into the entire portfolio, illuminating trends and areas for possible savings. Available reports include:

Report Name	Description/Benefit	Mode of Delivery	Frequency
Major Fleet Activity Report	This report provides current and previous monthly summary information by account, by brand, outlining total spend, fueling spend, gallons, and average PPG. The report helps fleets identify which merchants they are using and whether they could save by switching to brands with a lower PPG.	WEXOnline	Monthly
Account Review	This report is a rolling 13-month review of data consisting of the following reports: portfolio summary, spend report, gallon report, fuel type usage snapshot, premium fuel gasoline spend, non-fuel spend snapshot, average price per gallon (gas and diesel), transaction report, activation report, brand report (gasoline, diesel and maintenance). This report allows fleets to identify areas of opportunity (such as excessive premium fuel use).	WEXOnline	Monthly
Opportunity Report	This report outlines savings opportunities by account, driver and/or vehicle by benchmarking purchases at a zip code level against the entire WEX portfolio. This report provides insight into where drivers are fueling, identifying ways to save by fueling at lower cost stations near their routes.	WEXOnline	Monthly

Profile Reports provide fleet managers and administrators with a snapshot of the information available in our system at the time the report is run, making it easy to manage the inventory of accounts, cards, drivers, and vehicles and helping ensure that the information and status of each item is up-to-date. Available reports include:

Report Name	Description/Benefit	Mode of Delivery	Frequency
Account Profile	This report itemizes the accounts within Purchasing Entity's hierarchy and provides details including contact name, shipping information, total cards, total driver prompts, card type, accounts, org units, and total vehicle prompts. This report helps fleet managers ensure their accounts are set up as desired.	WEXOnline	On Demand or Scheduled
Card Profile	This report provides a broad view of cards across multiple accounts or focused on a single account. This allows fleets to monitor and review card data based on a comprehensive view of card attributes or just a few specific card details.	WEXOnline	On Demand or Scheduled
Vehicle Profile	This report provides a broad view of vehicles and assets across multiple accounts or focused on a single account. This allows fleets to monitor and review vehicle data based on comprehensive information, including account assignment, name, status, and date of last transaction.	WEXOnline	On Demand or Scheduled
Driver Profile	This report provides a broad view of drivers across multiple accounts or focused on a single account. This allows fleets to monitor and review driver data based on comprehensive information, including account assignment, name, status, and date of last transaction.	WEXOnline	On Demand or Scheduled

Transaction Reports provide fleet managers and administrators with a full range of authorization and posted transaction data to perform audits, trend analysis and data mining. This allows for simple ad hoc queries and more in-depth, customizable reporting to help drill down to the data needed. Available reports include:

Report Name	Description/Benefit	Mode of Delivery	Frequency
Ad Hoc Transaction Details	This report is a simple, on-demand, ad hoc reporting tool that provides posted transaction details for a period of time specified (up to 24 months). This tool is especially useful in viewing transactions associated with a particular billing cycle, or a quick way to look up something being investigated. It has both filtering and sorting capabilities.	WEXOnline	On Demand
Ad Hoc Transaction Summary	This report is a simple, on-demand, ad hoc reporting tool that provides posted transaction details at a summary level for a period of time specified (up to 24 months). This tool is especially useful in viewing a summary of information by account, card, or brand, with an ability to then drill down into transaction details to get more information.	WEXOnline	On Demand
Transaction Management	This report is a comprehensive, highly customizable, transaction-level report that allows the ability to analyze usage at certain merchants or	WEXOnline	On Demand or Scheduled

	within specified dollar amounts or within selected accounts. It allows for a broad set of filters, and the ability to select and sort the fields.		
Authorization Activity	This report provides a direct view of authorization activity, which is posted in real-time in our system. This detailed authorization data helps make informed decisions and perform analysis to help manage and enforce driver purchasing policies. It is also an excellent tool for assisting drivers on the road who may have encountered a "decline" at the fuel pump, but are unsure why.	WEXOnline	On Demand or Scheduled

Managing by exception is an excellent way to save time while ensuring Purchasing Entity policies are being followed in the field. **Exception Reports**, when paired with card controls, help manage program by identifying potential fraud or abuse. Available reports include:

Report Name	Description/Benefit	Mode of Delivery	Frequency
Ad Hoc Exceptions	This report is a simple, on-demand, ad hoc exception reporting tool that provides the ability to view posted transaction details for a variety of exceptions. Some of the options include: high octane fuel, weekend purchases, and number of gallons or number of transactions per period. The tool has both filtering and sorting capabilities.	WEXOnline	On Demand
Flexible Exceptions	This report provides a comprehensive set of exception parameters for posted transactions upon which Purchasing Entity can be alerted. Any transactions that meet the threshold set will be captured on a report for review. Additionally, Purchasing Entity can choose to receive an email once a day notifying of any exception that has occurred. This tool is effective in identifying possible fraud or abuse of cards.	Email and WEXOnline	Daily capture of transaction details; on demand report viewing
Real Time Alerts	This tool allows Purchasing Entity to set parameters within Authorization Profiles so Purchasing Entity can be immediately alerted when a transaction falls outside of that parameter. An email will be deployed to notify of what has occurred, in near real-time, and it will also be available for review in an online report. This tool is very effective in identifying possible fraud or abuse as the transaction is occurring.	Email and WEXOnline	Emailed as threshold is exceeded; on demand report viewing

Benchmarking Reports provide a way for fleets to understand how their purchasing behavior compares to others, with insight into the types of merchants being used.

Report Name	Description/Benefit	Mode of Delivery	Frequency
Minority and Women-Owned Business Report	This report provides monthly roll-up of transactions, gallons, and dollars spent at minority- and women-owned fueling and service sites. This report is useful for those fleets that are tracking their minority spend and have a program to increase spending at minority- and women-owned businesses.	WEXOnline	Monthly
WEXIndex™	WEXIndex™ is an index and report published by WEX for the price per gallon of certain fuel types in a given month. Our customers use this report to understand pricing trends in the industry. Within the Account Review (see above under Management Reports), it is used to benchmark Purchasing Entity's fleet pricing behavior vs. the national	WEXOnline	On Demand

	average for the specific fuel type. This tool is an excellent way to help drivers make good choices on where they fuel and where fueling costs can be reduced.		

Billing Cycle Reports accompany an invoice to assist fleets in reconciliation before making payment. They are available in a variety of formats, giving the fleet the ability to choose the format that is most beneficial. Available reports include:

Report Name	Description/Benefit	Mode of Delivery	Frequency
Purchase Activity Report	This is our standard billing cycle report that accompanies each invoice, with a roll-up by card or department. It can be retrieved online and is in a PDF format. It consists of several key elements: • Purchase Activity: by card transaction details for that cycle • Financial Summary: financial roll-up of spend by account, fuel and non-fuel • Site Summary: roll-up of purchase behavior by brand, with totals • Tax Exempt Summary (tax exempt fleets only): roll-up of exempted and reported transactions by jurisdiction and fuel type	WEXOnline	With invoice, at cycle close
View Details	This is our standard transaction detail report that is available online and accompanies each invoice. The report can be downloaded into Excel or CSV as needed and provides an easy way for fleets to reconcile their transactions with their invoice. Also provides the ability to download for additional filtering or archiving.	WEXOnline	With invoice, at cycle close
WEXLink	WEXLink is a comprehensive data file available to fleets that wish to import transaction details into their systems. It can serve as simply a report, or as a billing and reporting file. (See description below in requirement 6.6)	WEXOnline, FTP, or Email	With invoice, at cycle close

5.15 System must capture and report sales by Product Code (PC). If PC Type reporting is available, please explain how this reporting would be conducted and what information would be provided.

WEX does capture and report sales by Product Code (PC). PC type reporting is available through WEX, is accessible in multiple places and formats. WEX's reporting tools in WEXOnline®, ClearView™ and in WEXLink™ files all contain Transaction Data that is inclusive of the product codes as reported to WEX by the merchant. WEX utilizes product coding standards set by the National Association of Convenience Stores (NACS).

WEXOnline® contains multiple reports that are available either via standard reporting or custom reporting that includes PC information. WEXOnline® Exception Reporting can also be set-up to trigger against unwanted or closely watch product grouping to alert a Fleet Manager/Program Administrator when an unwanted purchase may have occurred.

WEX Fleet ClearView™ Essentials module allows user with access and the appropriate permissioning to search and reports on Product Codes easily and quickly with in the dynamic analytics platform. PCs can be easily searched by Product Group, Product Type, Product Grade and Product Name.

Most of our larger fleets choose to receive billing and transaction data in the form of WEXLink™ file. This is an electronic file that provides customers with transaction data on a daily, weekly, or monthly basis via the internet (i.e. SFTP). The data is provided in a flat file and includes extensive detail for both fueling and service transactions, enabling fleets to analyze vehicle, driver and purchase information, and to reconcile monthly invoices. WEXLink™ files are designed specifically for fleet customers who want to perform detailed analysis and reporting on their fleet accounts within their own systems. This file can be merged with existing information management system, making it easy to track costs. Product Code information is available as Transaction Data report.

See table in Answer 6.6 for a summary of available reports, including Product Code reporting.

5.16 Contractor must be able to provide comparative rebate reporting comparing the previous quarterly and annual rebates to the then current quarter/year.

WEX's system allows for robust account structures and reporting functionality, including the reporting of rebate earnings that provides a full breakdown of a rebate for a given time period. These reports can be structured to compare the previous quarterly and annual rebates to the current quarter/year. Purchasing Entity's WEX Premium Fleet Services Account Manager along with the dedicated Strategic Relationship manager will work at the time of implementation, or at any point during the life of the contract, to set up or modify reporting to ensure it satisfies the needs on an individual State or Agency.

5.17 If capable, system must provide sales by merchant type (i.e. small business, minority owned, etc.) including Federal Diversity information.

WEX's Minority and Women-Owned Business Report provides monthly roll-up of transactions, gallons, and dollars spent at minority- and women-owned fueling and service sites. This report is useful for those fleets that are tracking their minority spend and have a program to increase spending at minority- and women-owned businesses. This report is delivered via WEXOnline®.

In addition to WEX's Minority and Women-Owned Business Report Purchase Activity Report, delivered via WEXOnline® at the close of every billing cycle, is our standard billing cycle report that accompanies each invoice, with a roll-up by card or department. It can be retrieved online and is in PDF format. It consists of several key elements:

- Purchase Activity: by card transaction details for that cycle
- Financial Summary: financial roll-up of spend by account, fuel and non-fuel
- Site Summary: roll-up of purchase behavior by brand, with totals
- Tax Exempt Summary (tax exempt fleets only): roll-up of exempted and reported transactions by jurisdiction and fuel type

6. DATA TRANSFER/INTEROPERABILITY

6.1 System must be accessible in accordance with Section 508 (Section 508 of the Rehabilitation Act (29 U.S.C. 794d), as amended by the Workforce Investment Act of 1998 (P.L. 105-220), August 7, 1998) - accessibility.

6.2 System must be supported (at a minimum) by Internet Explorer, Edge, Firefox, Safari, Chrome.

6.3 System must allow for downloads, data transmissions, and integration in support of non-standard/standalone financial management systems, including legacy systems.

6.4 System must have the ability to interface with legacy fleet management systems at no charge to customers including, but not limited to:

- Asset Works (Maximus, M4 and M5)
- Faster
- VMTS
- SAP

6.5 System must be able to provide Fleet Card information and transaction detail in a format compatible with all Enterprise Resource Planning (ERP) or e-procurement systems utilized by any Participating State/Purchasing Entity that is part of this Master Agreement. Those systems include, but are not limited to any SAP, Banner, Oracle, Periscope, or PeopleSoft systems.

WEX can deliver data in a flat file format, or WEX*Link*™ file, as well as downloadable formats out of our WEXOnline® module in CSV and XLS formats. These file types make it easy to import data into any back-office system -- including, but not limited to, SAP, Banner, Oracle, Periscope and PeopleSoft -- for thorough reporting and analysis. Additionally, WEX can perform custom file work to help meet a State or Agency need.

6.6 Contractor shall be able to provide, at no cost, the entire transaction data collected by the merchant at the frequency requested by the Participating State or Purchasing Entity in accordance with standard File Transfer Protocol (FTP). At a minimum, file outputs must include CSV (comma delimited) format and XLS.

Most of our larger fleets choose to receive billing data in the form of WEX*Link*™, an electronic file that provides customers with transaction data on a daily, weekly, or monthly basis via the internet (i.e. FTP). The data is provided in a flat file and includes all available information made available by the merchant with extensive detail for both fueling and service transactions, enabling fleets to analyze vehicle, driver and purchase information, and to reconcile monthly invoices. WEX*Link*™ files are designed specifically for fleet customers who want to perform detailed analysis and reporting on their fleet accounts. This file can be merged with existing information management system, making it easy to track costs. File outputs include CSV (comma delimited) format and XLS. The file can be set-up for delivery on a frequency suitable for the participating State and/or Agency.

Some of the detailed transaction information included in the WEX*Link*™ billing file is:

WEX*Link* File Data Summary			
Transaction Data	***Site Data***	***Vehicle Data***	***Driver Data***
Product code	Site name	Vehicle number/ID	Driver ID
Product name	Brand name	Vehicle plate number	First name
Transaction date	Site address	License plate state	Last name
Transaction time	Site city	Odometer	
Transaction number	Site state		
Fuel type	Site zip code		

Unit of measure	Private site quantity		
Unit cost	Private site transaction		
Quantity purchased			
Gross dollars			
Exempted tax			
Reported tax			
Invoice number			
Billing period			
Account number			
Code tracking*			
Non-fuel purchases			

6.7 System must have the ability to create custom extract files/mappers at no charge to the customer for automatic feed into their financial systems (i.e. SAP, Oracle, SMFA, SQL, PeopleSoft, Excel, etc.). This custom file will be created in such a manner that it can be imported into the Purchasing Entity's financial system with no interaction, special programming, or manual entry of transaction data.

WEX, at no charge to the Purchasing Entity, is able to create custom files that are capable of being imported into financial systems. The WEX IT Team can build custom files that are delivered via SFTP, email or mailed to a customer. The file types we can build and support are fixed length, CSV, Excel and PDF files. The files will be built to specs provided by the customer to match what they need the file to look like to minimize coding on their side to load the files. The files can be delivered on a variety of frequencies from daily, weekly, monthly (on any day of the month) and billing cycle. This work does have to go through a slotting and prioritization process. Customers should make requests through the Relationship Management Team. The Purchasing Entity/Customer will need to clearly detail what it is they are looking for and how they need to receive the customize file. The Contractor will build the file and work through a testing process with the Purchasing Entity to ensure the file work prior to them being put into production. Changes to a file would follow a similar process.

The WEXOnline®system also offers customization of data for reporting and export. The specification would be based on the standard data fields provided by WEX. These reports can be scheduled for export to CSV or Excel format and can be emailed to individuals or multiple people. Depending upon account set-up, they can also be sent to a WEX SFTP for retrieval.

7. SECURITY & CONFIDENTIALITY

7.1 System must be PCI DSS compliant throughout the term of the Master Agreement.

7.2 System Electronic Data Interchange (EDI) standards must be compliant with ANSI ASC.

7.3 Contractor must keep Participating State, Purchasing Entity, and Cardholder information confidential and may not share, use, or sell data acquired through the execution of this Master Agreement or affiliated Participating Addendum.

7.4 Cyber Security Protocols.

WEX's Information Security Organization is responsible for safeguarding the confidentiality, integrity and availability of physical and electronic information assets. The overall objectives for information security at WEX include:

- Ensuring the confidentiality, integrity and availability of WEX's information assets.
- Managing controls to safeguard WEX's information assets against unauthorized use, access or disclosure.
- Maintaining business resiliency in the event of a disaster or security incident.
- Managing a control environment consistent with commonly accepted industry standards and frameworks including ISO 27001, PCI-DSS, SOX/404, and NIST.
- Managing risks related to the use of external service providers and related third parties.

WEX's Information Security organization has adopted the ISO 27001/27002 framework for protecting information assets. The framework and related control activities have been established using a risk based approach aligned to enable the business and support strategic priorities.

As such, the Information Security framework includes the following:

ISO 27001 Domain	Representative WEX IS Capabilities
Information security policies	Corporate IS Policy, Acceptable Use, and extensive IS standards and procedures
Organization of information security	VP CISO reporting to the audit committee with functional groups including access management, threat management, risk management, business resiliency and architecture and engineering.
Human resource security	Background checks, training, management oversight
Asset management	Asset inventories maintained, data classification, and media handling controls
Access control	Provisioning and recertification controls limit access based on need to know and enforce stringent password and segregation of duties requirements

Cryptography	Encryption of relevant data in transit and at rest based on data classification
Physical and environmental security	Physical access and environmental controls
Operations security	Procedures, anti-virus, backups, change management, capacity management, logging, vulnerability management
Communications security	Network controls, network segmentation
System acquisition, development and maintenance	System development methodologies, secure coding training, security engagement into the project management lifecycle
Supplier relationships	Review of key third party service organizations to include right to audit and review of SSAE16, PCI and related reports
Information security incident management	Incident management, security investigations, and eDiscovery capabilities
Information security aspects of business continuity management	Formal business continuity and disaster recovery programs including periodic testing and business resiliency controls
Compliance; with internal requirements - policies, and with external requirements - laws	PCI-DSS, SSAE16, SOX/404, NIST, Data Protection Laws, data loss prevention controls

In terms of administration and governance, WEX has established a Global Chief Information Security Officer who reports to the Board of Directors Technology Committee and administratively through the Chief Technology Officer. WEX's security function includes Governance, Risk and Compliance, Identity and Access Management, Security Architecture, Security Engineering, and Business Continuity/Disaster Recovery functions. The Security framework is reviewed regularly and updated at least annually to respond to the rapidly evolving threat landscape.

WEX has also contracted with a Managed Security Service provider to perform 24x7 real time threat intelligence, security monitoring, and incident response capabilities.

7.5 Data Breached Notification.

The WEX Crisis Management Team ensures notification requirements are assessed by the legal and compliance teams and facilitates all required notifications via the appropriate channels to those who may have been impacted by any data breach.

7.6 Data Breach and Protocols to protect Agency Information.

In the event of a data breach the WEX Crisis Management Team engages immediately to implement the WEX Business Continuity Plan (BCP) to triage the level a potential breach and immediately safeguard all customer, State and/or Purchasing Entity's information. WEX has a BCP for each line of business across our organization, and this plan is customized to meet the unique needs of WEX customers across our organization in a given line of business. The WEX Business

Continuity Plan ensures that WEX employees, and the physical and information assets entrusted to us by our clients are protected by viable response and recovery plans. The Corporate BCP takes an all hazards approach to the assessment of risk posed to critical business functions and develops comprehensive plans that provide for effective recovery from a disruption of critical business functions. The plans are tested before implementation and exercised regularly thereafter to ensure their viability and continued improvement.

In instances of fraud or card skimming, WEX works in a similar manner to ensure accounts and customer information is shut off and safeguarded. See discussion of WEX's fraud detection system, SaferPayments, in our response to Question 15.4.

7.7 Contractor must provide and maintain an appropriate information security program to prevent the unauthorized disclosure, misuse, alteration, or destruction of confidential information.

As part of the WEX BCP, WEX has in place an information security program that exists to safeguard both WEX and WEX customers from the unauthorized disclosure of information, especially sensitive information. This includes unauthorized disclosure, misuse, alteration or destruction of confidential information. The WEX Information Security Program outlined below covers the protection of cards, account numbers, passwords, PINs, transaction data, among many other sensitive systems and information.

The WEX production data center is a secure facility, accessed by badge readers and monitored by CCTV. The facility is staffed 24x7x365. The WEX data center has a Tier III rating as specified by the uptime institute. WEX visitors and maintenance personnel are only allowed access to data center facilities with an authorized escort and approved business need.

WEX has an ISO 27001/27002 based Information Security Program that includes robust access controls, security monitoring controls, governance, risk and compliance, backup and recovery capabilities, regular penetration testing and vulnerability scanning, strong physical and environmental controls, policies and procedures, and security awareness training. Policies and standards are reviewed and updated annually. Procedures are owned by the individual teams and are required to meet the standards and also be approved by their management.

WEX also obtains a SSAE16 SOC1, PCI-DSS certification over our WEXOnline® platform, and is subjected to regular reviews and oversight by Internal Audit, External Audit, FDIC Examiners, and various third parties.

The SSAE16 SOC1, PCI-DSS certification governs WEX security protocols for how we handle customer information like cards, account numbers, passwords, personal identification numbers and transaction data.

Vendor Access

WEX has a Vendor program that establishes the following review and oversight areas: Information Security service provider review, Procurement review, and Legal Department review that must be performed prior to a third party being approved. Logical access is then requested by the WEX manager that owns the relationship with the third party and provisioned by a systems access group.

System Patches

System patches, including service packs and security fixes are reviewed and approved following standard change management processes. Relevant patches are applied as soon as practical given

maintenance windows, risks, etc. Not all updates are relevant in every environment, so each is evaluated for relevance and risk before implementation.

Protection From Attacks

The OWASP standards are built into development processes and manual testing is performed in addition to peer review as required by our SDLC. WEX uses an automated dynamic application security testing (DAST) solution that scans web applications to find vulnerabilities and provide guidance on remediation.

WEX receives vulnerability announcements, for relevant systems, from vendors, third parties, NIST, FDIC, FBI, and other threat feeds and has a dedicated security operations team managing and maintaining the vulnerability management program. The Vulnerability management procedure requires a ticket to be generated and assigned to Information Technology operations teams for patching.

Logging and Log Monitoring

Logs are aggregated and correlated using an on premise, commercially available, SIEM platform. Logs are kept for one year. Additionally, WEX has managed services contracts with a well known global service to assist in monitoring and responding to log events.

Remote Access

Remote access to WEX networks from a non-trusted network requires an authorized device, the use of VPN and two-factor authentication.

Network based intrusion detection is used at critical points of the network infrastructure. Network access control has been implemented to ensure only authorized devices that have the correct security posture are admitted onto the network.

Media Destruction

WEX utilizes a third-party vendor for media destruction. WEX also has onsite degauss capability that meets Department Of Defense requirements for media sanitization.

Access

Access is granted through the provisioning of a unique user ID, with least privilege rights granted. Requests are approved by a user's manager, and provisioned by a systems access group. Initial logon requires a password change, and access is disabled upon termination. Key password parameters: Min. Length of 8 characters must choose 3 out of the 4 of the following: capital letter, lower case letter, number, special character.

Lock out is three unsuccessful attempts and expiration is 90 days. User authentication can be performed, depending on the application, by: Active Directory, LDAPS, or Oracle access manager.

Encryption Policies and Standards

WEX encryption policies and standards govern encryption for data in transit and/or at rest. Standard algorithms are AES 256 and 3DES. WEX SAN data is encrypted at rest using AES256 and mobile devices utilize whole disk encryption. For web applications, SSL is used between web servers and the browser. Console access is SSH.

Incident Response

WEX has an incident response policy, standard, and procedure that is reviewed, approved, and tested yearly. Procedures contain: incident handling, incident detection and analysis, incident categorization, incident analysis, incident documentation, incident prioritization, incident notification, containment, eradication, and recovery, evidence gathering and handling, identifying the attackers, eradication and recovery, and post-incident activity using collected incident data.

Subcontractors

The WEX Legal Department, in conjunction with Procurement, performs contract review for service providers and has standard legal language in all contracts that address our security requirements and expectations of subcontractors.

7.8 Securing and preventing unauthorized disclosure, misuse, alteration, or destruction of confidential information.

WEX employees multiple levels of security with our contractors depending on the level of access they require. WEX prevents unauthorized disclosure, misuse, alteration or destruction of confidential information by utilizing the security protocols and proprietary technological advantages described above for both WEX and our Contractors. See responses in 7.1, 7.5, 7.6, 7.7 and 15.4 for more detail.

7.9 Disaster recovery plan (i.e. data breaches, system errors and resolution plans, timeframe for data restoration, backup in case of power failure, etc.).

WEX's Organizational Resilience Program Overview was created to provide clients with information identifying and defining the resiliency roles and responsibilities of WEX and our clients in the event operations are impacted due to disruption or disaster. WEX employs multiple call center locations across the country to ensure a given event in one area or region will not render another in operable. The same goes for WEX's authorizer that validates and approves transactions. Both are on separate power grids and housed in multiple locations across the country. In addition to some of these basic precautions, see our business continuity plan:

Overview

The WEX Business Continuity Plan includes well–defined and documented procedures, designed to respond to unforeseen events. WEX utilizes a step-by-step, standardized incident management process that ensures all requirements relating to proper response, escalation, notification and resolution of a disruption of any type are met. The WEX BCP utilizes the ISO 22301 framework and is integrated with WEX physical and information security, and risk management systems. The WEX BCP adopts a process approach for establishing, implementing, operating, monitoring, reviewing, maintaining, and improving the organization's organizational resilience management system.

Review Policy

Oversight of business continuity planning is assigned to the Director, Organizational Resilience who ensures that plan updates are completed and that the plan is tested and remains current and relevant.

Objective

The objective of the WEX BCP is to provide a comprehensive and systematic process of prevention, mitigation, preparedness, response, continuity, and recovery that provides an on-going, dynamic, and interactive process that serves to assure the continuation of the organization's critical business functions before, during, and after a disruptive event.

The BCP allows WEX to: effectively manage disruptions; provide efficient notification to personnel, clients, business partners, service providers and vendors; ensure organizational stability; provide well-defined and documented incident management procedures to minimize decision making during a disaster; ensure regulatory and legal compliance; and ensure regular testing of response/recovery plans.

Recovery

Summary

The WEX BCP provides well defined and documented procedures which provide the incident management team with the ability to effectively and efficiently manage the recovery process during and after a disruption of service to our clients. By implementing the pre-planned procedures, our incident management team can work together in an expedient and effective manner to resolve any unforeseen incident and ensure that the impact to our clients is minimized.

Alternate Processing Sites

WEX utilizes a combination of cloud and physical infrastructure to ensure resilience and recoverability of production systems across the globe. Each primary production system is designed to be highly available and resilient by utilizing HA architecture within each data center or by duplicating systems across multiple cloud availability zones as well as a corresponding disaster recovery solution to ensure recoverability of production systems.

The WEX call center will staff the alternate processing sites with operational support staff, technical, telecommunications, and administrative support personnel. WEX will maintain a fully functional Emergency Command Center at each location to provide redundancy for incident command.

Plan ORGANIZATION

Overview

The WEX BCP consists of multiple plans that outline physical security, emergency response, and recovery responsibilities, tasks, and procedures to be used throughout recovery efforts for our business locations and data centers.

WEX utilizes multiple industry recognized automated resiliency tools and services to ensure global situational awareness, effective preparation, communication and collaboration across the enterprise related to resiliency planning, testing and incident management.

Business Unit Plans

The business unit plans contain the recovery tasks and the action items required to recover the functions of each critical business unit.

Technology Plans

The technology plans identify the responsibilities, recovery tasks, detailed logistics and action items vital to recovering the critical applications and network infrastructure that supports our business units.

Emergency Response Plans

The emergency response plans identify the responsibilities and action items required for initial response to incidents and focus on preservation of life and safety of WEX employees and clients, as well as, the safeguarding of physical and information assets.

Corporate Incident Management System (IMS)

By allocating resources and providing a standardized incident management structure for all affected locations, the IMS identifies the Emergency Operations Center (EOC) responsibilities and activities that will assist the crisis management and recovery teams throughout the recovery effort. The responsibilities and tasks contained in the IMS are performed at the designated EOC.

Crisis Communications Plan (CCP)

The crisis communications plan provides procedures for the management and coordination of communications within WEX and externally to WEX clients and external stakeholders.

Pandemic Plan

The WEX Pandemic Plan lays out the strategic approach and preparations for influenza or other infectious disease pandemic. The plan is designed to minimize the risk to the health and safety of WEX employees and customers and ensure the continuity of business operations.

The plan includes recommendations from the Centers for Disease Control (CDC) and includes tactics for addressing workforce and facility impairment, notification of employees, and clients in the event of plan activation.

Support Plans

The support plans identify the responsibilities and recovery tasks required to provide emergency travel, financial, human resource, damage assessment, and salvage activities.

Evaluation AND TESTING

Summary

WEX will evaluate organizational resilience plans, procedures and capabilities through periodic assessments, testing, After Action Reports (AAR), performance evaluations and exercises.

Monitoring and Measurement

WEX will establish, implement and maintain performance metrics and procedures to monitor and measure, on a regular basis, characteristics of its operations that have a material impact on its performance, including partnership and supply chain relationships. The procedure shall include documenting of information to monitor performance, applicable operational controls, and conformity with the organization's organizational resilience objectives.

Evaluation of Compliance

Consistent with its commitment to compliance, WEX is continuously evaluating compliance with applicable legal and regulatory requirements. WEX will evaluate compliance with other requirements to which it subscribes including industry best practices.

Exercises

WEX will validate its Business Continuity Plans using testing and exercises that:

- Are consistent with the scope of the BCP and the objectives of the organization
- Are based on scenarios that are well planned with clearly defined objectives
- Minimize the risk of disruption to operations and assets
- Produce a formalized post exercise report that contains outcomes, recommendations, and plans to implement improvements in a timely fashion
- Are reviewed within the context of promoting continual improvement and are conducted at planned intervals, from time to time on a non-periodic basis, and when significant changes occur within the organization and the environment it operates in.

7.10 Roles and responsibilities of the team responsible for monitoring and managing system and product risks. Include how known risks and mitigation plans would be communicated to Participating States, Purchasing Entities, and Cardholders.

Consistent with its commitment to compliance, WEX is continuously evaluating compliance with applicable legal and regulatory requirements. WEX employs an Organizational Resilience Team to manage, monitor, and evaluate WEX's systems. The team works to assess risk across the entire WEX organization and employ policy and plans to ensure all risk is mitigated to the lowest level possible as well have to have communication and response plans in place should something happen. WEX evaluates compliance with other requirements to which it subscribes, including industry best practices. WEX has established performance metrics and procedures to monitor and measure, on a regular basis, those characteristics of its operations that have a material impact on its performance, including partnership and supply chain relationships. The procedure shall include documenting of information to monitor performance, applicable operational controls, and conformity with the organization's organizational resilience objectives.

8. CUSTOMER SERVICE

Customer service and support are key to the successful operation of any card program.

8.1 Contractor must provide at least one (1) designated Relationship Manager assigned to each Participating State. Relationship Manager may provide service to multiple states as long as service level meets each of the Participating State's requirements.

8.2 Relationship Manager must be familiar with all aspects of Category 2 – Fleet Card Services of the Commercial Card Solutions Master Agreement and applicable Participating Addendum.

8.3 Relationship Manager must be available to Program Administrators and Master Agreement Administrator Monday through Friday during the Participating State's regular business hours.

8.4 Relationship Manager will provide managing account support to Program Administrators and contract support to Master Agreement Administrator in each state.

8.5 Contractor must provide at least one (1) designated Account Coordinator assigned to each Participating State to support all Purchasing Entities within that state. Account Coordinator may provide service to multiple states as long as services level meets each Participating State's needs.

8.6 Account Coordinator must be familiar with all aspects of Category 2 – Fleet Card Services of the Commercial Card Solutions Master Agreement and applicable Participating Addendum.

8.7 Account Coordinator must be available to Program Administrators Monday through Friday during the Participating State's/Entity's regular business hours.

8.8 Account Coordinator will provide day-to-day account management support to Program Administrators and Cardholders.

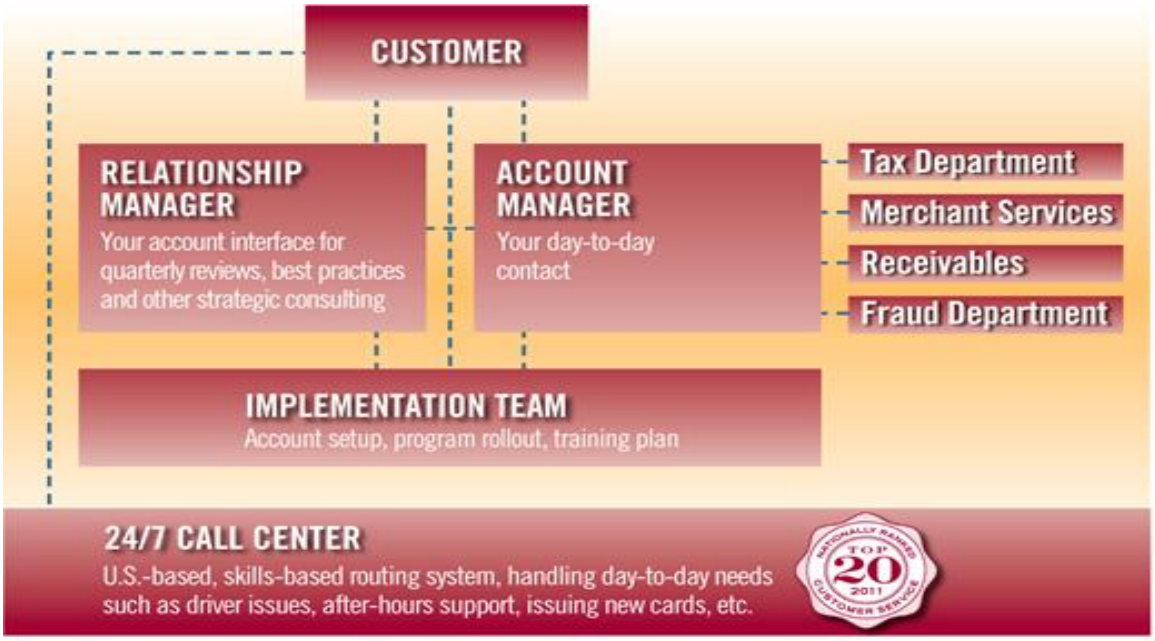
8.9 Contractor must provide a domestic and international toll-free numbers available to cardholders 24/7/365.

8.10 Roles and responsibilities filled by proposed Relationship Manager(s). At a minimum, include how they will meet the requirements described above.

WEX assigns a Relationship Management Team lead by a Strategic Relationship Manager to each State relationship. The Strategic Relationship Manager is in charge of the overall relationship under the contract for a given State and is able to provide for and oversee all of the requirements listed above.

The role of the Strategic Relationship Manager is to ensure States and Agencies maximize the value of our program. This includes an in-depth understanding of your business and your goals so that they can provide you with the best solutions and best practices for optimal savings and usage of the program. The Strategic Relationship Manager will engage with you during the implementation of your program, and ongoing, through regular business reviews which includes a review of key performance indicators, sharing best practices, introducing new products, as well as tracking against your established policies, goals and objectives. The Strategic Relationship Manager is also available to assist with problem resolution and escalation whenever necessary.

Working with the Strategic Relationship Manager will be a Premium Fleet Service Account Manager whose responsibilities are to assist the Strategic Relationship Manager with the overall relationship as well as provide day to day operations support to the State and it's participating entities. The Premium Fleet Services Account Manager is also able to provide for and oversee all of the requirements listed above.



8.11 Roles and responsibilities filled by proposed Account Coordinators. At a minimum, include how they will meet the requirements described above.

At WEX, our management and staff are tasked with improving and enhancing the effectiveness and efficiency of all aspects of our service offering. Our charge is to maximize resources while creating and maintaining a balance between work expectations and personal lives. Keeping first line customer representatives invigorated and available to handle the next call requires support from an extended team of specialists to provide assistance with complex issues and ensure optimal staffing during peak call hours.

Your Premium Fleet Services (PFS) Account Manager is the primary day-to-day contact for your fleet managers/program administrators. PFS generally ensures that the program is working smoothly and also expedites all problems to their quickest resolution so that the fleet experiences minimal disruption. PFS will also serve as the liaison to any technical needs the State or Participating Entity may require. PFS will help create reporting that may not be easily accessible

to the Fleet Managers. It is the goal of PFS to ensure that the Fleet Managers have the necessary data to manage their fleets. PFS Account Managers, at a minimum, return phone calls within two business hours and return emails within 24 business hours. WEX Premium Fleet Services Account Managers are dedicated to a balanced portfolio of strategic clients. Capacity is closely managed to ensure a superior customer experience for each client.

Your PFS and Strategic relationship manager will assist facilitating requests and needs that come up throughout the life of the contract. In addition to these two roles, WEX has host of support department the Relationship Management Team will lean on to support your State through the life of the contract. Below is an outline of that support structure:

8.12 Contractor must provide a designated customer service team familiar with all aspects of Category 2 of the Commercial Cards Solutions Master Agreement and the Participating State's Participating Addendum in order to provide consistent, relevant, and effective front-line customer service via phone or on-line, 24/7/365. The designated customer service team may provide service to multiple states as long as customer service level meets each Participating States' requirements.

In addition to the Relationship Management team described in 8.10 and 8.11, WEX also provides an award winning, 24/7/365, toll-free customer service department to assist with after-hours needs, reporting lost or stolen cards, assistance in processing transactions, cardholder assistance, general accounts information, reporting fraud, invoice questions, authorization questions or help, out-of-network transaction authorizations and many more specific needs or questions a customer may have.

Roles within WEX Customer Service Call Center include:

Customer Service Help Desk is available to support service representatives with calls that require, immediate help, additional research or specialized knowledge to fleet manager, system users, drivers and merchants. The goal is to resolve issues in one call and provide an immediate response to the customer.

Customer Service Trainer is accountable for providing initial, remedial, and new program training for all CSRs. The Relationship Management Team will work with the Customer Service Trainer in support of the States and participating entities to this contract to ensure the Call center is trained appropriately and they will also develop account notes that are visible to all customer service representatives to make sure that beyond initial training on the Master Contract and Participation Addendums, they will have the information handy to them on a go forward basis as well.

Technical and Resource Planning Team is responsible for the daily management of the queues to ensure service levels are achieved. The team also provides daily, monthly, and ad hoc reporting for the call center. They forecast the resources required and manage the scheduling of associates to optimize the customer experience.

WEX employs a state-of-the-art call handling system featuring skill-based call routing. Our skill-based call routing ensures that our CSRs do not receive certain types of calls until they are fully trained to support them. We conduct a rigorous training and examination phase for all newly hired CSRs, and provide continuous refresher training to experienced staff. Only upon successful completion of the training program, are CSRs allowed to field calls from the customers, ensuring that they are able to provide the best in class service that our customers have come to expect from WEX. Experienced CSRs and team leaders monitor new staff responses to assure quality and program performance.

8.13 After-hour/holiday/weekend customer service will be provided (internally or 3rd party). If provided by a 3rd party, explain how this team is trained and access to the system and data.

The WEX Customer Service Department is available 24 hours a day, 365 days a year (366 days in leap years) and fully staffed by WEX employees who are fleet-trained in-house. The WEX Customer Service Department is always available to handle the needs of the fleet by calling the toll-free number 800-492-0669. Realizing that customer service is paramount in our relationships, WEX has kept its support within the company and aggressively invests in training, technology, equipment and industry best practices. WEX does not outsource its call center service to a third party.

8.14 System issues (bugs) communicated (acknowledgement, status of fix, resolution, etc.) to system users?

As the Premium Fleet Services Account Manager is made aware of a system issue they will communicate via email and/or via phone to the customer acknowledging the issue, providing insight around any known impacts and timing of fix. The Premium Fleet Services Account Manager will provide consistent communication and progress updates through to issue resolution. If a production defect is present, an IT ticket is opened and addressed by the product support team. If an enhancement is requested, it will be added to workflow or, if multiple teams are required to actualize, the new product ticketing system “Aha.”

8.15 Participating States and Purchasing Entities will need the support of a secure and knowledgeable team at all hierarchical levels of the Program.

WEX offers Participating States and Purchasing Entities our Relationship Management Team, including our Premium Fleet Services Account Manager, who are all tenured employees of WEX and have fleet specific knowledge. This team supports all hierarchical levels of the program. This team ONLY manages fleet-related accounts, ensuring they are well versed in the needs of state governments and fleet in general.

8.16 Contractor must benchmark customer service.

WEX uses two benchmarks as success measures: service level (the percentage of calls answered within a certain time frame) and customer satisfaction (driven by post-servicing customer survey results). Both are monthly targets. Service level is measured daily and adjustments are made on a weekly basis as required. Customer satisfaction surveys are sent to a percentage of customers post call, and our internal QA system is designed to support customer satisfaction drivers. Agent receive weekly coaching designed to improve customer satisfaction.

8.17 Contractor must have an established escalation process.

Your Premium Fleet Services Account Manager is the primary day-to-day contact for your fleet managers. He or she generally ensures that the program is working smoothly and also expedites all problems to their quickest resolution so that the fleet experiences minimal disruption. Premium Fleet Services Account Managers work hand in hand with the Strategic Relationship Manager assigned to the account as well. Should any issues, problem or concern in need of escalation, the PFS Account Manager will immediately engage the Relationship Manager. Customers can always reach out to the Strategic Relationship Manager as well directly. The Strategic Relationship Manager will work with all parties involved to ensure plan is put in place to address and resolve any issue that is at hand in the quickest and most effective way possible.

8.18 Additional customer support services.

Our fleet customers — including public sector clients — cite their customer service experience as the single finest aspect of their relationship with WEX. Our service philosophy is based on matching customer service personnel with the skills and expertise to meet large and small fleet needs at various organizational levels.

WEX will assign experienced Account Managers to large fleet Program Coordinators as the single point of contact for their programs. Program participants will also have 24/7 access to trained call center representatives (CSRs) available whenever needed. This tiered approach enables us to provide high levels of customer service at all times, as well as strategic oversight to work closely with agency contacts to improve their fleet card programs. Below are additional tools and support staff WEX employees who support the ongoing relationships:

eServices

In coordination with Premium Fleet Services and Strategic Support, eServices provides fleet support for WEX's online tool. The eServices team strives for one-call resolution and, where applicable, customer education on use of our online products.

Fraud Specialists

WEX's experienced fraud prevention professionals work with fleets, partners, merchants, and, when necessary, local and federal authorities in order to minimize fraud, misuse, and abuse of our fleet card programs. We take a three-pronged approach to mitigating inappropriate use of cards and card programs —prevention, detection, and management. The Fraud Team an extensive network of industry contacts and association memberships to ensure they are on top of new trends and developments.

Merchant Services

The Merchant Services group works closely with both our Merchant Acquisition team and our Tax Department to achieve maximum acceptance with the greatest level of tax participation possible. This work includes the recruitment of new merchant acceptance when requested by a fleet.

Strategic Receivables Services (SRS)

WEX takes a proactive and service oriented approach to reducing payment delinquency. Our team of receivables specialists (Strategic Receivables Services) works with large customers to ensure accurate and on-time billing and payment. Each customer is assigned a specific receivables specialist who will be the primary point of contact and will work closely with the account manager. Your SRS specialist will work with you to ensure that your billing structure and payment methods work well for your business and help you get the most value from your card program.

SRS specialists monitor payments on a daily basis and make contact with customers that have remitted a payment amount that does not match the amount due. In this way, past due balances are cleared up quickly, reducing the need for costly and time consuming historical reconciliation and analysis.

The WEX Customer Service Department is available 24 hours a day, 365 days a year, and is staffed by highly proficient service representatives and supervisors. The Customer Service Department is always available to answer questions, handle lost or stolen card reports, order replacement cards and authorize transactions for cardholders and Program Administrators. Customer Service Representatives are also trained to handle questions regarding account billing and reporting. Station attendants can utilize an interactive voice response system (IVR) to obtain quick purchase authorization. Program administrators can use the IVR to check balances, available credit limits, or make a payment by phone.

Customer satisfaction is the bottom line for any service organization and WEX has developed high standards for how we deal with our customers. For example, our current minimum performance goal is to have ***70% of calls answered by a person within 30 seconds.**** We set our standards for customer service by benchmarking against other card-based call centers. We then strive to exceed these standards with each call. Measured metrics include:

- Average speed to answer
- Time to abandon
- Abandonment rate
- Talk Time
- After-Call Work
- Handle Time

WEX surveys its customers to gain insight into their Customer Service experience. Our customers consistently give us high marks for the service we provide. Additionally, we record all of our calls and evaluate trends using speech analytic technology. This provides us with rich, real time voice of the customer information that is valuable for enhancing our training programs and informing our product development activities.

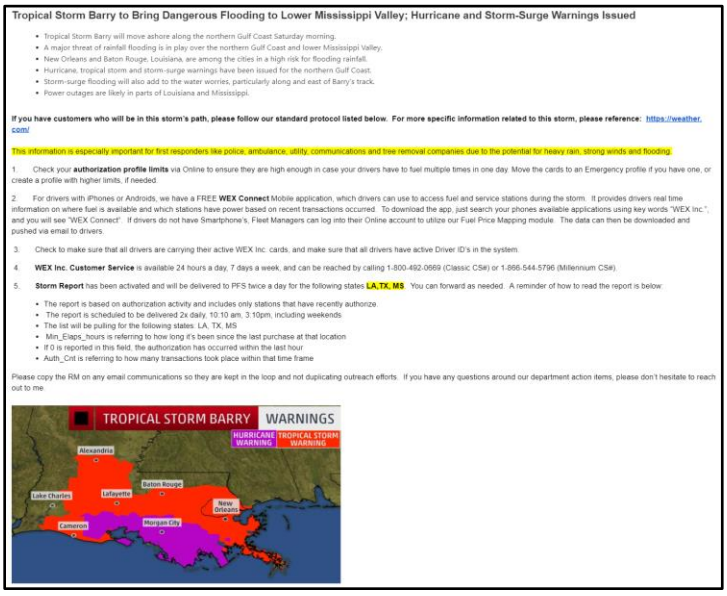
**Subject to change based on seasonality and call volumes.*

Customer Service Management

At WEX, our management and our staff are tasked with improving and enhancing the effectiveness and efficiency of all aspects of our service offering. Our charge is to maximize resources while creating and maintaining a balance between work expectations and personal lives. Keeping first line customer representatives invigorated and available to handle the next call requires support from an extended team of specialists to provide assistance with complex issues and ensure optimal staffing during peak call hours.

Skill-Based Call Routing System

WEX employs a state-of-the-art call handling system featuring skill-based call routing. Our skill-based call routing ensures that our CSRs do not receive certain types of calls until they are fully trained to support them. We conduct a rigorous training and examination phase for all newly hired CSRs, and provide continuous refresher training to experienced staff. Only upon successful completion of the training program, are CSRs allowed to field calls from the customers, ensuring that they are able to provide the best in class service that our customers have come to expect from WEX. Experienced CSRs and team leaders monitor new staff to assure quality and program performance.



Emergency Response (Premium Fleet Services)

WEX is prepared to support the needs of our Premium Fleet Service fleets in the case of natural disasters (e.g., hurricanes, earthquakes), threats to national security, and military mobilization.

At WEX, we recognize the critical importance of keeping fuel supplies available so that public sector vehicles can operate and respond during natural disasters and other emergencies. We're proud that the fleets we serve have found our work to be instrumental in their ability to maintain continuous operations during their most crucial times of need. Some services that can be provided upon request include:

- Emergency plan development: we work with each customer to prepare a plan of response should an emergency occur
- Set up of online emergency card profiles, so you can easily remove or change your card control limits to support your emergency needs
- Regular updates outlining which networks and fuel stations are open and active in disaster areas

At right is a recent communication WEX sent to our PFS customers in preparation for the Tropical Storm/Hurricane Barry that hit the Gulf Coast in July. These reminders are provided when there is an expected event, like weather, that may affect a certain area. WEX also provides this type of notification on an ongoing basis after a major event. This type of communication would include list of fuel merchants where WEX is seeing purchasing activity so we can inform our customers of places to find fuel in the event of power or fuel shortages.

Tropical Storm Barry to Bring Dangerous Flooding to Lower Mississippi Valley; Hurricane and Storm-Surge Warnings Issued

- Tropical Storm Barry will move ashore along the northern Gulf Coast Saturday morning.
- A major threat of rainfall flooding is in play over the northern Gulf Coast and lower Mississippi Valley.
- New Orleans and Baton Rouge, Louisiana, are among the cities in a high risk for flooding rainfall.
- Hurricane, tropical storm and storm-surge warnings have been issued for the northern Gulf Coast.
- Storm-surge flooding will also add to the water worries, particularly along and east of Barry's track.
- Power outages are likely in parts of Louisiana and Mississippi.

If you have customers who will be in this storm's path, please follow our standard protocol listed below. For more specific information related to this storm, please reference: https://weather.com/

This information is especially important for first responders like police, ambulance, utility, communications and tree removal companies due to the potential for heavy rain, strong winds and flooding.

1. Check your **authorization profile limits** via Online to ensure they are high enough in case your drivers have to fuel multiple times in one day. Move the cards to an Emergency profile if you have one, or create a profile with higher limits, if needed.
2. For drivers with iPhones or Androids, we have a FREE **WEX Connect** Mobile application, which drivers can use to access fuel and service stations during the storm. It provides drivers real time information on where fuel is available and which stations have power based on recent transactions occurred. To download the app, just search your phones available applications using key words "WEX Inc.", and you will see "WEX Connect". If drivers do not have Smartphone's, Fleet Managers can log into their Online account to utilize our Fuel Price Mapping module. The data can then be downloaded and pushed via email to drivers.
3. Check to make sure that all drivers are carrying their active WEX Inc. cards, and make sure that all drivers have active Driver ID's in the system.
4. **WEX Inc. Customer Service** is available 24 hours a day, 7 days a week, and can be reached by calling 1-800.492.0669 (Classic CS#) or 1.866.544.5796 (Millennium CS#).
5. **Storm Report** has been activated and will be delivered to PFS twice a day for the following states **LA,TX, MS**. You can forward as needed. A reminder of how to read the report is below:
   - The report is based on authorization activity and includes only stations that have recently authorize.
   - The report is scheduled to be delivered 2x daily, 10:10 am, 3:10pm, including weekends.
   - The list will be pulling for the following states: LA, TX, MS
   - Min_Elaps_hours is referring to how long it's been since the last purchase at that location
   - If 0 is reported in this field, the authorization has occurred within the last hour
   - Auth_Cnt is referring to how many transactions took place within that time frame

Please copy the RM on any email communications so they are kept in the loop and not duplicating outreach efforts. If you have any questions around our department action items, please don't hesitate to reach out to me.

ClearView communities

For users of WEX Fleet ClearView™, **the Community Module** allows you to network, collaborate, participate in discussion groups on fleet-related topics (i.e. positively impacting driver behavior or reducing fraudulent spend), pose questions, and share best practice information with your fellow analytics peers.

This module features **Discussion Forums** on a variety of fleet-related topics where users can collaborate and share information, a news feed of recent Community activity, the **ClearView University** and Events calendar, and a Resources section where content can be downloaded.

The **Resources** view contains informational assets, such as, Quick Start Guides, white papers, articles, images, and release notes. Navigate to this view by using the top navigational menu.

8.19 Contractor must provide an issue tracking system.

When a service interruption or problem is reported by a customer, the contact center agent enters the information into a CRM system for case lifecycle tracking management. This would include any issues that may require additional research, off-phone work where the resolution would be provided back to the customer based upon their preferred channel phone or email. When an enterprise outage occurrence, for example, online application, there is a standard notification provided within the online application to notify customers.

8.20 If a customer has to call back or another customer calls about the same issue, how is the customer service team notified that the issue has already been explained and should be (at a minimum) in the issue resolution que?

When a service interruption or problem is reported by a customer, the contact center agent enters the information into a CRM system for case lifecycle tracking management. This would include any issues that may require additional research, off-phone work where the resolution would be provided back to the customer based upon their preferred channel phone or email. When an enterprise outage occurrence, for example, online application, there is a standard notification provided within the online application to notify customers. The lifecycle tracking also allows customer service agents to see if the same or like issue has already been addressed and be

able to communicate that to a customer. Is some cases similar issues may still need to be addressed with the individual calling and the customer service representative will work with the caller to ensure their issues are taken care of.

As the Premium Fleet Services Account Manager is made aware of a system issue, they will communicate via email and/or via phone to the customer acknowledging the issue, providing insight around any known impacts and timing of fix. The Account Manager will provide consistent communication and progress updates through to issue resolution. If a production defect is present, an IT ticket is opened and addressed by the product support team. If an enhancement is requested, it will be added to workflow or, if multiple teams are required to actualize, the new product ticketing system "Aha."

9. IMPLEMENTATION/TRANSITION

The timeline and assigned resources of the multi-state implementation/transition to a new program are critical. The awarded Contractor will be responsible to fully cooperate with the current Contractor and any State executing a Participating Addendum under the new Master Agreement during all phases of the implementation/transition.

9.1 Implementation/Transition activities will occur at no cost to the Participating States or Purchasing Entities.

9.2 Upon award of the Master Agreement and each Participating State's Participating Addendum, but prior to the effective date, many entities will transition from the current NASPO ValuePoint contract and other individual state contracts to the new agreement*. Contractor must have a pre-established account set-up process that may be customized based on the needs of each Participating State.
Note: Each state's implementation shall not exceed nine (9) months.

*If the new agreement is awarded to the currently awarded Contractor, current Participating States may choose to 'reset' (i.e. re-organize under one statewide hierarchy/short name) their State's program requiring new account set ups/transition for all current Purchasing Entities.

Contractor will be required to work with Participating State to meet implementation requirements.

After contract award and execution of the Master Agreement and Participation Addendums, WEX will begin the implementation phase at the availability of State and/or participating Entity. The WEX Relationship Management Team will enlist the help of a WEX Strategic Implementation Manager to take the lead on the implementation process. WEX is well versed in implemented large complex accounts onto our platform. In recent years WEX has successfully lead the implementation of numerous large State, Private Sector and Federal Agency accounts as well as entire card portfolios for large Fleet Management Companies as well as several Major Oil Card Programs for branded merchants.

Strategic Implementation Managers work exclusively with WEX's large fleet customers, rolling out new programs and implementing significant changes to existing large client programs. Your Strategic Implementation Manager will work with the State to create and coordinate project plans and design, lead and execute communication to ensure milestones are met. The Strategic Implementation Manager will also develop and execute training plans to ensure card holders and fleet managers are well prepared to use the program.

During the implementation, they will also prepare and distribute regular project updates, facilitate and document issues and action items and document the State's requirements for customized reporting.

Task Name	Duration	Who's Responsible
TRANSITION/PRE-IMPLEMENTATION	**20-30 days**	
Initial formal contact between WEX and fleet		Relationship Manager / Fleet
Establish contacts, addresses and areas of responsibilities between all parties		Relationship Manager / Fleet
Relationship Managers		Relationship Manager / Fleet
Fleet Manager (day to day contact(s))		Fleet
Premium Fleet Services (PFS) Account Manager		WEX
Fleet billing		Fleet
Fleet maintenance		Fleet
Fleet technical		Fleet
Determine fleet expectations		Fleet / Relationship Manager / PFS
Determine whether roll out is at once or staggered		Fleet
Finalize implementation schedule		Fleet / PFS
Establish account profiles and hierarchy requirements		Fleet / PFS
Determine needed credit line		Fleet / WEX
Determine fleet's electronic capabilities		Fleet / PFS
Determine billing requirements		Fleet / PFS
Determine reporting requirements		Fleet / PFS
Determine account maintenance (WEXOnline) requirements		Fleet/PFS
Determine fleet training needs and create training plan		Fleet/PFS
Provide format for auto upload of fleet data into WEX system		PFS
Account information verified (prior to loading)		Fleet/PFS
IMPLEMENTATION - Timeline depends upon size and complexity, but typically 60 days		

4 or 6 digit personal prompt identification number?		Fleet
Prompt IDs provided by fleet or randomly generated by WEX System?		Fleet
Determine card design and embossing requirements		Fleet
Determine card types and restrictions		Fleet
Verify card information		PFS
Establish billing process and where invoices are sent for reconciliation and payment		Fleet /PFS
Establish payment terms		Fleet/WEX
Establish rebate process		Fleet/WEX
WEXOnline – fleet user enrollment		Fleet/PFS
Test applicable billing files and reports		Fleet/PFS
Execute training plan		Fleet/PFS
Create Training materials and Driver guides		PFS
Establish dispute process		PFS
Establish problem resolution process		PFS
Issue and distribute new fleet cards (confirming receipt)		PFS
POST-IMPLEMENTATION	**30 days**	
Review first set of reports		PFS
Are reports received on time and meeting fleet's needs?		PFS
Review first set of invoices		PFS
Are invoices received on time and meeting fleet needs?		PFS
Are payments being received on time?		PFS
Survey fleet to obtain feedback on implementation		PFS

Depending on the project plan that is mutually agreed to WEX will work to meet all requirements in the allotted time. A typical implementation takes around 90 days, but that can vary based on the specific requirements a fleet may have.

Please refer to the following sample Implementation Plan for a step-by-step list of implementation activities and the responsible party. This plan will be expanded and modified to meet your specific needs, including custom plastic.

9.3 Contractor must provide an Implementation/Transition Communication Plan.

As addressed in requirement 9.2, the WEX Strategic Implementation Manager will create a communication plan as part of the overall project plan that WEX will put in place with the customer at the very beginning of the implementation. The communication plan will be mutually

agreed to and provide for how communication will happen as well as resources and training for all users who are coming on board. This plan will call out any needed staff resources, how communication should take place as well as timing of any necessary communications and training.

WEX has been in the fleet fueling business since 1983, and has a long history of efficiently and effectively implementing fleet fueling programs for many of the largest commercial and government fleets in the United States. We believe customers who have worked with WEX, such as the references included in this response, will agree that our implementation process is unsurpassed when compared to our fleet card competitors. See sample implementation plan above for reference.

9.4 Contractor must provide qualified personnel during the implementation/transition process.

WEX would replicate the proven implementation process detailed above in 9.2 and 9.3 and engage the proper contacts at each of the participating entities, optimizing the sequence of implementation by the project plan that is put in place following the first meeting. Additionally, WEX will work to schedule group online training session, recorded training session and additional trainings in person as needed or required.

9.5 Contractor must provide Implementation Training Plan for all Purchasing Entities.

WEX would replicate the proven implementation process detailed above in 9.2-9.4 and engage the proper contacts at each of the participating entities to put in place project plans to ensure the above requirement and all other needs are met.

9.6 Contractor must provide access to online test-environment for Participating State and Purchasing Entity testing during all phases of the account setup process. The system must look, act, and demonstrate all aspects of the "live" system.

Although WEX does not have a customer-facing testing environment, we typically provide account access at the time of account creation to users who desire early access. This is done so customers can familiarize themselves with the site as the WEX Strategic Implementation Managers are standing up all of the specific aspects of the account for the end-users. This process allows fleets to see how their actual account's specific details will look and feel. In terms of online or in-person training, WEX also provides access to the actual system interface and can walk users through typical set-ups in live webinars or other in-person training.

9.7 Contractor must agree that at the end of any applicable Master Agreement or Participating Addendum, should any Participating State conduct another procurement and award a new contract, the Contractor will work with Participating State to ensure that an efficient and effective transition takes place within nine (9) months.

WEX agrees to this requirement and that we would make every attempt to ensure that contract close-out and transition to a new contractor is successful, and would assign a close out and transition team to carry this out. This team will be assigned by WEX no later than one hundred twenty (120) calendar days prior to expiration of the Contract.

WEX understands that the State may have a need for WEX to continue providing any part or all of the services required under the Contract for a period not to exceed one hundred twenty (120) calendar days after expiration or termination of the Contract. If this need exists, upon written notification by the State, WEX will provide services for that period or until the State notifies WEX in writing to cease providing services, whichever is sooner.

Coordinating the card, driver and account terminations in our system to coincide with the timing of their transition has been our primary focus and action. WEX will continue to provide reporting as needed, communicate with the customer about how long they will need online access, and either only suspend the accounts accordingly until online access is not needed and then terminate the accounts and associated online logon(s). We will work with the customer to establish a reasonable date or phase out of WEX card usage, so that there is no interruption in service, and keep credit on the account accordingly if there are no credit issues. If there are credit issues we will communicate with the customer and the bank to work out a plan to switch to the new provider when needed. The goal of the plan and the continuous communication to the fleet is to provide uninterrupted fueling and reporting. All of these activities are performed by an account manager per an authorized fleet contact request.

10. PROGRAM GROWTH

Throughout the life of the Master Agreement/Participating Addendum and through the growth of each Participating State's programs, it can be anticipated that new Purchasing Entities and new cards within exiting Purchasing Entities will need to be added.

10.1 As the marketplace changes and technology advances, card products and service may also expand. If the awarded Contractor proposes an additional product or service, that request must be submitted to the Lead State for review and approval. Request must include:

- Full description of product/service;
- Full implementation plan, including level of effort and timeline;
- Full communication plan; and
- Full training plan.
- New card products and services must not impact the rebate/incentive share or have any additional cost to the Participating States or Purchasing Entities. Addition of any card product or service to the Master Agreement is at the sole discretion of the Lead State. Participating States will have the option to allow or exclude new card products or services in the Participating Addendum.

10.2 While the goal is for a majority of Purchasing Entities to enroll in the program prior to the program effective date, it is understood that some Purchasing Entities will need to be integrated after the program effective date and additional Purchasing Entities will join throughout the program term.

WEX would encourage full participation at the outset to maximize training resources and transmit standardized information to all participating entities. However, WEX has no issues in meeting this requirement and providing whatever levels of support for the on-boarding of the new participating entities individually as they join.

10.3 Adding cards to an active Purchasing Entity account.

An active purchasing entity account requires no extra paperwork or agreement to add cards to that account. As long as an authorized contact is making the request.

Fleet Card Enrollment Process: Existing State Agency Accounts

Program administrators can add cards and drivers via the Fleet Manager WEX's online module named, WEXOnline®, through WEX customer service or the State's Premium Fleet Services Account Manager. The Premium Fleet Services Account Manager is a one to one point of contact

assigned to the State to day to day operation support and account needs. The Fleet Manager module allows the fleet manager to add, edit, suspend, reactivate, and terminate cards and drivers, to add and manage card controls, and to view and download invoice details. You can also:

- Assign card to driver, vehicle or location
- Transfer cards from one account to another
- Group cards into authorization profiles to enforce your purchasing policies
- Create organizational units or departments to better organize cards, vehicles and drivers for reporting and management purposes (initially added during the implementation phase)
- Edit account information

Card orders: WEX will process requests for replacement cards for lost, damaged, or stolen cards within one business day. If notification is received by 3:30 p.m. Eastern Time, you can have cards sent that day. You can use your own shipping account number or be charged a fee to cover the shipping costs. The WEX overnight fee, is included in the pricing evaluation for the RFP. If a WEX card is lost or stolen, it should be reported immediately to our Customer Service Department by calling the toll-free number**.** The Customer Service Department is available 24 hours a day, 365 days a year. The fleet can also notify WEX of the loss, theft, or unauthorized use of any card or account electronically through WEXOnline®.

10.4 Contractor is expected to promote the card program.

WEX currently provides fleet fuel cards for 24 states, and has governmental and tax-exempt customers in all 50 states. Our State customers represent more than 375,000 cards. Additionally, WEX provides fleet card services as a subcontractor to Citibank under the Federal Government's GSA SmartPay 3 Charge Card Program for the GSA Fleet, as well as to the Departments of Homeland Security, Energy, Treasury, and Agriculture. These federal government customers have more than 320,000 cards. In total, WEX services more than 1 million tax-exempt cards.

WEX offers and actively markets its card programs to municipal and other public entities within member states so as to extend the benefits of the program throughout member states. See **ADDENDA** for examples of how WEX markets its government card programs to political subdivisions within a participating entity.

WEX employs an outside sales team as well as two inside sales representative who are dedicated to Government Contract Support for promoting and onboarding eligible entities to support contract growth. In addition to these resources, WEX actively participates in government-specific trade shows and associations to actively promote and sell our products and services to grow our contracts. Some of these events include the NASPO Exchange, NCSFA, NIGP, NAFA, GFX, state-specific shows showcasing their contracts, and many others.

Over the years, WEX has seen tremendous growth and high retention rates for all our state-held contracts, cooperative contracts, and political subdivision participation within those contracts.

11. CARD DESIGN/EMBOSSING, DELIVERY & ACTIVATION

11.1 Contractor shall be responsible for the embossing and printing of the cards to each Participating State's specifications. Each Participating State will be responsible for furnishing the necessary artwork (digital file) to the Contractor.

11.2 Each Participating State reserves the right to change the card design during this contract, and if doing so, will provide the artwork needed to make changes.

11.3 Contractor must be able to deliver cards overnight when requested by the Purchasing Entity.

11.4 Customization options to the front side of the card will include verbiage and/or logo or graphic and embossing including but not limited to:

- Participating State
- Purchasing Entity
- Program/Department Name
- Cardholder Name
- Picture/Logo
- Phrase (i.e. "FOR OFFICIAL USE ONLY")
- Embossing Line, ALPH OR NUMERIC VERBIAGE
- Contractor supplied options

Card embossing, production, and distribution process.

WEX is able to meet the above requirements as stated. Our embossing capabilities and card design enable customers to customize the information that is imprinted and printed on the cards. There are two lines for embossing. The first line is usually designated for the account name, while the second line can be used to identify the associated equipment or driver. Each line will accommodate up to 24 characters. The account number, card number, product restriction (such as "Fuel Only"), and expiration dates are printed on the front of the card. Embedded in the card's magnetic strip are the card number, expiration date, prompt, and restrictions, if any.

The WEX Fleet Card is a standard-size plastic charge card with an encoded magnetic strip on the back. The strip is encoded with the account and card information which, when read at the point of sale, is married in our systems with Level III data obtained during the transaction.

Although we use the highest grade plastic that is rated for longer periods of use, our standard term for card expiration is three years. WEX uses a three-year active period for our cards due to the wear and tear on the magnetic strip that requires a card to be replaced for optimum performance. WEX ships new cards 45 days prior to expiration to ensure that your drivers will never be without an active card. On request WEX can renew cards earlier than the standard 45 day prior to expiration to allow the fleet more time to swap out cards. Some competitors offer longer card terms on equally rated card stock prior to replacement. We prefer to replace cards before they become problematic for your drivers and detrimental to the efficiency of your fleet operations.

WEX will process requests for replacement cards for lost, damaged, or stolen cards within one business day. If notification is received by 3:30 p.m. Eastern Time, you can have cards sent that day. You can use your own shipping account number or be charged a fee to cover the shipping costs.

If a WEX card is lost or stolen, it should be reported immediately to our Customer Service Department by calling the toll-free number**.** The Customer Service Department is available 24 hours a day, 365 days a year. The fleet can also notify WEX of the loss, theft, or unauthorized use of any card or account through WEXOnline®. Subject to any limitations imposed by applicable law, the fleet will be liable to WEX for all unauthorized use of a card until you notify us of such use.

Once a card has been reported as lost or stolen, it is immediately invalidated in the WEX system. After cancellation, all electronic authorizations associated with the card are declined at the time a purchase is attempted. Once WEX receives proper notification, the fleet will be relieved from liability for any subsequent charges to the card.

WEX will work with each participating entity to customize plastics types.

11.5 Physical cards will be delivered to the Purchasing Entity or Cardholder at the address specified by the Purchasing Entity.

WEX cards can be shipped directly to the address specified by the user making the card order. Standard card orders are set to go out via Standard US Mail at no charge. WEX does offer expedited shipping options of overnight and two-day shipping. WEX cards can also be delivered using the carrier specified by the fleet (e.g., the U.S. Postal Service, FedEx and UPS). There is a fee for expedited orders if you choose not to use your own shipping account. For all card orders of five or more cards, WEX ships via USPS Parcel to provide a tracking number for the order. This is done at no extra cost and helps provide visibility into card orders that would not be trackable through regular mail.

11.6 Purchasing Entities must be able to decide if cards are delivered active or inactive.

WEX typically ships cards in active status. WEX can accommodate cards being shipped inactive; we only need to be notified of that request at the time of card order. We will change the cards to suspended status once the file is sent to our card production. Card status can be changed to active when the customer is ready to begin using the cards. WEX cards can also be suspended on arrival by authorized users and WEX can assist with any mass card activations on our end.

11.7 Purchasing Entities need to have the ability to have cards delivered in batches (i.e. Division A, Program 1) as determined by the Purchasing Entity.

The customer can order cards in batches using the WEXOnline® module or the Premium Fleets Services Account Manager can work with the customer to order new cards or reissue cards in batches using a Data Collection Document (DCD) for orders exceeding 100. The PFS Account Manager has access to and can provide to the customer delivery tracking information for USPS card orders totaling five or greater and tracking on expedited card orders at no additional cost.

11.8 Card re-issuance.

Accounts can be set up with different expiration dates, and account expiration dates can be changed by the account manager to renew early. Both measures are precautions to avoid a mass-reissuance of cards.

In the normal course of business, files of reissuance cards are sent to the vendor on the 1st and 15th of the month prior to the month in which cards expire. Cards expiring on August 31 are sent to the vendor on July 1 and 15. Cards are completed and mailed to the customer within seven business days of receipt of the file and shipped via regular mail.

For Purchasing Entities requiring more time, WEX can perform an early card renewal given the entity the time needed to complete their re-issuance. This is available on request from the entity to the Premium Fleet Services Account Manager.

11.9 Mass re-issuance of cards for a Purchasing Entity avoidance process.

Accounts can be set up with different expiration dates, and account expiration dates can be changed by the account manager to renew early. Both measures are precautions to avoid mass-reissuance of cards.

WEX is flexible in that we are always looking to work to meet the needs of our customers. If there are specific re-issuance scenarios a fleet may be concerned about, WEX will work with that entity to mitigate and put in place precautions to avoid a mass re-issuance scenario.

12. TRAINING

Initial and ongoing training are critical to each Participating State's ability to manage their program. Each Participating State may have additional training requirements and will be negotiated in the Participating Addendum. At a minimum, training will include:

12.1 Contractor must provide System User Guides online and accessible through the web-based card management system.

12.2 Contractor must provide ongoing training for the life of the contract. WEX will provide initial training at agreed upon sites, ongoing as-needed training, and re-training as required via the following delivery methods: in-person training, webinars, phone conference or a combination of those.

Upon the initial implementation, your WEX Strategic Implementation Manager will train the fleet management team in how to perform the following functions. Online or in person system training typically takes 60 to 90 minutes, depending on questions:

WEXOnline® Account Maintenance

- User ID/Password Creation and Site Overview
- View Hierarchy/Account Search
- Card Maintenance
- Vehicle Maintenance
- Driver Maintenance
- Invoices
- Authorization Controls
- Address/Contact Management
- WEXOnline® Account Financials
- Accounting Fields/Codes
- Accounting Profiles
- Transaction Management
- WEXOnline® Reports
- Ad hoc Reports
- Exception Reports
- Custom Report
- Standard Reports
- WEXOnline® Resource Tools
- Accepting Locations
- Fuel Price Mapping

- Alternative/Diesel Fuel Directory
- WEX Index Top Metro Report
- WEXOnline® Administration
- View /Add Online Users
- View Pending Requests
- Add/View Roles and permissions

Training can be divided into specific segments depending on the administrator's duties. WEX will work with the State to organize tailored online training per users' assigned roles.

WEX will provide recorded training sessions that can be posted to the State's intranet site as an additional tool. Multiple trainings can be recorded based on the audience's role e.g., full access or read only.

12.3 Contractor must provide web-based training.

WEX is able to provide training for all of the above requirements and will hold ongoing WebEX and in-person training sessions at a frequency determined by the State of Washington/NASPO and any other Participating Entity. For instance, WEX could host monthly WebEX/online trainings for new employees and those who need refresher training. Items included in the training are customizable depending on the need, but typically consist of all of the needs mentioned in Question 12.3 plus:

- Program policies as dictated by the member states
  - Card usage at retail locations
  - System access
  - Customer Service Support
  - Updated technology
  - Best practices
  - Industry trends

12.4 Contractor must provide onsite/classroom training for Program Administrators

WEX agrees to and will hold onsite, in-person training sessions for Program Administrators at a frequency determined by the State of Washington/NASPO and any other Participating Entity.

12.5 Contractor must provide onsite User group forums.

WEX will hold ongoing in-person training and user forum sessions at a frequency determined by the State of Washington/NASPO and any other Participating Entity for whatever subject matter, best practice sharing, account reviews, raising concerns or any other need the customer may have. Many times these user forums are a great time for Participating Entities to share new or reinforce existing polices as well for their users. Items included in the forums are customizable and can meet all of the above requirements.

12.6 Contractor must provide written User reference guides, both extensive and quick guides.

WEX will provide reference guides that are detailed and provide quick summaries as part of the implementation project plan. Other reference guides exist throughout WEX's various systems. For example, The WEXOnline® module has PDF help guides that provide step-by-step instructions to navigate the different modules available.

The following PDF help guides are available:

- Homepage. View news and events, pending online user requests, flexible exception report notifications, and search and select both accounts and organizational units.
- Fleet Manager. Managing cards, drivers, vehicles, authorization profiles, accounts, org units (or departments), contacts, and addresses.
- Financials. Provides access to accounting fields and definitions, and allows you to assign financial profiles throughout your hierarchy.
- Reports- Guides the user through the various reporting tools to meet your analysis needs.
- Resource Tools. offers various, commonly-requested reporting tools to help locate sites where your fleet card can be used, to assist you in finding diesel and alternative fuel sites, and to direct you to locations with the lowest price per gallon.
- Administration. Manage online users, view the roles and permissions to which these users are assigned; create custom roles to meet your security needs.

The Implementation Manager will also work with the Agency to create a WEXOnline® Summary Guide that outlines how agency nuances and requirements will be captured and reported through the system as well as quick-step guides for the online system.

12.7 Contractor must provide updates to the user guides will be proactively communicated.

Improving our end-user assistance, WEX is shifting away from static PDF user guides in favor of an online contextual and embedded help management system that's always available and is updated dynamically. PDF user guides will remain available on the site as we continue to add embedded content to the contextual and embedded help management system.

- New contextual and embedded help management system content is prioritized based on information communicated from the call center, account reps, and direct user feedback. When new information is added, on-screen alerts appear.
- Adding new contextual and embedded help management system content is ongoing, and new walk-throughs are added as quickly as resources and capacity allow.
- Our site is coded such that video content can be generic or, if state-specific tutorials are available and supplied to WEX, branded by state.

12.8 Additional training.

During the implementation phase WEX will source feedback from user to craft training to ensure customer input is received, needs are prioritized, training is tailored, the venue it needs to be presented in and how it is communicated. At the conclusion of the implementation, the Implementation Manager will create a final document outlining the program as implemented for a given Participating Entity and capturing the nuances of the different Agencies along with any customized servicing or reporting that has been designed for your team. This is a collaborative process between the customer and WEX and will be maintained throughout the life of the contract for support on an ongoing basis.

See the response in 12.7 regarding how our system also provides dynamic training updates with pertinent on-screen alerts that notify of new training topics and learnings supplied by our call center, account reps, and direct user feedback.

WEX will also provide training on an ongoing basis as technical releases are completed to ensure the Agencies are taking full advantage of all the WEX offerings. Your Strategic Relationship Manager along with your Premium Fleet Services Account Managers will work with the

Participating Entities to schedule additional training sessions as required or requested after the initial implementation is completed.

12.9 Reserved

13. RESERVED - See Payment Terms Section 6.

14. LIABILITY

14.1 Purchasing Entities shall have no liability for lost or stolen cards upon notification to the Contractor or fraudulent use of any card products.

15. FRAUD PROTECTION

15.1 Contractor shall report fraud transactions, and the resulting credit issuance(s) to the Cardholder and the Purchasing Entity Program Administrator through real time notifications.

15.2 Contractor or system must be capable of providing a daily (at a minimum) fraud and declined transaction report as requested by the Purchasing Entity.

15.3 Contractor must provide external fraud protection coverage for the following types of occurrences including, but not limited to:

- lost/stolen cards
- counterfeit cards
- skimmed cards
- unauthorized internet transactions
- fraud patterns
- account takeovers

Fraud protection coverage plan.

The WEX Fraud team looks for and provides protection coverage for the types of occurrence listed above. In our experience, efforts by WEX's Fraud Department, in tandem with a customer's use of a fleet management policy; controls; and alerts, along with careful review of all reports, including exception reports, helps substantially reduce exposure to abuse and fraud, and any associated losses.

WEX has instituted business practices designed to help you detect and reduce fraud and/or misuse of the WEX card. WEX's Fraud Department performs three primary functions in an effort to identify and mitigate fraud on our fleet customers' accounts:

Primary Functions
● Review Transaction activity
● Identify potentially abusive or fraudulent behavior
● Notify customers when such behavior occurs

Our Fraud Department makes every effort to detect unusual or excessive purchase activity using constantly evolving techniques and reporting. If such activity is detected, an analyst will contact the fleet manager to bring it to their attention, noting details such as:

"Red Flag" Activity Indicators
● Date and time of purchase
● Merchant location
● Product purchased
● Driver identification number used to conduct the sale
● Dollar amount

Our Fraud Department has been instrumental in providing recommendations to prevent fraud from occurring, proactively working to identify fraudulent transactions, and working closely with fleets, merchants and appropriate authorities to minimize losses and prevent such situations from continuing or recurring.

WEX will terminate compromised cards within 48 hours if there are no fraudulent transactions. If WEX discovers a suspicious transaction, the card is terminated immediately and WEX will attempt to contact the fleet for verification. If the transaction proves to be legitimate, WEX can reactivate the card.

There are currently approximately 40 members of in WEX's fraud department. WEX works with state and local law enforcement, in all 50 states, in an effort to prosecute those who commit fraud with the WEX card.

WEX only covers liability for losses for counterfeit/skimmed transactions. For lost or stolen cards, liability only applies after the customer reports a loss.

If a WEX card is lost or stolen, it should be reported immediately to our Customer Service Department by calling the toll-free number. The Customer Service Department is available 24 hours a day, 365 days a year. The fleet can also notify WEX of the loss, theft, or unauthorized use of any card or account through WEXOnline®. Subject to any limitations imposed by applicable law, the fleet will be liable to WEX for all unauthorized use of a card until you notify us of such use.

Once a card has been reported as lost or stolen, it is immediately invalidated in the WEX system. After cancellation, all electronic authorizations associated with the card are declined at the time a purchase is attempted. Once WEX receives proper notification, the fleet will be relieved from liability for any subsequent charges to the card.

15.4 Contractor must provide program screening activity for external fraud patterns and the process for communicating potential external fraud with Cardholders and Program Administrators.

In recent years, white plastic fraud has become the most significant form of fraud in the fleet card industry. White plastic is the result of a third party stealing card information and loading that information onto a new card for the purpose of conducting fraudulent transactions. In the cases that we see, the data is primarily acquired through devices placed into Automated Fuel Dispensers (AFDs). The devices allow the perpetrators to capture the card numbers, Driver IDs, and odometer readings as they are input at the pump. It is important to know that it's not just WEX cards that

are affected by gas pump skimming; any other gas or bank card used at the same pump during the time a device is in place is also at risk of being compromised.

WEX uses the data available to us in an attempt to discern the Point of Compromise (POC) for each identified occurrence of white plastic. We use this data to review other cards used at the same location during the same time period for possible abuse. Based on this information and other variables, we determine which cards are most at risk for having white plastic created.

WEX also regularly communicates fraud patterns to our customers on an ad-hoc basis.

Finally, as a global payments innovator with more than 35 years in the market, WEX has developed SaferPayments, a **true 24/7 real-time system** that prevents fraud by intercepting fraudulent transactions "in-flight," generating case queues for subsequent investigation and, in specific cases, triggering email alerts to customers.

SaferPayments is capable of preventing fraud at the holistic individual portfolio level, either during the authorization process or at the payment gateway. SaferPayments can prevent first party fraud and enforce business policies in one single instance for a true multi-channel/ multi-portfolio application. SaferPayments has been carefully programmed to prevent the authorization of the highest number of suspicious transactions possible without negatively impacting the customer experience by minimizing the number of "false positive" transactions that are stopped.

SaferPayments is an artificial intelligence based software that identifies risky transactions during the authorization process within milliseconds to prevent the degradation of authorization response times from the WEX authorization system. Transactions above a certain "suspicious level" will be declined, while all other transactions will be allowed to pass. SaferPayments delivers exceptionally accurate results at high fraud detection rates without impacting the customer experience. SaferPayments can detect anything from an unauthorized transaction due to a lost or stolen card, a compromised account (skimming, data breach, account takeover), or a potentially illicit transaction (money laundering, drug smuggling, etc.).

SaferPayments can both detect *and* prevent fraud. SaferPayments is both versatile and easily configurable, allowing WEX to maintain the fraud models internally, yet still provides robust fraud management capabilities. Using advanced machine learning algorithms, SaferPayments continuously "learns" as it aggregates transactions streaming through the solution to detect trends at a portfolio, customer, channel, product, and transaction level. WEX controls the settings that allows the WEX transaction authorization system to "pass", "pass, but flag for review", or "deny" any transaction or group of transactions.

Most traditional "neural" or "anomaly detection" software solutions rely heavily on pre-coded patterns of transactions or geolocation monitoring. They lack the ability to learn as they go and monitor all levels of a card portfolio. They also will typically only "flag" a transaction for review, but may not be able to actually stop a potentially fraudulent transaction from getting through the authorization process.

SaferPayments "learns" as it streams transactions through its logic. SaferPayments is able to monitor trends and activity at the portfolio, channel, customer, product, and transaction levels.

The logic within SaferPayments is highly configurable and as fraud trends are identified, will apply past learning, patterns, and trends to new transactions that stream through its logic engine. SaferPayments has multiple levels of detection which can actually prevent a transaction from authorizing or can flag a transaction for review by the fraud team depending upon scoring logic.

SaferPayments model maintenance requires no vendor intervention, enabling WEX to update models internally on a daily basis.

15.5 Fraudulent charges and communication.

WEX sends an immediate email notifying of potential fraud transactions. We don't execute massive "block and reissue" of potentially compromised cards. Our strategy involves enhanced monitoring of cards involved in a compromised event using Safer Payments decision intelligence (see 15.4).

15.6 Fraud deterrent of an EMV chip.

WEX will begin issuing chip cards in 2020 and will have a proprietary chip card live in market before the scheduled EMV liability shift in October 2020. This is in accordance with the industry wide movement led by the major card brands to require EMV chip usage at pay-at-the-pump fuel terminals.

An added benefit of the WEX chip cards will be that card renewal cycles will go from three years on current plastic to five-year renewal cycles (card expiration date). This will give fleets that added benefit of not having to deal with card swap outs due to expiring cards as often and help relieve some of that administrative burden.

WEX's current WEX Spec Compliance Policy requires that all WEX accepting merchants are able to accept a WEX chip card by October 2020 or merchants will cover the costs of any counterfeit fraud.

WEX developed its proprietary chip card in partnership with FIS, Multos and Gemalto, world-class leaders in chip card technology. This is the first fleet-centric chip applet designed specifically for the U.S. fleet industry, spec-based and customized for WEX Fleet.

Despite technological advances WEX is developing in the card, not all retail fuel merchants will choose to invest in chip card readers at the point of sale or at outside payment terminals due to the significant financial investment required. Some merchants will accept the risk of liability for fraudulent transactions. Because of this, the WEX Fleet card will have both a chip and magnetic stripe for many years to come.

WEX has taken a thoughtful and comprehensive approach to its chip card development:

- Because WEX’s reputation is based on customer security and satisfaction, WEX chose to use a proprietary chip applet -- not a consumer based chip applet -- in order to continue to be the market leader in Fleet technology.
- The WEX research and development team initiated planning years in advance with a goal to define a lasting standard, and to release the highest quality solution for commercial fleet at the right time.

- WEX is building a WEX Chip Issuance Roadmap to provide a seamless transition to WEX chip cards for our fleet customers.
- WEX also is working directly with our WEX-accepting merchants, their payment processors and their POS/pin pad vendors to build and to ensure compliance of the WEX chip.

15.7 Contractor or system must provide a way for Purchasing Entities to report fraudulent activity, lost, or stolen cards. Purchasing Entities also know it is important to be able to verify credentials of someone reporting such activity.

If a WEX card is lost or stolen, it should be reported immediately to our Customer Service Department by calling the toll-free number. The Customer Service Department is available 24 hours a day, 365 days a year. The fleet can also notify WEX of the loss, theft, or unauthorized use of any card or account through WEXOnline®. Subject to any limitations imposed by applicable law, the fleet will be liable to WEX for all unauthorized use of a card until you notify us of such use.

WEX will process requests for replacement cards for lost, damaged, or stolen cards within one business day. If notification is received by 3:30 p.m. Eastern Time, you can have cards sent that day. You can use your own shipping account number or be charged a fee to cover the shipping costs.

Once a card has been reported as lost or stolen, it is immediately invalidated in the WEX system. After cancellation, all electronic authorizations associated with the card are declined at the time a purchase is attempted. Once WEX receives proper notification, the fleet will be relieved from liability for any subsequent charges to the card.

WEX actively works with authorities at both local and federal levels to help authorities identify and apprehend individuals associated with White Plastic and/or Skimming. This level of engagement sometimes involves undercover surveillance which could be jeopardized by an unknowing individual pursuing an investigation on his or her own.

WEX may assume liability (financial loss) for white plastic cases. WEX may also require the impacted fleet to submit a dispute form or an Unauthorized Use Affidavit. This notarized document may be requested should the matter be prosecuted and it enables WEX to submit information in a court proceeding as evidence. Without the formal notarization, the claims we are prosecuting on your behalf may be disallowed.

It is important to remember that diligence and responsiveness are also important for fraud mitigation:

- Timely review of transaction data and reports is critical to fast identification of suspicious activity.
- Expeditious reporting (including submission of the Unauthorized Use Affidavit, if requested) of any suspicious transactions.
- Drivers should be encouraged to report to Customer Service anything unusual at stations, such as a pump that may have been tampered with/opened or a card reader that appears abnormal.

15.8 Contractor or system must provide a way for Purchasing Entities to track reported fraud transactions to completion (closure).

WEX offers a comprehensive fraud prevention and management program. Most recently, we have been beta testing an enhanced customer facing claims management interface with a large government customer. This tool allows customers to view each claim, the claim number, type of claim, card number, date reported, age of claim, total dollars, claim status and date of resolution. Upon resolution, an email is sent to the fleet for notification. The information in the interface can be exported into a report (on demand or scheduled) so it can be easily shared with others in your organization. Once beta testing is complete, we expect to deploy this solution to other large customers. We expect this to be in place before the contract effective date of January 1, 2021.

15.9 Contractor or system must be able to resolve mass attacks (i.e. fraudulent low value charges on multiple cards at once) without requiring action from the Purchasing Entities.

This type of attack is not a risk to WEX Fleet card holders, as our transaction processing occurs on a closed-loop network, not over the Internet.

Regarding other Web-based applications, OWASP standards are built into development processes, and manual testing is performed in addition to peer review as required by our SDLC. WEX uses an automated dynamic application security testing (DAST) solution that scans web applications to find vulnerabilities and provide guidance on remediation.

WEX receives vulnerability announcements for relevant systems from vendors, third parties, NIST, FDIC, FBI, and other threat feeds, and has a dedicated security operations team managing and maintaining the vulnerability management program. The vulnerability management procedure requires a ticket to be generated and assigned to Information Technology operations teams for patching.

16. DISPUTED TRANSACTIONS

Purchasing Entities will pay according to the contract payment terms; however, in instances of dispute, the charges must be placed in suspense until there is resolution. The Contractor must propose a timely dispute procedure to ensure that the payment network charge back rights do not expire. If upon resolution of a dispute it is found that the transaction was actually an authorized charge, the Participating Entity will be liable for the payment within the payment terms as described herein.

16.1 Contractor must provide a resolution procedure for dealing with disputed transactions resulting from unauthorized charges, errors in cardholder billings, or problems with charges for merchandise or services that are not resolved between the Cardholder and Merchant.

Disputed Transaction Detail

- How users will notify the Contractor
- Ability to dispute transactions electronically as well as track through final resolutions of the charge
- Instructions for cardholders
- Instructions (including invoice adjustments) for billing offices
- Provisions for prompt investigation of disputed items

- Provisions for reporting/disposition on resolution of dispute to cardholders, approving officials, Program Administrators, and billing office
- Provisions for system identified disputed related credit or payment on resolved dispute.
- Any limitations on the timeline of disputed transactions.
- Any details on what components of the transaction can be disputed

The WEX transaction dispute process is outlined below:

1. A customer must notify WEX in writing of a disputed transaction within sixty (60) days of the billing date of said transaction. WEX requests that the customer to provide as many details regarding the transaction and the reason for dispute as possible, including, but not limited to the following: card number, driver identification number used, transaction date and time, transaction dollar amount, and reason for dispute. Additional information may be requested as necessary to facilitate the investigation. When a Purchasing Entity disputes a charge, the disputed amount is temporarily or permanently credited in the current billing cycle and is removed from the amount due on the next available invoice. As such, the amount due shown on every invoice will be less the disputed amounts that occurred since the last invoice was created. Purchasing Entities shall pay the exact amount set forth on each invoice to avoid a credit being taken twice once the dispute is resolved and the final credit is applied.
2. The Participating Entity's written dispute is then forwarded to the applicable department for follow up and investigation. If the dispute involves an allegation of abuse or fraud, it will be handled by the Contractor's Fraud Department and the dispute process may vary from the standards as outlined below depending on the nature and validity of the claim.
3. If the disputed transaction occurred inside the fueling location and required a signature from the cardholder, the Contractor may request a copy of the sales draft from the merchant. As a result of the ticket request, the Participating Entity will receive a temporary credit memo on their invoice noting that a transaction is in dispute.
4. Once the applicable merchant provides a copy of the sales draft, it will be reviewed for compliance with the fleet program. If the Contractor determines that the sale is valid in accordance with the program, the disputed charge balance will be carried forward for payment and will be subject to applicable late fees. Payment is expected during the next billing cycle. Copies of the sale draft are then forwarded to the Purchasing Entity for review.
5. In the rare event that the transaction in question is determined to be a duplicate transaction, it is not necessary for the Contractor to request a copy of the ticket from the merchant. After receiving the Purchasing Entity's dispute in writing and confirming that the transaction is a duplicate, the Contractor will permanently credit the account within five (5) business days.
6. If the disputed transaction occurred at an automated facility, a copy of the sales draft would not be available as no signature is required and swipe of the card into the card reader establishes that the card was present at the time of sale. Pursuant to the terms of our Agreement, "…use of a Card and DIN and entry of the applicable sales data into the card system will evidence (your) Agreement to pay for such purchases."
7. In the rare occasion that a technical error occurred at an automated facility, the Contractor will perform an investigation into the dispute sale.

8. Upon conclusion of the investigation, the Contractor will communicate the outcome of the investigation to the Purchasing Entity. If a credit for a disputed transaction is warranted, it will be applied against the current billing period.

**Disputes of* WEX*Pay™ transactions are subject to the MasterCard dispute process.*

Online Dispute Process

Provisioned users can use WEXOnline® to request ticket copies, initiate a transaction dispute on a single or multiple transaction(s), and maintain visibility until resolution.

Current rules about what types of transactions cannot be disputed (e.g., private site, transactions, aviation transactions, island card reader, etc.) still apply. Onscreen instructional text and error messaging will be displayed if a transaction doesn't meet the dispute criteria.

Fraud-related dispute requests can be initiated within WEXOnline®, but due to their urgent nature, these disputes are immediately routed to the WEX Fraud Department for analysis and review. Given their sensitive disposition and circumstance, information about fraud-related disputes, including their status, will not appear in WEXOnline®, and instead will follow existing communication channels.

WEXPay™ transactions cannot be disputed online and must follow the existing process. Onscreen error messagingWEXPay™ transactions cannot be disputed online and must follow the existing process. Onscreen error messaging with a hyperlink to the dispute form will appear if this type of transaction is selected.

17. CARD ACCEPTANCE

17.1 Card acceptance is critical to state business and is a scored element of this Competitive Solicitation.

The WEX Fleet Card offers acceptance in all 50 states, at more than 95% of U.S. retail fueling locations, all of which provide Level III data. The card is accepted by all major oil companies and fuel retailers, as well as independent merchants, in urban, rural, and remote locations. The WEX Fleet Card is also accepted at approximately 4,500 locations in Canada. Although the number of accepting locations fluctuates due to gas and service stations opening and closing, the WEX card is currently accepted at more than 132,000 retail locations. Of these, approximately 120,000 offer fuel or both fuel and service; approximately 32,000 offer service or both fuel and service.

WEX Fleet DriverDash, our free mobile fuel payments platform, is now accepted at more than 25,000 US fueling locations, with frequent new acceptance announcements. DriverDash is an industry-first, fleet fuel card mobile payments application. WEX Fleet DriverDash sets the fundamental framework and acceptance for how future payments will be made, including by the vehicle itself. As connected car technology grows and becomes more accessible, the need for these type of mobile payments applications and interfaces will continue to grow. Mobile payments are safer, more secure, and provide a greater level of flexibility and accuracy for what can be prompted for at the time of purchase.

WEX is always increasing its acceptance coverage for fuel, marina and service locations. Because we currently have acceptance at more than 95% of all U.S. fuel sites, our merchant acquisition strategy is driven by the needs of our fleet customers requiring service in remote areas or acceptance outside of domestic coverage. If a fleet customer identifies specific fueling needs, WEX will work toward signing any needed location

If the customer has merchants that they would like to be part of the WEX accepting network who do not already have direct acceptance or cannot utilize the WEX*Pay™* tool, we will request the following information from the fleet:

- Merchant name
- Merchant address
- Merchant contact person
- Phone and fax numbers
- Expected utilization/volume from your fleet
- Name and phone number of fleet employee requesting WEX card acceptance

WEX will work with all interested parties toward gaining acceptance at the location. This includes either direct agreements or acceptance through our partnerships with network sales organizations and acquirers.

Number of WEX-accepting **locations, July 2019:**

Fuel, United States	137,862
Fuel, Canada	~ 4,500
EV (US)	~ 66,000
WEXPay (US)	~ 398,000

Staff Report: 109-26

To: Mayor and City Council
From: City Manager
Date: June 1, 2026

Subject
Interstate Bridge Replacement Intergovernmental Agreement Amendment

Key Points

- In 2019, the states of Oregon and Washington approved funding to restart work on replacing the Interstate 5 bridge across the Columbia River and directed Oregon Department of Transportation (ODOT) and Washington State Department of Transportation (WSDOT) to open a bi-state program office to lead this work.
- The City of Vancouver (City) is one of eight local agencies partnering with WSDOT and ODOT on the Interstate Bridge Replacement (IBR) Program. Staff has been and will continue to coordinate with the Program team on IBR work related to planning, environmental review, design, and public affairs.
- On September 27, 2021, Council voted in support of the City Manager executing an Intergovernmental Agreement (IGA) outlining the City's commitments and responsibilities related to the work noted in the previous bullet for purposes of reimbursement by the IBR Program. That IGA was executed on October 1, 2021, and has since been amended twice to extend the term.
- The attached Agreement amends the IGA and includes a Scope of Work and associated Budget for activities to be reimbursed from July 1, 2026, to June 30, 2027.

Strategic Plan Alignment
Transportation and Mobility – a safe, future-ready and convenient transportation system

Present Situation

IBR Program partners agreed to a Modified Locally Preferred Alternative (MLPA) in summer 2022. Since then, City staff have been coordinating with the Program on conceptual design of the multimodal elements included in the MLPA, the environmental preview process in accordance with the National Environmental Policy Act (NEPA), and related work to plan for construction and operational phases. The Final Supplemental Environmental Impact Statement (FSEIS) for the IBR Program was published in April 2026. Issuance of the Record of Decision by the federal lead agencies later in 2026 will enable the Program to move into construction. City staff will continue to participate in program management, public affairs, environmental review and permitting, design, and utilities. These tasks are further defined in Attachment A, Exhibit D.

Advantage(s)
This Agreement sets forth the terms and conditions for the City to receive reimbursement for participation in the IBR Program as defined in Attachment A, Exhibit D, Scope of Work and Budget.

Challenge(s)
None

Budget Impact

This Agreement will provide financial support through the Washington Department of Transportation for the City's capacity to participate in the IBR Program. The budget for this agreement will be appropriated in the Biennial Budget process.

Prior Council Review

- May 7, 2018: WSDOT updated Council on the I-5 Bridge Planning Inventory
- July 16, 2018: Staff Update, current conditions and efforts to restart bridge replacement process
- August 6, 2018: Staff update, Council review and adoption of a resolution in support of replacement bridge with high-capacity transit in a dedicated guideway
- June 8, 2020: Staff update on IBR Program work program
- June 21 and July 12, 2021: Council discussion on a resolution to define the City's desired outcomes through the IBR Program
- July 26, 2021: Council review and adoption of resolution to define the City's desired outcomes through IBR Program
- September 27, 2021: Council authorization for the City Manager to execute Intergovernmental Agreement with WSDOT
- July 11, 2022: Council approval of a resolution supporting the MLPA, Program Commitments, and City of Vancouver Conditions of Approval – following two workshops in June 2022
- December 19, 2022: Council authorization for the City Manager to execute an amendment to the Intergovernmental Agreement with WSDOT for City participation in the IBR Program
- July 17, 2023: Council authorization for the City Manager to execute a professional services agreement for IBR Program consultant support
- April 14, 2026: Council approval of a resolution related to IBR's extension of Light Rail Transit to Vancouver
- 2021 – Present: Numerous updates via Council Communications and briefings on Executive Steering Group meetings and overall Program status

Action Requested
On Monday, June 1, 2026, authorize the City Manager, or designee, to execute Amendment No. 3 to contract GCB 3544 between the City of Vancouver and Washington State Department of Transportation. Extend the termination date to June 30, 2027.

Attachment A

Special Transportation Planning Study Agreement
GCB 3544 Amendment No. 3

This is Amendment No. 3 between the Washington State Department of Transportation, hereinafter the "WSDOT," and The City of Vancouver, hereinafter the "Planning Agency" or "CITY", collectively referred to as the "Parties" and individually the "Party".

WHEREAS, the Parties entered into Agreement GCB 3544 on October 4, 2021, hereinafter "Agreement", Amendment No. 1 on December 29, 2022, and Amendment No. 2 on June 16, 2025; and

WHEREAS, the provisions of Section 5.1, allow for changes to the Agreement, provided they are mutually agreed upon by the Parties in writing; and

WHEREAS, the Parties agree to modify the Agreement provisions for the continued work required for the Project.

NOW THEREFORE, pursuant to above recitals, and in consideration of the terms, conditions, covenants, and performances contained herein, or attached and incorporated and made a part hereof it is mutually agreed as follows:

The Parties agree to amend the Agreement, in accordance with Section 5 Modifications to:

a. modify sections 2.1 and 3.1
b. replace Exhibit B, Title 6, Civil Rights Act of 1964
c. add Exhibit D Scope of Work and Budget for the next phase of the Project

as follows:

1. The following, which reads:

2.1 The Project period shall commence upon execution of this Agreement and shall expire on June 30, 2026.

3.1 WSDOT agrees to reimburse the Planning Agency's actual direct and related indirect costs allocated per 2 CFR 200 Appendix VII (F) (3). The maximum amount that WSDOT shall reimburse the Planning Agency shall not exceed the "Total Amount Authorized", as indicated in Exhibit A for January 1, 2021 through December 31, 2022 and in Exhibit C for January 1, 2023 through June 30, 2026.

shall be deleted in its entirety and replaced with:

2.1 The Project period shall commence upon execution of this Agreement and shall expire on June 30, 2027.

3.1 WSDOT agrees to reimburse the Planning Agency's actual direct and related indirect costs allocated per 2 CFR 200 Appendix VII (F) (3). The maximum amount that WSDOT shall reimburse the Planning Agency shall not exceed the "Total Amount Authorized", as

indicated in Exhibit A for January 1, 2021 through December 31, 2022; Exhibit C for January 1, 2023 through June 30, 2026; and Exhibit D for July 1, 2026 through June 30, 2027.

2. Exhibit B, Title 6, Civil Rights Act of 1964 is hereby deleted and replaced in its entirety as attached hereto by this reference.

3. Exhibit D Scope of Work and Budget for July 1, 2026 through June 30, 2027 is hereby attached and incorporated by this reference.

4. All other terms and conditions of the Agreement, shall remain in full force and effect, except as modified by this Amendment No. 3.

This Amendment may be executed in counterparts or in duplicate originals. Each counterpart or each duplicate shall be deemed an original copy of this Agreement signed by each party, for all purposes. Electronic signatures or signatures transmitted via e-mail in a "PDF" may be used in place of original signatures on this Agreement. Each party intends to be bound by its electronic or "PDF" signature on this Agreement and is aware that the other parties are relying on its electronic or "PDF" signature.

IN WITNESS WHEREOF, the parties hereto have executed this Amendment No. 3 as of the party's date last signed below.

EXHIBIT B
TITLE 6, CIVIL RIGHTS ACT OF 1964

During the performance of this Agreement, the Planning Agency, for itself, its subcontractors, its assignees, and successors in interest, hereinafter referred to as the "consultant," agrees as follows:

1. Compliance With Regulations: The consultant (hereafter includes consultants) will comply with the Acts and the Regulations relative to Nondiscrimination in Federally-assisted programs of the U.S. Department of Transportation, the ***Federal Highway Administration (FHWA)***, as they may be amended from time to time, which are herein incorporated by reference and made a part of this Agreement.

2. Nondiscrimination: The consultant, with regard to the work performed by it during the Agreement, will not discriminate on the grounds of race, color, or national origin in the selection and retention of subcontractors, including procurements of materials and leases of equipment. The consultant will not participate directly or indirectly in the discrimination prohibited by the Acts and the Regulations, including employment practices when the contract covers any activity, project, or program set forth in Appendix B of 49 CFR Part 21.

3. Solicitations for Subcontracts, Including Procurements of Materials and Equipment: In all solicitations either by competitive bidding or negotiation made by the consultant for work to be performed under a subcontract, including procurements of materials, or leases of equipment, each potential subcontractor or supplier will be notified by the consultant of the consultant's obligations under this Agreement and the Acts and the Regulations relative to Nondiscrimination on the grounds of race, color, or national origin.

4. Information and Reports: The consultant will provide all information and reports required by the Acts, the Regulations, and directives issued pursuant thereto and will permit access to its books, records, accounts, other sources of information, and its facilities as may be determined by WSDOT, ODOT, the Oregon Secretary of State's Office, the FHWA , Federal Transit Administration, or the Comptroller General of the United States, and their duly authorized representatives to be pertinent to ascertain compliance with such Acts, Regulations, and instructions. Where any information required of a consultant is in the exclusive possession of another who fails or refuses to furnish this information, the consultant will so certify to WSDOT or the FHWA as appropriate, and shall set forth what efforts it has made to obtain the information.

5. Sanctions for Noncompliance: In the event of the consultant's noncompliance with the Nondiscrimination provisions of this Agreement, WSDOT will impose such Agreement sanctions as it or the FHWA may determine to be appropriate, including, but not limited to:
    a. withholding of payment to the consultant under the Agreement until the consultant complies; and/or
    b. cancelling, terminating, or suspending an Agreement, in whole or in part.

6. Incorporation of Provisions: The consultant will include the provisions of paragraphs one through six in every subcontract, including procurements of materials and leases of equipment, unless exempt by the Acts, the Regulations and directives issued pursuant thereto. The consultant will take such action with respect to any subcontract or procurements as WSDOT or the FHWA may direct as a means of enforcing such provisions including sanctions for noncompliance. Provided, that if the consultant becomes involved in, or is threatened with litigation with a subcontractor, or supplier because of such direction, the consultant may request the United States to enter into litigation to protect the interest of the United States.

EXHIBIT D: SCOPE OF WORK (SOW) AND BUDGET

DURATION: JULY 1, 2026 THROUGH JUNE 30, 2027

INTRODUCTION/PURPOSE

This Scope of Work (SOW) includes the agreed-upon services and budget that the Washington State Department of Transportation (WSDOT) will reimburse the City of Vancouver (CITY) for as it pertains to the I-5 Interstate Bridge Replacement (IBR) Program (the "Program"). This SOW covers general coordination and services for the time period beginning July 1, 2026 through June 30, 2027.

WORK ELEMENTS FOR WHICH THE CITY WILL BE REIMBURSED

TASK 1: PROGRAM MANAGEMENT AND CONTROLS

The CITY shall provide agreement management and administration functions including invoicing, reporting, and developing future IBR-related agreements as follows:

a. Provide a single point of contact (CITY Program Lead) to manage staff resources needed for the completion of services and deliverables described in this SOW, including:
    i. Coordinating and managing work under this SOW including deliverables, schedule, staff assignments.
    ii. Coordinating with Program disciplines on issues that may affect scope, schedule or budget.
    iii. Compiling consolidated comments for individual tasks when review comments are made by more than one reviewer and submitting the comments to WSDOT.
    iv. Preparing for and participating in Program coordination meetings, as needed for Program coordination.
b. Prepare and submit invoices and progress reports to WSDOT for reimbursement no more frequently than monthly and no less frequently than quarterly.
c. Work with Program to develop future agreement(s) for CITY services as needed and requested by WSDOT to assist Program-related design and construction packages, including:
    i. Coordinating with WSDOT to develop a mutually agreed-upon schedule for development of agreements.
    ii. Preparing for and participating in agreement coordination meetings as needed for Program coordination.

Key Staff:

- CITY Program Lead (Policy & Programs Manager)
- Additional staff as needed and agreed to within budget

Assumptions:

- For the purposes of cost estimating, this assumes approximately 12 Program coordination meetings with up to four CITY staff. Meeting frequency and CITY staff participation is subject to change based on Program needs.
- For the purposes of cost estimating, this assumes approximately 18 agreement-related meetings with up to four CITY staff. Meeting frequency and CITY staff participation is subject to change based on Program needs.

TASK 2: PUBLIC AFFAIRS

The Program's Public Affairs team will lead strategic public affairs efforts to advance Program needs, including proactive and reactive communications, community engagement, and government relations efforts. To assist with this task, the CITY shall:

a. Prepare for and participate in Program advisory group meetings as needed for Program coordination.
b. Prepare for and participate in staff level workshops or coordination meetings on topics such as community engagement, community benefits, Program schedule and sequencing as needed for Program coordination.
c. Coordinate with the Program's Public Affairs team to align messaging, strategy, and methods as it relates to communications, community engagement, and government relations efforts.
d. Lead communications with internal agency boards, councils, and committees, including preparing presentations and materials as needed.
e. Share Program communications with the public through the CITY's existing communications channels as needed for Program coordination.
f. Submit all materials to WSDOT for review in coordination with the Program's Public Affairs team prior to presenting or disseminating information to the public, including but not limited to boards, councils, and committees.
g. Provide assistance and staffing for public meetings, community engagement activities, and government relations, as needed.
h. Assist Program staff with federal or state policy efforts and engagement with federal, state, and local representatives, as needed.
i. Prepare internally for Program-related meetings, as applicable.

Key Staff:

- CITY Program Lead
- Additional staff as needed and agreed to within budget

Assumptions:

- For purposes of cost estimating, this assumes approximately five advisory group meetings with up to two CITY staff. Meeting frequency and CITY staff participation is subject to change based on Program needs.
- For purposes of cost estimating, this assumes approximately 12 workshops or coordination meetings with up to two CITY staff. Meeting frequency and CITY staff participation is subject to change based on Program needs.

TASK 3: ENVIRONMENTAL/PERMITTING

To assist with this task, the CITY shall:

a. Review updated environmental documentation for the Program, which may include, but not be limited to the following regulations:
   i. National Environmental Policy Act (NEPA)
   ii. State Environmental Policy Act (SEPA)
   iii. Section 106 National Historic Preservation Act.

b. Coordinate with the Program to address issues related to the environmental documentation.

c. Provide documentation as needed to assist in environmental compliance and permitting coordination and review.

d. Compile consolidated comments to submit to WSDOT into a single document when review comments are provided by more than one reviewer.

e. Coordinate with Program discipline teams to identify the anticipated CITY permits and approvals necessary for the Program's design and construction packages. CITY activities include participating in the development and review of permitting plans, providing guidance on permitting processes, and assistance with preliminary applications for the Program's design and construction packages which may include, but are not limited to:
   i. Pre-Completion Tolling Signage
   ii. Other Program design and construction packages, as needed

f. Prepare for and participate in applicable Program-related meetings as it pertains to environmental review and/or permitting, or task-related meetings as needed for Program Coordination.

Key Staff:

- CITY Program Lead
- Additional staff as needed and agreed to within budget

Assumptions:

- For the purposes of cost estimating, this assumes approximately two meetings per month with up to four CITY staff to discuss environmental compliance issues. Meeting frequency and CITY staff participation is subject to change based on Program needs.
- For the purposes of cost estimating, this assumes approximately five additional task-related meetings with up to 12 CITY staff. Meeting frequency and CITY staff participation is subject to change based on Program needs.

TASK 4: DESIGN COORDINATION

WSDOT will work in close cooperation with the CITY on design plans and specifications for Program elements that may involve CITY-owned or operated facilities, the CITY's regulatory jurisdiction, CITY-provided services, and other elements affecting the CITY. To assist with this task, the CITY shall:

a. Review engineering plans (from conceptual through final design) and design-related technical reports for Program-proposed improvements and coordinate with Program to advance designs and address issues, as needed. Design coordination topics may include but are not limited to:
    i. Construction phasing plans, in consideration of other citywide construction project schedules that may affect the Program.
    ii. Design criteria for roadways, facilities, and cross-sectional elements.
    iii. CITY streets, access locations and access control, and pre- and post-construction property boundaries.
    iv. Traffic analysis, transit facilities, transit maintenance and operations, safety analysis, traffic signals, illumination, work zone traffic management, emergency services management, and construction staging concepts.
    v. Hydraulics reports, drainage and stormwater design, and roadside restoration.
b. Prepare for and participate in Program coordination meetings for all Task 4 activities, as needed for Program coordination.
c. Compile consolidated comments to submit to WSDOT into a single document when review comments are provided by more than one reviewer.
d. Provide design-related documentation to WSDOT, as needed.

Key Staff:

- CITY Program Lead
- Public Works Streets and Transportation Manager

- Additional staff as needed and agreed to within budget

Assumptions:

- For the purposes of cost estimating, this assumes approximately 12 coordination meetings with up to 12 CITY staff. Meeting frequency and CITY staff participation is subject to change based on Program needs.

TASK 5: UTILITIES COORDINATION

To assist with this task, the CITY shall:

a. Provide information to WSDOT, as requested, on existing and planned CITY-owned utility systems and any known private utilities located within existing CITY right-of-way that could be affected by design and construction packages that are part of the Program.
b. Assist WSDOT with identifying potential utility conflicts with Program design and construction packages located within existing and proposed CITY right-of-way. This may include reviewing utility information, identifying and confirming potential utility conflicts, confirming or providing the mode of occupation or accommodation for utilities, and providing supplemental utility information as needed.
c. Provide review and approval of CITY-owned utility relocation concepts.
d. Prepare for and participate in Program utilities coordination meetings as needed for Program coordination.
e. Compile consolidated comments to submit to WSDOT into a single document when review comments are provided by more than one reviewer.

Key Staff:

- CITY Program Lead
- Public Works - Utilities Engineering Manager
- Additional staff as needed and agreed to within budget

Assumptions:

- For the purposes of cost estimating, this assumes approximately six coordination meetings with up to 10 CITY staff. Meeting frequency and CITY staff participation is subject to change based on Program needs.

Attachment A

BUDGET

Task	Description	July 1, 2026 to June 30, 2027 Not to Exceed
1	Program Management and Controls	$109,330.44
2	Public Affairs	$91,542.90
3	Environmental/Permitting	$479,299.22
4	Design Coordination	$298,612.74
5	Utilities Coordination	$118,317.90
DE	Direct Expense	$0.00
	Total Amount Authorized:	**$1,097,103.20**

CITY OF Vancouver WASHINGTON

Staff Report: 110-26

To: Mayor and City Council
From: City Manager
Date: June 1, 2026

Subject
Vancouver Police Command Guild Collective Bargaining Agreement 2026-2028

Key Points

- Three-year collective bargaining agreement effective January 1, 2026, to December 31, 2028.
- Monetary elements agreed to include pay increases for 2026-2028, an increase in deferred compensation contribution, an increase in salary pay differential, an education incentive, establishment of a Voluntary Employees' Beneficiary Association (VEBA), which is a savings vehicle to cover medical expenses, and an additional tier for longevity pay at 25 years.
- Updates to bring the contract into compliance with state wage and hour laws.
- Increase in management flexibility that clarifies the qualifying criteria to determine how Callback Pay is paid out and tracked for operational purposes.

Strategic Plan Alignment
Safe and Prepared Community – a safe place to live, work, learn and play

High Performing Government – a government that is reliable, fiscally responsible, equitable, and open to compromise

Present Situation
The labor agreement between the City of Vancouver and the Vancouver Command Guild (VCG) bargaining unit expired on December 31, 2025. The parties were able to work through a collaborative process and consensual decision-making on many of the provisions for a new three-year agreement. The new labor agreement was recently ratified by VCG members and is now being brought to the Council for approval.

Advantage(s)
If ratified, the City and bargaining unit will have a collective bargaining agreement and will be operating under an agreement that meets the business and community needs of both parties.

Challenge(s)
There are no known challenges in ratifying this agreement.

Budget Impact
The total cost of the contract was determined by the 15.53% agreed to in the Vancouver Police Guild contract. The Command Guild has "me too" language that results in that unit receiving essentially the same package. The Command Guild contract also includes an additional 2% authorized by Council to address wage compression.. The .53% was the cost of settling an outstanding grievance regarding changes to medical benefits.

Prior Council Review
None

Action Requested
On Monday, June 1, 2026, authorize the City Manager, or designee, to sign the collective bargaining agreement with the Vancouver Police Command Guild for 2026-2028.

VANCOUVER COMMAND GUILD

AGREEMENT

This Agreement, as of the date indicated herein, by and between the City of Vancouver, a municipal corporation of the State of Washington, and hereinafter referred to as the "Employer," and the Vancouver Command Guild, hereinafter referred to as the "Guild," WITNESS that WHEREAS the parties have negotiated the terms and conditions of a collective bargaining agreement, hereinafter referred to as the agreement, relating to permanent, full-time Police Lieutenants and Police Commanders, hereinafter referred to as employees, represented by the Guild and described in this agreement, as to wages, hours, and other terms and conditions of employment of such employees and wish to reduce the agreement to writing, agree hereto as follows:

ARTICLE 1. Guild Recognition

1.1 The Employer recognizes the Guild as the exclusive bargaining agent for all of its employees covered by this Agreement.

1.2 The Employer and the Guild agree that questions of Guild representation that may arise shall be resolved in accordance with the rules of the Washington State Public Employment Relations Commission and in accordance with local, state, or national statutes and rules.

ARTICLE 2. Nondiscrimination

2.1 The parties agree that the provisions of this Agreement shall be applied equally to all employees covered hereby without regard to race, color, national origin, sex, age, physical or mental disability, political or religious opinions, labor organization affiliation, sexual orientation, gender identity, pregnancy, marital status, military status, or membership in any other class protected by state or federal law or City ordinance, unless such would prohibit performance of a qualifications standard that is job related and consistent with business necessity or necessary to prevent a direct threat to health and safety.

2.2 All references to members or employees in this Agreement designate both sexes; wherever the male gender is used it shall be construed to include both male and female members or employees as appropriate.

2.3 Employees shall process discrimination, retaliation, and/or bullying complaints under the applicable City Equal Employment Opportunity or HR/Department policy and procedure or under existing state or federal

law, and shall not have recourse through the grievance procedures established in Article 23 of this Agreement.

ARTICLE 3. Rights of Management

3.1 The management of the municipal corporation, including but not limited to, the organization, scheduling, staffing, and direction of the work force, is vested exclusively in the Employer, subject to the terms of this Agreement.

Examples of management rights include, but are not limited to:

3.1.1 to determine the number of employees to be employed;
3.1.2 to hire employees, determine their qualifications and assign and direct their work;
3.1.3 to evaluate employee performances;
3.1.4 to set the standards of productivity, and the services to be provided;
3.1.5 to control and regulate the use of facilities, equipment, and other property of the Employer;
3.1.6 to determine the number, location and operation of departments, divisions, and all other units of the Employer.

The Employer has the right to introduce any and all new improved and automated methods or equipment to improve efficiency and to reduce costs and assign employees within the bargaining unit in accordance with such improvements and cost reduction methods. All matters not specifically and expressly covered or treated by the language of this Agreement may be administered for its duration by the Employer in accordance with such policies or procedures as the Employer, from time to time, may determine. This Article recognizes an employee's right to use the grievance procedure set forth in Article 23 of this Agreement.

Nothing in this Article shall be considered a waiver of the Guild’s right to bargain over mandatory subjects of bargaining pursuant to RCW 41.56.

3.2 *Department Rules and Regulations*

It is mutually agreed that the City has full responsibility and authority to adopt rules and regulations for the operation of the Police Department and the conduct of its employees, and the Guild agrees that its members shall comply in full with such rules and regulations. Nothing in this Section shall be interpreted to restrict the Chief's right to make decisions or to establish procedures consistent with the "emergency" nature of operating the department.

ARTICLE 4. Employee Rights

4.1 The Employer recognizes and agrees that employees of the Police Department covered by this Agreement are entitled to all rights and privileges accorded ordinary citizens under all applicable provisions of the United States and State Constitutions as well as the rights and privileges granted by any and all applicable legislation and the common law.

ARTICLE 5. Union Security, Dues and Other Associated Dues

5.1 The parties agree that the terms of this Agreement apply equally to all employees in the bargaining unit and as defined in the Preamble to this Agreement. Any bargaining unit employee may authorize the Employer to deduct from their pay the amount of Guild membership dues charged by the Guild for representation and services provided by the Guild by providing notice to the Guild.

Any bargaining unit employee who does not want to be a member of the Guild, but who nonetheless wants to pay for services provided by the Guild has the voluntary option to pay fair share fees in an amount equal to membership dues. Any member of the bargaining unit may authorize the Employer to deduct from their pay voluntarily fair share fees in an amount equal to Guild dues charged by the Guild by providing notice to the Guild.

The employee's authorization will remain in effect until expressly revoked by the employee by notice to the Guild in accordance with the terms and conditions of the authorization. The Employer will rely on information provided by the Guild regarding the authorization and revocation of deductions.

5.2 Upon receipt of an employee request for authorization or revocation of authorization, the Employer shall notify the Guild as soon as possible via email, but no more than five (5) working days of the notification. The Employer will take no action upon receiving an employee request until receiving confirmation from the Union to begin or end deductions.

5.3 The Employer agrees to notify the Guild president when a represented position is filled within thirty days from the date of employment.

5.4 The Guild, upon completion of the employee orientation, shall provide the Employer notification as to whether such employees authorized dues deduction, fair share fees, or declined to pay dues. The Employer will deduct such dues/voluntary fair share fees from the wages of those employees and forward them to the Guild each month.

5.5 The Guild shall indemnify, defend and hold harmless the Employer and its officials, representatives and agents against any and all claims, demands, suits, or other forms of liability (monetary or otherwise) and for all reasonable legal costs that shall arise out of or by reason of action taken or not taken in good faith by the Employer in complying with the provisions of this Article. If an improper deduction is made, the Guild shall refund directly to the employee any such amount.

ARTICLE 6. Guild Representatives and Activities

6.1 The Guild shall inform the Employer in writing of the names of its current executive board members and attorneys who are designated to represent it. This information shall be kept up-to-date at all times. Only persons so designated will be accepted by the Employer as representatives of the Guild during the grievance process and on bargaining issues. The Guild may designate other members as representatives during contract negotiations.

6.2 The Guild's officers and attorneys shall have reasonable access to the Department during working hours, providing they do not interfere with or cause employees to neglect their work.

6.3 Employees and attorneys visiting the premises shall not engage in organizing or campaigning for the Guild, but this paragraph will not prevent the Guild from discussing in non-work areas during non-work periods matters of Guild membership, fees, dues, or Guild business with employees covered by this Agreement.

6.4 The Employer agrees not to discriminate against any member of the Guild because of their activity on behalf of or their membership in the Guild, provided such activity is not carried on during working hours, except as expressly provided in this Agreement.

6.5 Within the first 90 days of the employee's start date, the Employer agrees to allow the Guild thirty (30) minutes during the employee's regular working hours to provide new members information about the Guild.

6.6 The Employer agrees to allow leave with pay for employee members of the Guild for no more than twelve (12) work-shifts (96 hours) per year total, for conducting business vital to the Guild. The leave will be scheduled in advance based on vacation scheduling guidelines. Time away from their work assignment to act in the role of Guild

representative shall be coded as “Union Leave” in the Department’s payroll system.

6.7 Employees on the Guild bargaining committee (not Guild leave) who are already scheduled to work during times scheduled for negotiating a new Collective Bargaining Agreement will be allowed to attend those negotiations as employer paid work time. The Employer will not make special provisions to arrange shifts to maximize on duty participation in negotiations.

6.8 Employees designated as Guild representatives will be permitted to use work time for the investigation of grievances and representation of employees with grievances when appropriate.

ARTICLE 7. Strikes, Work Stoppages or Work Slowdowns

7.1 The Employer and the Guild recognize that the public interest requires the efficient and uninterrupted performance of all city services, and to this end pledge their best efforts to avoid or eliminate any conduct contrary to their overall objective. During the term of this Agreement, neither the Guild nor the Employer shall cause, engage in, or sanction any work stoppage, strike, slowdown, lockout or other interference with City functions. Employees who engage in any of the foregoing actions may be subject to immediate disciplinary action, including discharge, and the Guild may be subject to action in accordance with RCW 41.56.

ARTICLE 8. Identification of Jobs

8.1 "Job" shall be defined as the employee's job title (classification), position number, and pay range assigned by the Employer.

8.2 When work operations involving new or substantially changed requirements are established after the effective date of this Agreement and such requirements are not adequately or specifically described in an existing job, the Employer will describe and establish a new job in an appropriate range subject to the Employer's duty to bargain with the Guild concerning appropriate compensation for the new job, if agreed to be within the bargaining unit.

ARTICLE 9. Job Vacancies/Probationary Period

9.1 All vacancies will be filled in accordance with the established rules and regulations of the Vancouver Civil Service Commission; and all applicable State and Federal laws.

9.2 Employees promoted to the position of Lieutenant or Commander shall serve a twelve (12) month probationary period during which time the Employer may decide to return the employee to the employee's former classification. Demotion during the promotional probationary period is not subject to grievance under this Agreement.

9.3 Employees hired (not promoted) into the position of Commander shall serve a twelve (12) month probationary period during which time the Employer may terminate the employee. Termination or discipline of a probationary employee is not subject to grievance under this Agreement.

9.4 For any time-off an employee takes in excess of thirty (30) consecutive calendar days during the twelve (12) month probationary period for which the employee is unable to be meaningfully evaluated in their position, the Employer may extend the probation period by a time equal to the period lacking meaningful evaluation. Such probationary extension periods will not result in the employee losing scheduled step increases.

ARTICLE 10. Layoff and Recall

10.1 Layoff and recall shall be in accordance with the established rules and regulations of the Vancouver Civil Service Commission, with the following exceptions:

A. In the event of a layoff, employees will be laid off in the order of their seniority. Seniority shall be defined as time in rank.

B. At the time of any layoff, lieutenants and commanders may be given an opportunity to accept a reduction to the next lower rank in lieu of layoff. Such employees shall have bumping rights over the employee in the next lower rank with the least seniority. Seniority shall be defined as time in the rank plus time in any higher rank.

C. Employees laid off or demoted in lieu of layoff shall be placed on a reinstatement list for the rank from which the layoff took place.

D. Employees who accept a reduction in lieu of layoff shall remain on the reinstatement list indefinitely. Laid off employees shall remain on the reinstatement list for a maximum of twenty-four (24) months.

E. Laid off employees who are offered reinstatement shall receive a conditional offer. The offer will be conditioned on the successful completion of the following:

1. A background investigation and polygraph. The investigation and polygraph will be limited to the period of time between the date of layoff and date of proposed reinstatement.
   i. Should the polygraph come back inconclusive, the employee will be given an option for a 2nd polygraph with a different polygraph examiner at the City's expense.
   ii. Should the 2nd polygraph also be inconclusive, the laid off employee's eligibility for reinstatement will end.

2. A medical examination and psychological evaluation.

3. A drug screen.

F. An individual will lose rights to reinstatement and/or be removed from the reinstatement list if they commit an act that would be cause for termination of employment of if they lose their commission as a general authority law enforcement officer.

G. Appointments from the reinstatement list shall be made in the order of length of service in that specific rank. The employee on the reinstatement list who has the most time in rank shall be reinstated first.

1. For employees on the reinstatement list for the position of Lieutenant, "length of service" and "time in rank" shall be defined as time employed as a Lieutenant for the Vancouver Police Department.

2. For employees on the reinstatement list for the position of Commander, "length of service" and "time in rank" shall be defined as time employed as a Commander for the Vancouver Police Department.

ARTICLE 11. Work Week, Hours of Work, Shifts

11.1 *Work Week:*

A. Recognizing that flexibility is required in the scheduling of assignments for command personnel, the normal work week shall be the equivalent of forty (40) hours per week with normal assigned work schedules as follows:

A five (5) day work schedule Monday through Friday beginning between 7:00 a.m. and 9:00 a.m., or

A mutually agreed upon 9/80 schedule, working 80 hours over two work weeks, with eight (8) nine (9) hour days, one (1) eight (8) hour day, and one (1) day off. Employees will work Monday through Friday, beginning between 7:00am and 9:00am, or

A mutually agreed upon four (4) day schedule not to exceed ten (10) hours per day, or

A Night Patrol Lieutenant who shall be scheduled to work, as determined by the Chief or their designee, four (4) days per week, ten (10) hours per day plus a thirty (30) minute unpaid lunch; or the patrol schedule, a 5/4, 5/4, 5/5 (10.5 per day with a thirty (30) minute paid lunch. The normal working hours shall overlap with Graveyard shift for a period of at least two (2) hours.

B. In all cases, the required work hours shall be posted in the position announcement, before the assignment is made.

C. The Police Chief and Assistant Chief(s) retain the management right to:
   a. modify normal work schedules in emergency circumstances;
   b. for job performance related reasons;
   c. for training purposes; or
   d. for short term operational needs.

D. On mutual agreement of the employees involved and the employer, the normal assigned work week and/or hours of work may be adjusted for temporary assignments of up to ninety (90) days when consistent with the operational needs of the department. Assignments of longer than ninety (90) days shall be a mandatory subject of bargaining.

11.2 *Modification of Normal Work Schedules.*

The parties agree to consider modifications to the normal work schedule for employees when there is a demonstrated need. Such changes shall not be precedent setting. If such modified work schedules are approved by the Police Chief or Assistant Chief and the employee, the Guild agrees to allow members of the bargaining unit to work mutually agreed schedules.

11.3 *Shift Exchanges*

A. Each member of the Police Department covered under this Agreement may be allowed to exchange shifts with other members when the change is not detrimental to the best interests of the Police Department as determined by and subject to the approval of the Police Chief or Assistant Chief.

11.4 Wellness

A. On-duty wellness time is administered in accordance with Department policy.

ARTICLE 12. Rates of Pay

12.1 The hourly rate of an employee on a forty (40) hour work week will be the monthly base rate multiplied by twelve months and divided by two thousand eighty (2080) hours. This rate multiplied by eight (8) hours will be the daily base rate; multiplied by forty (40) hours will be the weekly base rate; and multiplied by one hundred seventy-three and three tenths (173.3) hours will be the monthly base rate.

12.2 Rates of pay will be as set forth in Appendix “A” to this Agreement.

Effective January 1, 2026

Salary schedules for Lieutenants and Commanders will be adjusted by seven percent (7%).

Effective January 1, 2027

Salary schedules for Lieutenants and Commanders will be adjusted by three percent (3%).

Effective January 1, 2028

Salary schedules for Lieutenants and Commanders will be adjusted by three percent (3%).

A. **Lieutenant.** The base wage for top step Lieutenant shall be not less than nineteen and seven-tenths percent (19.7%) above top step Sergeant.
   a. The nineteen and seven-tenths percent (19.7%) includes: :
      i. Seventeen percent (17%) differential)
      ii. Two and seven- tenths percent (2.7%) in lieu of holiday pay.
         1. 17+2.7 = 19.7%

B. **Commander.** The base wage for top step Commander shall not be less than 10% above top step Lieutenant.

C. **Education.** Education is provided in Article 22 and removed from the differential.

12.3 The night lieutenant shall receive a shift differential of fifty cents ($.50) per hour for each hour worked. Shift differential premium pay shall be included in vacation pay based on specific shift assignment.

12.4 *Overtime*

A. As executive management level employees, Commanders and Lieutenants are accountable for personal time management. Each employee shall determine when it is appropriate to flex work hours, use accrued PDO or sick leave hours, and/or to request overtime pay or compensatory time off. Requests for overtime pay must be for work related performance of employees' duties or projects assigned by VPD.

B. Each employee is personally responsible for assuring that the employee's personal work hours, overtime hours, compensatory time and paid leave time are accurately documented in the City's time and payroll records.

C. In the event the need for overtime should arise in the police department, the employee working overtime shall be paid at one and one-half times the employee's hourly rate of pay.

D. Employees are eligible for overtime pay for all hours worked beyond forty (40) compensable hours in the established seven (7)

day work week. The established work week is seven consecutive work days beginning at 12:01 a.m. Sunday and ending at midnight on Saturday.

E. Compensatory Time. By mutual agreement of the employer and employee, employees may accrue compensatory time off in lieu of overtime compensation. Compensatory time off shall be accumulated at the same rate as overtime compensation would have otherwise been paid. Employees may not accumulate compensatory time off in excess of ninety (90) hours.

12.5 *Callback Pay*

Callback pay shall be paid at the rate of double the regular rate of pay when the Police Chief or Assistant Chief requires that the employee work under the following circumstances. For the purposes of this section, work includes receiving command notifications.

A. On a day already worked or to be worked: If the employee has completed their regular shift, is on the way home, or at home and is required to work other than an extension at the beginning or end of their shift.

B. On days of rest: If not scheduled before 11:00 p.m. the day before the proposed work, or before the end of the last shift worked before the proposed work, whichever is later.

C. Callback shall be paid for a minimum of one and one half hours, or actual hours worked if the amount of time exceeds one and one half hours, when the employee is required to physically respond to work. The one and one half hours of minimum callback pay begins at the time of the call, text, or email originating the physical callback.

D. Employees who receive a call, text, or email for a substantive, work-related issue, but do not physically respond to work as a result, will be compensated for the cumulative minute-by-minute basis for all calls/texts/emails between shifts at the rate of double the regular rate of pay rounded up to the nearest quarter hour, for a minimum of one hour (1.0 hour). The foregoing shall not apply to de minimis calls/texts/emails, lasting less than five (5) cumulative minutes, calls/texts/emails for emergency call back, or calls/texts/emails for overtime availability. If an employee receives off-duty calls/texts/emails and is then subsequently physically

called back to work as a result of such calls/texts/emails, the employee shall receive compensation beginning from the first calls/texts/email, as set forth in the paragraph above.

12.6 *Court Appearances*

A. Court appearances during off-duty hours of a scheduled day of work will be compensated at the rate of one and one-half times base rate for a minimum payment for three (3) hours.

12.7 *Step Increases*

Step increases will be made effective on the adjusted salary review date of the employee's promotion. For example, if an employee is hired between the first (1st) and the fifteenth (15th) of the month, the pay adjustment would be on the first (1st) day of the current month. If an employee is hired between the sixteenth (16th) and the end of the month, the adjustment would be on the first (1st) day of the following month.

12.8 *Retention Pay*

For the purposes of this article, years of service will be defined as years of continuous service with the Vancouver Police Department.

Years of service	Percentage of base pay
7+ to 10 years of service	2%
10+ to 15 years of service	4%
15+ to 20 years of service	6%
20+ to 25 years of service	8%
25+ years of service	10%

ARTICLE 13. Leave Benefits

13.1 Each employee shall be granted paid days off to be used during the year for vacation, illness, holidays, or personal business time off. Bereavement leave shall be separate and as specified in Section 13.7 of this Article. Paid Days Off (PDO) are accrued in accordance with the following schedule:

PAID DAYS OFF (PDO) ACCRUAL SCHEDULE

During Years of Service	Accrual Rate Per Month (Hours)	Maximum Accrual (Hours)
0 to 1	14.00	336
1+ to 5	19.50	468
5+ to 8	20.50	492
8+ to 12	21.50	516
12+ to 15	22.50	540
15+ to 20	25.50	612
20+	27.50	660

13.2 Employees may begin using accrued PDO hours as soon as they become available in their bank. PDO hours accrued in a pay period cannot be used in the same pay period in which they are earned, i.e. PDO hours accrued in the 1st through the 15th pay period cannot be used until the 16th through the end of the month pay period and so forth.

13.3 Employees must schedule and take at least ten (10) shifts of vacation (PDO's) each calendar year. Upon termination of employment, an employee shall be paid for all earned and accrued paid days off at the employee's rate of pay.

13.4 Eligible employees may sell back up to sixty (60) accrued and unused PDO hours during each calendar year. “Eligible employees” include those

employees who are able to comply with Section 13.3 of this Article **after** selling back PDO hours.

13.5 Upon separation from employment, employees may upon their choosing have all or a portion of their vacation (PDO) and/or compensatory time hours accrued deducted before taxes, and paid into one (1) of the following tax deferred vehicles within the requirements of each particular vehicle:

- Deferred Compensation/457 Account
- Health Savings Account (HSA)

13.6 Employees must notify the Employer as soon as possible in the case of unforeseen illness or emergency and request appropriate leave. Holidays and personal business time off must be approved by the appropriate supervisor as established by department rules. Normally, at least five (5) working days advance notice of the absence will be required unless mutually agreed upon shorter notice is provided. Vacation scheduling shall be in accordance with established departmental rules and regulations.

13.7 *Bereavement Leave*

A maximum of five (5) working days of bereavement leave shall be allowed when there is a death in an employee's immediate family.

Immediate family is defined as spouse, domestic partner, child, mother, father, brother, sister, or step family, aunt, uncle, niece, nephew, mother-in-law, father-in-law, daughter-in-law, son-in-law, brother-in-law, sister-in-law, grandparent, grandchild and grandparent, grandchild of the spouse or member of the employee's immediate household. (It is understood that Bereavement Leave extends to similar members of a domestic partner's family as detailed above, so long as the employee has an active "Declaration of Domestic Partnership" on file with Human Resources prior to the death).

Bereavement leave in excess of five (5) working days may be charged to Paid Days Off (PDO) with the approval of the Chief or Assistant Chief. In addition, the use of a maximum of five (5) PDO's shall be allowed for the bereavement of family members outside the immediate family.

The City reserves the right to require documentation of the death and/or any other time taken related to a death.

If any employee is on an approved leave of absence at the time of a death, they will be eligible for bereavement benefits if they are receiving at least fifty percent (50%) of their normal semi-monthly base pay from the City. Otherwise, the employee is not eligible for bereavement leave benefits.

Any observed holiday occurring during bereavement leave shall be paid as a holiday consistent with Articles 13 and 15 of this Collective Bargaining Agreement.

13.8 *Washington Paid Family Medical Leave (PFML)*

Guild members will pay the employee portion of the premium and the City will pay the employer portion of the premium, as established by State law. PFML runs concurrently with FMLA.

ARTICLE 14. Sick Leave

14.1 *Sick Leave Accrual (Short-term Disability)*

A. Employees shall accrue ten (10) hours per month in a short-term disability leave account to a maximum accumulation of one thousand twenty-four (1024) hours. Use of this leave is available, as soon as the hours are earned in said bank. Sick leave hours accrued in a pay period cannot be used in the same period in which they are earned, i.e., sick hours accrued in the 1st through the 15th pay period cannot be used until the 16th through the end of the month pay period and so forth for illness or injury. Employees that have established prior eligibility under the LEOFF Act shall be covered by disability benefits provided by the LEOFF system.

14.2 *LEOFF II Time Loss Guarantee*

A. Duty Related Injury Leave

1. In lieu of the statutory supplement described in RCW 41.04.500 et seq., the City will supplement the time loss payments received by employees who have suffered on-the-job injuries as follows:
   a. The City will provide its supplement by paying the employee's base salary during a period of time loss. The City's supplement will begin on the first date an employee is entitled to time loss benefits under RCW, Title 51 and shall continue as long as the employee is

receiving benefits under RCW, Title 51, up to a maximum of six (6) months from the first date of time loss.

b. The six (6) month period that the City provides the LEOFF Supplement shall begin on the first day the employees receive the LEOFF Supplement, which may or may not coincide with the payment of time loss.

c. The three-day waiting period is defined as the first three days after an employee's date of injury, not including the date of injury.

    (i) If an employee sees a medical provider during the statutory three-day waiting period after the date of injury, is determined to not be able to work as a result of their injury, and would not ordinarily be entitled to time loss during this period under L&I guidelines and/or RCW Title 51, then the employee will receive the LEOFF Supplement for hours missed on their date of injury and the three-day waiting period at their normal base rate.

    (ii) If time loss is paid pursuant to L&I guidelines and/or RCW Title 51 for the three-day waiting period after the date of injury, then the employee will receive the combination of time loss and the LEOFF Supplement for those days. The LEOFF Supplement will be paid for hours missed on the date of injury.

    (iii) If an employee does not seek medical treatment until after the three-day waiting period, then any time missed from work on the date of injury and those first three days will be coded using their accrued sick leave.

d. Employees receiving City's time loss supplement must, within ten (10) business days of receipt, sign over to the City all time loss payment checks provided by the City's insurance administrator and/or the State.

e. Should the 6- months LEOFF supplement period end mid pay period, the employee will keep the entire time loss payment check and the City will deduct the difference in the final LEOFF supplement period time loss check amount from the employee's city payroll.

2. After this first six (6) month period, the supplement, up to their normal monthly salary, will be paid from the employee's available leave accruals.

3. Employee benefits including health and STD and PDO accruals will continue for the duration of the employee's employment.

B. Work-related disability shall be defined as:

(1) That which is eligible for payment of benefits under the state's Workers' Compensation program, excluding any disability which occurs during, and as a result of participation in, the basic police academy training program.

(2) That which is incurred while off duty, in response to a situation where such response is in accordance with departmental policy.

C. Employees disabled may be required to perform light duty work as assigned by the employer as provided under Worker's Compensation.

D. The parties expressly agree that the benefits provided by this article exceed the benefits under RCW 41.04.500 et seq.

E. In the event the Washington State legislature modifies the provisions of the LEOFF Act for LEOFF-II employees, this section shall be reopened for negotiations upon the request of either party.

14.3 **Sick Leave Pay Out Upon Death**. If the employee dies while employed by the City of Vancouver, the City will pay the beneficiary an amount equal to one hundred percent (100%) of the value of the employee's existing sick leave accrual balance up to a maximum of one thousand twenty-four (1024) hours.

14.4 **Sick Leave Sell Back Upon Retirement**. An employee separated from service due to retirement for disability or length of service

retirement shall have their sick leave cashed out and deposited into the employee's HRA/VEBA account, with no employee election to receive the amount in cash, according to the following tiers:

- At the rate of twenty-five percent (25%) for hours 1 through 400;
- At the rate of thirty-five percent (35%) for hours 401 through 800; and
- At the rate of forty-five percent (45%) for the hours of 801 through 1,024.

For example: an employee with 900 hours of sick leave at retirement would receive an amount deposited into the employee's HRA/VEBA account, consisting of a 25% cash out of 400 hours (100 hours), plus a 35% cash out of 400 hours (140), plus a 45% cash out of 100 hours (45 hours), for a total of 285 sick leave hours.

ARTICLE 15. Holidays

15.1 The following days are recognized as "legal" holidays, for which time off is to be granted as provided for in Article 13 of this Agreement:

New Year's Day - January 1st
Martin Luther King Jr. Day - Third Monday in January
President's Day - Third Monday in February
Memorial Day - Last Monday in May
Juneteenth – June 19th
Independence Day - July 4th
Labor Day - First Monday in September
Thanksgiving Day - Fourth Thursday in November
The day immediately following Thanksgiving Day
Christmas Day - December 25th

15.2 *In Lieu of Holiday Pay - History*

When the paid days off (PDO) concept was introduced, it eliminated the obligation of the Employer to pay overtime for holidays worked. Two and four-tenths percent (2.4%) of the base rate was added to all classifications as compensation for an "in lieu of pay for holiday time."

A. Effective January 1, 2000, the parties agreed to eliminate the two and four-tenths percent (2.4%) in lieu of pay and added it to the differential component, as outlined in Article 12.2(A)(a)(iii) to this Agreement.

B. Effective January 1, 2023, the parties agreed to include Juneteenth as a recognized “legal” holiday, and increased the differential component of “in lieu of pay for holiday time” to two and seven-tenths percent (2.7%).

ARTICLE 16. Employee Insurance

16.1 **Life Insurance.** Each employee shall receive a term life insurance policy in the amount of one times (1X’s) their annual salary, rounded to the nearest thousand dollars ($1000.00), double indemnity, which premium will be paid by the Employer.

16.2 **Health Insurance.**
Effective November 10, 2025, VCG moves to the 2026 Plan Design and amounts as part of this agreement and as set forth below.

A. Employees and their eligible dependents will have the option of selecting any combination of medical and dental coverage from the following:

a. **Medical**

i. **Option #1** Kaiser Traditional HMO

ii. **Option #2** Kaiser High-Deductible HMO

iii. **Option #3** Regence Traditional PPO

iv. **Option #4** Regence PPO High-Deductible

b. **Dental**

i. Option #1 Delta Dental

ii. Option #2 Willamette Dental

iii. Option #3 Kaiser Dental HMO

c. **Vision**

i. Option # 1 VSP Vision (for Regence Plans)

ii. Option # 2 Included in Kaiser Medical Plans

B. **Consumer Driven Health Plans (CDHP).**

a. CDHP's will include a Health Savings Account (HSA).

i. The City will make an annual contribution in January to the Employee's HSA in the following amounts:

1. Employee-only coverage –Sixteen hundred dollars ($1,600)
2. Employee plus one (1) or more dependents – Three thousand-two-hundred dollars ($3,200)

b. Employees may also contribute pre-tax dollars to their HSA up to the limits allowed by law.

In addition, members have an opt-out/cash-back option for eligible employees upon certification of other group coverage.

C. **Premiums.** Each employee with dependents will pay ten percent (10%) of the actual medical insurance premium cost for the employee's dependents per month on a pre-tax basis.

D. **Flexible Spending Account (FSA).**

a. For employees enrolled in a non-CDHP plan: Employees will have the option of participating in an FSA for reimbursable medical costs, dependent care costs, or premium sharing costs.

b. For employees enrolled in a CDHP plan: Employees will have the option of participating in an FSA for dependent care costs.

16.3 Employer has the right to select insurance carrier(s), provided, however, that at least two medical plans will be offered and that the aggregate schedule of benefits currently enjoyed will not be substantially changed.

16.4 The Employer shall provide liability insurance (or self-insurance) for Guild employees. Such insurance shall defend and indemnify employees against allegations arising from all acts or omissions occurring within the scope of the duties and responsibilities of the employee's employment. Such insurance or self-insurance shall also cover all costs, including attorney's fees, connected with proposed or threatened suits and negotiated settlements, provided that the City need not indemnify or defend the employee for any act found by the Department to be dishonest, fraudulent, criminal or malicious, or for any suit brought against the employee by or on behalf of the City.

16.5 **HRA/VEBA.** The City will administer a qualified HRA/VEBA account for each employee. In the event of a change, the City agrees to bargain the

impacts of the selected VEBA program/vendor prior to implementation of the change. Effective January 1, 2026, the City will deposit an amount equivalent to three quarters percent (0.75%) of the employee's base salary per month to each employee's HRA/VEBA account. Effective January 1, 2027, the City will deposit an amount equivalent to an additional one-quarter percent (0.25%) of base salary for a total of one percent (1.0 %) of the employee's base salary per month to each employee's HRA/VEBA account. Effective January 1, 2028, the City will deposit an additional amount equivalent to one-half percent (0.5%) for a total of one and one half percent (1.5%) of the employee's base salary per month to each employee's HRA/VEBA account. The employee's HRA/VEBA account is owned by the employee, portable after separation, and usable both while actively employed and in retirement.

ARTICLE 17. Medical Examinations

17.1 The Employer has the right to require periodic medical examinations (physical and psychological) of all employees covered by this Agreement provided the examination is job related and consistent with business necessity. The Employer also has the right to require certification from a physician that an employee is physically and mentally able to return to work following a period of disability leave.

ARTICLE 18. Deferred Compensation

18.1 Employees may participate, at their option and cost, in the deferred compensation programs identified by the City (with at least two programs offered). In the event of a change, the City agrees to bargain the impacts of the selected program/vendors prior to implementation of the change. e.

18.2 Effective January 1, 2026, the City will match, up to a maximum of three and one half percent (3.5%) of the employee's base salary, an employee's contribution to the deferred compensation program(s) offered by the City, such contribution subject to the Internal Revenue Service (IRS) limitations.

ARTICLE 19. Tuition Assistance

19.1 Requests for tuition assistance to attend specialized individual training or academic training shall be processed in accordance with City policy.

ARTICLE 20. Clothing Allowance

20.1 The Employer shall purchase and replace such clothing, uniforms, and other equipment as designated by the Chief of Police or Assistant Chief, and shall make all necessary uniform replacement as the need arises. Employees shall be paid an annual allowance for clothing purchases of six hundred dollars ($600.00).

A. For employees newly hired (not promoted) mid-year, they will receive a pro-rated amount based upon their month of hire.

a. e.g. newly hired in July = six (6) months of service equates to a three hundred dollar ($300.00) payment ($600.00/12 = $50.00 per month -- $50.00 x 6 months = $300.00)

B. For employees promoted into the Guild mid-year, they will receive any difference in allowance between the Union and the Guild.

a. e.g. If the Guild has a five hundred fifty dollars ($550.00) allowance, the promoted employee will receive fifty dollars ($50.00) – ($600.00-$550.00 = $50.00)

20.2 Employees agree to maintain all clothing and equipment in good condition and not subject it to abuse beyond the regular call of duty.

20.3 The Employer shall provide for each employee a standard service side arm and a standard set of handcuffs which the employee will maintain and return to the Employer upon the termination of the employee's service. The Employer shall determine the standard service side arm and handcuffs to be provided. If the employee chooses to carry other than the issued sidearm, the employee will return the issued sidearm when authorized to carry an alternative sidearm.

20.4 The City will repair or replace eye glasses and/ or authorized personal items damaged or destroyed beyond normal wear and tear while on duty. The employee shall assist the Employer in securing restitution or indemnification through the courts by the Employer. It is not the intent of this Article to compensate for an employee's negligence and/or carelessness.

ARTICLE 21. Annexation

21.1 It is understood and agreed that in the event of an annexation to the City of Vancouver requiring a transition period, the City may subcontract police services providing such activity does not result in the layoff of bargaining unit employees or a reduction of employees or positions within the bargaining unit. This transition period shall be for a reasonable period in order to permit the orderly and safe transition of police services to the annexed area.

21.2 It is further agreed that should the City hire Law Enforcement Officers laid off from another jurisdiction which is enveloped in the annexation, such Law Enforcement Officers shall have their length of service in the other jurisdiction applied toward their seniority with the City for lay off purposes, provided they are laid off by inverse seniority as contemplated by RCW 35.13.360-400 (1993 c 189 sections 2-6).

ARTICLE 22. Educational Incentives

22.1 General Eligibility

Current active employees holding the rank of Lieutenant and Commander may participate, if eligible, in the incentive program as described in the following sections of this Article. Benefits payable under the incentive program cease when an employee terminates, retires, or is on an extended leave of absence without pay for more than thirty (30) consecutive calendar days. Such benefits shall cease effective on the date of termination or retirement; or, in the case of extended leave of absence without pay, on the thirty-first day of absence. Pay will be reinstituted effective on the first day of the month next following the employee's return to work.

A. To receive the second year award of 2.5% of base pay/month, the employee must:

(1) Have an associate degree from an accredited college or university in an eligible course of study; or

(2) Have completed 92 quarter hours or 54 semester hours and be currently enrolled in a bachelor's degree program at an accredited college or university in an eligible course of study.

To maintain eligibility for a second year award, an employee enrolled in a bachelor's degree program must furnish to the police chief and human resources director a copy of the official grade report at the end of each quarter or semester and must keep them apprised, in writing, of any circumstances which affect eligibility for educational incentive.

If the employer directs the employee to a work or training assignment that requires the employee to temporarily withdraw from school, payments shall continue under the educational incentive program during such assignment, provided the employee must re-enroll in school at the beginning of the quarter following termination of such assignment. If re-enrollment does not occur, benefits paid beyond the date such assignment ended shall be repaid to the city by the employee.

B. To receive the fourth year award of 5% of base pay/month the employee must:

(1) Have a bachelor's degree from an accredited college or university in an eligible course of study.

(2) It is the employee's responsibility to assure that timely documentation of educational attainment is provided to the Office of the Chief in the form of an official college transcript or degree or both. Payment of incentive awards will begin effective the first day of the payroll period following the date such documentation is provided.

C. Only courses taken through schools accredited by or through the Council for Higher Education Accreditation (CHEA) will be accepted in determining eligibility for educational incentive.

D. The employee's degree must be job-related or contribute to improved performance.

E. Questions arising out of the administration of this program will be resolved by a committee consisting of the police chief and human resources director; however, this will not

prevent an employee from seeking redress through the grievance procedure.

The parties agree that all employees employed in the position of Lieutenant or Commander on January 1, 2026, have met the requirements described above and shall receive the 5% of base pay/month.

ARTICLE 23. Resolution of Disputes

23.1 For purposes of this Agreement, the term “grievance” means any dispute between the Employer, on the one hand, and the Guild or an employee on the other, concerning the interpretation, application or alleged violation of any term of this Agreement. For purposes of this Article, the term “employee” shall include both members of the bargaining unit and the Guild. The parties agree to make every effort to settle grievances at the earliest step possible.

23.2 *Grievance Procedure*

Grievances shall be processed in accordance with the following procedure:

Grievances shall be presented in writing by the employee to their first level supervisor outside of the bargaining unit within twenty-one (21) calendar days of the date of the alleged violation of the Agreement.

The written grievance shall include the following information:

A. A description of the grievance and how the employee(s) was/were adversely affected.

B. A statement of the section(s) of the Agreement allegedly violated and the nature of the violation.

C. The date of the incident(s) grieved.

D. A description of the remedy sought by the employee(s).

E. Identify the employees affected.

F. Specification of the step at which the grievance procedure should begin

(a) For a grievance that involves discipline imposed by the Chief, the grievance shall be initiated at Step 2.
(b) For any other grievance, the grievance shall be initiated at Step 1

The written grievance shall be signed by the employee.

Step 1: The parties will use an interest based problem solving process to resolve the issues identified in the grievance. The process will include all individuals necessary and with authority to reach a resolution. Any resolution of the grievance will be in writing and signed by the parties. If the parties agree that they are unable to resolve the grievance, the parties will outline the areas of disagreement in a memorandum. The employee may advance the grievance to the next step by delivering the memorandum to the Office of the Chief at any time within twenty-one (21) calendar days of filing the grievance. If the grievance is not resolved in twenty-one (21) calendar days, the grievance will automatically advance to Step 2.

Step 2: If the grievance remains unresolved following step 1, the Chief of Police may meet with the employee and their Guild Representative. The Chief shall make a decision on the grievance, in writing, within twenty-one (21) calendar days of receipt of the grievance.

Copies of the Chief's decision shall be mailed, emailed or delivered to the employee and to the Guild.

If the grievance involves a termination of employment, the employee may advance the grievance to Step 3. For all other grievances, the grievance may be advanced to Step 4.

Step 3: If the grievance remains unresolved after the Chief's decision is rendered in Step 2, the employee may deliver the grievance in writing to the City Manager or their designated representative, with a copy to the Chief, within fourteen (14) calendar days after receipt of the decision reached by the Chief in Step 2. The City Manager or their designee may meet with the employee and Guild representative, the Chief of Police, and other directly involved individuals as determined by the City Manager or designee to be appropriate. The City Manager or their designee shall render their decision, in writing, within sixty (60) calendar days of receipt of the grievance. The City Manager or their designee shall mail, email or deliver copies of their decision to the employee, the Guild, and the Chief of Police.

Step 4: If the grievance remains unresolved after the decision is rendered in Step 2 or Step 3, as applicable, the Guild shall decide whether the final Step in the grievance procedure will be arbitration or civil service appeal. The Guild will provide the City with a written notice electing a final step within fourteen (14) calendar days after the mailing, emailing or hand delivery of the decision.

23.3 Unless otherwise agreed by the parties, challenges to the procedural arbitrability of a grievance will be resolved in a proceeding separate from and prior to arbitration on the merits of the grievance. Within fourteen (14) calendar days following receipt of an Arbitrator's decision ruling that a challenged grievance is subject to arbitration, the parties will begin the process described below to select an arbitrator to rule on the merits of the grievance.

23.4 If the grievance is submitted to arbitration, the parties shall attempt to mutually agree on a disinterested third party to serve as Arbitrator. In the event the Employer and the Guild are unable to agree on an Arbitrator; the Arbitrator shall be selected by the process of elimination from a panel of seven (7) arbitrators furnished by the Public Employment Relations Commission (PERC) or the Federal Mediation and Conciliation Service (FMCS). The request to PERC or FMCS shall state the general nature of the issues raised by the grievance and ask that the nominees be qualified. The parties shall promptly strike from the list received. The first strike shall be determined by the toss of a coin. The decision whether to use PERC or FCMS will be by mutual agreement or determined by a toss of the coin.

23.5 The Arbitrator shall consider and decide only the specific issue(s) submitted by the Employer and/or the Guild at the hearing, and shall have no authority to make a decision on any other issue not so submitted. The Arbitrator shall have jurisdiction and authority only to interpret, apply or determine compliance with the specific terms of the Agreement and shall not have jurisdiction to add to, detract from, or alter in any way, the provisions of this Agreement. A decision within the jurisdiction of the Arbitrator shall be final and binding upon all parties. The expenses and fees incumbent to the services of the arbitrator shall be paid by the losing party. Each party shall be responsible for compensating its own representatives and witnesses. Either party may cause a verbatim recording of the hearing to be made, provided it pays the cost of the record. If the other party desires a copy, the cost of the recording and preparation of a transcript shall be shared equally.

23.6 A grievance that involves or affects a significant number of the employees in the bargaining unit may be introduced by the Guild in written form to the Chief of Police as set forth in Step 2 of the grievance procedure.

23.7 Failure by the grievant(s), or a Guild Representative, to advance the grievance within time limits stipulated in this Article shall constitute abandonment of the grievance. The parties may mutually agree in writing to extend the time limit for a given Step for a stated period of time. Failure by the Employer to reply in a timely manner constitutes a denial of the grievance, unless both parties have agreed to an extension of the time line.

ARTICLE 24. Employee Discipline/Termination

24.1 It is hereby recognized and agreed that the Employer has the right to discipline an employee for reasonable and just cause.

24.2 The Employer may use a written warning in lieu of disciplinary action to advise the employee of inappropriate conduct, or of violation of rules. Written warnings shall be placed in the employee's personnel file for a period not to exceed twelve (12) months. An employee may request that the warning letter be reviewed by the Chief of Police after six (6) months for possible removal at that time.

24.3 The Employer may take disciplinary action by written reprimand, suspension, demotion, or discharge. Employees shall be given an opportunity to review and comment upon all disciplinary letters that are placed in their personnel files. The employee shall be requested to sign the disciplinary letter. The signature thereon shall not be construed as admission of guilt or concurrence with the disciplinary action, but rather as an indication that the employee has seen and comprehends the nature of the disciplinary action.

24.4 Copies of all letters of warning or disciplinary action shall be given to the employee at the time the action is taken or shortly thereafter, and notice of such action shall be forwarded to the Guild.

24.5 An employee suspended without pay may request to forfeit accrued paid days off on a day for a day basis, in lieu of unpaid time off. Substitution of PDO for unpaid time in no way reduces the level of discipline from a suspension.

ARTICLE 25. Non-Reduction of Wages and Working Conditions

25.1 The parties hereto agree that the wages and working conditions in effect and now being paid to and enjoyed by the members of the Guild shall be those ratified by both parties signatory to this Agreement and shall not be reduced in view of the provisions of this Agreement. Nothing in this Article shall be construed to limit in any way the Employer's rights under Article 3 - Rights of Management of this Agreement.

25.2 The Employer and the Guild agree that past practices that are mandatory subjects of bargaining and are not specified by this Agreement but known by both the Guild and the Employer shall remain unchanged, unless bargained to completion consistent with RCW 41.56.

ARTICLE 26. Conflict of Contract and Personnel Policies

26.1 It is agreed that the intent of the parties is that this Agreement and all working agreements shall be consistent with the personnel policies. Where it is found that the provisions of such an agreement are in conflict with the personnel policies, the provisions of this Agreement shall apply.

ARTICLE 27. Separability

27.1 If any article of this Agreement should be held invalid by operation of law or by any tribunal of competent jurisdiction or if compliance with or enforcement of any article should be restrained by such tribunal, the remainder of this Agreement shall not be affected thereby and the parties shall enter into immediate collective bargaining negotiations for the purpose of arriving at a mutually satisfactory replacement for such article.

ARTICLE 28. Fair Labor Standards Act

28.1 In the event of changes in the application of the Fair Labor Standards Act to State and local governments or in the Federal Government implementing regulations which impact upon the provisions of this Agreement or the application thereof, the parties agree that such provisions are immediately subject to renegotiation upon the request of either party to this Agreement.

ARTICLE 29. Termination and Renewal

29.1 This agreement is effective January 1, 2026, and shall remain in full force and effect through December 31, 2028.

29.2 Pursuant to the provisions of RCW, Chapter 41.56, the employer and the Guild agree to commence negotiations not later than May 1 of the expiration year.

ARTICLE 30. Contract Amendments

30.1 The parties agree that this Agreement may be amended in writing as agreed to by both parties without action of their respective legislative bodies, unless otherwise specified herein, including, but not limited to, amendment by Memorandum of Understanding or Memorandum of Agreement.

VANCOUVER COMMAND GUILD

AGREEMENT

This Agreement, as of the date indicated herein, by and between the City of Vancouver, a municipal corporation of the State of Washington, and hereinafter referred to as the "Employer," and the Vancouver Command Guild, hereinafter referred to as the "Guild," WITNESS that WHEREAS the parties have negotiated the terms and conditions of a collective bargaining agreement, hereinafter referred to as the agreement, relating to permanent, full-time Police Lieutenants and Police Commanders, hereinafter referred to as employees, represented by the Guild and described in this agreement, as to wages, hours, and other terms and conditions of employment of such employees and wish to reduce the agreement to writing, agree hereto as follows:

ARTICLE 1. Guild Recognition

1.1 The Employer recognizes the Guild as the exclusive bargaining agent for all of its employees covered by this Agreement.

1.2 The Employer and the Guild agree that questions of Guild representation that may arise shall be resolved in accordance with the rules of the Washington State Public Employment Relations Commission and in accordance with local, state, or national statutes and rules.

ARTICLE 2. Nondiscrimination

2.1 The parties agree that the provisions of this Agreement shall be applied equally to all employees covered hereby without regard to race, color, national origin, sex, age, physical or mental disability, political or religious opinions, labor organization affiliation, sexual orientation, gender identity, pregnancy, marital status, military status, or membership in any other class protected by state or federal law or City ordinance, unless such would prohibit performance of a qualifications standard that is job related and consistent with business necessity or necessary to prevent a direct threat to health and safety.

2.2 All references to members or employees in this Agreement designate both sexes; wherever the male gender is used it shall be construed to include both male and female members or employees as appropriate.

2.3 Employees shall process discrimination, retaliation, and/or bullying complaints ~~grievances~~ under the applicable City~~'s~~ Equal Employment Opportunity or HR/Department policy and procedure or under existing

state or federal law, and shall not have recourse through the grievance procedures established in Article 23 of this Agreement.

ARTICLE 3. Rights of Management

3.1 The management of the municipal corporation, including but not limited to, the organization, scheduling, staffing, and direction of the work force, is vested exclusively in the Employer, subject to the terms of this Agreement.

Examples of management rights include, but are not limited to:

~~1.1.~~ 3.1.1 to determine the number of employees to be employed;
~~1.2.~~ 3.1.2 to hire employees, determine their qualifications and assign and direct their work;
~~1.3.~~ 3.1.3 to evaluate employee performances;
~~1.4.~~ 3.1.4 to set the standards of productivity, and the services to be provided;
~~1.5.~~ 3.1.5 to control and regulate the use of facilities, equipment, and other property of the Employer;
~~1.6.~~ 3.1.6 to determine the number, location and operation of departments, divisions, and all other units of the Employer.

The Employer has the right to introduce any and all new improved and automated methods or equipment to improve efficiency and to reduce costs and assign employees within the bargaining unit in accordance with such improvements and cost reduction methods. All matters not specifically and expressly covered or treated by the language of this Agreement may be administered for its duration by the Employer in accordance with such policies or procedures as the Employer, from time to time, may determine. This Article recognizes an employee's right to use the grievance procedure set forth in Article 23 of this Agreement.

Nothing in this Article shall be considered a waiver of the Guild's right to bargain over mandatory subjects of bargaining pursuant to RCW 41.56.

3.2 *Department Rules and Regulations*

It is mutually agreed that the City has full responsibility and authority to adopt rules and regulations for the operation of the Police Department and the conduct of its employees, and the Guild agrees that its members shall comply in full with such rules and regulations. Nothing in this Section shall be interpreted to restrict the Chief's right to make decisions or to establish procedures consistent with the "emergency" nature of operating the department.

ARTICLE 4. Employee Rights

4.1 The Employer recognizes and agrees that employees of the Police Department covered by this Agreement are entitled to all rights and privileges accorded ordinary citizens under all applicable provisions of the United States and State Constitutions as well as the rights and privileges granted by any and all applicable legislation and the common law.

ARTICLE 5. Union Security, Dues and Other Associated Dues

5.1 The parties agree that the terms of this Agreement apply equally to all employees in the bargaining unit and as defined in the Preamble to this Agreement. Any bargaining unit employee may authorize the Employer to deduct from their pay the amount of Guild membership dues charged by the Guild for representation and services provided by the Guild by providing notice to the Guild.

Any bargaining unit employee who does not want to be a member of the Guild, but who nonetheless wants to pay for services provided by the Guild has the voluntary option to pay fair share fees in an amount equal to membership dues. Any member of the bargaining unit may authorize the Employer to deduct from their pay voluntarily fair share fees in an amount equal to Guild dues charged by the Guild by providing notice to the Guild.

The employee's authorization will remain in effect until expressly revoked by the employee by notice to the Guild in accordance with the terms and conditions of the authorization. The Employer will rely on information provided by the Guild regarding the authorization and revocation of deductions.

5.2 Upon receipt of an employee request for authorization or revocation of authorization, the Employer shall notify the Guild as soon as possible via email, but no more than five (5) working days of the notification. The Employer will take no action upon receiving an employee request until receiving confirmation from the Union to begin or end deductions.

5.3 The Employer agrees to notify the Guild president when a represented position is filled within thirty days from the date of employment.

5.4 The Guild, upon completion of the employee orientation, shall provide the Employer notification as to whether such employees authorized dues deduction, fair share fees, or declined to pay dues. The Employer will

deduct such dues/voluntary fair share fees from the wages of those employees and forward them to the Guild each month.

5.5 The Guild shall indemnify, defend and hold harmless the Employer and its officials, representatives and agents against any and all claims, demands, suits, or other forms of liability (monetary or otherwise) and for all reasonable legal costs that shall arise out of or by reason of action taken or not taken in good faith by the Employer in complying with the provisions of this Article. If an improper deduction is made, the Guild shall refund directly to the employee any such amount.

ARTICLE 6. Guild Representatives and Activities

6.1 The Guild shall inform the Employer in writing of the names of its current executive board members and attorneys who are designated to represent it. This information shall be kept up-to-date at all times. Only persons so designated will be accepted by the Employer as representatives of the Guild during the grievance process and on bargaining issues. The Guild may designate other members as representatives during contract negotiations.

6.2 The Guild's officers and attorneys shall have reasonable access to the Department during working hours, providing they do not interfere with or cause employees to neglect their work.

6.3 Employees and attorneys visiting the premises shall not engage in organizing or campaigning for the Guild, but this paragraph will not prevent the Guild from discussing in non-work areas during non-work periods matters of Guild membership, fees, dues, or Guild business with employees covered by this Agreement.

6.4 The Employer agrees not to discriminate against any member of the Guild because of their activity on behalf of or their membership in the Guild, provided such activity is not carried on during working hours, except as expressly provided in this Agreement.

6.5 Within the first 90 days of the employee's start date, the Employer agrees to allow the Guild thirty (30) minutes during the employee's regular working hours to provide new members information about the Guild.

6.6 The Employer agrees to allow leave with pay for employee members of the Guild for no more than twelve (12) work-shifts (96 hours) per year total, for conducting business vital to the Guild. The leave will be

scheduled in advance based on vacation scheduling guidelines. Time away from their work assignment to act in the role of Guild representative shall be coded as “Union Leave” in the Department’s payroll system.

6.7 Employees on the Guild bargaining committee (not Guild leave) who are already scheduled to work during times scheduled for negotiating a new Collective Bargaining Agreement will be allowed to attend those negotiations as employer paid work time. The Employer will not make special provisions to arrange shifts to maximize on duty participation in negotiations.

6.8 Employees designated as Guild representatives will be permitted to use work time for the investigation of grievances and representation of employees with grievances when appropriate.

ARTICLE 7. Strikes, Work Stoppages or Work Slowdowns

7.1 The Employer and the Guild recognize that the public interest requires the efficient and uninterrupted performance of all city services, and to this end pledge their best efforts to avoid or eliminate any conduct contrary to their overall objective. During the term of this Agreement, neither the Guild nor the Employer shall cause, engage in, or sanction any work stoppage, strike, slowdown, lockout or other interference with City functions. Employees who engage in any of the foregoing actions may be subject to immediate disciplinary action, including discharge, and the Guild may be subject to action in accordance with RCW 41.56.

ARTICLE 8. Identification of Jobs

8.1 "Job" shall be defined as the employee's job title (classification), position number, and pay range assigned by the Employer.

8.2 When work operations involving new or substantially changed requirements are established after the effective date of this Agreement and such requirements are not adequately or specifically described in an existing job, the Employer will describe and establish a new job in an appropriate range subject to the Employer's duty to bargain with the Guild concerning appropriate compensation for the new job, if agreed to be within the bargaining unit.

ARTICLE 9. Job Vacancies/Probationary Period

9.1 All vacancies will be filled in accordance with the established rules and regulations of the Vancouver Civil Service Commission ~~as of December 20, 2006~~; and all applicable State and Federal laws.

9.2 Employees promoted to the position of Lieutenant or Commander shall serve a twelve (12) month probationary period during which time the Employer may decide to return the employee to the employee's ~~his or her~~ former classification. Demotion during the promotional probationary period is not subject to grievance under this Agreement.

9.3 Employees hired (not promoted) into the position of Commander shall serve a twelve (12) month probationary period during which time the Employer may terminate the employee. Termination or discipline of a probationary employee is not subject to grievance under this Agreement.

9.4 For any time-off an employee takes in excess of thirty (30) consecutive calendar days during the twelve (12) month probationary period for which the employee is unable to be meaningfully evaluated in their position, the Employer may extend the probation period by a time equal to the period lacking meaningful evaluation. Such probationary extension periods will not result in the employee losing scheduled step increases.

ARTICLE 10. Layoff and Recall

10.1 Layoff and recall shall be in accordance with the established rules and regulations of the Vancouver Civil Service Commission ~~as of December 20, 2006~~, with the following exceptions:

A. In the event of a layoff, employees will be laid off in the order of their seniority. Seniority shall be defined as time in rank.

B. At the time of any layoff, lieutenants and commanders may be given an opportunity to accept a reduction to the next lower rank in lieu of layoff. Such employees shall have bumping rights over the employee in the next lower rank with the least seniority. Seniority shall be defined as time in the rank plus time in any higher rank.

C. Employees laid off or demoted in lieu of layoff shall be placed on a reinstatement list for the rank from which the layoff took place.

D. Employees who accept a reduction in lieu of layoff shall remain on the reinstatement list indefinitely. Laid off employees shall remain on the reinstatement list for a maximum of twenty-four (24) months.

E. Laid off employees who are offered reinstatement shall receive a conditional offer. The offer will be conditioned on the successful completion of the following:

1. A background investigation and polygraph. The investigation and polygraph will be limited to the period of time between the date of layoff and date of proposed reinstatement.
   i. Should the polygraph come back inconclusive, the employee will be given an option for a 2nd polygraph with a different polygraph examiner at the City's expense.
   ii. Should the 2nd polygraph also be inconclusive, the laid off employee's eligibility for reinstatement will end.

2. A medical examination and psychological evaluation.

3. A drug screen.

F. An individual will lose rights to reinstatement and/or be removed from the reinstatement list if they commit an act that would be cause for termination of employment of if they lose their commission as a general authority law enforcement officer.

G. Appointments from the reinstatement list shall be made in the order of length of service in that specific rank. The employee on the reinstatement list who has the most time in rank shall be reinstated first.

1. For employees on the reinstatement list for the position of Lieutenant, "length of service" and "time in rank" shall be defined as time employed as a Lieutenant for the Vancouver Police Department.

2. For employees on the reinstatement list for the position of Commander, "length of service" and "time in rank" shall be defined as time employed as a Commander for the Vancouver Police Department.

ARTICLE 11. Work Week, Hours of Work, Shifts

11.1 *Work Week:*

A. Recognizing that flexibility is required in the scheduling of assignments for command personnel, the normal work week shall be the equivalent of forty (40) hours per week with normal assigned work schedules as follows:

A five (5) day work schedule Monday through Friday beginning between 7:00 a.m. and 9:00 a.m., or

A mutually agreed upon 9/80 schedule, working 80 hours over two work weeks, with eight (8) nine (9) hour days, one (1) eight (8) hour day, and one (1) day off. Employees will work Monday through Friday, beginning between 7:00am and 9:00am, or

A mutually agreed upon four (4) day schedule not to exceed ten (10) hours per day, or

A Night Patrol Lieutenant who shall be scheduled to work, as determined by the Chief or their designee, four (4) days per week, ten (10) hours per day plus a thirty (30) minute unpaid lunch; or the patrol schedule, a 5/4, 5/4, 5/5 (10.5 per day with a thirty (30) minute paid lunch. The normal working hours shall overlap with Graveyard shift for a period of at least two (2) hours.

B. In all cases, the required work hours shall be posted in the position announcement, before the assignment is made.

C. The Police Chief and Assistant Chief(s) retain the management right to:
   a. modify normal work schedules in emergency circumstances;
   b. for job performance related reasons;
   c. for training purposes; or
   d. for short term operational needs.

D. On mutual agreement of the employees involved and the employer, the normal assigned work week and/or hours of work may be adjusted for temporary assignments of up to ninety (90) days when consistent with the operational needs of the department. Assignments of longer than ninety (90) days shall be a mandatory subject of bargaining.

11.2 *Modification of Normal Work Schedules.*

The parties agree to consider modifications to the normal work schedule for employees when there is a demonstrated need. Such changes shall not be precedent setting. If such modified work schedules are approved by the Police Chief or Assistant Chief and the employee, the Guild agrees to allow members of the bargaining unit to work mutually agreed schedules.

11.3 *Shift Exchanges*

A. Each member of the Police Department covered under this Agreement may be allowed to exchange shifts with other members when the change is not detrimental to the best interests of the Police Department as determined by and subject to the approval of the Police Chief or Assistant Chief.

11.4 Wellness

A. On-duty wellness time is administered in accordance with Department policy.

ARTICLE 12. Rates of Pay

12.1 The hourly rate of an employee on a forty (40) hour work week will be the monthly base rate multiplied by twelve months and divided by two thousand eighty (2080) hours. This rate multiplied by eight (8) hours will be the daily base rate; multiplied by forty (40) hours will be the weekly base rate; and multiplied by one hundred seventy-three and three tenths (173.3) hours will be the monthly base rate.

12.2 Rates of pay will be as set forth in Appendix "A" to this Agreement.

Effective January 1, 20263

Salary schedules for Lieutenants and Commanders will be adjusted by seven percent (7%). ~~six percent (6%).~~

Effective January 1, 20274

Salary schedules for Lieutenants and Commanders will be adjusted by three percent (3%). ~~four percent (4%).~~

Effective January 1, 2028~~5~~

Salary schedules for Lieutenants and Commanders will be adjusted by three percent (3%). ~~four percent (4%).~~

A. **Lieutenant.** The base wage for top step Lieutenant shall be not less than ~~22.7%~~ nineteen and seven-tenths percent (19.7%) above top step Sergeant.
   a. The ~~22.7%~~ nineteen and seven-tenths percent (19.7%) includes: ~~comes from the following history~~:
      i. ~~15%~~ Seventeen percent (17.~~5~~%) differential ~~(prior to the elimination of educational incentive and in lieu of holiday pay~~)
      ii. Two and seven- tenths percent (2.7%) in lieu of holiday pay.
         1. 17+2.7 = 19.7%
      iii. ~~5% educational incentive~~
      iv. ~~2.7% in lieu of holiday pay~~
         1. ~~15 + 5 + 2.7 = 22.7%~~

B. **Commander.** The base wage for top step Commander shall not be less than 10% above top step Lieutenant.

C. **Education.** Education is provided in Article 22 and removed from the differential.

Bargaining Note: The additional compression amount is contingent on agreement from VCG with the City's contract interpretation on the pending grievance regarding *Article 12 Section 12.5 Callback Pay* and withdrawal of said grievance.

12.3 The night lieutenant shall receive a shift differential of fifty cents ($.50) per hour for each hour worked. Shift differential premium pay shall be included in vacation pay based on specific shift assignment.

12.4 *Overtime*

A. As executive management level employees, Commanders and Lieutenants are accountable for personal time management. Each employee shall determine when it is appropriate to flex work hours, use accrued PDO or sick leave hours, and/or to request overtime pay or compensatory time off. Requests for overtime pay must be for work related performance of employees' duties or projects assigned by VPD.

B. Each employee is personally responsible for assuring that the employee's ~~his or her~~ personal work hours, overtime hours,

compensatory time and paid leave time are accurately documented in the City's time and payroll records.

C. In the event the need for overtime should arise in the police department, the employee working overtime shall be paid at one and one-half times the employee's ~~his~~ hourly rate of pay.

D. Employees are eligible for overtime pay for all hours worked beyond forty (40) compensable hours in the established seven (7) day work week. The established work week is seven consecutive work days beginning at 12:01 a.m. Sunday and ending at midnight on Saturday.

E. Compensatory Time. By mutual agreement of the employer and employee, employees may accrue compensatory time off in lieu of overtime compensation. Compensatory time off shall be accumulated at the same rate as overtime compensation would have otherwise been paid. Employees may not accumulate compensatory time off in excess of ninety (90) hours.

12.5 *Callback Pay*

Callback pay shall be paid at the rate of double the regular rate of pay when the Police Chief or Assistant Chief requires that the employee work under the following circumstances. For the purposes of this section, work includes receiving command notifications.

A. On a day already worked or to be worked: If the employee has completed their regular shift, is on the way home, or at home and is required to work other than an extension at the beginning or end of their shift.

B. On days of rest: If not scheduled before 11:00 p.m. the day before the proposed work, or before the end of the last shift worked before the proposed work, whichever is later.

C. ~~Callback pay shall be paid at the rate of double the base rate of pay for~~ Callback shall be paid for a minimum of one and one half hours, or actual hours worked if the amount of time exceeds one and one half hours, when the employee is required to physically respond to work. The one and one half hours of minimum callback pay begins at the time of the call, text, or email originating the physical callback.

D. Employees who receive a call, text, or email for a substantive, work-related issue, but do not physically respond to work as a result, will be compensated for the cumulative minute-by-minute basis for all calls/texts/emails between shifts at the rate of double the regular rate of pay rounded up to the nearest quarter hour, for a minimum of one hour (1.0 hour). The foregoing shall not apply to de minimis calls/texts/emails, lasting less than five (5) cumulative minutes, calls/texts/emails for emergency call back, or calls/texts/emails for overtime availability. If an employee receives off-duty calls/texts/emails and is then subsequently physically called back to work as a result of such calls/texts/emails, the employee shall receive compensation beginning from the first calls/texts/email, as set forth in the paragraph above.

12.6 *Court Appearances*

A. Court appearances during off-duty hours of a scheduled day of work will be compensated at the rate of one and one-half times base rate for a minimum payment for three (3) hours.

12.7 *Step Increases*

Step increases will be made effective on the adjusted salary review date of the employee's promotion. For example, if an employee is hired between the first (1st) and the fifteenth (15th) of the month, the pay adjustment would be on the first (1st) day of the current month. If an employee is hired between the sixteenth (16th) and the end of the month, the adjustment would be on the first (1st) day of the following month.

12.8 *Retention Pay*

For the purposes of this article, years of service will be defined as years of continuous service with the Vancouver Police Department.

Years of service	Percentage of base pay
~~Beginning of~~ 7~~+~~ to 10 years of service ~~years to completion of 9 years~~	2%
~~Beginning of~~ 10~~+~~ to 15 years of service ~~to completion of 14 years~~	4%
~~Beginning of~~ 15~~+~~ to 20 years of service ~~to completion of 19 years~~	6%
~~Beginning of~~ 20~~+~~ to 25 years of service ~~years and more~~	8%

25+ years of service 10%

City proposal on external service credit is CCL, meaning no consideration for external service.

ARTICLE 13. Leave Benefits

13.1 Each employee shall be granted paid days off to be used during the year for vacation, illness, holidays, or personal business time off. Bereavement leave shall be separate and as specified in Section 13.7 of this Article. Paid Days Off (PDO) are accrued in accordance with the following schedule:

PAID DAYS OFF (PDO) ACCRUAL SCHEDULE

During Years of Service	Accrual Rate Per Month (Hours)	Maximum Accrual (Hours)
0 to 1	14.00	336
1+ to 5	19.50	468
5+ to 8	20.50	492
8+ to 12	21.50	516
12+ to 15	22.50	540
15+ to 20	25.50	612
20+	27.50	660

13.2 Employees may begin using accrued PDO hours as soon as they become available in their bank. PDO hours accrued in a pay period cannot be used in the same pay period in which they are earned, i.e. PDO hours accrued in the 1st through the 15th pay period cannot be used until the 16th through the end of the month pay period and so forth.

13.3 Employees must schedule and take at least ten (10) shifts of vacation (PDO's) each calendar year. Upon termination of employment, an employee shall be paid for all earned and accrued paid days off at the employee's rate of pay.

13.4 Eligible employees may sell back up to sixty (60) accrued and unused PDO hours during each calendar year. “Eligible employees” include those employees who are able to comply with Section 13.3 of this Article **after** selling back PDO hours.

13.5 Upon separation from employment, employees may upon their choosing have all or a portion of their vacation (PDO) and/or compensatory time hours accrued deducted before taxes, and paid into one (1) of the following tax deferred vehicles within the requirements of each particular vehicle:

- Deferred Compensation/457 Account
- Health Savings Account (HSA)

13.6 Employees must notify the Employer as soon as possible in the case of unforeseen illness or emergency and request appropriate leave. Holidays and personal business time off must be approved by the appropriate supervisor as established by department rules. Normally, at least five (5) working days advance notice of the absence will be required unless mutually agreed upon shorter notice is provided. Vacation scheduling shall be in accordance with established departmental rules and regulations.

13.7 *Bereavement Leave*

A maximum of five (5) working days of bereavement leave shall be allowed when there is a death in an employee's immediate family.

Immediate family is defined as spouse, domestic partner, child, mother, father, brother, sister, or step family, aunt, uncle, niece, nephew, mother-in-law, father-in-law, daughter-in-law, son-in-law, brother-in-law, sister-in-law, grandparent, grandchild and grandparent, grandchild of the spouse or member of the employee’s immediate household. (It is understood that Bereavement Leave extends to similar members of a domestic partner’s family as detailed above, so long as the employee has an active “Declaration of Domestic Partnership” on file with Human Resources prior to the death).

Bereavement leave in excess of five (5) working days may be charged to Paid Days Off (PDO) with the approval of the Chief or Assistant Chief. In addition, the use of a maximum of five (5) PDO's shall be allowed for the bereavement of family members outside the immediate family.

The City reserves the right to require documentation of the death and/or any other time taken related to a death.

If any employee is on an approved leave of absence at the time of a death, they will be eligible for bereavement benefits if they are receiving at least fifty percent (50%) of their normal semi-monthly base pay from the City. Otherwise, the employee is not eligible for bereavement leave benefits.

Any observed holiday occurring during bereavement leave shall be paid as a holiday consistent with Articles 13 and 15 of this Collective Bargaining Agreement.

13.8 Washington Paid Family Medical Leave (PFML)

Guild members will pay the employee portion of the premium and the City will pay the employer portion ~~of~~fe the premium, as established by State law. PFML runs concurrently with FMLA.

ARTICLE 14. Sick Leave

14.1 *Sick Leave Accrual (Short-term Disability)*

A. Employees shall accrue ten (10) hours per month in a short-term disability leave account to a maximum accumulation of one thousand twenty-four (1024) hours. Use of this leave is available, as soon as the hours are earned in said bank. Sick leave hours accrued in a pay period cannot be used in the same period in which they are earned, i.e., sick hours accrued in the 1st through the 15th pay period cannot be used until the 16th through the end of the month pay period and so forth for illness or injury. Employees that have established prior eligibility under the LEOFF Act shall be covered by disability benefits provided by the LEOFF system.

14.2 *LEOFF II Time Loss Guarantee*

A. Duty Related Injury Leave

1. In lieu of the statutory supplement described in RCW 41.04.500 et seq., the City will supplement the time loss payments received by employees who have suffered on-the-job injuries as follows:
   a. The City will provide its supplement by paying the employee's base salary during a period of time loss. The City's supplement will begin on the first date an employee is entitled to time loss benefits under RCW, Title 51 and shall continue as long as the employee is receiving benefits under RCW, Title 51, up to a maximum of six (6) months from the first date of time loss.
   b. The six (6) month period that the City provides the LEOFF Supplement shall begin on the first day the employees receive the LEOFF Supplement, which may or may not coincide with the payment of time loss.
   c. The three-day waiting period is defined as the first three days after an employee's date of injury, not including the date of injury.
      (i) If an employee sees a medical provider during the statutory three-day waiting period after the date of injury, is determined to not be able to work as a result of their injury, and would not ordinarily be entitled to time loss during this period under L&I guidelines and/or RCW Title 51, then the employee will receive the LEOFF Supplement for hours missed on their date of injury and the three-day waiting period at their normal base rate.
      (ii) If time loss is paid pursuant to L&I guidelines and/or RCW Title 51 for the three-day waiting period after the date of injury, then the employee will receive the combination of time loss and the LEOFF Supplement for those days. The LEOFF Supplement will be paid for hours missed on the date of injury.
      (iii) If an employee does not seek medical treatment until after the three-day waiting period, then any time missed from work on the date of injury and those first three days

will be coded using their accrued sick leave.

d. Employees receiving City's time loss supplement must, within ten (10) business days of receipt, sign over to the City all time loss payment checks provided by the City's insurance administrator and/or the State.

e. Should the 6- months LEOFF supplement period end mid pay period, the employee will keep the entire time loss payment check and the City will deduct the difference in the final LEOFF supplement period time loss check amount from the employee's city payroll.

2. After this first six (6) month period, the supplement, up to their normal monthly salary, will be paid from the employee's available leave accruals.

3. Employee benefits including health and STD and PDO accruals will continue for the duration of the employee's employment.

B. Work-related disability shall be defined as:

(1) That which is eligible for payment of benefits under the state's Workers' Compensation program, excluding any disability which occurs during, and as a result of participation in, the basic police academy training program.

(2) That which is incurred while off duty, in response to a situation where such response is in accordance with departmental policy.

C. Employees disabled may be required to perform light duty work as assigned by the employer as provided under Worker's Compensation.

D. The parties expressly agree that the benefits provided by this article exceed the benefits under RCW 41.04.5000 et seq. ~~provided by Chapter 462, Laws of 1985 as allowed in section 11 of the Act.~~

E. In the event the Washington State legislature modifies the provisions of the LEOFF Act for LEOFF-II employees, this section shall be reopened for negotiations upon the request of either party.

14.3 **Sick Leave Pay Out Upon Death**. If the employee dies while employed by the City of Vancouver, the City will pay the beneficiary an amount equal to one hundred percent (100%) of the value of the employee's existing sick leave accrual balance up to a maximum of one thousand twenty-four (1024) hours.

14.4 **Sick Leave Sell Back Upon Retirement**. An employee separated from service due to retirement for disability or length of service retirement shall have their sick leave cashed out and deposited into the employee's HRA/VEBA account, with no employee election to receive the amount in cash, according to the following tiers:

- At the rate of twenty-five percent (25%) for hours 1 through 400;
- At the rate of thirty-five percent (35%) for hours 401 through 800; and
- At the rate of forty-five percent (45%) for the hours of 801 through 1,024.

For example: an employee with 900 hours of sick leave at retirement would receive an amount deposited into the employee's HRA/VEBA account, consisting of a 25% cash out of 400 hours (100 hours), plus a 35% cash out of 400 hours (140), plus a 45% cash out of 100 hours (45 hours), for a total of 285 sick leave hours.

ARTICLE 15. Holidays

15.1 The following days are recognized as "legal" holidays, for which time off is to be granted as provided for in Article 13 of this Agreement:

New Year's Day - January 1st
Martin Luther King Jr. Day - Third Monday in January
President's Day - Third Monday in February
Memorial Day - Last Monday in May
Juneteenth – June 19th
Independence Day - July 4th
Labor Day - First Monday in September
Thanksgiving Day - Fourth Thursday in November
The day immediately following Thanksgiving Day
Christmas Day - December 25th

15.2 *In Lieu of Holiday Pay - History*

When the paid days off (PDO) concept was introduced, it eliminated the obligation of the Employer to pay overtime for holidays worked. Two and four-tenths percent (2.4%) of the base rate was added to all classifications as compensation for an "in lieu of pay for holiday time."

A. Effective January 1, 2000, the parties agreed to eliminate the two and four-tenths percent (2.4%) in lieu of pay and added it to the differential component, as outlined in Article 12.2(A)(a)(iii) to this Agreement.

B. Effective January 1, 2023, the parties agreed to include Juneteenth as a recognized "legal" holiday, and increased the differential component of "in lieu of pay for holiday time" to two and seven-tenths percent (2.7%).

ARTICLE 16. Employee Insurance

16.1 **Life Insurance.** Each employee shall receive a term life insurance policy in the amount of one times (1X's) their annual salary, rounded to the nearest thousand dollars ($1000.00), double indemnity, which premium will be paid by the Employer.

16.2 **Health Insurance.**
Effective November 10, 2025, VCG moves to the 2026 Plan Design and amounts as part of this agreement and as set forth below.

A. Employees and their eligible dependents will have the option of selecting any combination of medical and dental coverage from the following:

~~a. **Medical**~~
~~i. HMO Plan~~
~~ii. HMO Plan – CDHP (Consumer Driven Health Plan)~~
~~iii. PPO Plan~~
~~iv. PPO Plan – CDHP (Consumer Drive Health Plan)~~
~~b. **Dental**~~
~~i. PPO Plan~~
~~ii. HMO Plan~~

a. **Medical**

i. **Option #1** Kaiser Traditional HMO

ii. **Option #2** Kaiser High-Deductible HMO

iii. **Option #3** Regence Traditional PPO

iv. **Option #4** Regence PPO High-Deductible

b. Dental

i. Option #1 Delta Dental

ii. Option #2 Willamette Dental

iii. Option #3 Kaiser Dental HMO

c. Vision

i. Option # 1 VSP Vision (for Regence Plans)

ii. Option # 2 Included in Kaiser Medical Plans

B. **Consumer Driven Health Plans (CDHP).**

a. CDHP's will include a Health Savings Account (HSA).

i. The City will make an annual contribution in January to the Employee's HSA in the following amounts:

1. Employee-only coverage –Sixteen ~~Fifteen~~ hundred dollars ($1,~~5~~600)
2. Employee plus one (1) or more dependents – Three thousand-two-hundred dollars ($3,~~0~~200)

b. Employees may also contribute pre-tax dollars to their HSA up to the limits allowed by law.

In addition, members have an opt-out/cash-back option for eligible employees upon certification of other group coverage.

C. **Premiums.** Each employee with dependents will pay ten percent (10%) of the actual medical insurance premium cost for the employee's dependents per month on a pre-tax basis.

D. **Flexible Spending Account (FSA).**

a. For employees enrolled in a non-CDHP plan: Employees will have the option of participating in an FSA for reimbursable medical costs, dependent care costs, or premium sharing costs.

b. For employees enrolled in a CDHP plan: Employees will have the option of participating in an FSA for dependent care costs.

c. ~~For this contract period, the Employer will pay thirty-five dollars ($35.00) each month into an eligible member's flexible spending account, or deferred compensation account. Employees enrolled in the CDHP plans may direct the thirty-five dollars ($35.00) to a flexible spending dependent care account or a deferred compensation account. Effective January 1, 2024, Article 16 Section16.2(D)(c) is discontinued in exchange for increase to deferred compensation match in Article 18.~~

16.3 Employer has the right to select insurance carrier(s), provided, however, that at least two medical plans will be offered and that the aggregate schedule of benefits currently enjoyed will not be substantially changed.

16.4 The Employer shall provide liability insurance (or self-insurance) for Guild employees. Such insurance shall defend and indemnify employees against allegations arising from all acts or omissions occurring within the scope of the duties and responsibilities of the employee's employment. Such insurance or self-insurance shall also cover all costs, including attorney's fees, connected with proposed or threatened suits and negotiated settlements, provided that the City need not indemnify or defend the employee for any act found by the Department to be dishonest, fraudulent, criminal or malicious, or for any suit brought against the employee by or on behalf of the City.

16.5 HRA/VEBA. The City will administer a qualified HRA/VEBA account for each employee. In the event of a change, the City agrees to bargain the impacts of the selected VEBA program/vendor prior to implementation of the change. Effective January 1, 2026, the City will deposit an amount equivalent to three quarters percent (0.75%) of the employee's base salary per month to each employee's HRA/VEBA account. Effective January 1, 2027, the City will deposit an amount equivalent to an additional one-quarter percent (0.25%) of base salary for a total of one percent (1.0 %) of the employee's base salary per month to each employee's HRA/VEBA account. Effective January 1, 2028, the City will deposit an additional amount equivalent to one-half percent (0.5%) for a total of one and one half percent (1.5%) of the employee's base salary per month to each employee's HRA/VEBA account. The employee's HRA/VEBA account is owned by the employee, portable after separation, and usable both while actively employed and in retirement.

Bargaining Note: This proposal is in conjunction with the medical/benefits settlement and this package for 2025 and 2026 moving forward.

ARTICLE 17. Medical Examinations

17.1 The Employer has the right to require periodic medical examinations (physical and psychological) of all employees covered by this Agreement provided the examination is job related and consistent with business necessity. The Employer also has the right to require certification from a physician that an employee is physically and mentally able to return to work following a period of disability leave.

ARTICLE 18. Deferred Compensation

18.1 Employees may participate, at their option and cost, in the deferred compensation programs identified by the City (with at least two programs offered). In the event of a change, the City agrees to bargain the impacts of the selected program/vendors prior to implementation of the change. ~~provided by either ICMA Retirement Corporation and/or Voya, or any other plans the City may provid~~e.

18.2 ~~The City will match, up to a maximum of one percent (1.0%) of the employee's base salary, an employee's contribution to the deferred compensation program(s) offered by the City, such contributions subject to Internal Revenue Service (IRS) limitations.~~ Effective January 1, 2026~~3~~4, the City will match, up to a maximum of ~~two~~ three and one half percent (2~~3~~.5%) of the employee's base salary, an employee's contribution to the deferred compensation program(s) offered by the City, such contribution subject to the Internal Revenue Service (IRS) limitations.

ARTICLE 19. Tuition Assistance

19.1 Requests for tuition assistance to attend specialized individual training or academic training shall be processed in accordance with City policy.

ARTICLE 20. Clothing Allowance

20.1 The Employer shall purchase and replace such clothing, uniforms, and other equipment as designated by the Chief of Police or Assistant Chief, and shall make all necessary uniform replacement as the need arises. Employees shall be paid an annual allowance for clothing purchases of six hundred dollars ($600.00).

A. For employees newly hired (not promoted) mid-year, they will receive a pro-rated amount based upon their month of hire.

a. e.g. newly hired in July = six (6) months of service equates to a three hundred dollar ($300.00) payment ($600.00/12 = $50.00 per month -- $50.00 x 6 months = $300.00)

B. For employees promoted into the Guild mid-year, they will receive any difference in allowance between the Union and the Guild.

a. e.g. If the Guild has a five hundred fifty dollars ($550.00) allowance, the promoted employee will receive fifty dollars ($50.00) – ($600.00-$550.00 = $50.00)

20.2 Employees agree to maintain all clothing and equipment in good condition and not subject it to abuse beyond the regular call of duty.

20.3 The Employer shall provide for each employee a standard service side arm and a standard set of handcuffs which the employee will maintain and return to the Employer upon the termination of ~~his~~ the employee's service. The Employer shall determine the standard service side arm and handcuffs to be provided. If the employee chooses to carry other than the issued sidearm, the employee will return the issued sidearm when authorized to carry an alternative sidearm.

20.4 The City will repair or replace eye glasses and/ or authorized personal items damaged or destroyed beyond normal wear and tear while on duty. The employee shall assist the Employer in securing restitution or indemnification through the courts by the Employer. It is not the intent of this Article to compensate for an employee's negligence and/or carelessness.

ARTICLE 21. Annexation

21.1 It is understood and agreed that in the event of an annexation to the City of Vancouver requiring a transition period, the City may subcontract police services providing such activity does not result in the layoff of bargaining unit employees or a reduction of employees or positions within the bargaining unit. This transition period shall be for a reasonable period in order to permit the orderly and safe transition of police services to the annexed area.

21.2 It is further agreed that should the City hire Law Enforcement Officers laid off from another jurisdiction which is enveloped in the

annexation, such Law Enforcement Officers shall have their length of service in the other jurisdiction applied toward their seniority with the City for lay off purposes, provided they are laid off by inverse seniority as contemplated by RCW 35.13.360-400 (1993 c 189 sections 2-6).

ARTICLE 22. Educational Incentives ~~- History~~

~~22.1 In the 2000-2002 Agreement, the parties agreed that previously an educational incentive was in the form of a qualification requirement for the ranks of Lieutenant and Commander, but with the new requirement that a Bachelor's degree was required to be a Lieutenant or Commander, the parties eliminated the existing educational incentive program and added the five percent (5%) to the differential component as outlined in Article 12.2(A)(a)(ii) to this Agreement.~~

22.1 General Eligibility

Current active employees holding the rank of Lieutenant and Commander may participate, if eligible, in the incentive program as described in the following sections of this Article. Benefits payable under the incentive program cease when an employee terminates, retires, or is on an extended leave of absence without pay for more than thirty (30) consecutive calendar days. Such benefits shall cease effective on the date of termination or retirement; or, in the case of extended leave of absence without pay, on the thirty-first day of absence. Pay will be reinstituted effective on the first day of the month next following the employee's return to work.

A. To receive the second year award of 2.5% of base pay/month, the employee must:

(1) Have an associate degree from an accredited college or university in an eligible course of study; or

(2) Have completed 92 quarter hours or 54 semester hours and be currently enrolled in a bachelor's degree program at an accredited college or university in an eligible course of study.

To maintain eligibility for a second year award, an employee enrolled in a bachelor's degree program must furnish to the police chief and human resources director a copy of the official grade report at the end of each quarter or semester and must keep them

apprised, in writing, of any circumstances which affect eligibility for educational incentive.

If the employer directs the employee to a work or training assignment that requires the employee to temporarily withdraw from school, payments shall continue under the educational incentive program during such assignment, provided the employee must re-enroll in school at the beginning of the quarter following termination of such assignment. If re-enrollment does not occur, benefits paid beyond the date such assignment ended shall be repaid to the city by the employee.

B. To receive the fourth year award of 5% of base pay/month the employee must:

(1) Have a bachelor's degree from an accredited college or university in an eligible course of study.

(2) It is the employee's responsibility to assure that timely documentation of educational attainment is provided to the Office of the Chief in the form of an official college transcript or degree or both. Payment of incentive awards will begin effective the first day of the payroll period following the date such documentation is provided.

C. Only courses taken through schools accredited by or through the Council for Higher Education Accreditation (CHEA) will be accepted in determining eligibility for educational incentive.

D. The employee's degree must be job-related or contribute to improved performance.

E. Questions arising out of the administration of this program will be resolved by a committee consisting of the police chief and human resources director; however, this will not prevent an employee from seeking redress through the grievance procedure.

The parties agree that all employees employed in the position of Lieutenant or Commander on January 1, 2026, have met the requirements described above and shall receive the 5% of base pay/month.

ARTICLE 23. Resolution of Disputes

23.1 For purposes of this Agreement, the term “grievance” means any dispute between the Employer, on the one hand, and the Guild or an employee on the other, concerning the interpretation, application or alleged violation of any term of this Agreement. For purposes of this Article, the term “employee” shall include both members of the bargaining unit and the Guild. The parties agree to make every effort to settle grievances at the earliest step possible.

23.2 *Grievance Procedure*

Grievances shall be processed in accordance with the following procedure:

Grievances shall be presented in writing by the employee to their first level supervisor outside of the bargaining unit within twenty-one (21) calendar days of the date of the alleged violation of the Agreement.

The written grievance shall include the following information:

A. A description of the grievance and how the employee(s) was/were adversely affected.

B. A statement of the section(s) of the Agreement allegedly violated and the nature of the violation.

C. The date of the incident(s) grieved.

D. A description of the remedy sought by the employee(s).

E. Identify the employees affected.

F. Specification of the step at which the grievance procedure should begin

(a) For a grievance that involves discipline imposed by the Chief, the grievance shall be initiated at Step 2.

(b) For any other grievance, the grievance shall be initiated at Step 1

The written grievance shall be signed by the employee.

Step 1: The parties will use an interest based problem solving process to resolve the issues identified in the grievance. The process will include all individuals necessary and with authority to reach a resolution. Any resolution of the grievance will be in writing and signed by the parties. If the parties agree that they are unable to resolve the grievance, the parties will outline the areas of disagreement in a memorandum. The employee may advance the grievance to the next step by delivering the memorandum to the Office of the Chief at any time within twenty-one (21) calendar days of filing the grievance. If the grievance is not resolved in twenty-one (21) calendar days, the grievance will automatically advance to Step 2.

Step 2: If the grievance remains unresolved following step 1, the Chief of Police may meet with the employee and their Guild Representative. The Chief shall make a decision on the grievance, in writing, within twenty-one (21) calendar days of receipt of the grievance.

Copies of the Chief's decision shall be mailed, emailed or delivered to the employee and to the Guild.

If the grievance involves a termination of employment, the employee may advance the grievance to Step 3. For all other grievances, the grievance may be advanced to Step 4.

Step 3: If the grievance remains unresolved after the Chief's decision is rendered in Step 2, the employee may deliver the grievance in writing to the City Manager or their designated representative, with a copy to the Chief, within fourteen (14) calendar days after receipt of the decision reached by the Chief in Step 2. The City Manager or their designee may meet with the employee and Guild representative, the Chief of Police, and other directly involved individuals as determined by the City Manager or designee to be appropriate. The City Manager or their designee shall render their decision, in writing, within sixty (60) calendar days of receipt of the grievance. The City Manager or their designee shall mail, email or deliver copies of their decision to the employee, the Guild, and the Chief of Police.

Step 4: If the grievance remains unresolved after the decision is rendered in Step 2 or Step 3, as applicable, the Guild shall decide whether the final

Step in the grievance procedure will be arbitration or civil service appeal. The Guild will provide the City with a written notice electing a final step within fourteen (14) calendar days after the mailing, emailing or hand delivery of the decision.

23.3 Unless otherwise agreed by the parties, challenges to the procedural arbitrability of a grievance will be resolved in a proceeding separate from and prior to arbitration on the merits of the grievance. Within fourteen (14) calendar days following receipt of an Arbitrator's decision ruling that a challenged grievance is subject to arbitration, the parties will begin the process described below to select an arbitrator to rule on the merits of the grievance.

23.4 If the grievance is submitted to arbitration, the parties shall attempt to mutually agree on a disinterested third party to serve as Arbitrator. In the event the Employer and the Guild are unable to agree on an Arbitrator; the Arbitrator shall be selected by the process of elimination from a panel of seven (7) arbitrators furnished by the Public Employment Relations Commission (PERC) or the Federal Mediation and Conciliation Service (FMCS). The request to PERC or FMCS shall state the general nature of the issues raised by the grievance and ask that the nominees be qualified. The parties shall promptly strike from the list received. The first strike shall be determined by the toss of a coin. The decision whether to use PERC or FCMS will be by mutual agreement or determined by a toss of the coin.

23.5 The Arbitrator shall consider and decide only the specific issue(s) submitted by the Employer and/or the Guild at the hearing, and shall have no authority to make a decision on any other issue not so submitted. The Arbitrator shall have jurisdiction and authority only to interpret, apply or determine compliance with the specific terms of the Agreement and shall not have jurisdiction to add to, detract from, or alter in any way, the provisions of this Agreement. A decision within the jurisdiction of the Arbitrator shall be final and binding upon all parties. The expenses and fees incumbent to the services of the arbitrator shall be paid by the losing party. Each party shall be responsible for compensating its own representatives and witnesses. Either party may cause a verbatim recording of the hearing to be made, provided it pays the cost of the record. If the other party desires a copy, the cost of the recording and preparation of a transcript shall be shared equally.

23.6 A grievance that involves or affects a significant number of the employees in the bargaining unit may be introduced by the Guild in written form to the Chief of Police as set forth in Step 2 of the grievance procedure.

23.7 Failure by the grievant(s), or a Guild Representative, to advance the grievance within time limits stipulated in this Article shall constitute abandonment of the grievance. The parties may mutually agree in writing to extend the time limit for a given Step for a stated period of time. Failure by the Employer to reply in a timely manner constitutes a denial of the grievance, unless both parties have agreed to an extension of the time line.

ARTICLE 24. Employee Discipline/Termination

24.1 It is hereby recognized and agreed that the Employer has the right to discipline an employee for reasonable and just cause.

24.2 The Employer may use a written warning in lieu of disciplinary action to advise the employee of inappropriate conduct, or of violation of rules. Written warnings shall be placed in the employee's personnel file for a period not to exceed twelve (12) months. An employee may request that the warning letter be reviewed by the Chief of Police after six (6) months for possible removal at that time.

24.3 The Employer may take disciplinary action by written reprimand, suspension, demotion, or discharge. Employees shall be given an opportunity to review and comment upon all disciplinary letters that are placed in their personnel files. The employee shall be requested to sign the disciplinary letter. The signature thereon shall not be construed as admission of guilt or concurrence with the disciplinary action, but rather as an indication that the employee has seen and comprehends the nature of the disciplinary action.

24.4 Copies of all letters of warning or disciplinary action shall be given to the employee at the time the action is taken or shortly thereafter, and notice of such action shall be forwarded to the Guild.

24.5 An employee suspended without pay may request to forfeit accrued paid days off on a day for a day basis, in lieu of unpaid time off. Substitution of PDO for unpaid time in no way reduces the level of discipline from a suspension.

ARTICLE 25. Non-Reduction of Wages and Working Conditions

25.1 The parties hereto agree that the wages and working conditions in effect and now being paid to and enjoyed by the members of the Guild shall be those ratified by both parties signatory to this Agreement and shall not be

reduced in view of the provisions of this Agreement. Nothing in this Article shall be construed to limit in any way the Employer's rights under Article 3 - Rights of Management of this Agreement.

25.2 The Employer and the Guild agree that past practices that are mandatory subjects of bargaining and are not specified by this Agreement but known by both the Guild and the Employer shall remain unchanged, unless bargained to completion consistent with RCW 41.56.

ARTICLE 26. Conflict of Contract and Personnel Policies

26.1 It is agreed that the intent of the parties is that this Agreement and all working agreements shall be consistent with the personnel policies. Where it is found that the provisions of such an agreement are in conflict with the personnel policies, the provisions of this Agreement shall apply.

ARTICLE 27. Separability

27.1 If any article of this Agreement should be held invalid by operation of law or by any tribunal of competent jurisdiction or if compliance with or enforcement of any article should be restrained by such tribunal, the remainder of this Agreement shall not be affected thereby and the parties shall enter into immediate collective bargaining negotiations for the purpose of arriving at a mutually satisfactory replacement for such article.

ARTICLE 28. Fair Labor Standards Act

28.1 In the event of changes in the application of the Fair Labor Standards Act to State and local governments or in the Federal Government implementing regulations which impact upon the provisions of this Agreement or the application thereof, the parties agree that such provisions are immediately subject to renegotiation upon the request of either party to this Agreement.

ARTICLE 29. Termination and Renewal

29.1 This agreement is effective January 1, 20263, and shall remain in full force and effect through December 31, 20285.

29.2 Pursuant to the provisions of RCW, Chapter 41.56, the employer and the Guild agree to commence negotiations not later than May 1 of the expiration year.

ARTICLE 30. Contract Amendments

30.1 The parties agree that this Agreement may be amended in writing as agreed to by both parties without action of their respective legislative bodies, unless otherwise specified herein, including, but not limited to, amendment by Memorandum of Understanding or Memorandum of Agreement.

A RESOLUTION relating to temporary shelter; providing for adoption of an increased funding award and timeline extension for the 2025 Share WHAT Shelter and YWCA SafeChoice Shelter agreements and authorizing the City Manager to execute agreements and other related documents and disburse funds in accordance with those agreements on behalf of the City of Vancouver consistent with the Affordable Housing Fund Council-approved funding awards.

Staff Report: 111-26

To: Mayor and City Council
From: City Manager
Date: June 1, 2026

Subject
2025 Affordable Housing Fund Temporary Shelter Contract Extensions

Key Points

- In June 2025, the City opened Affordable Housing Fund (AHF) shelter applications. The City received two applications and awarded both applicants $300,000 each: Share WHAT Women's Shelter (18 beds) and YWCA SafeChoice Shelter (44 beds).
- Current shelter contracts run on inconsistent schedules: YWCA on a July–June cycle and Share on a November–October cycle, complicating reporting and advisory committee review. The proposed amendments would align both contracts to a calendar year (ending December 31, 2026).
- To achieve this alignment, YWCA SafeChoice Shelter would receive a 6-month contract extension and an additional $150,000 and Share WHAT Shelter would receive a 2-month contract extension and an additional $50,000.
- Share and YWCA are the only shelter providers who have requested AHF funding since 2022. This additional allocation does not displace other shelter providers.

Strategic Plan Alignment
Housing and Human Needs – meeting basic needs and partnering with organizations to support the community

Present Situation
In April 2025, the City released $600,000 in Affordable Housing Funds to support partner-operated shelters. Two applications were received and reviewed by the Housing Advisory Committee at its May 9, 2025, meeting. Share submitted a request for $425,000 to support its Women's Housing and Transition (WHAT) shelter, which provides 18 beds and serves approximately 40 women annually. The YWCA requested $400,000 for its SafeChoice Domestic Violence Shelter, which offers 44 beds and serves about 100 individuals per year. Both agencies have a strong track record with shelter operations and have successfully managed previous AHF awards. The Committee recommended, and Council approved awarding $300,000 to each shelter.

The City's AHF shelter contracts were originally structured to align with the HUD Program Year, running July through June. In 2024, Share requested a contract extension to allow additional time to spend down awarded funds, which shifted their contract period to a November through October cycle.

As a result, the City's two shelter providers now operate on different contract schedules, creating challenges for both quarterly and annual reporting. Since reporting periods do not align with either contract cycle, reporting must be manually reconciled, and advisory committee reviews cannot easily evaluate both programs side by side within the same timeframe. The proposed contract amendments would bring both shelter contracts into alignment on a calendar year schedule, with both contracts ending December 31, 2026. Going forward, the City will issue AHF shelter contracts on a calendar year basis only and will not offer contract extensions for the purpose of spending down funds; shelter operators will be expected to complete program activities and expend awarded funds within the contract period.

Staff proposed these contract extensions and the additional allocation of funds for the two shelter operators to the Housing Advisory Committee, who agreed with the recommendation.

YWCA would receive an additional $150,000 for a 6-month extension and Share would receive an additional $50,000 for a 2-month extension. These amounts are proportionate to the original contract amount and for a contract end date of December 31, 2026.

The additional funding allocated through these contract amendments will not impact the availability of future AHF shelter funds. The $200,000 in additional funding is drawn from unallocated 2024 AHF shelter funding and does not reduce or commit any current or future funding cycles. Future AHF shelter funding will remain fully available for allocation through the standard application and award process.

Advantage(s)

1. An extended program timeline will provide continued shelter support through December 31, 2026, ensuring no gap in services for residents experiencing homelessness.
2. Aligning both shelter contracts to a calendar year cycle will streamline AHF reporting and advisory committee review and establish a consistent contracting schedule for future funding cycles.

Challenge(s)

None

Budget Impact

The additional proposed allocation of $200,000 is provided by Affordable Housing Fund revenues.

Prior Council Review

June 9, 2025: 2025 AHF Temporary Shelter Funding Awards

Action Requested

On Monday, June 1, 2026, finalize and approve the resolution of the 2025 Affordable Housing Fund Temporary Shelter contract amendments, authorizing the City Manager, or designee, to execute agreements and other related documents and disburse funds in accordance with those agreements on behalf of the City of Vancouver consistent with the Affordable Housing Fund 2025 Council-approved contract funding increase and timeline extension.

1. Resolution

6/1/2026

RESOLUTION NO. M- [Resolution Number]

A RESOLUTION relating to temporary shelter; providing for adoption of an increased funding award and timeline extension for the 2025 Share WHAT Shelter and YWCA SafeChoice Shelter agreements and authorizing the City Manager to execute agreements and other related documents and disburse funds in accordance with those agreements on behalf of the City of Vancouver consistent with the Affordable Housing Fund Council-approved funding awards.

WHEREAS, in June 2016 Council adopted, by resolution, the Affordable Housing Fund Administrative and Financial Plan (A & F Plan) and most recently updated the A & F Plan in December 2024, and

WHEREAS, the City received only two (2) applications for Temporary Shelter through the 2025 Affordable Housing Fund application process, and

WHEREAS, the City awarded both applicants $300,000 each for shelters operated by Share and YWCA, totaling $600,000, and

WHEREAS, the housing advisory committee and staff recommend a contract extension and increased funding for the two (2) shelters to align them on a calendar year period, and

WHEREAS, YWCA would receive an additional $150,000 for a 6-month contract extension and Share would receive an additional $50,000 for a 2-month contract extension, and

WHEREAS, this extended program timeline will allow Share to serve an additional 13 individuals and YWCA will serve an additional 50 individuals, and

WHEREAS aligning contract timelines with a calendar year period will increase consistency and efficiency for AHF applications and reporting.

NOW, THEREFORE,

BE IT RESOLVED BY THE CITY OF VANCOUVER:

Section 1. **Findings**. The City Council adopts the above recitals and the information in SR_____ as findings supporting City Council in adopting this resolution.

Section 2. **Amendment.** The 2025 Affordable Housing Fund award that was made to Share for the WHAT Shelter in the amount of $300,000 is hereby increased to $350,000 with the contract end date extended from October 31, 2026 to December 31, 2026, and the 2025 Affordable Housing Fund award that was made to YWCA for the SafeChoice Shelter in the amount of $300,000 is hereby increased to $450,000 with the contract end date extended from June 30, 2026 to December 31, 2026.

Section 3. **Severability.** If any section, sentence, clause or phrase of this resolution should be held to be invalid or unconstitutional by a court of competent jurisdiction, such invalidity or unconstitutionality shall not affect the validity or constitutionality of any other section, sentence, clause or phrase of this resolution.

Section 4. The City Manager or designee is hereby authorized to execute agreements and other related documents and disburse funds in accordance with those agreements on behalf of the City of Vancouver consistent with Affordable Housing Fund 2025 Council-approved contract funding increase and timeline extension.

Section 5. Effective Date. This resolution is effective immediately after final adoption.

ADOPTED at a Regular Meeting of the Vancouver City Council this 1st day, of June 2026.

A RESOLUTION authorizing the City of Vancouver to apply for a Heritage Capital Projects grant from the Washington State Historical Society to fund rehabilitation of four buildings on Officers Row; providing for severability and an effective date.

Staff Report: 112-26

To: Mayor and City Council
From: City Manager
Date: June 1, 2026

Subject
Washington State Historic Society Heritage Capital Projects Grant

Key Points

- The City is interested in applying for a Heritage Capital Projects grant through the Washington State Historic Society (WSHS) to support preservation work needed on four buildings on Officers Row.
- The grant requires a 2-to-1 match and funds are available in the Vancouver National Historic Reserve (VNHR) capital fund for this project.
- The grant program requires a City Council resolution demonstrating support for the project as part of the grant application process.

Strategic Plan Alignment
Culture and Heritage – celebrating culture and heritage

Present Situation
For the last twenty years, the City and the Historic Trust have worked collaboratively to identify strategic rehabilitation projects to maintain the historic buildings in the VNHR, including Officers Row and the West Reserve area. In many of these projects, we have been successful at leveraging funding through WSHS targeted to historic preservation to support this work. Recent projects include the Grant House, completed in 2023, and the O. O. Howard House, completed last year.

The City and Trust have identified needed repairs to four buildings on Officers Row as the next priority project that would benefit from Heritage Capital Project dollars. The buildings involved are known as 3, 4, 12 and 18. Work will address some exterior wall deterioration and needed replacement of beams that show signs of deterioration. The project will provide better weather protection to avoid similar issues in the future. The total project cost estimate for this work is $387,000. This would allow a grant request of $129,000 with a required match of $258,000. Fund balance is available in the VNHR capital reserve to support this project.

Finalization of plans and refinement of costs is occurring now and a contract for construction would come to City Council in a separate action if this grant is received.

Advantage(s)

1. This grant would provide funding to preserve the historic buildings owned by the City of

Vancouver on Officers Row.
2. WSHS administration of the program ensures that appropriate methods are used to meet or exceed historic preservation standards.

Challenge(s)
This project requires a 2-to-1 match; however, these funds are available for this purpose in the historic reserve capital fund.

Budget Impact
Funds are available to support the project in the dedicated VNHR capital fund.

Prior Council Review
None

Action Requested
On June 1, 2026, adopt a resolution supporting the City applying for a 2027-2029 Heritage Capital Projects grant from Washington State Historic Society to support structural preservation of Officers Row buildings 3, 4, 12, and 18.

1. Resolution

06/01/26

RESOLUTION NO. M-_____

A RESOLUTION authorizing the City of Vancouver to apply for a Heritage Capital Projects grant from the Washington State Historical Society to fund rehabilitation of four buildings on Officers Row; providing for severability and an effective date.

WHEREAS, the City of Vancouver owns Officers Row which includes twenty-two historic structures that are part of the Vancouver National Historic Reserve, a federally designated national historic site; and

WHEREAS, the City of Vancouver is interested in applying for a Heritage Capital Projects grant from the Washington State Historical Society to support critical structural preservation of Officers Row buildings 3, 4, 12, and 18; and

WHEREAS, this project would address newly discovered areas of deterioration and water damage, and ensure that these buildings are preserved and continue to fully contribute to the living history of Officers Row; and

WHEREAS, the Washington State Historical Society offers a recurring competitive grant program (RCW 27.34.330 Heritage Capital Projects) to support capital needs of facilities that interpret and preserve Washington's heritage; and

WHEREAS, through the Heritage Capital Projects grant program, the State of Washington may reimburse up to 33.33% of total project costs and requires a 2-to-1 financial match.

NOW, THEREFORE,

BE IT RESOLVED BY THE CITY OF VANCOUVER:

Section 1. The recitals set forth above are adopted as findings supporting the action of the City Council in adopting this resolution.

Section 2. The City Council fully endorses and supports the structural preservation of Officers Row buildings 3, 4, 12, and 18 and authorizes the City of Vancouver to apply for project funding through a Heritage Capital Projects grant from the Washington State Historical Society with a committed city match estimated to be $258,000.

Section 3. If any section, sentence, clause or phrase of this resolution should be held to be invalid or unconstitutional by a court of competent jurisdiction, such invalidity or unconstitutionality shall not affect the validity or constitutionality of any other section, sentence, clause or phrase of this resolution.

Section 4. This resolution shall be effective immediately upon adoption.

DATED this 1st day of June, 2026.

AN ORDINANCE updating and amending the City of Vancouver 2026-2045 Comprehensive Plan, called Our Vancouver, repealing and replacing the City of Vancouver Zoning Map, and repealing and replacing Title 20 Land Use and Development Code of the Vancouver Municipal Code, providing for severability and an effective date.

Staff Report: 103-26

To: Mayor and City Council
From: City Manager
Date: June 1, 2026

Subject

Ordinance Adopting the Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Vancouver Municipal Code Title 20 Land Use and Development Code

Key Points

- The City of Vancouver is proposing the Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Vancouver Municipal Code (VMC) Title 20 Land Use and Development Code to replace the existing Comprehensive Plan (2011-2030) and zoning code in full.
- The proposed plan, map, and code have been drafted in response to 1. State Growth Management Act (GMA) requirements including completing a full update by December 31, 2025, planning for and accommodating at least 38,000 more housing units by 2045 (HB 1220), and at a minimum allowing up to 4 to 6 units on all residential lots (HB 1110), 2. City Council direction and priorities including climate action, equity, and community safety, and 3. community input.
- The proposed plan, map, and code have been developed through a multi-year process beginning in early 2023, involving the Vancouver community, the Planning Commission and City Council and many other organizations, agencies and partners. Throughout the process, more than 2,000 people have been directly engaged through over 200 meetings, events, workshops, and outreach activities.
- The proposed plan includes 10 chapters, with a map showing the 4 Comprehensive Plan designations. The proposed map and code have 10 base zoning districts, which among other regulations include minimum residential density and maximum height requirements to support efficient use of land, protect agricultural and natural areas outside of Urban Growth Areas from development, and add more housing to meet the needs of the community.

Strategic Plan Alignment

Transportation and Mobility – a safe, future-ready and convenient transportation system

Economic Opportunity – a place where a wide variety of businesses of all sizes grow and thrive

Housing and Human Needs – meeting basic needs and partnering with organizations to support the community

Vibrant and Distinct Neighborhoods – a variety of accessible places and spaces

Culture and Heritage – celebrating culture and heritage

Safe and Prepared Community – a safe place to live, work, learn and play

Climate and Natural Systems – environmental stewardship and efforts to address climate change to ensure a sustainable future

High Performing Government – a government that is reliable, fiscally responsible, equitable, and open to compromise

Present Situation

Background

The City of Vancouver is proposing an updated 2026-2045 Comprehensive Plan, called Our Vancouver, City of Vancouver Zoning Map, and Title 20 Land Use and Development Code of the Vancouver Municipal Code (VMC). The City of Vancouver's Comprehensive Plan provides the overall long-term vision and policy direction to manage the built and natural environment in Vancouver for the next 20 years and to provide necessary public facilities to achieve that vision. The City adopted its first comprehensive plan under Washington's Growth Management Act (GMA) in 1994 with a major re-write occurring in 2004, and a less substantive update in 2011. The zoning code, which is a key tool to implement Comprehensive Plan policy direction, was last updated in full in 2004 and has been incrementally updated since.

The Updated Comprehensive Plan and Zoning Code have been drafted in response to state GMA requirements to complete a full update no later than December 31, 2025. Clark County and other cities within Clark County are also in the process of completing their Comprehensive Plan updates under this timeline.

The following GMA goals guide the development and adoption of comprehensive plans and development regulations (RCW 36.70A.020):

1. Urban growth. Encourage development in urban areas.
2. Reduce Sprawl. Reduce the inappropriate conversion of undeveloped land.
3. Transportation. Encourage efficient multimodal transportation systems.
4. Housing. Plan for and accommodate housing affordable to all economic segments.
5. Economic development. Encourage economic development throughout the state.
6. Property rights. Private property shall not be taken for public use without just compensation having been made.
7. Permits. Applications should be processed in a timely and fair manner.
8. Natural resource industries. Maintain and enhance natural resource-based industries.
9. Open space and recreation. Retain open space, enhance recreational opportunities.
10. Environment. Protect the environment and enhance the state's high quality of life, including air and water quality, and the availability of water.
11. Citizen participation and coordination. Encourage the involvement of citizens.
12. Public facilities and services. Ensure that those public facilities and services necessary to support development shall be adequate.
13. Historic preservation. Identify and encourage preservation.
14. Climate change and resiliency. Ensure that comprehensive plans, development regulations,

and regional policies, plans, and strategies adapt to and mitigate the effects of a changing climate.

15. Shoreline management. The goals and policies of the shoreline management act as set forth in RCW 90.58.020 shall be considered an element of the city's comprehensive plan.

The current comprehensive designation map, which designates types and intensities of uses allowed throughout the City, is broken down into five general Comprehensive Plan designations:

- Residential (Urban Low Density and Urban High Density),
- Water,
- Open Space or Public Facility,
- Commercial/Mixed Use, and
- Industrial

The current zoning code has 17 specific zoning districts nested under the above Comprehensive Plan designations, and 12 overlays impose additional or varied requirements in specific areas. In general, this structure is based on a historical zoning model that aims to segment different land uses based on perceived externalities and impacts, as was common with many cities in the state of Washington and throughout the country at large in the 20th and early 21st centuries.

As with many other cities nationally, this pattern of development has both directly and indirectly contributed to sprawling land use patterns, auto dependency, inequitable access to housing, and increased greenhouse gas (GHG) emissions in the community. Currently, 46% of land in the City is dedicated exclusively to single-family residential uses, limiting nearly half of the City to a single, low intensity development type. This has led to decades of housing underproduction and created a crisis of housing supply in Vancouver and across Washington state. As the City has grown, underproduction led to low vacancy rates, driving up the cost of housing across all type, size and tenure categories, increasing the number of cost-burdened households (defined as households that pay more than 30% of their income for housing), and contributing to the growth of the houseless community.

Since the Comprehensive Plan was last updated, new laws under GMA require the City to allow a minimum of 4-6 units on single-family lots (HB 1110), plan for and accommodate a minimum of approximately 38,000 new housing units affordable at a range of income bands (HB 1220), allow a minimum of two Accessory Dwelling Units (ADUs) per residential lot (HB 1337), include a Climate Element and greenhouse gas inventory in its updated Plan (HB 1181), and limit minimum required parking (SB 5184), and several other new laws focused on housing production and managing climate impacts. The City Council has directed staff to accommodate a minimum of 43,200 new jobs by 2045 to provide ample employment opportunities within the City. The City Council has also adopted several policy documents that provide guidance on desired outcomes and goals, including: connected and accessible neighborhoods; increased housing at all income levels; efficient use of land; safe multimodal transportation options; aggressive climate action and equitable adaptation; increased access to services and opportunities; and prioritizing community health and wellbeing. To achieve these outcomes, the City’s regulatory framework must be updated to allow a wider and more diverse range of uses and building types.

Once adopted, the Our Vancouver 2026-2045 Comprehensive Plan and Zoning Code will be monitored and updated more frequently through the City’s Annual Review program and periodic code updates, with the next significant citywide plan review required in 2030 per new state regulations for

a five-year review, and the next major update involving new growth forecasts required in 2035. Incremental changes to individual portions of the Comprehensive Plan can be made once per year, in any year. Zoning changes can be made at any time. Parties requesting changes in their property designations can apply to do so beginning in 2027.

Key Drivers and Priorities

The proposed updated 2026-2045 Comprehensive Plan, zoning map and development code are guided by a range of interrelated factors. The below drivers establish the rationale for moving from the existing growth strategy toward a more compact, equitable, and resilient pattern of development.

A Changing Landscape

Vancouver is facing a convergence of pressures that require a new approach to growth. Rising housing costs, increased demand for multimodal transportation, climate change, and evolving community safety and economic conditions all point toward the need for an updated land use plan.

Economic and Employment Trends

Shifts in work and commerce are reshaping how residents want to live and work. Remote work remains a strong factor, while residents also express a clear desire for jobs closer to home, more support for small businesses and local entrepreneurship and more family wage job opportunities. These changes require planning for mixed-use centers and neighborhood business districts that can provide daily needs without long commutes, and thoughtful management of employment land that reflects the evolving local, national and global economy.

A Growing Community

Vancouver is transitioning from a primarily suburban model toward a more urban pattern of development as land resources become scarce. The City's population is projected to increase by approximately 81,000 residents by 2045, and accommodating this growth means moving away from low-intensity greenfield development toward compact, connected neighborhoods. The goal is that daily needs—groceries, schools, parks, childcare, healthcare—can be met within a 15-minute walk from where people live.

Opportunity for All

Addressing disparities in opportunity is central to the community vision for the future of the City. Equal access to housing, jobs, parks, schools, healthcare and services is necessary for all community members to thrive. Increasing the number of connected, accessible neighborhoods with safe and convenient access to essential services is a primary goal of the Plan and reflects Council policy priorities.

Climate Action

The City has committed to net-zero local greenhouse gas (GHG) emissions by 2040. Meeting this target requires strategies that both reduce vehicle miles traveled and prepare neighborhoods to adapt to localized climate impacts such as extreme heat, wildfire smoke, and flooding. Compact growth along corridors and in centers, combined with expanded tree canopy and resilient infrastructure, will help Vancouver adapt to these risks.

Legal and Policy Requirements

There are a number of new state legal requirements for housing, climate and other issues. HB 1110 requires allowing middle housing at densities of 4-6 units per lot in single family zoning districts citywide. HB 1220 requires demonstrating capacity for set numbers of housing units citywide, affordable at different income levels. The City of Vancouver is required to show it can accommodate over 38,000 new housing units, approximately half of them affordable at below market levels. There are also legal requirements to allow two accessory dwelling units (ADUs) per lot, to limit local minimum parking requirements, and other mandates. For the first time, Climate elements are required to be included in updated Comprehensive Plans.

Overview of Process

The proposed Updated Comprehensive Plan and Zoning Code have been developed through a multi-year process beginning in early 2023, involving the Vancouver community, the Planning Commission and City Council and many other organizations, agencies and partners. There have been three distinct phases in advance of the adoption process:

Phase 1: Learning About Our Community / Visioning (Summer 2023-Fall 2023)

- Envision Events, a community survey, and pin map, prior visioning engagement, and the Our Vancouver Community Partners informed the creation of the Vision Statement (below) and Goals Framework for the plan.
- The Vision and Goals Framework, along with the Equity Framework and Community Partnership Framework, were endorsed by City Council on December 18, 2023.
- Additionally, several foundational studies were prepared to understand past, current, and anticipated conditions and inform the plan and code update. These included the Community Atlas, Housing Needs Assessment, Economic Conditions and Opportunities Analysis, Equity Analysis and later a Climate Vulnerability Assessment and Health Impact Assessment.

Vision Statement:

Vancouver is an equitable and prosperous community, which ensures that all residents, businesses and organizations benefit from the growth and advancement we make together. Vancouver will be recognized for our quality of life, as evidenced by affordable housing in vibrant, safe and walkable neighborhoods, access to jobs and economic opportunity for all, and leading-edge efforts to address climate change.

Phase 2: Developing Land Use Alternatives (Winter 2024-Fall 2025)

- Community input from the Community Mapping Activities (Spring 2024), along with Phase 1 engagement listed above, findings from the studies noted above, state laws, City priorities, and Council direction, informed the creation of Land Use Alternative 1 and Land Use Alternative 2.
- Once the Alternatives were finalized, additional outreach was done (November 2024-June 2025) to share the Alternatives with the community and prepare people to provide comments during the upcoming Draft Environmental Impact Statement (Draft EIS) comment period.
- The comments received during the Draft EIS comment period (July 8 – September 8, 2025), along with past community input, Draft EIS findings, state laws, City priorities, and Council direction, informed the creation of the Preferred Land Use Alternative.
- The Preferred Land Use Alternative map (Figure 1) was endorsed via resolution by City Council on December 15, 2025.

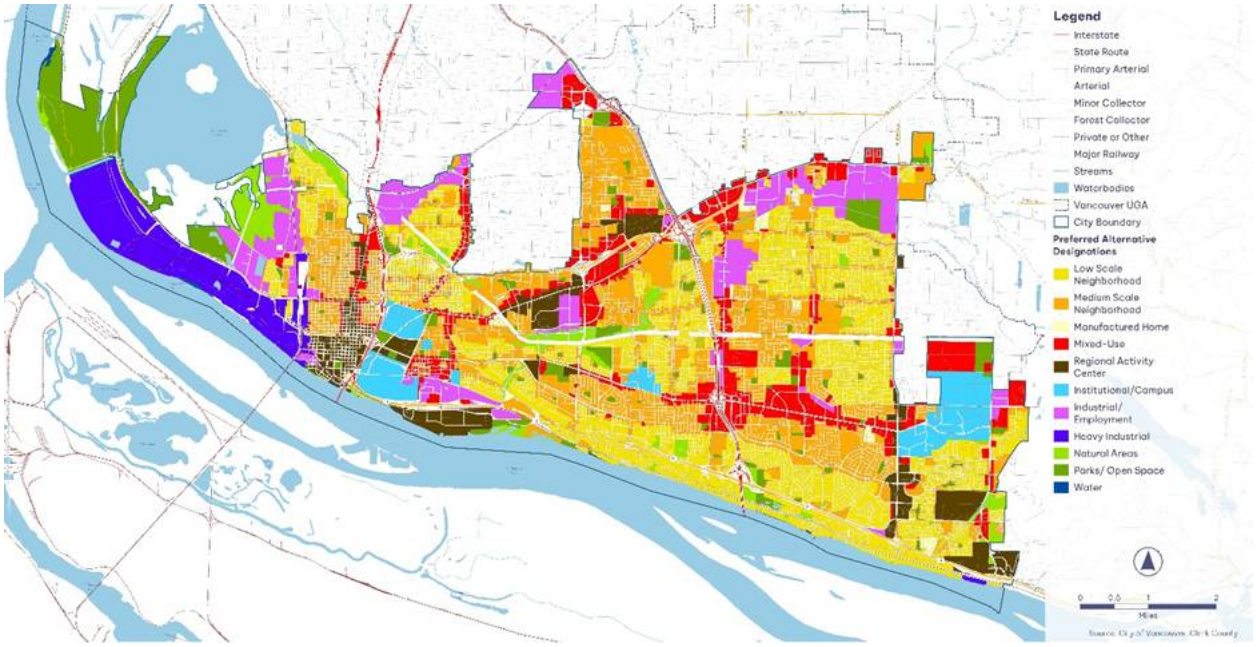

Figure 1. Preferred Land Use Alternative endorsed by City Council on December 15, 2025.

Phase 3: Draft Plan and Development Code (Winter-Spring 2026)

- This phase focused on reporting back and demonstrating how community input, City priorities, and state laws were reflected in the draft plan and code.
- High-level code concepts were introduced to the Council and community as part of the community mapping activities in Phase 2, called “place types” that represented different types, scales and character of development. A more refined code framework including new base districts, minimum densities, maximum building heights, parking, building types, street orientation, the use table and overlays were reviewed with the City Council at workshops on November 18, 2024, and February 2, 2025, and were refined throughout the Phase 3 process, including at Council workshops on January 26 and February 23, 2026. Public
- Review of Draft Plan and Code (February 19 - March 31, 2026)
    - On February 19, 2026, the first drafts of the full plan and code were published for the public to review and weigh-in on. These first drafts were informed by the Goals Framework, community input from Phases 1 and 2, and detailed feedback on plan and code concepts from City and community working groups, the Community Partners, boards and commissions, the Planning Commission, and City Council.
- Council and Commission Refinement
    - At the April 13, 2026 City Council workshop and the April 14, 2026 Planning Commission workshop, the Council and Commission reviewed the second drafts of the Comprehensive Plan and Zoning Code, as well as a summary of community feedback on the first drafts.
    - Feedback received on the first drafts of the plan and code (February 19 – March 31, 2026) that aligned with past community input, state laws, City priorities, and Council direction informed refinements to the plan and code.
    - Then, based on Council and Planning Commission direction at the April 13 and 14 meetings, staff made final refinements before initiating the adoption process.

Adoption Process

- The third drafts of the Our Vancouver 2026-2045 Comprehensive Plan, updated City of Vancouver Zoning Map and updated Zoning Code were brought to the Planning Commission on April 28, 2026 for a duly advertised public hearing, where they unanimously recommended that the Council adopt the proposed new plan, map and code. The third drafts were also shared at the City Council Workshop on City Council Workshop on April 27, 2026.
- The proposed plan, map, and code are supported by the Final Environmental Impact Statement (Final EIS), which was published on April 16, 2026.
    - The Final EIS includes analysis of the Preferred Alternative.
    - Changes and additions since the Draft EIS are shown in underline/strikethrough.
    - The Final EIS also includes responses to substantive comments from the Draft EIS. Common responses are in Chapter 6, beginning on page 250 of the PDF. Responses to individual comments are in Appendix E, beginning on page 340 of the PDF.
- On May 11, 2026, the City Council considered the final drafts of the plan, map and code via consent agenda and read the proposed ordinance adopting all three into the record.
- On June 1, 2026, the City Council will hold a public hearing to adopt the final plan, map and code.

Throughout the process more than 2,000 people have been directly engaged through over 200 meetings, events, workshops, and outreach activities, with more than 2,000 ideas and comments received. A wide variety of engagement and outreach tools has allowed the City to gather both broad and in-depth feedback, reaching thousands more community members through online platforms and citywide communications. There were more than 10,000 visits to the project engagement site during the process, and more than 16,000 views of the online StoryMap. Information was shared through more than 65 Our Vancouver e-newsletters, 11 City e-newsletters, and 14 Office of Neighborhoods e-newsletters, 110 social media posts across four platforms, distributing flyers at more than 40 locations around the City, more than 200 direct emails, and three citywide hard copy newsletters mailed to every address in the City.

The review process has also involved extensive review and discussion with City advisory and decision-making bodies. To date, the Planning Commission has held 25 public workshops and a public hearing. The City Council has held 28 public workshops. The Parks, Recreation and Cultural Services Commission, Transportation & Mobility Commission, Urban Forestry Commission and Central City Redevelopment Authority have also reviewed drafts of the plan, map and code throughout the process.

Proposal
Comprehensive Plan Designations and Zoning Maps

The proposed Our Vancouver 2026-2045 Comprehensive Plan and updated City of Vancouver Zoning Map apply new Comprehensive Plan designations and zoning districts to properties citywide. The updated zoning map, known as the Preferred Alternative (*Figure 1* above), was endorsed by the City Council on December 15, 2025. The Preferred Alternative is also currently available as an online interactive map, and once adopted, the Comprehensive Plan and zoning designations would be available online through the Clark County Maps Online portal.

The updated plan designation and zoning maps have been reviewed and analyzed in compliance with the State Environmental Policy Act (SEPA) through a Final Environmental Impact Statement process (see attachment).

The 10 proposed new Zoning Districts are:

- Low-Scale Neighborhood,

- Medium-Scale Neighborhood,
- Mixed-Use Neighborhood,
- Regional Activity Center,
- Institutional/Campus,
- Industrial/Employment,
- Heavy Industrial,
- Manufactured Home Park,
- Parks, and
- Natural Areas.

The zoning districts are nested under four proposed Comprehensive Plan designations (*Figure 2*):

- Residential Neighborhoods,
- Urban Mixed Use,
- Employment and Industry, and
- Green Space.

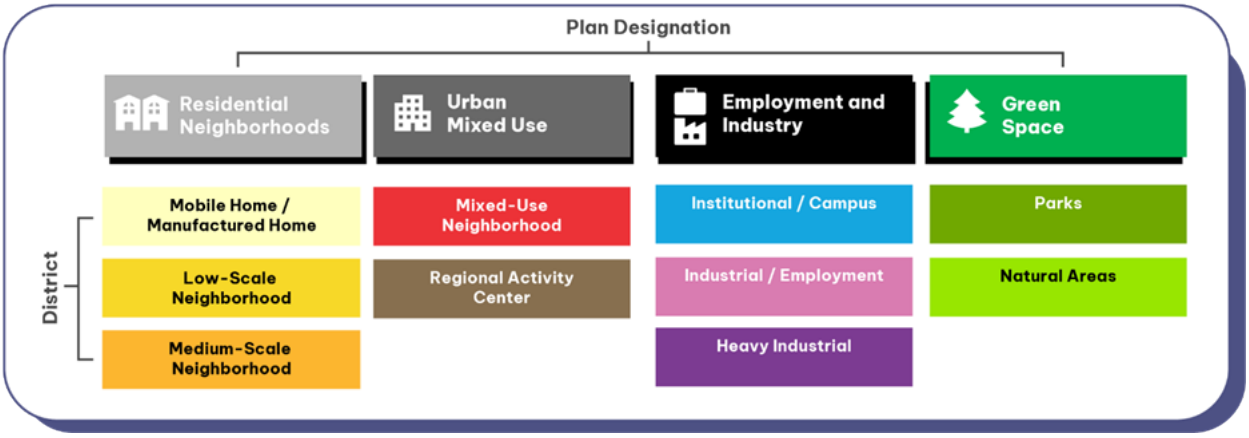

Figure 2. Proposed Comprehensive Plan designations with proposed zoning districts nested underneath.

Updated Comprehensive Plan - Text

The proposed Updated Comprehensive Plan begins with an introduction and the overall community vision statement (*Figure 1* above) followed by ten chapters and an appendix with related plans, policies, and supporting documents and analyses. Each chapter contains background information, a chapter vision statement, chapter-specific goals, and supporting policies, which provide the direction of the Comprehensive Plan. There is also a list of key implementing actions at the end of each chapter.

The proposed Updated Comprehensive Plan is the fourth draft, published on May 5, 2026 . This draft incorporates changes to the first draft (published February 19, 2026), second draft (published April 7, 2026), and third draft (published April 17, 2026).

Changes to the Plan from the first draft (February 19, 2026) to the final draft (May 5, 2026) are summarized by chapter in the following sections. Additional updates were also made throughout the

document related to formatting, consistency, spelling, grammar, and accessibility.

For additional details and recent past discussions on the draft Comprehensive Plan, see City Council materials from January 12, 2026, February 2, 2026, March 16, 2026, April 13, 2026, and April 27, 2026.

Introduction

While the Introduction is not a standalone mandatory element under the Growth Management Act, it serves a critical functional role in establishing the Comprehensive Plan's purpose, scope, and internal consistency under the Revised Code of Washington (RCW) 36.70A. State law requires that all elements of the Comprehensive Plan be internally consistent and grounded in adopted population allocations, growth assumptions, and statutory requirements. The Introduction provides the framework that links required plan elements, outlining the historical context of the community into the present, and establishes the organizing logic for the plan as a whole.

The Introduction also fulfills key procedural requirements by documenting the City's planning context, summarizing community conditions and trends, articulating the community vision, and explaining the role of the Comprehensive Plan in guiding future land use decisions, capital investments, and implementation actions. In this way, the chapter provides the foundation for demonstrating compliance with the GMA and related statutes across all plan elements. The Introduction establishes a shared context and orients readers to the Comprehensive Plan.

The following summarizes changes to the Introduction from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- The School for the Deaf and School for the Blind, and the historical significance of their location in southwest Washington, and role in shaping the Vancouver community. Indigenous communities and economies.
- The importance of the Columbia River to Vancouver's past, present, future and overall identity.
- The community engagement conducted during the planning process and where community feedback is located within each chapter.
- Added definitions for the terms "Public Spaces" and "Community Spaces" to the glossary and updated usage for consistency.
- Added definitions for the terms "Disparities" and "Inequities" to the glossary and updated usage for consistency.

Community Experience

This chapter is a foundational guide for how policy is developed and evaluated across the rest of the Plan from an experiential lens addressing what it is like to live in Vancouver. The chapter establishes that Vancouver's growth strategy must be evaluated not only by physical outcomes, but by how decisions shape daily life and community members' sense of belonging, safety, visibility, connection, and access to places where civic life happens. The chapter frames Community Experience as a citywide priority and a lens that should be applied everywhere in the Plan, particularly for residents who face barriers due to income, race, language, age, disability, gender identity, renter status, or health vulnerability.

The following summarizes changes to the Community Experience chapter from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- The importance of identity to economic vitality and competitiveness;
- The relationship between the built environment and strong social infrastructure;
- Incorporated more data and analysis from the Equity Atlas into the narrative around representation and belonging;
- Recognition of the role that small businesses play in building a culture of belonging and innovation.
- The relationship between the goals in the community experience chapter and the goals of the Parks chapter, including the role of third spaces, sports facilities/leagues, and the fact that public spaces are among the most accessible and widely used places for building social infrastructure.

Equity and Inclusion

Although not required as a standalone component, this chapter is provided in response to requirements that GMA implementation address racially disparate impacts and advance equitable outcomes. Recent state legislation—including requirements related to housing, climate, transportation, and environmental justice—explicitly direct jurisdictions to consider how policies affect historically marginalized and overburdened communities. A central component of the Comprehensive Plan is the use of data-driven tools—including the City's Equity Index, Displacement Risk Assessment, Climate Vulnerability Assessment, and Health Impact Assessment—to guide decision-making and prioritize investment. This chapter also emphasizes accountability, transparency, and meaningful community partnership as essential conditions for achieving equitable outcomes over the 20-year planning horizon.

The following summarizes changes to the Equity and Inclusion chapter from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- Recognition of overlapping and compounding impacts of different identities.
- Information on housing stability, renters and eviction risk, and the contributions of renters in the community.
- New policy on Values Driven Budgeting.

Land Use and Development

This chapter is required and establishes the land use framework that supports all other Comprehensive Plan elements. Cities must designate the general distribution and intensity of land uses, including housing, commerce, industry, recreation, and open space, and demonstrate sufficient land capacity to accommodate projected population and employment growth. State law establishes both substantive requirements for what must be included in the land use element and procedural requirements for how land use decisions must be supported, coordinated, and demonstrated through data and analysis. Growth of approximately 38,000 new housing units and 43,200 new jobs is anticipated within current city limits by 2045.

The proposed Plan reflects a continued shift from historic development patterns that emphasized separation of uses toward a more compact, connected, and inclusive urban form. The proposal responds to current realities of limited remaining vacant land, housing unaffordability and underproduction, and widening disparities in access to opportunity. The proposed general Growth Concept envisions future development into a connected network of centers, corridors, and employment districts, and preservation of parks and open space. The framework directs a significant portion of new housing, jobs, and services to places already served—or planned to be served—by

infrastructure, transit, and community amenities, while also allowing for more housing and mixing of uses in neighborhoods around the City. The chapter includes a Connected and Accessible Neighborhoods analysis that demonstrates significant disparities in access to parks, grocery stores, healthcare, services, and transit across the City. The chapter further advances land use policy as a tool to improve economic mobility and address climate change, through policies that emphasize compact development, transit-oriented growth, adaptive reuse of existing buildings, and investments in active transportation.

The following summarizes changes to the Land Use and Development chapter from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- Updated Comprehensive Plan designation map to correct mistakes.
- Redrafted policy related to Shared Parking and Redevelopment of Existing Parking to more clearly direct the City to encourage shared parking and redevelopment of existing underutilized surface parking lots.
- Refined information on community feedback to ensure a comprehensive summary.

Housing

This chapter is required and must address the existing and projected housing needs of all economic segments of the community. Cities are required to plan for sufficient land capacity and include goals and policies to accommodate housing growth over the 20-year planning period, while also addressing affordability, housing stability, and access to opportunity. RCW 36.70A.070(2) and WAC 365-196-315, require the housing element must include an inventory and analysis of existing and projected housing needs, identify sufficient land capacity to accommodate those needs, and establish policies to encourage the availability of housing affordable to households at a range of income levels. The Housing chapter must also demonstrate consistency with countywide planning policies, adopted population allocations, and recent state housing legislation related to housing supply, middle housing, STEP (shelters, transitional, emergency and permanently affordable) housing, fair housing, and racially disparate impacts.

The Housing chapter establishes housing as essential infrastructure that underpins community health, economic mobility, climate resilience, and overall quality of life. Technical analysis and engagement conducted during the plan update confirm that Vancouver faces a significant housing supply deficit, rising housing costs, and growing displacement risk, particularly for low-income households, renters, and communities of color. The Housing Needs Assessment identifies the need to accommodate more than 38,000 new housing units by 2045 to meet future growth and address existing shortfalls. Rather than treating affordability and supply as separate issues, the chapter advances a comprehensive housing strategy that links increased housing production, expanded zoning capacity, and targeted affordability interventions. Policies emphasize increasing overall housing supply—including middle housing and higher-density residential development in areas served by transit and amenities—while also expanding affordable and supportive housing options for households most at risk of housing instability.

A central component of the chapter is a focus on housing stability and displacement prevention. The chapter applies an equity and displacement lens to identify neighborhoods where market pressures intersect with vulnerable populations and pairs new housing capacity with policies that preserve existing affordable housing, support homeownership opportunities, and mitigate displacement impacts. Housing policies are intentionally coordinated with land use and economic development strategies to promote job–housing balance, reduce long commutes, and ensure that new investment benefits existing communities.

The following summarizes changes to the Housing chapter from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- Added data on City land use applications between 2019 and 2025.
- Updated numbers on housing capacity by zoning district and estimated number of new units in areas with high displacement risk.
- Added language clearly stating draft Plan and code meeting state requirements for Supportive, Transitional, Emergency and Permanently Supportive (STEP) housing.
- Added reference to Capital Facilities Forecast section of Public Services and Facilities Chapter for information on how City services and facilities will serve growth.
- Added more information on City programs and sources for rent-restricted affordable housing.
- Added additional tables from the Housing Needs and Land Capacity Analysis to the Chapter to clearly show where emergency housing and shelters are allowed (i.e., all zoning districts that allow housing) and that the City has sufficient capacity to meet the number of beds assigned to it through the County allocation process.
- Added ADU capacity information.
- Clarifications in response to Department of Commerce feedback.

Economic Opportunity

This chapter is optional under the GMA but proposed for inclusion in recognition of the importance of the issue and Vancouver's role as a regional employment center. Consistent with direction of RCW 36.70A.070(7) and WAC 365-196-435 if economic development elements are included, this chapter addresses existing conditions and historical context, employment trends and industry composition, workforce characteristics and access to opportunity, major employment centers and commuting patterns, and projected job growth and employment land capacity. The chapter prioritizes inclusive economic development, recognizing that a strong economy depends on the ability of residents to access living-wage jobs, career pathways, and entrepreneurship opportunities close to where they live. Rather than focusing solely on job growth or business attraction, the chapter emphasizes economic mobility, workforce access, and support for small businesses and local employers.

A key component of the chapter includes a focus on place based economic development that is integrated with future growth nodes and responsive to community needs. It also reinforces the importance of preserving and strengthening employment lands to ensure Vancouver can continue to support a diverse range of industries, including manufacturing, logistics, healthcare, education, and emerging sectors. Policies emphasize supporting job-housing balance, and directing employment growth to employment centers outlined in the growth framework that are well served by infrastructure and transit. The chapter also integrates equity considerations by prioritizing investments and strategies that address barriers faced by BIPOC communities, LGBTQIA+ residents, people with disabilities, youth, and low-income households.

The following summarizes changes to the Economic Opportunity chapter from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- More clearly connected goal EO-4 Placed-based Economic Development to Policy 15- Align Place-based Investments with the Growth Concept.
- Refined information on community feedback to ensure a comprehensive summary.

Climate and Environment

This chapter is required and must address both climate change mitigation and climate resilience. Cities must reduce greenhouse gas emissions, plan for climate impacts, and integrate climate considerations into land use, transportation, housing, infrastructure, and public facilities planning over the 20-year planning period. RCW 36.70A.070(9) and associated state guidance requires policies to reduce vehicle miles traveled and greenhouse gas emissions, increase energy efficiency, and support a transition to low-carbon systems, as well as to improve community resilience to climate hazards such as extreme heat, flooding, wildfire smoke, and other climate-related risks. The chapter must specifically address environmental justice issues, including how climate impacts and climate investments intersect with equity, recognizing that climate risks and adaptive capacity are not evenly distributed across populations or geographies.

The chapter is supported by two key analytical subcomponents - the City's Climate Vulnerability Assessment and Health Impact Assessment - which provide the technical foundation for the chapter's mitigation, adaptation, and equity-focused policies. Together, these analyses identify where climate hazards such as extreme heat, wildfire smoke, flooding, and air quality impacts are most acute, who is most exposed, and how those risks intersect with existing health disparities and built environment conditions. Incorporating these findings directly into the chapter demonstrates compliance with RCW 36.70A.070(9) by grounding climate policies in locally specific risk, vulnerability, and health data, and by addressing environmental justice considerations as required under state law.

The following summarizes changes to the Climate and Environment chapter from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- Added section on Tree Canopy, recognizing it as one of the most effective and visible climate resilience strategies and explicitly tying chapter implementation to the City's Urban Forestry Management Plan.
- Updated Health Impact Assessment (HIA) Index Map caption to better explain what the map shows and how to interpret it.
- Added policy about the Columbia River, its importance to Vancouver and the City's role in preserving and enhancing it.
- Added content about recent City's positions and regulatory actions limiting fossil fuel infrastructure and encouraging renewable fuel sources.
- Added section on the City's Critical Areas Ordinance and Shoreline Master Program, outlining how these provide the regulatory foundation for protecting environmental resources, habitat and shorelines consistent with state guidelines.
- Refined information on community feedback to ensure a comprehensive summary.
- Added language on removing and reducing use of invasive specifies to Policy 103 Pollinator Habitat.
- Updated language in Policy 29 Climate Resilient Spaces and Policy 72 Climate Resilient Development to improve differentiation and clarity.
- Clarifications in response to Department of Commerce feedback.
- Added note about habitat priority areas to the chapter narrative based on feedback from Washington Department of Fish and Wildlife (WDFW)

Parks, Recreation and Cultural Services

This chapter supports the Capital Facilities element, a mandatory component of the Comprehensive Plan under RCW 36.70A.070(3). The Growth Management Act requires cities to plan for adequate public facilities, including parks, recreation facilities, trails, and open space, to serve anticipated

growth over the 20-year planning period. This includes establishing level-of-service standards, identifying facility needs, and demonstrating that planned development can be supported within projected funding capacities. Coordination is also required between parks planning, land use planning, and development regulations to ensure that park acquisition and development keep pace with population growth and changing community needs. The Parks, Recreation and Cultural Services chapter fulfills this role by translating the adopted Vancouver Parks, Recreation and Cultural Services Comprehensive Plan into land use–relevant policy direction and aligning parks planning with the Growth Concept, zoning framework, and capital facilities planning.

The Parks, Recreation and Cultural Services chapter establishes parks, trails, natural areas, and cultural spaces as essential infrastructure that supports community health, climate resilience, equity, and quality of life as Vancouver grows. Technical analysis confirms that while Vancouver has a diverse and valued park system, existing access and level-of-service gaps persist—particularly in historically underserved neighborhoods and areas experiencing rapid growth. Rather than focusing solely on park acreage, the chapter advances a more holistic approach to parks planning that integrates access, quality, equity, connectivity, and climate resilience. Policies emphasize expanding park access within a 10-minute walk, improving the condition and functionality of existing parks, and diversifying park types to meet the needs of a denser, more urban city.

The following summarizes changes to the Parks, Recreation and Cultural Services chapter from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- Elevated the role of arts and culture in meeting the goals of the chapter and highlighted connections to the goals and policies in the Community Experience chapter.
- Called out the City's Cultural Access Program that provides a dedicated funding source to expand access to arts and culture across the community.

Transportation and Mobility

This chapter is required and must support anticipated 20-year growth and associated land use plans. It must include provisions for concurrency, level of service, and regional coordination. Also required is an inventory of existing and planned transportation facilities, level-of-service standards- including integration of a new Multimodal Level of Service standard (MMLOS)- and a financing plan to fund system improvements.

The chapter establishes a shift from an auto-centric system toward a people-focused, multimodal transportation network that prioritizes safety, accessibility, equity, and climate outcomes. The chapter relies heavily on the City’s 2024–2044 Transportation System Plan (TSP), which was adopted by City Council in January 2024 following extensive technical analysis and community engagement, and is incorporated by reference into the Comprehensive Plan. Rather than measuring success primarily through vehicle throughput or roadway capacity, the chapter advances a multimodal level-of-service (MMLOS) framework that evaluates how well the system serves people walking, biking, rolling, using small mobility devices, taking transit, driving, and moving freight, in alignment with new requirements. Policies emphasize building low-stress networks, completing sidewalks, adding and improving bike and small mobility facilities, improving transit reliability and frequency, and designing streets to safely accommodate all users.

Equity and safety are central themes. The chapter recognizes that a significant share of Vancouver households do not have access to a vehicle and rely on transit and active transportation to move around the community, and that historically underserved neighborhoods experience higher safety risks and infrastructure gaps than other areas of the City. Transportation investments are

intentionally coordinated with land use, housing, climate, and economic strategies to reduce vehicle miles traveled, lower greenhouse gas emissions, and improve access to jobs, essential services, and community amenities.

The chapter positions transportation planning as a coordinated, ongoing process that aligns the Comprehensive Plan with the TSP, six-year Transportation Improvement Program (TIP), Capital Facilities Plan (CFP), ADA Transition Plan, and regional transportation planning efforts.

The following summarizes changes to the Transportation and Mobility chapter from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- Updated Community Streets policy to include community use of the right-of-way and establishment of temporary or permanent pedestrian-only throughfares.
- Updated section on ADA Transition Plan to include language on how this advances City values related to equal access to information, facilities, programs and civic processes and full participation in community life.
- Added Level of Service standards for state highways per state requirements.
- Added Multimodal Level of Service (MMLOS) standards for transit per state requirements.
- Added information from recently completed Multimodal Evaluation and Active Trip Potential analysis and added memo to appendices.
- Required Americans with Disabilities Act Transition Plan added to Plan appendices and referenced in the narrative.

Public Facilities and Services

This chapter is required and must plan for adequate public facilities and services—including water, sewer, stormwater, transportation, parks, fire, police, schools, libraries, and general government facilities—to serve anticipated growth over the 20-year planning period. The chapter must demonstrate that planned development is supported by sufficient infrastructure, consistent with adopted levels of service, concurrency requirements, and funding capacities. It must include an inventory of existing public facilities, a forecast of future needs based on population and employment growth, adopted level-of-service standards, and a capital facilities plan identifying how necessary improvements will be financed. The chapter must also ensure that land use decisions remain consistent with available infrastructure funding and service capacity.

This chapter establishes public infrastructure and services as essential systems that support health, safety, equity, climate resilience, and quality of life as Vancouver grows. Technical analysis confirms that continued population and employment growth will place increasing demands on utilities, transportation systems, emergency services, schools, and community facilities, requiring sustained and strategic investment over the planning horizon. Rather than focusing solely on expansion, the chapter emphasizes maintaining, modernizing, and equitably upgrading existing infrastructure while directing new investment to areas experiencing growth and the impacts of historic underinvestment. Policies prioritize cost-effective, climate-resilient infrastructure that supports compact development patterns, reduces long-term maintenance burdens, and improves system reliability.

Equity is a central theme of the chapter. The chapter recognizes that access to high-quality public facilities and services has not been evenly distributed across the city and commits to prioritizing investments in underserved neighborhoods. The chapter also reinforces the need to upgrade aging City facilities to meet ADA standards, improve seismic resilience, and ensure that public spaces and services are accessible to people of all ages and abilities.

The chapter positions infrastructure planning as a coordinated, ongoing process that links the Comprehensive Plan to functional plans, the Capital Improvement Program (CIP), the Capital Facilities Plan (CFP) and annual budgeting processes. Policies are designed to guide long-term investment decisions, interagency coordination, and transparent prioritization over the life of the plan.

The following summarizes changes to the Public Facilities and Services chapter from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- Updated tables to reflect most recent project lists and cost estimates.
- Added policy on Strategic Use of Excess Right of Way to ensure vacation requests are first reviewed for opportunities to add trees/urban canopy, native plants and/or nature spaces.
- Added section on connecting public facilities and infrastructure investments to goals of the Community Experience chapter and emphasizing the opportunity to build community by integrating arts and culture into projects and celebrating completed projects through events and/or programs.
- Added most recent school enrollment numbers (school year 2024) to the enrollment projection table.
- Added language connecting project costs and revenues to ability to serve growth.

Annexation

This chapter is not required, but annexation is governed by state law and shaped by the Growth Management Act (GMA), which envisions cities as the primary provider of urban services, and envisions cities annexing Urban Growth Areas (UGAs) over time. State law (RCW 35A.14) establishes multiple annexation methods, including property owner petition, election-based annexation, annexation of unincorporated islands, interlocal agreement annexation, and municipal-purpose annexation. Each method carries specific procedural and approval requirements. Countywide Planning Policies (CPPs) further guide annexation sequencing, coordination between cities and counties, and the transition of urban services.

This chapter establishes annexation as the primary mechanism for transitioning urbanized areas within the Vancouver Urban Growth Area into the City in a coordinated, orderly, and fiscally responsible manner. Vancouver's UGA is the largest in the state by population, with approximately 170,000 residents, and full annexation would make Vancouver the second largest city in Washington. The scale and level of existing development within the VUGA create both opportunity and constraint. Annexation offers the opportunity to align governance, land use regulation, infrastructure planning, and service delivery across a unified urban area. At the same time, many portions of the VUGA consist of residential neighborhoods with infrastructure that does not yet meet urban standards, creating significant fiscal and capital investment challenges.

The Annexation chapter is written to ensure consistency with these statutory and regional frameworks, while maintaining internal consistency with the Land Use, Public Facilities and Services, Transportation, and Housing elements to ensure that annexation supports planned growth patterns and adopted levels of service. The chapter does not propose a timeline of where or when annexation might occur, instead establishing guidance and evaluation criteria to inform future annexation decisions as opportunities arise.

The following summarizes changes to the Annexation chapter from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- Added updated map with City and Vancouver Urban Growth Area (VUGA) boundaries.

- Added language in the Adapting to Changing Conditions section focused on the impacts of potential future annexation on currently unincorporated areas.
- Added language clarifying that levels of service are typically lower in the unincorporated urban areas than inside cities, and why.
- Added demographic information for the VUGA.
- Added language related to increasing costs to upgrade substandard infrastructure and facilities located in the VUGA.
- Updated Goal AN-1 to emphasize the need for sustained coordination between the City and Clark County, including likely pre-annexation adoption of City standards and regulations for development within the VUGA.
- Added language on exploring regional service models to consistently and efficiently provide needed services.
- Updated map showing City of Vancouver and Vancouver Urban Growth Area (VUGA) boundaries to include major street labels and improve legibility.

Appendix

The Appendix includes related plans and policies, as well as supporting documents. Related plans and policies provide background information and policy directives that inform and support Comprehensive Plan analyses, goals, policies, and implementation steps. Some of the plans are adopted by reference to fulfill statutory requirements of Comprehensive Planning under the Growth Management Act. Supporting documents include the Vision and Goals Framework, Equity Framework and Analysis, Housing Needs and Land Capacity Analysis, Climate Vulnerability Assessment, Health Impact Assessment, engagement summaries, and more.

The following summarizes changes to the Appendix from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- Added overall, Draft EIS, and Phase 3 engagement summaries.
- Added ADA Transition Plan to appendices per state requirements.
- Added Transit Oriented Development memo to comply with state requirements from HB 1491.

Updated Zoning Code - Text

Title 20 of the Vancouver Municipal Code (VMC), called the Land Use and Development Code or Zoning Code, serves as the primary regulatory vehicle to implement the City's Comprehensive Plan, and by reference, the requirements of the Washington State Growth Management Act (GMA).

The proposed Updated Zoning Code has 10 base zoning districts nested under four Comprehensive Plan designations (Figure 3). The base zoning districts establish minimum residential density and maximum height requirements to support efficient use of land, protect agricultural and natural areas outside of Urban Growth Areas from development, and add more housing to meet the needs of the community. The base zoning districts also establish allowed building types and allowed uses. Some areas also have an overlay. There are also additional development standards, such as parking and tree conservation, that are proposed to be updated.

For additional details and recent past discussions on the draft zoning code, see City Council materials from January 26, 2026, February 23, 2026, April 13, 2026, and April 27, 2026.

Base Zoning Districts (proposed VMC 20.410)

The proposed Updated Zoning Code has 10 base zoning districts (Table 1), while the existing zoning code has 17 zoning districts. The proposed base districts contain minimum density requirements, maximum height, permitted building types and permitted uses. Every parcel within the city will have a base zoning district designation.

The Manufactured Home Park district applies only to existing manufactured home park developments, to support housing affordability and anti-displacement goals. The Parks and Natural Areas districts apply to existing publicly-owned parks and natural areas, supporting goals around access to green space and community health and wellbeing. The other seven other districts allow a range of uses and development intensities. The Industrial/Employment and Heavy Industrial districts are intended to support employment uses and do not allow housing, ensuring adequate land for future jobs and broader jobs-housing balance over time. Low-Scale Neighborhood, Medium-Scale Neighborhood, Mixed-Use Neighborhood, Regional Activity Center and Institutional/Campus districts all allow a mix of housing and commercial uses, at varying ranges, intensities and scales, to facilitate the development of connected and accessible neighborhoods over time. Minimum housing densities support efficient use of limited land supplies, and maximum heights limit scale and intensity of development.

Table 1. Proposed new zoning districts with descriptions of allowed uses, minimum residential density requirements, and maximum height requirements.

District	**Description**	**Minimum Density (units/acre)**	**Maximum Height**
Natural Areas	Includes lands currently zoned for greenways and natural areas.	N/A	N/A
Parks	Lands currently zoned as public community and neighborhood parks.	N/A	N/A
Manufactured Home	Applied to existing manufactured home parks to retain long-term affordability and prevent displacement of existing residents; no other uses allowed unless ongoing use as manufactured home parks demonstrably unfeasible, or if the park is preserved as permanently affordable housing.	None	45 feet
Low-Scale Neighborhood	Allows lower scale, middle housing types and a limited range of neighborhood commercial uses.	8	45 feet, 3 above-grade floors

Medium-Scale Neighborhood	Allows a broad range of housing types and more neighborhood commercial uses.	16	75 feet
Mixed-Use Neighborhood	Allows a broad range of housing, commercial, and civic/institutional use types.	32	110 feet
Regional Activity Center	Allows for a range of commercial, employment, civic and entertainment uses and amenities; facilitates dense housing and mixed-use buildings. Intended to provide activated public spaces that draw people from around the community.	64	None
Institutional / Campus	Includes lands that support academic, civic and medical buildings; a broad range of commercial uses; dense housing types, large campus employment and phased master-planned developments.	None	None
Industrial / Employment	Includes lands with large-scale, single-tenant industrial, warehouse and flex space buildings, and smaller, multi-tenant industrial buildings. No maximum building heights and no new residential uses allowed.	N/A	150 feet
Heavy Industrial	Includes lands that are currently zoned for heavy industrial uses, such as manufacturing and production. No new housing allowed.	N/A	None

Minimum Density (proposed VMC 20.180)

Redevelopment in Low-Scale Neighborhood will not need to meet minimum density—only newly created lots will. For new and redevelopment in Medium-Scale Neighborhoods, minimum density will need to be met except where there are 6 or fewer existing dwelling units that are demolished and will be developed (building permit submitted) with the same number of dwelling units or more within 3 years of demolition, with the potential for a 1-year extension in certain cases.

The proposed Updated Code applies a ratio for purposes of calculating density that is different than

total unit calculations (Table 1). This is intended to incentivize family-sized units and not artificially drive development toward studio and one-bedroom units in order to comply with minimum density requirements.

Table 2. Density Values by Unit Type for Minimum Density Calculations

Unit Type	**Density Value**
Studio / 1 bedroom	1
2 bedrooms	1.25
3+ bedrooms	1.5

While density will not be limited *directly* through the zoning code, it will still be limited indirectly through:

- Site constraints (such as land size, slopes, critical areas, utility easements/transmission lines, etc.),
- Building code requirements (fire, safety, ADA, etc.), and
- Other regulations in the zoning code (maximum building height, required setbacks, maximum impervious area, etc.).

Buffers Between Zoning Districts (proposed VMC 20.410.060)

The proposed Updated Code includes landscape and setback requirements between properties with different zoning when the developing property is considered a higher intensity zoning than the adjacent property. Height reductions, often called step backs, are required within a certain distance of the property line shared with the lower-intensity zoned property. Buffer requirements for project sites abutting properties zoned Manufactured Home, Low-scale Neighborhood, or Medium-Scale Neighborhood are shown below in Table 3. The proposed updated code also includes buffers for Industrial/Employment and Heavy Industrial properties when adjacent to Mixed-use Neighborhood, Regional activity Center, or Institutional / Campus properties. The proposed buffers respond to City Council direction, community feedback, and best planning practices that support the need for thoughtful transitions between different development patterns.

Table 3. Proposed buffers for project sites adjacent to properties zoned Manufactured Home, Low-Scale Neighborhood, and Medium-Scale Neighborhood.

Project Site	**Manufactured**	**Low-Scale**	**Medium-Scale**

	Home		
Manufactured Home	None	None	None
Low-Scale Neighborhood	General landscaping	None	None
Medium-Scale Neighborhood	10’ setback 6’ screen planting 10’-20’: 35’ max height	3’ screen planting	None
Mixed-use Neighborhood	10’ setback 6’ wall planting 10’-20’: 35’ max height	15’ setback 6’ screen planting 15’-20’: 45’ max height	10’ setback 3’ screen planting 10’-15’: 75’ max height
Regional Activity Center	10’ setback 6’ wall planting 10’-20’: 35’ max height	25’ setback 6’ screen planting 25’-30’: 55’ max height	15’ setback 6’ wall planting 15’-20’: 75’ max height
Institutional/ Campus	10’ setback 6’ wall planting 10’-20’: 35’ max height	25’ setback 6’ wall planting 25’-30’: 55’ max height	15’ setback 6’ wall planting 15’-20’: 75’ max height
Industrial/ Employment	25’ setback 6’ screen planting 25’-30’: 35’ max height	35’ setback 6’ berm + planting 35’-40’: 45’ max height	20’ setback 6’ wall planting 20’-30’: 75’ max height

Heavy Industrial	25’ setback 6’ screen planting 25’-30’: 35’ max height	45’ setback 6’ berm + planting 45’-50’: 45’ max height	45’ setback 6’ berm + planting 45’-50’: 45’ max height

Building Types (proposed VMC 20.420)

The base zoning district specifies the building types that are allowed within that district given the intensity and scale of development appropriate for that area. Each building type includes regulations for lot coverage, frontage requirements, building length and parking placement, ensuring that structures are positioned to enhance the public realm. These placement requirements include build-to lines that define how close buildings must be to the street, promoting a strong street presence, as well as guidelines for the location of parking to minimize conflict points. Pedestrian and vehicle access will also be regulated to ensure safe, convenient, and accessible routes to and from the site. These standards will ensure that buildings are appropriately scaled for their context.

Use Requirements (proposed VMC 20.160 and VMC 20.430)

Permitted uses will be associated with each district. Similar to the existing code, the zoning district determines if a use is permitted, conditional or prohibited in the district. Within each base district, uses will be categorized as primary uses, accessory uses or temporary uses. A primary use refers to the principal activity or purpose carried out within the main building or lot. An accessory use is subordinate to the primary use. A temporary use is one that is not permitted outright but is allowed due to temporary, seasonal or the transient nature of the use.

Overlay Districts (proposed VMC 20.500)

Overlay districts recognize that some areas are uniquely important for meeting the City’s policy goals and reducing location-specific impacts. The below list summarizes proposed new overlays, existing overlays that will continue, and existing overlays that are no longer needed to achieve City policy objectives.

The following overlays are proposed new overlays:

- Active Ground Floor Use Required
    - This overlay replaces existing requirements for active ground floor uses in commercial and mixed use zones, which have been a significant barrier to housing production specifically. It significantly reduces the areas where active ground floor uses are required and expands the list of uses that meet this requirement.
- Active Ground Floor Use Ready
    - This overlay requires taller floor to ceiling heights and greater transparency on new ground floor residential uses to make it easier to convert to active commercial uses in the future. This is intended to advance connected and accessible neighborhood form in areas that currently lack services but show little to no market viability for new commercial space.
- Station Areas

    - This overlay eliminates height limits regardless of base district and requires the applicant to demonstrate that any surface parking can be redeveloped in the future. It applies to properties that are within or partially within a quarter-mile radius of all current and future bus rapid transit (BRT) and light rail transit (LRT) stations and complies with the non-affordability related requirements of HB 1491.
- Industrial Holding
    - This overlay applies Heavy Industrial (HI) development standards to Columbia Business Center, until such time as the City and property owners agree to remove the Industrial Holding overlay and allow for development under new Regional Activity Center (RAC) base zone.

The following are existing overlays that are proposed to continue:

- Downtown Overlay
    - Includes downtown specific requirements, including recently updated Downtown Design Guidelines. These Downtown Design Guidelines were previously reviewed by City Council on April 28, 2025 and were recommended for approval by the Planning Commission on July 8, 2025.
- Noise Impact Overlay District
    - Requires additional sound insulation for residential development in areas impacted by unusually high levels of noise due to proximity to aircraft flight paths, railroads and freeways.
- Airport Overlay District
    - Complies with Federal Aviation Administration (FAA) height restrictions related to airport operations.
- Heritage Overlay Districts
    - Currently applies to Main Street generally south of 11th Street and to the Academy site at Evergreen and C Street, and applies standards related to the preservation of buildings listed on the local, state or national lists of historic structures. A third historic overlay is proposed to be added to the Historic Reserve (City and National Parks Service owned lands) to codify existing protections in the new code.

The following overlays are proposed to be removed: Evergreen and Grand Overlay District, Fourth Plain Overlay District, Hough Neighborhood Overlay District, Office Development Overlay District, Surface Mining Overlay District, Transit Overlay District, and the Vision Overlay District.

Additional Development Standards

The below summarizes some of the additional proposed code changes.

Parking Requirements (proposed VMC 20.450.045)

Currently, parking is regulated under Vancouver Municipal Code (VMC) section 20.945. Tables 20.945.070-1 and -2 specify the use types and minimum standards associated with each use. It is well documented that off-street parking requirements tend to drive up the cost of development overall, particularly housing costs, and result in inefficient use of land. In alignment with best practices, the new code does not include minimum or maximum parking requirements, and instead relies on development to determine how much off-street parking is needed to serve intended users.

Some larger uses - like performing arts centers or sports facilities - would still be required to provide off-street parking based on the results of a parking study. The new code will include regulations for parking stall sizes, maneuvering areas, landscaping and lighting that are similar to current standards.

The proposed code includes requirements for a minimum number of short- and long-term bicycle parking spaces based on use for new development or full redevelopment of properties, consistent with policy direction in the City's 2024-2044 Transportation System Plan. Although the existing code has standards for bicycle parking when voluntarily provided, the proposed code is different in that it requires bicycle parking in addition to establishing standards for what that parking looks like. In the proposed code, bicycle parking would not be required for Residential Uses when there are 6 units or less on parent parcel to reduce barriers for the creation of middle housing options. Similarly, a 50% reduction would be allowed when at least half of the dwelling units in a project are affordable to people making 100% of the area median income (AMI) or below to reduce barriers to creating affordable housing.

By-Right Development

The proposed code aligns State Environmental Policy Act (SEPA) exemption thresholds with a Type I administrative review process. This applies to multi-family residential projects of 200 units or less and commercial or office projects of 30,000 square feet or less.

Landscaping and Tree Preservation (proposed VMC 20.450.035)

The proposed code proposes clearer standards and increases preservation requirements for onsite trees that are in fair and good condition and are 12-inch diameter at breast height (DBH) or larger. It specifies that at least 33% of these trees will need to be preserved, while continuing to account for site-specific conditions (e.g., terrain challenges) and right-of-way improvements. The new code also proposes increases in the frequency and size of landscape islands in parking lots to better mitigate heat and manage stormwater. With a changing climate, there is also an increased need for automated irrigation systems to keep trees and landscaping alive and healthy, so the draft code proposes to require these systems for new development.

Non-conformities (VMC 20.190)

The proposed Updated Zoning Code designations are expected to create legally nonconforming properties due to changes in zoning districts and development standards. Under the current code, nonconforming uses are not allowed to expand their existing footprint, which limits how older structures and uses can evolve over time. The new code proposes allowing legally established nonconforming structures and uses to continue and potentially expand, offering more flexibility than the existing rules. Routine repairs and maintenance for nonconforming structures are already permitted and proposed new regulations continue this, including any work required by the Building Official or Fire Marshal. If a nonconforming structure is damaged by a catastrophic event, proposed regulations will still allow it to be rebuilt..

Development Notices

Currently, the City relies heavily on mailed notices to inform nearby residents and property owners about proposed development at a specific site. The new code will continue to include mailed notices while also making updates to comply with state law, support more housing, and provide notice to a wider audience. There will continue to be mailed notices and associated comment periods for subdivisions and developments of more than 200 dwelling units. The mailing radius is proposed to be reduced from 500 feet to 300 feet. In addition to mailed notices, the new code will require a large, posted sign for any development over 6 units. This is a change from current practice where only

projects requiring a public hearing have signs posted, representing a large increase in the number of projects that will be posted and the size of the signs. This change is intended to inform more community members about proposed development, as many may not live near a proposed development but still visit, work, or attend school in the area. The current process does not require any mailed or signage notice for 1–19-unit projects. The increased frequency and size of site posting reflects recent conversations with the City's community engagement team, best practices, and feedback from neighbors across many projects that mailed notice is not an effective way to reach them.

Pre-applications meetings will also be required for developments of 7-19 units. Currently these meetings are required only for projects of 20 or more units, or subdivisions. Community members may opt in to be notified of pre-application meetings and may attend and ask questions at the meeting as time allows. City-recognized neighborhood association leadership will automatically be notified of pre-application meetings for projects within their neighborhood boundaries, consistent with our current practice.

Summary of Changes to Draft Code Since the First Draft (February 19, 2026)

The final draft of the updated Vancouver Municipal Code Title 20 Land Use and Development Code was published on May 5, 2026.

The following summarizes changes to the Code from the first draft (February 19, 2026) to the final draft (May 5, 2026):

- Refinement and clarifications to the Manufactured Home Park district
    - Clarified and simplified definitions to manufactured/modular housing
    - Updated purpose and character description to clarify that repair, replacement and expansion of manufactured housing is allowed in the MH district.
    - Clarification that accessory structures/uses supporting the primary manufactured home park use are allowed, including community and recreational facilities and childcare centers.
    - Allowance of additional building types in the MH District if permanently affordable at 60% AMI or below.
- Clarification that modular and manufactured homes are allowed in all base districts that allow household living provided they comply with development standards.
- Reduction in bicycle/small mobility long-term parking requirements for multi-family housing. February 19 draft required 1 space per unit, updated draft requires 0.75 spaces per unit.
    - Also added language to include small mobility.
- Reduction in ground floor transparency requirements and weather protection for many building types based on stakeholder feedback and energy code requirements.
- Clarified definition of ground to ceiling height to specify that is top of finished floor to bottom of ceiling structure.
- Allowance for increased setbacks for industrial buildings in employment and industrial base districts.
- Refinements to the buffer table and diagram for clarity and readability.
- Childcare allowed everywhere except heavy manufacturing district, City regulations not more restrictive than state.
- Updated annexation section to reflect new base districts and remove outdated terms and language.
- Updated master plan requirements for large sites.
- Updated development agreement section includes public benefit requirements and term expectations.

- Officers of City-recognized neighborhood associations automatically notified of pre-application conferences for projects in their boundaries.
- Updated fee schedule
- Updated maps
- Timeline for exemption from minimum density requirements in the Medium Scale Neighborhood district: extended from one year to three and allows for a one-year additional extension with the Planning Officials approval if the applicant can document the delay is associated with insurance claims, estate resolution or other legal processes.
- Ground Floor Active Uses: exemption to use requirements for emergency service uses.
- Site posting requirements: exemption added for sites that do not have frontage on a street / are not visible from the public right-of-way.
- Addressed a few remaining code section numbering issues for consistency.
- Added updated review fees.
- Added additional language to Industrial Holding overlay to clarify that all existing uses can continue and expand until such time as Industrial Holding overlay is removed.
- Updated allowed uses in Heavy Industrial zone to allow employment services and basic utilities.
- Clarified use allowances in Heavy Industrial code to make it clear that bulk storage, cargo hauling, transloading, laydown yards, assembly of large equipment and stockpiles of dirt/soil/fill materials are allowed uses.
- Replaced references to “landscape plans” with “planting plans” instead to avoid confusion.
- Clarification on landscaping maintenance bonds when property ownership transfers.
- Updated illustrative photos to more fully reflect the range of development types allowed in the Medium Scale Neighborhood district, consistent with what is currently included in the Plan document as well as public engagement materials.
- The Allowable Building Types Table per Zoning District (VMC 20.420.040-1) has been updated to show additional building types allowed if they are at or below 60% AMI in the Manufactured Home Development District.
- The Academy no build figure in VMC 20.550 has been revised to match the updated style and color of the development code.
- Based on stakeholder feedback, staff clarified the vegetative maintenance bond and when it will be required either prior to final plat recording or occupancy depending on the project and associated process.

Review Criteria and Findings

Comprehensive Plan and associated zoning map amendments are evaluated under VMC 20.285.050 of current city code:

20.285.050 Approval Criteria – Comprehensive Plan and Concurrent Zoning Map Amendments.

A. Overall proposed map amendments reviewed under this chapter shall be approved only if demonstrated by the proponent to be in the public interest, as based on a review of all applicable principles from the following:

1. How the proposal is more consistent than the existing designation with applicable policies of the Vancouver strategic plan and comprehensive plan.
2. How the proposal is more consistent than the existing designation with each of the following objectives as applicable:
    a. Encourage more intensive development to locate in major

urban centers and corridors, particularly downtown Vancouver. Encourage development of distinct neighborhoods served by commercial nodes, and discourage urban sprawl and strip commercial development;
   b. Provide development of uses which are functionally integrated with surrounding areas and neighborhoods in terms of local shopping, employment, recreational or other opportunities;
   c. Provide development which is compatible and integrated with surrounding uses in terms of scale, orientation, pedestrian enhancements, and landscaping;
   d. Conserve or enhance significant natural or historical features;
   e. Provide adequate provision of transportation, water, sewer, and other public services;
   f. Provide significant family wage employment opportunities and broadening of the Vancouver economy;
   g. Provide for the formation and enhancement of neighborhoods and communities; and
   h. Provide affordable or below-market-rate housing opportunities.
3. Scope of review. Review and evaluation of proposed comprehensive plan or zoning map changes shall consider both the likely and possible future use of the site and associated impacts.
4. Cumulative Impacts. The review of individual comprehensive plan map or policy amendments, other than exceptions noted in VMC 20.285.040, shall also consider the cumulative transportation, land supply, and environmental impacts of other plan amendments proposed within the same annual cycle.

Comprehensive Plan and Zoning code text designations changes are reviewed under VMC 20.285.070 of current city code:

20.285.070 Approval Criteria – Comprehensive Plan or Zoning Code Text Amendments.

A. Text amendments to the comprehensive plan or VMC Title 20 zoning standards shall demonstrate the following:
   a. The proposal is consistent with applicable policies of the Vancouver strategic plan and comprehensive plan; and
   b. The proposal is necessary to further the public interest based on present needs and conditions.

Staff finds the proposed new Comprehensive Plan and zoning code maps and text to be consistent with the current Vancouver Strategic Plan and Comprehensive Plan and the public interest.

The proposed Comprehensive Plan and zoning map designations, along with the proposed zoning standards, provide sufficient capacity to meet state legal requirements and accommodate more than 38,000 new housing units by 2045, at a range of income brackets, half of them at below market levels. The new designations provide sufficient housing capacity to seriously address the ongoing

housing affordability and accessibility crisis in the City of Vancouver, which has multi-generational impacts throughout the existing Vancouver community, as well as to potential future residents. The new designations and related zoning standards also provide sufficient capacity for job growth needed for the increased population. The current designations would not meet these legal requirements and objectives.

The new designations and associated standards arguably better meet the balance of the locational and functional criteria under VMC 20.285.050.2a than the existing designations. The new designations better provide for development in centers, functionally integrated development, and economic development, with adequate provisions for natural area preservation and public facilities and services. The new designations will allow more intensive residential development which in some cases may raise compatibility concerns with immediately abutting properties, but in most cases these allowances are mandated by state law, and are mitigated by proposed new code provisions such as buffers between differing zoning districts. State law prohibits adopting more stringent development or design standards for middle housing than for single family housing. Based on the experience of other jurisdictions which have previously adopted middle housing allowances, and the projections of economic consultants on the Vancouver Comprehensive Plan update project team, replacement of existing homes in single family zones on standard sized lots with new denser housing is likely to be infrequent. New housing is more likely to be developed on vacant properties or oversized lots.

Staff finds that the proposed new Comprehensive Plan and zoning code map and text are more consistent with the City of Vancouver Strategic Plan than the current Plan, and that the proposed new Plan and code also better align with existing Comprehensive Plan goals and policies given changed circumstances since the last update. This is particularly the case when considering Strategic Plan focus areas of Housing and Human Needs, Economic Opportunity, Vibrant and Distinct Neighborhoods, Culture and Heritage, Safe and Prepared Community, Transportation and Mobility, and Climate and Natural Systems. It is also the case when considering existing Comprehensive Plan policies of the Community Development, Housing, Economic Development, Environment, and Public Facilities and Services chapters.

For these reasons staff finds the proposed new Comprehensive Plan and zoning code map and text further the public interest. The proposed Plan and code provide for a simpler and more flexible policy and regulatory framework for property owners. There are fewer designations and more flexibility in the range of uses allowed in most but not all of the new zoning districts, requiring fewer future zone changes. A greater range of allowed densities enables but does not require affordable housing. Allowances for non-conforming uses have been liberalized. Zoning code development standards have been generally simplified, with more legible language.

Advantage(s)

1. The proposed Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Vancouver Municipal Code (VMC) Title 20 Land Use and Development Code balance a range of considerations, including state requirements for comprehensive planning, Council policy priorities, and community input received throughout the Comprehensive Plan update process.
2. The proposed plan, map, and code accommodate projected housing and employment needs through 2045, and addresses local affordability and attainability concerns.
3. The proposed plan, map, and code balance development with preservation of the natural environment.
4. The proposed plan, map, and code distribute growth around the City, providing for balanced growth that ensures impacts are not concentrated and that all areas of the City benefit from

future growth and investment.

Challenge(s)

The proposed Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Vancouver Municipal Code (VMC) Title 20 Land Use and Development Code represent significant change and may generate concerns among some community members, although this change will likely occur incrementally over the 20-year planning time-horizon.

Budget Impact

No additional budget impact is associated with this request.

Prior Council Review

The below list of dates reflects Council review of various Comprehensive Plan and code update components from April 2022 through the present. This list is also available on the Comprehensive Plan Update webpage.

- April 04, 2022: City Council Workshop: Comprehensive Plan Initiation and Scope Review
- December 19, 2022: City Council: Professional Services for the Comprehensive Plan and Title 20 Land Use Code Update

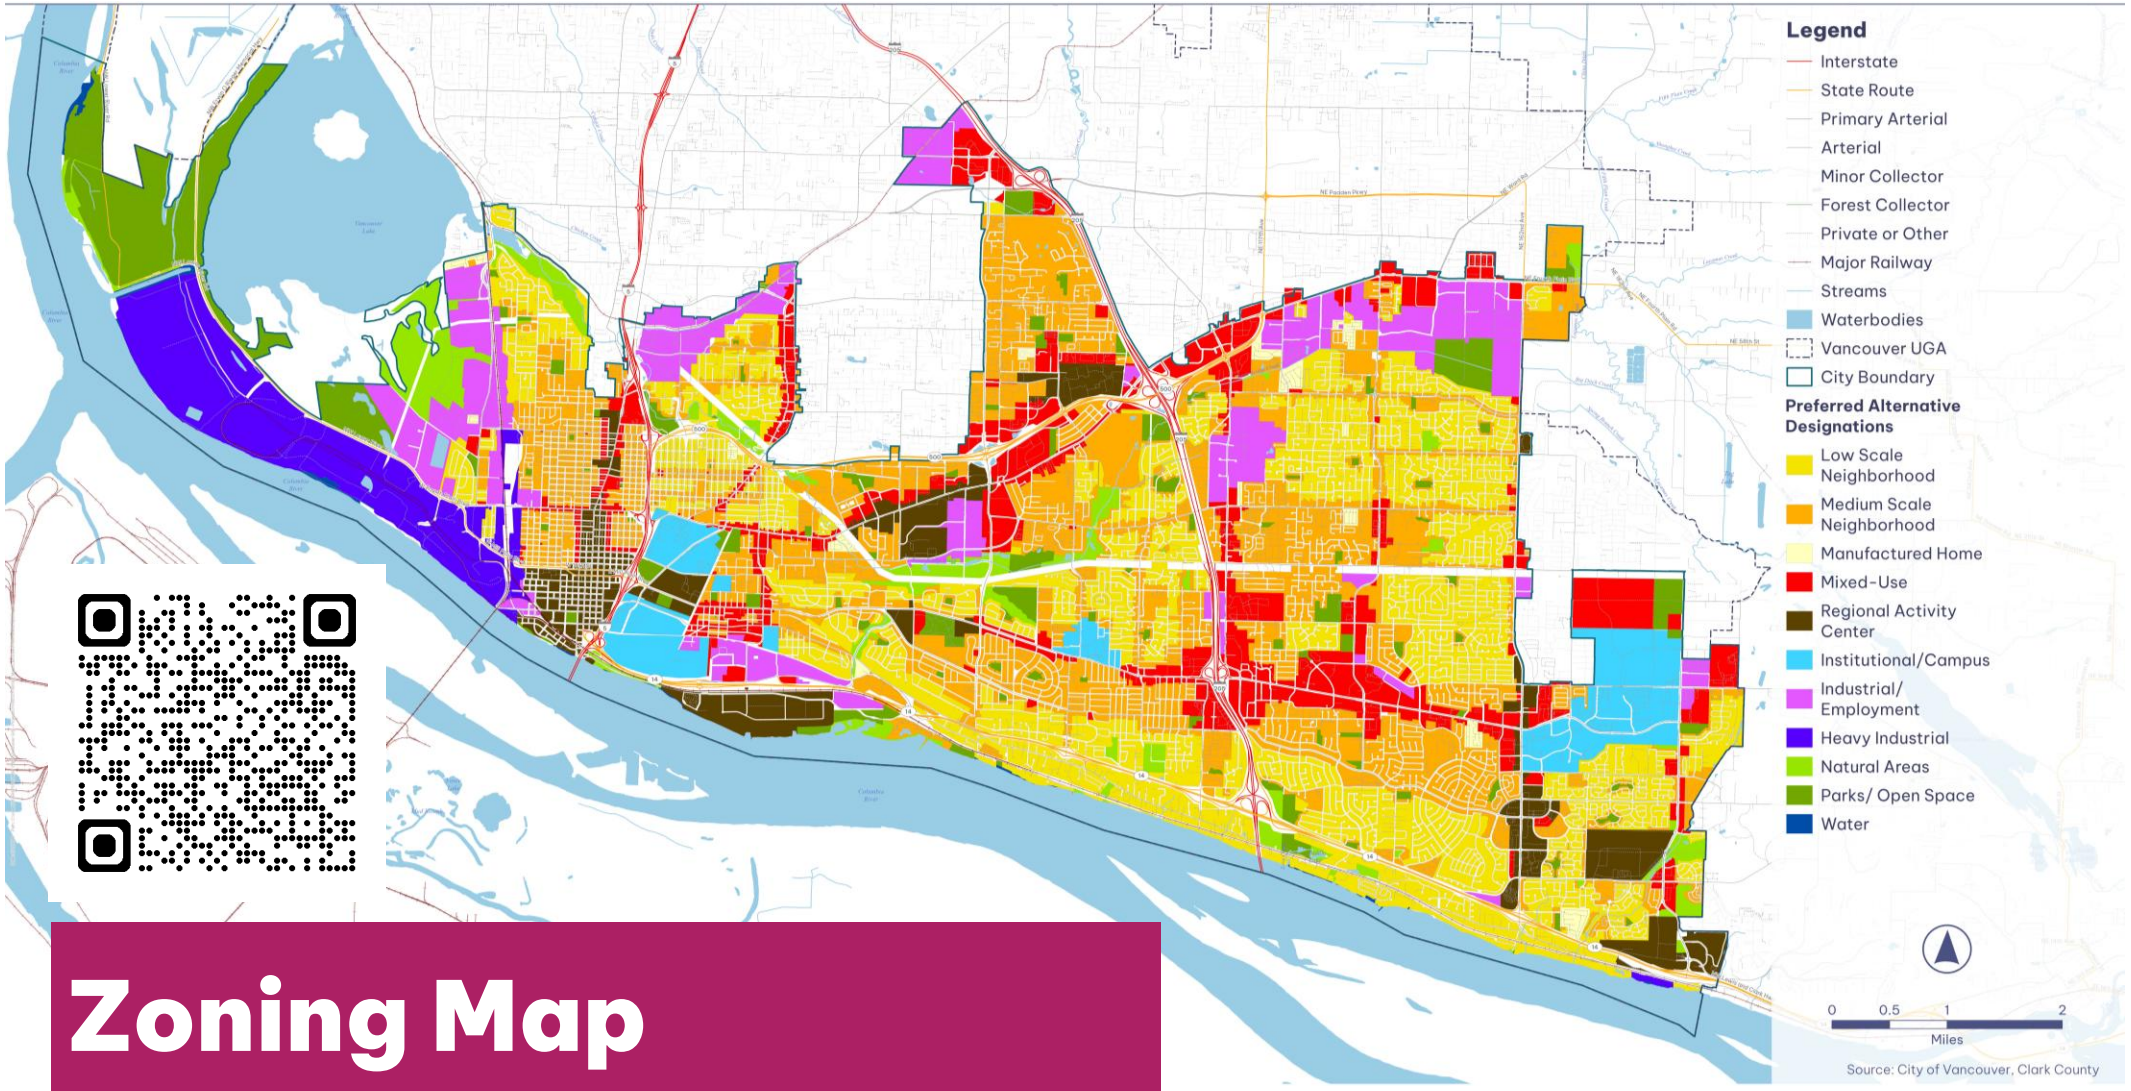
City Council Public Hearing | June 1, 2026



OUR VANCOUVER Comprehensive Plan

- A guide for the city's growth and development through 2045.
- Last updated in 2011
  - ➡ Updating now to manage growth through 2045, meet State requirements, and reflect local values
- 10 chapters, plus introduction and appendix

	2024	Growth	2045 Targets
Population	~200,000	+ 81,000	~281,000
Housing Units	~86,000	+ 38,000	~124,000
Jobs	~100,000	+ 43,200	~143,100

Vancouver is an equitable and prosperous community, which ensures that all residents, businesses and organizations benefit from the growth and advancement we make together.

Vancouver will be recognized for our quality of life, as evidenced by affordable housing in vibrant, safe and walkable neighborhoods, access to jobs and economic opportunity for all, and leading-edge efforts to address climate change.

Zoning Map

www.beheardvancouver.org/plan2045

Zoning Code

New Zoning Districts (10 total)

- ➡ Minimum density
- ➡ Maximum height
- ➡ Allowed building types
- ➡ Allowed uses

Additional Key Regulations

- ➡ Buffers between districts
- ➡ Tree conservation
- ➡ Blank wall, open space, and transparency requirements
- ➡ Minimum density exemptions
- ➡ No parking minimums
- ➡ Updated overlays

Zoning District	Minimum Density (units/acre)	Maximum Height
Manufactured Home	None	45 feet
Low-Scale	8	3 floors, 45 feet
Medium-Scale	16	75 feet
Mixed-Use	32	110 feet
Regional Activity Center	64	None
Institutional / Campus	None	None
Employment/ Industrial	N/A	150 feet
Heavy Industrial	N/A	None
Parks / Open Space	N/A	N/A, or 45 feet
Natural Areas	N/A	N/A, or 45 feet

No maximum density or minimum heights in any district.

Recommendation

Approve ordinance adopting the Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Vancouver Municipal Code Title 20 Land Use and Development Code.

Effective date: July 31, 2026

Post-adoption

- ➡ Implement, educate, facilitate, process, refine, fix, learn, adjust, adapt
- ➡ Changes expected to occur incrementally over the next 20 years.
- ➡ Minor updates to the Plan and Code usually happen each year.

Vancouver is an equitable and prosperous community, which ensures that all residents, businesses and organizations benefit from the growth and advancement we make together.

Vancouver will be recognized for our quality of life, as evidenced by affordable housing in vibrant, safe and walkable neighborhoods, access to jobs and economic opportunity for all, and leading-edge efforts to address climate change.

June 1, 2026 (Date of Public Hearing)

ORDINANCE NO. M- [Ordinance Number]

AN ORDINANCE updating and amending the City of Vancouver 2026-2045 Comprehensive Plan, called Our Vancouver, repealing and replacing the City of Vancouver Zoning Map, and repealing and replacing Title 20 Land Use and Development Code of the Vancouver Municipal Code, providing for severability and an effective date.

WHEREAS, pursuant to the Washington State Growth Management Act Chapter 36.70A RCW (GMA), specifically RCW 36.70a.040, the City of Vancouver is a jurisdiction that is required to formally adopt a comprehensive land use plan for managing urban growth and development under the framework defined in the GMA, guided by the land use planning goals set forth in RCW 36.70a.020, and first adopted as the Vancouver Comprehensive Plan under this framework in 1994; and

WHEREAS, pursuant to RCW 36.70a.130, the City of Vancouver is obligated to take legislative action to perform a periodic review of its existing Comprehensive Plan, associated policies, and implementing land use and development regulations on a recurring basis to ensure compliance with GMA requirements, with the current review cycle requiring final adoption on or before December 31, 2025, with approval of proposed changes by City Council anticipated to occur on or before June 30, 2026; and

WHEREAS, the last mandatory periodic update of the Vancouver Comprehensive Plan was in 2011, and the City's implementing land use regulations under Title 20 of the Vancouver Municipal Code (VMC) have not been comprehensively reviewed and updated since 2004; and

WHEREAS, on February 27, 2023, Council approved Resolution M-4210, confirming the Comprehensive Plan Update chartering process and decision-making framework; requiring a defined process to ensure that the overall policy design process is driven through co-creation with disproportionately impacted and historically marginalized populations; including a framework that provides details on how the City will engage entities on a variety of levels throughout the Comprehensive Plan update process, formalized within a detailed public participation plan; including a framework for overarching goals to inform the Comprehensive Plan and implementing development regulations; and updating the land use zoning map for the City to establish the types and scale of buildings allowed to develop in different locations and the uses permitted on land and buildings in the City, all constructed with input from a variety of community engagement and partnership efforts; and

WHEREAS, the proposed amended Comprehensive Plan, updated Zoning Map, and restated Title 20 Land Use and Development Code have been developed through a multi-year public participation program beginning in early 2023 involving the Vancouver community, the Planning Commission and City Council and many other organizations, agencies and partners to ensure public engagement in the development and amendment of the Comprehensive Plan and the implementing zoning map and development regulations, broad dissemination of proposals and alternatives, opportunity for written comments, public meetings after effective notice, provision for open discussion, communication programs, information services, and consideration of and response to public comments in accordance with RCW 36.70A.140 through three distinct phases: 1) Learning About Our Community/Visioning; 2) Developing Land Use Alternatives; and 3) Developing Goals, Policies, and Code resulting in more than 2,000 people directly engaged through over 200 meetings, events, workshops, and outreach activities, with more than

2,000 ideas and comments received and information shared through more than 65 Our Vancouver e-newsletters, 11 City e-newsletters, and 14 Office of Neighborhoods e-newsletters, 110 social media posts across four platforms, distributing flyers at more than 40 locations around the City, more than 200 direct emails, local news coverage, and three citywide hard copy newsletters mailed to every address in the City; and

WHEREAS, the Our Vancouver 2026-2045 Comprehensive Plan has been developed in regional coordination and consistency with Clark County and other local jurisdictions demonstrating sufficient land capacity to accommodate the formal 20-year employment and housing allocations made by Clark County for the City of Vancouver, including the number of housing units within the range of income bands required and adopting by reference existing Countywide Planning Policies, including amendments being considered by Clark County and local jurisdictions at the time of adoption of this ordinance; and

WHEREAS, in 2021 the Washington State Legislature passed HB 1220 amending the GMA to require all jurisdictions to plan for and accommodate pre-set numbers of housing units, including emergency shelters, affordable to pre-set ranges of income levels, and complete a racially disparate impacts analysis; and

WHEREAS in 2023 the Washington State Legislature passed HB 1110 amending the GMA to require certain cities, including Vancouver, to allow the development of "middle housing" in all predominantly single family residential zones, including to at a minimum allow up to four units per residential lot and up to six units per residential lot if within one-quarter mile walking distance of a major transit stop or if at least two units are affordable; and

WHEREAS, in 2023 the Washington State Legislature passed HB 1181 amending the GMA to require certain cities, including Vancouver, to include a new element in their

comprehensive plans focused on reducing greenhouse gas emissions and strengthening climate resilience; and

WHEREAS, in 2023 the Washington State Legislature passed HB 1337 amending the GMA to require certain cities, including Vancouver, to allow two Accessory Dwelling Units (ADUs) on all residential lots that allow single family homes within an urban growth area, with some limitations and additional policy requirements and providing for preemption of any conflicting provisions in local development regulations; and

WHEREAS, in 2025 the Washington State Legislature passed SB 5184 amending the GMA to impose limits on minimum residential parking requirements; and

WHEREAS, the City reviewed these and all other applicable adopted periodic review statutes for cities planning under the GMA passed subsequent to the City's last major update of the Comprehensive Plan in 2011 and incorporated and addressed all relevant periodic review provisions into the Our Vancouver 2026-2045 Comprehensive Plan; and

WHEREAS, the City prepared and published a Draft Environmental Impact Statement (EIS) in accordance with the State Environmental Policy Act (SEPA) on July 8, 2025, and received public comment during the Draft EIS comment period from July 8, 2025 through September 8, 2025 and issued a Final EIS on April 16, 2026 considering public input; and

WHEREAS, following duly advertised public workshops on September 15, November 11 and December 1, 2025, on December 15, 2025, Council approved Resolution No. M-4364 endorsing a Preferred Land Use Alternative Map based on a framework of the elements set forth in that Resolution; and

WHEREAS, on February 19, 2026, a first full draft of the proposed Our Vancouver 2026-2045 Comprehensive Plan and Vancouver Municipal Code Title 20 Land Use and

Development Code was published for the public to review and provide comment on, and on April 7, 2026 a second draft of the Comprehensive Plan and zoning code was published and reviewed by the City Council at their April 13, 2026 workshop, and on April 17, 2026 a third draft of the proposed Comprehensive Plan and zoning code was published and reviewed at the April 27, 2026 City Council workshop, and a fourth draft of the proposed Comprehensive Plan and zoning code was published on May 5, 2026; and

WHEREAS, pursuant to RCW 36.70A.106 and WAC 365-196-630, a 60-day advance notice of intent to adopt of the Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Title 20 Land Use and Development Code of the Vancouver Municipal Code proposed by this Ordinance was submitted to the State of Washington Department of Commerce on February 24, 2026, describing the proposed changes, including draft copies of the full materials, and soliciting agency comments; and

WHEREAS, following duly advertised public workshops on March 10 and April 14, 2026, and after public testimony and deliberation at a duly advertised public hearing on April 28, 2026, and considering public and agency comments and the cumulative impacts of the proposed Comprehensive Plan, zoning map, and development regulation amendments, the Planning Commission unanimously recommended approval of the Our Vancouver 2026-2045 Comprehensive Plan, updated City of Vancouver Zoning Map and updated Title 20 Land Use and Development Code of the Vancouver Municipal Code proposed through this Ordinance; and

WHEREAS, following duly advertised public workshops on March 16, April 13 and April 27, 2026 the City Council held a duly advertised first reading of this Ordinance on May 11, 2026, followed by a duly advertised second reading and public hearing of this Ordinance on June 1, 2026, and considering public and agency comments and the cumulative impacts of approving

the Our Vancouver 2026-2045 Comprehensive Plan, updated City of Vancouver Zoning Map, and updated Title 20 Land Use and Development Code of the Vancouver Municipal Code proposed through this Ordinance; and

WHEREAS, this Ordinance sets forth certain findings of fact and incorporates by reference the findings of fact and studies described in Staff Report _____ dated May __, 2026, demonstrating completion of the periodic update process required under RCW 36.70A.130; and

WHEREAS, this Ordinance concurrently adopts the Our Vancouver 2026-2045 Comprehensive Plan attached hereto as Exhibit A, the City of Vancouver Zoning Map as Exhibit B, and the implementing land use development regulations of Title 20 Land Use and Development Code of the Vancouver Municipal Code attached hereto as Exhibit C because the GMA requires internal consistency and timely adoption of land use and development regulations that appropriately implement the Comprehensive Plan, and thereby repeals and replaces the City's existing 2011-2030 Comprehensive Plan, existing zoning map and existing VMC Title 20 with the respective versions of the Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Vancouver Municipal Code Title 20 Land Use and Development Code proposed herein;

WHEREAS, the City Council finds the actions effected through this Ordinance are consistent with and satisfy the statutory requirements of the Growth Management Act and the Vancouver Municipal Code, and will promote the health, safety, and welfare of the general public;

NOW, THEREFORE, BE IT ORDAINED BY THE CITY OF VANCOUVER:

Section 1. Legislative Findings of Fact.

The foregoing recitals are hereby adopted as legislative findings of fact in support of adoption of this Ordinance.

Based on the analysis and findings contained in the staff report for the proposal, documents entered into the public hearing record, public testimony, and discussion at the public hearings regarding the proposals set forth in this Ordinance, the proposed amendments to the City's Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Vancouver Municipal Code Title 20 Land Use and Development Code and all referenced documents are found to be consistent with applicable Vancouver Comprehensive Plan policies and approval criteria, provisions of the Washington Growth Management Act, existing applicable provisions of the Vancouver Municipal Code, other applicable state and federal law, applicable provisions of the Countywide Planning Policies, and Washington Department of Commerce guidance, and are necessary to comply with state law and further the public interest based on present needs and future projected conditions.

Section 2. Adoption of Our Vancouver 2026-2045 Comprehensive Plan.

Upon the effective date established in this Ordinance, the Comprehensive Plan entitled "Our Vancouver 2026-2045 Comprehensive Plan" attached as Exhibit A to this Ordinance and incorporated in its entirety by reference is hereby adopted as the Growth Management Act comprehensive plan for the City of Vancouver in accordance with RCW 36.70A.070 and fulfilling the requirements of RCW 36.70A.130(5)(b). The Our Vancouver 2026-2045 Comprehensive Plan is a complete amendment and restatement of the City's existing Comprehensive Plan, as last updated on January 8, 2024, by Ordinance No. M-4441.

Section 3. Adoption of City of Vancouver Zoning Map

Upon the effective date established in this Ordinance, the City of Vancouver Zoning Map attached as Exhibit B to this Ordinance and incorporated in its entirety by reference is hereby adopted as Vancouver's Zoning Map implementing the Our Vancouver 2026-2045 Comprehensive Plan in accordance with RCW 36.70A.070. The Zoning Map adopted by this Ordinance is a complete map replacement, repealing the City's existing zoning map, as last updated on August 11, 2025, by Ordinance M-4510.

Section 4. Adoption of Amended and Restated Land Use and Development Code – (VMC Title 20).

Upon the effective date established in this Ordinance, Title 20 Land Use and Development Code of the Vancouver Municipal Code (VMC) attached as Exhibit C to this Ordinance and incorporated in its entirety by reference is hereby adopted as Vancouver's land use and development regulations implementing the Our Vancouver 2026-2045 Comprehensive Plan in accordance with the Growth Management Act. The VMC Title 20 Land Use and Development Code adopted by this Ordinance is a complete land use and development regulation code replacement, repealing the City's existing VMC Title 20 Land Use and Development Code, last updated on October 13, 2025, by Ordinance No. M-4517.

Section 5. Severability.

The provisions of this Ordinance are declared to be separate and severable. The invalidity of any clause, sentence, paragraph, subdivision, section, chapter, title, exhibit or other portion of this Ordinance, or the invalidity of the application thereof to any person or circumstance shall not affect the validity of the remainder of this Ordinance, or the validity of its application to other persons or circumstances.

Section 6. Adoption and Effective Date.

For purposes of RCW 36.70A.290, this Ordinance is adopted on the date of final passage noted below and the Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and VMC Title 20 Land Use and Development Code adopted herein become effective on Friday, July 31, 2026.

Section 7. Savings Clause.

Those portions of the existing Comprehensive Plan, zoning map, and Vancouver Municipal Code repealed by this Ordinance shall remain in full force and effect until the effective date set forth in this Ordinance.

Section 8. Submission of Adopted Plan and Code to the State of Washington.

Within ten days after adoption of this Ordinance, the City's Planning Director is hereby directed to send a copy of this Ordinance, with the adopted Our Vancouver 2026-2045 Comprehensive Plan, City of Vancouver Zoning Map, and Title 20 Land Use and Development Code of the Vancouver Municipal Code, to the Washington State Department of Commerce and fulfill all other applicable public notice and publication requirements.

DATE OF FINAL PASSAGE at a Regular Meeting of the Vancouver City Council:

_____.

SIGNED this _____ day of _____, 2026.

_____

Anne McEnerny-Ogle, Mayor

Attest:

_____

Lisa Brandl, Deputy City Clerk

Approved as to form:

_____

Nena Cook, City Attorney

SUMMARY

ORDINANCE NO. _____

AN ORDINANCE updating and amending the City of Vancouver 2026-2045 Comprehensive Plan, called Our Vancouver, repealing and replacing the City of Vancouver Zoning Map, and repealing and replacing Title 20 Land Use and Development Code of the Vancouver Municipal Code, providing for severability and an effective date.

The full text of this ordinance will be mailed upon request. Contact public records staff at (360) 487-8480, citypdr@cityofvancouver.us, or via Public Records Request -The City of Vancouver, WA.

Subject: OUR VANCOUVER Comprehensive Plan Update Final Environmental Impact Statement

Dear Community Members,

The City of Vancouver invites you to read the OUR VANCOUVER Comprehensive Plan Update State Environmental Policy Act (SEPA) Final Environmental Impact Statement (EIS). This document is a key part of the City's ongoing process to update its Comprehensive Plan and development regulations, which will establish a vision that guides our growth and development for the next 20 years, from 2026 to 2045.

The City is required by the Washington State Growth Management Act (Chapter 36.70A RCW) to adopt an updated comprehensive plan and changes to its land use development and zoning code. The proposed update will plan for growth of at least 38,129 new housing units and 43,198 new jobs by the year 2045. The proposal would update the City's current land use map, as well as rename and simplify its land use designations and associated zoning code.

This nonproject Final EIS is an informational document required by SEPA before the City can move forward with updates to the Comprehensive Plan. The Final EIS provides community members; local, state, and federal government agencies; and tribal governments with qualitative and quantitative information to consider in the decision-making process for the Comprehensive Plan Update.

This Final EIS presents the potential impacts and benefits of four future land use alternatives for the City as a whole:

- **No Action Alternative**, required by SEPA, assumes that the Comprehensive Plan Update and associated changes to the zoning code and development regulations would not be adopted. Future growth and development would occur in line with the current adopted City Comprehensive Plan and development regulations, as well as recent amendments to state law allowing new housing types in single-family zones, which will automatically take effect and override local regulations even if Vancouver does not act. The No Action Alternative would not meet the City's minimum 2045 targets for new housing units and jobs, nor would it comply with recent changes in state law affecting local land use planning.
- **Alternative 1** assumes the proposed Comprehensive Plan Update and associated changes to the zoning code and development regulations would be implemented, including new zoning districts that allow more dense housing, employment, and activity centers in more

areas across the City. Alternative 1 would allow for more dense, mixed-use development patterns than the No Action Alternative but in fewer areas than Alternative 2. Alternative 1 would exceed the City's minimum 2045 targets for new housing units and jobs.

- **Alternative 2**, like Alternative 1, assumes the proposed Comprehensive Plan Update and associated changes to the zoning code and development regulations would be implemented. Alternative 2 would allow for the highest density, intensity, and mix of uses of all the alternatives in a greater number of areas of the City. Alternative 2 would exceed the City's minimum 2045 targets for new housing units and jobs and would provide the highest capacity among the alternatives.
- **Preferred Alternative**, which combines elements of Alternatives 1 and 2, and assumes the proposed Comprehensive Plan Update and associated changes to the zoning code and development regulations would be implemented. The Preferred Alternative would allow for more dense, mixed-use development patterns compared to the No Action Alternative and would allow for similar development patterns to Alternatives 1 and 2. The Preferred Alternative would exceed the City's minimum 2045 targets for new housing units. The capacity for new housing units and jobs would be higher than the No Action Alternative and slightly lower than Alternatives 1 and 2.

The City published the Draft EIS on July 8, 2025, and invited comments through September 8, 2025. Since then, the City has used this input to develop a Preferred Alternative, analyzed its potential environmental impacts and benefits on the built and natural environment, and developed potential mitigation measures to address impacts, as presented in this Final EIS. The Final EIS also includes responses to comments on the Draft EIS. For more information about the OUR VANCOUVER Comprehensive Plan Update, please visit our website at: https://www.beheardvancouver.org/plan2045

If you have any questions, please contact Meredith Herbst, associate planner, at OurVancouver2045@cityofvancouver.us.

Thank you for your continued interest in Vancouver's future, and we look forward to continuing to work with you as the Comprehensive Plan Update proposal moves forward.

Sincerely,

Chad Eiken, AICP
Director, Community Development, City of Vancouver
SEPA Responsible Official

Fact Sheet

Proposal Title

OUR VANCOUVER Comprehensive Plan Update

Proposal Description

The City of Vancouver (City) is proposing to update its Comprehensive Plan, which will establish a vision that guides the entire City's growth and development for the next 20 years, from 2026 to 2045. The City is required by the Washington State Growth Management Act to adopt an updated comprehensive plan and changes to its zoning code. The proposed update will plan for growth of at least 38,129 new housing units and 43,198 new jobs by the year 2045. The proposal would update the current land use map, as well as rename and simplify existing land use designations and the associated zoning code. This "nonproject" Final EIS reviews the potential impacts of four future alternatives at a high level for the City as a whole, rather than a detailed analysis of an individual site:

- **No Action Alternative,** required by SEPA, assumes that the Comprehensive Plan Update and associated changes to the zoning code and development regulations would not be adopted. Future growth and development would occur in line with the current adopted City Comprehensive Plan and development regulations, as well as recent amendments to state law allowing new housing types in single-family zones, which will automatically take effect and override local regulations even if Vancouver does not act. The No Action Alternative would not meet the City's minimum 2045 targets for new housing units and jobs.
- **Alternative 1** assumes the proposed Comprehensive Plan Update and associated changes to the zoning code and development regulations would be implemented, including new zoning districts that allow more dense housing, employment, and activity centers in more areas across the City. Alternative 1 would allow for more dense, mixed-use development patterns than the No Action Alternative but in fewer areas than Alternative 2. Alternative 1 would exceed the City's minimum 2045 targets for new housing units and jobs.
- **Alternative 2,** like Alternative 1, assumes the proposed Comprehensive Plan Update and associated changes to the zoning code and development regulations would be implemented. Alternative 2 would allow for the highest density, intensity, and mix of uses of all the alternatives in a greater number of areas of the City. Alternative 2 would exceed the City's minimum 2045 targets for new housing units and jobs and would provide the highest capacity among the alternatives.

- **Preferred Alternative,** which combines elements of Alternatives 1 and 2, and assumes the proposed Comprehensive Plan Update and associated changes to the zoning code and development regulations would be implemented. The Preferred Alternative would allow for more dense, mixed-use development patterns compared to the No Action Alternative and would allow for similar development patterns to Alternatives 1 and 2. The Preferred Alternative would exceed the City's minimum 2045 targets for new housing units. The capacity for new housing units and jobs would be higher than the No Action Alternative and slightly lower than Alternatives 1 and 2.

Permits, Licenses, and Approvals Likely Required for Proposal

Vancouver City Council approval, based on recommendations from the Vancouver Planning Commission, is required to implement the proposal. In addition, all Comprehensive Plan amendments and implementing regulations require a 60-day review by the Washington Department of Commerce and other state agencies. The Regional Transportation Council is also required to certify the Transportation Element of the Comprehensive Plan.

After adoption of the Comprehensive Plan Update, individual development proposals would be required to obtain applicable land use, construction, building, and right-of-way permits and conduct additional SEPA review as required by City and state law.

Authors and Principal Contributors to the EIS

With direction from the City of Vancouver, the following consultant team prepared and/or contributed analysis to this Final EIS:

- WSP USA (prime consultant): Overall document management; Land and Shoreline Use; Housing; Aesthetics; Historic and Cultural Preservation; Transportation; Noise; Public Services and Utilities; Earth; Air Quality, Greenhouse Gases and Climate; Water; Plants and Animals
- Alta Planning + Design, Inc.: Transportation
- BERK Consulting: Land and Shoreline Use; Housing; Air Quality, Greenhouse Gases and Climate; Plants and Animals
- Design Workshop: Figures and text adapted from the Community Atlas
- ECONorthwest: Land and Shoreline Use, Housing

Date of Issue of Draft EIS

July 8, 2025

Draft EIS Comment Period

The City requested comments during a 60-day period between July 8 and September 8, 2025, at 11:59 p.m. Comment opportunities were provided via online comment form, email, postal mail and voicemail.

The City hosted two in-person public meetings to allow community members to learn about the Draft EIS, provide comments, and ask questions to City staff:

- July 30, 2025, at Firstenburg Community Center
- August 9, 2025, at City Hall

The City also hosted two virtual public meetings via Zoom on July 22 and August 4, 2025.

Date of Issue of Final EIS

April 16, 2026

Date of Final Action

June 2026

Type and Timing of Additional Environmental Review

This EIS covers the high-level potential impacts of the Comprehensive Plan Update, which is considered a nonproject action. Additional environmental review under SEPA may be required for specific projects resulting from the Comprehensive Plan Update.

Location of Related Environmental Documents and Data

Please visit the Be Heard Vancouver website to view related documents and data for the OUR VANCOUVER Comprehensive Plan 2045:

Chapter 1: Summary

Note to readers: This Final Environmental Impact Statement document retains and builds upon the information presented in the Draft Environmental Impact Statement. New content in this chapter is generally denoted with underlined text, while changes to information are denoted with strikethrough text. Updates focus on adding the new analysis of the Preferred Alternative, as well as minor corrections and clarifications to the analysis presented in the Draft EIS. Some changes are denoted with footnotes and table notes when further explanation was warranted.

This chapter provides an overview of the ~~Draft~~ Environmental Impact Statement (EIS) and its major findings, including a description of the proposal; its objectives, purpose and need, and location; the environmental review and public involvement process; a summary of the alternatives evaluated in this EIS; potential impacts and mitigation measures for each alternative; significant areas of controversy and issues to be resolved; and benefits and disadvantages of delaying implementation of the proposal.

Description of Proposal, Purpose and Need, and Objectives

The City of Vancouver, Washington (City) is proposing to update its Comprehensive Plan, which will establish a vision that guides its growth and development for the next 20 years, from 2026~~5~~ to 2045. Since the last plan update in 2011, Vancouver has experienced substantial growth, as well as demographic, economic and social changes.

Pursuant to Revised Code of Washington (RCW) 36.70A.070, the Washington State Growth Management Act (GMA) requires that all fully planning jurisdictions, including Vancouver, update their adopted comprehensive plans and development regulations every 10 years. The GMA specifies mandatory elements that Washington cities are legally required to integrate into their comprehensive plans. These elements include land use, housing, capital facilities, utilities, transportation, economic development, parks and recreation, and climate change and resiliency. Through its visioning process, the City has elected to include additional elements that are not mandated by state law, including equity and inclusion, community experience, and annexation.

The purpose of the Comprehensive Plan Update is to set the vision and direction for Vancouver for the next 20 years, including a focus on the following key questions:

- What types of services, facilities, and infrastructure will be needed?
- How can we help make Vancouver a healthier community for all people?
- How will infrastructure and land use be resilient and responsive to natural disasters, threats and unexpected circumstances?
- How will we provide housing that is affordable and accessible to everyone?
- How will the plan's overall vision and investments inform equitable access to opportunity, employment, and the benefits from those investments?

The City has named the forthcoming comprehensive plan OUR VANCOUVER to reflect the process of co-creating the plan with the community. The Comprehensive Plan Update is needed to meet the requirements of the GMA, with ~~and must be adopted by~~ adoption scheduled for December 31, 2025, by statute. As part of this proposal, the City is currently:

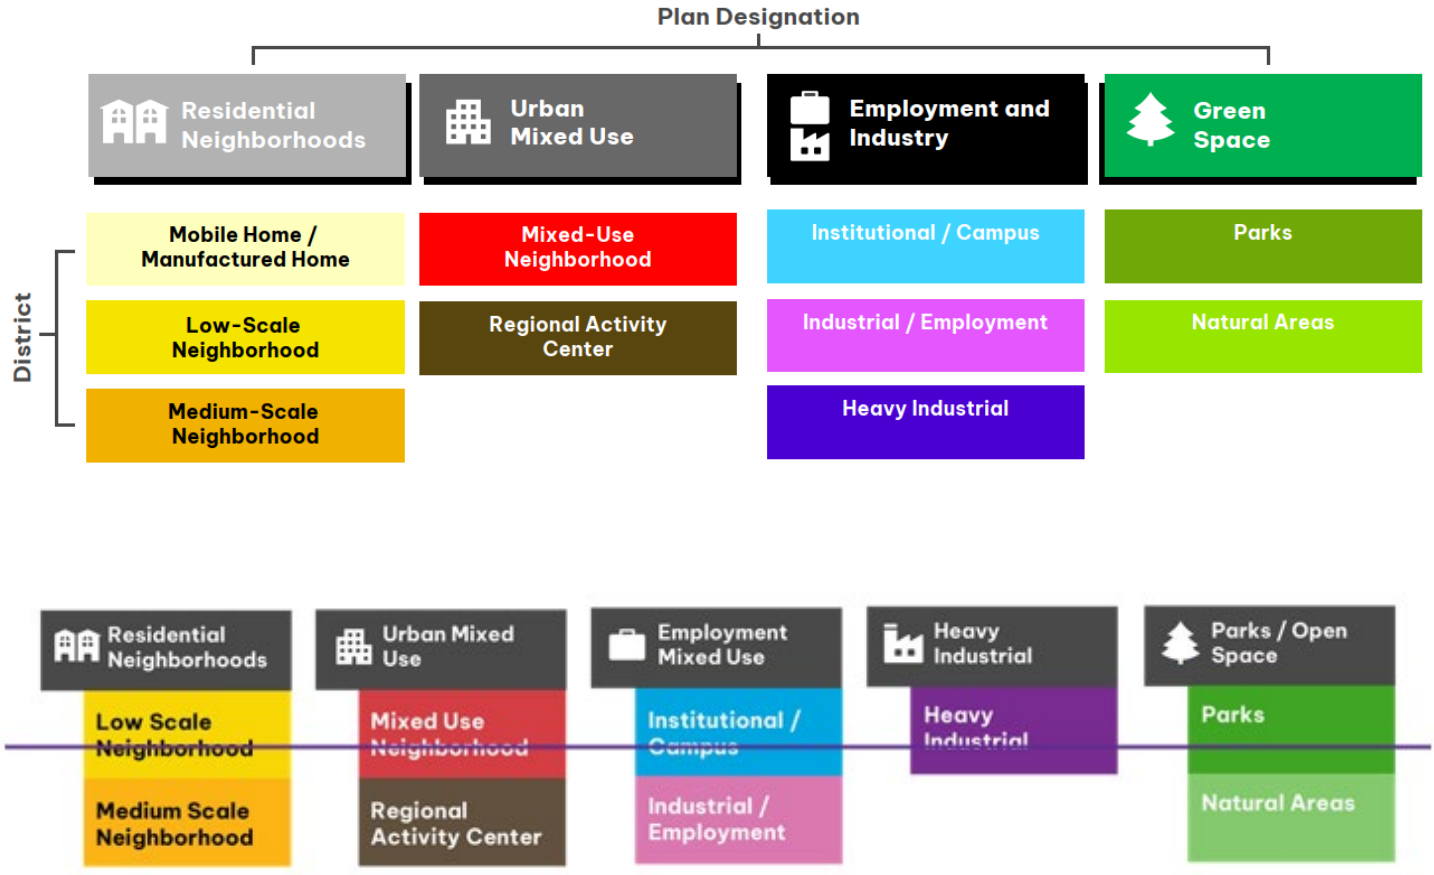
- Conducting a full rewrite of the existing Comprehensive Plan, including changes to all existing elements and the land use map.
- Developing a detailed strategy for implementing the goals, policies, and strategies outlined with the revised plan.
- Modifying the existing zoning code (Title 20 of the Vancouver Municipal Code [VMC]), which regulates the scale, size and location of buildings and uses, to reflect the goals and policies identified in the revised plan.
- Completing the EIS process outlined within the State Environmental Policy Act (SEPA).
- Establishing a process to develop and create the plan with members of the community and conduct community engagement activities in a method consistent with ~~state law~~ the GMA.

Plan Vision Statement

"Vancouver is an equitable and prosperous community, which ensures that all residents, businesses and organizations benefit from the growth and advancement we make together. Vancouver will be recognized for our quality of life, as evidenced by affordable housing in vibrant, safe and walkable neighborhoods, access to jobs and economic opportunity for all, and leading-edge efforts to address climate change."

The Comprehensive Plan Update will plan for growth of at least 38,129 new housing units and 43,198 new jobs by the year 2045. These minimum growth targets are based on population projections

from the Washington State Office of Financial Management (OFM), Clark County, recent trends, state law, and City policy to plan for long-term housing and employment needs.



The proposal would also update the current land use map that guides growth and development under the Comprehensive Plan. The Comprehensive Plan land use designations and associated zoning code would be renamed and simplified to focus on the following zoning districts and as shown on Figure 1:

- **Low-Scale Neighborhood:** Focuses on low-scale housing choices, typically with up to six units per parcel and building heights of up to ~~three stories (maximum of~~ 45 feet tall~~)~~. Any lot would be allowed to have at least four units. Housing types include single-family homes, accessory dwellings~~ buildings~~, and a range of housing types referred to as "middle housing," including duplexes (two-unit structures), ~~townhouses~~ townhomes (attached single-family homes), quadplexes (four-unit structures), and sixplexes. Small-scale commercial activities like cafés, salons, professional services, and restaurants mostly serving the surrounding neighborhood would also be allowed.
- **Medium-Scale Neighborhood:** Allows ~~Provides~~ a broad range of housing types and ~~allows~~ building heights ~~of 2 to 5 stories (maximum of~~ up to 75 feet tall~~)~~. Housing types include all of the types allowed in the Low-Scale Neighborhood plus additional multifamily building types, and~~,~~ mixed-use office buildings. ~~including courtyard buildings and multifamily mixed-use buildings.~~ Civic/institutional buildings and commercial activities like cafés, restaurants, small offices, and other retail goods would also be allowed.
- **Manufactured Home:** Applies to existing manufactured home park developments to recognize existing uses, facilitate long-term affordability and discourage displacement of existing residents; no other uses are generally allowed unless ongoing use as manufactured home parks is demonstrated to be unfeasible.
- **Mixed-Use Neighborhood:** Provides for a broad range of housing, commercial, and civic/institutional use types, with building heights ~~of 3 to 8 stories (maximum of~~ up to 110 feet tall~~)~~. Housing types include multifamily and mixed-use buildings at a variety of scales. Commercial or retail uses may include professional offices, medical providers, cafés, restaurants, small grocery stores, markets, and other retail goods and entertainment uses.
- **Regional Activity Center:** Includes lands that offer opportunities for economic, entertainment, civic, and housing needs, with ~~minimum building heights of three stories and~~ no minimum or maximum building heights. Size and makeup of this zoning district would vary based on location but would typically consist of compact, mixed-use development that maximizes residential, commercial, and open space opportunities.

Typical housing options would be mixed-use residential, multifamily ~~apartment~~, and mid-rise ~~and podium~~ buildings.

- **Institutional/Campus:** Includes lands that support academic, employment, civic, or medical buildings, with no minimum or maximum building heights ~~up to 12 stories (maximum of 150 feet tall)~~. Allowable housing types include townhouses, multifamily, and mid-rise buildings. Buildings for athletic facilities, event spaces, equipment or other accessory uses needed to support an educational, medical, or large institution and employment uses would also be allowed.
- **Industrial/Employment:** Includes lands with large-scale, single-tenant industrial, warehouse and flex space building and smaller, multi-tenant industrial buildings up to ~~12 stories (maximum of~~ 150 feet tall~~)~~. ~~The buildings would be grouped to support and serve one another and to provide opportunities for employment clusters.~~ New housing would not be allowed in this zoning district.
- **Heavy Industrial:** Includes lands that are currently zoned for heavy industrial uses, such as manufacturing and production, within the ~~c~~City and would remain unchanged. New housing would not be allowed in this zoning district.
- **Parks:** Includes lands currently zoned as ~~public community and neighborhood~~ parks and open space. Civic and institutional buildings associated with the primary parks use would be allowed, with a height limit of 45 feet. Housing would not be allowed in this zoning district.
- **Natural Areas:** Includes lands currently zoned for greenways and natural areas, which are generally undeveloped lands managed for both natural and ecological value and light-impact recreational use. Housing would not be allowed in this zoning district.

Figure 1. Proposed Comprehensive Plan Designations and Associated Zoning Districts

The proposed zoning code update would allow or require a mixing of uses, depending on the ~~zoning district~~ area; emphasize density minimums and, in some areas, maximum building height~~s and parking maximums~~; and focus on building placement as it relates to the street ~~and building types~~. A major goal of the zoning code update is to make requirements easier and simpler to understand for residents, developers, homebuilders, and staff, and in turn to reduce costs and barriers to housing production.

Proposal Location and Study Area

The primary study area is all of the Vancouver city limits, as shown in Figure 2. The study area includes areas across the ~~c~~City that have been identified as planned growth centers or corridors.

Figure 2. Proposal Location and Study Area

State Environmental Review Process

This nonproject ~~Draft~~ EIS is an informational document required by SEPA, which is regulated under Washington Administrative Code (WAC) 197-11, before the City can move forward with adopting updates to the Comprehensive Plan. A nonproject EIS covers governmental actions

involving decisions on policies, plans or programs, including the adoption or amendment of comprehensive plans, ordinances, rules and regulations. Environmental analysis at the nonproject stage is typically less detailed and is intended to form the basis for future environmental reviews and permitting processes for specific projects.

The ~~Draft~~ EIS provides the public; city, state, and federal government agencies; and tribal governments with qualitative and quantitative information to consider in the decision-making process. It also allows the public, government agencies, interested parties, and tribes to comment on the potential alternatives.

This ~~Draft~~ EIS describes the following:

- Methodology, legal framework and data sources used for the analysis
- Existing conditions (called "affected environment" in this document) of the study area
- A No Action Alternative and ~~two~~ three action alternatives, including a Preferred Alternative
- Potential significant, unavoidable, and adverse impacts
- Potential beneficial outcomes of the alternatives
- Mitigation measures, which are changes or conditions designed to avoid, minimize, or compensate for potential adverse impacts

Community and Partner Engagement

Since early 2023, the City has been engaging in extensive community outreach and engagement to help planners address key questions about housing; land use, development and infrastructure; economic development; equity and opportunity; and climate and environment.

The first year of the process focused on raising awareness about the Comprehensive Plan update process and gathering input from the community to identify a collective vision for the future of Vancouver, as well as vision statements for each element of the Comprehensive Plan. The City met community members where they already were and sought to learn what makes them feel connected to OUR VANCOUVER. The City also invited a group of community partners to co-create the plan with the City. The City has met regularly with community partners to discuss the needs of the communities they serve and identify with, lending a voice from folks outside the typical planning process. In-language liaisons gathered community input to make sure community members could express their needs without language barriers. The City also distributed a community survey to learn more about community members' priorities and vision for future growth.

Throughout 2024, the City reviewed how its land is currently used and how it can be used more efficiently to meet the needs of a growing population. The City held community mapping workshops in the spring to help develop a series of land use possibilities, which were later refined into the two action alternatives analyzed in ~~this~~ the Draft EIS.

Throughout 2025, community engagement focused on the Draft EIS and associated comment period, including preparing the community and elected officials prior to the release of the document, and providing information on how to access the Draft EIS and how to provide comments.

The final phase of engagement in early 2026 focused on reporting back to the community and project participants what staff heard from them previously and demonstrating how input was reflected in the draft 2045 Comprehensive Plan and updated development code. The drafts of the plan and code were shared with the public in February and March 2026 to gather feedback for refining the plan and code details before initiating adoption processes with Planning Commission and City Council in late spring 2026.

EIS Scoping Process

To start the environmental review process, the City issued a SEPA Determination of Significance (DS), which is a public notice stating that this proposal is likely to have a significant adverse impact on the environment. A DS means the proposal to update the Comprehensive Plan has a reasonable likelihood of negative effects on environmental quality that could be considered more than moderate. For proposals that fall into this category, an EIS is required under state law [RCW 43.21C.030 (2)(c)].

The City published this notice in the SEPA Register and *The Columbian* on July 12, 2024, and on the Be Heard Vancouver website for the Comprehensive Plan Update. The City also provided the notice via an email distribution list consisting of federal, state, and local agencies; tribes; community groups; and other interested parties.

The scoping notice initially requested comments during an expanded comment period of 30 days, which is greater than the SEPA-required 21 days. The comment period was originally scheduled to end on August 12, 2024. In order to provide additional opportunities for review and comment by local agencies and communities, the City extended the scoping comment period to August 23, 2024, and again to September 6, 2024. The City issued a revised scoping notice on October 22, 2024, to clarify proposed future growth levels, the number of alternatives that ~~will~~ would be analyzed in the Draft EIS, and the role of desired community outcomes and goals in the Comprehensive Plan Update and SEPA process. The deadline for

comments was November 21, 2024. The scoping notices requested comments via postal mail or email.

The notices identified the City's intent to evaluate the No Action Alternative and two to three action alternatives that outline different land use and growth scenarios in specific areas of the City. The notices also identified the following areas for discussion in the EIS in accordance with WAC 197-11-444:

- Land and shoreline use
- Housing
- Aesthetics (including light and glare)
- Historic and cultural resources
- Transportation
- Noise
- Public services and utilities (including emergency services, water, sewer, schools, parks and recreation)
- Earth (geologic hazard areas, soils, topography)
- Air quality, greenhouse gases, and climate
- Water resources
- Plants and animals

The City received eight comments during the two scoping periods covering a wide variety of topics. Appendix A, Scoping Information, provides a more detailed summary of the comments received. None of the comments included objections to the environmental elements identified in the scoping notice. Most of the comments provided detailed input or questions about specific topics of interest, including EIS elements to be studied, analysis methods, and potential mitigation measures. Based on these comments, the City determined that the topics identified in the scoping notice were appropriate and proceeded with the Draft EIS analysis.

Public Comment on Draft EIS

~~The public comment period for this~~The City published the Draft EIS on July 8, 2025, and requested public comments during a 60-day period ~~from July 8 to~~ through September 8, 2025. Comments ~~may be provided~~ were requested via the following methods:

- Online Comment Form (preferred): https://www.surveyhero.com/c/VancouverDEIS
- Email: OurVancouver2045@cityofvancouver.us

- Postal Mail:
  Meredith Herbst
  City Hall
  PO Box 1995
  Vancouver, WA 98668
- Voicemail: 360-487-7929

The City ~~is also~~ hosted~~ing~~ two public meetings to allow community members to learn about the Draft EIS, provide comments, and ask questions to City staff:

- **Wednesday, July 30, 2025, 4 p.m. to 7 p.m.**
  East Vancouver
  Firstenburg Community Center, Community Room
  700 NE 136th Avenue
  Vancouver, WA 98684
- **Saturday, August 9, 2025, 11 a.m. to 2 p.m.**
  West Vancouver
  City Hall, Aspen Room
  415 W. 6th Street
  Vancouver, WA 98660

The City also hosted two virtual public meetings via Zoom on July 22 and August 4, 2025. The virtual public meetings included approximately 47 attendees and covered topics including state legislation, subarea planning, school capacity, integrating public health, development in the Heights, parking minimums, displacement risk, affordable housing, and senior housing. Please visit the Be Heard Vancouver website for more information about these previous outreach activities. ~~the public meetings and other informal opportunities to review and discuss the Draft EIS with City staff.~~

Final EIS and Next Steps

After the public comment period concluded~~s~~, the City ~~will~~ reviewed the comments received and prepared ~~a~~this Final EIS that considers and responds to comments on the Draft EIS.

Chapter 6 summarizes comments received during the Draft EIS public comment period and provides responses. The City considered these comments when developing the Preferred Alternative, which underwent review by the Planning Commission and City Council during a series of public workshops and meetings held in fall 2025. The City Council endorsed the

proposed Preferred Alternative zoning map on December 15, 2025. The draft Comprehensive Plan document and draft zoning code were published in February 2026 for public review.

This~~e~~ Final EIS ~~will~~ describes the potential impacts and benefits of the~~a~~ Preferred Alternative, which ~~that~~ is within the range of the alternatives studied in the Draft EIS. After issuance of this~~e~~ Final EIS, the City will submit the draft Comprehensive Plan Update and specific edits to the land use map that reflect the Preferred Alternative for review by the Planning Commission and City Council. The Planning Commission and City Council will hold additional public hearings and work sessions to review and receive further public comment on the details and implementation of the Comprehensive Plan Update. Community members will have additional opportunities to provide comments on the proposed Comprehensive Plan Update and land use and zoning code amendments as part of this process.

Summary of Description of Alternatives

This ~~Draft~~ Final EIS evaluates the potential impacts and benefits of ~~three~~ four alternatives:

- The **No Action Alternative,** required by SEPA, is a future scenario that assumes future growth and development would occur in line with the current adopted City Comprehensive Plan and development regulations, and state statutory requirements that impose a state middle housing model zoning ordinance on local jurisdictions which do not take action to allow middle housing in single-family zones. The new zoning districts proposed for the Comprehensive Plan Update and zoning code would not be adopted. The No Action Alternative is not projected to meet the City's minimum 2045 targets for housing units and jobs because it would allow less dense development than the action alternatives.
- **Alternative 1** is a future scenario that assumes the proposed Comprehensive Plan Update and associated changes to the zoning code and development regulations would be implemented. Although many areas of the ~~c~~City would have similar land use designations under all alternatives, Alternative 1 would generally accommodate more density and greater mixes of land uses than the No Action Alternative but less density and mixes of uses than Alternative 2. The amount of land designated for Regional Activity Centers, Medium-Scale Neighborhoods, and Mixed-Use Neighborhoods would be lower than under Alternative 2. The amount of land designated as Low-Scale Neighborhoods and Industrial/Employment would be higher under Alternative 1 than Alternative 2. Alternative 1 would exceed the City's minimum 2045 targets for housing units and jobs.
- **Alternative 2** is a future scenario that assumes the proposed Comprehensive Plan Update and associated changes to the zoning code and development regulations would be

implemented. Although many areas of the ~~e~~City would have similar land use designations under all alternatives, Alternative 2 would provide the most options for higher density and greater mixing of~~ed~~ uses in more areas of the city. The amount of land designated as Regional Activity Centers, Medium-Scale Neighborhood, and Mixed-Use Neighborhoods would be the highest of the alternatives. The amount of land designated for Low-Scale Neighborhoods would be the lowest of the alternatives. Alternative 2 would exceed the City's minimum 2045 housing and jobs targets and would have the highest capacity of all the alternatives.

- Preferred Alternative is a future scenario that, like Alternatives 1 and 2, assumes the proposed Comprehensive Plan Update and associated changes to the zoning code and development regulations would be implemented. Although many areas of the ~~e~~City y would have similar land use designations under all alternatives, the Preferred Alternative would generally accommodate more density and greater mixes of land uses than the No Action Alternative and a similar mix of land uses compared to Alternatives 1 and 2. The amount of land designated for Industrial/Employment, Low Scale Neighborhood, Medium Scale Neighborhood and Mixed Use would be similar to Alternative 2. The amount of land designated for Regional Activity Center would be similar to Alternative 1. The amount of land designated for Institutional/Campus would be the highest of the alternatives. A new residential zoning district, Manufactured Home, has been added since evaluating the No Action Alternative and Alternatives 1 and 2 to preserve long-term affordability in existing manufactured home parks. The Preferred Alternative would exceed the City's minimum 2045 housing and jobs targets. The capacity for new housing units and jobs would be higher than the No Action Alternative and slightly lower than Alternatives 1 and 2.

Chapter 2 provides a more detailed description of each alternative, including figures showing their major elements and a comparison of their features.

Summary of Impacts, Benefits and Mitigation Measures

Table 1 summarizes the impacts and benefits of each alternative studied in the EIS, as well as the proposed measures to avoid, minimize, or mitigate adverse impacts.

Table 1. Summary of Potential Impacts and Benefits by Alternative

Element of the Environment	No Action	Alternative 1	Alternative 2	Preferred Alternative
Land and Shoreline Use	• Not consistent with proposed Comprehensive Plan Update and associated policies • Does not meet housing and jobs growth targets • Some potential for land use compatibility issues • Lowest capacity for new jobs; similar average wages for new jobs among all alternatives • Lowest potential for commercial displacement, fewer new spaces for businesses	• Consistent with proposed Comprehensive Plan Update and associated policies • Exceeds housing and jobs growth target • Some potential for land use compatibility issues • Substantially higher capacity for new jobs than No Action; similar average wages for new jobs among all alternatives • Moderate potential for commercial displacement, more new spaces for businesses	• Consistent with proposed Comprehensive Plan Update and associated policies • Exceeds housing and jobs growth target by higher amount than Alternative 1 • Some potential for land use compatibility issues • Highest capacity for new jobs; similar average wages for new jobs among all alternatives • Similar potential for commercial displacement to Alternative 1	• Consistent with proposed Comprehensive Plan Update and associated policies • Exceeds housing and jobs growth target by lower amounts than Alternatives 1 and 2 • Some potential for land use compatibility issues • Substantially higher capacity for new jobs than No Action; similar average wages for new jobs among all alternatives • Similar potential for commercial displacement to Alternative 1 and 2
Housing	• Lowest capacity for new housing units, does not meet growth targets • Lowest potential for diversity of housing types and affordable housing supply • Highest potential for new housing units in displacement risk areas • Lowest capacity for new housing units in connected and accessible neighborhoods • Least compatible with existing housing plans and policies	• Higher capacity for new housing units than No Action, exceeds growth targets • Higher potential for diversity of housing types and affordable housing supply than No Action • Lowest potential for new housing units in high displacement risk areas • Higher capacity for new housing units in connected and accessible neighborhoods • Highly compatible with existing housing plans and policies	• Highest capacity for new housing units, exceeds growth targets • Highest potential for diversity of housing types and affordable housing supply • Moderate potential for new housing units in high displacement risk areas • Highest capacity for new housing units in connected and accessible neighborhoods • Similarly compatible with existing housing plans and policies compared to Alternative 1	• Similar to Alternative 1 in capacity for new housing units, exceeds growth targets • Similar to Alternative 1 in potential for diversity of housing types and affordable housing supply • Higher potential for new housing units in high displacement risk areas than Alternatives 1 and 2 • Similar to Alternative 2 in capacity for new housing units in connected and accessible neighborhoods • Similarly compatible with existing housing plans and policies compared to Alternatives 1 and 2
Aesthetics	• Some changes to visual setting through new development but overall modest impacts to aesthetics • Lowest potential for aesthetic improvements associated with	• Moderate potential for larger-scale buildings and associated light, glare, shadow and visual impacts compared to No Action • Moderate potential for aesthetic improvements associated with	• Moderately higher potential for larger-scale buildings and associated light, glare, shadow and visual impacts than Alternative 1	• Moderately higher potential for larger-scale buildings and associated light, glare, shadow and visual impacts than Alternative 1

Element of the Environment	No Action	Alternative 1	Alternative 2	Preferred Alternative
	redevelopment of parking lots and vacant lots and structures	redevelopment of parking lots and vacant lots and structures	• Highest potential for aesthetic improvements associated with redevelopment of parking lots and vacant lots and structures	• Moderate potential for aesthetic improvements associated with redevelopment of parking lots and vacant lots and structures
Historic and Cultural Preservation	• Lowest potential for disturbance of individual sites and associated impacts to cultural, archaeological and historic resources	• Moderate potential for disturbance of individual sites and associated impacts to cultural, archaeological and historic resources	• Similar potential for disturbance of individual sites and associated impacts to cultural, archaeological and historic resources compared to Alternative 1	• Similar potential for disturbance of individual sites and associated impacts to cultural, archaeological and historic resources compared to Alternatives 1 and 2
Transportation	• Lowest total daily citywide vehicle miles traveled (VMT); highest VMT per household • Similar mode split (vehicle/transit/walk/bike) and average trip length for all alternatives • Generally lowest mobility units (person miles per day) • Generally lowest projected new traffic volumes on ~~e~~City safety corridors	• Higher total daily citywide VMT; lower VMT per household than No Action • Similar mode split (vehicle/transit/walk/bike) and average trip length for all alternatives • Generally higher generation of mobility units (person miles per day) • Generally higher projected new traffic volumes on ~~e~~City safety corridors	• Similar total daily citywide VMT to Alternative 1; lowest VMT per household • Similar mode split (vehicle/transit/walk/bike) and average trip length for all alternatives • Generally highest generation of mobility units (person miles per day) • Generally highest projected new traffic volumes on ~~e~~City safety corridors	• Similar total daily citywide VMT and VMT per household to Alternatives 1 and 2 • Similar mode split (vehicle/transit/walk/bike) and average trip length for all alternatives • Generally more similar to Alternative 1 in generation of mobility units (person miles per day) • Generally similar or lower traffic volumes on City safety corridors compared to Alternatives 1 and 2.
Noise	• Lowest potential for substantial construction noise impacts in residential/noise-sensitive areas • Lowest potential for increased transportation noise impacts in residential/noise-sensitive areas • Similar capacity for new housing units in areas with high transportation noise for all alternatives	• Moderate potential for substantial construction noise impacts in residential/noise-sensitive areas • Moderate potential for increased transportation noise impacts in residential/noise-sensitive areas • Similar capacity for new housing units in areas with high transportation noise for all alternatives	• Highest potential for substantial construction noise impacts in residential/noise-sensitive areas • Highest potential for increased transportation noise impacts in residential/noise-sensitive areas • Similar capacity for new housing units in areas with high transportation noise for all alternatives	• Higher potential for substantial construction noise impacts in residential/noise-sensitive areas • Higher potential for increased transportation noise impacts in residential/noise-sensitive areas • Highest capacity for new housing units in areas with high transportation noise
Public Services and Utilities	• Lowest new demand citywide for public services and utilities, including firefighters; police	• Higher new demand citywide for public services and utilities, including firefighters; police	• Highest new demand citywide for public services and utilities, including firefighters; police	• Higher new demand citywide for public services and utilities, including firefighters; police

Element of the Environment	No Action	Alternative 1	Alternative 2	Preferred Alternative
	officers; schools; parks and recreation facilities; water, wastewater, and sewer services; energy; and solid waste services • Most new demand projected in Central and East Vancouver	officers; schools; parks and recreation facilities; water, wastewater, and sewer services; energy; and solid waste services • Similar geographic distribution of new demand for ~~both~~ action alternatives, with lowest new demand projected in West Vancouver and highest new demand projected in East Vancouver	officers; schools; parks and recreation facilities; water, wastewater, and sewer services; energy; and solid waste services • Similar geographic distribution of new demand for ~~both~~ action alternatives, with lowest new demand projected in West Vancouver and highest new demand projected in East Vancouver	officers; schools; parks and recreation facilities; water, wastewater, and sewer services; energy; and solid waste services • Similar geographic distribution of new demand for action alternatives, with lowest new demand projected in West Vancouver and highest new demand projected in East Vancouver
Earth	• Similar consistency with ~~e~~City regulations for geologic hazard areas for all alternatives • Lowest potential for ground disturbances, potential erosion, and increases in impervious surfaces	• Similar consistency with ~~e~~City regulations for geologic hazard areas for all alternatives • Higher potential for ground disturbances, potential erosion, and increases in impervious surfaces	• Similar consistency with ~~e~~City regulations for geologic hazard areas for all alternatives • Similar potential for geologic hazard and erosion risks to Alternative 1. • Greatest potential for ground disturbances and increases in impervious surfaces	• Similar consistency with City regulations for geologic hazard areas for all alternatives • Similar potential for ground disturbances, potential erosion, and increases in impervious surfaces to Alternatives 1 and 2
Air Quality, Greenhouse Gases and Climate	• Lower modeled 2045 air pollutant and greenhouse gas emissions than existing conditions • Similar capacity for new housing units in areas with air pollutant exposure risks for all alternatives • Lowest capacity for new housing units and jobs in heat islands • Lowest potential for construction-related air quality impacts	• Lower modeled 2045 emissions than existing conditions, higher modeled emissions than No Action Alternative • Similar capacity for new housing units in areas with air pollutant exposure risks for all alternatives • Highest capacity for new housing units and moderate capacity for new jobs in heat islands • Higher potential for construction-related air quality impacts	• Lower modeled 2045 emissions than existing conditions, similar modeled 2045 emissions to Alternative 1 • Similar capacity for new housing units in areas with air pollutant exposure risks for all alternatives • Moderate capacity for new housing units and highest capacity for new jobs in heat islands • Highest potential for construction-related air quality impacts	• Lower modeled 2045 emissions than existing conditions, similar to modeled 2045 emissions to Alternatives 1 and 2 • Similar capacity for new housing units in areas with air pollutant exposure risks for all alternatives • Lower capacity for new housing units and jobs in heat islands • Higher potential for construction-related air quality impacts
Water	• Lowest potential for new impervious surfaces (e.g. rooftops, pavement) and associated runoff, but lower density could pressure	• Higher potential for new impervious surfaces and associated runoff • Higher potential for new development subject to updated	• Highest potential for new impervious surfaces and associated runoff • Highest potential for new development subject to updated	• Higher potential for new impervious surfaces and associated runoff, more similar to Alternative 1

Element of the Environment	No Action	Alternative 1	Alternative 2	Preferred Alternative
	development of more individual sites • Lowest potential for new development subject to updated Critical Areas regulations and stormwater management best practices	Critical Areas regulations and stormwater management best practices	Critical Areas regulations and stormwater management best practices	• Higher potential for new development subject to updated Critical Areas regulations and stormwater management best practices
Plants and Animals	• Lowest potential for new construction and/or redevelopment and associated impacts to vegetation and habitat areas • Lowest potential for new development subject to updated Critical Areas regulations protecting plants and animals • Lowest capacity for new housing units in areas with existing low tree canopy cover	• Higher potential for new construction and/or redevelopment and associated impacts to vegetation and habitat areas • Higher potential for new development subject to updated Critical Areas regulations protecting plants and animals • Moderate capacity for new housing units in areas with existing low tree canopy cover	• Highest potential for new construction and/or redevelopment and associated impacts to vegetation and habitat areas • Highest potential for new development subject to updated Critical Areas regulations protecting plants and animals • Highest capacity for new housing units in areas with existing low tree canopy cover	• Higher potential for new construction and/or redevelopment and associated impacts to vegetation and habitat areas, more similar to Alternative 1 • Higher potential for new development subject to updated Critical Areas regulations protecting plants and animals • Higher capacity than Alternative 1 and lower capacity than Alternative 2 for new housing units in areas with existing low tree canopy cover

Significant Areas of Controversy and Issues to be Resolved

The key issues to be resolved by decision makers regarding the OUR VANCOUVER Comprehensive Plan Update proposal include:

- Finalization and adoption of the Comprehensive Plan Update through a public process
- Finalization and adoption of associated land use and zoning code updates
- Development and implementation of policies to address issues regarding:
    - What types of services, facilities, and infrastructure will be needed to support Vancouver's future
    - How to make Vancouver a healthier community for all people
    - How to set up infrastructure and land use to be resilient and responsive to natural disasters, threats and unexpected circumstances
    - How to provide affordable and accessible housing for everyone in a way that is well-integrated with the city's existing built and natural environment
    - How to provide equitable access to opportunity, employment, and the benefits from the plan's investments

Benefits and Disadvantages of Delaying Implementation

If the City does not implement the Comprehensive Plan Update, growth in Vancouver would continue under the current Comprehensive Plan and zoning designations. In single-family neighborhoods, growth would also be enabled by imposition of the state model middle housing ordinance, which by law is applied when cities make no changes to their zoning code. However, this growth would generally not be consistent with GMA requirements to adopt a new Comprehensive Plan and zoning standards to accommodate new 20-year growth forecasts.

Updating the Comprehensive Plan will bring the City up to date with recent changes to state law to address housing and climate needs, land use changes, and population growth projections. The plan update will inform the City's future decisions about land use, housing, public facilities, parks and open space, economic development, historic preservation, community design, and environmental considerations to meet the needs of a growing population.

Chapter 2: Alternatives

Note to readers: This Final Environmental Impact Statement document retains and builds upon the information presented in the Draft Environmental Impact Statement. New content in this chapter is generally denoted with underlined text, while changes to information are denoted with strikethrough text. Updates focus on adding the new analysis of the Preferred Alternative, as well as minor corrections and clarifications to the analysis presented in the Draft EIS. Some changes are denoted with footnotes and table notes when further explanation was warranted.

This chapter provides a more detailed description of the proposal location, study area, and ~~three~~ four alternatives studied in this ~~Draft~~ Final EIS, including figures showing their major features.

Proposal Location and Study Area

The proposal location and study area consist of lands within Vancouver city limits, as shown in Figure 3.

The study area contains areas across the ~~c~~City that have been identified as existing or planned growth corridors and existing or planned centers of activity.

Many of these areas are linear corridors along arterial streets or transit routes, such as Main Street, Mill Plain Boulevard, Fourth Plain Boulevard, West 39th Street, West 33rd Street, 112th Corridor, Northeast 136th Avenue, Southeast 164th Avenue, and Southeast 192nd Avenue.

Other identified growth nodes include the Port of Vancouver, Fruit Valley, Downtown, Clark College, Vancouver Mall, The Heights, Garrison Square, PeaceHealth, Section 30, Columbia Tech Center, and Vancouver Innovation Center. Slower growth is anticipated outside of these nodes.

Figure 3. Proposal Location and Study Area

Description of Alternatives

This ~~Draft~~ Final EIS studies the potential effects of the No Action Alternative and ~~two~~ three action alternatives, Alternative 1, ~~and~~ Alternative 2 and the Preferred Alternative, as described in the next subsections.

No Action Alternative

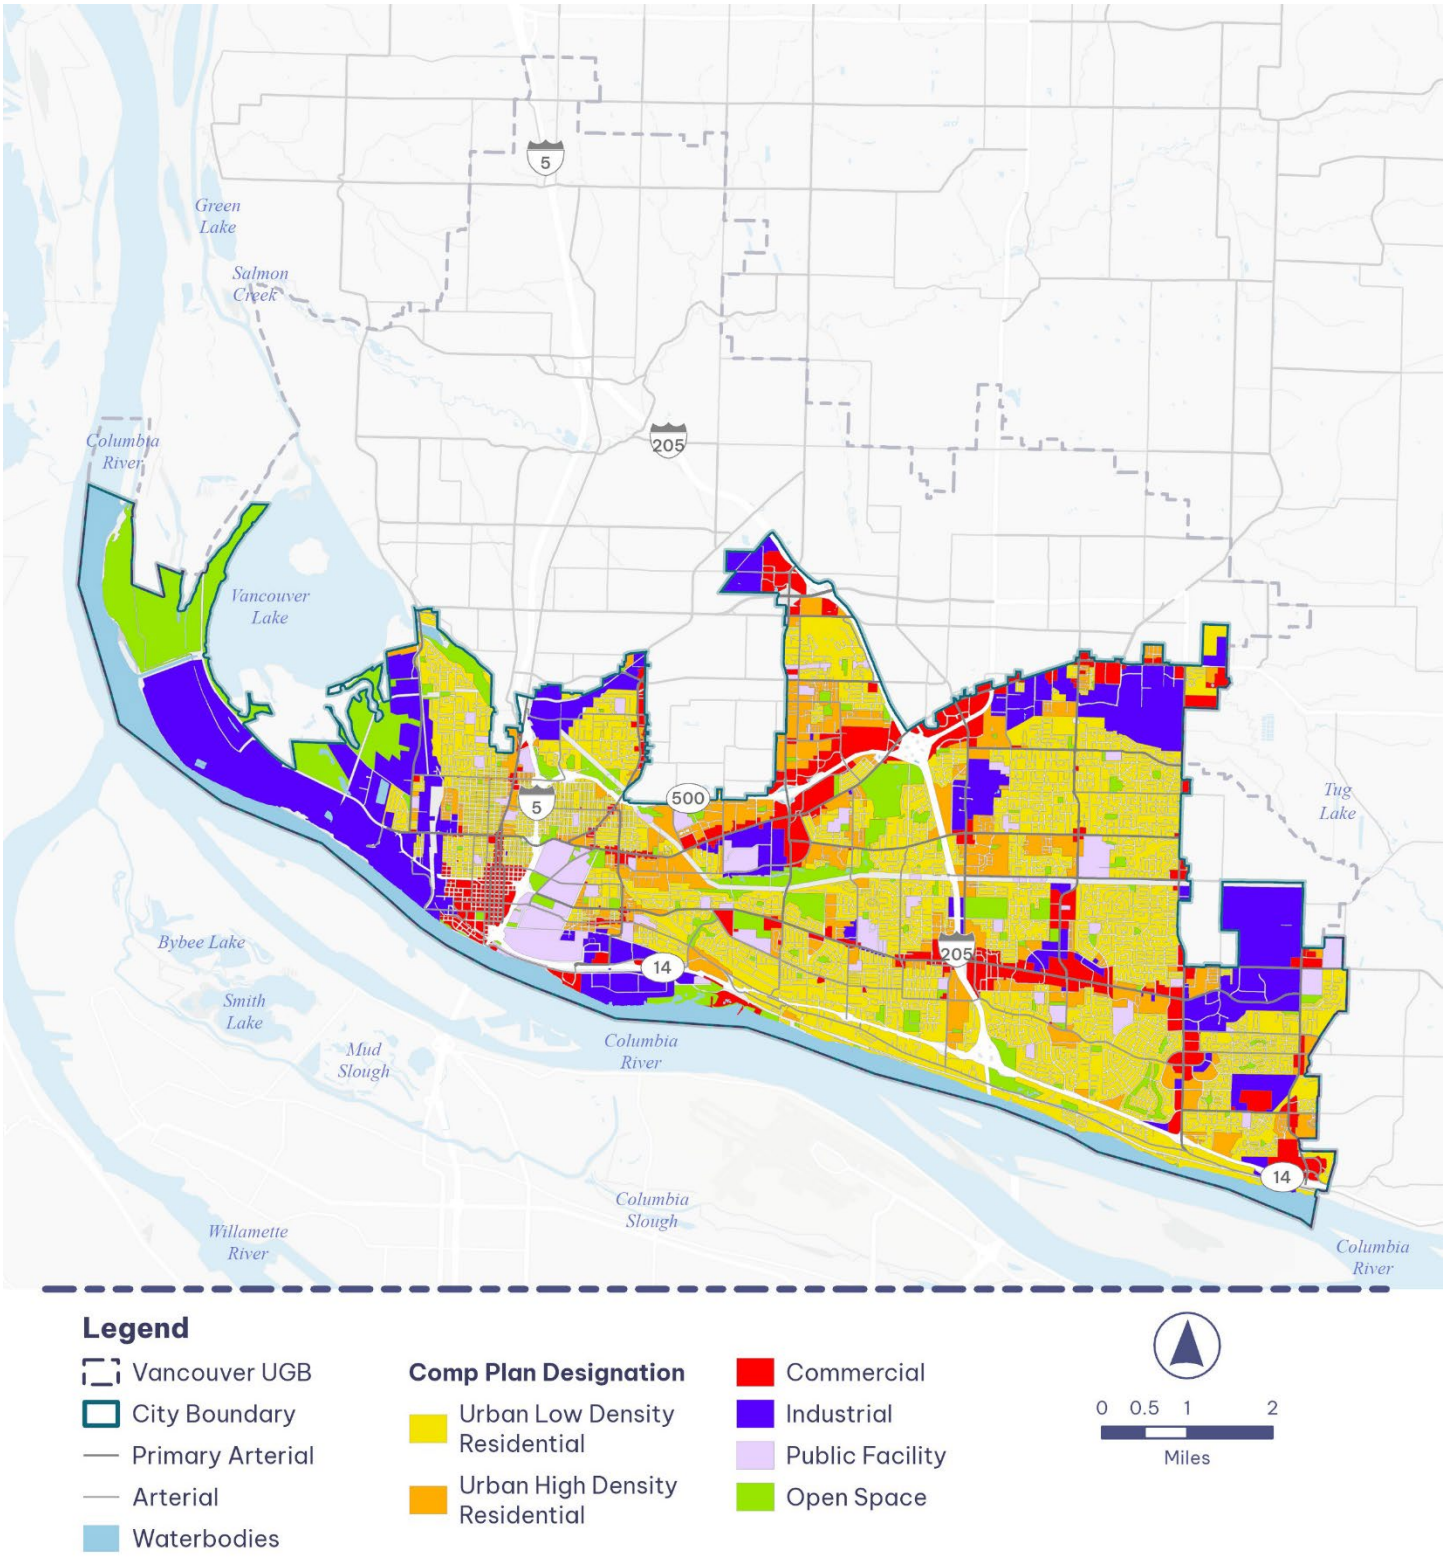
The No Action Alternative, required by SEPA, is a future scenario that assumes future growth and development would occur as allowed under current adopted City Comprehensive Plan and development regulations, and recent amendments to state statutory requirements that contain self-executing provisions.

The No Action Alternative assumes the implementation of House Bill (H.B.) 1110, which generally requires cities of at least 75,000 people to permit "middle housing" of at least four homes per residential lot, and imposes a new state model ordinance permitting middle housing in single-family zones on local jurisdictions that do not adopt their own standards allowing this practice. However, the No Action Alternative does not assume the implementation of other state laws that do not contain self-executing provisions, such as H.B. 1220, which requires planning for and accommodating housing affordable to all economic segments of the population, and H.B. 1337, which requires cities like Vancouver to allow up to two accessory dwelling units (ADUs) on a residential lot, assuming development regulations are met.

Under the No Action Alternative, the Comprehensive Plan land use designations would remain the same as they are today. The Comprehensive Plan Update and associated new zoning code and development regulations would not be adopted, although the state model ordinance permitting middle housing in single-family zones would be imposed in accordance with H.B. 1110.

Figure 4 shows a map of the Comprehensive Plan land designations for the No Action Alternative, and Figure 5 shows a map of the zoning designations for the No Action Alternative. These designations would be the same as the existing Comprehensive Plan and zoning designations. To allow for a comparison between the no action alternative and action alternatives, Table 2 summarizes the proposed future zoning districts and their corresponding current Comprehensive Plan land use and zoning designations. Table 5 in Chapter 3 provides more detailed information about current Comprehensive Plan designations and corresponding zoning designations, which would remain the same under the No Action Alternative.

Figure 4. No Action Alternative Comprehensive Plan Designations Map



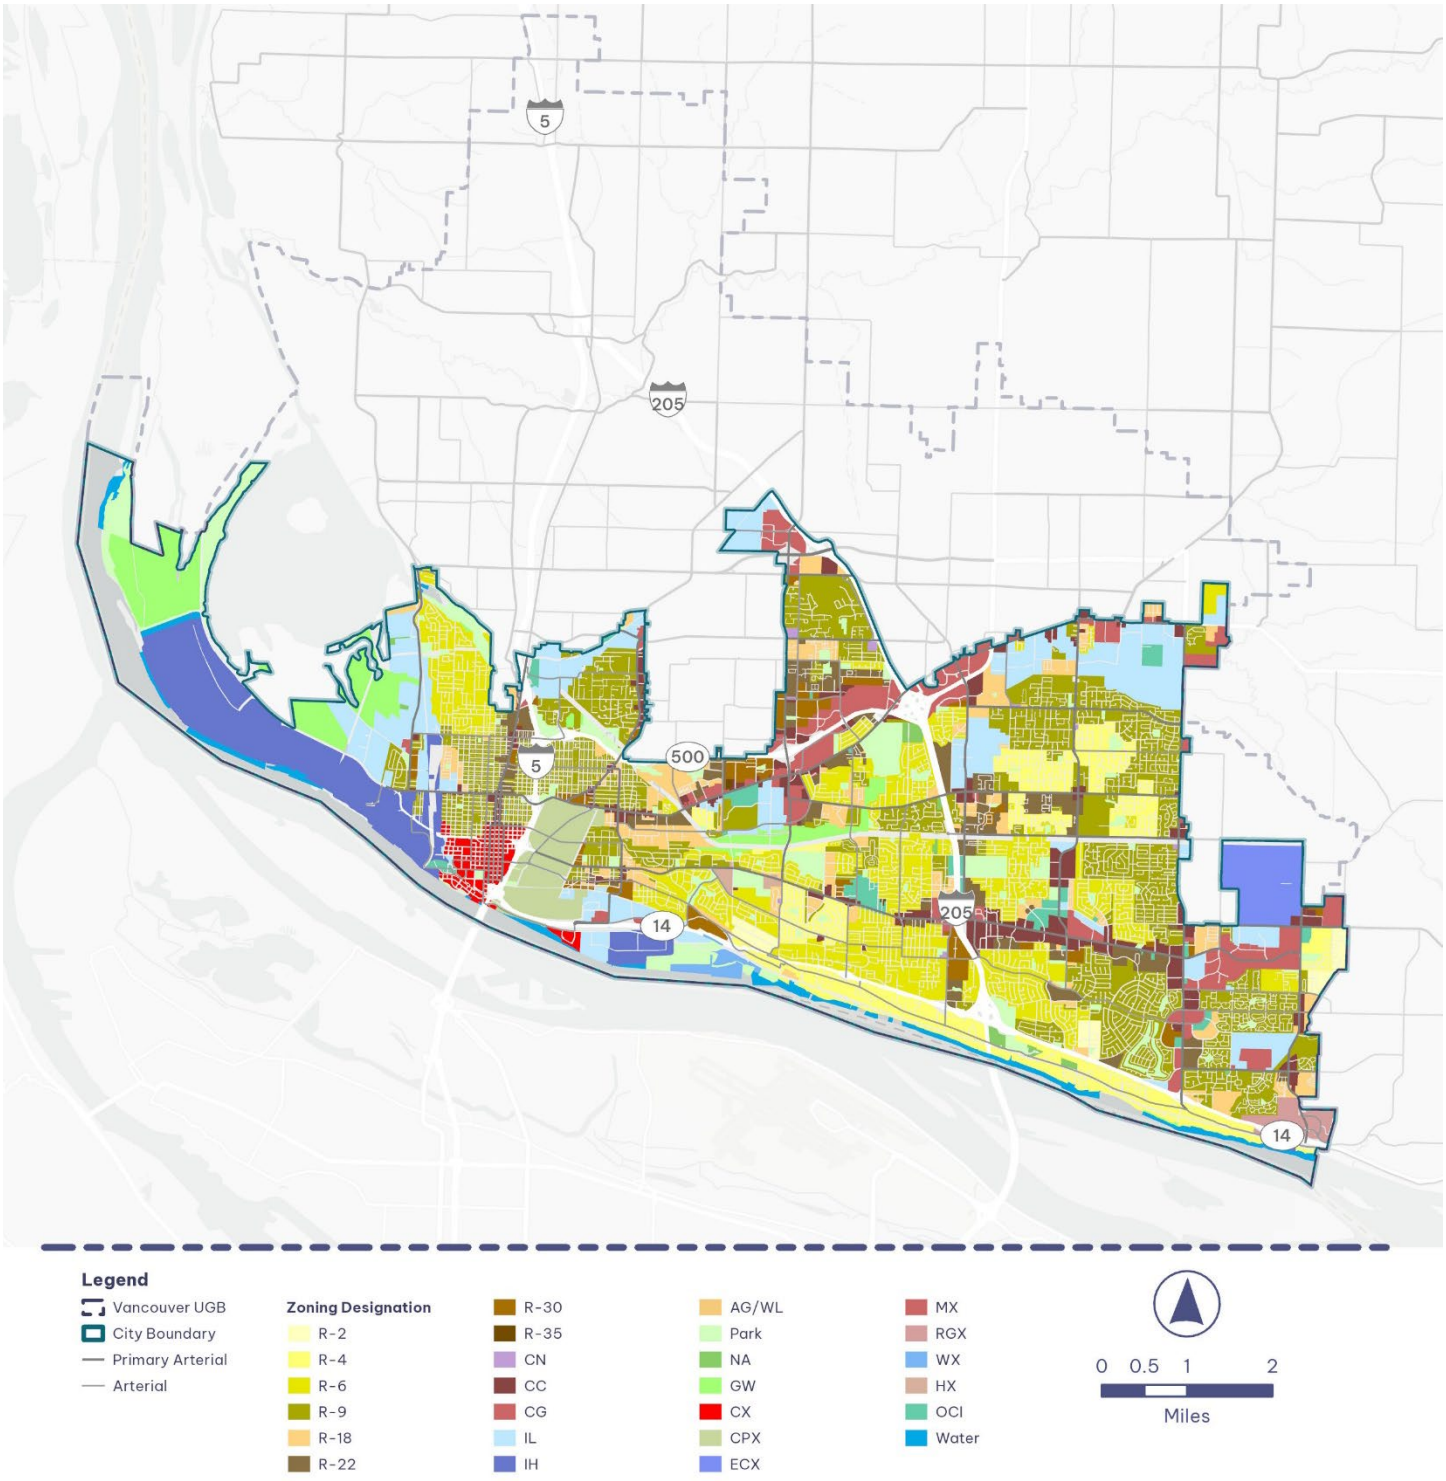


Figure 5. No Action Alternative Zoning Map

The No Action Alternative would have capacity for approximately 29,600 new housing units and 16,600 new jobs citywide by 2045. The No Action Alternative would not meet the GMA requirement to accommodate new 20-year growth forecasts, or the City's specific 2045 targets of at least 38,129 new housing units and 43,198 new jobs. Refer to Appendix B for the methods and assumptions for forecasting future housing and jobs capacity.

Action Alternatives

~~Both~~ All action alternatives assume that future growth and development would occur in line with the proposed Comprehensive Plan Update and the associated revised zoning code and development regulations. The action alternatives assume implementation of all applicable new state laws that affect comprehensive planning and development processes, including H.B. 1110, H.B. 1220, and H.B. 1337, as described in the No Action Alternative section.

Under ~~both~~ all action alternatives, the Comprehensive Plan land use designations and associated zoning code would be updated, renamed, and simplified to a smaller set of zoning districts, as discussed in Chapter 1: Summary and described in Table 2. The Preferred Alternative would include an additional residential zoning district for manufactured homes that was not yet developed for Alternatives 1 and 2 in the Draft EIS.

The locations and sizes of the proposed zoning districts would differ ~~between~~ among the ~~two~~ three action alternatives, as would the distribution of new housing units and jobs. ~~Both~~ All action alternatives are forecasted to exceed the City's minimum 2045 targets of at least 38,129 new housing units and 43,198 new jobs.

The following subsections summarize the major features of Alternative 1, ~~and~~ Alternative 2, and the Preferred Alternative by area of the ~~e~~City (west, central, and east).

Table 2. Proposed New Comprehensive Plan Designations/Zoning Districts and Allowances and Corresponding Current Comprehensive Plan/Zoning Designations

Proposed New Comprehensive Plan Designation (~~/~~Zoning District) for Action Alternatives	Proposed New Zoning Code Allowances	Corresponding Current and No Action Comprehensive Plan/Zoning Designation
Residential Neighborhoods (Low-Scale Neighborhood)	• Up to six housing units per parcel (per state law). • Minimum density of eight units/acre, no maximum density. • Building heights up to ~~three stories (maximum of~~ 45 feet tall~~)~~.	**Residential Urban Lower Density** R-2, R-4, R-6, R-9, R-17

Proposed New Comprehensive Plan Designation (~~/~~Zoning District) for Action Alternatives	Proposed New Zoning Code Allowances	Corresponding Current and No Action Comprehensive Plan/Zoning Designation
	• Typical housing types: Single-family homes, townhomes ~~townhouses~~, rowhomes ~~rowhouses~~, accessory dwellings ~~buildings~~, duplexes, quadplexes, and sixplexes. • Small-scale commercial activities like cafés, salons, professional services and restaurants mostly serving the surrounding neighborhood.	
Residential Neighborhoods (Medium-Scale Neighborhood)	• Minimum density of 16 units per acre, no maximum density. • Building heights up to ~~five stories (maximum of~~ 75 feet tall~~)~~. • Low-Scale Neighborhood housing types plus additional multifamily housing types. • Civic/institutional buildings and commercial activities like cafés, restaurants, small offices, and other retail goods.	**Residential Urban Higher Density** R-18, R-22, R-30, R-35, R-50
Residential Neighborhoods (Manufactured Home)[a]	• Applied to existing manufactured home parks to retain long-term affordability and prevent displacement of existing residents. • No other uses allowed unless ongoing use as manufactured home parks is demonstrably unfeasible.	**Residential Urban Lower Density** R-2, R-4, R-6, R-9, R-17, R-18
Urban Mixed Use (Mixed Use Neighborhood)	• Allows a broad range of housing, civic/institutional, commercial use types. • Minimum density of 32 units/acre, no maximum density. • Building heights ~~of 3 to 8 stories (maximum of~~ up to 110 feet tall~~)~~. • Typical housing types: Multifamily and mixed-use buildings at a variety of scales.	**Commercial and Mixed Use** CC (Community Commercial) CN (Neighborhood Commercial) CG (General Commercial)

Proposed New Comprehensive Plan Designation (~~/~~Zoning District) for Action Alternatives	Proposed New Zoning Code Allowances	Corresponding Current and No Action Comprehensive Plan/Zoning Designation
	• May include multiple neighborhoods connected to an activity center by a network of pathways or walkable streets. • Commercial or retail uses may include professional offices, medical providers, cafés, restaurants, small grocery stores, markets, and other retail goods.	OCI (Office-Campus-Industrial)
Urban Mixed Use (Regional Activity Center)	• Includes lands with opportunities for economic, entertainment, civic, and housing needs. • Minimum density of 64 units per acre, no maximum density. • No ~~M~~minimum or maximum building heights ~~of three stories, no maximum height~~. • Typical housing types: mixed-use residential, ~~apartment~~ multifamily, and mid-rise~~, and podium~~ buildings. • Size and makeup would vary based on location but would typically consist of compact, mixed-use development that maximizes residential, commercial, and open space opportunities.	**Commercial and Mixed Use** CX (City Center intensity) ECX (Employment Center Mixed Use) HX (Heights District) MX (Mixed Use) RGX (River Gateway) WX (Waterfront Mixed Use)
Employment ~~Mixed Use~~& Industry (Institutional/Campus)	• Includes lands that support academic, civic, or medical buildings. • No minimum or maximum b~~B~~uilding heights ~~of up to 12 stories (maximum of 150 feet tall).~~ • Allowable housing types: townhouses, ~~apartments~~ multifamily, mixed-use residential, and mid-rise buildings. • Buildings for athletic facilities, event spaces, equipment or other accessory uses needed to support an educational,	**Commercial and Mixed Use** CPX (Central Park Mixed Use)

Proposed New Comprehensive Plan Designation (~~/~~Zoning District) for Action Alternatives	Proposed New Zoning Code Allowances	Corresponding Current and No Action Comprehensive Plan/Zoning Designation
	medical, or large institution would also be allowed.	
Employment ~~Mixed Use~~& Industry (Industrial/Employment)	• Includes lands typically with large-scale, single-tenant industrial, warehouse and flexible-use ~~space~~ buildings and smaller, multi-tenant industrial buildings. • Building heights of up to ~~12 stories (maximum of~~ 150 feet tall~~)~~. • Buildings would be grouped to support and serve one another and to provide opportunities for employment clusters. • New housing not allowed.	Industrial OCI (Office-Campus-Industrial) IL (Light Industrial)
Heavy Industrial (Heavy Industrial)	• Includes lands currently zoned for heavy industrial uses and would remain unchanged. • New housing not allowed.	Industrial HI (Heavy Industrial)
Parks/Open Space (Parks)	• Includes lands currently zoned as public community and neighborhood parks. • Civic and institutional buildings would be allowed with height limit of 45 feet. • Housing not allowed.	Parks/Open Space P (Parks)
Parks/Open Space (Natural Areas)	• Includes lands currently zoned for greenways and natural areas, which are generally undeveloped lands managed for both natural and ecological value and light-impact recreational use. • Housing not allowed.	Parks/Open Space GW (Greenway) NA (Natural Area)

a The Manufactured Home zoning district was still in development at the time of the Draft EIS and is therefore only included in the Preferred Alternative analysis for this Final EIS.

Alternative 1

Alternative 1 would allow greater intensity and density of development in more areas of the ~~e~~City than the No Action Alternative but in fewer areas of the ~~e~~City than Alternative 2. Figure

6 shows the proposed Comprehensive Plan designations map, and Figure 7 shows the proposed zoning map for Alternative 1.

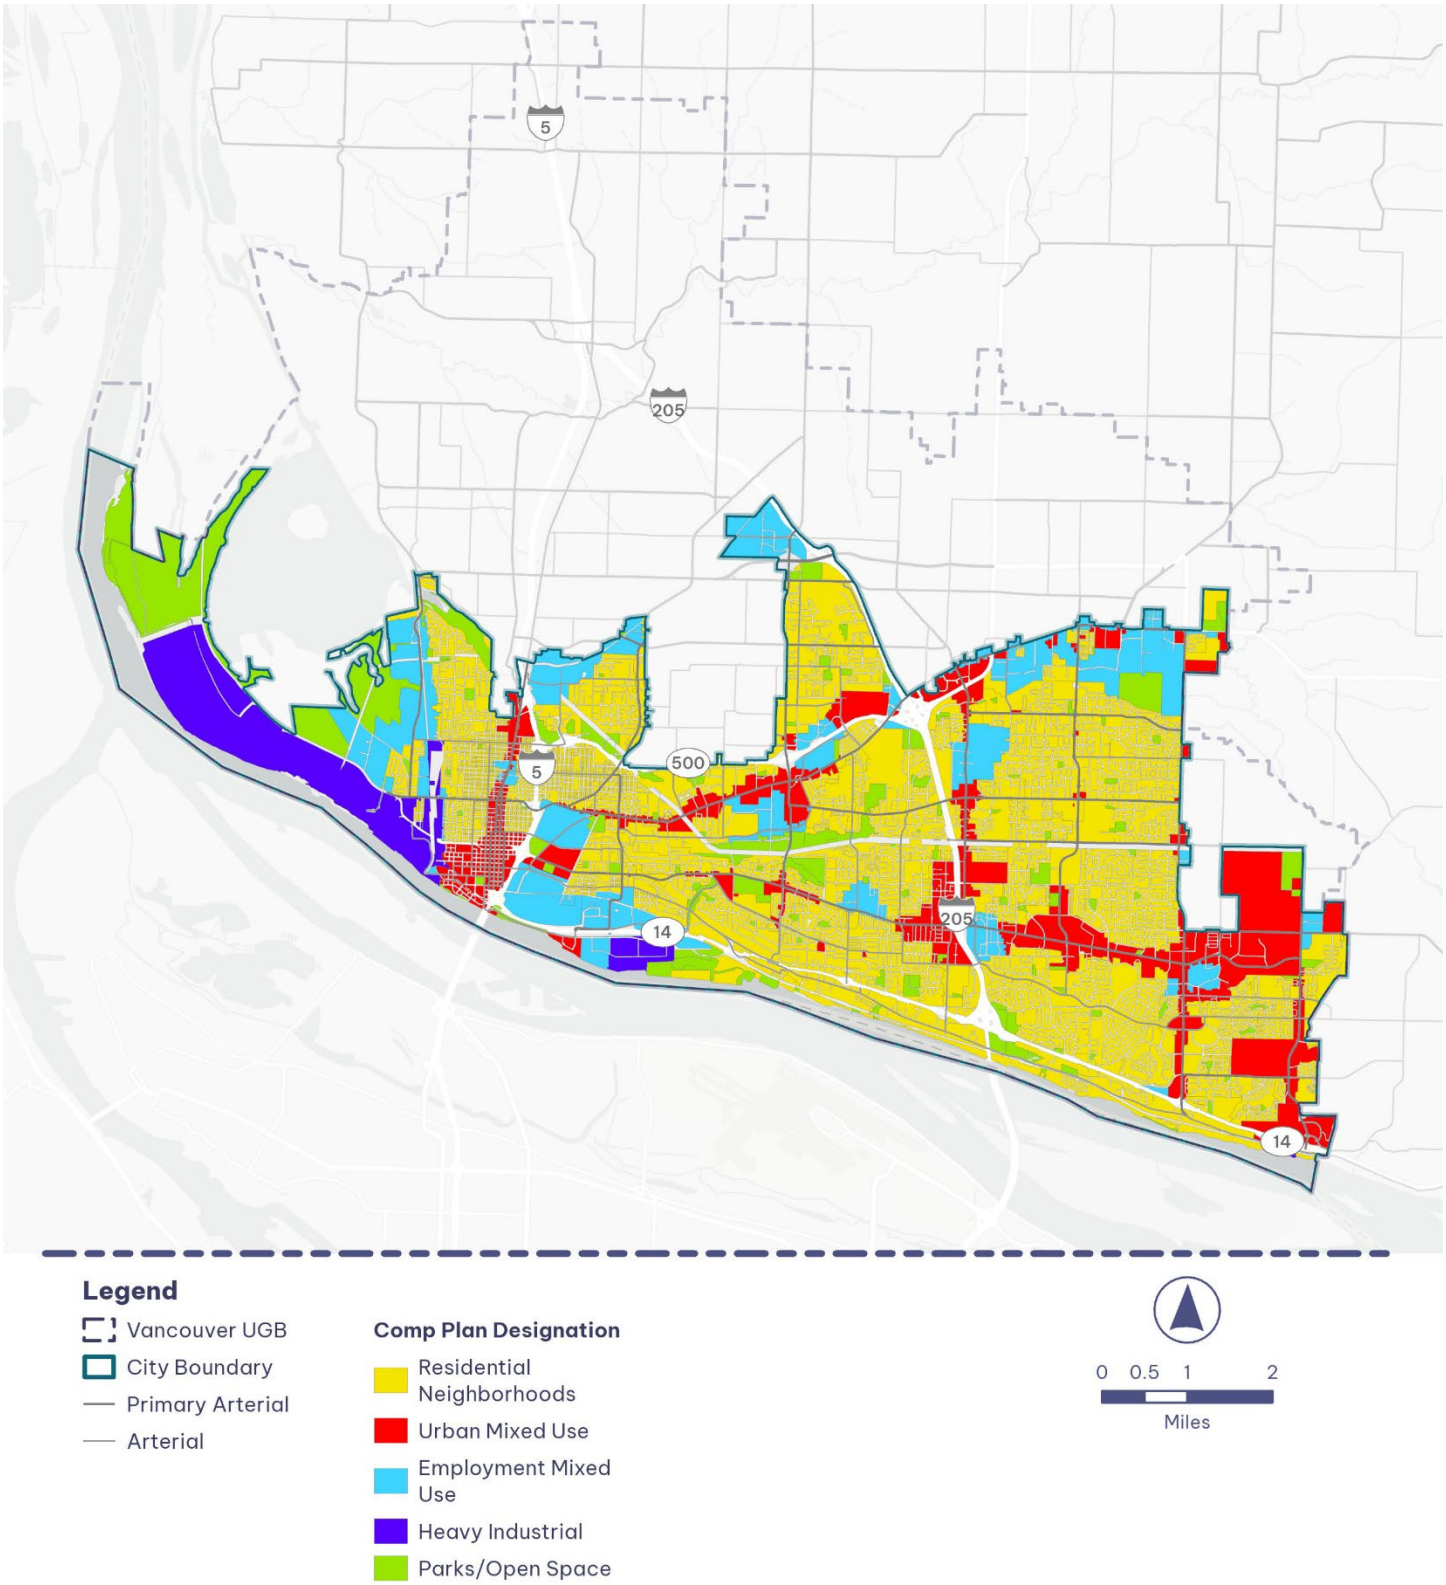
In West Vancouver (western city limits to west of I-5), large areas of Heavy Industrial and Industrial/Employment lands would remain. The existing Commercial areas of downtown Vancouver would be designated as Regional Activity Center, allowing for continued development of housing, office, civic, and entertainment uses. Existing commercial and residential corridors along Main Street would be designated as Mixed-Use Neighborhood. Existing lower-density residential areas just north of downtown Vancouver would be designated as the denser Medium-Scale Neighborhood. Lower-density residential areas north of Fourth Plain Boulevard would be similarly designated as Low-Scale Neighborhood.

In Central Vancouver (between I-5 and I-205), the lower-density residential neighborhoods south of East Mill Plain Boulevard would be similarly designated as Low-Scale Neighborhood. There would be greater areas of denser Mixed-Use and Medium-Scale Neighborhoods along the East Mill Plain Boulevard and Northeast Fourth Plain Boulevard corridors compared to the No Action Alternative. The Vancouver Mall and adjacent areas along Northeast Fourth Plain Boulevard would be rezoned from Commercial to Industrial/Employment and Regional Activity Center, allowing for some potential job growth and denser housing development. Most of the area north of the Vancouver Mall would be designated as Medium-Scale Neighborhood, allowing for denser housing types than under the No Action Alternative.

In East Vancouver (from I-205 east to the eastern city limits), there would be expanded areas of Mixed-Use Neighborhood along Mill Plain Boulevard, 164th Avenue, and 192nd Avenue, which would allow for more housing compared to the Industrial and Commercial designations under the No Action Alternative. The vacant Section 30 site at the far east end of the ~~e~~City would be designated as Mixed-Use Neighborhood, bordered by Regional Activity Center, a change from the largely Industrial designation under the No Action Alternative.

These changes in land use designations would result in a higher capacity for new housing units and jobs than the No Action Alternative but a lower capacity than Alternative 2. Based on market feasibility and redevelopment potential, Alternative 1 would have capacity for approximately 45,100 new housing units and 46,000 new jobs citywide, which exceeds the City's minimum 2045 planning targets. Refer to Appendix B for the methods and assumptions for forecasting future housing and jobs capacity.

Figure 6. Alternative 1 Proposed Comprehensive Plan Designations Map



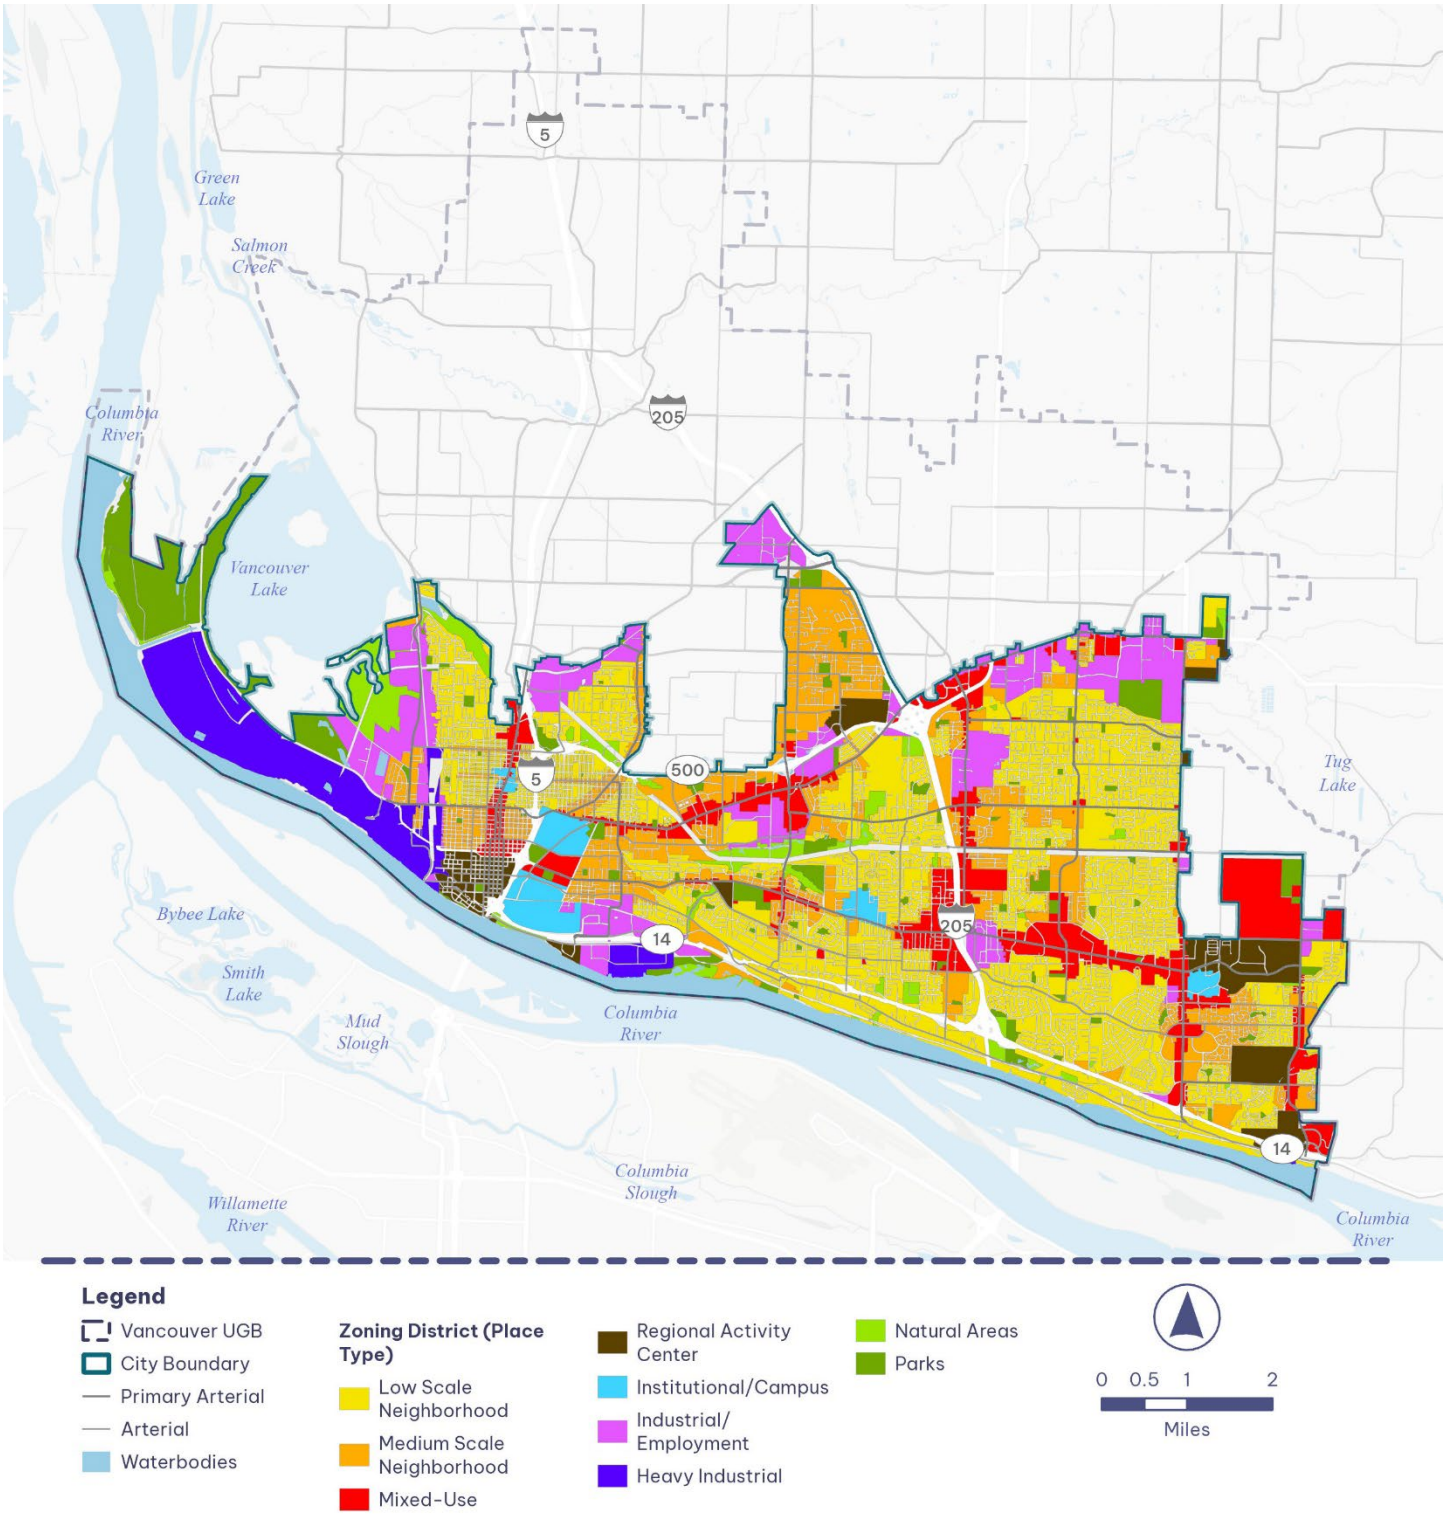


Figure 7. Alternative 1 Proposed Zoning Districts Map

Alternative 2

Alternative 2 would allow the greatest intensity and density of development in more areas of the city. Figure 8 shows the proposed Comprehensive Plan designations map, and Figure 9 shows the proposed zoning map for Alternative 2.

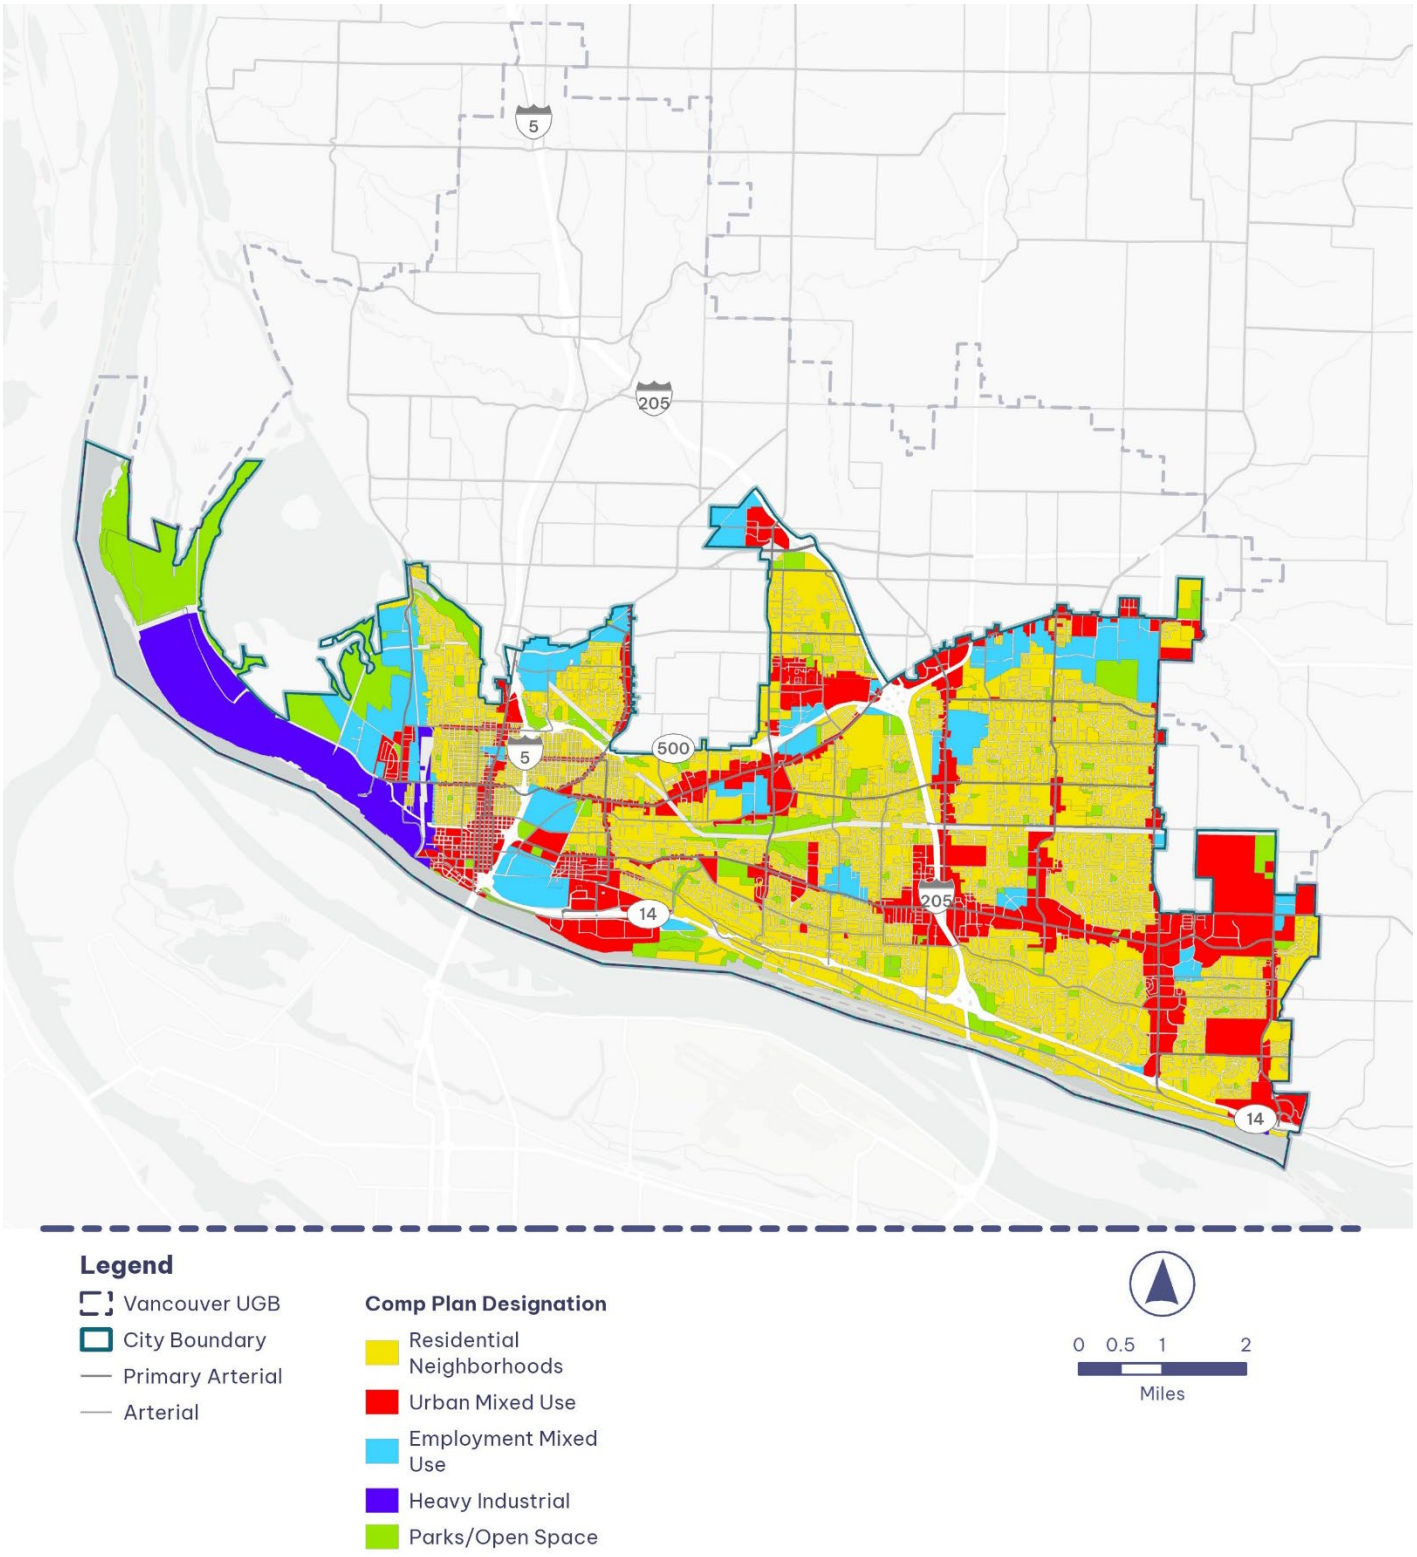
In West Vancouver, the same Heavy Industrial and Industrial/Employment lands would remain as in Alternative 1. Downtown commercial areas would be designated as Regional Activity Center, and would extend farther north on Main Street than Alternative 1. Existing commercial and residential lands north of Fourth Plain Boulevard along Main Street would be designated as Mixed-Use Neighborhood. Compared to Alternative 1, more existing residential areas just north of downtown Vancouver would be designated as Medium-Scale Neighborhood. Lower-density residential areas of Northwest Vancouver would be similarly designated as Low-Scale Neighborhood.

In Central Vancouver, similar to Alternative 1, the existing lower-density residential neighborhoods south of East Mill Plain Boulevard would be designated as Low-Scale Neighborhood. Alternative 2 would have larger areas of Mixed-Use Neighborhood, Medium-Scale Neighborhood, and Regional Activity Center zoning districts along the East Mill Plain Boulevard and Northeast Fourth Plain Boulevard corridors than Alternative 1. Similar to Alternative 1, the Vancouver Mall and adjacent areas along Northeast Fourth Plain Boulevard would be designated as Regional Activity Center, allowing for greater potential job growth and new denser housing. Larger areas north and west of the Vancouver Mall would be designated as Mixed-Use Neighborhood or Medium-Scale Neighborhood than under Alternative 1, allowing for greater potential housing density.

In East Vancouver, Alternative 2 would have larger areas of Mixed-Use Neighborhood and Regional Activity Center zoning districts along major corridors such as Mill Plain Boulevard, 164th Avenue, and 192nd Avenue compared to Alternative 1. Alternative 2 would also include larger areas of Medium-Scale Neighborhood in the neighborhoods adjacent to these corridors and smaller areas of Low-Scale Neighborhood. More land at and near the Section 30 site would be designated as a Regional Activity Center than in Alternative 1.

Alternative 2 would have the highest capacity for new housing units and jobs. Based on market feasibility and redevelopment potential, Alternative 2 would have capacity for approximately 50,700 new housing units and 49,300 new jobs citywide, which exceeds the minimum City's 2045 targets. Refer to Appendix B for the methods and assumptions for forecasting future housing and jobs capacity.

Figure 8. Alternative 2 Proposed Comprehensive Plan Designations Map



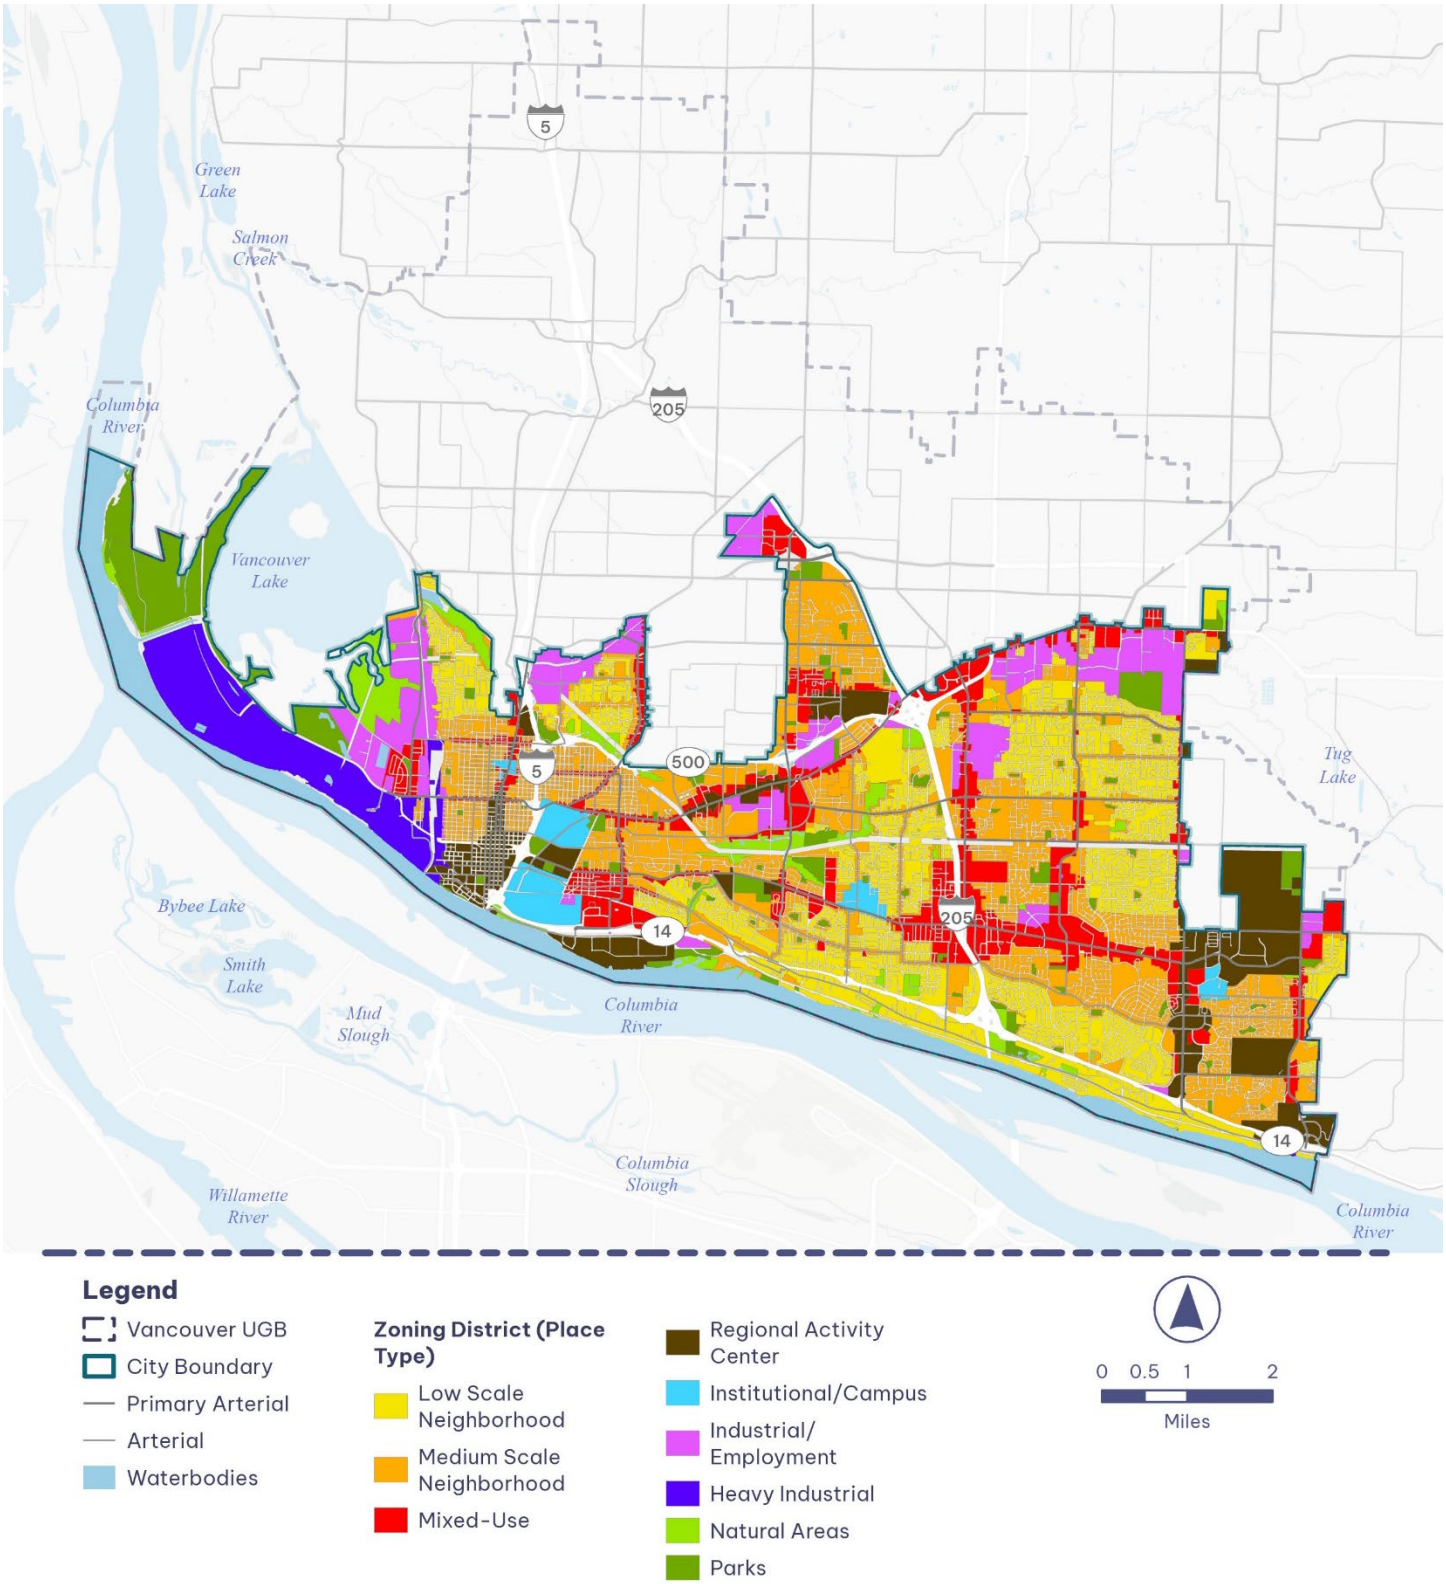


Figure 9. Alternative 2 Proposed Zoning Districts Map

Preferred Alternative

The Preferred Alternative would allow a greater intensity and density of development in more areas of the City than the No Action Alternative and a similar mix of land uses and zoning districts compared to Alternatives 1 and 2.

Figure 10 shows the proposed Comprehensive Plan designations map, and Figure 11 shows the proposed zoning map for the Preferred Alternative. The color scheme and format of these maps differ slightly from previous alternatives presented in the Draft EIS for consistency with the proposed Comprehensive Plan Update.

In West Vancouver, large areas of Heavy Industrial and Industrial/Employment lands would remain. Similar to Alternative 2, the existing Commercial areas of downtown Vancouver would be designated as Regional Activity Center, allowing for continued development of housing, office, civic, and entertainment uses. Similar to Alternative 2, existing commercial and residential corridors along Main Street would be designated as Mixed Use Neighborhood and Regional Activity Center. Existing lower-density residential areas just north of downtown Vancouver would be designated as the denser Medium-Scale Neighborhood. This area of Medium-Scale Neighborhood would extend farther north compared to Alternatives 1 and 2. The northernmost lower-density residential areas would be designated as Low-Scale Neighborhood.

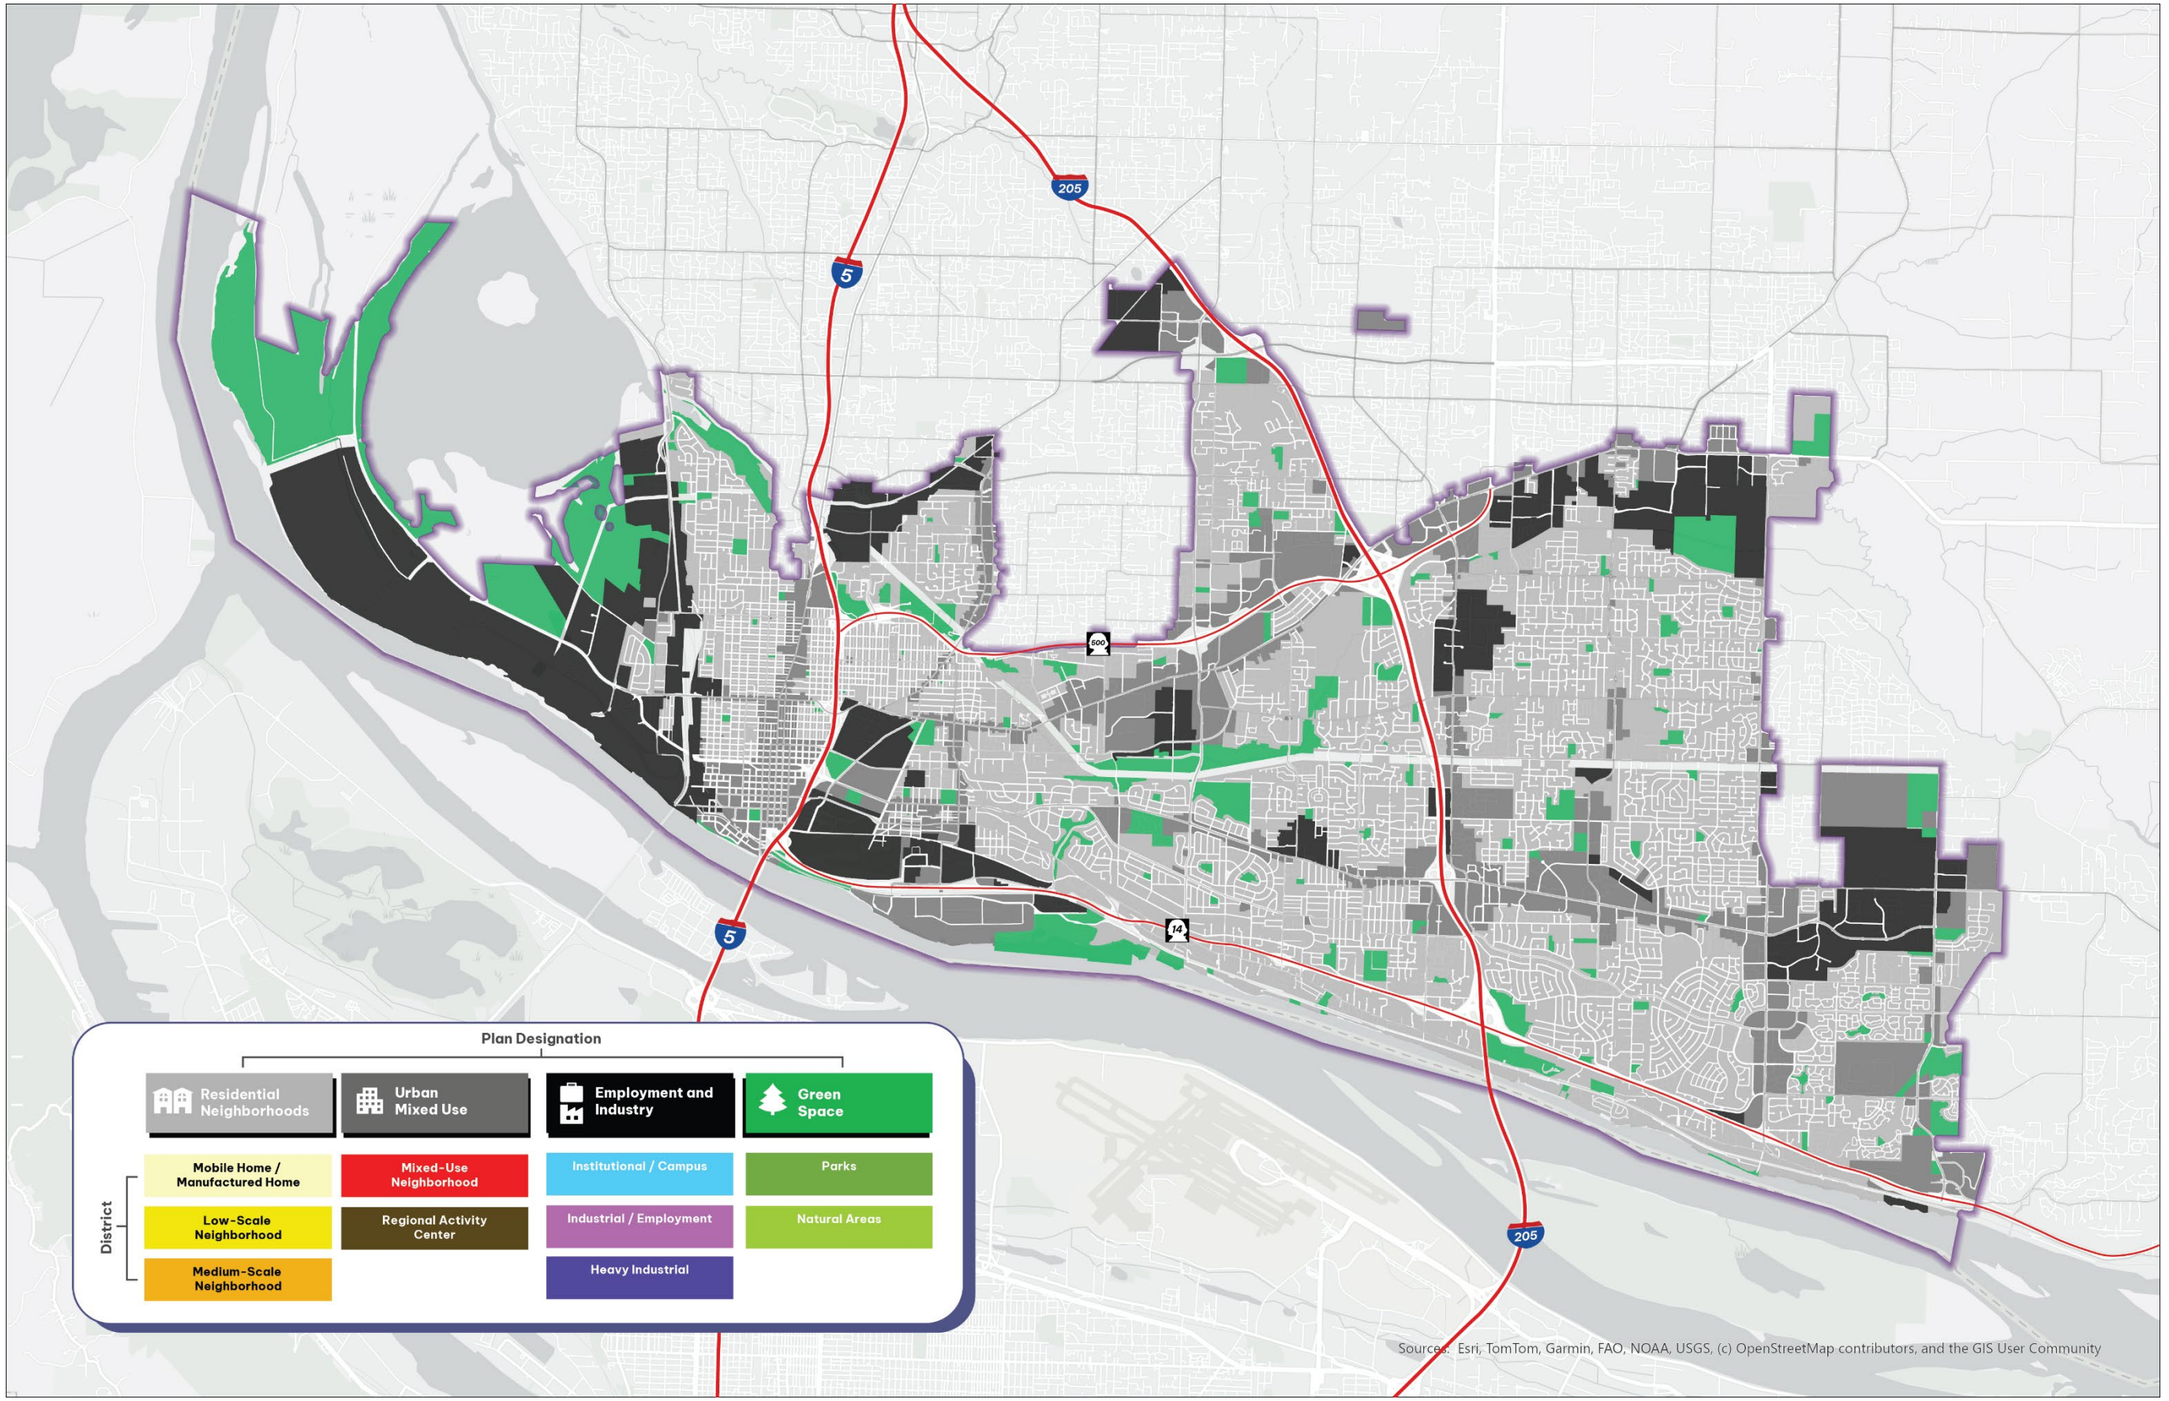
In Central Vancouver, the lower-density residential neighborhoods south of East Mill Plain Boulevard would be designated as Low-Scale and Medium-Scale Neighborhood, with more area designated for Medium-Scale Neighborhood compared to Alternatives 1 and 2. Along East Mill Plain west of the Heights area, the corridor would be designated as Medium-Scale Neighborhood, whereas in Alternatives 1 and 2 it would be designated as Mixed Use Neighborhood. Similar to Alternative 2, there would be greater areas of denser Mixed-Use and Medium-Scale Neighborhoods along the East Mill Plain Boulevard and Northeast Fourth Plain Boulevard corridors, as compared to Alternative 1. The Vancouver Mall and adjacent areas along Northeast Fourth Plain Boulevard would be rezoned from Commercial to Regional Activity Center and Mixed-Use, allowing for some potential job growth and denser housing development. The Preferred Alternative would be different from Alternatives 1 and 2 by designating the Vancouver Plaza area as Mixed Use, rather than Industrial/Employment. Most of the area north of the Vancouver Mall would be designated as Medium-Scale Neighborhood, allowing for denser housing types similar to Alternative 1.

In East Vancouver, there would be expanded areas of Mixed-Use Neighborhood and Regional Activity Center along Mill Plain Boulevard, 164th Avenue, and 192nd Avenue, similar to Alternative 2. The mostly vacant Section 30 site at the far east end of the City would be designated as Institutional/Campus, bordered by Mixed Use Neighborhood and

Industrial/Employment, a change from the largely Industrial designation under the No Action Alternative, Mixed-Use under Alternative 1, and Regional Activity Center under Alternative 2.

These changes in land use designations would result in a higher capacity for new housing units and jobs than the No Action Alternative but a lower capacity than Alternatives 1 and 2. New housing capacity would be spread more evenly throughout all areas of the city, compared to Alternatives 1 and 2, which focused a substantial portion of the potential for new housing capacity in East Vancouver. Based on market feasibility and redevelopment potential, the Preferred Alternative would have capacity for approximately 44,100 new housing units and 45,100 new jobs citywide, which exceeds the City's minimum 2045 planning targets. Refer to Appendix B for the methods and assumptions for forecasting future housing and jobs capacity.

Figure 10. Preferred Alternative Proposed Comprehensive Plan Designations Map



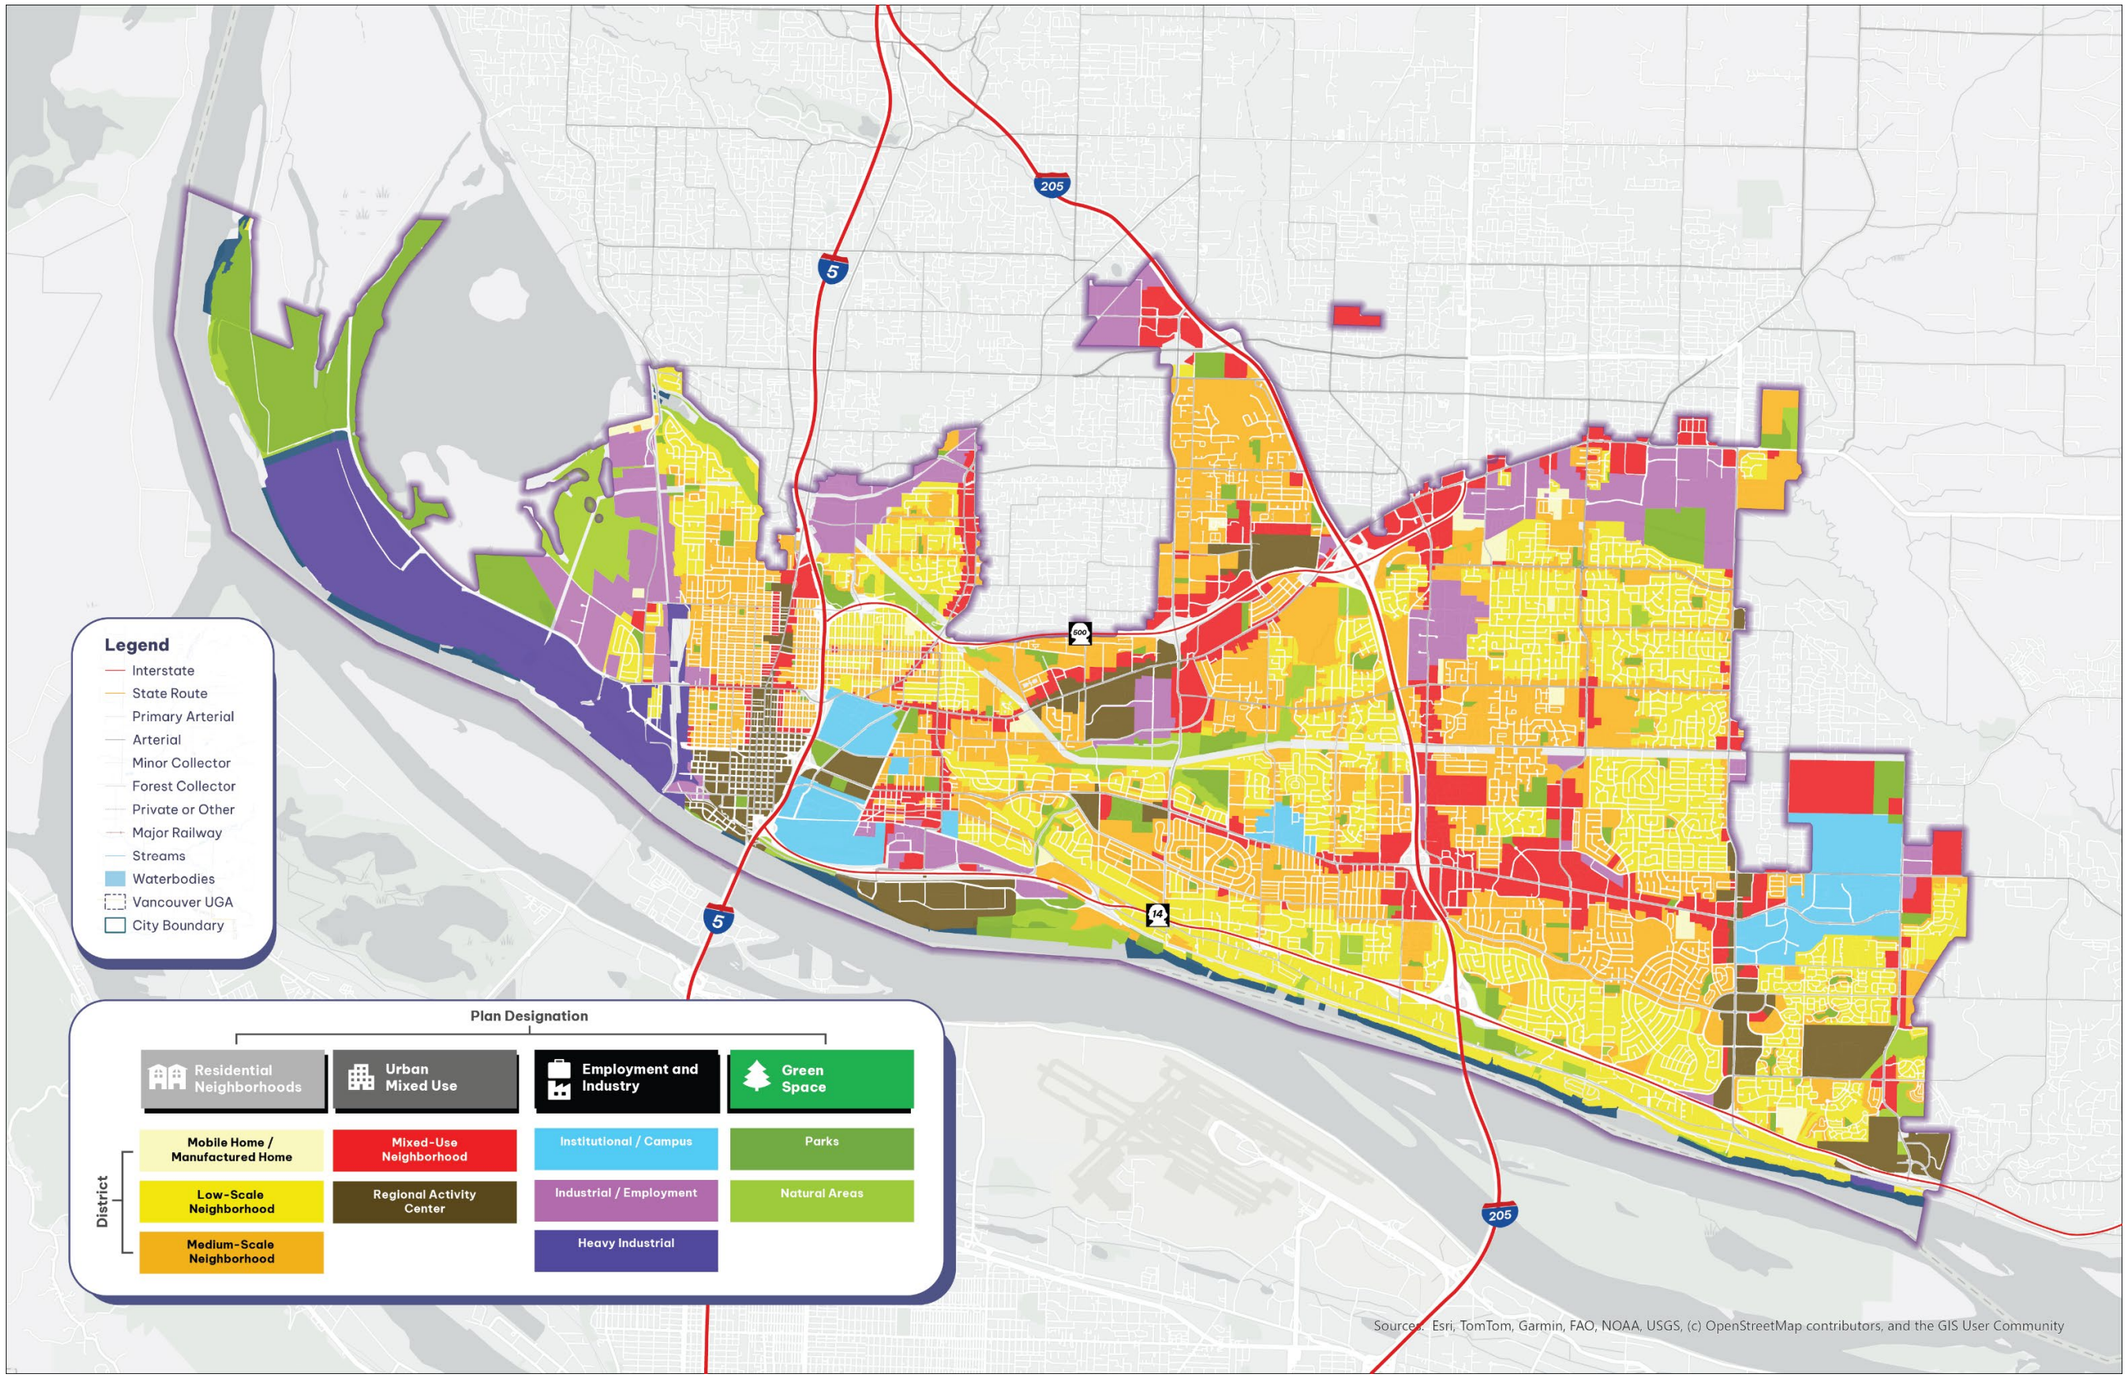


Figure 11. Preferred Alternative Proposed Zoning Districts Map

Comparison of Alternatives

Of all the alternatives, Alternative 2 would allow the greatest density, intensity, and mix of land uses in the most areas of the city, and the No Action Alternative would allow the least. Alternative 1 would allow greater density, intensity, and mix of land uses in more areas of the ~~e~~City than the No Action Alternative but generally less than Alternative 2. The Preferred Alternative would allow greater density and intensity in more areas of the City than the No Action Alternative and would have a similar mix of land uses to Alternative 2.

Table 3 summarizes the differences in the amount of land acreage devoted to the different zoning districts proposed in the Comprehensive Plan Update.

The overall split of zoning districts by land acreage would be similar among the action alternatives. Under all alternatives, predominantly residential Low-Scale and Medium-Scale Neighborhood zoning districts would make up about half of the city's total land area. For Alternative 2 and the Preferred Alternative, the amount of land within those zoning districts would be split more equally between Medium-Scale Neighborhood and Low-Scale Neighborhood. The Preferred Alternative includes a new zoning district, Manufactured Home, that would preserve a small amount of land with existing manufactured home park developments as specifically designated for that use.

The total acreage of the Institutional/Campus zoning district (and equivalent land uses under the No Action Alternative; refer to Table 2) would be greatest under the Preferred Alternative and would be similar under ~~all~~the No Action and A~~a~~lternatives 1 and 2. There would be no meaningful difference among the alternatives in the total land area zoned as Parks and Natural Areas.

There would be slightly less Heavy Industrial and Industrial/Employment land area (and equivalent land uses under the No Action Alternative; refer to Table 2) under Alternative 2 and the Preferred Alternative than the No Action Alternative and Alternative 1. Alternative 2 would have the most land designated as Regional Activity Center and Mixed Use and would include the greatest capacity for future job growth compared to the other alternatives.

The biggest differences in zoning districts, as measured by land area, would be:

- Almost 50% more land area designated as Low-Scale Neighborhood under Alternative 1 compared to Alternative 2 and the Preferred Alternative.
- Almost 50% more land area designated as Medium-Scale Neighborhood under Alternative 2 and the Preferred Alternative compared to Alternative 1.

- More than double the land area designated as a Regional Activity Center under Alternative 2 compared to Alternative 1 and about 40% more compared to the Preferred Alternative.
- Nearly double the land area designated as Institutional/Campus under the Preferred Alternative compared to Alternatives 1 and 2 and the No Action Alternative.

Table 3. Comparison of Acreage of Zoning Districts by Alternative

Zoning District	No Action Acreage (Percentage of Total Land Area)[a]	Alternative 1 Acreage (Percentage of Total Land Area)	Alternative 2 Acreage (Percentage of Total Land Area)	Preferred Alternative (Percentage of Total Land Area)
Heavy Industrial	~~1,688~~ 1,771 (7%)	~~1,688~~ 1,771 (7%)	~~1,535~~ 1,610 (~~6~~ 7%)	1,609 (7%)
Industrial/Employment	~~2,788~~ 2,943 (~~11~~ 12%)	~~2, 724~~ 2,866 (~~11~~ 12%)	~~2,128~~ 2,263 (9%)	2,274 (9%)
Institutional/Campus	~~562~~ 566 (2%)	~~591~~ 600 (2%)	~~576~~ 589 (2%)	1,168 (5%)
Low-Scale Neighborhood	~~9,960~~ 10,149 (41%)	~~8,648~~ 8,759 (~~36~~ 35%)	~~5,346~~ 5,388 (22%)	5,830 (24%)
Medium-Scale Neighborhood	~~2,872~~ 2,911 (12%)	~~3,915~~ 4,003 (16%)	~~6,321~~ 6,469 (26%)	6,304 (25%)
Manufactured Home[b]	N/A	N/A	N/A	205 (1%)
Mixed Use	~~1,955~~ 1,970 (8%)	~~2,611~~ 2,636 (11%)	~~2,984~~ 3,015 (12%)	2,718 (11%)
Natural Areas[bc]	~~1,368~~ 1,340 (~~6~~ 5%)	~~993~~ 997 (4%)	~~993~~ 996 (4%)	1,064 (4%)
Parks[c]	~~1,544~~ 1,530 (6%)	1,990 (8%)	~~1,990~~ 1,992 (8%)	2,004 (8%)
Regional Activity Center	~~1,536~~ 1,555 (6%)	~~1,121~~ 1,122 (5%)	~~2,406~~ 2,426 (10%)	1,569 (6%)
Total[cd, e]	~~24,275~~ 24,734	~~24,279~~ 24,744	~~24,279~~ 24,744	24,746

Notes:

a Acreage for the No Action Alternative zoning districts is approximate and based on converting land acreages from their existing Comprehensive Plan and zoning designations to their most similar proposed zoning districts. For example, all parcels zoned currently as R-2, R-4, R-6, and R-9, referred to as "Urban Lower Density" areas in the current Comprehensive Plan, were classified as the proposed new Low-Scale Neighborhood zoning district. All parcels currently zoned CN (Neighborhood Commercial), CC (Community Commercial), and GC (General Commercial) were classified as the Mixed-Use zoning district. These reclassifications are only for the purposes of this comparison. No reclassification would occur under the No Action Alternative.

b The Manufactured Home zoning district was still in development at the time of the Draft EIS and is therefore only included in the Preferred Alternative analysis for this Final EIS.

~~b~~c Parks and natural areas acreage includes both public and non-public land for the No Action Alternative but only public land for the action alternatives. In the action alternatives, non-publicly owned or non-publicly accessible areas that were zoned as Parks/Open Space uses are assumed to match the underlying zoning based on their relative location to other zoning districts. Effectively, there is assumed to be no difference in parks/open space acreage among the No Action and Action Alternatives. The Comprehensive Plan Update and EIS identify parks/open space needs based on future growth projections, but the proposed Comprehensive Plan designations and zoning maps do not include additional Parks or Natural Areas zoning because future acquisitions are not known at this time. Park acreage will likely increase during the 20-year planning period as additional park land is acquired to serve growth.

~~c~~d Total citywide land acreage is assumed to be the same across all alternatives but may not match due to rounding and differences in how parks/natural areas are accounted for (refer to note ~~No. 2~~c). Acreage does not include land designated as roads, easements, or water.

e The methodology to calculate acreage of zoning districts changed slightly between the Draft EIS and Final EIS to be based on zones rather than parcels. The total acreage across the City is now more consistent between the No Action and action alternatives.

Table 4 summarizes the differences in estimated capacity for future jobs and housing under the alternatives.

Table 4. Comparison of 2045 Estimated Housing and Jobs Capacity by Alternative

Metric	City Target	No Action Alternative[a]	Alternative 1	Alternative 2	Preferred Alternative
Capacity for New Housing Units	38,129	29,600	45,100	50,700	44,100
Capacity for New Jobs	43,198	16,600	46,000	49,300	45,100

Note:

a As described in the text below this table, limitations on modeling for the No Action Alternative should be considered when comparing its estimated growth capacity with the estimated growth capacities of the action alternatives. Refer to Appendix B for the full methodology used.

Alternative 1, ~~and~~ Alternative 2 and the Preferred Alternative would ~~both~~ all exceed the minimum City targets for new housing units and jobs by 2045. Alternative 2 would have the highest capacity for each. The No Action Alternative would not meet GMA requirements or minimum City targets for new housing units and jobs. The differences in the estimated growth capacities between the No Action Alternative, ~~and~~ Alternatives 1 and 2, and the Preferred Alternative reflect practical limitations in how the capacity estimates are calculated, in addition to the fact that the No Action Alternative allows for less intensive future growth, particularly outside of single-family zones.

The No Action Alternative capacity forecast is based on the Clark County Vacant Buildable Lands Model (VBLM) and existing redevelopment assumptions built into the model. The VBLM does not fully account for the feasibility of redevelopment, particularly as it relates to redevelopment to support job growth. The No Action Alternative uses the VBLM because it

would retain existing zoning classifications and their allowed densities and uses, and therefore, the assumptions related to employment density and redevelopment rate used in the action alternatives do not apply to the No Action Alternative. This results in a different capacity analysis methodology for the No Action Alternative compared to the action alternatives.

The housing and jobs capacity forecasts for Alternatives 1 and 2 and the Preferred Alternative consider market and ~~re~~development feasibility while accounting for limitations on redevelopment, including ~~and other limiting factors, such as~~ the presence of critical areas or required infrastructure. ~~, that would influence new development. They are intended to~~ The forecasts provide an analysis of feasible developments based on current market factors; therefore, the capacity numbers are lower than the maximum build-out that would be allowed by the new zoning designations in each alternative. ~~the basis for analyzing the impacts of a feasible level of potential build-out under each of the alternatives in the Draft EIS. These capacity forecasts are therefore lower than the maximum build-out that would be allowed outright by the zoning designations for each alternative.~~ During the review of Alternatives 1 and 2, additional considerations were added to the methodology for the Preferred Alternative to account for the presence of master plan and development agreements, presence of private covenants limiting development, and zoning allowances, which further limited development feasibility. Refer to Appendix B for the methods and assumptions used for forecasting future estimated housing and jobs capacity.

Under all alternatives, the actual timing and distribution of future growth would be influenced by future market conditions, decisions made by individual property owners and developers, and other factors.

Chapter 3: Built Environment

Note to readers: This Final Environmental Impact Statement document retains and builds upon the information presented in the Draft Environmental Impact Statement. New content in this chapter is generally denoted with underlined text, while changes to information are denoted with strikethrough text. Updates focus on adding the new analysis of the Preferred Alternative, as well as minor corrections and clarifications to the analysis presented in the Draft EIS. Some changes are denoted with footnotes and table notes when further explanation was warranted.

This chapter describes the methodologies, existing conditions (affected environment), and potential impacts of the alternatives for the following environmental topic areas related to the built environment: land and shoreline use, housing, aesthetics, historic and cultural preservation, transportation, and public services and utilities.

For each topic, the chapter provides a summary of impacts common to all alternatives, impacts unique to each alternative, and a summary of potential avoidance, minimization, and mitigation measures to address potential impacts and identifies impacts that are considered to be significant and unavoidable under SEPA.

Land and Shoreline Use

Methodology

Analysts reviewed relevant information and policies about existing land and shoreline use and current data on citywide population and employment, including the following sources:

- **Washington State Growth Management Act (GMA)** – Passed in 1990 to require urbanizing jurisdictions to adopt comprehensive plans and to establish statewide thresholds and guides for growth. The intent of the GMA is to direct growth for sustainable development with sufficient public infrastructure and facilities to support such growth while also protecting resourcing lands. Additionally, since the establishment of the GMA, updated state level policies have been focused on promoting healthy, walkable communities; preserving natural resources; providing affordable housing opportunities; and planning for climate change and its impacts.
- **Clark County Countywide Planning Policies** – Used to establish a countywide framework for growth management, coordinate the comprehensive plans of all jurisdictions within Clark County for regional issues or issues affecting common borders, and develop and adopt county and city comprehensive plans.

- **Vancouver Comprehensive Plan 2011-2030** (City of Vancouver 2021a) – This plan envisioned the ~~e~~City for the next 20 years (through 2030) for community and economic development, housing, environment, public facilities and services, and annexation. It also provided strategies for the plan's implementation and established land use designations across the city, which are consistent with complimentary land use zones regulated by VMC Title 20. The 2011 Comprehensive Plan is the basis for the Our Vancouver Comprehensive Plan Update.
- **VMC Title 20, Land Use and Development Code** - Contains the City's zoning and development regulations, which are required to be updated and consistent with its Comprehensive Plan per GMA mandates.
- **City of Vancouver Shoreline Master Program** (City of Vancouver 2021b) – Envisions the development along the Vancouver shoreline, including how to promote public health, safety, and community welfare while ensuring no net loss of shoreline ecological functions. The SMP defines shoreline development and management practices that are in accordance with state practices and codes and provides specific guidelines regarding general requirements, exemptions and uses. The goal of the SMP is to allow for mutually compatible uses between shoreline preservation and land use development.
- **U.S. Census Bureau American Community Survey** (Census 2023a)- Provides a variety of demographic information on a yearly basis at the national, state, regional, and city levels. This EIS uses primarily ACS 2019-2023 five-year and 2023 one-year data as the basis for analysis for consistency with other recent studies completed for the Comprehensive Plan Update. 2023 is the baseline year of analysis for the Comprehensive Plan Update.
- OUR VANCOUVER **Community Atlas** (Design Workshop 2024) – Documents existing ~~e~~City conditions for a variety of topics including people; natural environment; cultural resources; built environment; economy; parks, recreation, open spaces, and trails; and a regulatory framework assessment to support the City's update of the Comprehensive Plan and VMC Title 20 per GMA requirements. The analysis is referenced in this EIS and will also be used to inform the Comprehensive Plan development.
- OUR VANCOUVER **Economic Conditions and Opportunities Analysis** (ECONorthwest 2024a) – Prepared to support the Comprehensive Plan Update and outlines the basis for the City's 2045 target of 43,198 jobs. The analysis includes findings related to economic conditions and competitiveness, including measures of employment, growth and productivity, business creation and retention, entrepreneurship, investment flows, access to capital, distribution of wealth and income, and racial and geographic inclusion. Key information from the memorandum is referenced in this EIS and will also be included in the Economic Opportunity Element of the Comprehensive Plan to inform the City's economic development through 2045.

- OUR VANCOUVER **Housing Needs Assessment** (ECONorthwest 2024b) – Establishes the City's 2045 target of 38,129 housing units through evaluation of current housing stock and supply, existing conditions and housing needs across the income spectrum, and the current and projected future demand for housing. The insights from this analysis are referenced in this EIS and will build a factual basis for updating the Housing Element of the Comprehensive Plan and its supporting policies through 2045.
- OUR VANCOUVER **Equity Analysis** (Seva Workshop 2024) - Includes context and conditions analysis that helps to identify which communities within the ~~e~~City have been historically marginalized and which communities are most vulnerable to displacement and policy changes. The City is committed to prioritizing these identified communities in the Comprehensive Plan Update process to help address past inequities.
- OUR VANCOUVER **Draft Health Impact Assessment** (BERK 2025) - Considers how the growth alternatives studied as part of the OUR VANCOUVER Comprehensive Plan periodic update may benefit and impact health in Vancouver as it relates to the built environment.

Analysts then reviewed the alternatives to determine potential adverse impacts and associated mitigation measures using the following metrics:

- Compatibility with land and shoreline use plans and policies
- Ability to accommodate adopted citywide minimum growth targets
- Compatibility with existing land uses
- Average wage of new jobs based on land use mix
- Level of commercial displacement risk

Affected Environment

Current Land Use

This section discusses the City's existing Comprehensive Plan land use designations and zoning, land cover, land uses, centers and corridors, commercial uses, industrial uses, and essential services. Refer to the Housing section of Chapter 3 for more information about current residential land uses.

Comprehensive Plan Land Use Designations and Zoning

The current Vancouver Comprehensive Plan establishes general patterns for future land use, transportation and other infrastructure needs. Subarea plans provide more detailed geographically based plans for neighborhoods, corridors, Urban Reserve areas, special districts and joint planning areas.

Citywide development is guided and allocated by zoning, codified in VMC Title 20, Land Use and Development Code. The City designates various use types within each zoning category, which include residential, commercial, and industrial zone districts in addition to specialized zone districts for mixed uses and parks and open spaces.

Table 5 provides the existing Comprehensive Plan designations, their respective descriptions, and corresponding zoning districts. Zoning establishment and requirements and development standards are regulated in VMC Chapter 20.410 as summarized in Appendix C, Land Use and Zoning Information. Figure 4 in Chapter 2 shows a map of the No Action Alternative Comprehensive Plan designations, and Figure 5 in Chapter 2 shows a map of the No Action Alternative zoning designations, which would be the same as current Comprehensive Plan and zoning designations.

Table 5. Current Comprehensive Plan Designations and Corresponding Zoning Districts

Current Comprehensive Plan Designation	Description	Corresponding Zoning Districts/Zones	Allowed Uses
Residential Urban Lower Density	Predominantly lower density residential development with some allowances for middle housing types.[a]	R-2 R-4 R-6 R-9 R-17	Single-family detached residential, duplexes, townhouse, and single-family homes on small lots using infill standards.
Residential Urban Higher Density	Predominantly higher-density residential uses.	R-18 R-22 R-30 R-35 R-50 Mixed Use (MX)	Apartments, condominiums, duplexes, townhouses, small-lot single-family homes, and mixed uses.

Current Comprehensive Plan Designation	Description	Corresponding Zoning Districts/Zones	Allowed Uses
Commercial and Mixed Use	Predominantly small to medium-scale mixed-use and/or commercial uses and services scaled to serve a neighborhood to citywide need. This designation includes specific, planned mixed-use areas within the city.	Neighborhood Commercial (CN) Community Commercial (CC) General Commercial (CG) City Center (CX) Waterfront Mixed Use (WX) Vancouver Central Park (CPX) Riverview Gateway (RGX)[b] MX The Heights (HX)	General retail, entertainment oriented, motor vehicle related uses, some office related uses, parks open space related uses, and some low intensity industrial uses.
Industrial	Predominantly industrial related uses, including airports.	Office Commercial Industrial (OCI) Employment Center Mixed-Use (ECX) Light Industrial (IL) Heavy Industrial (IH) Airport (A)	Basic utilities, some general retail, motor vehicle related uses, office related uses, light and heavy industrial uses, agricultural uses, airport and accessory uses, and parks and open space.
Open Space	Areas intended for parks, greenways, and natural areas.	Greenway (GW) Natural Area (NA) Park (P)	Some agricultural related uses, environmental management and education, and park and recreation facilities.

Current Comprehensive Plan Designation	Description	Corresponding Zoning Districts/Zones	Allowed Uses
Public Facility	Areas developed with or planned for public facilities.	All Zones	Schools, police departments, fire departments, and hospitals.

Source: City of Vancouver 2021a

Notes:
a Middle housing refers to duplexes, townhouses, quadplexes, and sixplexes.
b RGX zone is also consistent with Low-Density Residential, High Density Residential, and Industrial Comprehensive Plan designations.

Existing Land Uses

Vancouver has three loosely defined geographies with differing land uses: west (areas west of I-5), central (areas between I-5 and I-205) and east (areas east of I-205). These geographies within the ~~e~~City developed over time, generally west to east, and are reflective of different settlement patterns, regulations, and periods of growth (City of Vancouver 2023a).

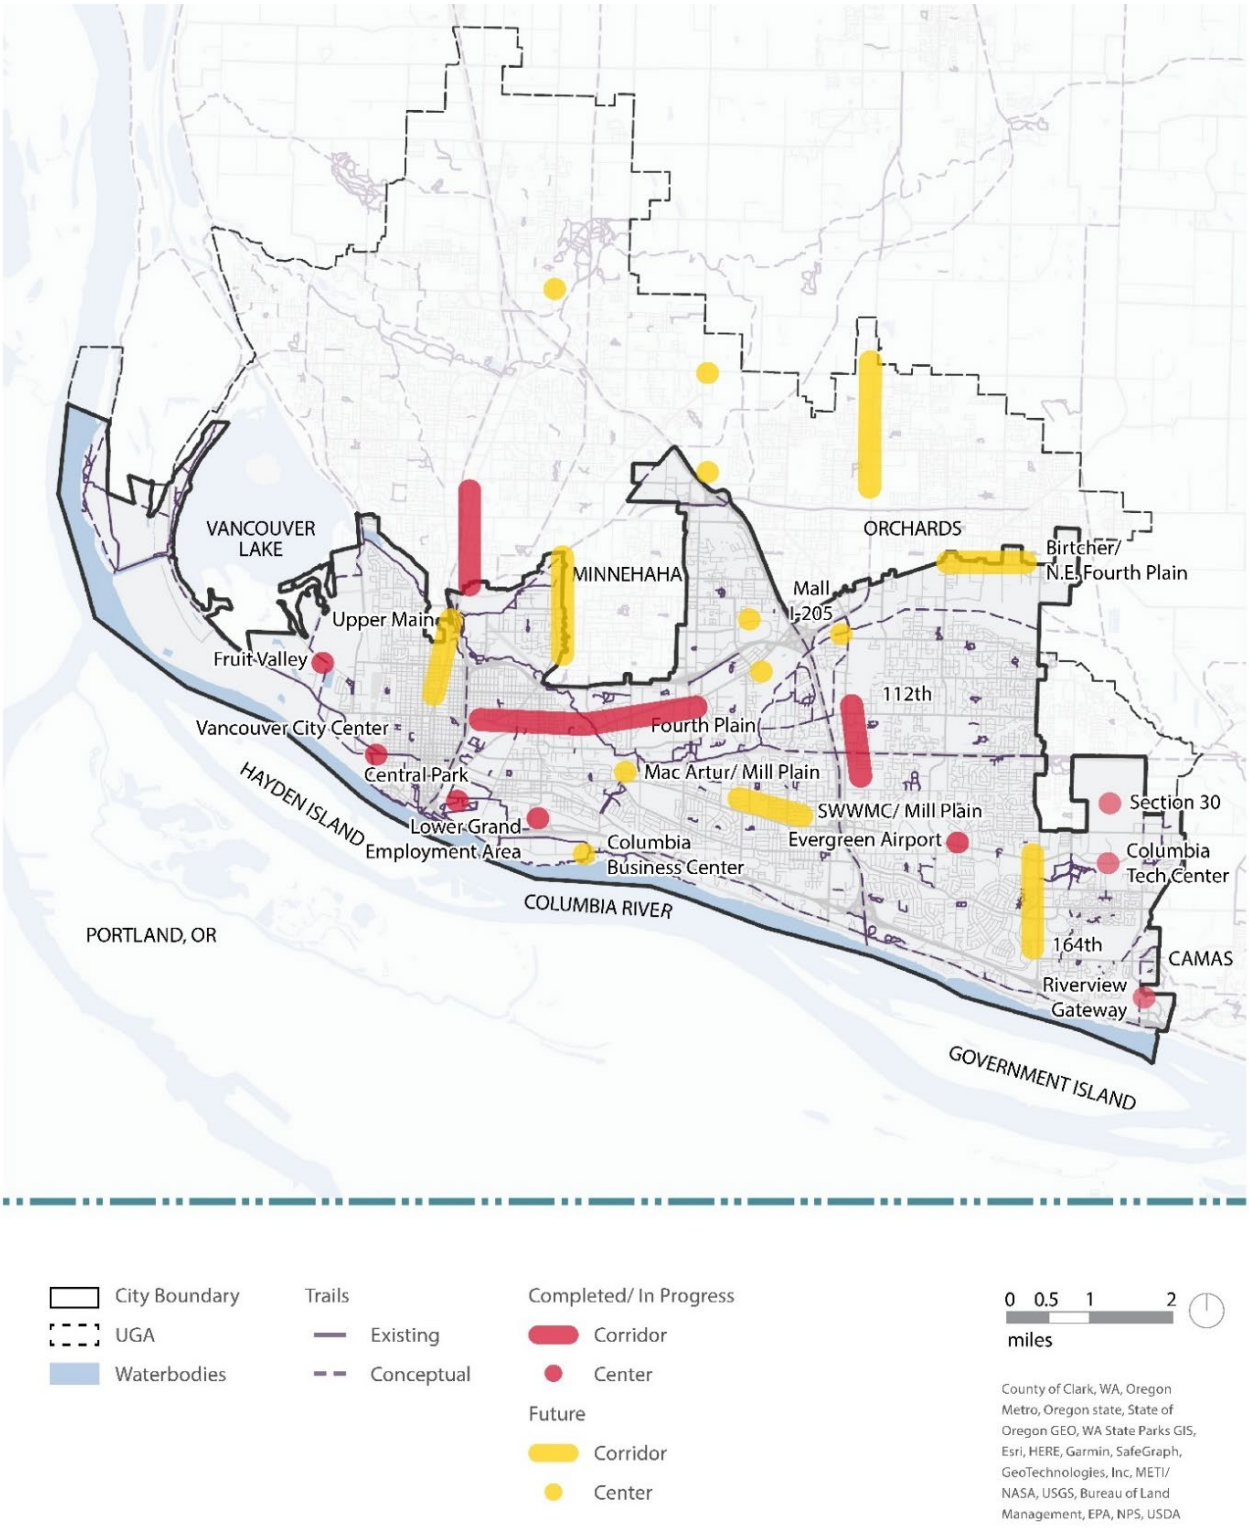
West Vancouver, including the downtown area, generally has smaller lots with denser uses such as office, retail, apartments, and vertical mixed-use. Farther west of downtown toward the Columbia River and Vancouver Lake, there are more intensive, industrial land uses such as manufacturing, gasoline storage facilities, and the Port of Vancouver. North of downtown, there are areas of traditional single-family detached housing on the historic City grid.

Central Vancouver has a more suburban character than the western areas, including postwar subdivisions and older big-box retail developments. The central portions of the ~~e~~City include the Fort Vancouver National Historic Site and Pearson Field, the City's municipal airport, as well as PeaceHealth Southwest Medical Center and surrounding medical office buildings, and the Vancouver Mall and surrounding commercial development.

Eastern areas of the City are the most suburban in land use patterns, with newer, largely detached single-family residential uses, big-box retail developments, and more recent office and mixed-use developments, such as the Columbia Tech Center and Vancouver Innovation Center.

Centers and Corridors

The current Comprehensive Plan identifies the need to focus new growth in areas in or near urban centers and corridors rather than spreading growth uniformly throughout the ~~e~~City



(City of Vancouver 2021a). These areas are envisioned to contain a mixture of employment, housing, and cultural opportunities, and serve as community focal points, building on the unique characteristics of individual districts. The type and intensity of activities and development will vary depending on local circumstances. These areas can also provide opportunities for growth where services can be provided more efficiently.

The Community Development element of the current Vancouver Comprehensive Plan includes policies designed to "achieve the full potential of existing and emerging urban activity centers and the corridors that connect them" through strategies such as promoting or reinforcing a unique identity or function for individual areas, planning for a compact urban form with multiple uses, encouraging innovative and efficient private development, providing a range of transportation options, and investing in public facilities and amenities to serve the areas.

~~Figure 10~~ Figure 10 Figure 12 shows the location of completed and future corridors and centers envisioned by the current Vancouver Comprehensive Plan where subarea planning has occurred or is planned. Subarea plans add greater detail, guidance and predictability to future development for specific geographic areas. Completed subarea plans include:

- Vancouver Central City Vision Plan (2007)
- Fourth Plain Corridor Subarea Plan (2007)
- Central Park Plan Update (2008)
- Lower Grand Employment Area Subarea Plan (2008)
- Riverview Gateway Subarea Plan (2009)
- Section 30 Urban Employment Center Subarea Plan (2009)
- Fruit Valley Subarea Plan (2010)
- 112th Avenue Subarea Plan (2011)
- Heights District Plan (2020)

~~Figure 10~~ Figure 12. Centers and Corridors from Current Vancouver Comprehensive Plan

Current Shoreline Use

The City of Vancouver Shoreline Master Program (SMP), last updated in 2021, identifies Columbia River and Vancouver Lake as shorelines of statewide significance, which is a special category of shoreline that is considered of value to the entire state and has special rules and policies designed to preserve them for future generations (City of Vancouver 2021b). The SMP also identifies sections of Burnt Bridge Creek, Fifth Plain Creek, Lacamas Creek, Salmon Creek, Mill Creek, Curtin (Glenwood) Creek, and the Lake River as shorelines of the state, a category that includes all of the other water areas of the state and their associated shorelands.

The City assigns shoreline designations that are consistent with the Shoreline Management Act, the SMP guidelines, and the Comprehensive Plan, as described in Table 6. ~~Figure 11~~ ~~Figure 11~~ Figure 13 shows the locations of shoreline designations throughout the city.

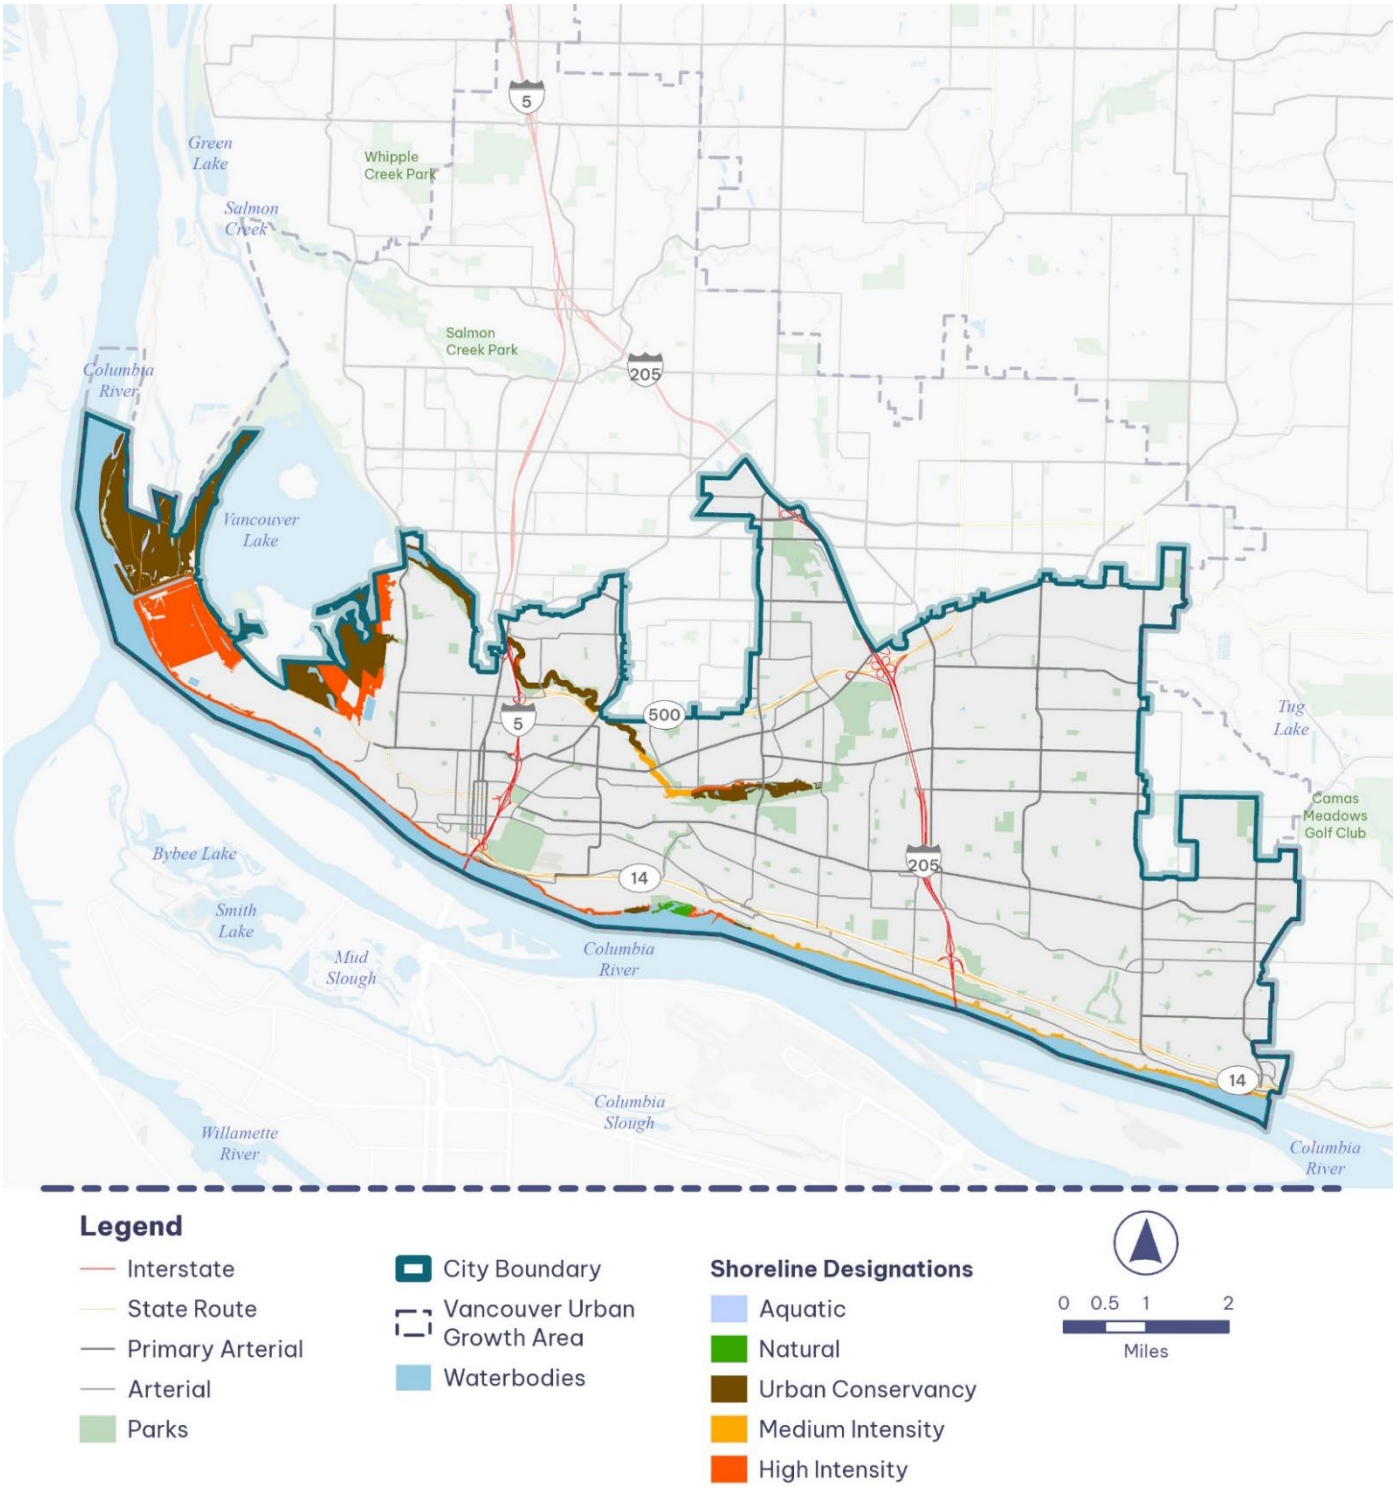

Table 6. Shoreline Designations, Descriptions, and Allowed Uses

Shoreline Designations	Description	Allowed Uses
Aquatic	Covers lands and waters waterward of the ordinary high-water mark.	Water-dependent uses such as boat launches; aquaculture; marinas; docks, piers, and mooring buoys; floating homes, and water-dependent recreational uses
Natural	Covers shoreline areas that are relatively free of human influence or that include intact or minimally degraded shoreline ecological functions intolerant of human use.	Very low intensity uses, such as water-dependent recreational uses; ecological restoration, enhancement, and/or mitigation activities; and bioengineered or non-structural shoreline stabilization.
Urban Conservancy	Covers areas to be protected and restored shoreline ecological functions of open space, floodplains, and other sensitive lands where they exist in urban and developed settings.	Water-dependent or water-related residential uses, single-family residential, roadways and railroads, and utility uses

Shoreline Designations	Description	Allowed Uses
Medium Intensity	Generally, accommodates primarily residential development and related structures and other uses consistent with the designation criteria.	Agricultural uses, water-dependent and water-related commercial and institutional uses, recreational uses, single-family and multifamily residential, transportation, and utility uses.
High Intensity	Provides for high-intensity water-oriented commercial, transportation, and industrial uses while protecting the existing shoreline ecological functions and restoring ecological functions in shorelines where previously degraded.	Agricultural uses; water-dependent and water-related commercial, institutional, and industrial uses; transportation uses, and utility uses.

Current Community Population and Employment

The GMA requires the City to show that it can accommodate population and employment growth as part of the Comprehensive Plan Update. The proposed update to the City's Comprehensive Plan will plan for growth of at least 38,129 new housing units and 43,198 new jobs by 2045. These minimum growth targets are based on population projections from the Washington State OFM, Clark County, recent trends, state law, and City policy to plan for long-term housing and employment needs. The Housing section of this chapter provides more information about the City's housing unit targets.

The data presented in this Affected Environment section is generally from 2023 for consistency with the baseline year of analysis for the Comprehensive Plan Update.

Population

Vancouver has grown substantially over the past decade, increasing from a population of 161,791 in the 2010 decennial Census to 192,696 in the American Community Survey 2019-2023 five-year estimates (Census 2023a).

Table 7 summarizes demographic data for the City, including race, age, language spoken at home, income, and educational attainment (Census 2023a).

Table 7. Existing Population Characteristics for Vancouver and Washington State (2023)

Characteristic	City of Vancouver	State of Washington
Total Population	192,696	7,740,984
Total Households	79,747	3,020,558
Age (Table S0101)		
19 and younger	45,545 (24%)	1,854,050 (24%)
20 to 34 years old	43,706 (23%)	1,651,221 (21%)
35 to 49 years old	37,403 (18%)	1,557,494 (20%)
50 to 64 years old	35,185 (18%)	1,418,906 (18%)
65 or older	30,857 (16%)	1,259,313 (16%)
Race and Ethnicity (Table B03002)		
American Indian and Alaska Native	794 (0.4%)	63,389 (0.8%)

Characteristic	City of Vancouver	State of Washington
Asian	10,091 (5%)	720,927 (9%)
Black	5,694 (3%)	295,487 (4%)
Hispanic or Latine	33,115 (17%)	1,089,609 (14%)
Native Hawaiian and Other Pacific Islander	3,487 (2%)	52,674 (0.6%)
Other Race	937 (0.5%)	42,271 (0.5%)
Two or more races	12,618 (7%)	500,698 (6%)
White	125,960 (65%)	4,975,929 (64%)
Language Spoken at Home by limited English Speaking Households (Table B16002)		
Russian, Polish, or other Slavic language	679 (0.9%)	10,325 (0.3%)
Spanish	1,347 (1.7%)	42,026 (1.4%)
Other Indo-European	124 (0.2%)	5,984 (0.2%)
Chinese (Mandarin and Cantonese)	294 (0.4%)	18,185 (0.6%)
Vietnamese	187 (0.2%)	9,101 (0.3%)
Tagalong	43 (0.1%)	2,675 (0.1%)
Other Asian and Pacific Island Languages	155 (0.2%)	8,624 (0.3%)
Income and Poverty (Table DP03, B17017)		
Median Household Income	$80,618	$94,605
Household income below the poverty level	8,878 (11%)	294,072 (10%)

Characteristic	City of Vancouver	State of Washington
Household income at or above the poverty level	70,869 (89%)	2,726,486 (90%)
Educational Attainment (Table DP02)		
Less than 9th grade	4,154 (3%)	185,425 (3%)
9th to 12th grade, no diploma	7,778 (6%)	236,116 (4%)
High school graduate (includes equivalency)	33,007 (25%)	1,176,403 (22%)
Some college, no degree	33,564 (25%)	1,171,698 (22%)
Associate's degree	13,394 (10%)	542,351 (10%)
Bachelor's degree	26,925 (20%)	1,279,696 (24%)
Graduate or professional degree	15,419 (12%)	817,458 (15%)

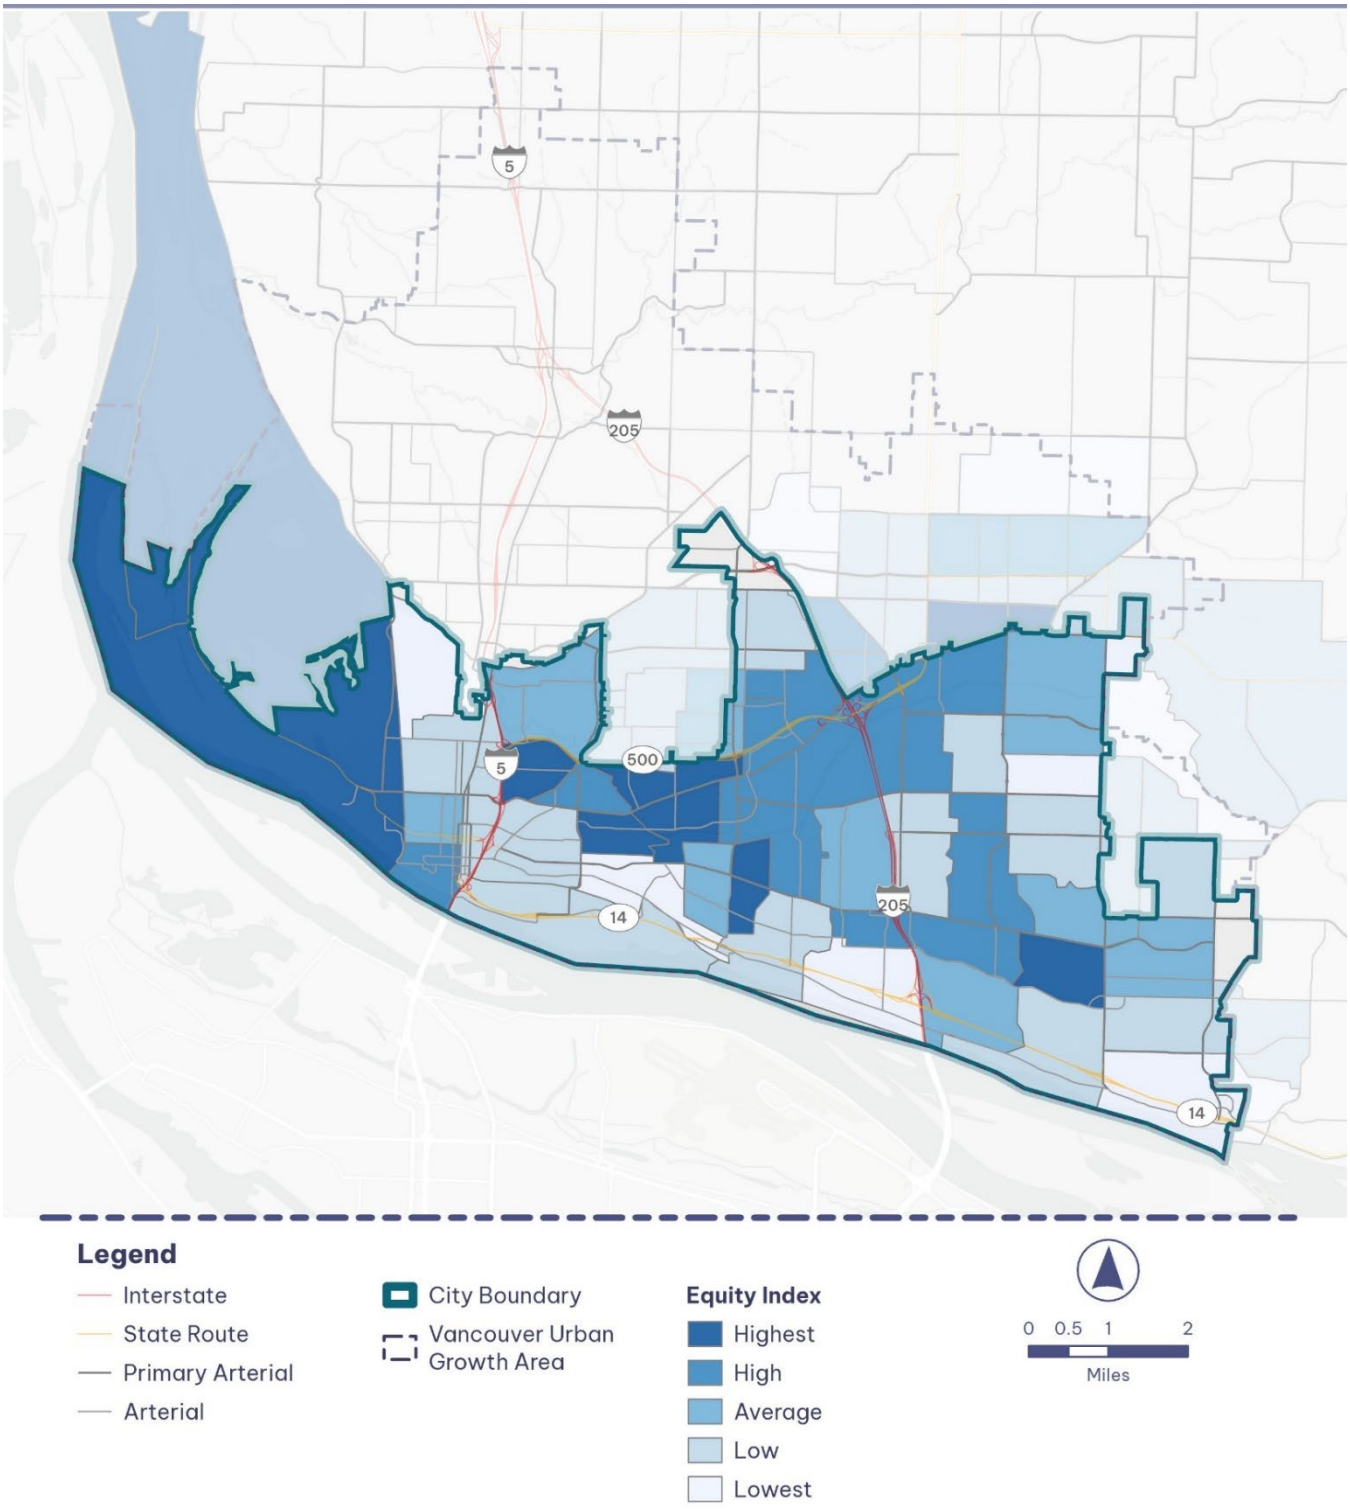
Equity Index and Social Vulnerability Index

While developing the Comprehensive Plan Update, the City is accounting for equity considerations, including areas that may need additional investment based on current disparities. Part of this work includes identifying the locations of potentially underserved populations through an equity index, which focuses on assessing a set of metrics at the census tract level that include (City of Vancouver 2023c):

1. People of color (non-white and/or Hispanic/Latine)
2. People below 200% of the poverty level
3. Renters
4. Adults without a four-year degree
5. Households with limited English proficiency
6. People with disabilities
7. Youth under age 17
8. Older adults 65 and up

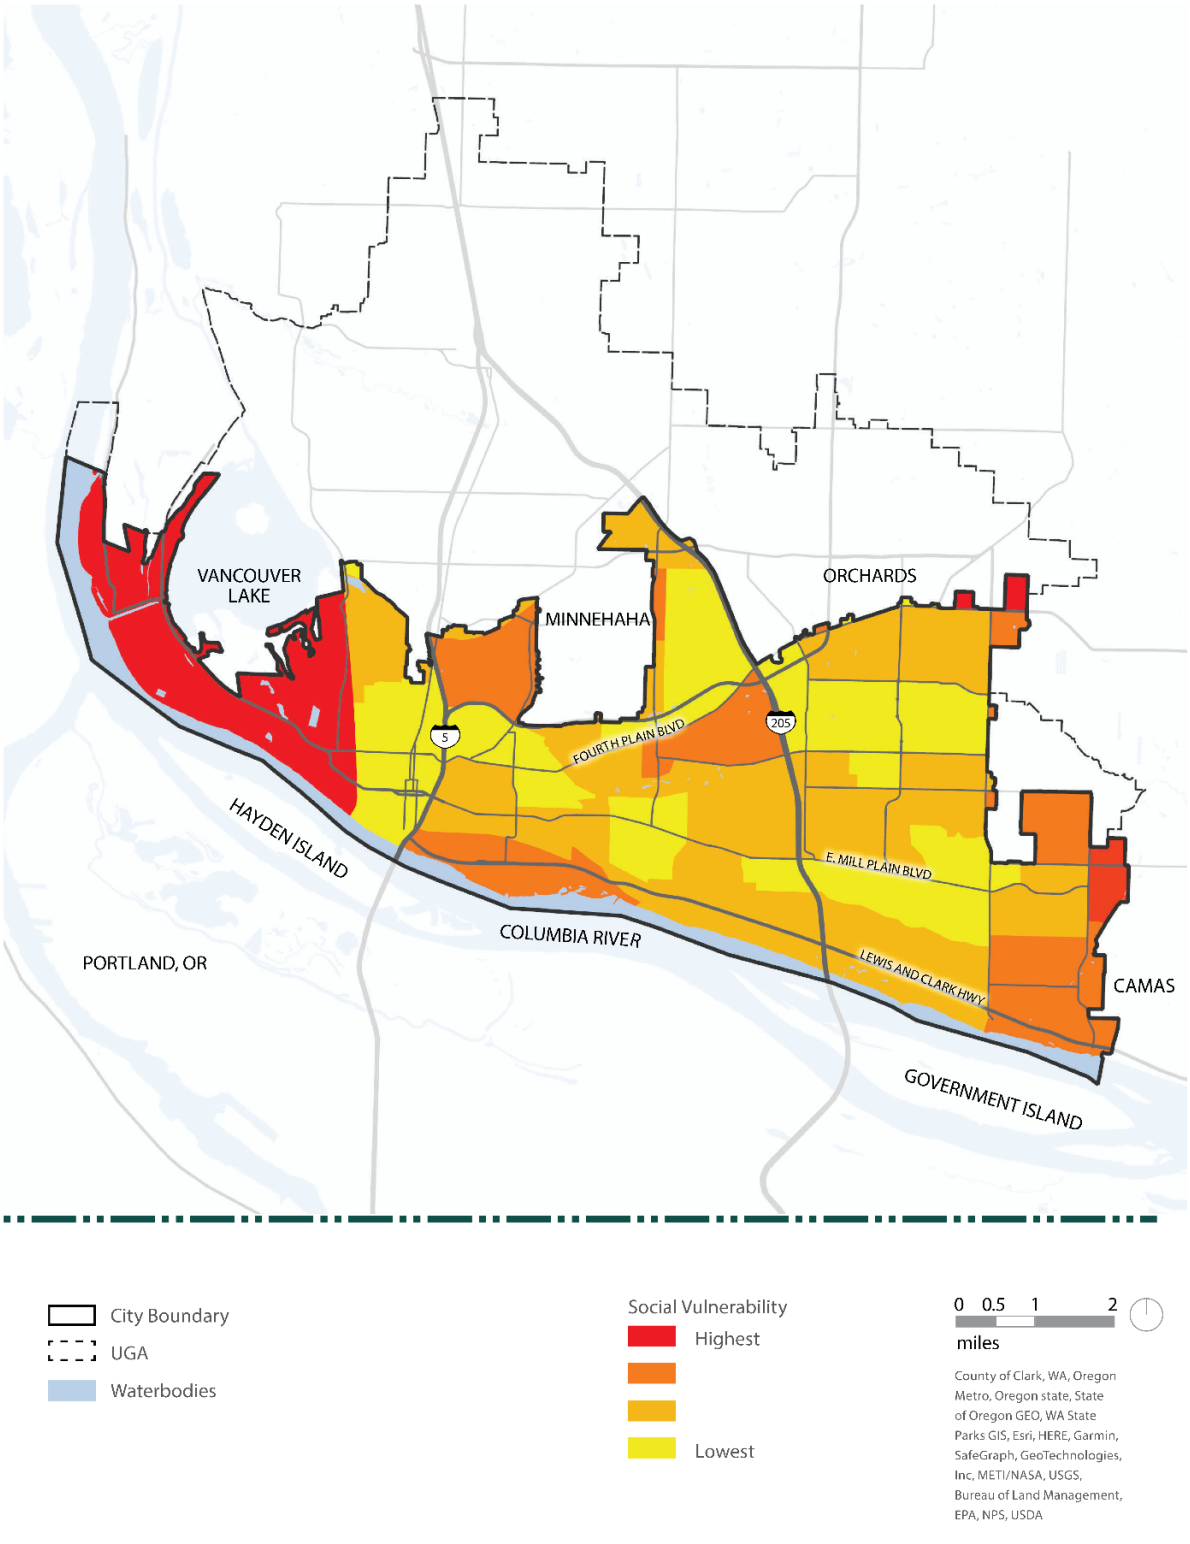
~~Figure 12~~ ~~Figure 12~~ Figure 14 identifies areas of higher equity populations (represented by higher equity index scores) to prioritize investments.



The City also uses the Social Vulnerability Index (SVI) developed by the Centers for Disease Control (CDC) and the Agency for Toxic Substance and Disease Registry (ATSDR), to assess populations most at risk during high-stakes situations like natural disasters and disease outbreaks (City of Vancouver 2023a). To determine social vulnerability, the CDC/ATSDR employs 16 factors, such as poverty, lack of vehicle access, and crowded housing, which are categorized into four themes: Socioeconomic Status, Household Characteristics, Racial and Ethnic Minority Status, and Housing Type/Vehicular Transportation Access (CDC/ATSDR 2022).

Understanding SVI is critical for emergency planners, city officials, public health authorities, state and local health departments, and nonprofit organizations. Together, they analyze municipalities at risk and provide support to the most vulnerable populations in the event of a disaster. This involves estimating the required supplies like food, water, medicine, and bedding, as well as the number of emergency personnel and shelters needed to assist people effectively (CDC/ATSDR 2022).

According to the CDC/ATSDR census tracts, the City experiences a high SVI. Areas with medium-high and high social vulnerability are concentrated along major interstates and arterial roads. The greater Vancouver area, on the other hand, displays a lower level of vulnerability, ranging from low to low-medium vulnerability.



The SVI map (~~Figure 13~~ ~~Figure 13~~ Figure 15) is intended to reflect existing conditions and does not indicate priority areas for investment. However, it can be used as a tool to identify areas that are especially susceptible to the impacts of public investment when considered alongside other factors like residential density and housing costs. Public investment and private development can bring numerous benefits, but if equity considerations are not prioritized, it can lead to impacts on vulnerable communities, including pressures on the housing market and involuntary displacement.

Employment

In 2023, Vancouver was home to more than 100,000 jobs (Census 2023a). The number of jobs in Vancouver increased rapidly between 2011 and 2023, growing from 77,846 jobs in 2011 to 101,285 jobs in 2023 (ECONorthwest 2024a; Census 2023a). 2023 is the baseline year of analysis for the Comprehensive Plan Update.

Service-based industries are concentrated in Vancouver and make up a large and growing share of the city's workforce (ECONorthwest 2024a). In both the ~~e~~City and the region, the health care and social assistance industry provided the largest share of jobs (almost 20%). Other industries that represented some of the largest shares of employment for the City included retail trade, educational services, manufacturing, accommodation and food services, and construction. Many of the largest employers in Clark County are based in Vancouver and represent key industry clusters in healthcare, technology, and education, including PeaceHealth, Vancouver Public Schools, the Vancouver Clinic, Bonneville Power Administration, and Hewlett-Packard.

Jobs are moving toward local employment hubs like Downtown Vancouver, the Vancouver Innovation Center, and large institutions (ECONorthwest 2024a). Employment trends at the census tract level show that employment is growing in these locations, while declining along older, suburban-style commercial areas like Fourth Plain Boulevard. While many cities (including Portland) have struggled to maintain Downtown areas post-pandemic, Vancouver is showing a stronger rebound than the region.

Land use mix can have an impact on wages due to the types of jobs that can be created in different districts. For example, a heavy industrial area would include capacity for manufacturing jobs, while a mixed-use area may include a combination of healthcare, retail, service industry, and professional services jobs. Data from the U.S. Census provides average wages for a range of industries in the Portland metropolitan area, which are assumed to occur in particular zoning districts, as shown in Table 8 (Census 2023b).

Table 8. Average Annual Wages for Job Types and Corresponding Zoning Districts

Proposed Zoning District[a]	Types of Jobs	Average Annual Wages
Heavy Industrial	Manufacturing	$77,000
Institutional/Campus	Public Administration, Education, Hospital	$85,000
Industrial Employment	Warehousing, Specialty Trade Contractors	$69,000
Low-Scale Neighborhood	Retail, Food/Drink Services	$39,000
Medium-Scale Neighborhood	Retail, Food/Drink Services	$39,000
Manufactured Home	None	N/A
Mixed Use	Healthcare, Retail, Food/Drink Services, Professional Services	$72,000
Regional Activity Center	Healthcare, Retail, Food/Drink Services, Professional Services	$72,000

Source: Census 2023b

Note:
a Proposed zoning districts would apply only under the two action alternatives. For the No Action Alternative, existing land use and zoning designations would remain in place. The corresponding zoning districts for the No Action Alternative are shown in Table 2.

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following land and shoreline use-related metrics:

- Consistency with land and shoreline use plans and policies
- Ability to accommodate adopted citywide minimum growth targets
- Compatibility with existing land uses
- Average wage of new jobs based on land use mix
- Level of commercial displacement risk

Impacts Common to All Alternatives

The following sections outline impacts that are expected to occur under all the alternatives. Not all metrics are addressed, as some metrics do not have impacts common to all alternatives. Impacts for each alternative are discussed in the next subsections.

Consistency with Land and Shoreline Use Plans and Policies

Consistency with other land use plans and policies would vary among the alternatives, as discussed in the subsections for each alternative. None of the alternatives would propose changes to the Shoreline Master Program, and none of the proposed changes in the action alternatives would directly affect the SMP.

Ability to Accommodate Adopted Citywide Minimum Growth Targets

New population and job growth is expected to occur under all the alternatives. The City's current population growth trend is expected to continue, reaching an estimated population of 281,000 by 2045 inside current City limits, based on Washington State OFM projections, under all of the alternatives. The City will likely grow further than this through annexation of land currently in the unincorporated Vancouver Urban Growth Area over the next 20 years, but the extent or timing is not known. However, the pace and distribution of growth would vary under each alternative.

Under all alternatives, the actual pace and distribution of future growth would be influenced in part by the implementation of the current (No Action) or proposed (Alternatives 1, ~~or~~ 2 or Preferred Alternative) Comprehensive Plan policies, related regulations and actions, and by decisions made by individual property owners and developers. The No Action Alternative would not be able to accommodate the adopted growth targets.

Compatibility with Existing Land Uses

Because growth and development would occur under all alternatives, there would be some potential for compatibility issues between existing land uses where proposals for denser or more intense land uses border existing parcels with less dense, less-intense land uses. However, none of the alternatives would propose changes to land use and zoning designations that would mix uses that are clearly incompatible. For example, the location and size of heavy industrial lands would remain the same under all alternatives and would continue to prohibit incompatible uses such as housing within those zones. Likewise, heavy industrial uses would not be permitted in other zoning districts under any of the alternatives. In addition, no changes in land uses would occur on lands designated as parks and open space under any of the alternatives.

Middle housing would be allowed in single-family zones under all the alternatives, because under the No Action Alternative it would be allowed by the state imposition of a model

ordinance. Land use compatibility impacts could be more visible in the action alternatives, which propose greater density, intensity, and mixes of uses in more areas of the city. These potential impacts are further described in the Alternative 1, ~~and~~ Alternative 2 and Preferred Alternative subsections and in the Aesthetics subsection.

Average Wage of New Jobs Based on Land Use Mix

Although Alternatives 1 and 2 and the Preferred Alternative would have capacity for more jobs than the No Action Alternative, as discussed in Chapter 2, the overall average wage of new jobs is expected to be similar among the alternatives. All alternatives would focus most of their new job growth in industrial and mixed-use or commercial land use designations, which would result in similar average wages based on the job types assumed in these land uses (refer to Table 8 for these average wages).

Level of Commercial Displacement Risk

Commercial displacement is likely to occur to some extent under all alternatives ~~as~~ because the ~~c~~City will experience some amount of growth and development. Per the Clark County 2023 VBLM, parcels that are considered "underutilized" based on the building value per acre are considered more likely to redevelop than those that are fully "built" (Clark County 2023). Older buildings may also be more likely to redevelop based on their condition. Underutilized parcels with mixed-use, medium-density, or high-density land use designations under all of the alternatives may be more likely to redevelop into higher-density uses, which could potentially result in commercial displacements.

Alternatives 1 and 2 and the Preferred Alternative include more areas that would be designated as these zoning districts compared to the No Action Alternative and therefore may have higher potential for commercial displacement and need for mitigation. Under ~~both~~ the action alternatives, there would be ~~more than 1,000~~around 200[1] commercial buildings on parcels considered "underutilized" that are in medium/high-density residential or mixed-use/regional activity center designations (BERK 2025). However, ~~Alternatives 1 and 2~~the action alternatives would also create more opportunities for new business spaces and anti-displacement measures compared to the No Action Alternative. The subsections for each

[1] In conducting commercial displacement analysis for the Preferred Alternative, staff found that the initial data analysis for the Draft EIS double counted certain parcels and therefore the overall count of potential commercial displacement under the action alternatives was much higher. This error was corrected in the analysis for Alternatives 1 and 2 as well as the Preferred Alternative.

alternative below provide more information about areas that could be more vulnerable to commercial displacement.

No Action Alternative

Consistency with Land and Shoreline Use Plans and Policies

The No Action Alternative would be inconsistent with the City's proposed Comprehensive Plan Update and associated policy direction, as it assumes that no changes to the Comprehensive Plan would be implemented. The City is required by GMA to update its Comprehensive Plan every 10 years. By failing to implement updates to the Comprehensive Plan and provide land to accommodate anticipated future growth, the No Action Alternative would be inconsistent with GMA.

Because the No Action Alternative would not increase residential intensity and density along major corridors across the city, there would be fewer opportunities to locate housing units within close proximity of essential services. This approach would be inconsistent with the City's policy direction to foster connected and accessible neighborhoods, as discussed further in the Housing section.

Ability to Accommodate Adopted Citywide Minimum Growth Targets

The No Action Alternative would not have sufficient capacity to accommodate adopted citywide growth targets of at least 38,129 new housing units and 43,198 new jobs. Based on the assessment of current land use designations citywide, the No Action Alternative would have capacity for only approximately 29,600 new housing units and 16,600 new jobs.

Compatibility with Existing Land Uses

Because the No Action Alternative would retain existing land use and zoning designations, there would be no notable impacts to compatibility with existing land uses beyond those noted in the Impacts Common to All Alternatives section.

Level of Commercial Displacement Risk

Commercial displacement would likely occur to a lesser extent than under Alternatives 1 and 2 and the Preferred Alternative. Parcels potentially vulnerable to displacement due to building age and land use designation would be dispersed around the city. The No Action Alternative would also create fewer new spaces for businesses and maintain existing ~~e~~City policies, which would provide less opportunity for new anti-displacement measures (BERK 2025).

Alternative 1

Consistency with Land and Shoreline Use Plans and Policies

Alternative 1 would be compatible with the City's proposed Comprehensive Plan Update because it assumes the proposed new land use designations and zoning code would be implemented. Notably, the zoning designation of all properties within the City limits would change from what they are today.

Allowing increased residential density and intensity, and a greater mix of uses, along major corridors across the ~~e~~City would place essential services in greater proximity to more housing units compared to the No Action Alternative. This approach would be consistent with the City's policy direction to foster connected and accessible neighborhoods, as discussed further in the Housing section.

Ability to Accommodate Adopted Citywide Minimum Growth Targets

Under Alternative 1, proposed changes in land use and zoning designations would result in a higher capacity for new housing units and jobs than the No Action Alternative and the Preferred Alternative but a lower capacity than Alternative 2. Based on market feasibility and redevelopment potential, Alternative 1 would have capacity for approximately 45,100 new housing units and 46,000 new jobs citywide, which exceeds the City's minimum 2045 planning targets.

Compatibility with Existing Land Uses

Alternative 1 would have a modestly higher potential for incompatibility between existing land uses compared to the No Action Alternative, as it would accommodate denser and more intense building types and growth, and a greater mix of residential and commercial land uses, in more areas of the city.

For example, existing areas of predominantly single-family residential development would be redesignated as Low-Scale Neighborhoods, which would allow small-scale commercial activities like cafés, salons, professional services, and restaurants mostly serving the surrounding neighborhood. This new mix of uses would provide benefits to neighboring residents who would have more potential opportunities for services within walking distance; however, the mix of uses would need to be managed to ensure compatibility.

In addition, Low-Scale Neighborhoods that would be adjacent to areas planned for Medium-Scale Neighborhoods under Alternative 1 could experience greater incompatibility due to the scale of development allowed under the Medium-Scale Neighborhood zoning district, as discussed further in the Aesthetics section. These changes would be most pronounced in West Vancouver just north of downtown, in Central Vancouver along East Mill Plain

Boulevard, and in East Vancouver along Mill Plain Boulevard, 164th Avenue, and 192nd Avenue.

Level of Commercial Displacement Risk

Parcels that are potentially vulnerable to commercial displacement based on age or "underutilized" status and land use designation would be similar under ~~both~~ the action alternatives. These parcels would include older buildings dispersed across the city, as well as buildings on "underutilized" parcels located around the city, with concentrations west of I-5 in West Vancouver, around the Fourth Plain area and just north of SR 14 in Central Vancouver, and along Mill Plain Boulevard in East Vancouver. However, ~~both~~ the action alternatives would also create more opportunities for new business spaces and include anti-displacement measures (BERK 2025).

Alternative 2

Consistency with Land and Shoreline Use Plans and Policies

Like Alternative 1 and the Preferred Alternative, Alternative 2 would be compatible with the City's proposed Comprehensive Plan Update because it assumes the proposed new land use designations and zoning code would be implemented. Like in Alternative 1 and the Preferred Alternative, the zoning designation of all properties within the City limits would change from what they are today.

Like Alternative 1 and the Preferred Alternative, allowing for increased residential density and intensity, and a greater mix of uses, along major corridors across the ~~c~~City would place essential services in greater proximity to more housing units. This approach would be consistent with the City's policy direction to foster connected and accessible neighborhoods, as discussed further in the Housing section.

Ability to Accommodate Adopted Citywide Growth Targets

With the proposed changes in land use and zoning designations, Alternative 2 would have the highest capacity for new housing units and jobs of all the alternatives. Based on market feasibility and redevelopment potential, Alternative 2 would have capacity for approximately 50,700 new housing units and 49,300 new jobs citywide, which exceeds the City's minimum 2045 planning targets and is about 10% higher than Alternative 1 and the Preferred Alternative.

Compatibility with Existing Land Uses

Alternative 2 would have the most potential for incompatibility between existing land uses compared to the No Action Alternative, ~~and~~ Alternative 1 and the Preferred Alternative, as it would accommodate denser and more intense building types and growth, and a greater mix of residential and commercial land uses, in most areas of the city. Existing single-family

residential areas that would be designated as Medium-Scale Neighborhoods would experience the greatest potential changes in the mix of land uses and scale of development. More of these changes would occur throughout the city, similar to the Preferred Alternative, than under Alternative 1 or the No Action Alternative but would be most pronounced in West Vancouver north of downtown, in Central Vancouver along East Mill Plain Boulevard and Northeast Fourth Plain Boulevard, and in large parts of East Vancouver along and between the Mill Plain Boulevard, 164th Avenue, and 192nd Avenue corridors.

Level of Commercial Displacement Risk

Under Action Alternative 2, potential commercial displacement risk impacts and opportunities would be similar to those under Alternative 1 and the Preferred Alternative (BERK 2025).

Preferred Alternative

Consistency with Land and Shoreline Use Plans and Policies

As with Alternatives 1 and 2, the Preferred Alternative would be compatible with the City's proposed Comprehensive Plan Update because it assumes the proposed new land use designations and zoning code would be implemented. The zoning designations of all properties within the City limits would change from what they are today.

As with Alternatives 1 and 2, allowing for increased residential density and intensity, and a greater mix of uses along major corridors across the City would place essential services in greater proximity to more housing units. This approach would be consistent with the City's policy direction to foster connected and accessible neighborhoods, as discussed further in the Housing section.

Ability to Accommodate Adopted Citywide Growth Targets

Under the Preferred Alternative, proposed changes in land use and zoning designations would result in a higher capacity for new housing units and jobs than the No Action Alternative and a lower capacity than Alternatives 1 and 2. Based on market feasibility and redevelopment potential, the Preferred Alternative would have capacity for approximately 44,100 new housing units and 45,100 new jobs citywide, which exceeds the City's minimum 2045 planning targets.

Compatibility with Existing Land Uses

The Preferred Alternative would have a modestly higher potential for incompatibility between existing land uses compared to the No Action Alternative and would be similar to Alternatives 1 and 2, as it would accommodate denser and more intense building types and growth, and a greater mix of residential and commercial land uses, in more areas of the city.

Similar to Alternatives 1 and 2, existing areas of predominantly single-family residential development would be redesignated as Low-Scale Neighborhoods, which would allow small-scale commercial activities like cafés, salons, professional services, small medical offices, and restaurants mostly serving the surrounding neighborhood. This new mix of uses would provide benefits to neighboring residents who would have more potential opportunities for services within walking distance; however, the mix of uses would need to be managed to ensure compatibility.

Similar to Alternatives 1 and 2, existing single-family residential areas that would be designated as Medium-Scale Neighborhoods would experience the greatest potential changes in the mix of land uses and scale of development. The Preferred Alternative would distribute Medium-Scale Neighborhoods throughout the city, whereas Alternatives 1 or 2 focused Medium-Scale Neighborhoods in more limited locations in West, Central and East Vancouver.

As with Alternatives 1 and 2, Low-Scale Neighborhoods that would be adjacent to areas planned for Medium-Scale Neighborhoods under the Preferred Alternative could experience greater incompatibility due to the scale of development allowed under the Medium-Scale Neighborhood zoning district, as discussed further in the Aesthetics section.

Level of Commercial Displacement Risk

Under the Preferred Alternative, potential commercial displacement risk impacts and opportunities would be similar to those under Alternative 1 and 2 (BERK 2025).

Avoidance, Minimization, and Mitigation Measures

Land and shoreline use under all alternatives would be subject to the requirements in current applicable state, county, and city land and shoreline use laws and policies, including the GMA, Clark County Countywide Planning Policies, and the City's SMP.

The No Action Alternative would remain subject to the existing Comprehensive Plan goals and policies regarding Land and Shoreline Use the City's Land Use and Development Code (VMC Title 20), including SEPA rules and policies in VMC Chapter 20.790.

The action alternatives would be subject to the City's proposed Comprehensive Plan Update Land Use and Development chapter goals and policies, and proposed revisions to VMC Title 20 with the new development and zoning code for the implementing base land use districts.

The following measures would help to avoid, minimize, and mitigate potential land and shoreline use impacts under the action alternatives:

- Adopt and adhere to the updated Comprehensive Plan Land Use and Development chapter goals and policies. The proposed goals and policies ~~under consideration~~ include:
    - Use the Growth Concept and Comprehensive Plan Land Use Designations to guide how and where growth and development occurs in the City.
    - Ensure rezoning of property is in alignment with the Land Use Designations identified in the Comprehensive Plan, and the City is able to provide adequate infrastructure and municipal services to serve the proposed use.
    - Focus the City's highest intensity of future growth in the Urban Core to reinforce it as the region's primary destination for services, amenities, nightlife and employment.
    - Develop Regional Centers as compact, high-intensity mixed-use hubs that provide a balance of housing, jobs, and services that complement the Urban Core, that are connected through the high-capacity transit network.
    - Focus growth and investment in Local Centers to create compact, mixed-use districts along key corridors and intersections that provide daily goods, services, jobs, in a manner that complements uses in Regional Centers and the Urban Core.
    - Develop Neighborhood Centers as accessible, neighborhood-serving districts that bring daily goods, services, and gathering spaces closer to where people live, supported by a mix of low- to medium-scale housing.
    - Direct new employment growth into Employment Centers with close proximity to housing, commercial activities, public services, employment and amenities.
    - Develop and update subarea plans for ~~key~~ centers identified in the plan's growth concept, facilitating the development of integrated residential, commercial, employment and community uses ~~and corridors citywide to facilitate integrated land uses~~.
    - Develop regulations that provide transitions between zoning districts to ensure compatibility of adjacent land uses.
    - Promote efficient land use by focusing new development in areas with existing infrastructure and moving toward a more compact urban form.
    - Support efforts to retrofit or repurpose underutilized buildings, structures, and infrastructure to develop new housing and commercial spaces.
    - Prioritize, f~~F~~acilitate and incentivize development on infill and underutilized ~~lands~~ lots and brownfield sites.
    - Facilitate and expand allowances for shared utilization of parking facilities, and implement strategic pricing mechanisms to regulate on-street parking availability in Mixed Use Neighborhoods and Regional Activity Centers.
    - Ensure impact fees, system development charges and utility rates are proportional to development scale.

- Foster a safe community by encouraging street level activity and thoughtful building and infrastructure design that enhance public safety and community well-being.
- Expand access to municipal and community-based services and amenities by prioritizing investment in underserved areas.
- Tailor regulations, incentives and investments to facilitate development and community resources ~~and community resources~~ near current and future transit stations, ensuring new development is accessible to ~~promoting access by~~ all community members, including historically excluded and underserved communities and those most burdened by transportation cost or reliant on public transit.
- Incentivize and remove regulatory barriers to locating grocery stores and neighborhood markets near housing and in underserved neighborhoods and ~~Incentivize and remove regulatory barriers to locating grocery stores and neighborhood markets near housing and in underserved neighborhoods.~~ support establishment of community-owned or cooperative grocery models to strengthen neighborhood food access where the private market fails to meet demand.
- Implement anti-displacement strategies and actions that protect residents and businesses in advance of public investment so communities can remain in place and benefit from improvements.
- Conserve and invest in industrial lands and other areas that provide employment for middle- and high-wage jobs.
- Utilize City-controlled real estate to provide affordable commercial leasing opportunities for small and emerging businesses.
- Support businesses that create high-quality jobs by reducing barriers to growth, streamlining development processes, and ensuring access to necessary resources and infrastructure.
- Protect existing Critical Areas within the City, and Shorelines of Statewide Significance, and ensure no net loss of ecological functions through avoidance of impacts, conservation design principles, and compensatory mitigation when loss of ecological function cannot be avoided.
- Work with Clark County and residents in the Urban Growth Area to facilitate orderly, fiscally sustainable annexations, ensuring urban level of service standards with logical boundary considerations.
- Continue to update the Comprehensive Plan and implementing regulations in response to the annual review process, state-mandated 5-year Implementation Progress Report, and 10-Year periodic review requirement that includes updates to long-term growth forecasts and regional land capacity analysis.

- Adopt and adhere to the development standards included in the proposed ~~form-based~~ new zoning code and development regulations, which would cover topics such as:
    - Base zoning district requirements, including standards for base density, height range, allowed building types, use requirements and additional requirements such as open space, overlay districts and environmental regulations.
    - Building type requirements, including applicability in each base zoning district, lot dimensions and coverage, building placement and build-out, building and story height, parking ~~ratio and location~~ regulations and other additional requirements specific to a building type.
    - Use requirements for the base zoning districts, which identifies the categories of uses allowed, types of use approvals, types of primary uses, and specific standards that are applicable to land use permits for the base zoning districts.

Future site-specific development would be subject to additional SEPA review, including an analysis of potential land and shoreline use impacts.

Significant Unavoidable Adverse Impacts

The No Action Alternative would have significant adverse impacts to land and shoreline use because it would not provide sufficient capacity for development to comply with the GMA and meet the City's minimum 2045 housing and jobs targets. The action alternatives have the potential to create impacts on land and shoreline use as a result of changes in land use and zoning designations. The anticipated changes would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant unavoidable adverse impacts to land and shoreline use are anticipated for Alternative 1, ~~or~~ Alternative 2, or the Preferred Alternative.

Housing

Methodology

Analysts reviewed relevant information about the existing housing supply and types, affordability, and displacement risk, including the following sources:

- CoStar commercial real estate database (CoStar 2023)
- Housing Needs and Land Capacity Analysis (ECONorthwest 2026)
- Our Vancouver Housing Needs Assessment (ECONorthwest 2024b)
- Our Vancouver Health Impact Assessment (BERK 2025)
- Redfin (2023)
- 2020 Reside Vancouver Anti-Displacement Plan (Thread Community Planning 2020)
- US Census Bureau American Community Survey (Census 2023a)

This EIS uses primarily ACS 2019-2023 five-year and 2023 one-year data as the basis for analysis for consistency with other recent studies completed for the Comprehensive Plan Update. 2023 is the baseline year of analysis for the Comprehensive Plan Update.

Analysts then reviewed the alternatives to determine potential adverse impacts and associated mitigation measures using the following metrics:

- Level of supply, diversity, and potential cost of housing
- Amount of new housing in areas with high displacement risk
- Amount of new housing in connected and accessible neighborhoods
- Level of housing capacity for all income bands
- Consistency with housing plans and policies

Affected Environment

The data presented in this Affected Environment section is generally from 2023 for consistency with the baseline year of analysis for the Comprehensive Plan Update.

Current Housing Supply and Mix

In 2023 there were 90,263 total housing units in Vancouver, a more than 25% increase from 71,649 in 2011 (Census 2023a).The dominant type of housing is single-family detached housing (43,209 units), which composes nearly half (48%) of the total number of housing units in Vancouver, compared to 65% of housing units in Clark County. Single-family housing also makes up 73% of the City land area zoned for residential districts. The remaining housing stock in Vancouver includes an estimated 35% multifamily housing (31,702 units), which is housing consisting of five or more units, and 16% "plex housing" (14,092 units), which is single-family attached units, duplexes, triplexes, and fourplexes (Census 2023a).

Vancouver has a higher share of multifamily housing than Clark County, with nearly one-half (around 43%) of Vancouver residential buildings having more than one unit compared to about 25% of the county's buildings (Census 2023a). Permit data analysis shows a steady increase in multifamily development in recent years.

The predominant housing types vary from west to east depending on geographic areas of the city. West Vancouver, including downtown neighborhoods, generally have older buildings and smaller lots with denser uses, including traditional apartments and vertical mixed-use buildings. Along the Vancouver Waterfront, there are newer mixed-use high-rise buildings accommodating denser residential uses. Heading north of downtown Vancouver toward Burnt Bridge Creek, there are communities with older, low-density, single-family detached residential development.

In Central Vancouver, lower-density, single-family residential development generally dominates the housing supply, except for neighborhoods such as Harney Heights, North Garrison Heights and Columbia Way, where there are several multifamily residential developments.

In East Vancouver, the housing stock is also predominantly suburban-style, single-family detached buildings. There are pockets of medium- to high-density multifamily residential areas in the Fircrest and Fisher's Landing neighborhoods and east of I-205 along the Mill Plain Boulevard corridor.

Housing Needs

From 2023 to 2045, the City will need a total of 38,129 new housing units to support projected growth, according to the Our Vancouver Housing Needs Assessment (ECONorthwest 2024b, ECONorthwest 2026). Overall, this means an estimated 1,733 housing units need to be built or created on average per year from 2023 to 2045 to meet the City's housing needs. As the existing City housing stock has increased by around 1,466 housing units per year over the last decade from 2012 to 2022 (per OFM data), housing production will need to increase by around 267 housing units per year.

To comply with H.B. 1220, local governments must plan for and accommodate housing affordable to all income levels. The Housing Needs and Land Capacity Analysis determined that the 2045 housing target should include the following types of units (ECONorthwest 2026):

- 2,600 ~~2,651~~ Permanent Supportive Housing units (subsidized, leased housing with no limit on length of stay that prioritizes people who need comprehensive support services)
- 4,423 ~~4,371~~ units for households below 30% area median income (AMI) (extremely low income)
- 5,890 units between 30 to 50% AMI (low income)
- 5,788 housing units between 50 and 80% AMI (low income)
- 3,351 units between 80 to 100% AMI (moderate income)
- 3,175 housing units between 100 to 120% AMI (moderate to middle income)
- 12,902 housing units over 120% AMI (high income)
- 1,405 ~~1,374~~ emergency shelter beds

The housing units needed by income category were updated since the Draft EIS to better align with the final Clark County housing allocations for Permanent Supportive Housing units and emergency shelter beds. The units needed for the other income levels do not reflect the Clark County allocations because the City completed the 2024 Housing Needs Assessment

using the Washington State Department of Commerce Housing for All Planning Tool (HAPT), prior to the City receiving the final Clark County housing allocations.

This analysis indicates that about one-third of new housing units would need to be affordable to households at or below 50% of AMI.

Current Home Occupancy

The vacancy rate for all housing units in the ~~e~~City was 6%, slightly higher than Clark County (4%) (Census 2023a). The city's overall vacancy rate has remained stable since 2011. Vancouver has seen a recent spike in vacancy rates among two-bedroom units in multifamily housing, jumping from just under 4% in 2022 to almost double that at 7% in 2023, likely related to recent housing construction (ECONorthwest 2024b). Housing market assessments often use a 5% standard vacancy rate that implies a balance between housing supply and demand. Vancouver multifamily vacancy rates closely follow those of Clark County at 7% compared to Clark County's 8%.

Current Home Ownership

Approximately 51% of Vancouver residents rent their homes, while the remaining 49% own their homes (Census 2023a). Vancouver's renter population is larger than Clark County (33%) and Washington State as a whole (36%).

In Vancouver, the largest share of renter households lived in multifamily buildings with five units or more (63%), "plex housing" (21%), and single detached units (15%) (Census 2023a). In greater Clark County, the distribution is similar.

Among owner households in both Vancouver and Clark County, the largest share lived in single detached units (84% and 87%, respectively), followed by "plex housing" (9% and 6%, respectively) and multifamily units (5% and 2% respectively) (Census 2023a).

Racial disparities exist in Vancouver's housing access. Asian, white, and American Indian/Alaska Native households have the highest rates of homeownership (at 64%, 52% and 48% respectively), while Hispanic/Latine, Black, and two or more race households have the lowest rates of homeownership (at 24%, 32% and 34% respectively). (Census 2023a).

Housing Costs

Both rental and ownership costs have far outpaced income growth in the ~~e~~City, with median home prices nearly tripling and average rents increasing 60% from 2012 to 2023. The widening gap between housing costs and incomes indicates declining affordability in Vancouver's ownership and rental market (ECONorthwest 2024b).

As of June 2023, the median home sale price in Vancouver was roughly $477,000 (Redfin 2023). The ~~e~~City's median home prices were roughly $50,000 lower than the county overall ($527,000). However, city and county home prices increased at a similar rate since 2012, nearly tripling (a 174% increase) over the decade from 2012 to 2023. Additionally, while median Vancouver home prices were lower than both Hillsboro ($514,000) and Portland ($511,000), Vancouver prices have increased at a faster rate than both cities.

In 2021, the median monthly mortgage payment was $1,734, and in March 2022, the average market rent for a one-bedroom unit in Vancouver was $1,411 (CoStar 2023). As of 2023, the average rent in Vancouver was $1,673, which was similar to the average rent of $1,671 in Clark County (CoStar 2023). From 2012 to 2023, average Vancouver rents increased by more than $600, or 56%, surpassing average rents in Portland (CoStar 2023).

Cost burdening tends to disproportionately impact renters in comparison to homeowners, and this tendency holds true for the City and Clark County as a whole. Renters are nearly three times more likely to be cost burdened than homeowners. In 2023, about 53% of renters in Vancouver were cost burdened (spending more than 30% of their income on rent and utilities), including over a quarter of all renters (26%) who were severely cost burdened, spending more than 50% of their income on rent and utilities (Census 2023a).

Vancouver provides 1,243 rent-restricted affordable units sponsored by the City's Affordable Housing Fund that are either existing or currently in development (ECONorthwest 2024b). Of these units, 26% are set aside for seniors, 43% are reserved for households earning less than 60% of AMI, and 9% of the units are set aside specifically for populations with disabilities or mental health issues.

Displacement Risk

Some Vancouver communities face displacement risks, but few areas have reached late-stage gentrification, which means a neighborhood has lost an increasingly higher share of vulnerable populations and is experiencing increasingly higher housing costs (ECONorthwest 2024b). The Image neighborhood is the only area that has reached late-stage gentrification based on the City's methodology. The Fourth Plain Village and North Image neighborhoods fall into the Dynamic typology, which are areas where focusing new anti-displacement actions can still help to prevent loss of vulnerable populations and before they reach late-stage trends.

Neighborhoods facing early-stage gentrification are concentrated in Central Vancouver, including along Fourth Plain Boulevard, I-205, and WA 500. In these areas, preserving low-cost housing and preventing loss of vulnerable populations can help keep neighborhoods from advancing further into mid- or late-stage gentrification.

The most effective anti-displacement strategies vary by what stage a neighborhood is currently experiencing. The City's 2020 Reside Vancouver plan presents recommended strategies for preventing displacement, which include citywide and geographically specific strategies for the Fourth Plain Corridor. Strategies to prevent displacement can include actions that preserve existing low-cost housing, create new affordable housing options, increase economic opportunities for residents, and support homeownership to stabilize households depending on how much low-cost housing is still available and how many vulnerable residents are still located in the area.

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following housing-related metrics:

- Level of supply, diversity, and potential cost of housing
- Amount of new housing in areas with high displacement risk
- Amount of new housing in areas with greater percentages of trips under 5 miles near active transportation networks
- Amount of new housing in connected and accessible neighborhoods
- Level of housing capacity for all income bands
- Consistency with housing plans and policies

Impacts Common to All Alternatives

The following sections outline impacts that are expected to occur under all the alternatives. Impacts specific to each alternative are discussed in the next subsections.

Level of Supply, Diversity, and Potential Cost of Housing

An increase in citywide housing supply would be possible under all the alternatives to varying extents. All of the alternatives would result in a greater diversity of allowed housing types to some extent because they assume that H.B. 1110 would be implemented through the imposition of the state model ordinance allowing middle housing, if local standards are not adopted. H.B. 1110 requires cities like Vancouver to allow for at least four dwelling units per lot on all lots, up to six dwelling units per lot if within 0.25 mile of a major transit stop or if two of the units are affordable. All land currently designated as Urban Lower Density under the No Action Alternative or as Low-Scale Neighborhood under Alternatives 1 and 2 and the Preferred Alternative would have the potential for a greater diversity of housing types, such as duplexes, quadplexes, sixplexes, and townhomes, because of H.B. 1110's requirements.

Under all alternatives, the pace and location of development of future new housing units would be influenced in part by the implementation of the current (No Action) or proposed

(Alternatives 1 or 2 or the Preferred Alternative) Comprehensive Plan policies, related regulations and actions, and by decisions made by individual property owners and developers.

The cost of housing under all alternatives would be influenced by a variety of factors, including construction costs, market conditions, and government incentive programs.

New Housing with High Displacement Risk

All alternatives are likely to have some level of residential displacement due to growth and redevelopment. Table 9 summarizes the estimated number of new housing units that would be built in areas defined as high risk in the Washington State Displacement Risk Map (Commerce 2023~~n.d.~~). Under all alternatives, at least 14% of housing unit capacity or growth would be located in these high displacement risk areas.

Table 9. Estimated Capacity for New Housing Units in High Displacement Risk Areas

Metric	No Action Alternative	Alternative 1	Alternative 2	Preferred Alternative
Projected Capacity for New Housing Units in High Displacement Risk Areas	9,400[a]	6,500	8,500	8,900
Percent of Total Projected Capacity for New Housing Units	32%[a]	14%	17%	18%

Source: BERK 2025

Note:

a The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

Amount of New Housing in Connected and Accessible Neighborhoods

Although the ~~three~~ four alternatives would distribute new housing capacity and growth in different ways, they would all result in the potential for a substantial amount of new housing in connected and accessible neighborhoods. Connected and accessible neighborhoods are intended to support a mix of uses within a 15-minute walk to provide opportunities for shopping, entertainment, cultural amenities, and employment within proximity to housing.

As summarized in Table 10, more than 40% of the new housing capacity in each alternative is in areas with five or more services or amenities within walking distance. These services or amenities include full-service grocery stores, transit stops, parks and open spaces, trails, libraries, ambulatory healthcare services, schools, and other essential places such as higher

education institutions (Design Workshop 2024). This proximity to services would benefit resident wellbeing in terms of access to healthcare, food, and daily needs, as well as opportunities to interact with others, under all alternatives.

Table 10. Estimated Capacity for New Housing Units in Connected and Accessible Neighborhoods

Metric	No Action Alternative	Alternative 1	Alternative 2	Preferred Alternative
Projected Capacity for New Housing Units in Connected and Accessible Neighborhoods	16,100[a]	18,700	21,700	21,500
Percent of Total Projected Capacity for New Housing Units	54%[a]	42%	43%	44%

Source: BERK 2025

Note:

a The No Action is based on capacity only and does not account for the feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

Level of Housing Capacity for All Income Bands

All of the alternatives would provide new housing units throughout the city; however, there would be varying capacity for housing that serves all income bands. In general, it is assumed that alternatives with a higher capacity for new housing units would allow for the greatest opportunity to construct different housing typologies, which in turn have the potential to be more affordable for a broader range of income levels, as discussed in the subsections for each alternative. However, as discussed in the Housing Needs Assessment, certain lower-income bands are likely unable to be served without additional subsidies for housing. Development of regulated affordable housing can face a number of challenges and typically requires sizable gap financing to make projects feasible (ECONorthwest 2024b).

Compatibility with Housing Plans and Policies

All of the alternatives would allow for new housing units throughout the city, which is broadly compatible with the City's Housing Action Plan goal of building substantially more housing units over the next 20 years. However, the action alternatives would be more compatible with these goals, as discussed in the subsections for each alternative.

No Action Alternative

Level of Supply, Diversity, and Potential Cost of Housing

The No Action Alternative would not meet the City's minimum 2045 housing unit targets because it would not implement H.B. 1220 or H.B. 1337, and it would not allow denser housing typologies in as many areas of the ~~e~~City as Alternatives 1 or 2 or the Preferred Alternative ~~2~~. The No Action Alternative would have the least potential for providing adequate, affordable housing to meet identified needs. As discussed in the Housing Needs subsection, approximately 13,000 new housing units are needed for people with incomes of less than 80% AMI. To meet this need, more than 40% of new housing units under the No Action Alternative would need to be constructed for this income level. Without implementation of H.B. 1220 or H.B. 1337, the No Action Alternative would not include additional policy or zoning provisions to address the need for more diversity in housing supply throughout the ~~e~~City to accommodate more affordable housing.

Under the No Action Alternative, residents, developers, and homebuilders would not receive the benefits of the proposed zoning code update, which is designed to make requirements easier and simpler to understand, and in turn to reduce costs and barriers to housing production.

New Housing with High Displacement Risk

The No Action Alternative would have the highest number of new housing units in areas with high displacement risk compared to Alternatives 1 and 2 and the Preferred Alternative, as shown in Table 9. This is likely because the No Action Alternative would have a larger estimated capacity for new housing units in Central Vancouver, which has large areas of high displacement risk according to the Washington State Department of Commerce mapping tool, as compared to Alternatives 1 and 2 and the Preferred Alternative (Commerce n.d.).

Amount of New Housing in Connected and Accessible Neighborhoods

There would be a lower number of new housing units in connected and accessible neighborhoods under the No Action Alternative compared to Alternatives 1 and 2 and the Preferred Alternative ~~2~~, as shown in Table 10. Areas with capacity for new housing outside of connected and accessible neighborhoods would be distributed across the city, with larger amounts predicted in Central and East Vancouver than West Vancouver.

Level of Housing Capacity for All Income Bands

The No Action Alternative would have the lowest level of housing capacity for all income bands because it would have the lowest capacity for new housing units in general. In addition, zoning designations would remain the same, which are currently more restrictive in housing types than the zoning districts proposed under the action alternatives.

Compatibility with Housing Plans and Policies

The No Action Alternative would not be fully compatible with the City's housing plans and policies because it would not fully align with the Housing Action Plan, which includes strategies such as updating the ~~c~~City code to increase housing density and types.

Alternative 1

Level of Supply, Diversity, and Potential Cost of Housing

Alternative 1 would result in a greater potential diversity of housing types than the No Action Alternative because, based on market feasibility and redevelopment potential (see Appendix B for more information), it would have a greater capacity for new housing units citywide and would designate more land area as Medium-Scale Neighborhoods, Mixed-Use Neighborhoods, and Regional Activity Centers. These denser zoning districts allow for a broader range of housing typologies with more units. East Vancouver (between I-205 and the eastern City limits) would have the greatest capacity for new housing units.

Alternative 1 would also have a greater potential for meeting affordable housing needs compared to the No Action Alternative because of the greater capacity for new housing units. Residents, developers, and homebuilders would receive the benefits of the proposed zoning code update, which is designed to make requirements easier and simpler to understand, and in turn to reduce costs and barriers to housing production.

New Housing with High Displacement Risk

Alternative 1 would have the lowest capacity for new housing units in areas with high displacement risk compared to the No Action Alternative, ~~and~~ Alternative 2 and the Preferred Alternative, as shown in Table 9.

Amount of New Housing in Connected and Accessible Neighborhoods

Alternative 1 would have greater capacity for new housing units in connected and accessible neighborhoods than the No Action Alternative, but less than Alternative 2 and the Preferred Alternative, as shown in Table 10. Areas with capacity for new housing outside of existing connected and accessible neighborhoods would be located primarily in East Vancouver. Some parts of Central Vancouver, particularly near the Columbia River, would also have capacity for new housing units where there is low existing access to services. However, under the new zoning districts, some commercial and retail services would be allowed in traditionally residential-only areas, which could increase the potential for more services in those areas.

Level of Housing Capacity for All Income Bands

Alternative 1 would have higher levels of housing capacity for all income bands than the No Action Alternative because it would have a much higher capacity for new housing units in

general. The new zoning designations and associated development regulations under Alternative 1 would allow for a greater diversity of housing types than the No Action Alternative. The level of housing capacity for all income bands would be similar to Alternative 2 and the Preferred Alternative but would be slightly lower because of the relatively lower capacity for new housing units.

Compatibility with Housing Plans and Policies

Alternative 1 would be compatible with the City's housing plans and policies because its proposed land use and zoning designations would provide sufficient capacity to exceed the City's 2045 housing target and would align with the Housing Action Plan, which includes strategies such as updating the ~~city code~~ Vancouver Municipal Code to increase housing density and types.

Alternative 2

Level of Supply, Diversity, and Potential Cost of Housing

Alternative 2 would result in the greatest potential diversity of housing types of all the alternatives because it would have the highest capacity for new housing units and would designate the most land area as Medium-Scale Neighborhoods, Mixed-Use Neighborhoods, and Regional Activity Centers. As with Alternative 1 and the Preferred Alternative, East Vancouver (between I-205 and the eastern City limits) would have the greatest capacity for new housing units.

Alternative 2 would have the highest potential for increasing the housing market supply and thus potentially lowering the cost of housing because it would have the largest amount of land zoned for denser housing types. Residents, developers, and homebuilders would receive the benefits of the proposed zoning code update, which is designed to make requirements easier and simpler to understand, and in turn to reduce costs and barriers to housing production.

New Housing with High Displacement Risk

Alternative 2 would have a higher capacity for new housing units in areas identified as high displacement risk than Alternative 1 but a lower capacity than the No Action Alternative and the Preferred Alternative, as shown in Table 9.

Amount of New Housing in Connected and Accessible Neighborhoods

Alternative 2 would have more capacity for new housing units in connected and accessible neighborhoods than the No Action Alternative, ~~and~~ Alternative 1 and the Preferred Alternative, as shown in Table 10. Areas with capacity for new housing outside of connected and accessible neighborhoods would be in similar areas of Central and East Vancouver as Alternative 1 and the Preferred Alternative. Unlike Alternative 1 but similar to the Preferred

Alternative, there would be capacity for new housing units near I-205 and NE Padden Parkway, at the north end of Central Vancouver, where there is lower existing access to services. ~~However,~~ S~~s~~imilar to Alternative 1 and the Preferred Alternative, the new zoning districts included in Alternative 2 would support a variety of uses, which could support more commercial or retail services and amenities in areas traditionally dominated by residential development.

Level of Housing Capacity for All Income Bands

Alternative 2 would have the highest potential for housing capacity for all income bands of the alternatives because it would have the highest capacity for new housing units in general. As with Alternative 1 and the Preferred Alternative, the new zoning designations and associated development regulations under Alternative 2 would allow for a greater diversity of housing types than the No Action Alternative. There would be more areas of the ~~c~~City that allow for a greater variety of housing types under Alternative 2 than Alternative 1 and the Preferred Alternative.

Compatibility with Housing Plans and Policies

Like Alternative 1 and the Preferred Alternative, Alternative 2 would be compatible with the City's housing plans and policies because its proposed land use and zoning designations would provide sufficient capacity to exceed the City's minimum 2045 housing targets and would align with the Housing Action Plan, which includes strategies such as updating the ~~city code~~ Vancouver Municipal Code to increase housing density and types.

Preferred Alternative

Level of Supply, Diversity, and Potential Cost of Housing

The Preferred Alternative would result in a greater potential diversity of housing types than the No Action Alternative. Based on market feasibility and redevelopment potential (see Appendix B for more information), it would have a greater capacity for new housing units citywide and would designate more land area as Medium-Scale Neighborhoods, Mixed-Use Neighborhoods, and Regional Activity Centers compared to the No Action Alternative. These denser zoning districts allow for a broader range of housing typologies with more units. East Vancouver (between I-205 and the eastern City limits) would have the greatest capacity for new housing units.

The Preferred Alternative would also have a greater potential for meeting affordable housing needs than the No Action Alternative, because of the greater capacity for new housing units and more allowances for smaller housing types. Residents, developers, and homebuilders would receive the benefits of the proposed zoning code update, which is designed to make requirements easier and simpler to understand, and in turn to reduce costs and barriers to housing production.

The effects of the Preferred Alternative on the level of supply, diversity and potential cost of housing would be most similar to Alternative 1 because both would have a similar capacity for new housing units.

New Housing with High Displacement Risk

The Preferred Alternative would have a higher capacity for new housing units in areas identified as high displacement risk than Alternatives 1 and 2 but a lower capacity than the No Action Alternative, as shown in Table 9.

Amount of New Housing in Connected and Accessible Neighborhoods

The Preferred Alternative would have more capacity for new housing units in connected and accessible neighborhoods than the No Action Alternative and Alternative 1, and similar capacity compared with Alternative 2, as shown in Table 10. Similar to Alternatives 1 and 2, the Preferred Alternative would have capacity for new housing outside of connected and accessible neighborhoods in similar areas of Central and East Vancouver. Similar to Alternative 2, there would be capacity for new housing units near I-205 and NE Padden Parkway, at the north end of Central Vancouver, where there is lower existing access to services. Similar to Alternatives 1 and 2, the new zoning districts included in the Preferred Alternative would support a variety of uses, which could support more commercial or retail services and amenities in areas traditionally dominated by residential development.

Level of Housing Capacity for All Income Bands

The Preferred Alternative would have higher levels of housing capacity for all income bands than the No Action Alternative because it would have a much higher capacity for new housing units in general. The new zoning designations and associated development regulations under the Preferred Alternative would allow for a greater diversity of housing types than the No Action Alternative. The Preferred Alternative would include the Manufactured Home Park zone, which intends to preserve existing affordable manufactured home park developments and prevent displacement. The effects of the Preferred Alternative on the level of housing capacity for all income bands would be most similar to Alternative 1 because both would have a similar capacity for new housing units. The Housing Needs and Land Capacity Analysis demonstrates Vancouver's capacity within the Preferred Alternative to meet the housing need by income band using either the HAPT tool or the County allocation methodology (ECONorthwest 2026).

Compatibility with Housing Plans and Policies

Like Alternatives 1 and 2, the Preferred Alternative would be compatible with the City's housing plans and policies because its proposed land use and zoning designations would provide sufficient capacity to meet and exceed the City's minimum 2045 housing targets and

would align with the Housing Action Plan and underlying housing access goals, which includes strategies such as updating the City code to increase housing density and types.

Avoidance, Minimization, and Mitigation Measures

Housing development under the No Action Alternative would be subject to applicable state and county laws and the City's Land Use and Development Code (VMC Title 20).

The action alternatives would be subject to the City's proposed Comprehensive Plan Update Land Use and Development chapter goals and policies and proposed revisions to VMC Title 20 with new development and zoning code for the implementing base land use districts. The City is also working to develop and enact additional policies and actions designed to reduce costs and burdens for new housing development and to support a variety of housing types.

Implementation of the following proposed goals and policy measures ~~currently under consideration~~ for the Comprehensive Plan Update would help to avoid, minimize, and mitigate potential housing impacts identified for the action alternatives:

- Add a minimum of 38,~~000~~ 129 new housing units by 2045.
- Provide a wide range of new housing types to fit a variety of household sizes, cultures, incomes, abilities, and stages of life. Increase housing diversity by allowing a range of missing middle housing types (duplexes, triplexes, townhomes, cottage clusters, and courtyard apartments) in low- and medium-intensity residential areas to expand affordability and accessibility. Incentivize development of housing types suitable for multigenerational living.
- Work with partners to facilitate and fund housing that reflects the cultures, identities and needs of Vancouver's unique population groups.
- Provide adequate transitional, permanently supportive, and affordable housing so that all residents have access to safe and stable housing. Expand the availability of permanently supportive housing and emergency shelter beds with integrated services for people with disabilities, houseless individuals, and at-risk populations.
- Work to prevent displacement of community members due to direct impacts and market forces by providing resources to support stable and secure housing. Implement anti-displacement strategies and actions that protect residents and businesses in advance of public investment so communities can remain in place and benefit from improvements. Analyze and mitigate for displacement pressures and risks prior to making large scale public investments.
- Provide connected and accessible neighborhoods with a diverse mix of community and open spaces, services, retail, fresh food, healthcare, and educational opportunities within

15 minutes (0.25 mile) or less of housing. Site new accessible and attainable housing close to existing and future parks.

- Enable homeownership for people across the income spectrum. Broaden access to homeownership in the community for first-time owners, low-income residents, and other groups frequently priced out of homeownership through alternative ownership methods.

Provide access to affordable housing regardless of income. Preserve the most affordable and accessible housing options in the ~~c~~City and discourage conversion to more expensive housing or commercial uses. Develop incentives to integrate below-market housing as part of new market-rate housing projects.

- Facilitate homeownership opportunities through assistance programs, grants, and other methods that reduce barriers to entry for low- and moderate-income households.
- Explore and develop additional funding methods and resources to support affordable housing and community ownership opportunities.
- Facilitate development of income-based housing in connected and accessible neighborhoods, and ~~generally~~ in areas with ~~good~~ access to transit, resources and services.
- Develop mechanisms to integrate community benefits into private development that requires discretionary land use review and City-led redevelopment projects.
- Pursue strategic acquisition and utilize existing City-owned land for affordable housing.
- Simplify the development review process where feasible and as needed to reduce housing ~~costs~~ permitting timelines and improve housing costs.
- Promote and remove regulatory barriers to new and innovative construction methods such as modular, panelized, 3d printed, or other methods.
- Develop incentives to integrate below market housing as part of new market rate housing projects.
- Provide financial support to help at-risk households remain in their homes, preventing eviction and displacement.
- Explore models and opportunities for existing residences and businesses to have voluntary right of first refusal to purchase qualifying properties when sold or build an equity stake in the property over time.

Significant Unavoidable Adverse Impacts

The No Action Alternative would have significant adverse impacts on housing because it would not provide sufficient capacity for development to meet the City's minimum 2045 housing targets, and would not comply with state housing requirements of the GMA.

The anticipated changes under the action alternatives would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant

unavoidable adverse impacts to housing are anticipated for Alternative 1 or Alternative 2 or the Preferred Alternative.

Aesthetics

Methodology

Aesthetics refers to the scale and visual quality of the study area, including building heights, views, shading conditions, and overall visual and architectural character. Analysts reviewed relevant information and policies about the city's existing urban form and character, viewsheds, shadows, and light and glare, including the following sources:

- Vancouver Municipal Code:
    - Existing VMC 20.925, Landscaping
    - Existing VMC 20.935, Off-site Impacts,
    - VMC 20.770, Tree, Vegetation, and Soil Conservation
    - VMC 20.500, Overlay Districts
    - VMC 20.600, Plan Districts
- Design guidelines and manuals for subareas and districts
- City of Vancouver Shoreline Master Program (City of Vancouver 2021b)

Analysts reviewed the alternatives to determine potential adverse impacts and associated mitigation measures using the following metrics:

- Compatibility with desired urban form and character as expressed in existing and future planning documents
- Level of general visual impacts (e.g., shadows, light, and glare)

Any analysis of aesthetic impacts is inherently subjective and can vary based on individual preferences. This analysis is based on assumptions that increased growth and density can lead to additional larger or taller buildings that cast longer shadows and have the potential to add to light and glare impacts.

Affected Environment

Existing Urban Form and Character

Existing urban form and character vary by location in Vancouver. Western areas of the ~~e~~City generally have older buildings, smaller lots with denser uses, and a more walkable environment with a traditional grid-patterned street network. This area also has a large industrial center, which includes the Port of Vancouver, along the Columbia River west of the

Vancouver Waterfront. Key corridors and sites include Mill Plain Boulevard/SR 501, downtown (see ~~Figure 14~~ ~~Figure 14~~ Figure 16), the waterfront, and Vancouver Lake.

~~Figure 14~~ Figure 16. Downtown Vancouver

Source: City of Vancouver

Central Vancouver has a more suburban character than the western areas, including postwar subdivisions and older big-box retail developments. Key corridors and sites include Fourth Plain (see ~~Figure 15~~ ~~Figure 15~~ Figure 17), Evergreen and Grand Boulevards, Fort Vancouver, Clark College, and The Heights Subarea.

~~Figure 15~~ Figure 17. East Fourth Plain Boulevard

Source: City of Vancouver

East Vancouver has the most suburban character and urban form, with newer residential and big-box retail developments. Key corridors and sites include Mill Plain Boulevard and SE 164th Avenue, as shown in ~~Figure 16~~ ~~Figure 16~~ Figure 18.

~~Figure 16~~ Figure 18. Aerial View of SE 164th Avenue and Mill Plain Boulevard Vicinity

Source: City of Vancouver

Vancouver's landscape reflects efforts to preserve existing trees and other vegetation and to add new vegetation (City of Vancouver 2021). Historic trees in the City help preserve its character and are identified and protected as "heritage trees" in VMC 20.770. VMC 20.925 outlines landscaping requirements for all new or substantially remodeled buildings, accessory uses, and parking lots for multiple reasons, including aesthetic value.

The Our Vancouver Goals Framework identifies harmony between the built and natural environment as a desired community outcome (City of Vancouver 2023b).

In addition to these citywide regulations and policies, many subareas and districts within the ~~e~~City are guided by design guidelines that have been adopted to guide housing type and character specifically in those areas.

Viewsheds

Most of Vancouver today is dominated by views of the built environment, including existing commercial and residential areas. Vancouver is situated in a natural landscape that is characteristic of the Pacific Northwest region of the United States, with rivers, creeks and lakes, and urban forests. Views of Mt. St. Helens, Mt. Adams, and Mt. Hood are also available

from certain corridors and locations within the city, with one example shown in ~~Figure 17~~ ~~Figure 17~~ Figure 19.

~~Figure 17~~ Figure 19. Views of Mt. Hood at Vancouver Lake

Source: City of Vancouver

Views of the Columbia River are available in some areas of the city, including the Vancouver Waterfront and various businesses and homes along the shoreline. The City's SMP identifies goals and policies around views and aesthetics "to assure that the public's opportunity to enjoy the physical and aesthetic qualities of shorelines of the state, including views of the water, is protected to the greatest extent feasible" (City of Vancouver 2021). The SMP restricts new or expanded buildings that would obstruct the views of a substantial number of residences on areas adjacent to shorelines unless "overriding considerations of the public interest will be served."

Shadows

Shadows refer to the blockage of direct sunlight falling on a given area. Some land uses are more sensitive to shading than others, where access to periods of direct sunlight is important for their primary function. Examples include parks and outdoor recreational facilities, community gardens, and buildings that rely on solar power panels.

Shadows in the ~~e~~City are typically influenced by building heights and sizes, which are regulated by the zoning code and vary by zone. Downtown Vancouver, the waterfront, and other mixed-use and commercial zones typically have taller buildings that cast longer

shadows. Lower-density neighborhoods with shorter buildings have fewer building-shaded areas.

Light and Glare

Light and glare impacts tend to be concentrated in higher-density areas with more street lights, reflective surfaces, and vehicle traffic, compared to lower-density areas. VMC 20.935.030(D) provides limitations for off-site impacts from light and glare that apply to any development, redevelopment, or use of a property in the City, both during and after construction.

Light pollution refers to the alteration of outdoor light levels from those occurring naturally, and can affect our ability to see the night sky. Light pollution is caused by outdoor lights from various sources that remain on (or are on periodically) between sunset and sunrise. Examples include streetlights, exterior lights on buildings, and headlights from vehicles. Light pollution in Vancouver is greater closer to Portland and gradually reduces over distance (Radiance Light Trends 2024).

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following aesthetics-related metrics:

- Compatibility with desired urban form and character as expressed in existing and future planning documents
- Level of general visual impacts (e.g., shadows, light and glare)

Impacts Common to All Alternatives

The following sections outline impacts that are expected to occur under all the alternatives. Impacts specific to each alternative are discussed in the next subsections.

Compatibility with Urban Form and Character

All of the alternatives would allow development of new housing units and other structures throughout the city, which has the potential to directly affect aesthetics in the surrounding areas. Existing and planned regulations and policies aimed at protecting views and reducing the effects of light and glare would apply to all alternatives and would help facilitate compatibility with area-specific urban form and character in a changing environment.

Level of General Visual Impacts

All alternatives would have the potential for impacts to aesthetics through specific future development projects. Future development, regardless of alternative, may alter the visual character of an area and create new sources of shading, light and glare.

All alternatives would have similar amounts of land designated for Hheavy iindustrial, Industrial/Employment, ~~Institutional/Campus,~~ and Parks/Open Space uses. Therefore, impacts to aesthetics, including building heights, views, shading conditions, and overall visual and architectural character, would likely be neutral in these areas.

No Action Alternative

The No Action Alternative assumes the lowest level of citywide growth and development of all the alternatives and no changes to existing land use and zoning designations. Larger-scale buildings and higher building heights would be allowed in fewer areas of the ~~e~~City than under the action alternatives, as detailed in Appendix C. Therefore, it would have the lowest potential for altering the existing visual setting of the ~~e~~City and for introducing new sources of shadow, light, and glare. Development would continue to occur under the existing land use and zoning regulations, as well as state-imposed allowances for new middle housing in single-family neighborhoods, and impacts to aesthetics would likely be modest. Middle housing would also be allowed in single-family neighborhoods under the No Action Alternative, because state law automatically imposes a model ordinance allowing middle housing if local jurisdictions do not take action to allow these housing types. Some aspects of aesthetics would continue to be regulated in the limited select areas that have design guidelines.

Alternative 1

Alternative 1 would allow denser development patterns and larger-scale, taller buildings in more areas of the ~~e~~City compared to the No Action Alternative and in fewer areas of the ~~e~~City compared to Alternative 2.

Because Alternative 1 would have a smaller amount of land area dedicated to Medium-Scale Neighborhood and~~,~~ Mixed Use ~~,and Regional Activity Center~~ zoning districts than Alternative 2, there would be slightly less potential for development of larger-scale buildings that are taller than three stories (45 feet). Alternative 1 would have a similar amount of land dedicated to the Regional Activity Center zoning district as the Preferred Alternative, which would allow for development of larger-scale buildings (no height maximum). ~~However, t~~The proposed zoning code updates would allow for higher maximum building heights in Low-Scale Neighborhoods under ~~both~~ all action alternatives than in equivalent low-density residential zoning districts under the No Action Alternative (45 feet maximum under the action alternatives as compared to 30 feet maximum under the No Action Alternative). These changes could result in localized light, glare, shadow, and other visual impacts if some parcels redevelop to taller building types than their neighboring parcels.

There would be a slightly higher likelihood of redevelopment of existing parking lots, vacant lots and structures under Alternative 1 compared to the No Action Alternative because of the implementation of denser land use designations and zoning in more parts of the city. The light, glare and visual impacts from existing parking lots and vacant lots and structures would be improved by redevelopment of these sites consistent with the new Comprehensive Plan and code.

Alternative 2

Alternative 2 would allow for higher-density zoning districts and larger-scale, taller buildings in the most areas of the ~~c~~City of all the alternatives. Therefore, overall, Alternative 2 would have the highest potential for associated impacts to aesthetic resources, including changes in visual character resulting from taller allowed buildings and new sources of shadows, light and glare.

The amount of land devoted to Regional Activity Center, ~~Campus/Institutional,~~ Medium-Scale Neighborhood~~,~~ and Mixed-Use development would be higher than under Alternative 1 and the Preferred Alternative, which could result in a modestly greater number of taller buildings (75 feet or taller). The increased number of taller, larger-scale buildings would have the potential to result in slightly greater light, glare, shadow, and visual impacts under Alternative 2 compared to Alternative 1, the Preferred Alternative and the No Action Alternative. As with Alternative 1 and the Preferred Alternative, there would also be aesthetic improvements associated with the redevelopment of parking lots and vacant lots and structures.

Preferred Alternative

The Preferred Alternative would allow for higher-density zoning districts and larger-scale, taller buildings in more areas of the City than the No Action Alternative, similar to Alternatives 1 and 2. The Preferred Alternative would have a higher potential for associated impacts to aesthetic resources than the No Action Alternative, including changes in visual character resulting from allowances for taller buildings and new sources of shadows, light and glare.

The amount of land devoted to Institutional/Campus would be the highest under the Preferred Alternative, which would allow for development of taller, larger-scale buildings with a range of commercial and residential uses. Unlike Alternatives 1 and 2, the Preferred Alternative would designate the Section 30 area as Institutional/Campus rather than Mixed Use (Alternative 1) or Regional Activity Center (Alternative 2).

The amount of land devoted to Medium-Scale Neighborhood and Mixed-Use would be similar to Alternative 2, which could result in a modestly greater number of taller buildings (75

feet or taller). This increased number of taller, larger-scale buildings would have the potential to result in slightly greater light, glare, shadow, and visual impacts under the Preferred Alternative compared to Alternative 1 and the No Action Alternative. There would be a similar amount of land dedicated to the Regional Activity Center zoning district as Alternative 1 and slightly less than Alternative 2, which would allow for development of larger-scale buildings (no height maximum). As with Alternatives 1 and 2, there would also be aesthetic improvements associated with the redevelopment of parking lots and vacant lots and structures.

Avoidance, Minimization, and Mitigation Measures

Regardless of alternative, all future development projects will be required to comply with ~~e~~City and state policies for protecting views of the shoreline and reducing off-site impacts, including light and glare. In addition, compliance with ~~e~~City and state requirements for the protection of natural resources, open space, and historic sites would contribute to the preservation of aesthetic resources in the city.

The City's development review process will ensure compliance with current VMC 20.935, carried forward in the proposed new code under VMC 20.450.007, which requires any development, redevelopment, or use of a property to have minimal adverse off-site impacts from light and glare, both during and after construction. The development review process will also ensure compliance with citywide standards for landscaping and tree conservation, as well as any applicable design guidelines or standards that may be in effect at that location.

Development standards included in the proposed form-based zoning and development regulations would also help to avoid, minimize and mitigate impacts to aesthetics. Topics ~~under consideration for~~ included in the code updates include:

- Requirements for minimum open space and maximum impervious areas, building placement and lot build-out (setbacks from property lines), building heights, access points, landscaping (including incentives for maintaining large trees and adding more trees than required), and connectivity.
- Requirements for certain frontage types (i.e., how a building interacts with the street and shapes the overall character of the streetscape), such as awnings, balconies, bay windows, cafés, common yards, courtyards, porches, stoops, and terraces. The City ~~is considering~~ will require form and dimensional requirements for these elements as they relate to the public right-of-way ~~and prohibiting use of exterior materials that could promote glare~~.
- Regulations that provide transitions between zoning districts to ensure compatibility.

Implementation of the following policy measures ~~currently under consideration~~ for the Comprehensive Plan Update would also help to avoid, minimize, and mitigate potential aesthetics impacts identified for the action alternatives:

- Ensure medium- to high-scale residential, mixed-use, and commercial development is human-scale, street-oriented, and integrated with surroundings to enhance comfort, accessibility, and visual interest for people walking, biking, or rolling.
- Develop standards for public spaces and buildings that incorporate culturally specific design principles and art installations and reflect the diverse history and heritage of Vancouver communities.

Significant Unavoidable Adverse Impacts

All alternatives have the potential to create impacts to aesthetics as a result of new development patterns and building forms. The anticipated changes would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant unavoidable adverse impacts to aesthetics are anticipated for any of the alternatives.

Historic and Cultural Preservation

Methodology

Analysts reviewed relevant information and policies about citywide historic and archaeological resources, including the following sources:

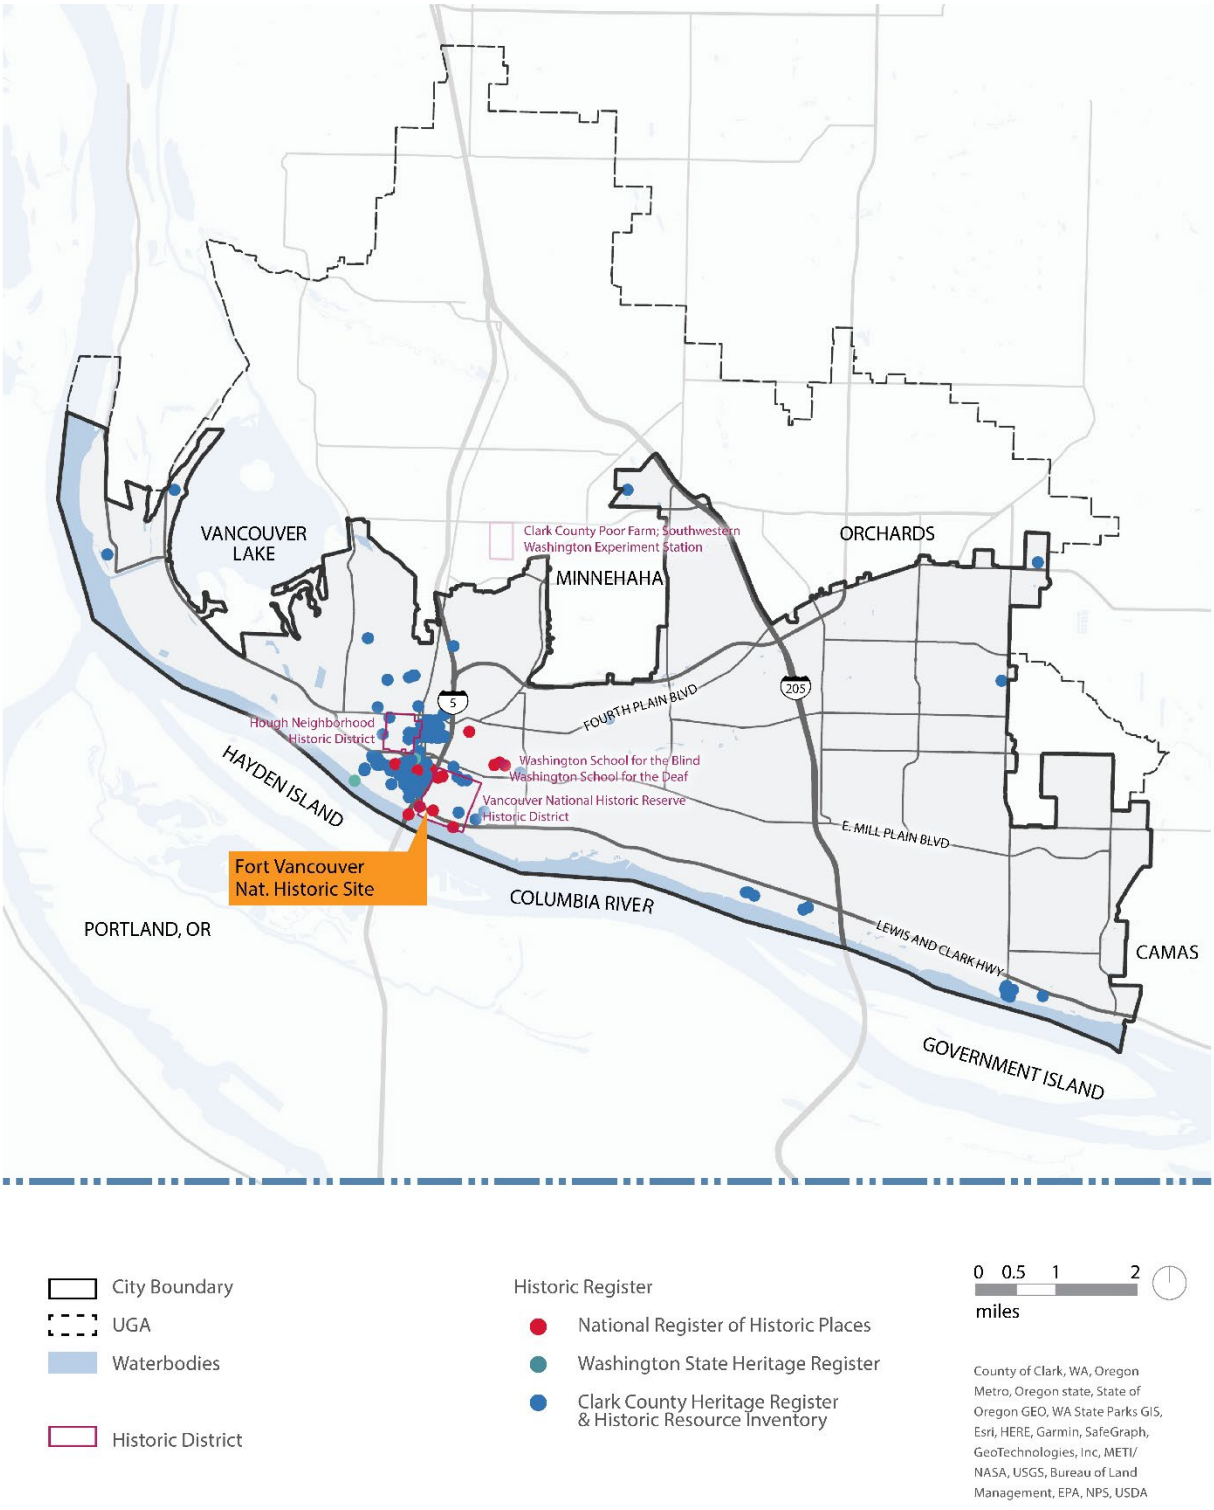
- National Register of Historic Places (NRHP)
- RCW Chapter 27.34, State Historical Societies – Historic Preservation
- RCW Chapter 27.44, Indian Graves and Records
- RCW Chapter 27.48, Preservation of Historical Materials
- RCW Chapter 27.53, Archeological sites and resources
- Washington State Heritage Register (WSHR)
- VMC Chapter 17.39, Historic Preservation
- VMC Chapter 20.710, Archaeological Resource Protection
- VMC Chapter 20.770.120, Heritage Trees
- Community Atlas (Design Workshop 2024)

Analysts then reviewed the alternatives to determine potential adverse impacts and associated mitigation measures using the following metrics:

- Level of potential impacts to historic sites
- Level of risk of uncovering archaeological resources at proposed development sites

Affected Environment

Historic Sites



VMC 17.39 applies to properties in Vancouver and includes eligibility criteria for historic and cultural resources in Clark County, in addition to the NRHP and WSHR. Many historic sites and buildings have been revitalized to preserve their unique architectural characteristics and embrace Vancouver's history. The City is commonly recognized for its historic site, Fort Vancouver, which served as a major trading post in the 19th century and an Army post during World War II.

~~Figure 18~~ ~~Figure 18~~ Figure 20 shows a map of sites in Vancouver that are listed on the NRHP, WSHR, or Clark County Heritage Register and Historic Property Inventory, and Table 11 lists NRHP sites in Vancouver. These historic sites are primarily clustered just west and east of I-5 in West and Central Vancouver, near downtown. A few county historic sites are designated along the Columbia River and at the far eastern and western edges of the city limits.

Vancouver has two designated federal and/or state historic districts:

- In West Vancouver, the Hough Neighborhood Historic District, located west of Vancouver's central business district, has been listed on the Washington Heritage Register since 2003 (Clark County 2024a). It hosts a variety of architectural styles and buildings constructed primarily between circa 1890 and 1945 and is the largest collection of existing pre-World War II housing in Vancouver.
- In Central Vancouver, the Vancouver National Historic Reserve Historic District, bounded by Evergreen Boulevard on the north, I-5 on the west, the Columbia River on the south and East Reserve Street on the east, covers about 252 acres of the 366-acre Historic Reserve created by Congress in 1996 (Clark County 2024b). It includes several nationally significant sites that contribute to its status on the NRHP, including Fort Vancouver National Historic Site, the Officer's Row National Historic District, the Vancouver Barracks National Historic District, Pearson Air Museum, the Jack Murdock Aviation Center, Pearson Airfield, Old Apple Tree Park, and Waterfront Park.

Archaeological Resources

~~Figure 19~~ ~~Figure 19~~ Figure 21 shows the probability of encountering archaeological resources throughout the ~~e~~City based on data from the state's predictive model. Most of the city's perimeter, including sites along Vancouver Lake and the Columbia River, is identified as having a higher probability of having archaeological significance. Central and East Vancouver north and south of Fourth Plain Boulevard and SR 500 are also identified as higher probability areas.

~~Figure 19~~ Figure 21. Archaeological Predictive Risk Probability Map

Source: Clark County n.d.

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following historic and cultural preservation-related metrics:

- Level of potential impacts to historic sites
- Level of risk of uncovering archaeological resources at proposed development sites

Impacts Common to All Alternatives

The following sections outline impacts that are expected to occur under all the alternatives. Impacts specific to each alternative are discussed in the next subsections.

Level of Potential Impacts to Historic Sites

All alternatives could potentially lead to redevelopment projects that would demolish, physically alter, or change the setting of existing historic properties. They could also potentially introduce new elements into culturally or historically significant viewsheds of historic properties.

West Vancouver, particularly downtown, would have the highest potential for impacts to historic sites under all of the alternatives because it has the largest concentration of identified historic properties in the city, as well as the state-designated Hough Neighborhood Historic District (see ~~Figure 18~~ ~~Figure 18~~ Figure 20).

Central Vancouver would have capacity for more projected new housing units and jobs relative to West Vancouver but fewer than East Vancouver. It has fewer identified historic sites than West Vancouver but more than East Vancouver, so it would have moderate potential for impacts to these properties. Although the associated zoning designations would change under the action alternatives, it is assumed that no new development would occur within the Vancouver National Historic Reserve Historic District under any of the alternatives.

East Vancouver would have capacity for the most projected new housing units and jobs and also has the fewest identified historic sites. It would therefore have the lowest potential for impacts to historic sites under all of the alternatives.

The City's identified need to meet future minimum housing and jobs targets, regardless of alternative, could result in increased pressure to redevelop sites that have historic buildings or potential cultural or archaeological resources; however, this would be less of an issue in East and Central Vancouver under all alternatives based on the locations of identified historic sites.

Level of Risk of Uncovering Archaeological Resources at Proposed Development Sites

All alternatives could potentially lead to redevelopment projects that could uncover archaeological resources during construction. Risks of encountering archaeological resources would be highest along most of the city's perimeter, including sites along the Columbia River and Vancouver Lake, and in Central and East Vancouver north and south of Fourth Plain Boulevard and SR 500.

Because land use and zoning designations would remain similar for sites along the Columbia River and Vancouver Lake under all of the alternatives, potential impacts to archaeological resources are also expected to be similar.

No Action Alternative

In general, there would be minimal additional impacts under the No Action Alternative aside from those described in the Impacts Common to All Alternatives section. The No Action Alternative would allow for the lowest level of citywide growth and redevelopment of all the alternatives. Therefore, it would likely have the lowest potential for individual site disturbance and potential associated impacts to cultural, archaeological, and historic resources. However, the No Action Alternative would encourage continuation of a less dense, more dispersed style of urban development. In the longer term, this type of development pattern could potentially increase pressure to develop more individual sites, which could result in additional cumulative impacts to historic and cultural preservation over time.

Alternative 1

In general, there would be minimal additional impacts under Alternative 1 aside from those described in the Impacts Common to All Alternatives section. Due to the amount of land zoned for Medium Scale Neighborhood, Mixed Use, and Regional Activity Center, Alternative 1 would allow for more intense levels of citywide development compared to the No Action Alternative and lower levels compared to Alternative 2 and the Preferred Alternative ~~and lower levels compared to Alternative 2~~. Higher-density development would be allowed in fewer areas of the ~~c~~City than in Alternative 2 and the Preferred Alternative, as discussed in the Land and Shoreline Use section. Overall, more sites would have the potential for disturbance and associated impacts to cultural, archaeological, and historic resources under Alternative 1 than the No Action Alternative and fewer sites would experience these impacts under Alternative 2.

In West Vancouver, the Hough neighborhood, a designated historic district, would be designated as Medium-Scale Neighborhood under ~~both~~ the action alternatives, which would create potential pressure to redevelop historic properties into denser housing types and allow a greater mix of land uses in the area. Although the Hough neighborhood already

contains multifamily housing units, the medium-scale buildings allowed in this new zoning district could have impacts on neighboring historic properties if they resulted in changes to their setting. However, West Vancouver is also identified as having the lowest capacity for new housing units based on market feasibility and redevelopment studies compared to Central and East Vancouver under Alternative 1, as discussed in the Land and Shoreline Use section.

In Central and East Vancouver, there would be greater potential risk of encountering archaeological resources under Alternative 1 than the No Action Alternative because Alternative 1 would allow for higher-density development in higher probability areas north and south of Fourth Plain Boulevard and SR 500.

Overall, because Alternative 1 would allow for denser development patterns than the No Action Alternative, it would potentially result in less pressure to develop individual historic sites than the No Action Alternative, which could lead to fewer cumulative impacts on historic and cultural preservation over time.

Alternative 2

In general, there would be minimal additional impacts under Alternative 2 aside from those described in the Impacts Common to All Alternatives section. Alternative 2 would allow for the highest intensity of citywide development of all the alternatives, and there would be more areas designated for potential high-density development than under Alternative 1 and the Preferred Alternative.

Similar to Alternative 1 and the Preferred Alternative, Alternative 2 has the potential to create pressure to redevelop historic properties in the Hough neighborhood in West Vancouver into denser housing types as allowed in the Medium-Scale Neighborhood zoning district.

In Central ~~and East~~ Vancouver, there would be a greater potential risk of encountering archaeological resources under Alternative 2 than the No Action Alternative and Alternative 1, but about the same as the Preferred Alternative because of proposed higher-density and intensity development (Medium Scale Neighborhood, Mixed Use, Regional Activity Center) in higher probability areas north and south of Fourth Plain Boulevard and SR 500.

In East Vancouver, Alternative 2 would have the greatest potential risk of encountering archaeological resources because it would have the largest amount of land zoned for Medium Scale Neighborhood, Mixed Use and Regional Activity Center, which allow for taller buildings and may require more excavation.

Overall, Alternative 2 would have the highest potential for site disturbance and associated impacts to cultural, archaeological, and historic resources at individual sites because of the higher levels of potential disturbance to existing land and buildings to accommodate new, denser development. However, because Alternative 2 would allow for the densest development patterns, it would potentially result in less pressure to develop historic sites than the No Action Alternative, ~~and~~ Alternative 1, and the Preferred Alternative, which could lead to fewer cumulative impacts on historic and cultural preservation over time.

Preferred Alternative

In general, there would be minimal additional impacts under the Preferred Alternative aside from those described in the Impacts Common to All Alternatives Section. The Preferred Alternative would allow for a higher intensity of citywide development than the No Action Alternative, similar to Alternatives 1 and 2. There would be more areas designated for potential high-density development than under Alternative 1 and slightly fewer of these areas than under Alternative 2.

Similar to Alternatives 1 and 2, the Preferred Alternative would have the potential to create pressure to redevelop historic properties in the Hough neighborhood in West Vancouver into the denser housing types allowed in the Medium-Scale Neighborhood zoning district.

In Central Vancouver, there would be a greater potential risk of encountering archaeological resources under the Preferred Alternative than the No Action Alternative and Alternative 1 and about the same amount of risk compared to Alternative 2 because of proposed higher-density and intensity development in higher probability areas north and south of Fourth Plain Boulevard and SR 500.

In East Vancouver, the Preferred Alternative would have a greater potential risk of encountering archaeological resources compared to Alternative 1, but less risk than Alternative 2 because there would be less land zoned for Medium Scale Neighborhood, Mixed Use and Regional Activity Center.

Overall, the Preferred Alternative would have a higher potential for site disturbance and associated impacts to cultural, archaeological, and historic resources at individual sites because of the higher levels of potential disturbance to existing land and buildings to accommodate new, denser development. However, because the Preferred Alternative would allow for denser development patterns in more areas of the city, similar to Alternative 2, it would potentially result in less pressure to develop historic sites than the No Action Alternative, which could lead to fewer cumulative impacts on historic and cultural preservation over time.

Avoidance, Minimization, and Mitigation Measures

Regardless of the alternative, all future development projects will be required to comply with ~~e~~City and state requirements for identification and preservation of cultural, archaeological, and historic resources.

The City's development review process will ensure compliance with VMC 20.710, which requires an archaeological study (or predetermination): (1) when any part of the area to be disturbed is in an area with a high probability for archaeological resources, (2) when the development is 5 acres or more in size and wholly within an area with moderate-high and moderate probability for archaeological resources, (3) when any land to be disturbed, regardless of size or predictive model probability level, is within 0.25 mile of a recorded archaeological site. All areas that have not been previously included in an archaeological study are recommended for a predetermination-level study.

In addition, implementation of the following goals and policy measures ~~currently under consideration~~ for the Comprehensive Plan Update would also help to avoid, minimize, and mitigate potential impacts to historic and cultural preservation identified for the action alternatives:

- Support a thriving cultural landscape for residents and visitors by investing in public art, cultural centers and facilities, historic preservation, and supporting community-centered initiatives and opportunities for creative expression that reflect the city's diverse identities and historic roots.
- Develop standards for public spaces and buildings that incorporate culturally specific design principles and art installations and reflect the diverse history and heritage of Vancouver communities.
- Foster meaningful partnerships with tribal communities and land stewards, integrating their knowledge, priorities, and cultural perspectives into local decision-making processes.
- Engage community organizations and individuals representing diverse lived and cultural experiences in the planning, design, and programming of community spaces.
- Protect and preserve significant cultural, historic, archaeologic, and ecologic community resources. Promote preservation, restoration, and rehabilitation of historic and architecturally significant structures.
- Improve access to arts, cultural, and heritage programs by reducing barriers to participation, prioritizing underserved and historically marginalized communities, and investing in related programs.
- Strengthen Vancouver's cultural sector by investing in capacity building across arts, culture and heritage organizations as an economic and cultural driver of the community.

- Protect and promote Fort Vancouver and the Historic Reserve as nationally significant cultural and historic assets. Support public investment, inclusive programming, and heritage-based economic development. Oppose efforts to reduce funding or public accessibility.
- Ensure publicly funded art projects and installations reflect and incorporate the experiences of historically excluded and underrepresented voices in the physical and cultural landscape of the City.

Significant Unavoidable Adverse Impacts

All alternatives have the potential to create impacts to historic and cultural preservation as a result of expected population and job growth and development. The anticipated changes would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant unavoidable adverse impacts to historic and cultural preservation are anticipated for any of the alternatives.

Transportation

Methodology

Analysts reviewed relevant information and policies to qualitatively describe existing citywide conditions for vehicular, active, water, rail, and airborne transportation, as well as parking and safety conditions, including the following sources:

- Clark County Regional Transportation Plan (RTC 2024)
- City of Vancouver Transportation System Plan (TSP) 2024-2044 (City of Vancouver 2024a)
- C-TRAN 2025~~1-2026~~ 2030 Transit Development Plan (C-TRAN ~~2021~~2025)
- Community Atlas: Existing Conditions Report (Design Workshop 2024)
- Southwest Washington Regional Transportation Council (RTC) regional travel demand model outputs (RTC 2025, 2026)

In coordination with the City, RTC refined and ran the regional travel demand model for the alternatives described in Chapter 2 to estimate transportation conditions in 2045 (RTC 2025, 2026). The model used 2023 households and jobs data to represent existing conditions for consistency with the baseline year for the Comprehensive Plan Update and to be consistent with other jurisdictions in Clark County. Using the outputs from the model, analysts reviewed the alternatives and determined potential adverse impacts and associated mitigation measures for the following performance metrics:

- Vehicle miles traveled (VMT)
- Level of mode shift

- Mobility units by transportation analysis districts
- Potential for increases in fatal/severe crashes

Affected Environment

Vehicular Transportation

Vancouver's street network consists of highways, arterials, and collectors, as shown in ~~Figure 20~~ ~~Figure 20~~ Figure 22. Few streets connect directly across the ~~c~~City (City of Vancouver 2024a). Interstate 5 (I-5) runs north–south through Western-Central Vancouver and provides connectivity to nearby Portland, Oregon, as well as the whole West Coast. Interstate 205 (I-205) serves as a bypass for I-5, running north–south and terminating in Salmon Creek, WA at the north end and in Tualatin, Oregon at the south end.

State Route (SR) 14 runs east–west, starting at I-5 in Vancouver, running through the Columbia River Gorge, and ending at I-82/US 395 in Plymouth, Washington. SR 14 is a key connector to Camas and Washougal, located east of Vancouver. SR 500 is an auxiliary route of I-5, running east–west and connecting I-5 to I-205.

The city's arterial network, including Mill Plain Boulevard, 112th Avenue, and Andresen Road, has major destinations, transit service, higher speed limits, wider roadways, and the greatest number of crashes.

The City's transportation system is guided by the TSP, which provides policy direction on transportation infrastructure investments in the City and considers regional transportation needs (City of Vancouver 2024a). The 2024-2044 TSP proposes a framework for future transportation investment intended to reduce car dependency and improve mobility and safety for all, regardless of age, ability or travel mode.

While the 2024 TSP largely focuses on working within the existing roadway system to expand safe transportation options for all users, the City also plans to invest in upgrading and building out the primary arterial roadway system. These large-scale capital projects are designed to bring major roadways up to urban standards; add turn lanes, mobility lanes (a renaming of "bike lanes" to account for their use by bikes, e-bikes, and other small mobility devices such as scooters) and sidewalks; improve safety; and reduce congestion by accommodating recent and future developments along arterial streets.

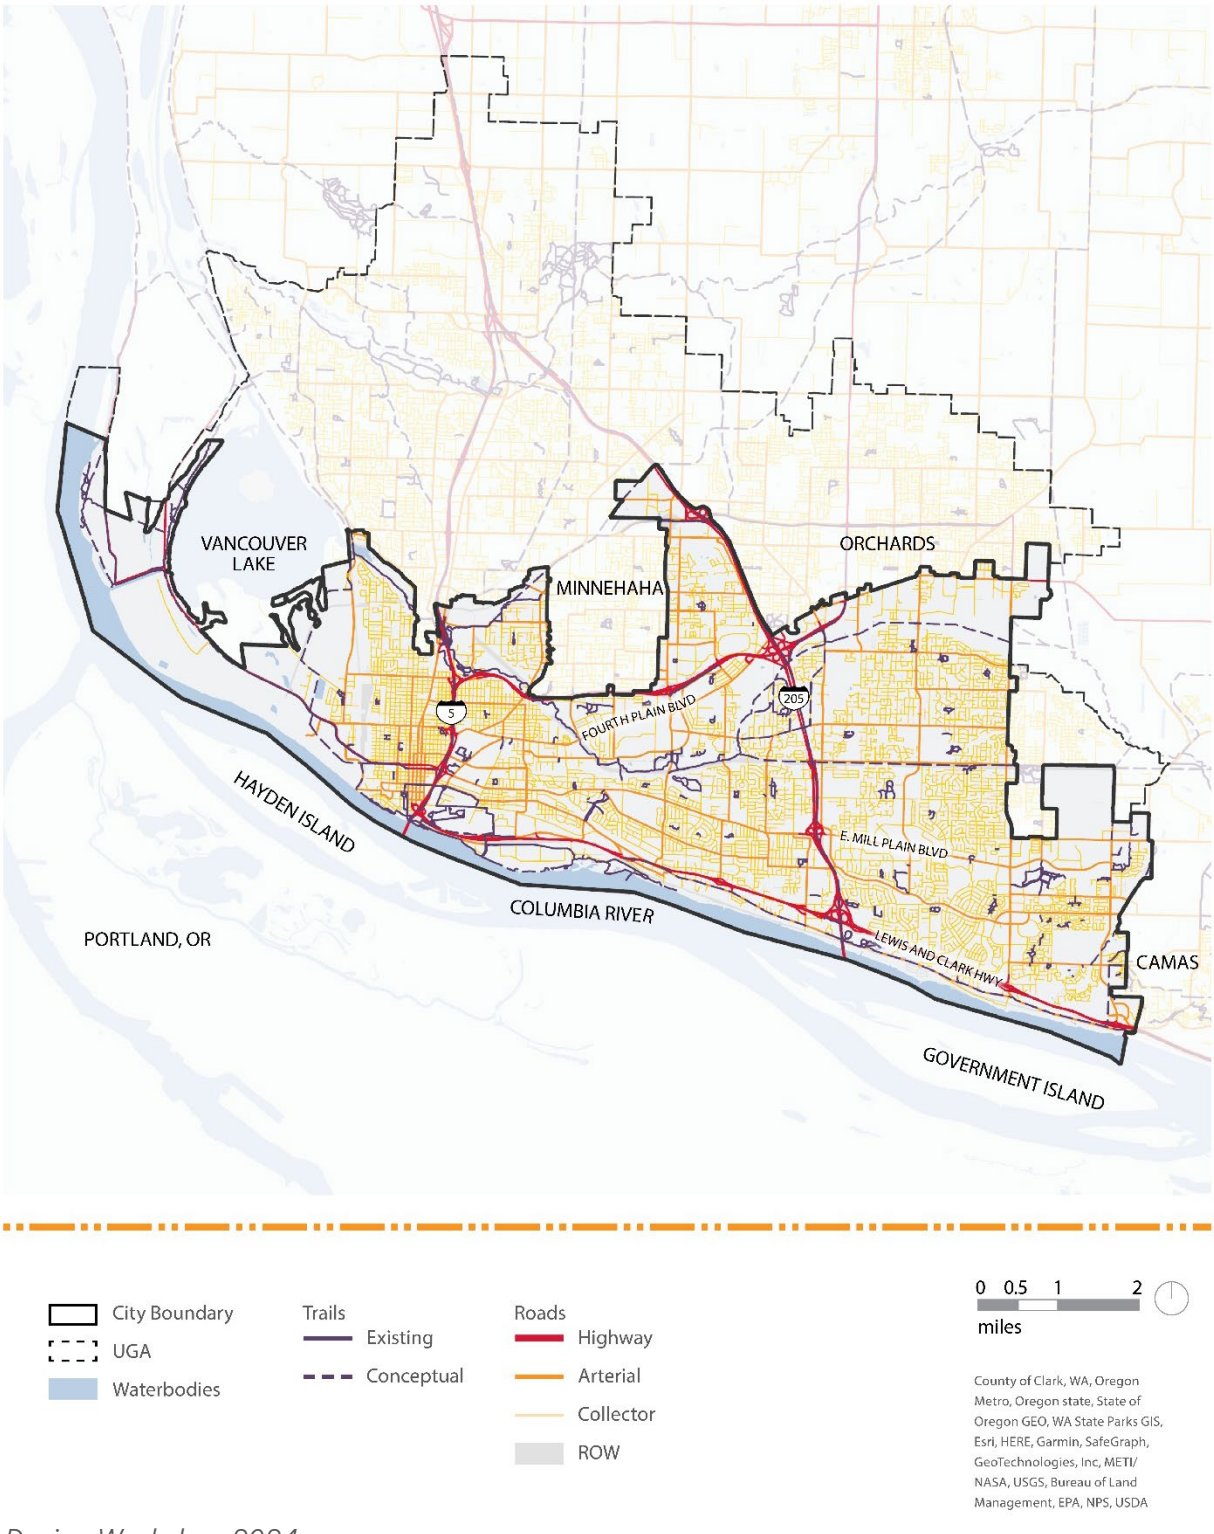
Table 12 shows modeled existing citywide daily VMT, and Table 13 shows modeled existing mode split.

Safety

From 2010 to 2019, the number of crashes in the City increased 29% while the population grew by 13%. During the pandemic, crashes declined 5% from 2019 to 2022 (City of Vancouver 2024a).

The TSP found that long distances between crossings, lack of sidewalks on nine miles of arterial streets, and bicycling and small mobility facilities that end abruptly contribute to feelings of unsafe conditions. Distraction and inattention make up the top two factors contributing to crashes across all crash types. ~~Figure 21~~ ~~Figure 21~~ Figure 23 provides a map of collisions by type in 2020.

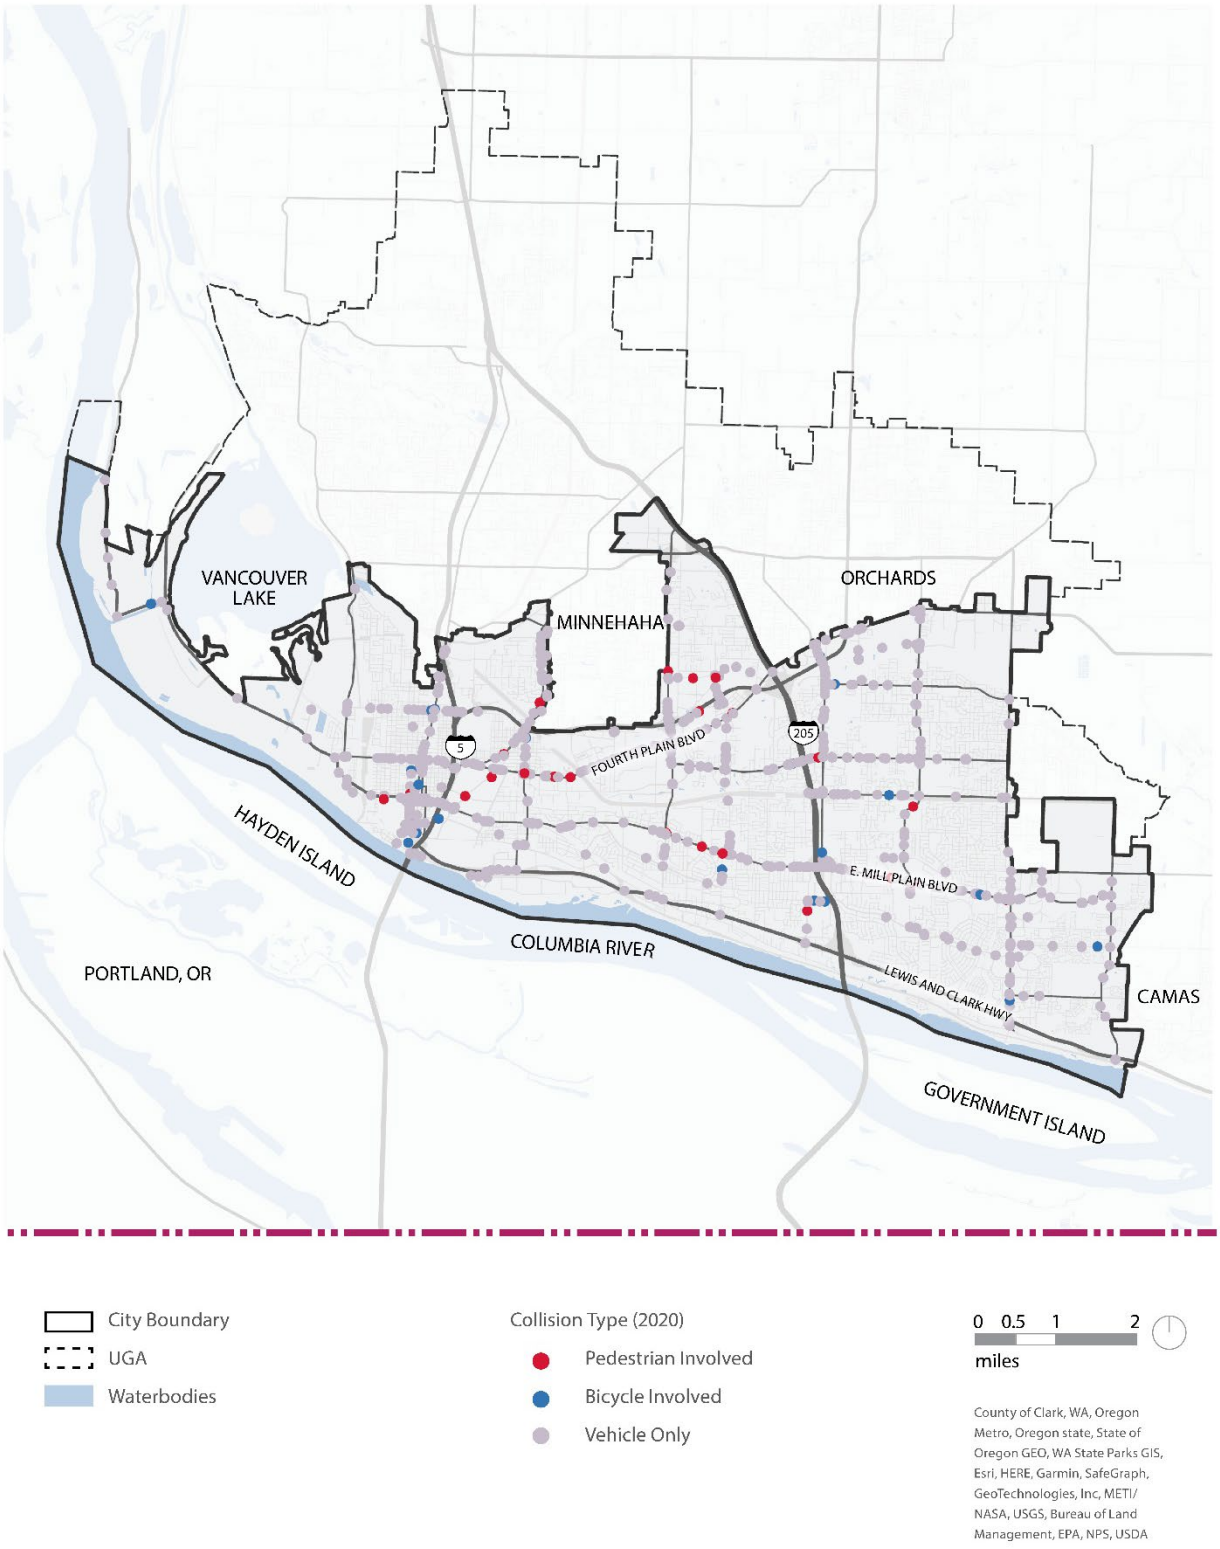
Freight



Freight is critical to the City's economy (City of Vancouver 2024a). The City works to integrate design and policy treatments so freight and vulnerable users can navigate the same streets.

The 2024 TSP calls for development of a freight network classification that designates where freight movements are expected and planned to occur. The City uses freight categories that align with state, regional, and national designations, including:

- Critical corridors. These are important for through truck traffic to maintain mobility for regional or national connections. Within this category, the two subcategories are (1) National Highway Freight Network, and (2) Truck Freight Economic Corridors.
- Freight access streets. Trucks must use streets throughout the ~~e~~City for deliveries. The freight network recognizes these local-access streets based on actual truck usage.



~~Figure 22~~ Figure 22 Figure 24 shows the City's future freight network, which includes I-5, I-205, SR 14, SR 500, SR 501, SR 503, Fourth Plain Boulevard, Mill Plain Boulevard, and others.

Source: Design Workshop 2024

~~Figure 22~~ Figure 24. Citywide Critical Freight Corridors

Source: City of Vancouver 2024a

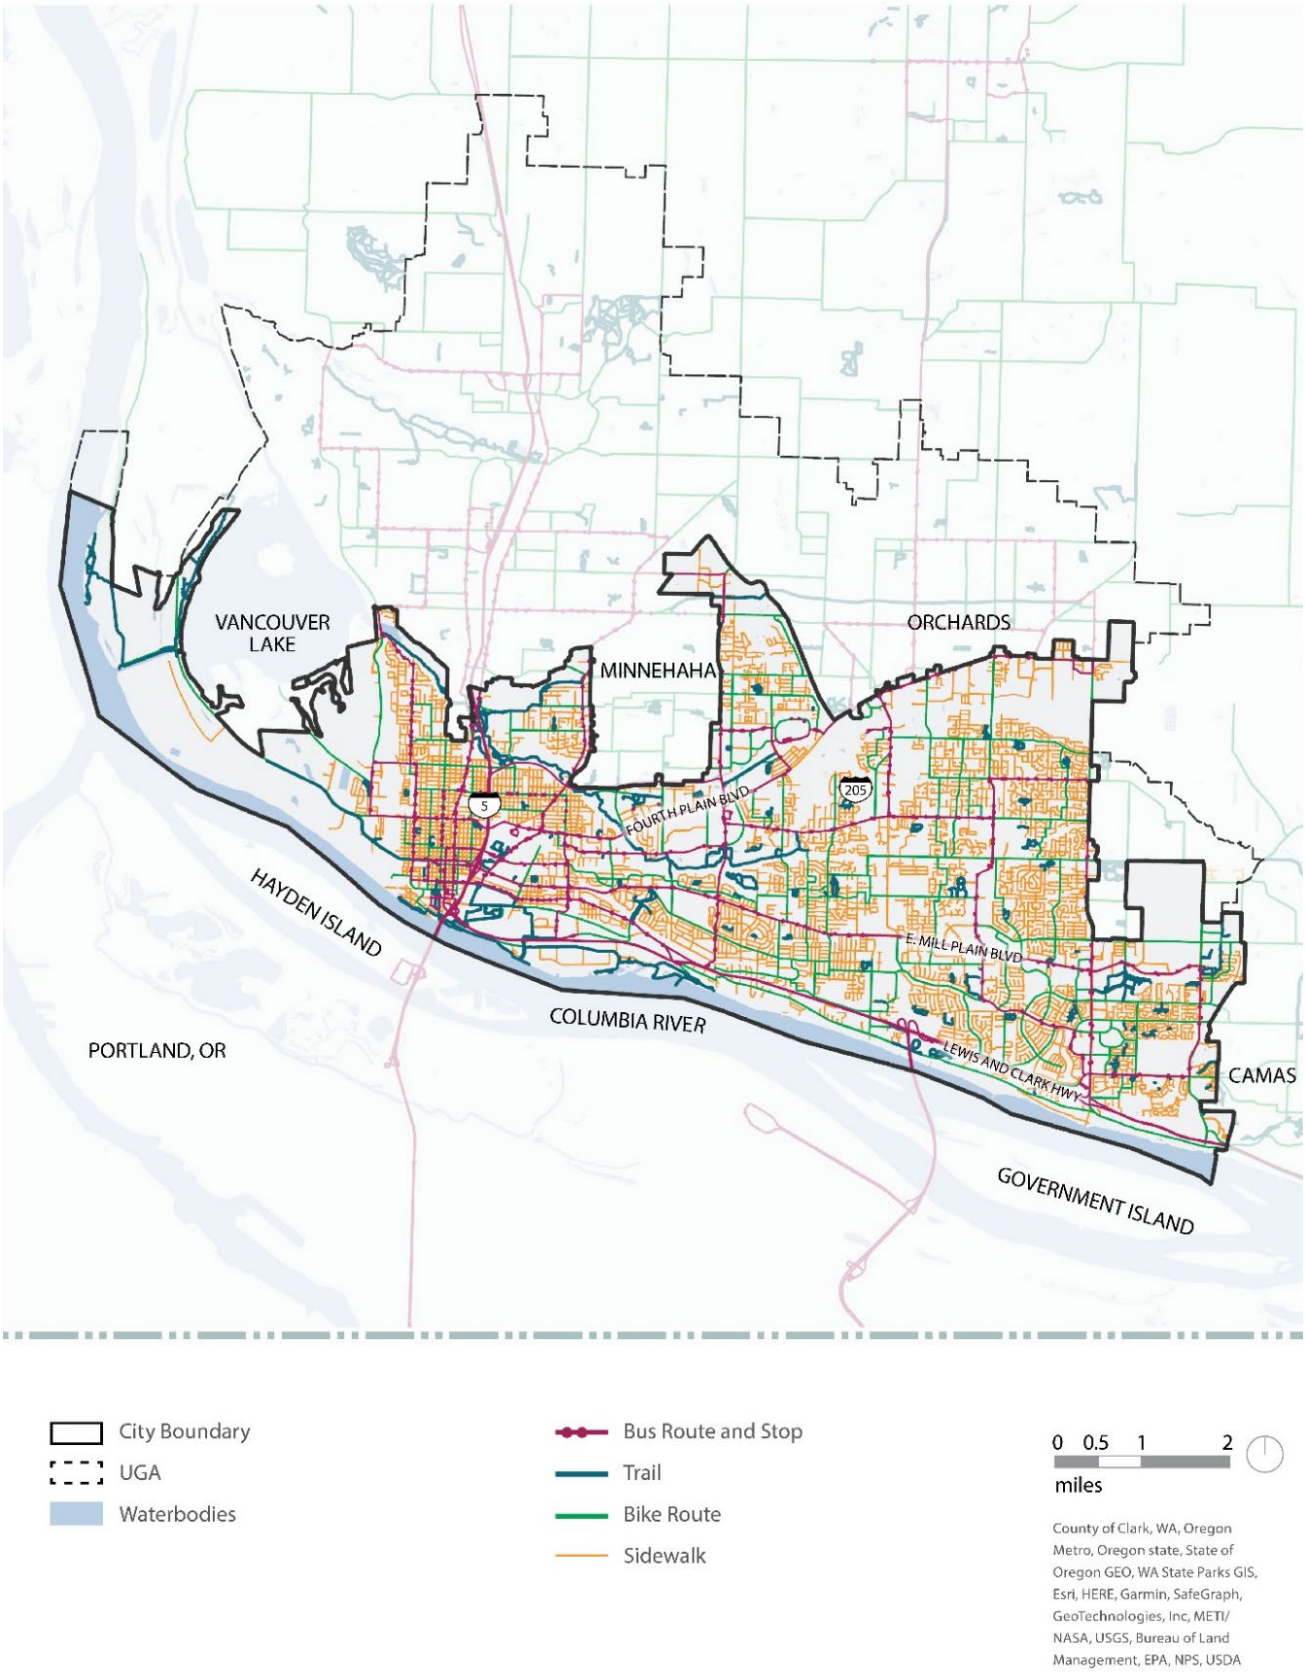
Parking

Nearly half of ~~e~~City -managed off-street parking spaces are unoccupied on a typical weekday (City of Vancouver 2024a). Over one-third of on-street parking spaces are unoccupied on the average weekday (City of Vancouver 2024a). Updates to accommodate growth present an opportunity to right-size parking, balancing vehicle accessibility with the need to preserve valuable land for housing, recreation, and other uses.

Transit

C-TRAN operates bus routes of varying frequency that connect residents to destinations within the City and to Portland and neighboring municipalities. ~~Figure 23~~ ~~Figure 23~~ Figure 25 shows current bus routes and stop locations in the city.

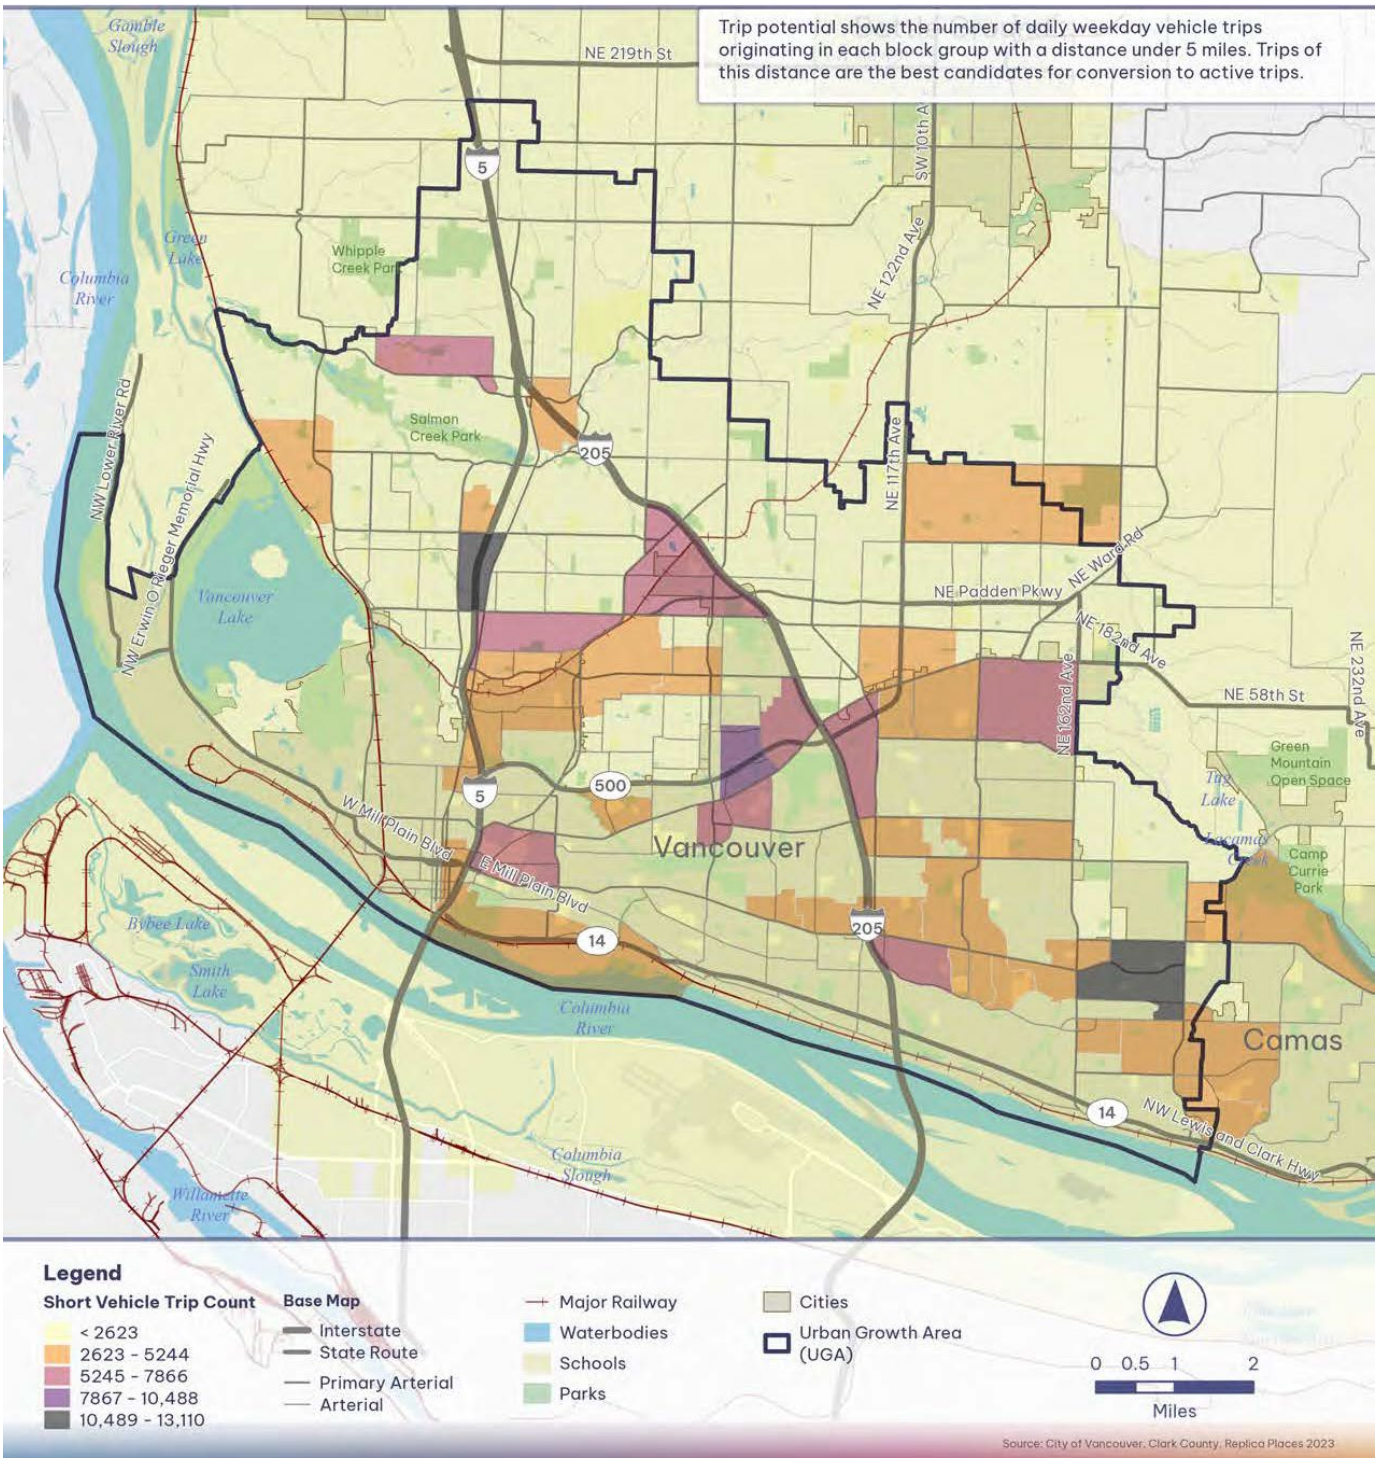
Vancouver is home to the region's first bus rapid transit (BRT) system. The Vine BRT provides frequent daily service, every 15 minutes or better, along the Fourth Plain and Mill Plain corridors. Since opening in 2017, the Vine BRT has decreased travel times for riders by 12%, with up to 10 minutes saved per trip. Bus ridership has increased by 45% while per-passenger cost decreased by 21% (City of Vancouver 2024a). Approximately 25% of Vancouver residents live within a quarter mile of the Vine BRT lines (City of Vancouver 2024a).



The C-TRAN ~~2021–2016~~2025-2030 Transit Development Plan calls for ~~a 10% increase in~~ increased service hours and frequency for various types of transit service and identifies capital needs to prepare for long-term growth (C-TRAN 2025).

Active Transportation

The City currently has 628 sidewalks, 10,630 curb ramps, and 129 miles of mobility lanes, including 29 miles of multi-use trails (City of Vancouver 2024a). Nine miles of arterial streets are currently lacking sidewalks (City of Vancouver 2024a). The TSP identifies nearly 230 planned small mobility and pedestrian projects and their priority level to help address these gaps. ~~Figure 23~~ ~~Figure 23~~ Figure 25 shows current active transportation facilities in the city.



Looking to the future, there is strong potential for increasing active transportation trips in every part of the ~~c~~City and region (Alta 2024). Over one-third of vehicle trips in Vancouver ~~are~~ cover a distance of less than 4 miles and are therefore potential candidates for conversion to active trips (Alta 2024). To convert the most motor vehicle trips to active trips and achieve greenhouse gas emission reduction, implementing land use and transportation strategies in the areas surrounding Clark College, the Vancouver Mall, Walnut Grove, the Hazel Dell Towne Center, the Hewlett-Packard campus/Columbia Tech Center, the Salmon Creek Park and Ride, and the eastern end of SE Mill Plain Boulevard would likely yield the most benefits (Alta 2024). ~~Figure 24~~ ~~Figure 24~~ Figure 26 shows the concentration of short vehicle trips by location, with areas with more of these trips indicating a higher potential for future conversion to active trips throughout the city.

~~Figure 23~~ Figure 25. Existing Citywide Transit and Active Transportation Facilities

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following transportation metrics:

- VMT
- Level of mode shift
- Mobility units
- Potential for increases in fatal/severe crashes

Impacts Common to All Alternatives

The following sections outline impacts that are expected to occur under all the alternatives. The regional transportation model outputs used for this analysis consider assumptions about future population and employment growth, expected changes in land use, and reasonably foreseeable future transportation projects. Therefore, the transportation effects analysis accounts not only for potential direct effects but also potential indirect and cumulative effects resulting from the Comprehensive Plan Update. Because of the comparative nature of the transportation analysis, impacts for all of the alternatives are discussed in this section to allow for an easier comparison across alternatives.

Vehicle Miles Traveled

All of the alternatives would increase VMT to some degree in 2045 as compared to existing conditions because of expected growth and development.

In comparison to the No Action Alternative, overall daily VMT for all vehicles would be about 10% higher under Alternative 1 and the Preferred Alternative, and about 12% higher under Alternative 2. There would be minimal to no difference in daily VMT for trucks between the ~~three~~ four alternatives.

Daily VMT per household would be similar to existing conditions for all of the alternatives. However, VMT per household is projected to be slightly lower under Alternatives 1 and 2 and the Preferred Alternative than the No Action Alternative, likely because they propose more areas with a mix of residential and commercial land uses, which could reduce the length and frequency of vehicle trips.

Table 12. Modeled Existing and Future Daily Vehicle Miles Traveled in Vancouver

Vehicle Type	Existing (2023)	No Action Alternative[a] (2045)	Alternative 1 (2045)	Alternative 2 (2045)	Preferred Alternative (2045)
All Vehicles Except Trucks	3,949,553	4,783,852	5,343,949	5,465,254	5,356,110
Trucks (in Passenger Car Equivalent)	215,391	544,077	541,923	541,302	549,024
Total	**4,315,718**	**5,327,928**	**5,885,872**	**6,006,556**	**5,905,133**
VMT Per Household (average miles per day)[b]	**45.6**	**44.9**	**42.5**	**41.9**	**42.6**

Source: RTC 2025, 2026

Notes:

a The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

b VMT per household under existing conditions (2023) based on assumption of 94,587 households. For 2045, VMT per household is based on assumptions of 118,607 households in the No Action Alternative, 138,517 households in Alternative 1, ~~and~~ 143,473 households in Alternative 2, and 138,686 households in the Preferred Alternative, calculated by adding estimated new housing unit capacity to 2023 estimated household data from Clark County.

Level of Mode Shift

Mode shift refers to whether people change the way they choose to travel (e.g., from driving alone to walking or bicycling). There would be minimal to no difference in mode split among the alternatives in 2045 compared to existing conditions, indicating no mode shift resulting from the action alternatives, as shown in Table 13. The RTC model used to analyze mode shift does not completely account for shifts to active modes and only captures mode shift to transit. Additional mode shift to active transportation would be expected from short vehicle trips if active transportation infrastructure improves, allowing more people to have access to and feel comfortable walking or biking instead of driving for trips under three miles (Alta 2026).

Vehicular travel would remain the dominant transportation mode citywide, representing nearly 90% of trips, while transit and bike would have the lowest share of trips. Transit trips are projected to increase slightly, and single-occupancy vehicle trips are projected to decrease slightly, as a share of all transportation modes between existing and future conditions.

Table 13. Modeled Existing and Future Mode Split in Vancouver

Transportation Mode	Existing (2023)	No Action Alternative[a] (2045)	Alternative 1 (2045)	Alternative 2 (2045)	Preferred Alternative (2045)
Single-occupancy vehicles	49.0%	47.8%	47.9%	47.8%	47.7%
High-occupancy vehicles	39.7%	40.0%	39.8%	39.9%	39.9%
Transit	1.7%	2.7%	2.4%	2.4%	2.5%
Walk	7.4%	7.3%	7.6%	7.7%	7.6%
Bike	2.2%	2.2%	2.2%	2.2%	2.2%

Source: RTC 2025, 2026

Note:
a The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

The average trip length across all transportation analysis zones within the City was projected to be about 4 miles under all of the alternatives (RTC 2025, 2026). This trip length of less than 5 miles indicates a similar potential for conversion of vehicle trips to active transportation trips under all alternatives.

Mobility Units by Transportation Analysis Districts

A mobility unit is a standardized measure used to quantify the transportation demand generated by a development or project. It is a broader way of looking at transportation demand than traditional vehicle trips because it represents the number of trips or movements (as measured in person miles) made by individuals using various modes of transportation, including walking, cycling, driving, and public transit. The concept of a mobility unit enables a more complete comparison and assessment of multimodal transportation impacts across different developments as well as the full range of multimodal system solutions (City of Vancouver 2024a).

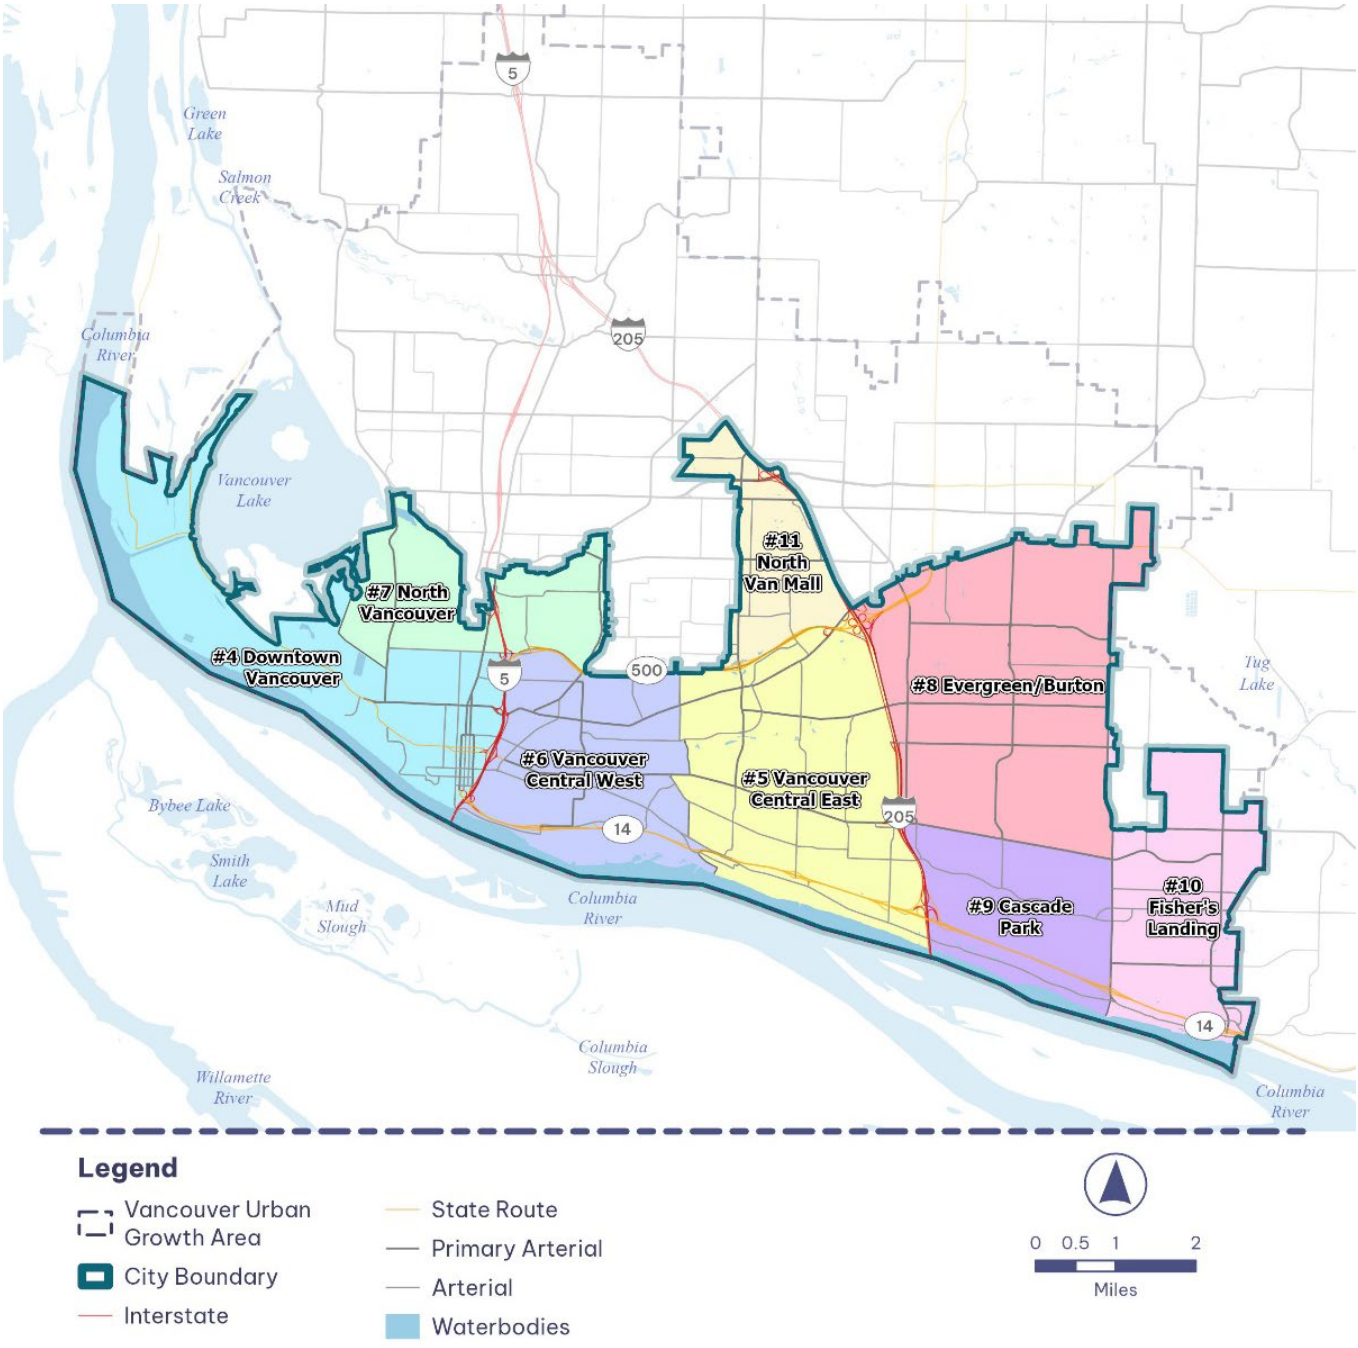
Estimated mobility units were calculated for 2045 based on the new person trips originating in each district and the average trip length. Table 14 shows the relative differences in mobility units (as measured in person miles) between Alternative 1, Alternative 2, the Preferred Alternative and the No Action Alternative. ~~Figure 25~~ ~~Figure 25~~ Figure 27 shows the locations of the districts analyzed in the regional model.

The higher mobility units in most areas of the ~~e~~City under ~~both~~ the action alternatives, compared to the No Action Alternative, reflect the greater number of person trips by all modes within these districts. This is because of proposed land use changes that would generate greater concentrations of housing units and jobs, particularly in areas of East Vancouver like Evergreen/Burton and Fisher's Landing. Under Alternative 1, some areas, such as the Vancouver Central East and Vancouver Central West districts of West Vancouver, would experience no meaningful difference in mobility units compared to the No Action Alternative based on the projected lower new capacity for jobs and housing units in those areas.

Alternative 2 would generate higher mobility units in all districts than Alternative 1. The largest differences would be in Central Vancouver (North Van Mall district) and East Vancouver (in the districts of Evergreen/Burton, Cascade Park, Fisher's Landing), where denser or more intense land uses are proposed under Alternative 2 compared to Alternative 1 and the No Action Alternative (refer to the Land and Shoreline Use section of Chapter 3 for more details).

The Preferred Alternative would have a different distribution of mobility units across City districts than Alternatives 1 and 2. Similar to Alternative 1, the Preferred Alternative would result in no meaningful difference in mobility units for the Vancouver Central West district of West Vancouver compared to the No Action Alternative. It would generate higher mobility units in Downtown Vancouver, North Vancouver, and North Vancouver Mall than Alternative 1 and Alternative 2 because there would be a relatively greater capacity for new housing units in those areas. In contrast to Alternatives 1 and 2, Evergreen/Burton and Fisher's Landing would generate fewer mobility units because there would be less capacity for new housing units in those areas. Mobility units in Vancouver Central East and Cascades Park would be lower than Alternative 2 but higher than Alternative 1 because of the difference in new housing capacity.

Table 14. Mobility Units Originating from Transportation Analysis Districts as Compared to No Action Alternative in 2045



Map Reference	District	Alternative 1 (person miles per day)	Alternative 2 (person miles per day)	Preferred Alternative (person miles per day)
4	Downtown Vancouver	11,963	16,654	68,146
5	Vancouver Central East	0[a]	31,188	17,836
6	Vancouver Central West	0[a]	5,348	0[a]
7	North Vancouver	30,897	39,287	51,773
8	Evergreen/Burton	201,130	224,963	108,300
9	Cascade Park	35,022	61,481	58,262
10	Fisher's Landing	444,765	495,245	361,182
11	North Van Mall	33,959	53,712	108,687

Source: RTC 2025, 2026

Note:

a. 0 value represents that new person trips generated were lower in comparison to the No Action Alternative. The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

~~Figure 25~~ Figure 27. Locations of Transportation Analysis Districts

Source: RTC 2025

Potential for Increases in Fatal/Severe Crashes

Safety impacts were assessed based on projected future traffic volume differences between the No Action and Action Alternatives. The city's top 10 roadway segments as ranked by crash weight (based on the cost by injury level) from 2016 to 2020 were analyzed to determine how volume changes could affect safety at safety corridors identified in the City of Vancouver's Local Road Safety Plan, 2022–2026.

~~Both~~ Alternative 1, ~~and~~ Alternative 2, and the Preferred Alternative would have higher daily traffic volumes compared to the No Action Alternative across most safety corridors in 2045, as shown as percentage differences in Table 15. Compared to the No Action Alternative, there would be notably higher differences in traffic volumes on the SE Chkalov Drive, E Mill Plain Boulevard, Grand Boulevard and NE St. James Road segments under Alternative 2 than Alternative 1 because of more intense levels of development proposed near those roadways under Alternative 2. Alternative 2 would have marginally higher traffic volumes than Alternative 1 at most other locations. Under ~~both alternatives~~ Alternatives 1 and 2, the largest difference in traffic volumes compared to the No Action Alternative would be on the SE 164th Avenue segment in East Vancouver, which is near the Section 30 area that is proposed for redevelopment. However, traffic volumes at this location would be comparatively lower under the Preferred Alternative because there would be less capacity for new development in this area.

At most locations, the Preferred Alternative would have similar or lower traffic volumes than Alternatives 1 and 2, which reflects that new housing capacity would be spread more evenly throughout all areas of the city. One exception is NE St. James Road in Central Vancouver, which is forecast to have greater increases in traffic volumes than Alternatives 1 and 2.

An increase in volume does not necessarily indicate an increase in fatal or severe crashes. However, increases in traffic volumes can increase the number of crashes due to greater volumes of vehicles on the road and increased exposure to vehicles by all roadway users.

Table 15. Modeled Daily Volume Differences between No Action Alternative and Action Alternatives for Safety Corridors in 2045

Safety Corridor	Alternative 1	Alternative 2	Preferred Alternative
SE Chkalov Drive: SE Mill Plain Boulevard – SE 7th Street	9%	20%	13%
E Fourth Plain Boulevard: Falk Road – Stapleton Road	0%	3%	0%
NE Fourth Plain Boulevard: NE 121st Avenue– 127th Avenue	14%	14%	11%
SE 164th Avenue: SE 1st Street to SE Mill Plain Boulevard	45%	46%	17%
SE Mill Plain Boulevard: Chkalov Drive – 123rd Avenue	2%	3%	2%
E Mill Plain Boulevard: Grand Boulevard – Brandt	7%	14%	10%
NE 112th Avenue: 39th Street– 28th Street	6%	8%	2%
Grand Boulevard: Fourth Plain Boulevard – 33rd Street	1%	15%	16%
E Mill Plain Boulevard: Andresen Road – Garrison Road	4%	8%	7%
NE St. James Road: NE 49th Street - Petticoat	-9%	5%	19%

Source: RTC 2025, 2026

Note: The No Action is based on capacity only and does not account for the feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

Avoidance, Minimization, and Mitigation Measures

Under all alternatives, future growth and associated increased demand for transportation facilities will be addressed as part of the City's regular capital project planning efforts and

updates to its six-year Transportation Improvement Program (TIP) (Table 16). The ~~current~~ latest adopted TIP identifies several large capital improvement projects, identified for completion during the six-year period between 2026~~5~~ and 2031~~0~~ (City of Vancouver 2025a).

Table 16. Planned Large Capital Transportation Improvement Projects, 2026-2031

Project	Focus
NE 137th Ave. from NE 49th to NE Fourth Plain Blvd.	Corridor upgrades to enhance safety, manage access and minimize delays now caused by turning vehicles.
NE 18th St. from NE 97th Ave. to NE 107th Ave.	New urban arterial and upgrade of existing segments to current arterial standards, including multimodal facilities.
Jefferson St. from W Evergreen Blvd. to W Mill Plain Blvd.	Urban arterial upgrade of existing roadway to two vehicle lanes with separated multi-use path.
NE 192nd Ave. from SE 1st St. to NE 18th St.	Urban upgrade of existing two-lane street to improve system, safety, mobility, and accessibility.
Fruit Valley Freight Access and Safety Improvements	New north–south freight corridor, including multimodal facilities.
NE 112th Ave. from E Mill Plain Blvd to NE 28th St.	Corridor improvements to bring NE 112th Ave. up to urban arterial standards, and address safety and accessibility issues for all modes.
NE 28th St. from 142nd Ave. to NE 162nd Ave.	Upgrade of existing two-lane former rural road to urban 3-lane minor arterial with multimodal facilities to address capacity and improve pavement and safety conditions.
NE 49th St. from NE 122nd Ave. to NE 137th Ave.	Upgrade of existing two-lane street to three-lane urban minor arterial with multimodal facilities to improve safety and capacity.
NE 18th St. from NE 164th Ave. to NE 192nd Ave.	Upgrade of two-lane principal arterial to increase safety and improve service levels.

Project	Focus
NE 18th St. from NE 142nd Ave. to NE 162nd Ave.	Upgrade of two-lane road to principal arterial standards.
NE 59th St. from NE 147th Ave. to NE 162nd Ave.	New three-lane minor arterial street with multimodal facilities to address circulation needs, improve safety, mobility, accessibility, and stormwater management.

Source: City of Vancouver 2025a

Specific measures to avoid, minimize, and mitigate impacts could potentially include developing infrastructure for active transportation such as walking and cycling, implementing intelligent transportation systems (ITS) for more efficient traffic management, and enhancing public transportation. These strategies aim to address increased travel demand and improve overall transportation capacity and efficiency.

In addition, implementation of the following policy measures ~~currently under consideration~~ for the Comprehensive Plan Update would also help to avoid, minimize, and mitigate potential transportation impacts identified for the action alternatives:

Provide a reliable, frequent, and accessible transportation system that seamlessly connects residents to key areas of the ~~e~~City and region.

- Provide community members with access to low-carbon travel options, including walking, cycling, small mobility, and transit, to connect important destinations while reducing reliance on single-occupancy vehicles. Improve active transportation infrastructure particularly in areas with inadequate pedestrian and micromobility infrastructure, to increase the share of trips made by foot, bike, or other small mobility devices.
- Adopt street standards that create comfortable, inviting multimodal streets. Adopt connectivity standards to improve pedestrian and small mobility safety and accessibility.
- Apply standards to development, capital, maintenance, and planning projects including maximum block length, unconnected streets, cul-de-sac connections, linkages between land uses, and multiple access points.
- Implement the citywide low-stress bicycle and small mobility network that prioritizes safety and comfort for people of all ages and abilities.
- Designate and enhance freight corridors to facilitate efficient movement of goods and reduce congestion. Improve infrastructure and connectivity to and from the Port of Vancouver to streamline freight operations.
- Eliminate traffic-related fatalities and serious injuries and create a safe and comfortable travel environment for all users.

- Implement strategic pricing mechanisms to regulate the availability of on-street parking in Mixed-Use and Regional Activity Centers.
- Implement land use patterns that reduce VMT, traffic congestion, and greenhouse gas emissions per capita, ~~and~~ while improving~~e~~ safety and air quality.
- Tailor regulations, incentives, and investments to facilitate development and community resources near current and future transit stations, ensuring new development is accessible to historically excluded and underserved communities and those most reliant on public transit.
- Prepare for emerging technologies by updating City policies and operational requirements for shared mobility and emerging mobility vendors, including Autonomous Vehicles. Create data sharing agreements and vendor requirements.
- Develop guidance and encouragement for community use of the right-of-way, including plazas, parklets, "streateries," open streets events, public art, and demonstration projects.
- Ensure transportation systems meet universal design standards, prioritizing mobility solutions for disabled, senior, youth, and low-income residents across all modes.
- Work with nonprofit and private partners, Clark County and adjacent cities to build out the regional trail network for recreation and active transportation purposes.
- Coordinate closely with Clark County, other cities, and other government entities such as C-TRAN, the RTC, and school districts to sustainably manage urban growth areas, efficiently deliver urban services, expand regional transit and multimodal connectivity, and coordinate on shared goals and responsibilities, in accordance with adopted countywide planning policies.
- Update regulations and design guidance to reflect multimodal level of service (LOS) standards that require private development and capital projects to advance multimodal safety and support shifts to non-drive-alone modes.
- Create safe walking connections through programs that identify and invest in Safe Routes to Schools and Community Safe Routes that link people to transit and other important community destinations.
- Invest in infrastructure that supports reliable, frequent, and accessible transit service as outlined in the Enhanced Transit Network, while adapting to localized climate impacts. Prioritize improvements in underserved communities and areas with high climate vulnerability. These investments should expand mobility options, improve neighborhood access, and deliver health, economic, and social benefits.
- Work with local, state, federal and tribal partners to ensure that new construction or replacement of critical infrastructure is programmed to avoid community harm and maximize social, environmental, and cultural value.

Significant Unavoidable Adverse Impacts

All alternatives have the potential to create impacts to existing transportation infrastructure as a result of expected population and job growth and development, with greater potential impacts under Alternatives 1 and 2 and the Preferred Alternative than the No Action Alternative. The anticipated changes would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant unavoidable adverse impacts to transportation are anticipated for any of the alternatives.

Noise

Methodology

Analysts reviewed relevant information sources and policies to qualitatively describe existing citywide noise conditions, including the following sources:

- WAC 173-60, Maximum Environmental Noise Levels: Establishes maximum permissible noise levels for three classes of environmental designations for noise abatement (EDNA): residential (generally known as Class A in the WAC), commercial (Class B), and industrial (Class C) noise, as shown in Table 17, along with construction noise limits.
- VMC 20.935, Off-Site Impacts (VMC 20.450.007 in proposed code): Includes mitigation requirements where potential impacts to adjacent uses from a proposed land use or development are identified. Outdoor construction, including construction staging, is limited to 7:00 a.m. to 8:00 p.m. seven days a week.
- VMC 20.520, Noise Impact Overlay District: Recognizes that certain areas of the ~~e~~City experience greater levels of transportation noise through establishment of a Noise Impact Overlay District. This district covers the part of the ~~e~~City determined to be most affected by noise from Portland International Airport, Burlington Northern Railroad, I-5, and Pearson Airport. The code regulates and places limits on new construction, expansion, and reconstruction of residential structures within this district.
- U.S. Department of Transportation National Transportation Noise Map (USDOT 2020).

Analysts then reviewed the alternatives to determine potential adverse impacts and associated mitigation measures using the following metrics:

- Potential for construction noise impacts in residential/noise-sensitive areas
- Potential for increased transportation noise impacts in residential/noise-sensitive areas
- Capacity for new housing in areas with high transportation noise

Analysts estimated potential changes in noise levels from transportation sources based on outputs from the RTC regional transportation demand model, as described in the Transportation section.

Table 17. Maximum Washington State Permissible Noise Levels

EDNA of Noise Source	EDNA of Receiving Property (dBA) Class A[a]	EDNA of Receiving Property (dBA) Class B	EDNA of Receiving Property (dBA) Class C
Class A	55 / 45	57	60
Class B	57 / 47	60	65
Class C	60 / 50	65	70

Source: WAC 173-60-040

Note:
a Limits for noise received in Class A EDNA are reduced by 10 dBA during nighttime hours (10 p.m. to 7 a.m.).
Key: EDNA = environmental designations for noise abatement

Affected Environment

As with most urbanized environments, the most common sources of environmental noise in Vancouver come from transportation and heavy industrial uses.

The primary noise sources in the area include vehicles traveling on I-5, I-205, SR 14, SR 900, and arterial roads. While not as consistent as noise from various roadways located in the comprehensive plan area, aircraft noise from Portland International Airport and Vancouver Pearson Field, and railway noise along the BNSF Railway paralleling I-5 and SR 14 and the Portland Vancouver Junction Railroad contribute to overall noise levels.

Noise from industrial facilities located along the Vancouver Waterfront and near the railways and from a variety of ongoing construction projects in and around downtown Vancouver influence noise levels in these localized areas.

The National Transportation Noise Map identifies areas with existing exposure to aviation, highway, and rail noise (USDOT 2020). Table 18 summarizes current ranges of transportation noise levels throughout Vancouver. ~~Figure 26~~ Figure 26 Figure 28 shows a map of the distribution of existing transportation noise levels throughout the Vancouver area, which indicates higher noise levels near highways and major arterials.

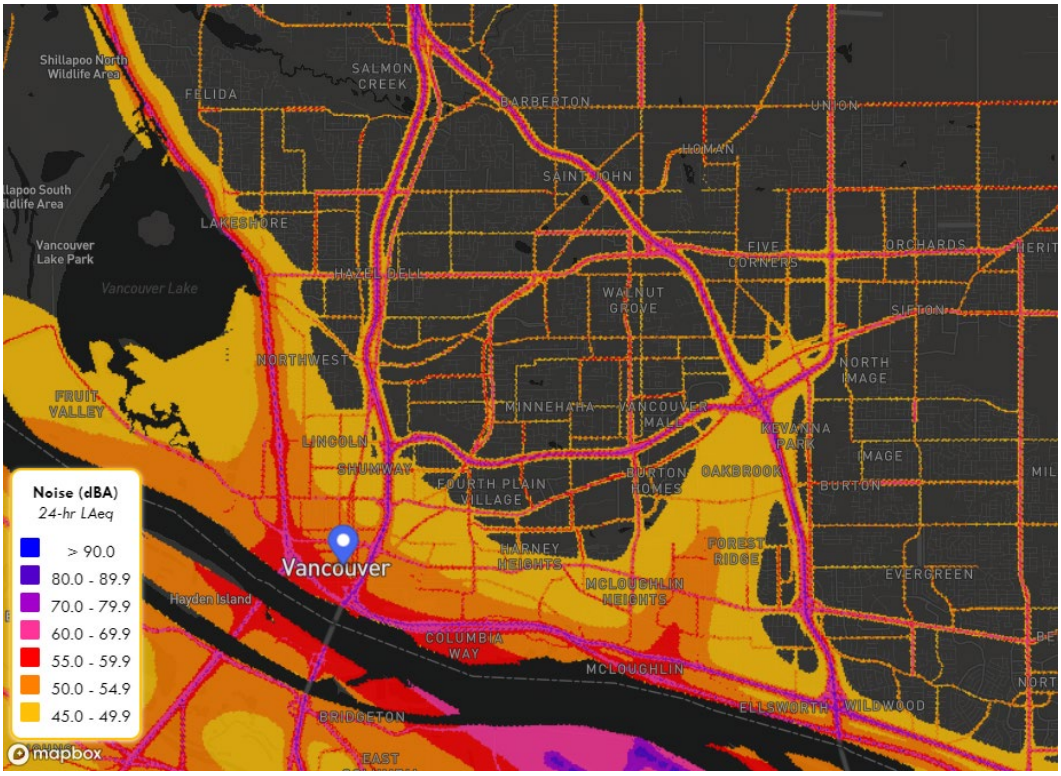


Table 18. Existing Transportation Noise Levels in Vancouver

Mode	Existing Noise Level (dBA)	Location
Aviation	45.0 to 59.9	Increases with proximity and extends farthest directly north of the Portland airport.
Road	50.0-89.9 40.0-59.9	Along I-5, I-205, SR 14, and SR 500 Arterial roads
Rail	45.0 to 89.9	Along the BNSF Railway (paralleling I-5 and SR 14) and the Portland Vancouver Junction Railroad

Source: USDOT 2020

Key: dBA = A-weighted decibels; I = Interstate; SR = State Route

~~Figure 26~~ Figure 28. Distribution of Existing Transportation Noise Levels in Vancouver Area

Source: USDOT 2020

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following noise metrics:

- Potential for construction noise impacts in residential/noise-sensitive areas
- Potential for increased transportation noise impacts in residential/noise-sensitive areas
- Capacity for new housing in areas with high transportation noise

The regional transportation model outputs that informed this noise analysis consider assumptions about future population and employment growth, expected changes in land use, and reasonably foreseeable future transportation projects. Therefore, the noise effects analysis accounts not only for potential direct effects but also potential indirect and cumulative effects resulting from the Comprehensive Plan Update.

Impacts Common to All Alternatives

All alternatives would include new development of residential (referred to in the WAC as Class A source and receiving properties), commercial (Class B source and receiving properties), and industrial (Class C source and receiving properties) lands. As shown in Table 17, a Class B noise source affecting Class A receiving properties is restricted to a sound level of 57 A-weighted decibels (dBA) during daytime hours (7 a.m. to 10 p.m.) and 47 dBA during nighttime hours (10 p.m. to 7 a.m.). A Class C noise source affecting Class A receiving properties is restricted to a sound level of 60 dBA during daytime hours and 50 dBA during nighttime hours.

The following sections outline impacts that are expected to occur under all the alternatives. Impacts specific to each alternative are discussed in the next subsections.

Potential for substantial construction noise impacts in residential/noise-sensitive areas

All alternatives would include construction activities associated with future growth and development, which would increase short-term noise levels at noise-sensitive areas, such as residences, schools, and nursing homes. Because of the requirements of H.B. 1110, all of the alternatives would allow for new housing development on ~~e~~City lands currently designated as Urban Lower Density, which could potentially result in construction activities immediately adjacent to existing noise-sensitive residential properties.

The level of these temporary impacts would depend on the proximity to construction activities, and other local context such as topography, the extent of existing ambient noise from roadways and other nearby sources. Construction of taller buildings and/or structures with underground parking would have the greatest potential for temporary noise impacts

because these building types would likely require use of louder construction equipment, such as pile drivers, for foundation work.

Potential for increased transportation noise impacts in residential/noise-sensitive areas

After construction of individual developments, additional operational noise is anticipated under all alternatives because of projected increases in volumes of vehicles traveling on existing and future roadways, increases in rail and aircraft activity associated with future growth and development, and potential increases in industrial noise due to increased demand to carry passengers and goods in and out of the area.

New roadways, buildings, and typical activities associated with an increased population in an area all contribute to higher noise levels and a greater likelihood of disturbance caused by noise. The changes in noise levels between existing and future conditions would not be noticeable in most areas included in the City's proposed changes to the Comprehensive Plan because similar levels of transportation noise and noise associated with nearby development are part of the existing noise environment.

Minor increases in noise levels would be most noticeable at residences and other land uses sensitive to noise, such as schools, nursing homes, churches, parks, and other outdoor use areas located near planned development corridors where construction and increased use of transportation facilities would be most pronounced. Noise level increases under all alternatives compared to existing noise levels would not likely be noticeable year by year but would be noticeable over decades of more expansive local and regional development.

Based on traffic data developed for each alternative from the regional transportation model, as described in the Transportation section, future (2045) vehicle traffic volumes would not vary between the No Action and Action Alternatives to the degree that would result in a noticeable change in future traffic noise levels.

Any minor increase in long-term operational noise levels with the future alternatives compared to existing noise levels would fall below the threshold of human perception, which is 2 to 3 dBA for most individuals. Increases in noise would result from minor increases in transportation vehicle volumes and temporary increases in construction noise from future growth and planned development. A doubling of traffic volume is generally needed to result in a noticeable change (approximately 3 dBA) in traffic noise levels per Federal Highway Administration noise regulations (23 Code of Federal Regulations 772).

Capacity for new housing in areas with high transportation noise

All alternatives would provide limited capacity for building new housing units in areas with existing transportation noise above 55 dBA, based on mapping from the U.S. Department of Transportation (refer to ~~Figure 26~~ Figure 28). The U.S. Department of Housing and Urban Development has established 55 dBA as the maximum average day-night level for exterior noise at residences (HUD 1977). Details of varying levels of housing in areas with high transportation noise are described in each alternative below.

~~Based on the modeled locations of new housing units, as described in the Housing section, about 6% of the new housing unit capacity under each alternative would be located in higher transportation noise areas in East, Central, and West Vancouver, primarily near existing transportation corridors such as I-5, I-205, SR 14, and Mill Plain Boulevard. This percentage translates to about 1,600 to 3,100 housing units depending on the alternative (lowest capacity under No Action, highest capacity under Alternative 2).~~

No Action Alternative

Potential for substantial construction noise impacts in residential/noise-sensitive areas

No additional construction noise impacts were identified for the No Action Alternative beyond those discussed in the Impacts Common to All Alternatives section. The No Action Alternative would have the lowest potential for substantial construction noise impacts of all the alternatives because it would have the lowest capacity for new housing units, jobs, and associated new development.

Potential for increased transportation noise impacts in residential/noise-sensitive areas

No additional effects were identified for the No Action Alternative beyond those discussed in the Impacts to All Alternatives section. Noise levels under the No Action Alternative would increase at a similar rate as they have in recent years with future growth and development planned in line with the current adopted City Comprehensive Plan and development regulations.

Capacity for new housing in areas with high transportation noise

Based on the modeled locations of new housing units, as described in the Housing section, about 6% of the new housing unit capacity under the No Action Alternative would be located in higher transportation noise areas in East, Central, and West Vancouver, primarily near existing transportation corridors such as I-5, I-205, SR 14, and Mill Plain Boulevard. This percentage translates to about 1,600 housing units. ~~No additional effects were identified for the No Action Alternative beyond those discussed in the Impacts to All Alternatives section.~~

Alternative 1

Potential for substantial construction noise impacts in residential/noise-sensitive areas

Construction noise associated with Alternative 1 would potentially be more frequent and extend for longer periods than construction resulting from the No ~~Build~~ Action Alternative because of the higher capacity for new development anticipated under Alternative 1. However, localized construction noise levels are anticipated to be similar to No ~~Build~~ Action Alternative construction noise levels because the activities and equipment required would be similar and would occur in accordance with City noise ordinances.

Potential for increased transportation noise impacts in residential/noise-sensitive areas

The proposed increase in density under Alternative 1 would result in moderately higher noise levels along growth corridors identified in the study area compared to the No Action Alternative because of a marginally higher number of vehicles traveling on existing and future roadways. There would also be moderately higher noise levels from other transportation sources including rail, aircraft, and industrial noise, because of higher expected demand to transport passengers and goods and services in and out of the area compared to the No Action Alternative.

Capacity for new housing in areas with high transportation noise

Similar to the No Action Alternative, about 6% of the new housing unit capacity under Alternative 1 would be located in higher transportation noise areas in East, Central, and West Vancouver. This percentage translates to about 2,800 housing units. ~~No additional effects were identified for Alternative 1 beyond those discussed in the Impacts to All Alternatives section.~~

Alternative 2

Potential for substantial construction noise impacts in residential/noise-sensitive areas

Construction noise associated with Alternative 2 would be more frequent and extend for longer periods than construction resulting from the No ~~Build~~ Action Alternative because of the higher capacity for new development. Alternative 2 would allocate the most land area for zoning districts such as Regional Activity Center and Mixed Use that allow for taller buildings, which could result in higher construction noise levels because of the heavy equipment (e.g., pile drivers) needed.

Potential for increased transportation noise impacts in residential/noise-sensitive areas

The higher-intensity development under Alternative 2 would result in slightly higher noise levels along growth corridors identified in the study area compared to Alternative 1 and the

Preferred Alternative because of a marginal projected increase in the number of vehicles traveling on existing and future roadways. There may be slightly higher noise levels from other transportation sources including rail, aircraft, and industrial noise because of potentially greater demand to transport passengers and goods and services in and out of the area compared to the other alternatives.

Capacity for new housing in areas with high transportation noise

Similar to the No Action Alternative and Alternative 1, about 6% of the new housing unit capacity under Alternative 2 would be located in higher transportation noise areas in East, Central, and West Vancouver. This percentage translates to about 3,100 housing units. ~~No additional effects were identified for Alternative 2 beyond those discussed in the Impacts to All Alternatives section.~~

Preferred Alternative

Potential for substantial construction noise impacts in residential/noise-sensitive areas

Short term construction noise associated with the Preferred Alternative would potentially be more frequent and extend for longer periods than construction resulting from the No Action Alternative because of the higher capacity for new development anticipated under the Preferred Alternative. However, localized construction noise levels are anticipated to be similar to the No Action Alternative construction noise levels because the activities and equipment required would be similar and would occur in accordance with City noise ordinances.

Construction noise related to new housing development would be more similar to Alternative 2 because the Preferred Alternative would have a similar split of land zoned for Low-Scale and Medium-Scale neighborhoods. Construction noise related to Mixed Use and Regional Activity Center developments would be more similar to Alternative 1, which has less land allocated for these higher-intensity uses and taller buildings than Alternative 2 and therefore would have fewer areas with these louder anticipated construction noise levels.

Potential for increased transportation noise impacts in residential/noise-sensitive areas

The higher-intensity development under the Preferred Alternative would result in slightly higher noise levels along growth corridors identified in the study area compared to Alternative 1 and slightly lower noise levels in the same areas compared to Alternative 2. The slight difference in noise levels is because of a marginally higher numbers of vehicles traveling on existing and future roadways compared to Alternative 1 and marginally lower numbers of vehicles compared to Alternative 2. There may be slightly higher noise levels from other transportation sources including rail, aircraft, and industrial noise because of potentially

greater demand to transport passengers and goods and services in and out of the area compared to the other alternatives.

Capacity for new housing in areas with high transportation noise

The Preferred Alternative would have the highest potential for new housing unit capacity located in higher transportation noise areas, with about 11% in East, Central, and West Vancouver. This percentage translates to about 5,200 housing units. The capacity for housing units in these areas would be higher than Alternatives 1 and 2 because the Preferred Alternative analysis was updated to account more accurately for master plans across the city, which are predominantly located in areas with high transportation noise corridors. These master plans, covering areas such as Waterfront, The Heights, the area located at the intersection of 192nd Ave. and State Route 14 known as HQ, Columbia Palisades, Section 30, and Vancouver Innovation Center, were approved for development prior to the Comprehensive Plan update process.

Avoidance, Minimization, and Mitigation Measures

Temporary construction noise will be managed through best management practices, which include requiring contractors to follow all state and local restrictions on construction timing and maximum noise levels. Additional measures can be used to reduce temporary construction impacts at noise-sensitive locations. These measures could include requiring contractors to locate their loudest equipment farther from noise-sensitive locations and provide shielding around the loudest equipment.

No substantial increases in noise are expected to occur under the alternatives; therefore, no mitigation measures are proposed. All environmental noise would continue to be regulated by WAC 173-60 and VMC 20.935.

In areas where development is planned near existing or future sources of higher noise levels, the City may consider whether to require implementation of noise reduction methods such as locating noise-sensitive areas further from noise sources, including walls or other barriers to shield noise from noise-sensitive use locations; and designing interior spaces with noise-reducing building materials.

In addition, implementation of the following policy measures ~~currently under consideration~~ for the Comprehensive Plan Update would also help to avoid, minimize, and mitigate potential noise impacts identified for the action alternatives:

- Reduce and mitigate noise pollution from major stationary and mobile sources (air travel, vehicles, freight, ~~and~~ railroads, high-intensity industrial uses), prioritizing vulnerable populations and reducing the impact in residential, commercial, and natural areas.

- Mitigate the impacts of air, water, heat, noise, and light pollution, with a focus on areas with high environmental health disparities.

Significant Unavoidable Adverse Impacts

All alternatives would have the potential to increase short-term and long-term noise levels to some extent because of expected growth and development. The anticipated growth would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant unavoidable adverse impacts to noise are anticipated for any of the alternatives.

Public Services and Utilities

Methodology

Analysts reviewed relevant information and policies to describe existing citywide conditions for public services and utilities (fire, police, schools, parks and recreation, water, wastewater, sewer, electricity, other energy utilities, and solid waste), including the following sources:

- Community Atlas (Design Workshop 2024)
- City of Vancouver Comprehensive Water System Plan (City of Vancouver 2015)
- City of Vancouver Parks, Recreation, and Cultural Services Comprehensive Plan 2022-2031, updated for 2023-2032 (City of Vancouver 2022a)
- City of Vancouver 2025-2030 Capital Improvement Program for Water, Wastewater, Sewer Connection Incentive Program, Surface Water (City of Vancouver 2024c)
- Clark Public Utilities Integrated Resource Plan (CPU 2024)
- Evergreen School District Capital Facilities Plan (EPS 2019)
- Vancouver Fire Department 2024 Annual Report (VFD 2024)
- Vancouver Public Schools Capital Facilities Plan (VPS 2022)

Analysts then reviewed the alternatives to determine potential adverse impacts and associated mitigation measures using the following metrics:

- Increased demand for services or utilities that exceeds levels of service or capabilities beyond mitigatable levels
- Consistency with capital improvement plans (CIP)

Affected Environment

Fire

The Vancouver Fire Department (VFD) provides fire protection and emergency medical services (EMS) to the City and Clark County (Fire District 5), covering 89.2 square miles, including 22 miles of shoreline along the Columbia River. In addition to fire and EMS, they provide marine response, fire prevention, and fire investigation. Regionally, they provide hazardous materials and technical rescue responses (VFD 2024).

VFD has 11 stations, operated by 245 VFD and 190 American Medical Response (AMR) personnel, which serve the city limits and urban growth area. VFD uses a metric of firefighters per 1,000 people as one way of projecting future needs to maintain or improve levels of service to the community. The current ratio is 0.83 firefighters per ~~person~~ 1,000 people.

VFD is planning to relocate and construct new facilities for Station 3 in The Heights in Central Vancouver and Station 6 in Burton Ridge in East Vancouver over the next five years to address growing needs in these areas, and to complete seismic retrofits of Fire Stations 4 and 8 in the next 6 years. The City also plans to rebuild Fire Station 5 in the next 10 years. The City is also considering construction of new fire stations downtown and/or in the St. Johns area to accommodate future ~~e~~City growth and ensure adequate emergency response times and serviceability.

VFD provided 1,536 fire suppression responses, 40 technical rescues, 24 maritime responses, and 234 responses to hazmat situations in 2023 (VFD 2024). Since 2015, the City has contracted with AMR to provide ambulance services within the city. Both AMR and VFD use the same standard operating procedures. (City of Vancouver and AMR 2023). Table 19 and Table 20 provide the VFD and EMS response times by alarm type and what percent met established standards. These tables also indicate the number of calls received in 2023 by alarm type.

Table 19. Vancouver Fire Department Response Times

Alarm Type	Standard Response Time (minutes)	2023 Average Response Time (minutes)	2023 % met Standard	Number of Calls Received in 2023	% Change over 2022
Priority 1 and 2 Except Marine	7:59	8:38	86.2%	15,806	5.8%
Priority 3 and 4 Except Marine	10:59	9:10	95%	8,642	-23.3%
Priority 5 Non-Medical	15:59	11:05	97.58%	5,051	1%
Priority 5 Emergency Medical – Ambulance Only	17:59	19:41	88.3%	7,858	-16.7%
Marine – All Calls	19:59	34:02	45.8%	24	60%
Fire Suppression Full Alarm	15:59	15:40	91.7%	84	-12.5%
Aircraft Rescue and Firefighting	15:59	N/A	N/A	0	N/A

Table 20. EMS Response Times

Alarm Type	Standard Response Time (minutes)	2023 Actual Compliance %	Number of Calls Received in 2023
Priority 1 and 2 – High Density	9:59	87.24%	21,898
Priority 1 and 2 – Low Density	19:59	91.13%	1,984
Priority 3 and 4 – High Density	12:59	91.58%	16,414
Priority 3 and 4 – Low Density	19:59	89.73%	1,597
Priority 5 and 6 – High Density	17:59	91.44%	12,283
Priority 5 and 6 – Low Density	29:59	94.86%	836
Routine – EMSD2 Area Only – Inter-facility Scheduled (12-hour pre-scheduled)	15	59.76%	743
Routine – EMSD2 Area Only – Inter-facility Non-scheduled (less than 12-hour pre-scheduled)	60	74.46%	3,782

Source: VFD 2024

Police

The Vancouver Police Department (VPD) provides police services in the ~~c~~City and is authorized to employ 241 officers, with 226 sworn members as of February 2025 (VPD 2025). Similar to VFD, VPD uses a metric of officers per 1,000 people to help project future needs to maintain or enhance its services to the community. VPD currently has a ratio of 1.2 officers per 1,000 people but has identified a need to increase that number to 1.4 officers per 1,000 people to be more consistent with the national average of 1.6 officers per 1,000 people. A ballot initiative, Proposition 5, planned for fall 2025, ~~if~~ which was approved by voters, would help to fund hiring of new officers to meet that goal.

VPD serves approximately 50 square miles, divided into two precincts, east and west, which are further divided into two districts per precinct. Each district is then divided into beats, and individual patrol officers are responsible for handling calls for service within each beat. The City has identified a replacement of VPD Headquarters on its list of capital improvements

through 2036. VPD reports that its east and west precinct buildings are currently at capacity for current staff levels and have limited potential for expansion because of land constraints.

Table 21 summarizes the number of events initiated by community members and by officers in 2024, as well as the average response time for community-initiated events (VPD 2024). The event priority number refers to the level of emergency, with Priority 1, 2, and 3 indicating calls that require an immediate response and lower numbers referring to those with less immediacy.

Table 21. Vancouver Police Department Response Times

Event Priority	2024 Community-Initiated Events (% Change from 2023)	Average Response Time – Community-Initiated Events (Minutes)	2024 Officer-Initiated Events (% Change from 2023)	Total Events (% Change from 2023)
1	460 (-16.2%)	5.56	11 (-50.0%)	471 (-17.5%)
2	5,968 (-4.7%)	8.34	192 (6.1%)	6,160 (-4.4%)
3	43,034 (-7.1%)	10.74	19,922 (64.4%)	62,956 (7.7%)
4	21,972 (-10.3%)	13.82	12,413 (-6.2%)	34,385 (-8.9%)
5	2,307 (-21.7%)	13.18	1,564 (-10.0%)	3,871 (-17.4%)
9	5,349 (-15.4%)	7.46	19 (11.8%)	5,368 (-15.3%)
Total	**79,090 (-9.0%)**	**10.82**	**34,121 (25.0%)**	**113,211 (-0.9%)**

Schools

The Vancouver school system is a mix of public, charter, private, and special schools. Two regional public school districts have facilities ~~in~~ in Vancouver: the Vancouver Public School District (VPS) and the Evergreen School District (Evergreen SD). The City also is home to the Washington School for the Deaf, the Washington School for the Blind, and Clark College, a community college offering bachelor's and associate degrees and certificates. ~~Figure 27~~ ~~Figure 27~~ Figure 29 shows the location of schools and school districts in Vancouver.

VPS is the primary provider of public education in West and Central Vancouver. The school district consists of 21 elementary, 6 middle, and 7 high schools covering a district of 58

square miles, as well as 5 specialty schools (VPS n.d.). The average student-teacher ratio is 17:1, which is less than the state average of 19.7:1.

In 2022, VPS adopted a six-year Capital Facilities Plan (CFP) that established average classroom sizes for elementary, middle, and high school grade levels (VPS 2022). The CFP guidelines suggest that average class sizes should be 21.5 students per classroom in elementary schools, 26 students per classroom in middle schools, 27 students per classroom in high schools and 10 students per classroom for special education students. The CFP projected insufficient capacity at two schools, Ogden Elementary in Central Vancouver and Sacajawea Elementary in West Vancouver, and called for adding classrooms and co-op space at both schools. All other VPS schools had reported enrollment levels below their building capacity. VPS uses standard assumptions about new student generation rates to forecast their capacity needs, as shown in Table 22.

Table 22. Average Student Generation Rates for Vancouver Public Schools (2022)

School Level	Single-Family Housing Student Generation Rate	Multifamily Housing Student Generation Rate
Elementary School (K-5)	.183	.103
Middle School (6-8)	.076	.046
High School (9-12)	.089	.058

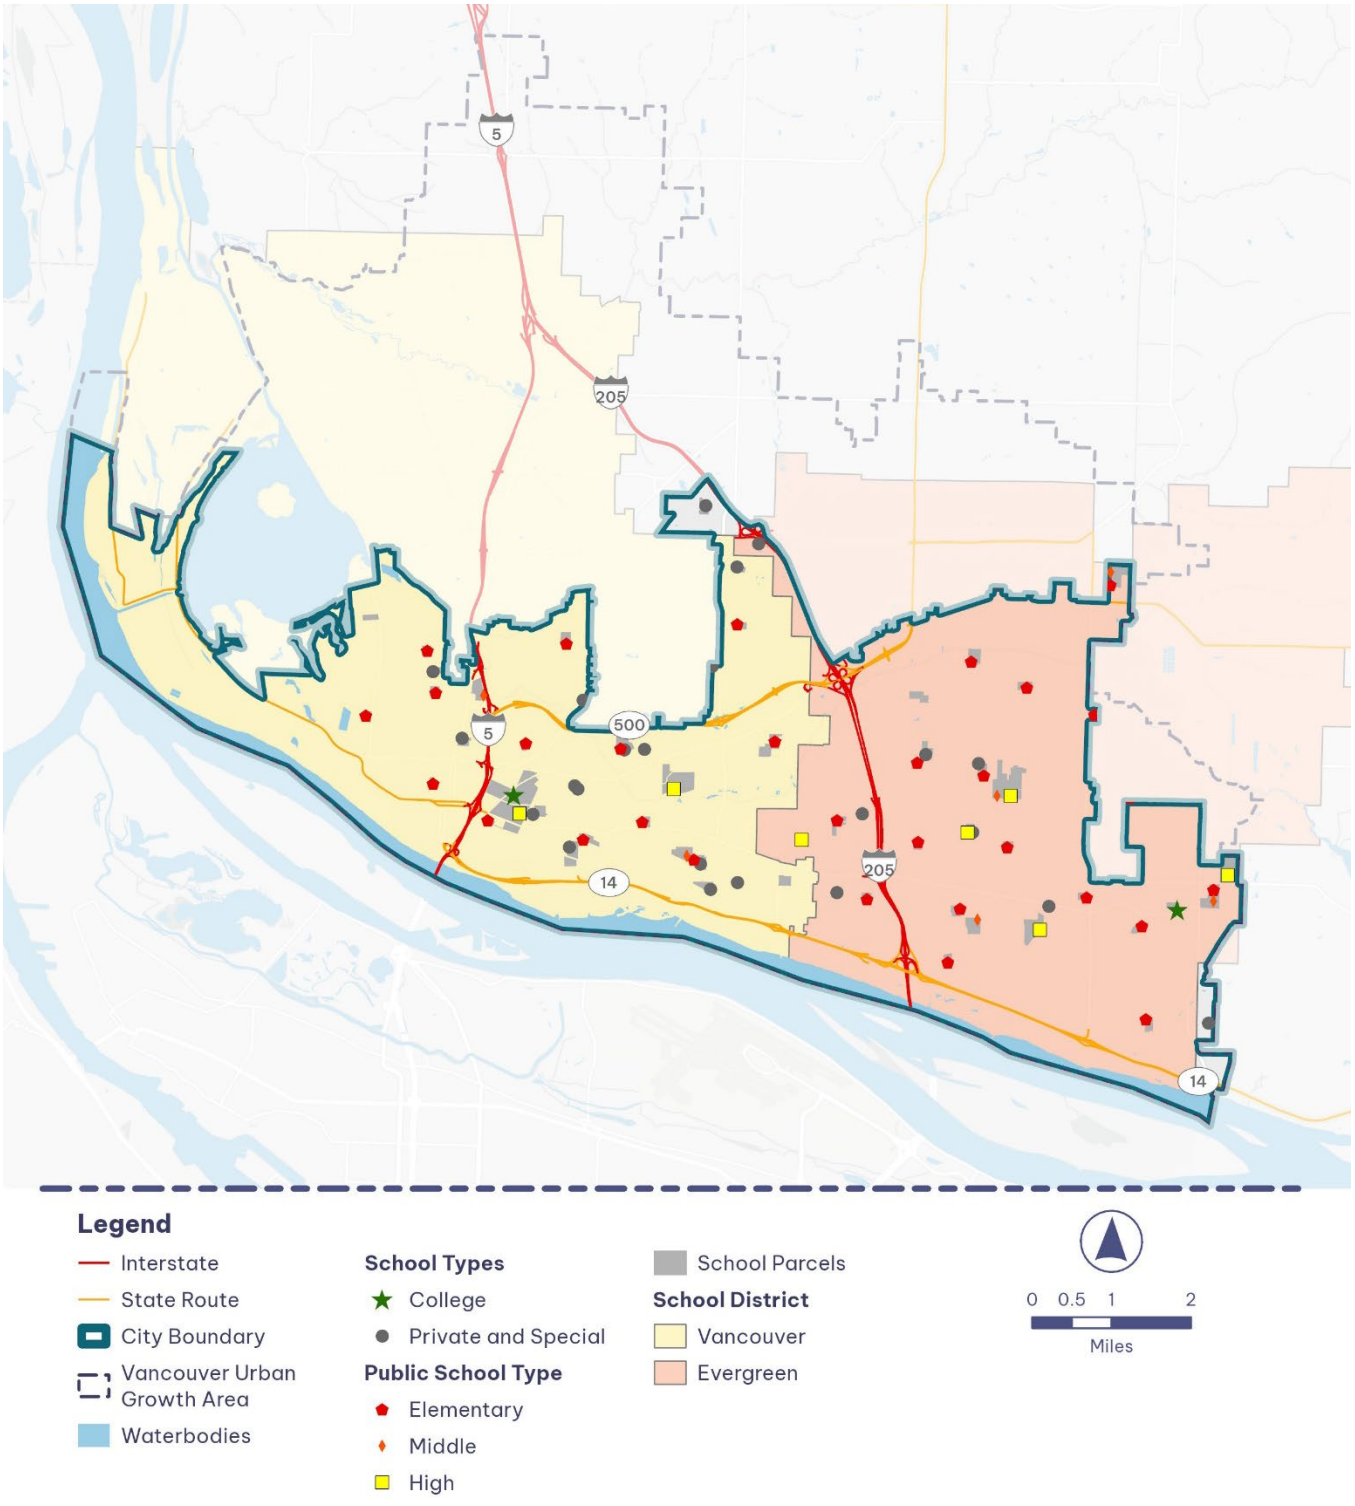
Source: VPS 2022

The Evergreen SD serves Clark County and the eastern part of Vancouver and consists of 22 elementary, 6 middle, and 6 high schools serving about 22,000 students (EPS n.d.). It also includes 4 specialty schools.

Evergreen SD is currently in the process of updating the six-year CFP however, according to information provided by the district in 2025, it will establish the following average classroom sizes for specific school grades (EPS 2025):

- Grades Kindergarten-3 – not to exceed 23.67 students per class
- Grades 4 -5 – not to exceed 25 students per class
- Special Education – 1 to 15 students per classroom for elementary schools
- Grades 6-8 – not to exceed 27.33 students per class
- Grades 9-12 – not to exceed 30 students per class
- Special Programs (e.g., music, art, and physical education) –20 to 70 students per class

The updated Evergreen SD CFP projects a decrease in enrollment that will level off and remain steady through 2032 (EPS 2025). One factor hindering enrollment growth has been the slow growth in the child population within Evergreen SD boundaries. The annual kindergarten-to-birth (K-to-birth) ratio is a key metric representing a combination of net migration between birth and age five and the share of five-year-old residents enrolled in district kindergarten classes, often referred to as a "capture rate."



Evergreen SD also uses standard assumptions about new student generation rates to forecast their capacity needs, as shown in Table 23. The ratios for Evergreen SD have fluctuated, recovering from the 2020-21 low of 0.75, but have not returned to pre-pandemic levels. The middle scenario assumes that K-to-birth ratios will increase slightly in the next years before stabilizing at 0.89 from 2028 through 2032.

Table 23. Average Student Generation Rates for Evergreen School District (2023-2024)

School Level	Single-Family Housing Student Generation Rate	Multifamily Housing Student Generation Rate
Elementary School (K-5)	.164	.066
Middle School (6-8)	.072	.03
High School (9-12)	.109	.037

Parks and Recreation

The Vancouver Department of Parks, Recreation and Cultural Services (VPRCS) oversees and manages a total of 1,775 acres of parkland across 106 sites and 20 miles of trails, as shown in ~~Figure 28 Figure 28~~ Figure 30. Since 2014, the City of Vancouver has acquired nearly 50 acres of public land and developed more than 12 acres of parkland, with several additional park upgrades completed or in progress (City of Vancouver 2022a).

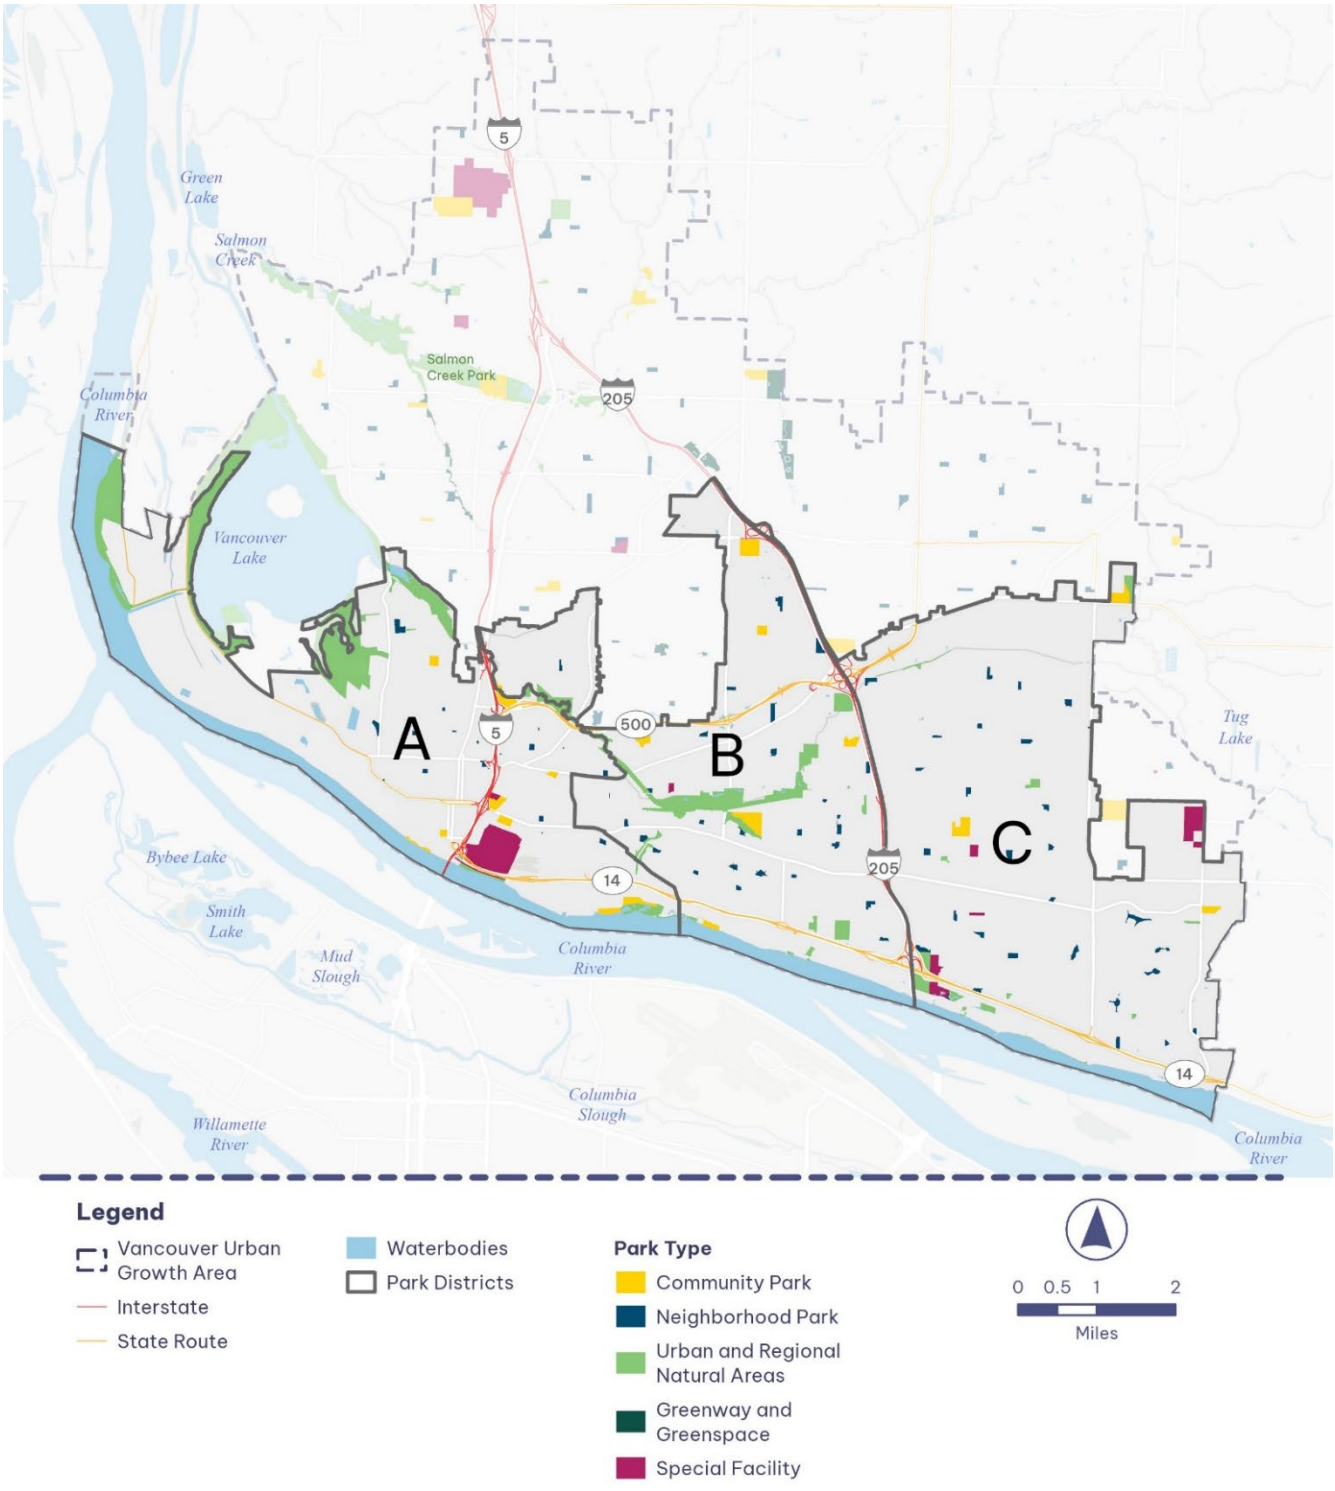
Vancouver is divided into three Park Impact Fee (PIF) Districts, each of which establishes LOS standards and assesses impact fees on new residential development to offset the cost of meeting the recreational needs of a growing population. The City of Vancouver adopted population-based standards for park land acquisition and development based on park classification in 1994 (City of Vancouver 2022a).

In 2022, VPRCS published a Park System Comprehensive Plan to analyze existing conditions and identify 10-year goals and metrics. As of 2022, the greatest number of people resided in PIF District C, which is located east of I-205 in the ~~e~~City boundaries. PIF District B, located between Grand Boulevard/Evergreen Boulevard and I-205, and PIF District A, which includes the remaining portion of the ~~e~~City west of District B, had lower levels of population and projected growth than District C.

The City currently provides 4.19 acres of parkland (including urban neighborhood and community parks and urban natural areas) per 1,000 residents citywide, which is less than the City's standard of 6 acres of acquired neighborhood/community parks per 1,000 residents and half of the national median of 10.6 acres per 1,000 residents for comparable sized cities. The City also has a standard of 4.25 acres of developed neighborhood/community parks per 1,000 residents. Citywide, about 372 more acres of park land needs to be acquired and about 383 acres needs to be developed to meet existing LOS standards, as shown in Table 24.

Table 24. Existing (2025) City Parks and Natural Areas Demand, Inventory, and Need by District (in acres)

Park Impact Fee District	Acquisition Demand	Acquisition Inventory	Acquisition Need	Development Demand	Development Inventory	Development Need
A	246.43	217.12	29.31	174.56	124.50	50.05
B	388.10	327.73	60.37	274.91	207.82	67.08
C	600.13	317.33	282.80	425.09	159.52	265.57
Total	1,234.66	862.19	372.47	874.55	491.84	382.71



Source: City of Vancouver 2025b

Note: Park Impact Fee District boundaries are shown in Figure 28-Figure 30. Demand calculated based on estimated 2025 population of 41,072 in PIF A, 64,684 in PIF B, and 100,021 in PIF C. Assumes LOS standard of 6 acres per 1,000 residents of acquisition need and 4.25 acres per 1,000 records for park development need. Need is calculated by subtracting the inventory (as of 2025) from the future projected demand.

Most of the park need identified in the Park System Comprehensive Plan is in East Vancouver (District C), as shown in Table 24. Based on the City's Geographic Information System modeling, 75% of all ~~c~~City residents currently live within a 10-minute walking distance (0.5 mile) of park properties; however, 15 parks remain undeveloped.

Residents living east of I-205 have expressed a desire for more parks, while residents living west of I-205 have expressed a need for updated park amenities including benches and trails (City of Vancouver 2022a).

Water, Wastewater, and Sewer Services

Potable Water

The potable water system is managed by the City and serves the City as well as the northern portion of the Vancouver Urban Growth Area. As of 2023, the City delivered 10.1 billion gallons of water to more than 270,000 people covering a 72-square-mile-service area (City of Vancouver n.d.[a]). The City operates and maintains an extensive water distribution system, which includes 9 water production stations, 44 wells, 52 booster pumps, more than 1,100 miles of pipes, and more than 80,000 service connections (City of Vancouver n.d.[a]).

Water pressure requirements for the system are determined by the Washington Department of Health, which establishes pressure standards of 30 pounds per square inch (Design Workshop 2024). These standards ensure that adequate water flow is maintained during peak hours when there is high demand. Compliance with these pressure standards is crucial for providing a reliable water supply to the residents.

The National Fire Protection Association (NFPA) also plays a role in ensuring the effectiveness of the water system, particularly in the event of a fire. The NFPA sets guidelines and regulations for the supply, storage, and distribution of water to meet the firefighting needs of the community. Fire flow requirements often determine the minimum size of water lines to ensure an adequate water supply is available for firefighting purposes.

One geographical challenge faced by the water system in Vancouver is the disconnect between the location of the water reservoirs in the southwest and the areas experiencing population growth in the northeast. To maintain the flow of water and meet the increasing demands, the City needs to continuously improve its transmission infrastructure and pumping systems.

Considering the future, the City may need to explore alternative water sources. The Salmon-Washougal and Lewis Watershed Management Plan, published in 2006, recommended sourcing water from the Columbia River instead of relying on flow-limited streams and sensitive aquatic habitats. This suggests that water bodies such as the Vancouver Lake lowlands and the Steigerwald Wildlife Refuge should be protected to ensure their viability as potential water sources (Design Workshop 2024).

Sewer and Wastewater

Sanitary sewer service is provided by the City within the City limits as well as the northern unincorporated area. Clark Regional Wastewater District also serves a small portion of Central Vancouver north of the Vancouver Mall. As of 2023, the City served 244,000 residents covering 58.5 square miles (City of Vancouver n.d.[b]). The sewer system is an extensive network spanning 796 miles of pipe with 43 pump stations (City of Vancouver

n.d.[b]). These pipes transport residential, commercial, and industrial wastewater to two treatment plants: Westside Water Reclamation Facility and Marine Park Water Reclamation Facility. Both of these plants have been recognized for environmental excellence employing advanced processes to treat wastewater and remove pollutants before releasing treated effluent into the Columbia River. Sterilized residual ash from incinerated wastewater solids at the Westside Water Reclamation Facility is transferred to a landfill in Boardman, Oregon.

There are various federal and state standards to ensure the system meets former and future demands. These standards encompass factors such as water quality, air quality, environmental protection, and public health. The City of Vancouver adheres to these standards to ensure the proper functioning and compliance of the entire wastewater system.

Stormwater

Please see the Water section of Chapter 4 for a discussion of the City's existing stormwater system.

Energy Utilities

Efforts to transition to renewable energy sources are underway in the ~~e~~City and region, with roughly 54% of energy used in Vancouver and greater Clark County coming from renewable energy sources (CPU 2024). Clark Public Utilities (CPU) manages and operates electric, generating, and water systems. The Clean Energy Transformation Act commits the state to transition to 100% clean electricity by 2045, which CPU will be assisting and leading this effort. Currently, CPU energy sources include hydropower, natural gas, nuclear electricity, and wind power (CPU 2024).

In 2022, CPU electrical serviced 229,732 customers with 5,554,441 megawatt hours and a peak demand of 1,083 megawatts. Its generating system produced 1,695,596 megawatt hours of electricity (CPU 2022). In their 2024 Integrated Resource Plan, CPU forecast that sufficient energy resources are available to meet customer demand through 2035; however, there is already a deficit in energy capacity, which is expected to grow through 2044 (CPU 2022). CPU determined that it will need to procure new energy resources to continue meeting customer demand for the next 20 years.

NW Natural is the natural gas provider for the ~~e~~City and provides heating and other energy needs to approximately 2.5 million people across Oregon and Southwest Washington. The company serves more than 140 communities through 800,000 meters. In Washington, the typical residential customer uses an average of 57 therms per month (NW Natural 2024). NW Natural is aiming to reach carbon neutrality by 2050 by providing renewable natural gas, introducing clean hydrogen energy, and carbon capture, use and storage. (NW Natural 2024).

Solid Waste

The City's Public Works Department oversees garbage, recycling and organics collection through a contractor, Waste Connections. The City offers a variety of waste and recycling resources to residents including information on hazardous waste removal, recyclables, and composting. The City also offers organics pickup for residents and businesses to help reduce the amount of organic materials going to landfills. This practice is in alignment with the State of Washington's Organics Management Law which is intended to divert 75% of previously disposed organic materials from the landfill by 2030, and rescue 20% of previously disposed edible food for human consumption by 2025.

The City has historically adopted Clark County's Comprehensive Solid Waste Management Plan, which has been updated for the years 2025-2030 and is pending adoption by the Washington State Department of Ecology (Ecology) (Clark County 2025). The plan describes existing conditions and outlines strategies for waste reduction, recycling, organics, moderate risk waste, miscellaneous waste, solid waste collection, transfer and disposal. The plan also discusses funding and financing of capital needs and an implementation schedule with recommendations for each of these areas of the County, including the City of Vancouver.

Columbia Resource Company, a subsidiary of Waste Connections, operates three transfer stations in Clark County (in Central Vancouver, West Vancouver, and Washougal) and is the designated processor of recyclables. These transfer stations charge fees to accept miscellaneous solid waste, organics, and recyclables. Master plans for each facility identify the investments needed to build them out to meet future growth.

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following public services and utilities metrics:

- Increased demand for services/utilities that exceeds levels of service/capabilities beyond mitigatable levels
- Consistency with CIPs
- Proximity of new housing to parks

Impacts Common to All Alternatives

The following sections outline impacts that are expected to occur under all the alternatives. Impacts specific to each alternative are discussed in the next subsections as applicable.

Increased Demand for Services/Utilities Exceeding Levels of Service/Capabilities beyond Mitigatable Levels

New growth is expected to occur under all alternatives; however, the projected capacity for new housing units and jobs and the location of new development would vary under each alternative. Under all alternatives, this future growth would increase the demand for fire and police services; schools; parks and recreation; water, wastewater, and sewer services; energy utilities, and solid waste services.

This increased demand could result in the need for new staff, equipment, and/or infrastructure under all alternatives. The pace and location of future development and corresponding demands on public services and utilities would be influenced in part by the implementation of the current (No Action) or proposed (Alternatives 1 or 2 or Preferred Alternative) Comprehensive Plan policies, related regulations and actions, and by decisions made by individual property owners and developers.

Fire

Under all alternatives, growth and development would lead to increased demand for VFD fire and EMS services, which could make it more challenging for VFD to meet its response time standards. Ability to meet response time standards is influenced by the proximity of the alarm to VFD's stations, staff availability, mobility and traffic, population density, and quantity of fire apparatus at each station. Additional staff, equipment, and potentially new fire stations may be needed to meet response time standards.

This growth would occur incrementally under all alternatives as population increases. The extent of these needs would vary by alternative, as discussed in the following subsections.

Under the action alternatives, the City may need to re-evaluate staffing levels and equipment at specific fire stations located closest to areas that would allow for greater density of housing units and associated population growth, including Station 1 in West Vancouver north of downtown, Stations 2 and 3 in Central Vancouver and Stations 6, 8, 9 and 10 in East Vancouver.

Table 25 shows the estimated number of firefighters that would be needed for each alternative to maintain existing levels of service (currently 0.83 firefighters per 1,000 people), based on the number of estimated new residents associated with the new housing unit capacity in 2045. East Vancouver would have the highest needs for new firefighters under all alternatives because it would have the highest capacity for new housing units, followed by Central Vancouver and West Vancouver. However, because the Preferred Alternative would distribute the capacity for new housing units more evenly throughout the City than Alternatives 1 and 2, there would be relatively more demand for new firefighters in West and

Central Vancouver and less demand for new firefighters in East Vancouver. ~~Demand for new firefighters in West Vancouver would be similar across all alternatives, and demand for new firefighters in Central Vancouver would be similar between the No Action Alternative and Alternative 2~~.

Table 25. Estimated Number of New Firefighters Needed by Alternative and Area of City

Geographic Area of City	No Action Alternative[a]	Alternative 1	Alternative 2	Preferred Alternative
West Vancouver	5	5	4	9
Central Vancouver	24	15	23	28
East Vancouver	27	66	70	48
Total	**56**	**86**	**97**	**84**

Notes:
The estimated firefighter need under the alternatives was estimated as follows: 1) multiplying the total projected number of new housing units in each area of the City by 2.3, which is the assumed average number of persons per household from the Our Vancouver Housing Needs Assessment (ECONorthwest 2024b), to derive the estimated new population in each area. 2) Dividing the total population for each area by 1,000 and multiplying by .83, which is the number of firefighters per 1,000 people that VFD has identified to maintain current service levels into the future. Totals may be affected by rounding.

a The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

Police

Under all alternatives, projected residential and employment growth would increase demand for VPD services. This growth would occur incrementally under all alternatives as population increases. The extent of these needs would vary by alternative, as discussed in the following subsections. VPD would need to re-evaluate staffing levels and equipment within both the east and west precincts to accommodate future demand, as it has already identified that these facilities are at capacity under existing conditions.

Table 26 shows the estimated number of new police officers that would be needed for each alternative by 2045, based on the number of estimated new residents associated with the new housing unit capacity, to meet VPD's goal of 1.4 officers per 1,000 people. East Vancouver would have the highest needs for new police officers under all alternatives, followed by Central Vancouver and West Vancouver. However, because the Preferred Alternative would distribute the capacity for new housing units more evenly throughout the City than Alternatives 1 and 2, there would be relatively more demand for new police officers in West and Central Vancouver and less demand for new firefighters in East Vancouver.

Table 26. Estimated Number of New Police Officers Needed by Alternative and Area of City

Geographic Area of City	No Action Alternative[a]	Alternative 1	Alternative 2	Preferred Alternative
West Vancouver	9	8	6	15
Central Vancouver	40	26	39	47
East Vancouver	46	111	118	81
Total	95	145	163	142

Notes:
The projected police officer need under the alternatives was estimated as follows: 1) multiplying the total projected number of new housing units in each area of the City by 2.3, which is the assumed average number of persons per household from the Our Vancouver Housing Needs Assessment (ECONorthwest 2024b), to derive the estimated new population in each area. 2) Dividing the total population for each area by 1,000 and multiplying by 1.4, which is the number of police officers per 1,000 people that VPD has identified as their service goal for the future. Totals may be affected by rounding.

a The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

Schools

All alternatives would have the potential to increase the number of new students in both VPS and Evergreen SD schools, as continued population growth under all alternatives is assumed to include school-aged children. This growth would occur incrementally under all alternatives.

Table 27 summarizes the projected number of future new students for each school district under each alternative in 2045 based on the estimated capacity for housing units and associated new school-age population. There would be more projected new students in areas served by Evergreen SD than VPS under ~~both~~ all action alternatives because more growth is forecast to occur within the Evergreen SD service area (primarily East Vancouver). Both school districts would need to account for this projected growth as part of their CFP planning processes and identify potential capacity issues. However, because the Preferred Alternative would distribute the capacity for new housing units more evenly throughout the City than Alternatives 1 and 2, the number of projected new students under the Preferred Alternative would be more similar between VPD and ESD than under Alternatives 1 and 2.

Table 27. Future Projected New Students based on New Housing Unit Capacity by Alternative

School Level	VPS No Action[a] Alt	ESD No Action[a] Alt	VPS Alt 1	ESD Alt 1	VPS Alt 2	ESD Alt 2	VPS Pref Alt	ESD Pref Alt
Elementary School (K-5)	1,343	1,311	744	2,843	955	3,062	1,732	1,986
Middle School (6-8)	593	592	328	1,283	421	1,382	764	896
High School (9-12)	739	765	409	1,658	525	1,786	953	1,158
Total	2,675	2,668	1,481	5,783	1,901	6,230	3,449	4,040

Notes:
The number of projected new students under the alternatives was estimated by multiplying the projected capacity for new housing units in each school district by the average student generation rate numbers for each school level within each district. All alternatives assume 10% of new housing capacity would be single-family, and 90% of new housing capacity would be multifamily units.
a The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.
Key: VPS = Vancouver Public School District; ESD = Evergreen School District

Parks and Recreation

None of the alternatives would have direct impacts on existing parks or change the amount of land designated as Parks/Open Space land use. Residential growth under all of the alternatives would increase the demand on the city's existing parks and recreational areas. This growth would occur incrementally under all alternatives as population increases.

As noted in the Affected Environment section for Parks and Recreation, the City does not currently meet its LOS standard of 6 acres of acquired neighborhood/community parks and 4.25 acres of developed neighborhood/community parks per 1,000 residents. That LOS is projected to decline to about 3.1 acres per 1,000 residents citywide under all alternatives based on 2045 OFM population growth projections.

Table 28 shows the projected park acquisition and development acreage demand, inventory, and needs in each district and citywide in 2045 based on the OFM estimates of total future population. With no change to the amount of parks inventory by 2045, the park land deficit would increase to about 824 acres of new park land that would need to be acquired and

about 702 acres of park land that would need to be developed citywide. The largest need would be in PIF C, where the highest population growth is projected.

Table 28. Future (2045) City Parks and Natural Areas Demand, Inventory, and Need by District (in acres)

Park Impact Fee District[a]	Acquisition Demand[b]	Acquisition Inventory	Acquisition Need	Development Demand[b]	Development Inventory	Development Need
A	333.54	217.12	119.42	238.38	124.50	113.88
B	529.97	327.73	202.23	375.39	207.82	167.57
C	819.49	317.33	502.16	580.47	159.52	420.96
Total	**1,686.00**	**862.19**	**823.81**	**1,194.25**	**491.84**	**702.41**

Source: City of Vancouver 2025b

Notes:

a Park Impact Fee District boundaries are shown in ~~Figure 28~~ Figure 28-Figure 30.

b Demand calculated based on estimated 2045 population of 56,090 in PIF A, 88,328 in PIF B, and 136,582 in PIF C, for a total population of 281,000 citywide. Assumes LOS standard of 6 acres per 1,000 residents of acquisition need and 4.25 acres per 1,000 records for park development need. Need is calculated by subtracting the inventory (as of 2025) from the future projected demand. Note: These citywide projections assume that the 2045 population distribution would be similar to the 2025 population distribution. The projections do not account for differences between the alternatives in housing capacity distribution by PIF district. The next paragraphs and table discuss potential park needs based on new housing capacity for each future alternative, including an analysis of new housing capacity by PIF district.

As noted in the Land and Shoreline Use section of Chapter 3, although the same 2045 population is projected under all of the alternatives, the pace and distribution of new housing capacity and associated growth would vary among the alternatives. Table 29 shows the estimated amount of new park acreage that would need to be acquired and developed under each alternative to meet the current urban parks and natural areas LOS standards based on the estimated 2045 capacity for new housing units and associated new residents.

Under all alternatives, PIF District C would have the largest need for park land acquisition and development because it is projected to have the highest capacity for new growth. The No Action Alternative would have the lowest overall parks need because it would have the lowest projected level of population growth based on capacity for new housing units. Alternative 1, ~~and~~ Alternative 2, and the Preferred Alternative would have higher needs than the No Action Alternative because of their higher levels of projected new housing units and associated residents.

Table 29. Projected Park Land Demand by Park Impact Fee District and Alternative (in acres)

Alternative and Park Demand Type	Park Impact Fee District[a] A	Park Impact Fee District[a] B	Park Impact Fee District[a] C	Total
No Action Alternative[b]: New Park Acquisition Demand[c]	76	134	199	**408**
No Action Alternative[b]: New Park Development Demand[c]	54	95	141	**289**
Alternative 1: New Park Acquisition Demand[c]	75	70	477	**622**
Alternative 1: New Park Development Demand[d]	53	50	338	**441**
Alternative 2: New Park Acquisition Demand[c]	65	126	509	**700**
Alternative 2: New Park Development Demand[d]	46	89	361	**496**
Preferred Alternative: New Park Acquisition Demand[c]	77	184	348	**609**
Preferred Alternative: New Park Development Demand[d]	55	130	246	**431**

This table was reformatted from the DEIS to fit better on the page (refer to strikeout table below for previous version). The demand amounts for the No Action, Alternative 1, and Alternative 2 are unchanged from the Draft EIS. The demand amounts for the Preferred Alternative are added to this table.

a Park Impact Fee District boundaries are shown in ~~Figure 28~~ Figure 28-Figure 30.

b The No Action Alternative is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

~~b~~ c The acreage of park acquisition demand under the alternatives was estimated as follows: 1) multiplying the total projected number of new housing units in each Park Impact Fee district by 2.3, which is the assumed average number of persons per household from the Our Vancouver Housing Needs Assessment (ECONorthwest 2024b), to derive the estimated new population in each PIF district. 2) Dividing the estimated new population by 1,000 and multiplying the resulting number by 6, based on the City's goal of 6 acres per 1,000 residents, to calculate the estimated acreage demand for this new population. Totals may be affected by rounding.

~~c The No Action Alternative is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.~~

d The acreage of park development demand under the alternatives was estimated as follows: 1) multiplying the total projected number of new housing units in each Park Impact Fee district by 2.3, which is the assumed average number of persons per household from the Our Vancouver Housing Needs Assessment (ECONorthwest 2024b), to derive the estimated new population in each PIF district. 2) Dividing the estimated new population by 1,000 and multiplying the resulting number by 4.25, based on the City's goal of 4.25 acres of developed

neighborhood/community parks per 1,000 residents, to calculate the estimated acreage demand for this new population. Totals may be affected by rounding.

Water, Wastewater and Sewer Services

All alternatives would create an increase in water and sewer demand to varying extents because of expected new population and employment growth. Increased water demand may increase stress on the city's potable water system, including maintaining applicable water pressure standards. Under all alternatives, the projected City growth may require water system improvements to increase the fire flow to meet current standards.

Development of any of the alternatives to accommodate projected residential and job growth would result in greater demands on the City's sewer and wastewater collection system and on downstream conveyance and treatment facilities. This new growth and development may require additional wastewater and sewer infrastructure investments and implementation, as well as associated staff and equipment, to meet new demand.

Energy Utilities

New residential, commercial and industrial development across all alternatives would result in additional energy utility demand and use. Under all alternatives, energy providers would need to coordinate with the City to ensure their respective future infrastructure planning is consistent with the city's projected growth through 2045. Specific proposed projects under all alternatives would need to demonstrate that there are adequate energy sources to support their development. As noted in the Affected Environment section, CPU has already identified a potential future energy deficit and is identifying sources for additional energy needs.

Solid Waste

All alternatives would result in increases to population density and new residential and commercial development, which would increase demand for garbage, recycling, and organics collection in areas where this growth occurs. These changes would be more pronounced under the action alternatives, where existing solid waste collection systems and practices would need to be evaluated and modified to account for new, denser development patterns in more areas of the city.

Consistency with Capital Improvement Plans

None of the alternatives in themselves would be inconsistent with capital improvement planning efforts. However, all of the alternatives would accommodate varying levels of population and employment growth, which could lead to inconsistencies with CIPs if coordination with relevant City departments, school districts, and private utilities does not occur. All of the alternatives would require ongoing coordination with these entities as they undergo their regular capital improvement planning efforts, as described in the Avoidance, Minimization, and Mitigation Measures section.

No Action Alternative

Increased Demand for Services/Utilities Exceeding Levels of Service/Capabilities beyond Mitigatable Levels

Overall, the No Action Alternative would result in the lowest increase in future demand for most public services and utilities because it would continue existing lower-density development throughout the ~~e~~City and would have capacity for the lowest levels of new growth in housing units and jobs. This difference would be most pronounced in East Vancouver, which would have the lowest estimated capacity for new housing units and therefore the least demand for new police officers, firefighters, and parks, and in the Evergreen SD, which would have the lowest projected new student generation rate compared to the ~~two~~ three action alternatives.

However, the No Action Alternative could encourage continuation of a less dense, more dispersed style of urban development. In the longer term, cumulative impacts associated with this type of development pattern could include inefficient and more costly delivery of some public services, such as police, fire, and schools, compared to Alternatives 1 and 2 and the Preferred Alternative. No additional impacts were identified for the No Action Alternative related to increased demand for individual public services and utilities or consistency with CIPs, beyond those discussed in the Impacts Common to All Alternatives section.

Consistency with Capital Improvement Plans

No additional impacts were identified for the No Action Alternative related to consistency with CIPs, beyond those discussed in the Impacts Common to All Alternatives section.

Alternative 1

Increased Demand for Services/Utilities Exceeding Levels of Service/Capabilities beyond Mitigatable Levels

Based on projected new housing units and jobs, as described in Chapter 2, Alternative 1 would create more demand for public services and utilities citywide than the No Action Alternative, slightly more demand compared to the Preferred Alternative, and ~~but~~ modestly less demand than Alternative 2. Because the Comprehensive Plan Update land use designations would promote denser, more compact development patterns in more areas of the ~~c~~City over time under Alternative 1, cumulative benefits could potentially include greater efficiencies in the delivery of some public services, such as police, fire, and schools, compared to the No Action Alternative. Similar to the No Action Alternative, specific impacts to public services and utilities would be dependent upon the location of future development.

Areas with larger proposed higher-density zoning districts and higher capacity for new housing units would have increased demand for utilities, including waste, wastewater, sewer, energy, and solid waste, which may require greater investments in new infrastructure and associated staff and equipment compared to the No Action Alternative. Areas with potentially higher demand under Alternative 1 would include parts of West Vancouver just north of downtown, in Central Vancouver along East Mill Plain Boulevard and near the Vancouver Mall, and in East Vancouver along Mill Plain Boulevard, 164th Avenue, and 192nd Avenue and in the Section 30 area. Required infrastructure changes could include installing larger water and sewer collection pipes and identifying new methods and approaches for solid waste collection to accommodate denser housing types.

Consistency with Capital Improvement Plans

No additional impacts were identified for Alternative 1 related to consistency with CIPs, beyond those discussed in the Impacts Common to All Alternatives section.

Alternative 2

Increased Demand for Services/Utilities Exceeding Levels of Service/Capabilities beyond Mitigatable Levels

Alternative 2 would result in the highest increase in future demand for public services and utilities compared to the other alternatives. Because the Comprehensive Plan Update land use designations would promote denser, more compact development patterns in the most areas of the City under Alternative 2, cumulative benefits could include greater efficiencies in the delivery of some public services, such as police, fire, and schools, compared to the other alternatives. Similar to Alternative 1 and the Preferred Alternative, areas with larger proposed higher-density zoning districts and higher capacity for new housing units would have

increased demand for public services and utilities that may require additional infrastructure, staff, and equipment to serve.

These locations and associated needs would be similar to Alternative 1 and the Preferred Alternative but would cover more extensive amounts of land, including in West Vancouver adjacent to and north of downtown, in Central Vancouver along East Mill Plain Boulevard and near the Vancouver Mall, and in East Vancouver along Mill Plain Boulevard, 164th Avenue, and 192nd Avenue and in the Section 30 area.

Consistency with Capital Improvement Plans

No additional impacts were identified for Alternative 2 related to consistency with CIPs, beyond those discussed in the Impacts Common to All Alternatives section.

Preferred Alternative

Increased Demand for Services/Utilities Exceeding Levels of Service/Capabilities beyond Mitigatable Levels

Based on projected new housing units and jobs, as described in Chapter 2, the Preferred Alternative would create more demand for public services and utilities citywide than the No Action Alternative, and modestly less demand than Alternatives 1 and 2 depending on area of the city.

Because the Comprehensive Plan Update land use designations would promote denser, more compact development patterns in more areas of the City over time under the Preferred Alternative, cumulative benefits could potentially include greater efficiencies in the delivery of some public services, such as police, fire, and schools, compared to the No Action Alternative. Similar to Alternatives 1 and 2, areas with larger proposed higher-density zoning districts and higher capacity for new housing units would have increased demand for public services and utilities that may require additional infrastructure, staff, and equipment to serve.

The locations and associated needs would be similar to Alternative 2, including in West Vancouver adjacent to and north of downtown (more Medium Scale Neighborhood similar to Alternative 2), in Central Vancouver along East Mill Plain Boulevard and near the Vancouver Mall (more Medium Scale Neighborhood, Mixed Use and Regional Activity Center, similar to Alternative 2), and in East Vancouver along Mill Plain Boulevard, 164th Avenue, and 192nd Avenue and in the Section 30 area (more Mixed Use and Regional Activity Center, similar to Alternative 2). However, because the Preferred Alternative would distribute the capacity for new housing units more evenly between West, Central and East Vancouver, there would be relatively more demand for public services and utilities in West and Central Vancouver and less demand in East Vancouver than under Alternatives 1 and 2.

Consistency with Capital Improvement Plans

No additional impacts were identified for the Preferred Alternative related to consistency with CIPs, beyond those discussed in the Impacts Common to All Alternatives section.

Avoidance, Minimization, and Mitigation Measures

Under all alternatives, future growth and associated increased demand for public services and utilities would be addressed as part of the City's regular capital project planning efforts. Long-term planning for these facilities consistent with the Capital Facilities Element, other city functional plans, and service provider plans will help ensure that public services and utilities are provided adequately under each alternative and meet applicable LOS standards. The school districts would continue to address changes in student enrollment through their individual planning processes.

Specific avoidance, minimization, and mitigation measures could include the following:

- The Comprehensive Plan Update promotes a more compact growth and development pattern within the existing urban framework of the City, which could reduce growth in outlying areas and result in a more efficient delivery of some public services and utilities.
- Increases in population and employment resulting from the implementation of the Comprehensive Plan Update will be reviewed annually as part of department performance evaluations and capital planning for all public services and facilities.
- Future development resulting from implementation of the Comprehensive Plan Update will be required to comply with the most current versions of the International Fire Code, the International Building Code, and Washington Department of Health and City municipal codes that require maintaining health and safety and utility service performance.
- Future development resulting from implementation of the Comprehensive Plan Update will result in additional tax revenues from construction and retail sales tax, property tax, utility tax, licenses and permits, utility ratepayer fees and system development charges, and school and PIFs. A portion of these taxes and fees will accrue to the City to offset costs associated with the increase in demand for public services and facilities.
- VPRCS will continue to explore opportunities to develop new parks, open space, and recreation facilities, especially in portions of the City with access gaps to meet LOS standards. VPRCS will also continue to work closely with the City's Transportation Department to plan and create opportunities for parks. The City's periodic updates to its Park System Comprehensive Plan would need to account for increased population and associated need for parks and recreation spaces under all the alternatives. The City collects PIFs per unit pursuant to VMC 20.915.050 by year at an increasing sliding scale value and unit type (single-family or multifamily). To fund additional parks acquisitions

and development, the City could consider changes to its impact fee structure and explore new funding sources. Other potential mitigation measures related to parks include:

  - Subarea planning to provide a comprehensive evaluation of infrastructure needs, efficient planning to serve potential growth. Related to parks in particular, this includes the identification of a centralize park focus location based on the unique resources and setting, and interconnection to serve multiple property owners and future developments/redevelopments.
  - Development code requirements for buffers between parks and adjoining land uses to minimize impacts to park resources, as well as publicly accessible open space within new developments.
  - Maximize multi-use of resources properties where compatible, such as park natural areas and stormwater properties; utility easements adopted to accommodate public access to public spaces and cross circulation.
  - Require pedestrian-level grid to facilitate interconnection at reasonable spacing standard between developments within institutional campus areas and high-density developments and existing or new parks and trails.
  - Density transfers or cluster-type development such as increased building height to preserve a signature tree, grove or grassland to protect nature resources and provide access to natural spaces.
  - Continue to use late-comer agreements for infrastructure locations.
  - Improve project development review and construction review to ensure pedestrian interconnection and resource protection, as well as identification of opportunities to locate needed public assets. Additional staffing is needed, or at minimum cross training for staffing efficiencies.

- The City uses a hydraulic network model to evaluate capacity and make determinations of water availability. Capital projects to address potential increased demand resulting from the action alternatives will be included in periodic updates to the Water, Wastewater, Surface Water CIP. Any additional gaps in the water system that result from future development will be addressed through development review. Developers are required to upgrade the existing system to meet demand of individual projects. Additionally, new development and redevelopment is required by the plumbing code to include efficient plumbing fixtures, which would reduce the overall impact to water demand resulting from the action alternatives. New development and redevelopment would also need to comply with current stormwater regulations to be approved.
- The City uses a General Sewer Plan and its CIP to track if there is adequate wastewater collections and treatment infrastructure and show capacity needs. The City would need to ensure that safe wastewater services is provided to all households in order to protect

the community's health and wellbeing. Additionally, the City would utilize the General Sewer Plan to ensure the system meets federal and state standards such as water quality, environment protection and public health.

- The City's Water, Wastewater, Surface Water CIP identifies a number of drinking water, wastewater, and surface water projects and efforts that would help prepare the Ccity for future planned growth and development under all alternatives, including:
    - Capital programs focused on rehabilitation and/or replacement of worn and obsolete water treatment facilities.
    - Capital programs focused on rehabilitation and/or replacement of worn and obsolete equipment at wastewater infrastructure.
    - Ongoing upgrade and replacement of water and wastewater collections infrastructure throughout their respective systems that have been identified as high risk and/or high maintenance
    - Production well replacement projects at multiple water stations to improve reliability.
    - Ongoing installation of transmission mains to move water from high production sources to areas of development.
    - Electrical equipment replacement at water production stations and wastewater pump stations and treatment facilities.
    - Multiple projects to improve treatment performance and capacity at Marine Park and Westside wastewater treatment facilities.
    - Ongoing individual projects within the Sewer Connection Incentive Program designed to bring more reliable wastewater collections infrastructure to properties.

- CPU will continue to evaluate efficiency measures and the need for new energy resources to continue meeting customer demand for the next 20 years.
- Clark County will continue to evaluate solid waste capital improvement needs as part of periodic updates to its Comprehensive Solid Waste Management Plan.

In addition, implementation of the following goals and policy measures ~~currently under consideration~~ for the Comprehensive Plan Update would also help to avoid, minimize, and mitigate potential impacts to public services and utilities identified for the action alternatives:

- Provide high-quality public facilities, services, and utilities that are affordable, efficient, well maintained, advance climate goals, and meet the needs of a growing population.
    - Coordinate with the VFD and VPD to plan for expected growth, provide adequate facilities to equitably serve the community, and maintain the established levels of

service. Communicate with service providers when planning transportation projects that may affect emergency vehicle access.

- Support public safety through investment in emergency services, facilities, infrastructure and coordinated preparedness efforts that strengthen community resilience and response.
- Work with local school districts to facilitate an adequate supply of schools and associated facilities. Facilitate timely and efficient siting processes which allow for assessment and mitigation of impacts.
- Establish multipurpose community centers offering social, recreational, educational, and cultural programming, especially in underserved areas.
- Prioritize programs and infrastructure that support youth and aging populations, including safe play areas, accessible housing, robust childcare, public facilities and community programs that foster multigenerational interaction.
- Encourage the use of short-term pilot projects for park, transportation, and infrastructure improvements before making long-term investments to foster innovation, test feasibility, and increase community buy-in.
- Create a network of linear parks that encourage active transportation, improve community health and wellbeing, enhance tree canopy and stormwater management, and link parks and open space with housing.
- Expand access to community gardens and incentivize urban agriculture to improve food security and increase healthy food options.
- Work with nonprofit and private partners, Clark County, and adjacent cities to build out the regional trail network for recreation and active transportation purposes.
- Provide safe, clean, quality drinking water to every Vancouver home, business, and industry. Discourage development and use of private drinking water wells. Provide water pressures and volumes necessary to support fire suppression hydrants and sprinkler systems. Ensure that the infrastructure to support water service is in place prior to or at the time of development. Support self-sustaining on-site water ~~conservation recycle~~ reuse systems where practicable.
- Encourage water-efficient technologies and practices, reuse systems, and conservation programs to reduce consumption and ensure sustainable water availability amid climate change and growing demand.
- Provide sewers and sewer service to every Vancouver home, business, and industry at an affordable and equitable cost. ~~Discourage~~ Prohibit development and use of on-site sewage treatment systems. Encourage existing development using septic systems to connect to public sewer as soon as available. Ensure that the infrastructure to support sewer service is in place prior to or at the time of development. Eliminate health hazards from domestic and industrial wastewater and return clean water to the environment.

  - Encourage new renewable energy infrastructure and promote development of storage systems to ensure a stable, resilient, and sustainable energy grid.
  - Increase waste diversion rates through a system that minimizes landfill reliance, reduces greenhouse gas emissions, prioritizes composting and encourages resource recovery. Properly ensure waste that cannot be recycled is diverted to landfills.
  - Use green materials and practices when procuring materials and services, and while carrying out maintenance functions. Employ materials transformation and reuse programs from Ceity activities (i.e., turning woody debris into mulch or soil amendments).

- Consider water, sewer, stormwater management, solid waste, police, fire and schools as necessary public facilities and services. Ensure that facilities are sufficient to support planned development. Establish service standards or planning assumptions for estimating needed public facilities, based on service capabilities, local land use designations and nationally recognized standards.
- Plan, site, and design essential public facilities through coordinated, equitable, and transparent processes that support regional planning goals, minimize community impacts, and ensure long-term benefit to all Vancouver residents.
- Assure consistency of overall land use and CFPs by reevaluating Vancouver's land use plan if funding is inadequate to provide necessary public facilities and services to implement the plan.
- Maintain a prioritization process that aligns CIP projects to the goals and policies of the Comprehensive Plan. Use the CIP, as amended annually, to prioritize the financing of capital facilities within projected funding capacities and ensure that capital budget decisions conform with the Comprehensive Plan.
- Provide safe infrastructure that remains functional during disruptive natural and manmade events, maintain access for emergency vehicles and services, and ~~support responsive, equipped and community led fire and police departments~~ ensure efficient and responsive emergency services.
- Ensure impact fees and system development charges and utility rates are proportional to development scale, ensuring affordability for smaller projects while allowing the Ceity to recover costs from overall development impacts on resources and services.
- Expand access to municipal and community-based services and amenities by prioritizing investment in underserved areas. Utilize the City's Equity Index, ~~and~~ Displacement Risk Assessment tool and climate vulnerability assessment to guide public investments and infrastructure improvements. Prioritize infrastructure improvements using risk and resiliency criteria as well as economic value.

- Design and maintain infrastructure to reduce long-term maintenance costs per capita and per trip traveled. Consider life cycle costs, emerging technologies, and the impacts of facility design and material choices in both capital and operating budgets.

Significant Unavoidable Adverse Impacts

All alternatives have the potential to increase demand on public services and utilities as a result of expected population and job growth and development. The anticipated growth would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant unavoidable adverse impacts to public services and utilities are anticipated for any of the alternatives.

Chapter 4: Natural Environment

Note to readers: This Final Environmental Impact Statement document retains and builds upon the information presented in the Draft Environmental Impact Statement. New content in this chapter is generally denoted with underlined text, while changes to information are denoted with strikethrough text. Updates focus on adding the new analysis of the Preferred Alternative, as well as minor corrections and clarifications to the analysis presented in the Draft EIS. Some changes are denoted with footnotes and table notes when further explanation was warranted.

This chapter describes the methodologies, existing conditions (affected environment), and potential impacts of the alternatives for the following environmental topic areas related to the natural environment: earth, air quality, water, and plants and animals.

For each topic, the chapter also provides a summary of potential avoidance, minimization, and mitigation measures to address potential impacts and identifies impacts that are considered to be significant and unavoidable under SEPA.

Earth

Methodology

Analysts reviewed relevant information and policies to describe existing conditions related to topography, soils, and geologic hazard areas including the following sources:

- Community Atlas (Design Workshop 2024)
- Clark County geologic maps (Clark County n.d.)
- U.S. Department of Agriculture Web Soil Survey (USDA NRCS 2001)
- U.S. Geological Survey geologic maps (USGS 2024)
- VMC Critical Areas Ordinance, Chapters 14.26 and 20.740, including 20.740.130, Geologic Hazard Areas
- Washington Department of Natural Resources geologic maps (WDNR 2014, 2023)

Analysts then reviewed the alternatives to determine potential adverse impacts and associated mitigation measures using the following metrics:

- Consistency with City regulations for geologic hazard areas (VMC 20.740.130)
- Potential for increased exposure to geologic hazard risks at existing and future development sites
- Potential for increased risk of erosion at future development sites

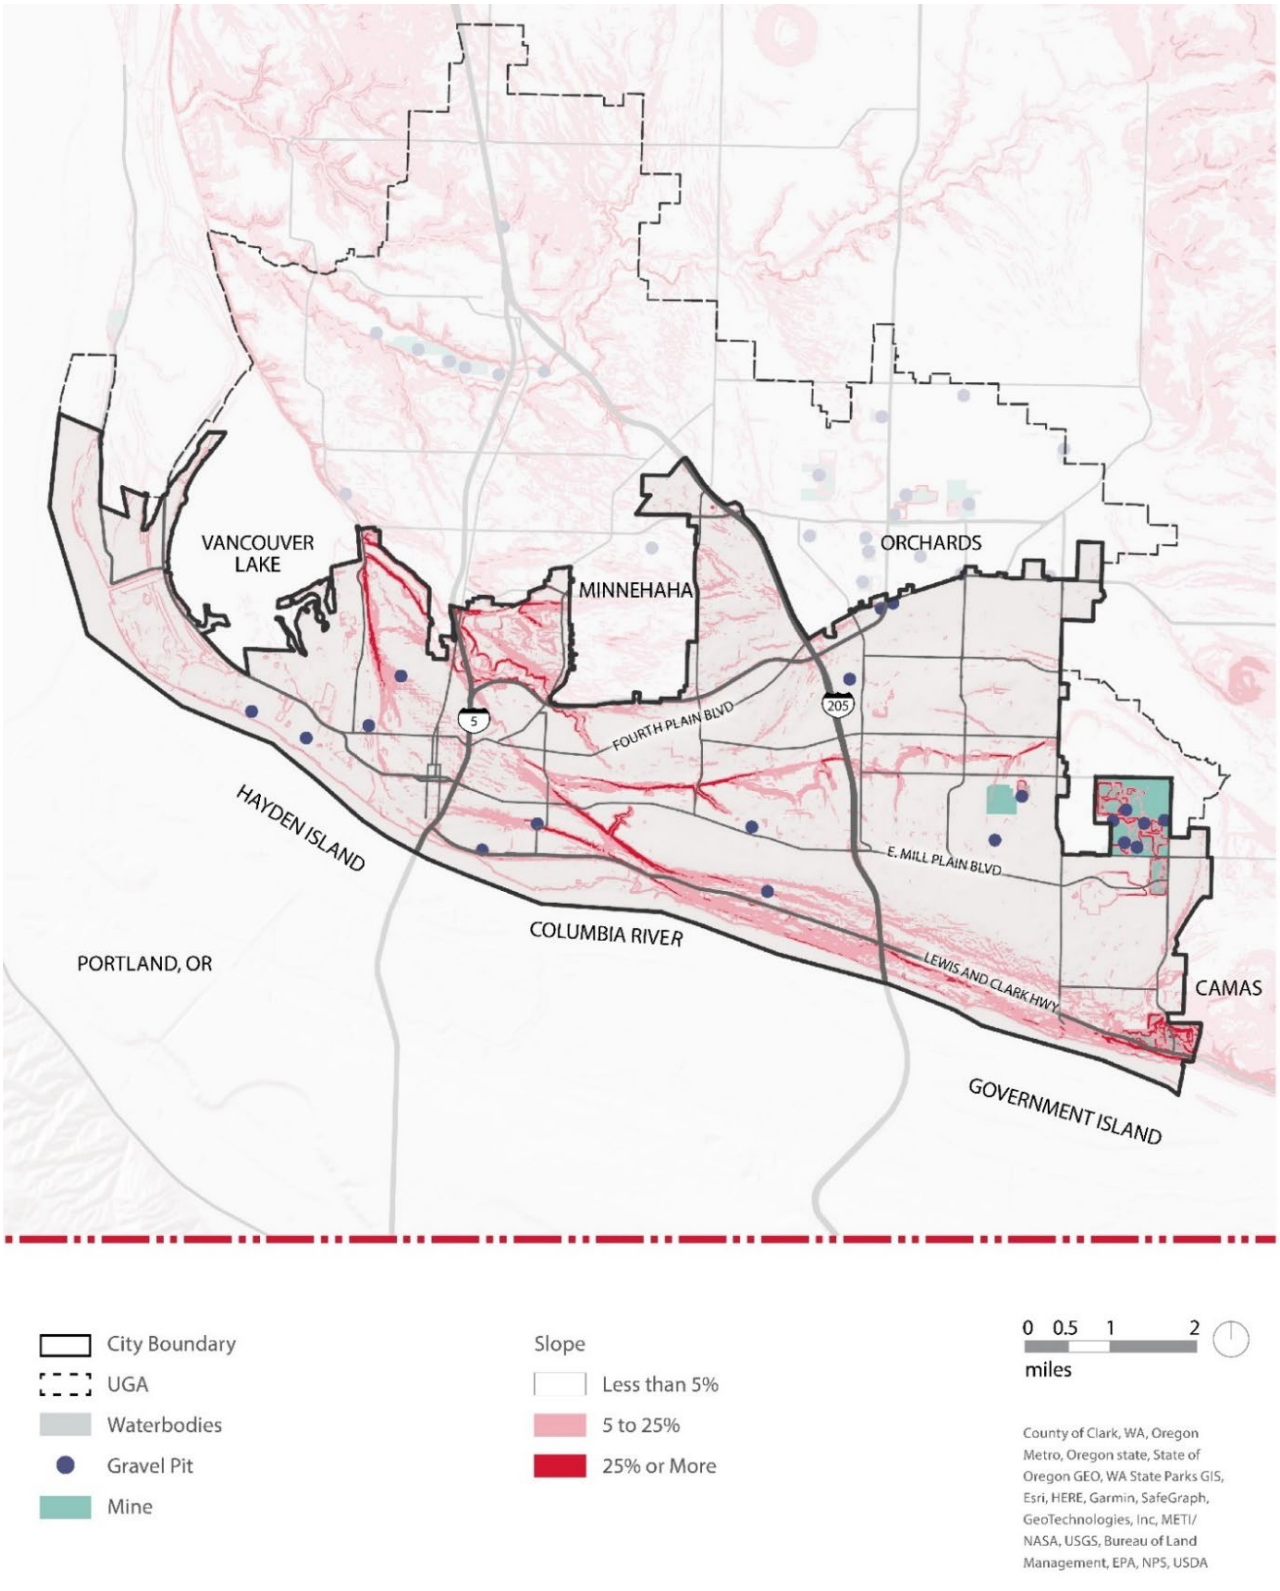
Affected Environment

Topography and Geologic Features

The Columbia River and ancient glacial flooding have sculpted much of Vancouver's landscape by depositing clay, silt, sand and gravel onto its banks over tens of thousands of years (City of Vancouver 2021a). The City is generally flat or terraced, but there are steep slopes along portions of the Columbia River, Burnt Bridge Creek and Vancouver Lake.

Sites with steep slopes may be more difficult to develop due to possible instability, erosion or drainage challenges. Approximately 20% of the City has a slope above 5%. Slopes of around 5% to 25% are highly prevalent on the southeast side of Vancouver adjacent to the Columbia River. Slopes of 25% or more, which are defined in the City code as landslide and erosion areas, are prevalent closer to the center of the City, as shown in ~~Figure 29 Figure 29~~ Figure 31.

Gravel pits are located sporadically throughout the City but are highly prevalent on the east side of Vancouver alongside steep slopes (above 25%) and mines, as shown in ~~Figure 29 Figure 29~~ Figure 31.



Geologic Hazard Areas

Vancouver is vulnerable to geologic hazards such as erosion, landslides, seismic hazards (earthquakes and ground shaking), and volcanic activity (City of Vancouver 2022a; WDNR 2024).

Erosion hazard areas in Vancouver are lands underlain by soils identified by the U.S. Department of Agriculture Natural Resource Conservation Service as having "severe" or "very severe" erosional hazards including, the following groups of soils when they occur on slopes of 15% or greater: Hillsboro series, Larchmount series, Lauren series, Olympic series, and Wind River series (USDA NRCS 2001). The most severe erosion hazards within the C~~e~~ity primarily occur along the north bank of Lake River leading into Vancouver Lake, the northeast shore of Vancouver Lake, and along both sides of Burnt Bridge Creek Park (Clark County n.d.). ~~Figure 30 Figure 30~~ Figure 32 shows the locations of identified severe erosion hazard areas.

Landslide hazard areas are defined as those with slopes greater than 25%, excluding engineered slopes, and areas of historic or active landslides, potential instability, or older landslide debris (VMC 20.740.130). Areas of severe landslide hazard generally follow the north side of Lake River and occur in isolated areas throughout North and Central Vancouver (USGS 2024). ~~Figure 31 Figure 31~~ Figure 33 shows the location of landslide hazards, including active and potential unstable slopes.

~~Figure 29~~ Figure 31. Steep Slopes, Gravel Pits, and Mines

Source: Design Workshop 2024

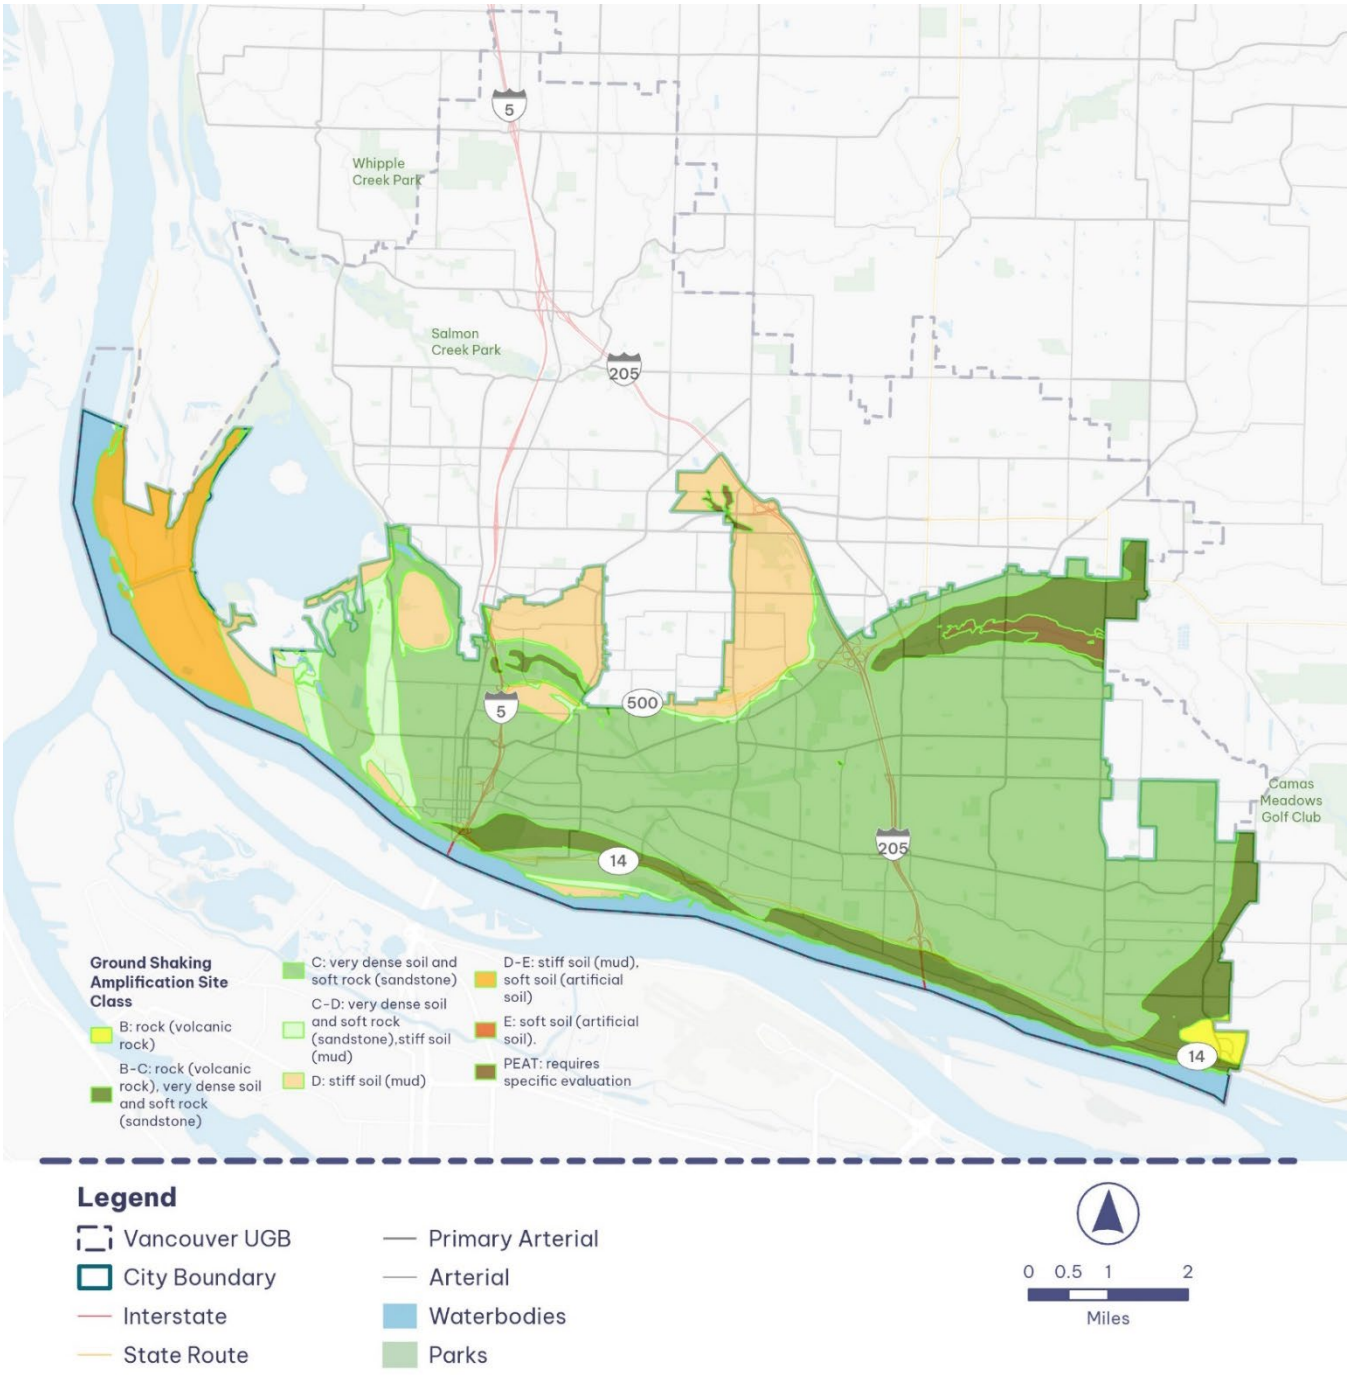
~~Figure 30~~ Figure 32. Severe Erosion Hazard Areas

Source: Clark County n.d.

~~Figure 31~~ Figure 33. Landslide Hazard Areas

Source: Clark County n.d.

Vancouver contains a range of seismic hazards. Hazards from earthquakes include liquefaction, ground shaking, slope failure, and fault rupture (VMC 20.740.130). The Lacamas Lake Fault occurs in East Vancouver, running northwest to southeast from SR 500 to the Columbia River (WDNR 2014). Areas with the greatest relative seismic hazard are located along the Columbia River in southwest Vancouver north toward Vancouver Lake. Areas with



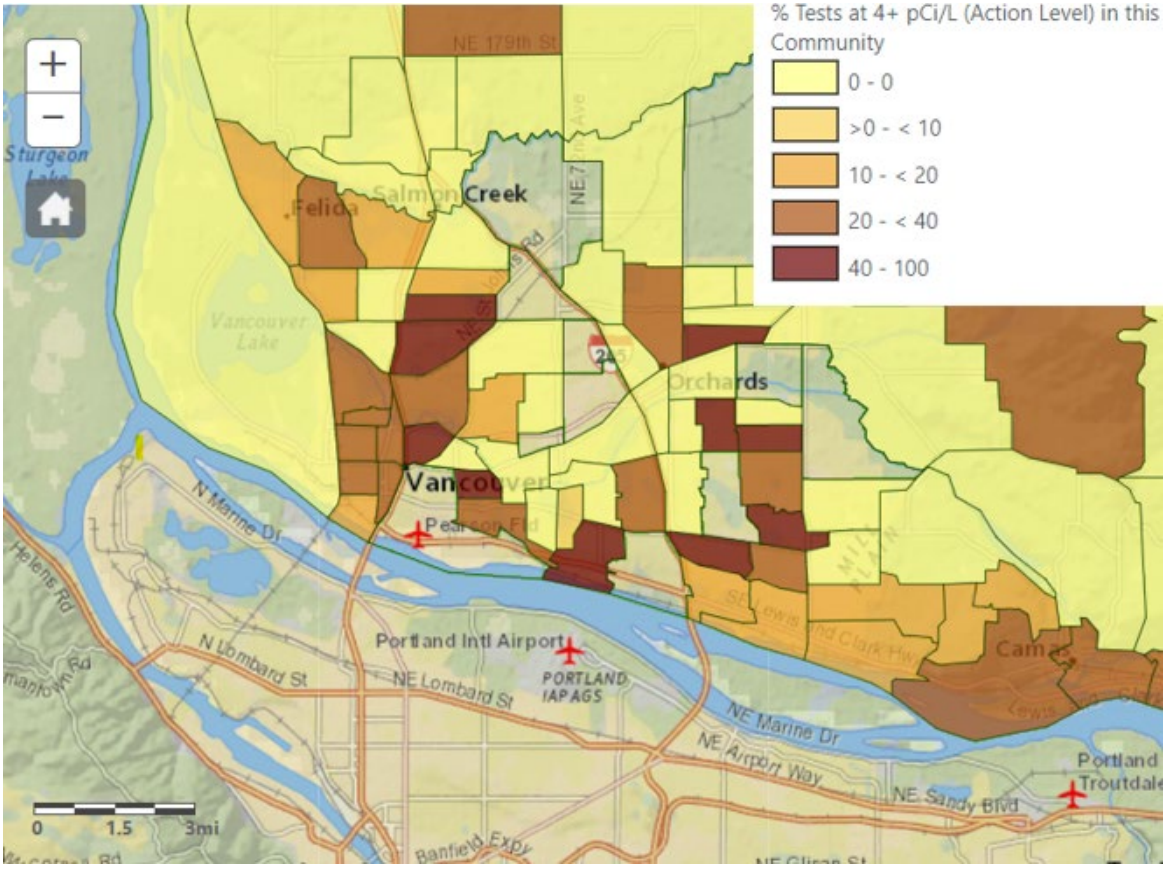
moderate to least relative seismic hazard are located throughout Central and East Vancouver. There is an additional band of greater relative risk at and north of SR 500. Liquefaction susceptibility hazards are "low to moderate" in the majority of the city, with a small band of "very low" along the Columbia River. Liquefaction hazards are mapped as "moderate to high" surrounding Vancouver Lake (WDNR 2024).

Seismic hazard areas in Vancouver include ground shaking amplification hazard areas. Ground shaking amplification is a phenomenon where surface-level shaking during an earthquake can be more intense based on local soil conditions. For example, when seismic waves travel through softer soils that vibrate more intensely than harder bedrock, there can be greater shaking at the surface.

Ground shaking amplification site class is determined by the National Earthquake Reduction Program of the Federal Emergency Management Agency. Ground Shaking amplification and earthquake damage risk is lowest with Site Class A soils and highest with Class F soils. VMC 20.740.130 designates ground shaking amplification hazard areas as Site Classes C to D, D, D to E, E and F as indicated on the Site Class Map of Clark County, Washington. The City is mostly classified as Site Class D (moderate), with some areas in north Vancouver classified as Site Class C to D (low to moderate), and areas in West Vancouver classified as Site Class D and D to E (moderate), as shown in ~~Figure 32 Figure 32~~ Figure 34 (Clark County n.d.).

Vancouver is within a volcanic hazard zone due to the proximity of Mount Saint Helens to the north, Mount Adams to the northeast, and Mount Hood to the southeast. The Washington State Department of Natural Resources has identified that Vancouver exists within areas of regional lava flows from Mount Saint Helens and Mount Adams (WDNR 2023).

~~Figure 32~~ Figure 34. Earthquake Hazards, Liquefaction Areas, and Volcanic Hazard Zones



Source: Clark County n.d.

Clark County is classified by the U.S. Environmental Protection Agency (EPA) as a Zone 1 area, which has the highest potential risk for radon exposure (Clark County Public Health n.d.). Radon is a colorless, tasteless, and odorless radioactive gas that is released naturally from soil containing granite rock. Clark County and Vancouver have higher levels than some other parts of the state because of granite rock deposited naturally in this region 18,000

years ago. Radon testing in Vancouver has reported varying results in different parts of the city, with clusters of higher risk areas (defined as levels greater than 4 picocuries per liter of air) bordering the Columbia River and near the west, south, and east edges of the city, as shown in ~~Figure 33 Figure 33~~ Figure 35.

Radon is the leading cause of lung cancer among nonsmokers and contributes to higher rates of lung cancer for smokers (DOH n.d.). Radon can seep into homes from the ground through cracks in floors or walls, construction joints, gaps around pipes, and other means, and become trapped and concentrated. All types of homes can be affected, regardless of age or whether they contain a basement, and every home should be tested. However, there is a lower risk in homes above the third floor, and therefore the EPA recommends testing all residences below the third floor (National Center for Healthy Housing 2025).

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following earth-related metrics:

- Consistency with City regulations for geologic hazard areas (VMC 20.740.130)
- Potential for increased exposure to geologic hazard risks at existing and future development sites
- Potential for increased risk of erosion at future development sites

Impacts Common to All Alternatives

The following sections outline impacts that are expected to occur under all the alternatives. Impacts specific to each alternative are discussed in the next subsections.

Consistency with City Regulations for Geologic Hazard Areas

None of the alternatives would conflict with City regulations for geologic hazard areas, as all of the alternatives would remain subject to the City's Critical Areas Ordinance (CAO), which regulates geologically hazardous areas under VMC 20.740.130. Please see the Avoidance, Minimization, and Mitigation Measures section for more information about the CAO requirements.

Potential for Increased Exposure to Geologic Hazard Risks at Existing and Future Development Sites

Existing and future development sites would experience some degree of risk for long-term geologic hazards under all alternatives. Some risks, such as landslide and erosion hazards, would be localized to sites in certain areas of the city, as described in the Affected Environment section and shown in ~~Figure 30 Figure 30~~ Figure 32 and ~~Figure 31 Figure 31~~ Figure 33. However, with the updated CAO, more areas of the ~~c~~City would likely be considered to be geologic hazard areas, which would potentially lead to limitations on development in these areas under all alternatives and thus reduce exposure to geologic hazard risks. Most of the ~~c~~City would be at low to moderate risk for ground shaking amplification hazards, as shown in ~~Figure 32 Figure 32~~ Figure 34. All citywide development would be at risk of volcanic hazards.

When modeling the potential future capacity for new housing units and jobs under all alternatives, analysts assumed that development would be constrained on parcels of land designated as critical areas, which include geologic hazard areas. These constraints could potentially limit exposure to geologic hazard risks. However, because all alternatives would have capacity for some level of housing and job growth, more people would potentially be exposed to these risks regardless of the alternative.

Under all alternatives, with the adoption of the updated CAO, there are additional requirements for development in geologic hazard areas, which would benefit health and safety, as discussed in the Avoidance, Minimization, and Mitigation Measures section. In addition, all alternatives would result in development of new buildings of three or more

stories. Units at or above the third story may better protect from radon exposure (BERK 2025).

Potential for Increased Risk of Erosion at Future Development Sites

All alternatives would lead to new construction or redevelopment, which could create increased risks of erosion at specific sites because of removal of vegetation on a temporary or permanent basis. The amount of new impervious surfaces, which include rooftops, driveways, sidewalks, parking lots, and compacted soils, would increase under all alternatives to some extent because of this new growth and development. Impervious surfaces in urban areas reduce infiltration of water into soils and increase surface water runoff, which can change the way that water and pollutants travel to urban streams and lead to increased erosion (EPA 2024a).

All alternatives would maintain the same amount of existing land designated as Parks/Open Space. Retaining these vegetated Parks/Open Space areas would help limit erosion risk at those sites. Under all alternatives, the land use designations would remain the same in areas with the greatest erosion hazards, which include the north bank of Lake River leading into Vancouver Lake, the northeast shore of Vancouver Lake, and along both sides of Burnt Bridge Creek Park.

Under all alternatives, with the adoption of the updated CAO, there would be additional planting requirements in geologic hazard areas to help support the stability and natural resilience of these areas.

No Action Alternative

In general, there would be minimal additional impacts under the No Action Alternative aside from those described in the Impacts Common to All Alternatives section. The No Action Alternative would be consistent with City regulations and would apply the updated CAO provisions for geologic hazard areas.

There would potentially be fewer construction impacts to earth resources under the No Action Alternative than Alternative 1, ~~and~~ Alternative 2 and the Preferred Alternative because the No Action Alternative would retain the existing land use and zoning designations, which generally allow for less density citywide. Because the No Action Alternative would have less capacity for new housing and jobs, it may result in lower levels of new construction and/or redevelopment and the associated ground disturbances, potential erosion, and increases in impervious surfaces, compared to Alternatives 1 and 2 and the Preferred Alternative. The differences in impacts between the No Action Alternative, ~~and~~ Alternatives 1 and 2, and the Preferred Alternative would generally be greatest outside of single-family neighborhoods. Within single-family neighborhoods, new GMA requirements to allow middle housing will be

imposed by the state if local jurisdictions do not take action to change their regulations to allow them.

Alternative 1

In general, there would be minimal additional impacts under Alternative 1 aside from those described in the Impacts Common to All Alternatives section. Alternative 1 would be consistent with City regulations and would apply the updated CAO provisions for geologic hazard areas. Compared to the No Action Alternative, Alternative 1 would have a substantially greater capacity for new buildings in zoning districts that allow three or more stories, which may better protect from radon exposure (BERK 2025).

Alternative 1 would allow for more dense development and would have greater capacity for new housing units and jobs, which would likely result in higher levels of new construction and/or redevelopment and the associated ground disturbances, potential erosion, and increases in impervious surfaces, compared to the No Action Alternative, particularly outside of single-family zones. However, Alternative 1 would have modestly fewer earth-related impacts than Alternative 2, which has the highest capacity for new housing units and jobs.

Alternative 2

In general, there would be minimal additional impacts under Alternative 2 aside from those described in the Impacts Common to All Alternatives section. Alternative 2 would be consistent with City regulations and would apply the updated CAO provisions for geologic hazard areas. Alternative 2 would have the highest capacity for new buildings in zoning districts that allow three or more stories, which may better protect from radon exposure (BERK 2025).

Alternative 2 would have similar impacts to Alternative 1 and the Preferred Alternative related to geologic hazard and erosion risks. However, because Alternative 2 would have options for more density and larger-scale buildings in more areas of the city, it would have greater potential than Alternative 1, the Preferred Alternative and the No Action Alternative to increase impervious surface areas and decrease vegetation, which could increase the potential for erosion. However, because Alternative 2 would allow for the densest development patterns, it would potentially result in less pressure to develop existing undeveloped sites, including those in or near erosion or landslide hazard areas than the No Action Alternative, ~~and~~ Alternative 1 and Preferred Alternative, which would lead to reduced risk exposure for people and property.

Preferred Alternative

In general, there would be minimal additional impacts under the Preferred Alternative aside from those described in the Impacts Common to All Alternatives section. The Preferred Alternative would be consistent with City regulations and would apply the updated Critical Areas Ordinance (CAO) provisions for geologic hazard areas. Compared to Alternative 1 and the No Action Alternative, the Preferred Alternative would have a greater capacity for new buildings in zoning districts that allow three or more stories, which may better protect from radon exposure (BERK 2025). However, this capacity for buildings with three or more stories would be lower than under Alternative 2.

Similar to Alternatives 1 and 2, the Preferred Alternative would allow for more dense development and would have greater capacity for new housing units and jobs, which would likely result in higher levels of new construction and/or redevelopment and the associated ground disturbances, potential erosion, and increases in impervious surfaces, compared to the No Action Alternative, particularly outside of single-family zones. The Preferred Alternative would have modestly fewer earth-related impacts than Alternative 2, which has the highest capacity for new housing units and jobs.

Avoidance, Minimization, and Mitigation Measures

Regardless of alternative, all future development projects will be required to comply with ~~e~~City and state requirements for geologically hazardous areas. The City's development review process will ensure compliance with the geologically hazardous areas requirements under VMC 20.740.130.

The City updated the CAO in December 2024 with the objective to better protect natural areas and, in the case of geologic hazard areas, reduce risks to public health and safety, while providing clearer and more flexible guidelines for property owners and developers (City of Vancouver 2024e).

All alternatives would be required to comply with these CAO changes, which include:

- Designation of Hazard Areas: Uses updated data sources for identifying liquefaction, ground shaking amplification, and fault rupture hazard areas to ensure designated areas are based on the most current and reliable geological information.
- Detailed Requirements for Critical Areas Reports: Specifies additional requirements for Critical Areas Reports for development proposals in potential geologic hazard areas to help ensure a comprehensive assessment of the site's geologic risks.

- Performance Standards and Buffers: Defines specific performance standards for development in geologic hazard areas, including buffer widths from hazard areas, to mitigate risks and ensure safety.
- Prohibition of Critical Facilities: Allows critical facilities in landslide, bank erosion, and fault rupture hazard areas only there is no other feasible location, a mitigation proposal must be included, and a Critical Areas Report demonstrates that the area is safe for the type of facility proposed.
- Prohibitions and Conditions During Wet Season: Adds stricter prohibitions on clearing, grading, and other activities that could destabilize soil during the wet season (November 1 to May 1), except under certain permits.
- New Planting Requirements: Requires new plantings in geologic hazard areas to consist of native vegetation and prohibits alterations to buffers that involve clearing vegetation without an approved erosion control plan.

During construction of future development projects under all alternatives, adherence to best management practices approved by Ecology and the appropriate provisions of the VMC would minimize erosion risks. Site-specific projects under all of the alternatives would be required to comply with applicable temporary erosion and sedimentation control measures as required by the City and the National Pollutant Discharge Elimination System Construction Stormwater General Permit's Storm Water Pollution Prevention Plan.

Significant Unavoidable Adverse Impacts

All of the alternatives have the potential to create impacts to earth resources as a result of expected population growth and development. The anticipated changes would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant unavoidable adverse impacts to earth resources are anticipated for any of the alternatives.

Air Quality, Greenhouse Gases and Climate

Methodology

Analysts reviewed relevant information sources and policies to describe existing conditions related to emissions of criteria air pollutants, mobile source air toxics, and greenhouse gases (GHG) including the following sources:

- EPA's AirData outdoor monitor values reports (EPA 2024b)
- Washington State Greenhouse Gas Emissions Inventory: 1990-2019 (Ecology 2022)
- City of Vancouver Climate Action Framework (City of Vancouver 2022b)

- City of Vancouver 2023 Inventory of Community and Government Operations Greenhouse Gas Emissions (City of Vancouver 2024d)
- Our Vancouver Health Impact Assessment (BERK 2025)

Analysts then reviewed the alternatives to determine potential adverse impacts and associated mitigation measures using the following metrics:

- Long-term air pollutant and GHG emissions
- Capacity for new housing in areas with air pollutant exposure risks
- Capacity for new housing and jobs in areas with high temperatures
- Air quality and GHG considerations during construction

For the air pollutant and GHG emissions analysis, estimated daily VMT from the regional transportation model, as discussed in the Transportation section, were multiplied by pollutant emission factors developed with EPA's Motor Vehicle Simulator (MOVES5) that represent an average vehicle within Clark County in 2045. The MOVES5 tool models emissions for carbon monoxide (CO), oxides of nitrogen (NO_x), particulate matter 10 microns or less in diameter (PM_{10}), particulate matter 2.5 microns or less in diameter ($PM_{2.5}$), and GHG carbon dioxide equivalent (CO_{2e}).

Affected Environment

Air Quality

Vancouver is located in a regional airshed bounded on the south by Eugene, Oregon, on the north by Chehalis, Washington, on the west by the Coast Range, and on the east by the Cascade Mountains (City of Vancouver 2021a).

Air quality is monitored in Clark County by the Southwest Clean Air Agency, which was created in response to the Washington Clean Air Act of 1967. Clark County is currently classified by EPA as in attainment for all pollutants and averaging periods, based on its history of monitored concentrations in the region (EPA 2024b). Despite the area's EPA designation, air quality is an ongoing challenge for Vancouver and Clark County. Primary sources of air pollution in Vancouver include wildfire smoke, wood burning, cars, trucks, trains, and port activity.

Multiple governmental agencies operate air quality monitors throughout the states of Washington and Oregon that monitor concentrations of air pollutants according to EPA protocols. Within Vancouver, Washington, Ecology operates monitors for ozone and fine $PM_{2.5}$, a type of air pollution that consists of very small particles that are 2.5 micrometers or less in diameter. Oregon Department of Environmental Quality (DEQ) monitors CO, PM_{10}, $PM_{2.5}$, and ozone concentrations in Portland, Oregon, about 9 miles south of Vancouver, and

there is an additional $PM_{2.5}$ monitor location in Portland, about 4 miles south of Vancouver. Concentrations measured by these DEQ monitors are reported to the EPA as part of the Portland-Vancouver-Hillsboro core-based statistical area.

Table 30, Table 31, Table 32, and Table 33 summarize the criteria pollutant monitor data for the three most recent years of validated measurements for CO, PM_{10}, $PM_{2.5}$, and ozone respectively. Concentrations of CO, PM_{10}, and $PM_{2.5}$ did not exceed the National Ambient Air Quality Standards (NAAQS) during the period of 2021 through 2023. Although there were individual days when monitored ozone concentrations exceeded the NAAQS daily threshold, these instances did not constitute a violation of the standard. Under the NAAQS, a violation occurs when the annual fourth-highest daily maximum 8-hour ozone concentration, averaged over three years, is greater than 0.070 parts per million.

Table 30. Carbon Monoxide Measured Concentrations in Parts per Billion

Monitor Location: CO	Value	2021	2022	2023
5824 SE Lafayette Street, Portland, OR	1-hour Maximum	2.6	2.1	4.1
5824 SE Lafayette Street, Portland, OR	1-hour 2nd Maximum	2.1	1.9	1.8
5824 SE Lafayette Street, Portland, OR	No. of 1-hour Exceedances	0	0	0
5824 SE Lafayette Street, Portland, OR	8-hour Maximum	1.7	1.7	1.2
5824 SE Lafayette Street, Portland, OR	8-hour 2nd Maximum	1.4	1.5	1.2
5824 SE Lafayette Street, Portland, OR	No. of 8-hour Exceedances	0	0	0

Source: EPA 2024b

Notes: One hour CO standard of 35 parts per million is not to be exceeded more than once per year. Eight-hour carbon monoxide standard of 9 parts per million is not to be exceeded more than once per year.
Oregon Department of Environmental Quality (DEQ) monitors CO, PM_{10}, $PM_{2.5}$, and ozone concentrations in Portland, Oregon, about 9 miles south of Vancouver, and there is an additional $PM_{2.5}$ monitor location in Portland, about 4 miles south of Vancouver. Concentrations measured by these DEQ monitors are reported to the EPA as part of the Portland-Vancouver-Hillsboro core-based statistical area.
Key: CO = carbon monoxide.

Table 31. PM_{10} Measured Concentrations in Micrograms per Cubic Meter

Monitor Location: PM_{10}	Value	2021	2022	2023
5824 SE Lafayette Street, Portland, OR	24-hour Maximum	31	83	32
5824 SE Lafayette Street, Portland, OR	24-hour 2nd Maximum	29	39	27
5824 SE Lafayette Street, Portland, OR	No. of Exceedances	0	0	0
4915 N Gantenbein Avenue, Portland, OR	24-hour Maximum	27	89	21
4915 N Gantenbein Avenue, Portland, OR	24-hour 2nd Maximum	24	39	19
4915 N Gantenbein Avenue, Portland, OR	No. of Exceedances	0	0	0

Source: EPA 2024b

Note: 24-hour PM_{10} standard of 150 micrograms per cubic meter is not to be exceeded more than once per year on average over three years.
Key: PM_{10} = particulate matter less than or equal to 10 microns in diameter.

Table 32. $PM_{2.5}$ Measured Concentrations in Micrograms per Cubic Meter

Monitor Location: $PM_{2.5}$	Value	2021	2022	2023
5824 SE Lafayette Street, Portland, OR	24-Hour 98th percentile	16	27	17
5824 SE Lafayette Street, Portland, OR	Mean Annual	6.4	8	6.5
2722 NE 84th Avenue, Vancouver, WA	24-Hour 98th percentile	16	29	25
2722 NE 84th Avenue, Vancouver, WA	Mean Annual	5.7	7.7	6.4

Source: EPA 2024b

Note: 24-hour $PM_{2.5}$ standard is exceeded when the 98th percentile, averaged over three years, is greater than 35 µg/m^3. Annual $PM_{2.5}$ standard is exceeded when the annual mean, averaged over three years, is greater than 9 µg/m^3.
Key: µg/m^3 = micrograms per cubic meter; $PM_{2.5}$ = particulate matter less than or equal to 2.5 microns in diameter

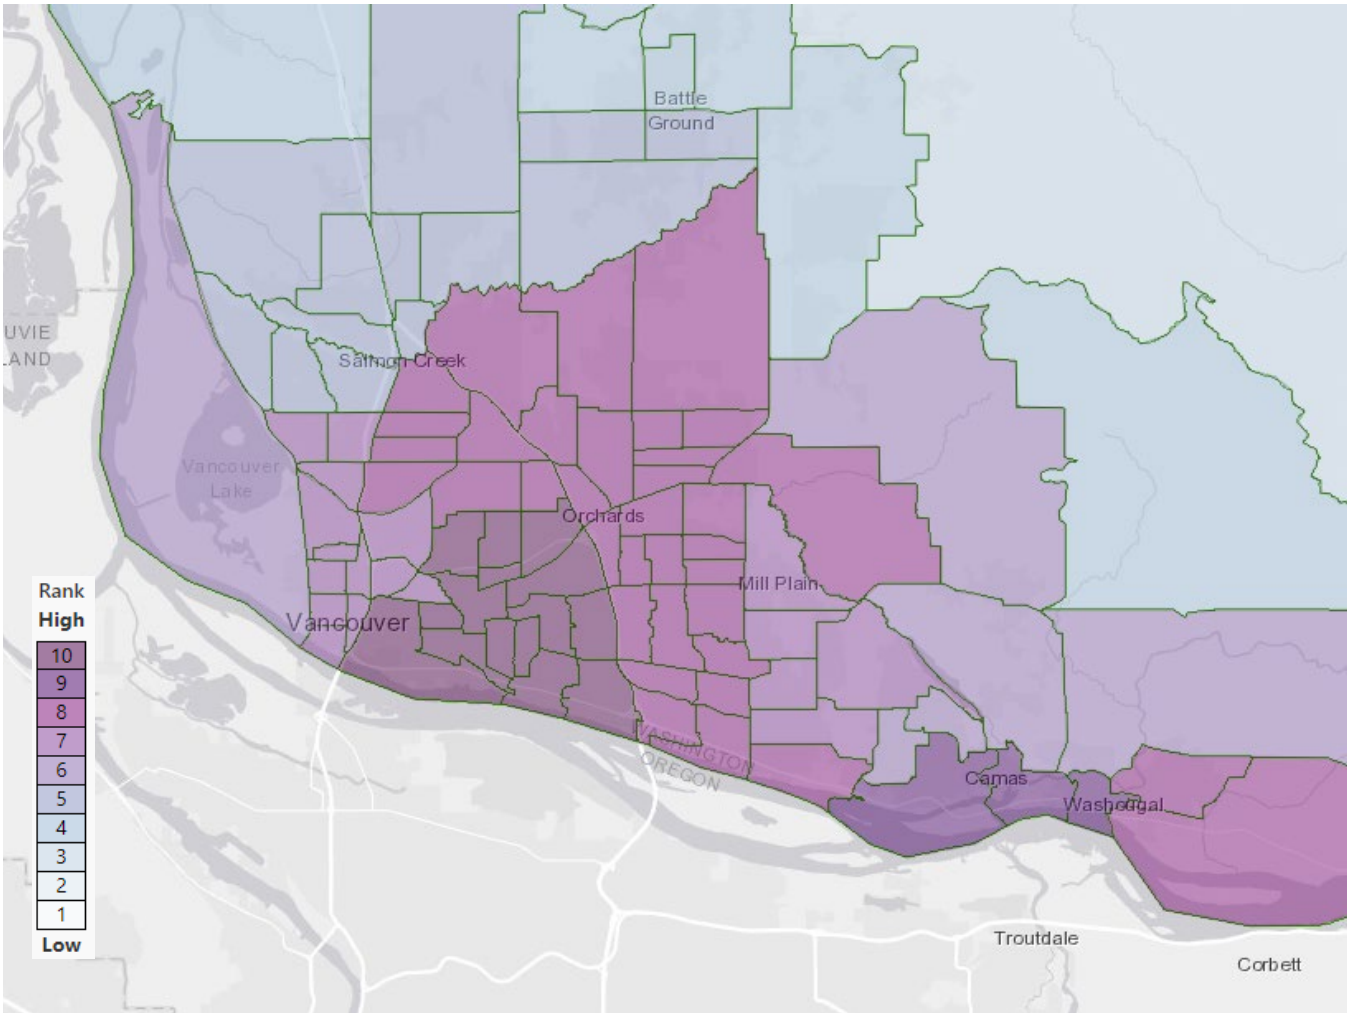
Table 33. Ozone Measured Concentrations in Parts per Million

Monitor Location: Ozone	Value	2021	2022	2023
5824 SE Lafayette Street, Portland, OR	1st Highest	**.072**[a]	**.08**[a]	.067
5824 SE Lafayette Street, Portland, OR	2nd Highest	.066	.07	.064
5824 SE Lafayette Street, Portland, OR	3rd Highest	.066	.057	.062
5824 SE Lafayette Street, Portland, OR	4th Highest	.06	.056	.056
5824 SE Lafayette Street, Portland, OR	No. of days above standard	1	1	0
1500 SE Blairmont Drive (Mountain View High School), Vancouver, WA	1st Highest	.068	.062	**.086**[a]
1500 SE Blairmont Drive (Mountain View High School), Vancouver, WA	2nd Highest	.064	.06	.067
1500 SE Blairmont Drive (Mountain View High School), Vancouver, WA	3rd Highest	.057	.057	.065
1500 SE Blairmont Drive (Mountain View High School), Vancouver, WA	4th Highest	.057	.056	.062
1500 SE Blairmont Drive (Mountain View High School), Vancouver, WA	No. of days above standard	0	0	1

Source: EPA 2024b

Notes:

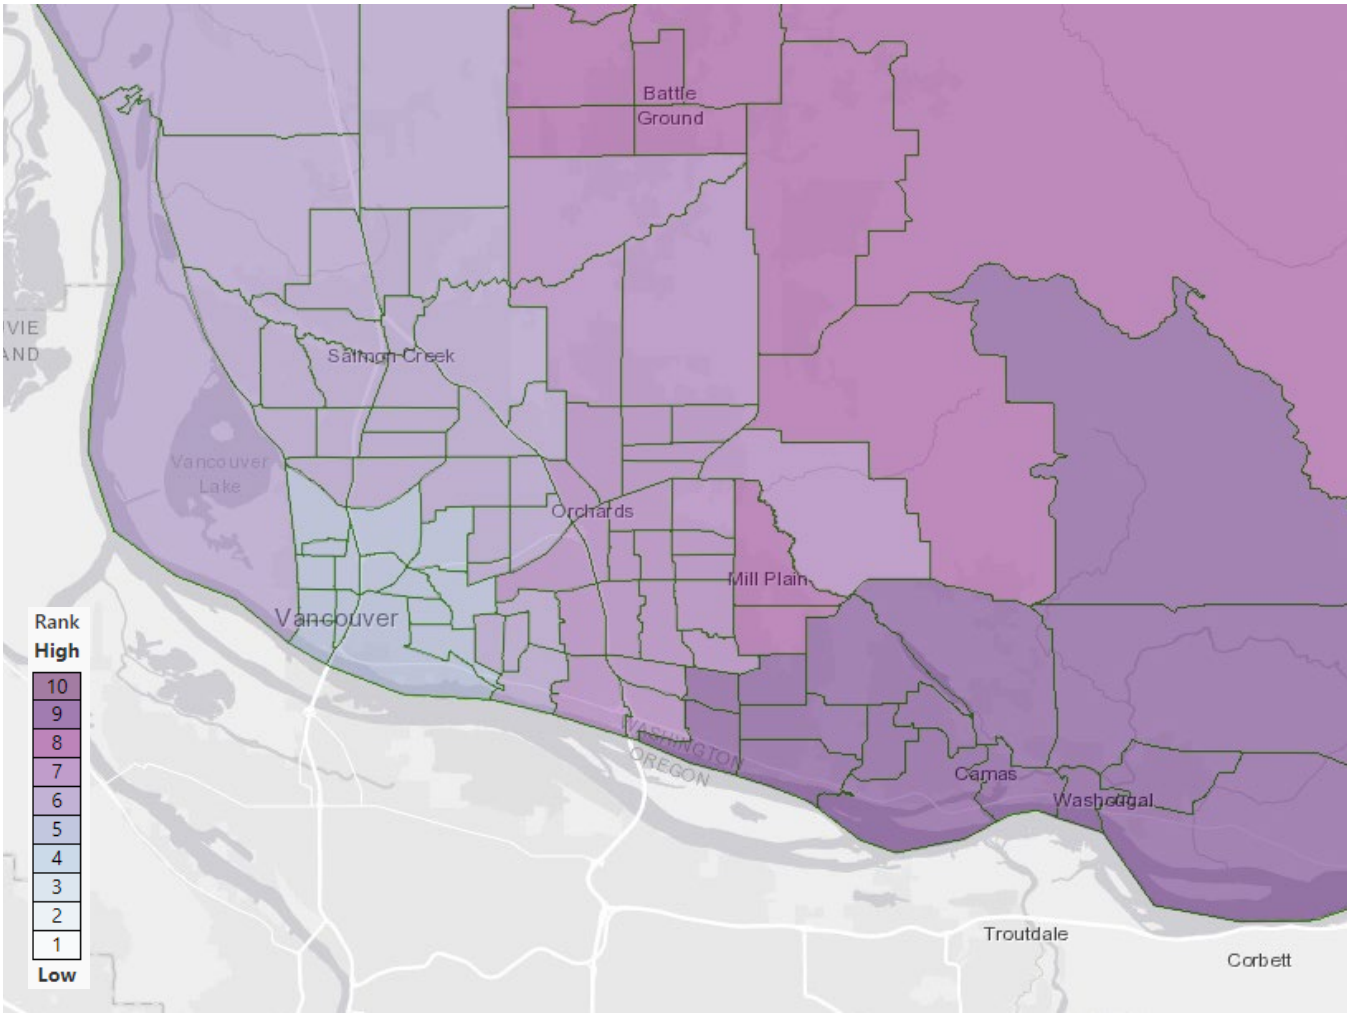
a **Bold numbers** in the table indicate daily concentration above the ozone standard. Note that a daily concentration above the ozone standard does not necessarily indicate an exceedance of the NAAQS.
Ozone standard is exceeded when the annual fourth-highest daily maximum 8-hour concentration, averaged over three years, is greater than 0.070 parts per million.



Section 107 of the 1977 Clean Air Act Amendments requires that the EPA publish a list of all geographic areas in compliance with the NAAQS, plus those not attaining the NAAQS. Areas not in NAAQS compliance are deemed nonattainment areas. Maintenance areas are areas that were previously designated as nonattainment for a particular pollutant but have since demonstrated compliance with the NAAQS for that pollutant. An area's designation is based on the data collected by the state monitoring network on a pollutant-by-pollutant basis.

As summarized in Table 32 and Table 33, concentrations of $PM_{2.5}$ and ozone are approaching the NAAQs. In 2024, Clark County received an "F" grade from the American Lung Association's State of the Air Report, based on elevated $PM_{2.5}$ concentrations from the period 2020-2022 (Design Workshop 2024). However, Clark County received a "C" grade in 2025, based on improved $PM_{2.5}$ concentrations in the period 2021-2024 (American Lung Association 2025).

Vancouver was identified as a community that is overburdened and highly impacted by air pollution by Ecology because of the elevated levels of $PM_{2.5}$ compared to the rest of the state, and the vulnerability of the community to air pollution impacts due to poverty, linguistic isolation, and unaffordable housing (Ecology 2025). This designation was determined based on monitored concentrations of air pollutants, results of state mapping tools that compare communities across the state for environmental health disparities, and federal mapping tools that evaluates the combination of environmental health risks and demographic data.



The Washington Department of Health (DOH) assigns rankings from 1 to 10, where 10 is the highest risk, for various categories of potential health risk, including exposure to $PM_{2.5}$ and ozone. The risk rankings for $PM_{2.5}$ exposure range from 7 to 10 throughout the ~~e~~City and are highest in Central and East Vancouver. The risk rankings for ozone are generally lower citywide, with higher risk levels in East Vancouver. The results of the DOH mapping tool for Vancouver and the surrounding area are shown in ~~Figure 34~~ ~~Figure 34~~ Figure 36 and ~~Figure 35~~ ~~Figure 35~~ Figure 37 (DOH 2022).

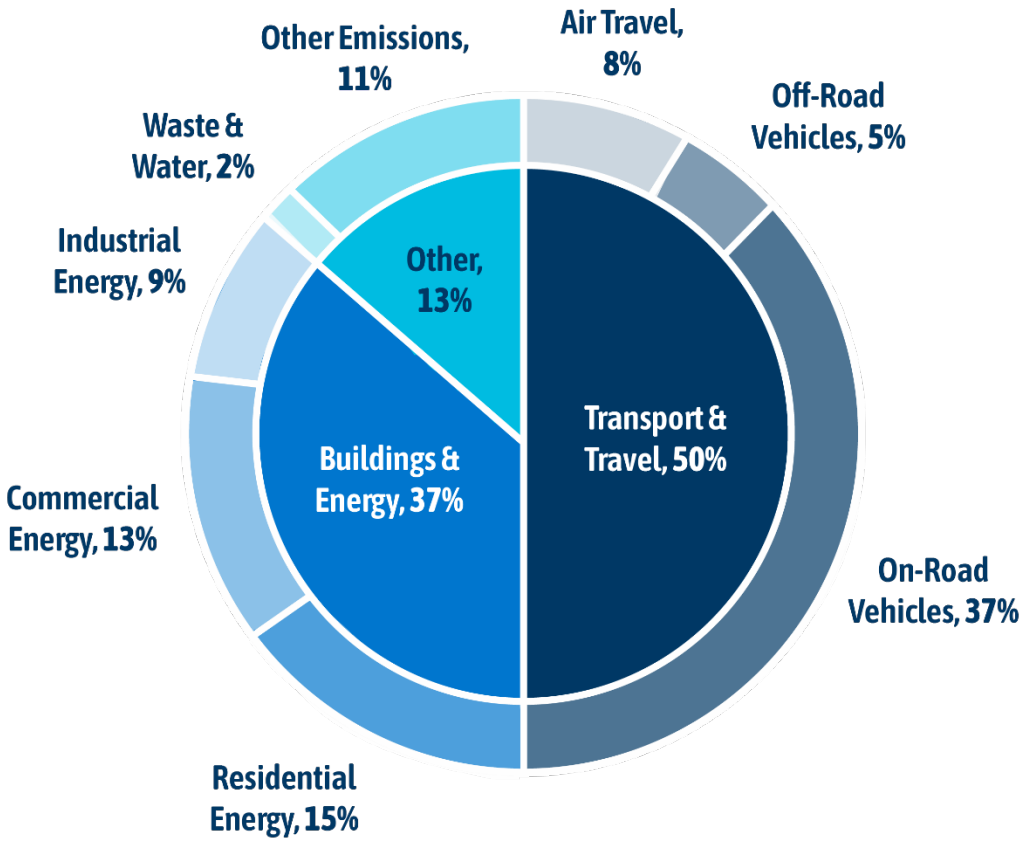
Greenhouse Gas Emissions

Greenhouse gases are evaluated by estimating the emissions from multiple sectors in units of CO_2e. The most recent Washington State Greenhouse Gas Emissions Inventory evaluates the trends in GHG emissions by sector from 1990 to 2019 (Ecology 2022). As shown in ~~Figure 36~~ ~~Figure 36~~ Figure 38, the state has seen a rise in total GHG emissions since 2016, with a majority of the emissions from the transportation and energy sectors.

~~Figure 36~~ Figure 38. Washington's Total Greenhouse Gas Emissions 1990-2019



Source: Ecology 2022

Note: In the chart above, Electricity refers to all electricity consumption, and Res/Com/Ind refers to energy consumption other than electricity by residential, commercial, and industrial sources. $MMTCO_2e$ is million metric tons of carbon dioxide equivalent.

In 2023, about 87% of Vancouver's emissions came from transport and travel and building energy (City of Vancouver 2024d). 2023 is the baseline year of analysis for the Comprehensive Plan Update. As summarized in ~~Figure 37~~ ~~Figure 37~~ Figure 39, major emissions sources included on-road vehicles (37%), followed by residential (15%) and commercial (13%) buildings, with other emissions sources ranging from 2% to 11% of the total.

~~Figure 37~~ Figure 39. City of Vancouver 2023 Greenhouse Gas Inventory by Sector

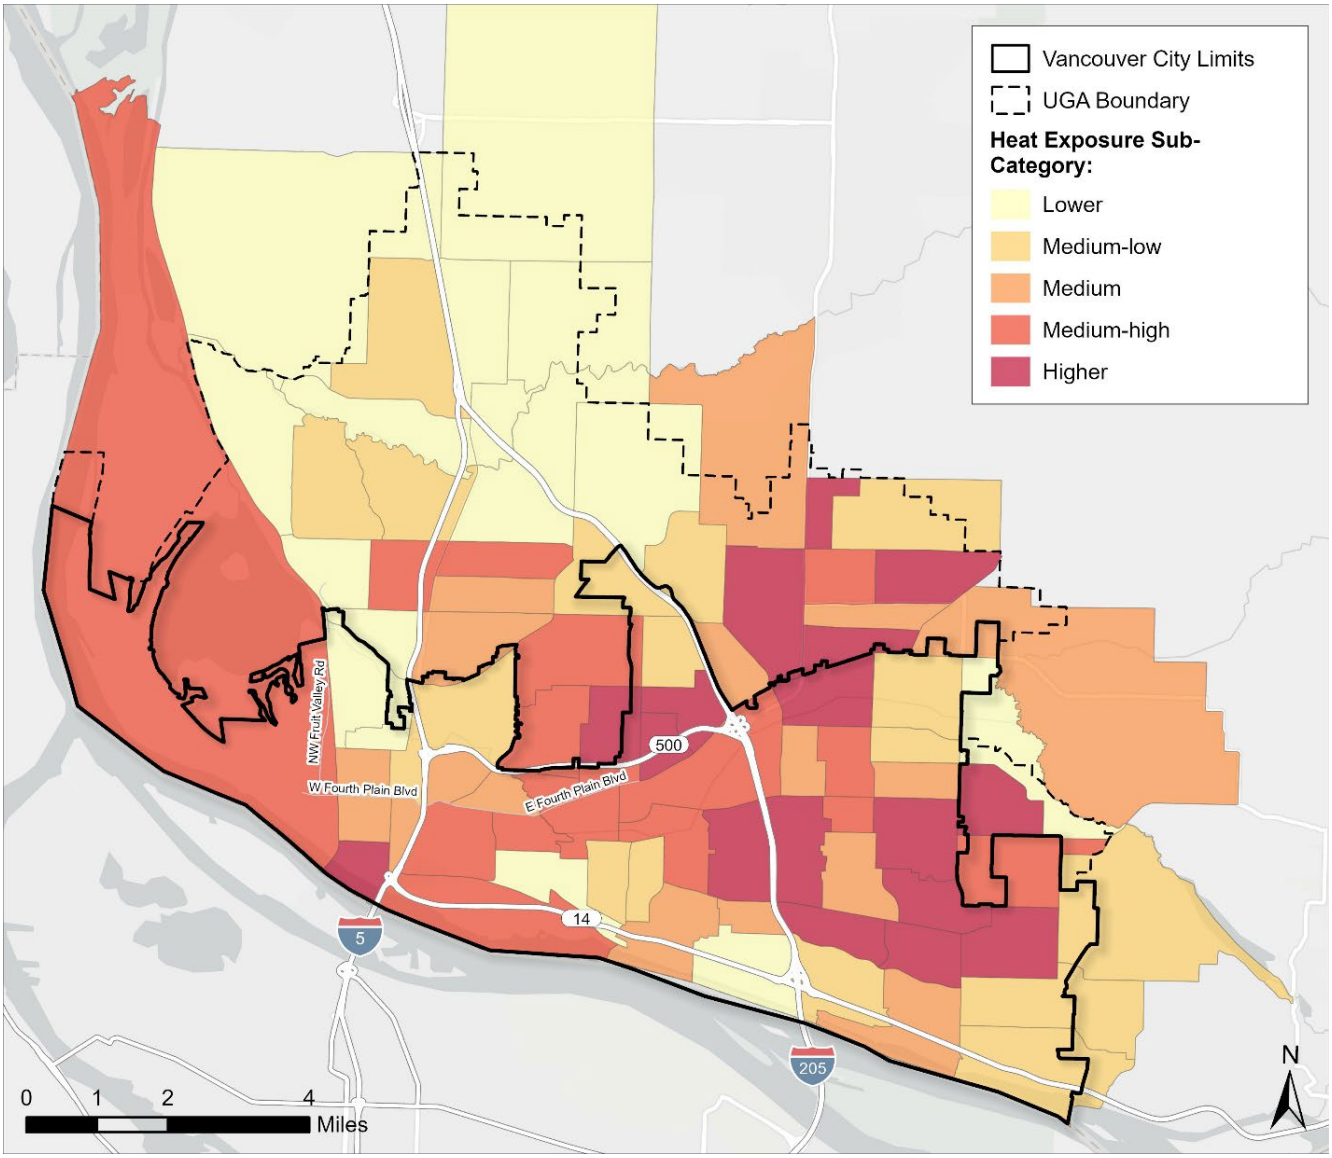
Source: City of Vancouver 2024d

Vancouver's Climate Action Framework sets a goal of achieving carbon neutrality by 2040 by reducing and nearly eliminating carbon pollution from homes, business, vehicles, and City services while enriching parks, green spaces, and other natural systems (City of Vancouver 2022b). Vancouver's GHG emissions declined 27% between 2007 and 2023, despite a growing population and economy (City of Vancouver 2024d). The decreased emissions were a result of the decarbonization of the local electrical grid as well as strengthened fuel efficiency standards for vehicles and increased energy efficiency of buildings and appliances.

Looking toward the future, the Climate Action Framework identifies key focus areas and associated visions, as well as strategies and actions:

- Equity and Green Economy: Vancouver will be a city that embeds equity in climate action, with regular assessments of community vulnerability, a comprehensive anti-displacement policy, and climate strategies and actions that prioritize an equitable distribution of costs

and benefits. Through a just transition, Vancouver will be a city that educates and trains its workers for careers in clean technology, renewable energy, and zero-emission vehicles.



- Buildings and Energy: Vancouver will transition to 100% clean energy and significantly reduce per capita energy use.
- Transportation and Land Use: Vancouver's residents will be able to reach their destinations safely, reliably, and efficiently, however they choose to travel. Zero-emission vehicles will be affordable, common, and easy to charge or fuel. Our neighborhoods will be walkable, mixed-use, and higher-density, with secure affordable housing for current residents.
- Natural Systems and Water Resources: Vancouver's parks, trails, and green spaces will store carbon, connect our neighborhoods, and preserve sensitive land and wildlife. The community will manage water consumption wisely.
- Solid Waste and Wastewater: We will reduce per capita waste by diverting food to those who need it, and by reusing, repairing, recycling, and composting more. We will reduce per capita water usage and operate our wastewater treatment more efficiently.
- City Governance: Vancouver will be a city that embeds climate change in everything we do. We will ensure that staff are knowledgeable and empowered to make sustainable decisions and there is adequate permanent funding to make our low-emissions, resilient vision a reality.

Climate

Vancouver has wet, mild winters and warm, dry summers. Government researchers project that Washington temperatures could increase an average of 4.7 to 10 degrees Fahrenheit by the 2080s due to global climate change, along with a 10% increase in winter precipitation levels, increased frequency and intensity of extreme precipitation events, and more frequent unusually hot summer days (City of Vancouver 2021a; U.S. Global Change Research Program 2023).

As part of climate change resilience work in 2024, a heat exposure index was created to understand summer heat differences across Vancouver and presented in ~~Figure 38~~ Figure 38 Figure 40 (BERK 2025). Block groups with greater heat exposure occur across the city, generally in areas with more impervious (paved) surfaces, such as industrial parks, office parks, shopping centers, and hospitals. The Our Vancouver Health Impact Assessment provides additional information about potential climate risks to health throughout the ~~e~~City (BERK 2025).

~~Figure 38~~ Figure 40. Heat Exposure Index

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following air quality, greenhouse gases, and climate metrics:

- Air pollutant and GHG emissions
- Capacity for new housing in areas with air pollutant exposure risks
- Capacity for new housing and jobs in areas with high temperatures
- Air quality considerations during construction

Impacts Common to All Alternatives

The following sections outline impacts that are expected to occur under all the alternatives. Impacts specific to each alternative are discussed in the next subsections.

Long-term air pollutant and GHG Emissions

Existing sources of air pollutant and GHG emissions within Vancouver include on-road vehicle exhaust, non-road equipment exhaust (including construction equipment, marine vessels, and rail), residential wood burning, and industrial facilities. On-road vehicle and non-road equipment activity are the highest source of GHG and a major contributor to emissions of CO and NO_x. These emissions typically increase with population and commercial growth, which could occur under all alternatives. However, they are expected to be offset to a degree in the future as stricter vehicle and fuel economy standards are phased in, as well as through the continuing transition to electricity and alternative fuels.

Table 34 summarizes the results of modeled 2023 and 2045 daily air pollutant and GHG emissions. The regional transportation model outputs used for the air quality and GHG analysis consider assumptions about future population and employment growth, expected changes in land use, and reasonably foreseeable future transportation projects. Therefore, the air quality and GHG effects analysis accounts not only for potential long-term direct effects but also potential long-term indirect and cumulative effects resulting from the Comprehensive Plan Update.

Although VMT would be higher under all alternatives in 2045 than in 2023, air pollutant and GHG emissions for all alternatives would be substantially lower because of regulations for vehicles and engines that are expected to continue to phase in over time. Daily air pollutant and GHG emissions are expected to be ~~46~~71% lower under the No Action Alternative, ~~41~~68% lower under Alternative 1 and the Preferred Alternative, and ~~39~~67% lower under Alternative 2 compared to existing conditions.[2] VMT would be slightly higher under Alternative 1, ~~and~~ Alternative 2, and the Preferred Alternative than the No Action Alternative, resulting in 10.5% to ~~11.5~~12.7% higher emissions of air pollutants and GHG under the action alternatives compared to the No Action Alternative. Differences in GHG emissions could be offset by the

[2] Note: The percent differences between the alternatives and existing conditions, as well as between the No Action Alternative and Alternative 2, have been updated since the Draft EIS to correct mathematical errors.

climate benefits associated with higher-density development and other actions the City is taking under its Climate Action Framework.

The transportation modeling results, as discussed in the Transportation section of Chapter 3, indicated minimal differences in transportation mode choices between alternatives, with active transportation modes continuing to compose a small share (approximately 10%) of trips in the future. However, Alternatives 1 and 2 and the Preferred Alternative would encourage a walkable, compact, and mixed-use style of development in more areas of the ~~e~~City than the No Action Alternative. Therefore, over time, Alternatives 1 and 2 and the Preferred Alternative would be more likely to shift vehicle trips to zero-emission modes, facilitate shorter vehicle trips, and support further reductions of air pollutants and GHG emissions.

Table 34. Modeled 2045 Daily Air Pollutant and GHG Emissions from Vehicle Exhaust

Alternative/ Topic	VMT (miles/ day)[a]	CO Emissions (pounds/day)	NO_X Emissions (pounds/day)	PM_{10} Emissions (pounds/day)	$PM_{2.5}$ Emissions (pounds/day)	GHG Emissions (metric tons CO_{2e}/day)
Existing Conditions	4,315,718	16.86	3.34	0.23	0.11	2,467
No Action[b]	5,327,928	4.86	0.44	0.13	0.04	1,326
Alternative 1	5,885,872	5.37	0.49	0.14	0.04	1,465
Alternative 2	6,006,556	5.48	0.50	0.14	0.04	1,495
Preferred Alternative (2045)	5,905,133	5.39	0.49	0.14	0.04	1,470
Difference between Alternative 1 and No Action	10.5%	10.5%	10.5%	10.5%	10.5%	10.5%
Difference between Alternative 2 and No Action	12.7%	12.7%	12.7%	12.7%	12.7%	12.7%
Difference between Preferred Alternative and No Action	10.8%	10.8%	10.8%	10.8%	10.8%	10.8%

Notes: This table was reformatted to better fit the page and updated since the Draft EIS to include Preferred Alternative data and correct errors in percentage changes between Alternative 2 and the No Action Alternative. Refer to the strikeout table below for the previous version.

a VMT provided by RTC regional travel demand model outputs (RTC 2025, 2026)

b The No Action Alternative is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 and the Preferred Alternative include assumptions related to market feasibility and redevelopment.

Key: CO = carbon monoxide, CO_2e = carbon dioxide equivalent, GHG = greenhouse gases, NO_X = oxides of nitrogen, $PM_{2.5}$ = particulate matter 2.5 microns or less in diameter, PM_{10} = particulate matter 10 microns or less in diameter

Metric	Existing Conditions (2023)	No Action[b] (2045)	Alternative 1 (2045)	Alternative 2 (2045)	Difference between Alternative 1 and No Action	Difference between Alternative 2 and No Action
VMT (miles/day)[a]	4,315,718	5,327,928	5,885,872	6,006,556	10.5%	11.5%
CO Emissions (pounds/day)	16.86	4.86	5.37	5.48	10.5%	11.5%
NO_x Emissions (pounds/day)	3.34	0.44	0.49	0.50	10.5%	11.5%
PM_{10} Emissions (pounds/day)	0.23	0.13	0.14	0.14	10.5%	11.5%
$PM_{2.5}$ Emissions (pounds/day)	0.11	0.04	0.04	0.04	10.5%	11.5%
GHG Emissions (metric tons CO_2e/day)	2,467	1,326	1,465	1,495	10.5%	11.5%

Anticipated new growth and development would require increased energy use of natural gas and electricity under all alternatives. There are no direct emissions of GHG from electricity use; however, there are emissions associated with the generation of that electricity. Although overall electricity use is expected to increase with future growth, overall GHG emissions from electricity generation are expected to decline in the future as Washington transitions to a carbon-free electricity supply by 2045. Quantifying the potential increase in GHG emissions associated with new buildings would require specific details about proposed residency types and commercial square footage for each alternative, which are not available at the planning level of this analysis. Future analyses would be conducted as applicable through project-specific SEPA analysis.

Capacity for new housing in areas with air pollutant exposure risks

Based on the projected distribution of growth and development across the city, all alternatives would include capacity for new housing units in areas with a higher risk for

exposure to air pollutants, as shown in Table 35 and Table 36. However, as noted in the previous section, emissions of $PM_{2.5}$ for all alternatives would be substantially lower because of regulations for vehicles and engines that are expected to continue to phase in over time. Therefore, the future risk exposure may not be as high.

Table 35. Estimated Capacity for New Housing Units in Areas with High $PM_{2.5}$ Exposure Risk

Metric	No Action Alternative	Alternative 1	Alternative 2	Preferred Alternative
Projected Capacity for New Housing Units in Areas with High $PM_{2.5}$ exposure risk	10,100[a]	8,000	9,700	8,200
Percent of Total Projected Capacity for New Housing Units	34%[a]	18%	19%	17%

Source: BERK 2025

Note:
a The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

Table 36. Estimated Capacity for New Housing Units in Areas with Ozone Concentration Risk

Metric	No Action Alternative	Alternative 1	Alternative 2	Preferred Alternative
Projected Capacity for New Housing Units in Areas with Ozone Concentration Risk	4,800[a]	15,100	16,700	14,900
Percent of Total Projected Capacity for New Housing Units	16%[a]	33%	33%	31%

Source: BERK 2025

Note:
a The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

Capacity for new housing and jobs in areas with heat islands

All alternatives would also include capacity for new housing units and jobs in heat islands, defined as areas with Medium-High or Higher heat exposure scores in the City's Climate Index

(refer to ~~Figure 38~~ ~~Figure 38~~ Figure 40). Table 37 summarizes the capacity across alternatives (BERK 2025).

Table 37. Estimated Capacity for New Housing Units and Jobs in Heat Islands

Metric	No Action Alternative	Alternative 1	Alternative 2	Preferred Alternative
Projected Capacity for Housing Units in Heat Islands	14,400[a]	22,400	20,800	17,100
Percent of Total Projected Capacity for New Housing Units	49%[a]	50%	41%	35%
Projected Capacity for New Jobs in Heat Islands	11,500[a]	27,600	30,700	23,800
Percent of Total Projected Capacity for New Jobs	39%[a]	61%	61%	53%

Source: BERK 2025

Note:
a The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

Air quality and GHG considerations during construction

Under all alternatives, some construction work activities (particularly those involving paving operations using asphalt) could result in short-term odors, which could be detectable to some people near construction sites and would be diluted as distance from the site increases.

All alternatives would lead to new construction or redevelopment, which would result in short-term emissions of GHG and air pollutants from worker commutes and construction vehicle exhaust. Particulate matter could also be generated where soil would be disturbed by ground clearing and preparation, stockpiling of materials, and by construction vehicles tracking soil from sites onto area streets where other vehicles could stir up and release fugitive dust. Construction of any stationary sources of air emissions, including industrial facilities or services that require industrial-scale combustion equipment will be regulated by Southwest Clean Air Agency and complete their own SEPA process.

Construction activities are also likely to require temporary diesel-fired generators to provide power for electric equipment, which produce emissions of air pollutants and GHG. Southwest

Clean Air Agency should be consulted when construction projects that require the use of temporary generators to determine whether any air permits are required. Disruption of traffic during construction (such as a temporary reduction of roadway capacity and increased queue lengths) could result in short-term, elevated concentrations of pollutants from slowed or idling vehicles. Although emissions from construction projects would be temporary, it is anticipated that varying levels of construction would occur under all of the alternatives that could cumulatively contribute to construction-related air pollutant and GHG emissions citywide.

No Action Alternative

Long-term air pollutant and GHG Emissions

No additional effects were identified for the No Action Alternative beyond those discussed in the Impacts to All Alternatives section. The No Action Alternative is modeled to have slightly lower emissions than Alternative 1 and 2 and the Preferred Alternative because of lower projected VMT (associated with lower growth capacity) and about ~~46~~71% lower emissions than existing conditions. However, the No Action Alternative would retain lower-density zoning districts and a less compact, walkable urban form. Therefore, the No Action Alternative would be less likely than Alternatives 1 and 2 and the Preferred Alternative to shift trips to zero-emission modes over time and facilitate shorter vehicle trips, and would not help to support further reductions of air pollutant and GHG emissions.

Capacity for new housing in areas with air pollutant exposure risks

No additional effects were identified for the No Action Alternative beyond those discussed in the Impacts to All Alternatives section. There would be a slightly higher capacity for new housing units in areas with high $PM_{2.5}$ than ~~the action alternatives~~ under Alternatives 1 and 2 and the Preferred Alternative and a lower capacity for new housing units in areas with ozone exposure risk than under Alternatives 1 and 2 and the Preferred Alternative.

Capacity for new housing and jobs in areas with heat islands

No additional effects were identified for the No Action Alternative beyond those discussed in the Impacts to All Alternatives section. Consistent with the lower overall capacity for housing units and jobs under the No Action Alternative, there would be lower capacity for new housing units and jobs in areas with heat islands than under Alternatives 1 and 2 and the Preferred Alternative.

Air quality and GHG considerations during construction

No additional effects were identified for the No Action Alternative beyond those discussed in the Impacts to All Alternatives section. The No Action Alternative would have the lowest potential for construction-related air quality impacts of all the alternatives because it would have the lowest capacity for new housing units, jobs, and associated new development.

Alternative 1

Long-term air pollutant and GHG Emissions

No additional effects were identified for Alternative 1 beyond those discussed in the Impacts to All Alternatives section. Emissions for Alternative 1 are modeled to be slightly higher than the No Action Alternative and similar to Alternative 2 and the Preferred Alternative because of higher projected VMT but about ~~41~~71% lower than existing conditions. However, Alternative~~s~~ 1 would encourage a more walkable, compact style of development than the No Action Alternative but proposes fewer high-density areas than Alternative 2. Therefore, Alternative 1 would be more likely to shift vehicle trips to zero-emission modes, facilitate shorter vehicle trips, and support further reductions of air pollutant and GHG emissions over time than the No Action Alternative but less likely to do so than Alternative 2.

Capacity for new housing in areas with air pollutant exposure risks

No additional effects were identified for Alternative 1 beyond those discussed in the Impacts to All Alternatives section. There would be a similar capacity for new housing units in areas with high $PM_{2.5}$ across all alternatives. Alternative 1 would have a higher capacity for new housing units in areas with high ozone exposure risk than the No Action Alternative, ~~and~~ a lower capacity than Alternative 2, and similar capacity compared to the Preferred Alternative.

Capacity for new housing and jobs in areas with heat islands

No additional effects were identified for Alternative 1 beyond those discussed in the Impacts to All Alternatives section. Alternative 1 would have a higher capacity for new housing units in urban heat islands than the No Action Alternative, ~~and~~ Alternative 2 and the Preferred Alternative, ~~but~~ and a lower capacity for new jobs in these areas than Alternative 2.

Air quality and GHG considerations during construction

No additional effects were identified for Alternative 1 beyond those discussed in the Impacts to All Alternatives section. Alternative 1 would have a higher potential for construction-related air quality and GHG emissions impacts than the No Action Alternative because it would have a higher capacity for new housing units, jobs, and associated new development. These impacts would be similar to Alternative 2 and the Preferred Alternative.

Alternative 2

Long-term air pollutant and GHG Emissions

No additional effects were identified for Alternative 2 beyond those discussed in the Impacts to All Alternatives section. Emissions for Alternative 2 are modeled to be ~~11.5~~12.7% higher than the No Action Alternative and similar to Alternative 1 and the Preferred Alternative because of higher projected VMT. However, Alternative 2 would encourage a walkable, compact, and

mixed-use style of development in the most parts of the ~~c~~City compared to the No Action Alternative and Alternative 1. Therefore, Alternative 2 would be the most likely to shift vehicle trips to zero-emission modes, facilitate shorter vehicle trips, and support further reductions of air pollutant and GHG emissions.

Capacity for new housing in areas with air pollutant exposure risks

No additional effects were identified for Alternative 2 beyond those discussed in the Impacts to All Alternatives section. There would be a similar capacity for new housing units in areas with high $PM_{2.5}$ across all alternatives. Alternative 2 would have the highest capacity for new housing units in areas with high ozone exposure risk.

Capacity for new housing and jobs in areas with heat islands

No additional effects were identified for Alternative 1 beyond those discussed in the Impacts to All Alternatives section. Alternative 2 would have a lower capacity for new housing units in urban heat islands than ~~the No Action Alternative and~~ Alternative ~~2~~1, but ~~a~~the highest~~r~~ capacity for new jobs in these areas.

Air quality and GHG considerations during construction

No additional effects were identified for Alternative 2 beyond those discussed in the Impacts to All Alternatives section. Alternative 2 would have the highest potential for construction-related air quality and GHG emissions impacts because it would have the highest capacity for new housing units, jobs, and associated new development. However, these impacts are likely to be similar to Alternative 1.

Preferred Alternative

Long-term air pollutant and GHG Emissions

No additional effects were identified for the Preferred Alternative beyond those discussed in the Impacts to All Alternatives section. Emissions for the Preferred Alternative are modeled to be slightly higher than the No Action Alternative and similar to Alternatives 1 and 2 because of higher projected VMT but about 68% lower than existing conditions. The Preferred Alternative would encourage a more walkable, compact style of development than the No Action Alternative but would propose modestly fewer high-density areas than Alternative 2. Therefore, the Preferred Alternative would be more likely to shift vehicle trips to zero-emission modes, facilitate shorter vehicle trips, and support further reductions of air pollutant and GHG emissions over time than the No Action Alternative but would be modestly less likely to do so than Alternative 2.

Capacity for new housing in areas with air pollutant exposure risks

No additional effects were identified for the Preferred Alternative beyond those discussed in the Impacts to All Alternatives section. There would be a similar capacity for new housing

units in areas with high $PM_{2.5}$ across all alternatives. The Preferred Alternative would have a higher capacity for new housing units in areas with high ozone exposure risk than the No Action Alternative and a lower capacity than Alternatives 1 and 2.

Capacity for new housing and jobs in areas with heat islands

No additional effects were identified for the Preferred Alternative beyond those discussed in the Impacts to All Alternatives section. The Preferred Alternative would have a higher capacity for new housing units and jobs in urban heat islands than the No Action Alternative. However, the Preferred Alternative would have a lower capacity for new housing units and jobs in urban heat islands than Alternatives 1 and 2.

Air quality and GHG considerations during construction

No additional effects were identified for the Preferred Alternative beyond those discussed in the Impacts to All Alternatives section. The Preferred Alternative would have a higher potential for construction-related air quality and GHG emissions impacts than the No Action Alternative because it would have a higher capacity for new housing units, jobs, and associated new development. These impacts would be similar to Alternatives 1 and 2.

Avoidance, Minimization, and Mitigation Measures

Future air pollutant emissions under all alternatives are expected to be lower than existing emissions due to improvements in vehicle technology and stricter fuel and engine regulations. Although Alternatives 1 and 2 and the Preferred Alternative would produce more air pollutant and GHG emissions than the No Action Alternative, the EPA has not established thresholds for determining significant air quality impacts in attainment areas. Therefore, no specific mitigation measures are required. Strategies to minimize vehicle emissions include actions that continue Vancouver's efforts to encourage mode shift away from driving alone (e.g., transit improvements, active transportation infrastructure, carpooling incentives) and actions that encourage the transition to alternative fuels (e.g., electric vehicle charging stations).

Similarly, future GHG emissions under all alternatives would be lower than existing conditions due to the ongoing decarbonization of the electricity supply. Although Alternatives 1 and 2 and the Preferred Alternative would result in slightly higher GHG emissions from energy use as compared to the No Action Alternative, there are no established thresholds to define a significant impact to GHG emissions. Therefore, no specific mitigation measures are required. Strategies to minimize energy-related emissions include actions that encourage energy efficiency and the transition away from natural gas.

Vancouver's Climate Action Plan outlines specific actions to minimize emissions from transportation sources, buildings and energy use, as described in the Affected Environment subsection.

In addition, implementation of the following policy measures ~~currently under consideration~~ for the Comprehensive Plan Framework would also help to avoid, minimize, and mitigate potential air quality, greenhouse gases, and climate impacts identified for the action alternatives:

- Improve indoor air quality for residents most susceptible to negative impacts from exposure to particulates, CO, nitrogen dioxide, and lead.
- Reduce emissions from buildings, structures, and infrastructure in the community.
- Avoid siting new housing near known stationary sources of air, water, heat and light pollution, and facilitate site and building design that mitigates impacts from stationary pollution sources for both new and existing housing.
- Minimize impacts of the urban heat island effect, reduce temperature disparities for equity priority neighborhoods, and safeguard vulnerable populations from the adverse effects of extreme heat through proactive measures.
- Prioritize integrating green infrastructure into new development, redevelopment, replacement of existing infrastructure, and development of public spaces within the City to reduce urban heat island effect.
- Ensure that buildings contribute to the City's greenhouse gas reduction goals, protect occupants from climate hazards and extreme weather, and minimize harm to wildlife and natural ecosystems.
- Expand community solar access for low-income homeowners and renters.
- Retrofit existing infrastructure, parks and natural spaces, and construct new facilities to adapt to the localized impacts that will occur in the community due to climate change.
- Improve active transportation infrastructure ~~particularly~~ in areas with inadequate pedestrian and micromobility infrastructure~~,~~ to increase the share of trips made by foot, bike, or other small mobility devices.
- Adopt new technologies and invest in supportive infrastructure to increase the adoption of electric, hybrid, and alternative fuel vehicles to reduce community emissions.
- Implement land use patterns that reduce VMT, traffic congestion and associated ~~, and~~ greenhouse gas emissions, ~~and~~ while improvinge ~~e~~ safety and air quality.
- Incorporate elements of climate resiliency into new privately and publicly developed public spaces.
- Establish development regulations that incorporate best practices for reducing the risk of wildfire, extreme heat, flooding, and other climate-exacerbated hazards.

- Develop plans and resources to ensure effective emergency response and equal access to emergency services and recovery resources, mitigating risks from ~~extreme weather~~ natural disasters, climate-related hazards, and social ~~hazards~~ disruptions. Build resilience through strong community relationships and trusted local networks.

Significant Unavoidable Adverse Impacts

All of the alternatives have the potential to create impacts to air quality and GHG emissions as a result of expected population growth and development. The anticipated changes would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant unavoidable adverse impacts to air quality or GHG emissions are anticipated for any of the alternatives.

Water

Methodology

Analysts reviewed relevant information and policies to describe existing citywide surface water, flood plains, and groundwater conditions, including the following sources:

- City of Vancouver Shoreline Master Program (City of Vancouver 2021b)
- United States Fish and Wildlife Service (USFWS) National Wetlands Inventory (USFWS 2024)
- EPA Clean Water Act, Clean Water Rule
- Washington State Department of Ecology Water Quality Atlas (Ecology 2024)
- VMC 14.24, Erosion Control
- VMC 14.25, Stormwater Control
- VMC 14.26, Water Resources Protection
- VMC 20.740.120, Frequently Flooded Areas
- VMC 20.740.140, Wetlands

Analysts then reviewed the alternatives to determine potential adverse impacts and associated mitigation measures using the following metrics:

- Potential for increased runoff to surface water bodies and wetland areas
- Potential for increased impacts to groundwater hydrology
- Potential for flooding in areas identified for new growth and development

Affected Environment

Vancouver has an abundance of water resources typical of western Washington, including rivers, streams, lakes, and wetlands. The ~~c~~City contains approximately 2,500 acres of

wetlands and 2,500 acres of water, as shown in ~~Figure 39~~ ~~Figure 39~~ Figure 41 (Design Workshop 2024).

Surface Water

Major surface waters include the Columbia River, Vancouver Lake, and the adjacent lowlands, and Burnt Bridge Creek (City of Vancouver 2021a). These three main waterbodies (Columbia River, Burnt Bridge Creek, and Vancouver Lake) are all considered impaired by pollutants by Ecology (Ecology 2024). The total area subject to the City's SMP is approximately 32,000 acres (50 square miles) (City of Vancouver 2021b). The two primary watersheds within the Vancouver city limits are Burnt Bridge Creek and Columbia Slope; with Vancouver Lake basin at the western boundary, Lacamas Creek watershed to the east, and Salmon Creek watershed to the north. All Vancouver watersheds ultimately drain into the Columbia River (City of Vancouver n.d.[a]).

Frequently Flooded Areas

Frequently flooded areas are areas of special flood hazard identified by the Federal Insurance Administrator and the Federal Emergency Management Agency (FEMA) (VMC 20.740.120). FEMA maintains flood maps that help to inform where locations of flood hazard occur. In Vancouver, flood hazards predominately exist along the banks of the Columbia River and its associated floodplain, surrounding Vancouver Lake and its associated floodplain, and within the floodplain of Burnt Bridge Creek, as shown in ~~Figure 39~~ ~~Figure 39~~ Figure 41 (Design Workshop 2024). Vancouver's floodplain is concentrated at the western edge of the city. The alluvial floodplain contains mostly marshes and hardwoods, while the upland floodplain includes various substantial woodlands of 20 to 30 acres or more (City of Vancouver 2022a).

Groundwater

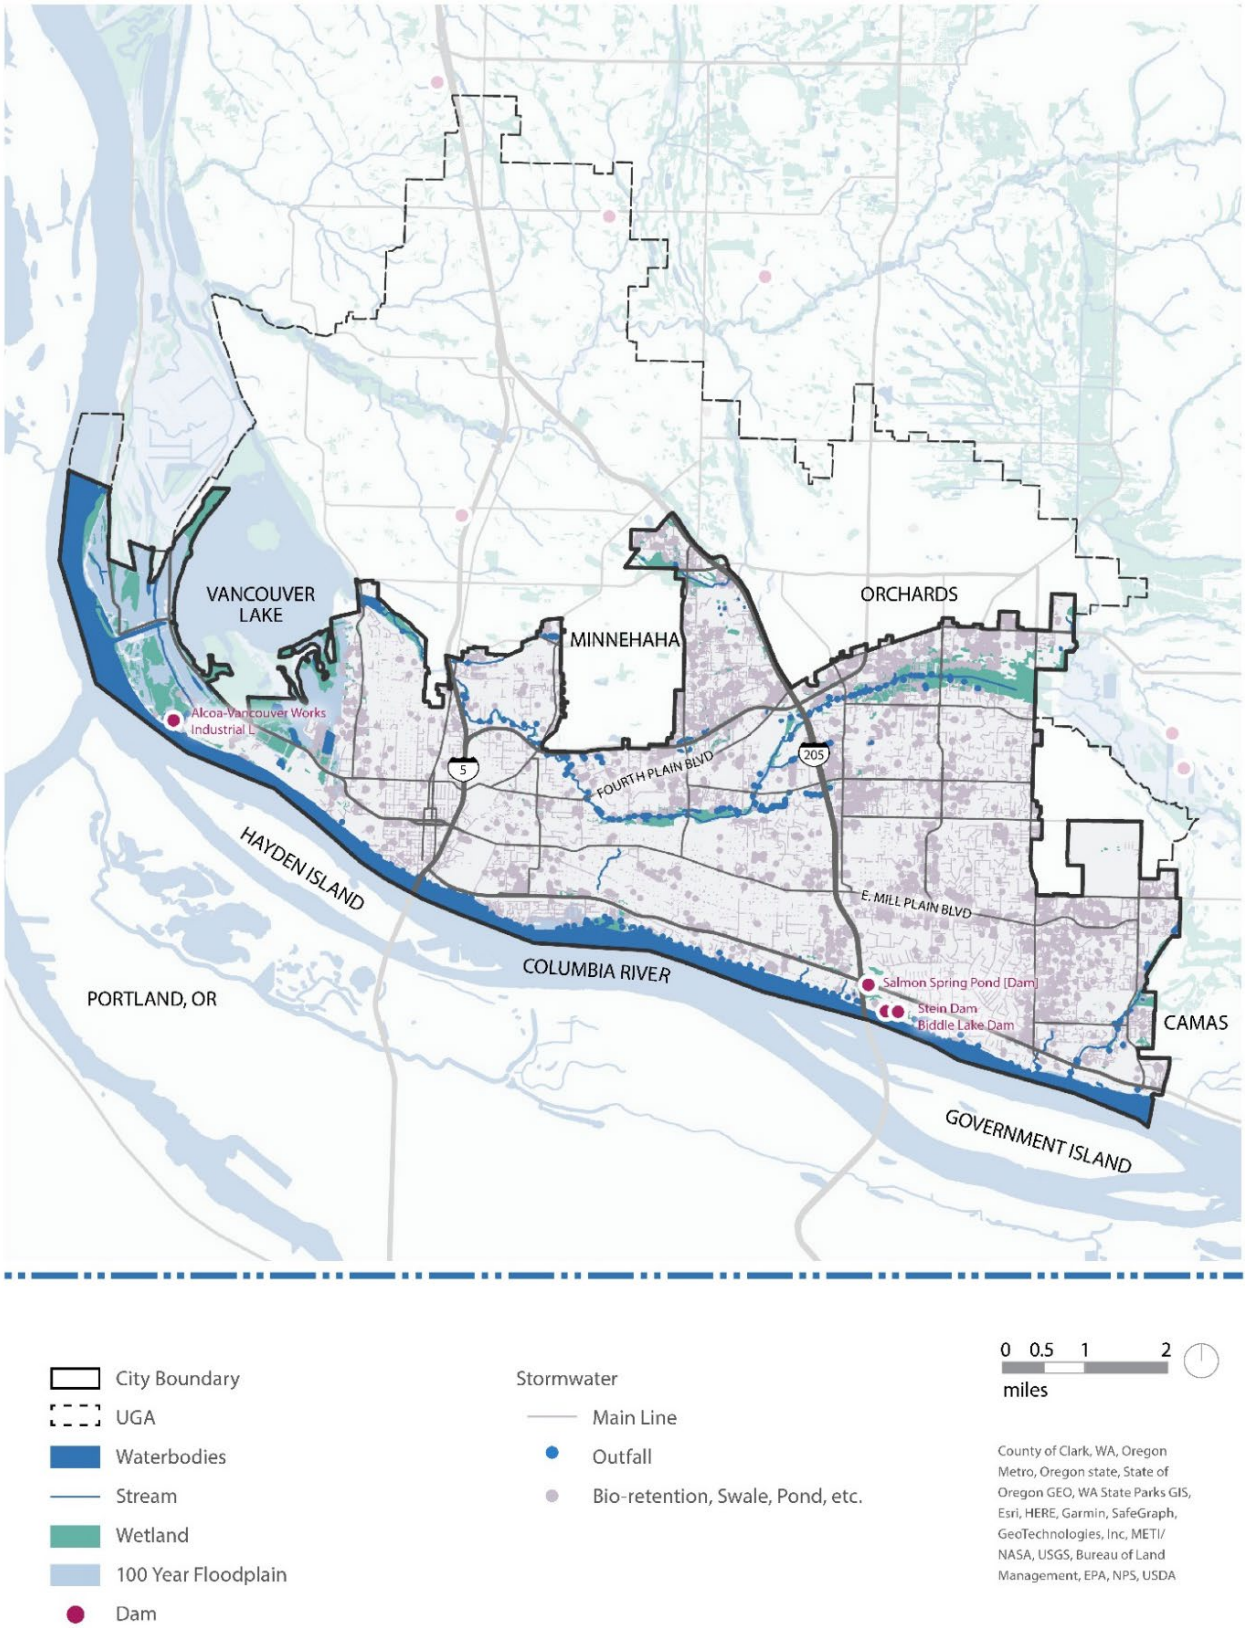
All Vancouver drinking water comes from local groundwater (City of Vancouver n.d.[b]). Vancouver gets its drinking water, or potable water, from wells tapping three distinct regional underground aquifers – the Orchards, Troutdale and Sand-and-Gravel aquifers. These aquifers make up the Troutdale Aquifer System, which covers most of Clark County. The groundwater system was designated a sole source aquifer in 2006 (City of Vancouver n.d.[b]). EPA defines a sole source aquifer as one where (a) the aquifer supplies at least 50% of the drinking water for its service area and (b) there are no reasonable alternative drinking water sources if the aquifer becomes contaminated (EPA n.d.[a]).

Critical Aquifer Recharge Areas

Per VMC 14.26, the entire area within the boundary of Vancouver is designated as a Critical Aquifer Recharge Area. This designation recognizes the importance and vulnerability of Vancouver's drinking water aquifers and serves to protect and preserve the municipal water supply.

Stormwater

Vancouver's overall goal is to promote stormwater drainage designs that help maintain or improve surface and groundwater quality. In general, stormwater runoff drains to catch basins, storm drains, and roadside ditches. ~~Figure 39~~ ~~Figure 39~~ Figure 41 shows the location of stormwater lines, outfalls, and features throughout the city. The preferred approach to stormwater management is to require property owners to retain stormwater on site and treat it, often utilizing vegetated areas to filter and absorb pollutants (City of Vancouver 2021a). Runoff is collected and conveyed into larger storm drains within the major streets, and discharges into local creeks and drainage tributaries or infiltrates into the soils on site. Stormwater facilities are distributed throughout the ~~e~~City (City of Vancouver 2023d). The geology for most of the ~~e~~City allows stormwater to infiltrate on site, allowing sites to develop and provide water quality treatment and discharge to stand-alone infiltration systems.



Wetlands

Wetlands are among the most productive ecosystems in the world, comparable to rain forests and coral reefs, and include areas where water covers soil for all or part of the year such as marshes, swamps, bogs, and fens (EPA n.d.[b]) Wetland functions are influenced by physical, chemical, and biological processes that occur within a wetland and the surrounding landscape. They provide essential ecological services including water filtration, shoreline stabilization, groundwater recharge, and climate resiliency. Wetland processes can alleviate flooding, improve stormwater control, provide erosion protection, and improve water quality valuable to the conservation and preservation of aquatic resources.

Wetland habitats are protected by several laws overseen by federal, state, and local agencies, and tribes. VMC, SEPA, and federal National Environmental Policy Act establish environmental regulations and procedures to regulate the development and use of land.

Vancouver contains over 2,467 acres of area mapped as wetlands according to the USFWS National Wetlands Inventory (USFWS 2024). Notable wetlands include the Water Resources Education Center Wetlands along the Columbia River, the restored wetlands in the Burnt Bridge Creek Greenway, and those surrounding Vancouver Lake, as shown in ~~Figure 39~~ ~~Figure 39~~ Figure 41.

~~Figure 39~~ Figure 41. Water Resources

Source: Design Workshop 2024

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following water-related metrics:

- Potential for increased runoff to surface water bodies and wetland areas
- Potential for increased impacts to groundwater hydrology
- Potential for flooding in areas identified for new growth and development

Impacts Common to All Alternatives

The following sections outline impacts that are expected to occur under all the alternatives. Impacts specific to each alternative are discussed in the next subsections.

Potential for Increased Runoff to Surface Water Bodies and Wetland Areas

All alternatives would lead to new construction or redevelopment, which would increase the amount of new impervious surfaces, including rooftops, driveways, sidewalks, parking lots, and compacted soils. Impervious surfaces in urban areas reduce natural infiltration of water into soils and increase surface water runoff, which can change the way that water and pollutants travel to urban streams and lead to increased erosion (EPA 2024a). Incremental development over time could also result in direct, indirect, and cumulative impacts to wetland hydrology, degradation during construction, and temporary or permanent loss of wetland habitat.

New development under all alternatives would be subject to current and future proposed regulations that may require improvements to stormwater management or critical area restoration as new development occurs. These requirements could have cumulative benefits for water resources, especially in areas of the City where stormwater management and other water resources protections do not meet current standards.

Potential for Increased Impacts to Groundwater Hydrology

Under all alternatives, increased impervious surface area and soil compaction could decrease opportunities for infiltration and groundwater recharge, affect natural drainage patterns, and prevent precipitation from recharging groundwater aquifers.

Groundwater could be impacted during standard construction activities, such as excavation, grading, and placement of foundations. Contaminated soil and/or groundwater could be encountered during excavation when properties are redeveloped under any of the alternatives. Some land uses are known to have a higher risk of groundwater contamination than other land uses, such as automotive facilities, dry cleaning facilities, municipal landfills, and some industrial or agricultural uses.

Potential for Flooding in Areas Identified for New Growth and Development

None of the alternatives would directly encourage new development in areas identified as frequently flooded areas. However, increases in the amount of impervious surfaces, as discussed in the previous sections, and more extreme weather events related to climate change could lead to increased flooding in the future under all alternatives.

No Action Alternative

In general, there would be minimal additional impacts under the No Action Alternative aside from those described in the Impacts Common to All Alternatives section. The No Action Alternative would be consistent with City regulations and would apply the updated CAO provisions for water resources.

Because the No Action Alternative would have less capacity for new housing and jobs, it may result in lower levels of new construction and/or redevelopment and associated increases in impervious surfaces, compared to Alternatives 1 and 2 and the Preferred Alternative. However, the No Action Alternative would encourage continuation of a less dense, more dispersed style of urban development. In the longer term, this type of development pattern could potentially increase pressure to develop more individual sites, which could result in increased impervious surfaces.

Alternative 1

In general, there would be minimal additional impacts under Alternative 1 aside from those described in the Impacts Common to All Alternatives section. Alternative 1 would be consistent with City regulations and would be subject to the updated CAO provisions for water resources.

Alternative 1 would allow for more dense development and would have greater capacity for new housing units and jobs, which would likely result in higher levels of new construction and/or redevelopment and the associated increases in impervious surfaces that affect runoff and water resources, compared to the No Action Alternative. However, this development would be more concentrated in higher-density zoning districts, which could result in lower levels of impervious surfaces throughout the ~~e~~City than the No Action Alternative.

Alternative 2

In general, there would be minimal additional impacts under Alternative 2 aside from those described in the Impacts Common to All Alternatives section. Alternative 2 would be consistent with City regulations and would be subject to the updated CAO provisions for water resources.

Alternative 2 would have similar impacts to Alternative 1 and the Preferred Alternative related to water resources. However, because Alternative 2 would have options for more density and larger-scale buildings in more areas of the city, it would have greater potential than Alternative 1, the Preferred Alternative and the No Action Alternative to increase impervious surface areas, which could affect runoff to water resources. However, like Alternative 1 and the Preferred Alternative, this development would be more concentrated in higher-density zoning districts, which could result in lower overall impervious surface areas throughout the ~~c~~City than the No Action Alternative.

Preferred Alternative

In general, there would be minimal additional impacts under the Preferred Alternative aside from those described in the Impacts Common to All Alternatives section. The Preferred Alternative would be consistent with City regulations and would be subject to the updated Critical Areas Ordinance (CAO) provisions for water resources.

The Preferred Alternative would have similar impacts to Alternatives 1 and 2 related to water resources. Similar to Alternatives 1 and 2, the Preferred Alternative would allow for more dense development and would have greater capacity for new housing units and jobs, which would likely result in higher levels of new construction and/or redevelopment and the associated increases in impervious surfaces that affect runoff and water resources, compared to the No Action Alternative. However, this development would be more concentrated in higher-density zoning districts, which could result in lower levels of impervious surfaces throughout the City than the No Action Alternative.

Avoidance, Minimization, and Mitigation Measures

Regardless of alternative, all future development projects will be required to adhere to local, state, and federal policies and regulations that protect surface water and groundwater resources, as well as protect public health and safety from flood hazards.

Development in frequently flooded areas and floodplains, such as those located along the Columbia River and in West Vancouver, will remain subject to VMC 20.40.120.

New development will also be required to comply with the City's Water Resources Protection Ordinance (VMC 14.26). This ordinance is currently being updated to address provisions of the Critical Aquifer Recharge Area regulations.

All development projects will be required to provide stormwater capture and conveyance on site in accordance with VMC 14.25 and 14.26.

New development will also be subject to the wetland regulations under VMC 20.740.140, including revised wetland buffer width requirements. With the December 2024 updates to VMC 20.740.140, about 4% more of the City's land area would be regulated as wetlands and subject to additional protections under all alternatives, which would benefit these water resources.

In addition, implementation of the following policy measures ~~currently under consideration~~ for the Comprehensive Plan Update would also help to avoid, minimize, and mitigate potential impacts to water resources identified for the action alternatives:

- Improve ~~local~~ water quality and reduce flood risk by reducing stormwater ~~runoff~~ flows, promoting natural groundwater infiltration ~~to groundwater~~, reducing runoff, and advancing effective stormwater management system that protect watersheds. ~~and restoring riparian areas.~~
- Provide safe, clean, quality drinking water to every Vancouver home, business, and industry. Discourage development and use of private drinking water wells. Provide water pressures and volumes necessary to support fire suppression hydrants and sprinkler systems. Ensure that the infrastructure to support water service is in place prior to or at the time of development. Support water conservation recycle systems where practicable.
- Prioritize integrating green infrastructure into new development, redevelopment, replacement of existing infrastructure, and development of public spaces within the City to improve stormwater quality.
- Protect existing Critical Areas within the City, and Shorelines of Statewide Significance, and ensure no net loss of ecological functions through avoidance of impacts, conservation design principles, and compensatory mitigation when loss of ecological function cannot be avoided.
- Support restoration and enhancement of Critical Areas by private landowners, or through City/nonprofit acquisition and other initiatives.

The proposed updates to zoning and development regulations would also help to avoid, minimize and mitigate impacts to water through elements such as minimum open space requirements and maximum impervious area requirements based on building types.

Significant Unavoidable Adverse Impacts

All of the alternatives have the potential to create impacts to water resources as a result of expected population growth and development. The anticipated changes would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant unavoidable adverse impacts to water resources are anticipated for any of the alternatives.

Plants and Animals

Methodology

Analysts reviewed relevant information and policies to describe existing citywide conditions for plants, fish, and other wildlife, including the following sources:

- City of Vancouver Urban Forestry Management Plan (City of Vancouver 2023e)
- Clark County Maps Online Geographic information system Mapping Tool
- Endangered Species Act
- Our Vancouver Health Impact Assessment (BERK 2025)
- USFWS Information for Planning and Consultation mapping tool (USFWS 2024)
- VMC 12.04, Street Trees
- VMC 20.740.100, Habitats of Local Importance
- VMC 20.740.110, Fish and Wildlife Habitat Conservation Areas
- VMC 20.740.140, Wetlands
- VMC 20.770, Tree, Vegetation, and Soil Conservation
- Washington Department of Fish and Wildlife (WDFW) Priority Habitat and Species List (WDFW 2024)
- WDFW Anadromous and Resident Salmonid Distribution Maps in the Salmon and Steelhead Habitat Inventory Assessment Program

Analysts then reviewed the alternatives to determine potential adverse impacts and associated mitigation measures using the following metrics:

- Potential impacts to fish, wildlife, or plant populations and habitat
- Potential impacts to tree canopy and vegetation

Affected Environment

Wildlife Habitat and Priority Species

The City identifies Fish and Wildlife Habitat Conservation Areas (VMC 20.740.110) as:

- Habitat used by any life stage of state or federally designated endangered, threatened, and sensitive fish or wildlife species
- Priority habitats and areas associated with priority species
- Water bodies including lakes, streams, rivers, and naturally occurring ponds
- Habitats of Local Importance, which are not designated as Priority Habitats and Species by the state but are designated as locally significant by the City
- Riparian Management Areas and Riparian Buffers, which are regulated areas that include the land from the ordinary high-water mark to a specified distance as measured horizontally in each direction. The Riparian Management Area is adjacent to a lake, stream or river, and the Riparian Buffer is adjacent to the Riparian Management Area.

WDFW identifies priority habitats and species to ensure protection and management. Priority habitats in Vancouver include biodiversity areas and corridors, riparian areas, freshwater wetlands, caves or cave-rich areas, and Oregon white oak woodlands (WDFW 2024).

According to the WDFW's priority habitat and species mapping tool, priority species that may occur within the City include (WDFW 2024):

- Coho salmon (*Oncorhynchus kisutch*)
- Winter steelhead (*Oncorhynchus mykiss*)
- Bull trout (*Salvelinus confluentus*)
- Green sturgeon (*Acipenser medirostris*)
- Spring Chinook (*Oncorhynchus tshawytscha*)
- Fall chum (*Oncorhynchus keta*)
- Great blue heron (*Ardea herodias*)
- Bald eagle (*Haliaeetus leucocephalus*)
- Vaux's swift (*Chaetura vauxi*)
- Waterfowl concentrations

The USFWS Information for Planning and Consultation system identifies the following Endangered Species Act-listed species that may occur within the City (USFWS 2024):

- Columbian white-tailed deer (*Odocoileus virginianus leucurus*)
- Northern spotted owl (*Strix occidentalis caurina*)
- Yellow-billed cuckoo (*Coccyzus ameicanus*)
- Northwestern pond turtle (*Actinemys marmorata*)
- Bull trout (*Salvelinus confluentus*)
- Monarch butterfly (*Danaus Plexippus*)

Approximately 14% of the ~~c~~City is considered riparian habitat, priority habitat area, or priority species area based upon existing county, state, and federal data (Design Workshop 2024). Priority habitat areas are located primarily in the center of the ~~c~~City along Burnt Bridge Creek as well as on the far east side of the ~~c~~City adjacent to Camas. Most of the priority species areas are located along the west side of the ~~c~~City.

Riparian habitat areas are situated adjacent to aquatic habitat and are transitional areas that contain elements of both aquatic and upland ecosystems, which mutually influence each other. Riparian habitat areas are located along Burnt Bridge Creek and the Columbia River. Freshwater wetland areas are mapped throughout the city. Biodiversity areas and corridors are areas of habitat that are relatively important to various species of native fish and wildlife. A biodiversity area and corridor is mapped within the ~~c~~City associated with Burnt Bridge Creek, as shown in ~~Figure 40~~ ~~Figure 40~~ Figure 42.

The City also has provisions in its code for identifying habitats of local importance (VMC 20.740.100), which are critical areas for fish and wildlife habitat that are not designated as priority habitats and species by the state but are designated as locally significant. These are determined by a need for protection due to existing high diversity of fish or wildlife species, declining populations, habitat scarcity, areas sensitive to disturbance from human activity or development, or other unique local habitat functions. Designated areas also need to be sufficient in size to support the species or habitat functions, and this designation will not compromise the ability of the City to achieve Comprehensive Plan goals. A habitat of local importance must also have a proposed management strategy that describes how the functions of the habitat will be protected after designation. The City has not designated any habitats of local importance.

Aquatic Resources

As discussed further in the Water section and shown on ~~Figure 39~~ ~~Figure 39~~ Figure 41, major aquatic resources in and near Vancouver include Burnt Bridge Creek, the Columbia River, and Vancouver Lake, as well as smaller rivers, streams, and wetlands. There are approximately 2,467 acres of wetland areas and 2,524 acres of water, which includes rivers, streams, and lakes, within the ~~c~~City (Design Workshop 2024).

Portions of the ~~c~~City that have prevalent wetland areas are along the banks of the Columbia River, Vancouver Lake, Burnt Bridge Creek, Fisher Creek, and Love Creek; areas between Vancouver Lake and the Columbia River; Curtin Springs Wildlife Habitat; Vancouver Lake Park; Centerpointe Park; areas west of Northeast Padden Parkway and Northeast Andresen Road; areas in the Port of Vancouver; and other mapped areas (Clark County n.d.).

~~Figure 40~~ Figure 42. Biodiversity Areas and Corridors

Source: Clark County n.d.

Fish or Wildlife Migration Routes

The ~~e~~City is an important stop for birds traveling along the Pacific Flyway and fish traveling along the larger Lower Columbia region fish migration route (WDFW 2024).

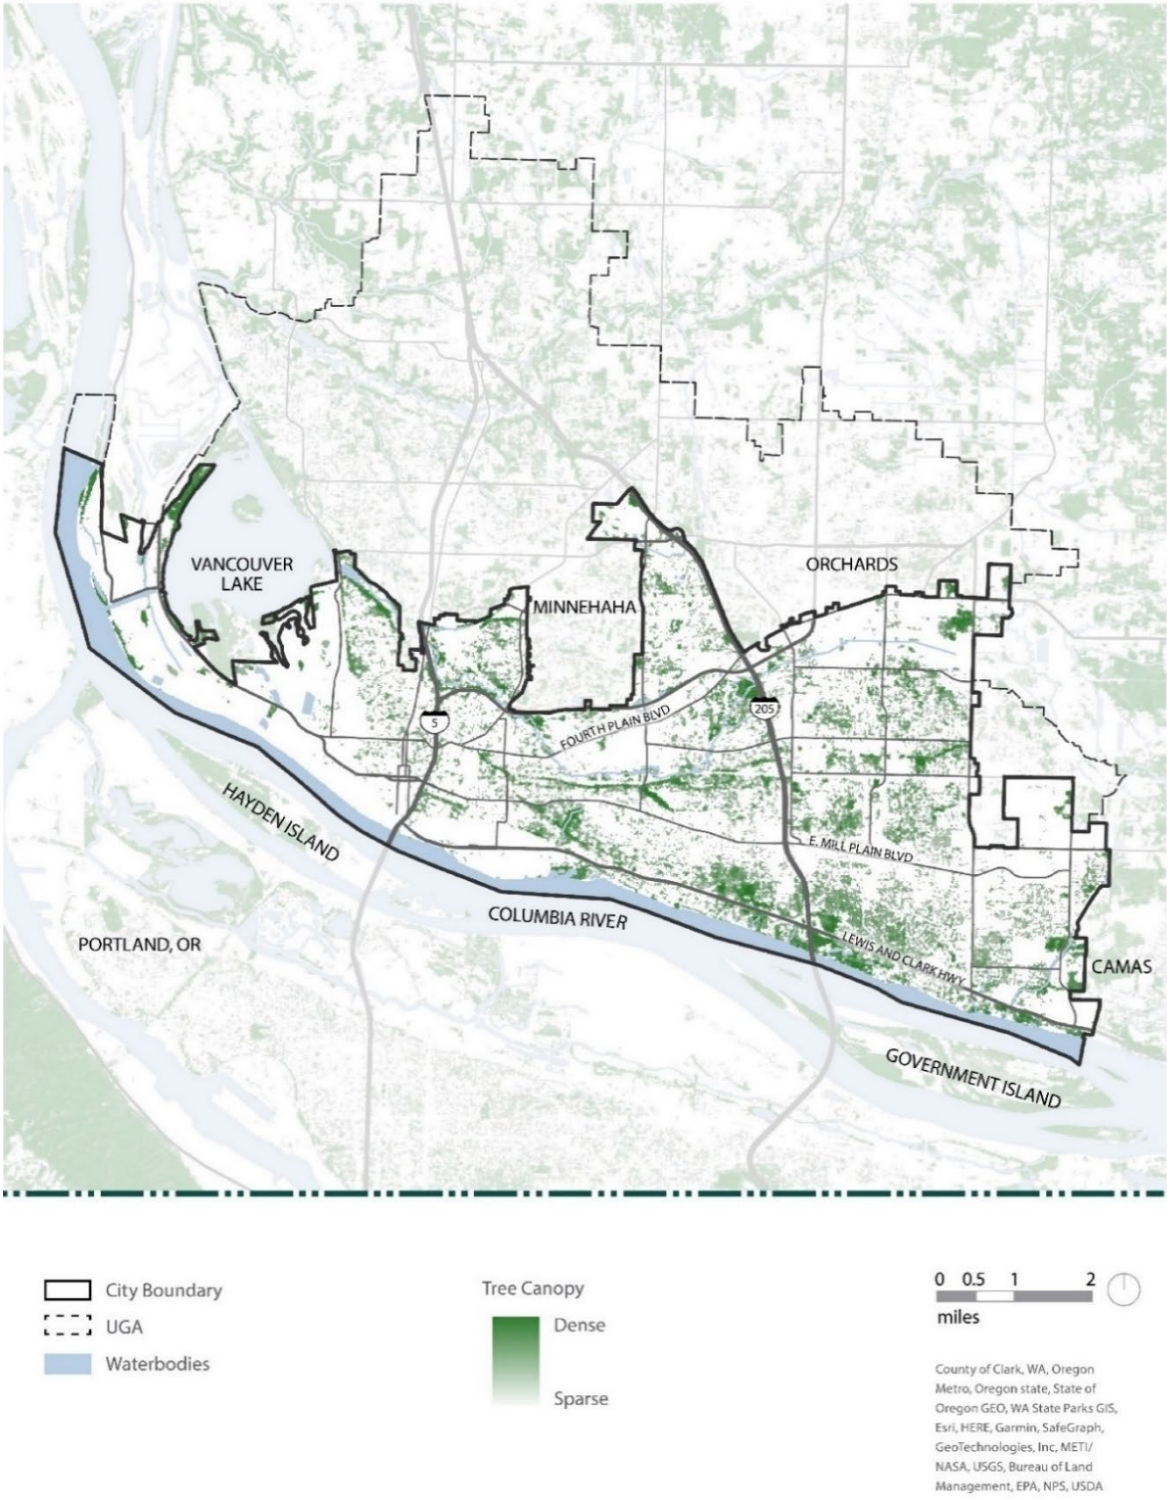
The Pacific Flyway is the major north–south route for migratory birds that extends from Patagonia to Alaska, and migratory birds may use a variety of habitats within the City for resting, feeding, and breeding.

In general, due to the number of species that rely on the Columbia River as a migratory corridor, and the variety of life history strategies among these species, both adult and juvenile salmonids are likely to be present in portions of the Columbia River and other rivers and streams within or near the ~~e~~City year-round.

Tree Canopy

Trees offer structural diversity that provides habitat for a wide range of species; areas in the ~~e~~City with extensive tree canopy cover are likely to support comparatively diverse plant and animal communities. Vancouver's 6,000 acres of tree canopy is composed primarily of Douglas fir (*Pseudotsuga menziesii*), western red cedar (*Thuja plicata*), western hemlock (*Tsuga heterophylla*), bigleaf maple (*Acer macrophyllum*), and red alder (*Alnus rubra*) (City of Vancouver 2021a).

With continuously updated data on tree canopy cover and impervious surfaces, the City can make informed decisions about tree planting and preservation, stormwater management, land use and the benefits trees provide. The ~~e~~City has continuously been recognized as a Tree City USA by the National Arbor Day Foundation, in partnership with the U.S. Forest Service and Washington State Department of Natural Resources Urban and Community Forestry Program. This recognition reflects Vancouver's commitment to effective management and care for its urban tree canopy (Vancouver's Downtown Association n.d.).



The 2011 Comprehensive Plan established a goal of 28% tree canopy cover by the year 2030 (City of Vancouver 2021a). As of October 2023, the City reported 20% tree canopy cover, representing a small increase from 2010 (City of Vancouver 2023e).

Tree canopy ranges from 40% in the Dubois Park neighborhood to 9% in the Esther Short neighborhood (City of Vancouver 2023e). As shown in ~~Figure 41~~ ~~Figure 41~~ Figure 43, the densest tree canopy is concentrated in the southeast near the banks of the Columbia River. There are substantial gaps in tree canopy moving west along the river. Tree canopy is more prevalent between the center and the east of the city. Dense tree canopy is concentrated along SR 14 and Burnt Bridge Creek. Tree canopy is sparser in residential and industrialized neighborhoods.

The Urban Forestry Management Plan, published in October 2023, outlines a long-term framework to preserve Vancouver's urban forest, achieve tree canopy coverage goals and address environmental injustice (City of Vancouver 2023e). In addition, the City's December

2024 CAO update outlines new requirements for protection of priority Oregon white oak habitat and associated mitigation measures for development.

~~Figure 41~~ Figure 43. Tree Canopy Concentration

Source: Design Workshop 2024

Potential Impacts

This section discusses the potential impacts of the alternatives related to the following plants and animals metrics:

- Potential impacts to fish, wildlife, or plant populations and habitat
- Potential impacts to tree canopy and vegetation

Impacts Common to All Alternatives

The following sections outline impacts that are expected to occur under all the alternatives. Impacts specific to each alternative are discussed in the next subsections.

Potential Impacts to Fish, Wildlife, or Plant Populations and Habitat

All alternatives would permit development that could impact plants and animals directly, indirectly, or cumulatively. Over time, loss of wildlife habitat and/or fragmentation could occur under all alternatives because of cumulative increases in impervious surface areas and removal of native vegetation, although many areas that would experience redevelopment are already fully or partially developed today. The extent of impacts to plants and animals would depend on the location and intensity of development, and the existing size of habitat and connectivity across the landscape.

Future site-specific development projects under all alternatives could result in adverse impacts on vegetation and wildlife habitat, threatened and endangered species, and aquatic resources and wetlands. However, those projects will be subject to existing federal, state, and local regulations that protect plant and animal habitat, threatened and endangered species, and aquatic resources and wetlands, as discussed in the Avoidance, Minimization, and Mitigation Measures section.

Potential Impacts to Tree Canopy and Vegetation

Under all alternatives, future development activities would require removal of vegetation to varying extents. Loss of vegetation would result in direct, indirect and cumulative impacts to plant and animal species through changes in habitat. These changes would be incremental over time as development occurs.

Overall tree canopy coverage within the ~~e~~City has the potential to decrease to some extent under all alternatives because of tree removal associated with new development. All alternatives would maintain the same amount of existing land designated as Parks/Open Space, which would preserve the tree canopy and prevent vegetation loss in those areas.

All of the alternatives would provide the majority of their capacity for new housing units in areas with low existing tree canopy cover, defined as census tracts with less tree canopy than the current ~~c~~City average, as shown in Table 38.

Table 38. Estimated Capacity for New Housing Units in Areas with Low Existing Tree Canopy Cover

Metric	No Action	Alternative 1	Alternative 2	Preferred Alternative
Projected Capacity for New Housing Units in Areas with Low Existing Tree Canopy	16,800[a]	27,800	31,000	28,100
Percent of Total Projected Capacity for New Housing Units	57%[a]	62%	61%	58%

Source: BERK 2025

Note:
a The No Action is based on capacity only and does not account for feasibility of redevelopment, whereas Alternatives 1 and 2 include assumptions related to market feasibility and redevelopment.

No Action Alternative

In general, there would be minimal additional impacts under the No Action Alternative aside from those described in the Impacts Common to All Alternatives section. The No Action Alternative would be consistent with City regulations and would apply the updated CAO provisions related to plants and animals.

Because the No Action Alternative would have less capacity for new housing and jobs, it may result in lower levels of new construction and/or redevelopment and associated direct, indirect, and cumulative impacts to habitat areas compared to Alternatives 1 and 2 and the Preferred Alternative.

Alternative 1

In general, there would be minimal additional impacts under Alternative 1 aside from those described in the Impacts Common to All Alternatives section. Alternative 1 would be consistent with City regulations and would apply the updated CAO provisions related to plants and animals.

Alternative 1 would allow for more dense development and would have greater capacity for new housing units and jobs, which would likely result in higher levels of new construction and/or redevelopment and associated vegetation removal, compared to the No Action Alternative. However, this development would be more concentrated in higher-density zoning districts, which could help to reduce the need for vegetation removal throughout the ~~e~~City compared to the No Action Alternative and have potentially greater direct, indirect, and cumulative benefits for plants and animals. Because Alternative 1 would accommodate more new development and/or redevelopment than the No Action Alternative, more projects would be subject to the new additional regulations for wetland buffers, riparian areas, and preservation of priority habitats in the December 2024 CAO update, which could result in greater benefits for plants and animals.

Alternative 2

In general, there would be minimal additional impacts under Alternative 2 aside from those described in the Impacts Common to All Alternatives section. Alternative 2 would be consistent with City regulations and would apply the updated CAO provisions for water resources.

Alternative 2 would have similar impacts to Alternative 1 and the Preferred Alternative related to plants and animals. However, because Alternative 2 would have options for more density and larger-scale buildings in more areas of the city, it would have greater potential than Alternative 1, the Preferred Alternative and the No Action Alternative to increase impervious surface areas and remove vegetation, affecting habitat. This increased growth in more areas, particularly in Central and East Vancouver, could place more development near Fish and Wildlife Habitat Conservation Areas, including state priority species and habitats. Denser development patterns, including Medium-Scale and Mixed-Use Neighborhoods, would be allowed near Burnt Bridge Creek and its Biodiversity Area in West and Central Vancouver under Alternative 2 compared to Alternative 1 and the No Action Alternative.

However, those projects will be subject to existing regulations that protect plant and animal habitat, threatened and endangered species, and aquatic resources and wetlands. Because Alternative 2 would accommodate the greatest amount of new development and/or redevelopment, more projects would be subject to the additional regulations for wetland buffers, riparian areas, and preservation of priority habitats in the December 2024 CAO update, which could result in the greatest direct, indirect, and cumulative benefits for plants and animals.

Preferred Alternative

In general, there would be minimal additional impacts under the Preferred Alternative aside from those described in the Impacts Common to All Alternatives section. The Preferred Alternative would be consistent with City regulations and would apply the updated CAO provisions for water resources.

Similar to Alternatives 1 and 2, the Preferred Alternative would allow for more dense development and would have greater capacity for new housing units and jobs, which would likely result in higher levels of new construction and/or redevelopment and associated vegetation removal, compared to the No Action Alternative. The Preferred Alternative would have similar impacts to Alternatives 1 and 2 related to plants and animals, depending on area of the city. Citywide, impacts under the Preferred Alternative would be more similar to Alternative 1 than Alternative 2 based on anticipated growth levels.

Similar to Alternative 2, denser development patterns, including Medium-Scale and Mixed-Use Neighborhoods, would be allowed near Burnt Bridge Creek and its Biodiversity Area in West and Central Vancouver under the Preferred Alternative compared to Alternative 1 and the No Action Alternative. However, those projects will be subject to existing regulations that protect plant and animal habitat, threatened and endangered species, and aquatic resources and wetlands. Because the Preferred Alternative would accommodate more new development and/or redevelopment than the No Build Alternative, more projects would be subject to the additional regulations for wetland buffers, riparian areas, and preservation of priority habitats in the December 2024 CAO update, which could result in greater direct, indirect, and cumulative benefits for plants and animals.

Avoidance, Minimization, and Mitigation Measures

Regardless of alternative, all future development projects will be required to comply with city, state, and federal requirements for protecting plants, animals, and their resources and resulting in no net loss of functions and values in critical areas. These existing regulations include the Endangered Species Act, Clean Water Act and Stormwater Regulations, state regulations protecting Waters of the State, the Shoreline Management Act, the Shoreline Master Program, the City's CAO (VMC 20.740), the City's tree ordinance (VMC 12.04), and stormwater regulations (VMC 14.25 and 14.26).

The City's development review process will ensure compliance with the City's CAO, VMC 20.740, which requires any development, redevelopment, or use of a property to protect ecologically sensitive areas and their functions and values, while also allowing for reasonable use of property. VMC 20.740.110 focuses on protecting Fish and Wildlife Habitat Conservation Areas by designating key habitats such as riparian areas, priority Oregon white

oak habitats, and aquatic environments. VMC 20.740.140 includes buffer requirements from wetlands, which often provide critical wildlife habitats and water quality benefits that impact the ecosystem as a whole.

The City's December 2024 CAO update provides additional protections for plant and animal habitat. In addition to the additional wetland protections discussed in the Water section, there would be increased widths for riparian areas, resulting in about 1% more land (303 acres) regulated as riparian areas as compared to the previous CAO. Overall, the December 2024 CAO update decreases the amount of land available for development through these expanded buffers.

In addition, implementation of the City's Urban Forestry Management Plan will help to enhance the level of tree canopy cover citywide, which can help to reduce stormwater and flooding damage, improve air quality, provide habitat, and improve health outcomes (City of Vancouver 2023e). Continued updates to this plan under all of the alternatives will help to identify areas of the ~~e~~City that have fewer trees than others and develop strategies to help increase the tree canopy in these areas.

Implementation of the following policy measures ~~currently under consideration~~ for the Comprehensive Plan Update would also help to avoid, minimize, and mitigate potential impacts to plants and animals identified for the action alternatives:

- Meet tree canopy coverage goal of 28%, using the City's Equity Index to target investment in underserved neighborhoods lacking coverage.
- Take inventory of and protect climate refugia and fish and wildlife habitat needs for species under stress from climate change.
- Prioritize integrating green infrastructure into new development, redevelopment, replacement of existing infrastructure, and development of public spaces within the City to improve stormwater quality and reduce urban heat island effect.
- Support a healthy urban ecosystem by embedding pollinator habitat into public and private development, prioritizing pesticide-free landscaping, enhancing biodiversity, and connecting natural spaces across the ~~e~~City through pollinator-friendly plantings.
- Incorporate native plantings, food forests, and agroforestry into parks and public spaces to support food security, ecological health, and cultural knowledge sharing.
- Create an expansive network of linear parks that encourage active transportation, improve community health and wellbeing, enhance tree canopy and stormwater management, and link parks and open space with housing.

The proposed updates to zoning and development regulations would also help to avoid, minimize and mitigate impacts to plants and animals through elements such as minimum open

space requirements and maximum impervious area requirements based on building types. The City is also developing code incentives to support maintaining larger trees and planting more trees than required as part of new developments.

Significant Unavoidable Adverse Impacts

All of the alternatives have the potential to create impacts to earth resources as a result of expected population growth and development. The anticipated changes would occur incrementally, and with the implementation of avoidance, minimization, and mitigation measures, no significant unavoidable adverse impacts to plants and animals are anticipated for any of the alternatives.

Chapter 5: Potential Cumulative Effects

Note to readers: This Final Environmental Impact Statement document retains and builds upon the information presented in the Draft Environmental Impact Statement. New content in this chapter is generally denoted with underlined text, while changes to information are denoted with strikethrough text. Updates focus on adding the new analysis of the Preferred Alternative, as well as minor corrections and clarifications to the analysis presented in the Draft EIS.

SEPA requires a nonproject EIS to include analysis of cumulative effects, which are the impacts of a proposed action – in this case, the Comprehensive Plan Update and associated zoning code amendments – in combination with other past, present, and reasonably foreseeable future actions within a given geographic area.

The proposed Comprehensive Plan Update would lead to future site-specific residential, commercial, industrial, and mixed-use development projects throughout the City with the potential for cumulative environmental impacts over time. Because the exact nature and timing of these future projects is currently unknown, specific cumulative impacts cannot be fully anticipated.

Cumulative effects are discussed where feasible in the Potential Impacts subsections of the built and natural environmental topics in Chapters 3 and 4. The regional transportation model outputs used for the transportation, noise, and air quality analyses discussed in Chapters 3 and 4 consider assumptions about future population and employment growth, expected changes in land use, and reasonably foreseeable future transportation projects. Therefore, these effects analysis inherently account for cumulative effects resulting from the Comprehensive Plan Update.

In general, it is anticipated that projects resulting from the Comprehensive Plan Update and revised zoning and development regulations would result in cumulative impacts over time, including higher levels of traffic volumes, noise, light, glare, impervious surfaces, and demand for various public services and utilities. Alternatives 1 and 2 and the Preferred Alternative would have the greatest potential for these types of cumulative impacts compared to the No Action Alternative because they would accommodate the highest capacities for new housing and jobs and would likely generate more construction and development projects in more areas of the City.

However, Alternatives 1 and 2 and the Preferred Alternative would also have greater potential for cumulative benefits over time compared to the No Action Alternative. The action alternatives would result in greater opportunities for ~~generally~~ more housing at higher

densities with ~~greater~~ increased benefits for overall housing affordability. ~~Both~~ The action alternatives would promote a trend of denser, more compact, mixed-use development in more areas of the city, which may lead to less pressure to develop historic and archaeologically sensitive areas and/or environmentally sensitive areas, such as geologic hazard areas and wetland and stream buffers. In addition, by accommodating the greatest amount of new development and/or redevelopment, more individual projects under Alternatives 1 and 2 and the Preferred Alternative would be subject to the City's updated critical areas regulations, which are designed to enhance environmental quality, prevent natural hazards, and ensure no net loss of critical area functions. Therefore, Alternatives 1 and 2 and the Preferred Alternative could result in fewer cumulative impacts on historic and cultural preservation, earth, water, and plants and animals than the No Action Alternative. Existing regulations, including the recent CAO updates, would help to avoid, minimize and mitigate cumulative impacts under all alternatives but may not eliminate these impacts entirely. Future projects and developments would be required to conduct separate, project-specific environmental analyses and review, as appropriate (unless otherwise exempt or covered through planned action SEPA ordinances). Mitigation measures would be identified for these future projects as applicable to decrease the potential for cumulative impacts.

Chapter 6 Draft EIS Comment Summary and Responses to Comments

Note to readers: This Final Environmental Impact Statement document retains and builds upon the information presented in the Draft Environmental Impact Statement. In previous chapters, new content is generally denoted with underlined text, while changes to information are denoted with strikethrough text. Updates focus on adding analysis of the Preferred Alternative, with minor corrections and clarifications to the analysis presented in the Draft EIS. Some changes are denoted with footnotes and table notes when further explanation was warranted. Because Chapter 6 is a new section prepared especially for the Final Environmental Impact Statement, it is presented without the underline/strikethrough formatting.

About the Draft EIS Comment Period

The Draft EIS Comment period was open from July 8 to September 8, 2025. Comments were collected via an online comment form available in English, Chinese, Chuukese, Russian, Spanish, Ukrainian, and Vietnamese, as well as via phone, email, and mail. For a full summary of outreach conducted before and during the Draft EIS comment Period, refer to Appendix D, Draft EIS Comment Period Outreach Summary.

Comments Received

The City received a total of 440 comments:

- 330 total comments via the online comment form, of which 24 were incomplete forms and did not contain a comment.
- 94 comments via email, 6 of which were also submitted via the online comment form or physical mail
- 15 comments via physical mail, 1 of which was also submitted via the online comment form or email
- 1 comment via voicemail

A total of 409 unique comments were received. Thirteen of these were received from agencies, businesses, or organizations.

Comment Review Process

The project team reviewed each comment and coded responses based on the chapters of the Draft EIS. The project team also added additional codes to capture comments related to

the Draft EIS and Comprehensive Plan Update process. Comments were coded into multiple categories as overlap occurred. The City considered each comment and incorporated resulting corrections, additions, or clarifications of information into this Final EIS.

- Other – Annexation
- Other – Unrelated to project

An additional sub-code was added for Alternatives to capture comments related to how alternatives impact a specific address, parcel, or neighborhood.

The summary section that follows may quantify comments received by the terms "few," "some," or "many." Few means less than 10 comments received; Some or several means between 10-39 comments received; and Many means 40 or more comments received on a particular topic.

Summary of Key Themes

This section provides a high-level summary of key themes and takeaways associated with each code, as well as how many comments pertained to each code. Refer to Appendix E, Responses to Individual Draft EIS Comments, to view the full text of comments received and the City's responses.

Alternatives: Specific Address, Parcel, Or Neighborhood (226 comments)

Many comments included suggestions for modifications to a specific address, parcel, or neighborhood in one or both alternatives. Frequently mentioned areas included the Southcliff and Fisher's Landing neighborhoods and the downtown waterfront area.

Alternatives (114 comments)

Alternative 1 received some support from those who expressed concerns about rapid change, parking, traffic, neighborhood character, and dense development. Some comments indicated support for Alternative 2 as the best way to address housing, climate, and

transportation needs. Some comments indicated support for both alternatives. Many comments indicated opposition to both alternatives.

Transportation (95 comments)

Many comments mentioned a desire for increased transit and connectivity, and pedestrian and bike improvements. A few comments indicated concern about parking shortages amidst higher density, opposition to MAX light rail expansion, and frustration with downtown pay-to-park policies.

Land and Shoreline Use (82 comments)

Some comments shared support for density that creates walkable, mixed-use areas, locating jobs, services, and restaurants or grocery stores closer to neighborhoods. A few comments opposed mixing low- and medium- density zones and increasing industrial land uses; emphasized a desire for protecting farmland and open space; and highlighted conflicts between public zoning changes and private neighborhood covenants.

Plants and Animals (43 comments)

Comments called for better protection of tree canopy, wildlife corridors, and natural habitats and indicated concern regarding vegetation loss due to increased density.

Housing (39 comments)

Some comments indicated a desire for a variety of housing options, affordable housing, and homeownership opportunities. Some comments expressed opposition to high-density housing, citing traffic, parking, and neighborhood impacts to character and safety.

Historic and Cultural Preservation (31 comments)

Some comments mentioned a desire to preserve older brick buildings in Downtown, Fort Vancouver, and Pearson Airfield. There were also a few suggestions to recognize the unique history of Vancouver and partner with Indigenous nations to preserve and honor their history as part of the city's story and legacy.

Other – Draft EIS information, data, and approach (25 comments)

Some comments included concerns that the EIS analysis does not adequately evaluate combined impacts of rezoning and middle-ground options between the two Alternatives. A few questions about the analysis related to houselessness, tree canopy, Critical Areas Ordinance, and rezoning were also shared.

Aesthetics (24 comments)

Comments emphasized the importance of neighborhood character, cohesive, high-quality development, and concerns about graffiti, trash, and homelessness.

Public Services and Utilities (18 comments)

Comments mentioned concerns that existing public services, including schools, police, fire, emergency services, and parks, are strained and will not be able to keep up with demand as the City grows.

Other – Engagement Process (16 comments)

Comments included concerns that engagement did not fully reach all demographics (especially renters, non-English speakers, low-income residents, and those without internet access), information shared was difficult to understand, and input was being overlooked.

Air Quality, Greenhouse Gases, and Climate (14 comments)

Comments included support for growth along transit lines to reduce vehicle miles travelled, concern about air pollution near freeways and industrial zones, and calls to increase climate resiliency through tree canopy, open space preservation, and solar power.

Noise (14 comments)

Comments mentioned noise concerns associated with traffic, mixed-use rezoning, and industrial traffic, and expressed a desire for noise barriers and protections.

Water (13 comments)

Comments mentioned concerns about stormwater runoff and pollution, increasing areas of impervious surfaces, and groundwater availability in the future.

Other – Unrelated to Project (8 comments)

Comments were unrelated to the Comprehensive Plan update, including feedback related to the Interstate Bridge Replacement Program.

Other – Annexation (5 comments)

Comments included questions from residents outside City limits about how their areas will be managed, desire for increased communication regarding the annexation process, and concerns that annexation could result in increased congestion and taxes.

Other – Policies and Implementation (3 comments)

Comments included skepticism about how the rezoning process will be implemented, desire for building permits to include requirements for parking and natural space, and emphasized the need for regulation of small electric vehicle use in bike lanes.

Earth (1 comment)

Comment shared concern about whether geologic and environmental hazards related to increased housing and commercial density in Southcliff were adequately considered.

Demographics of Commenters

The online comment form contained additional optional demographic questions. The following subsections summarize demographics of individuals who chose to respond to these questions.

Zip Codes

Respondents (300 total responses) came from 24 zip codes, including the City of Vancouver and surrounding areas in the urban growth boundary, Camas, and Washougal.

Gender

The gender breakdown of respondents to this question (275 total responses) is as follows:

- Female, 45.5% (125)
- Male, 40.0% (110)
- Non-binary, 0.4% (1)
- Transgender, 0.7% (2)
- Prefer not to answer, 14.0% (39)
- Self-identified, 0.7% (2)

Age

More than half of responses to this question (255 total responses) came from respondents over the age of 55. The age breakdown of respondents is as follows:

- Under 18 years, 1.2% (3)
- 18 – 24 years, 2.0% (5)
- 25 – 34 years, 7.8% (20)
- 35 – 44 years, 16.9% (43)
- 45 – 54 years, 12.9% (33)

- 55 – 64 years, 18.4% (47)
- Over 65 years, 40.8% (104)

Race/Ethnicity

Most respondents to this question (about 62% of 271 total responses) identified as white or European American. The racial/ethnic breakdown of respondents is as follows:

- American Indian or Alaska Native, 0.7% (2)
- Asian or Asian American, 4.4% (12)
- Black or African American, 1.9% (5)
- Hispanic or Latino/a/e, 4.4% (12)
- Middle Eastern or North African, 0.4% (1)
- Native Hawaiian or Pacific Islander, 0% (0)
- White or European American 61.6% (167)
- Other, 2.2% (6)
- Prefer not to answer, 26.9% (73)

Language

About half of respondents to this question (223 total responses) said that they only speak English fluently, while about one-third of respondents selected prefer not to respond. The most common language spoken by participants other than English was Spanish (about 8%). No responses were received in a language other than English.

Income

The income breakdown of respondents to this question (271 total responses) is as follows:

- Below $19,999, 0.7% (2)
- $20,000 – $49,999, 3.7% (10)
- $50,000 – $89,999, 11.1% (30)
- $90,000 – $129,999, 11.4% (31)
- $130,000 – $149,999, 4.1% (11)
- Above $150,000, 23.3% (63)
- Prefer not to answer, 45.8%, (124)

Disability

Approximately 9% of respondents to this question (274 total responses) report have a disability.

Housing Situation

About three-quarters of respondents to this question (275 total responses) own their home. Roughly 11% of respondents rent, and about 2% live with someone but do not pay rent.

Responses to Common Draft EIS Comment Themes

The City prepared the following responses to common comments received on the Draft EIS. Refer to Appendix E, Responses to Individual Draft EIS Comments, for a full listing of commenters and responses to individual comments.

Common Response #1: Selection of Preferred Alternative

The City received comments that expressed preferences for the No Action Alternative, Alternative 1, and/or Alternative 2 as presented in the Draft EIS.

Since publication of the Draft EIS, the City has developed a Preferred Alternative, which combines features of Alternatives 1 and 2 to meet projected housing and employment needs through 2045, manage long-term growth, and balance development with preservation of the natural environment. Chapter 2 of the Final EIS provides a detailed description of the Preferred Alternative, including land use maps, and compares the major features of the Preferred Alternative to Alternatives 1 and 2. Chapter 1 of the Final EIS provides a summary comparison of the potential impacts of all alternatives, with more detail for each environmental topic area in Chapters 3, 4, and 5.

The Preferred Alternative distributes growth around the City more evenly than Alternatives 1 and 2, helping to ensure that impacts are not concentrated and that different areas of the City benefit from future growth and investment. This approach includes facilitating growth in established urban areas so that agricultural and resource lands outside the City and Vancouver Urban Growth Area can be preserved for agricultural and environmental functions.

Similar to Alternatives 1 and 2, the Preferred Alternative includes increases in allowed residential density and building scale that are needed to accommodate projected population growth and state-mandated housing and jobs targets. The plan must accommodate about 38,000 new housing units, including about half at below-market levels, to meet the needs of current and future residents and to comply with state law (2021 H.B. 1220). The Land and Shoreline Use section and the Housing section in Chapter 3 of the Final EIS provide more information about the potential for the different alternatives to meet housing targets and needs.

Some growth and change are inevitable, and the City cannot prevent people from moving to Vancouver. The No Action Alternative would make no changes to the existing Comprehensive Plan goals and policies or citywide zoning regulations, with the exception that the legally mandated changes to allow four to six units on all residential lots will go into effect even if the City makes no changes because the state would override local regulations. Even with this, the absence of any other changes to accommodate long-term growth would make the City non-compliant with other housing laws under the Growth Management Act, including H.B. 1220 requirements to accommodate a set number of units affordable at various income levels. Failure to comply with state law would render the City ineligible for state grant funds and subject to other potential sanctions or penalties. Failure to allow enough housing of various types and sizes citywide would also worsen the existing housing affordability crisis for current and future residents. Thus, an updated Comprehensive Plan, land use map, and zoning code are necessary to appropriately plan for and accommodate growth and change.

The Preferred Alternative and proposed updated Comprehensive Plan and zoning code provide a framework to guide growth and change responsibly over the next 20 years (through 2045), with minor annual updates to the plan and code as needed to adapt to changing conditions or new information during that timeframe. Planning helps growth align with community values, state laws such as the Growth Management Act, and long-term City goals like climate action, opportunity for all, and community safety.

The Preferred Alternative represents the potential for substantial change in the community. However, the Preferred Alternative is a proposed citywide plan involving policy and regulatory change, not a City-led development project. Changes resulting from the plan and code updates are expected to occur incrementally over the next 20 years. Changes are expected to be gradual, localized, and informed by policies, market forces, and individual property owner choices.

The Preferred Alternative balances a range of considerations and reflects:

- Information from the Draft EIS analysis
- Community input, including comments submitted during the Draft EIS comment period in summer 2025
- State laws for growth management, housing, climate and other topics
- City priorities
- Direction from City Council

The following framework was used to draft the Preferred Alternative. See the September 15, 2025 City Council Workshop for additional information.

- **Draft Environmental Impact Statement (Draft EIS) Comments:** Incorporate comments and requests that are consistent with Council policy direction and state law.
- **Centers & Corridors:** Move from broad rules to location-specific analysis
- **Schools:** Ensure growth does not worsen school-specific capacity issues.
- **Tree Canopy:** Identify areas with significant mature tree canopy.
- **Parks & Community Services:** Prioritize additional housing capacity near parks and schools.
- **Industrial Employment Lands:** Carefully manage employment land.
- **Service Deserts:** Use the Connected & Accessible Neighborhoods map to locate areas without access to essential services.
- **Reducing vehicle miles traveled (VMT) & Emissions:** Prioritize land use strategies and mixes that reduce trip length and support different trip types.
- **Public Facilities and Services:** Leverage existing infrastructure and areas planned for capital upgrades in the future.
- **Transportation:** Leverage existing and planned transportation investments to locate growth near upgraded, multimodal facilities.
- **Health and Climate Vulnerability:** Target more intense development in areas with low health and climate vulnerability.

Staff then refined the Preferred Alternative based on direction from City Council and the Planning Commission. The Preferred Alternative was endorsed via resolution by City Council on December 15, 2025. It will be included for adoption with the updated Comprehensive Plan and Zoning Code later in May and June 2026.

The Final EIS analyzes the potential impacts of the Preferred Alternative, relative to Alternative 1, Alternative 2, and a No Action Alternative, on the built environment (Chapter 3) and natural environment (Chapter 4).

Common Response #2: General Quality of Life Concerns

The City received comments with concerns about the potential effects of planned growth on quality of life in Vancouver.

Regardless of which alternative is selected, the pace and distribution of future growth in Vancouver would be influenced in part by the implementation of the Comprehensive Plan policies, related regulations and actions, and by decisions made by individual property owners and developers.

Growth is not expected to be uniform citywide. More intense development is focused in specific areas like urban centers and corridors. The proposed Comprehensive Plan update

intends to guide growth that aligns with community values, state laws, and long-term City and community goals like climate action, opportunity for all, and community safety. The plan update supports incremental, community-guided change, balancing continuity with the evolving needs of current and future generations.

The proposed Comprehensive Plan update discusses quality of life in more detail and includes goals and policies to support quality of life for the Vancouver community, particularly in the plan's vision statement, Community Experience chapter, Climate and Environment chapter, and Parks and Recreation chapter. The Our Vancouver Health Impact Assessment (HIA) considers how the alternatives studied as part of the Our Vancouver Comprehensive Plan periodic update may benefit and impact health in Vancouver as it relates to the built environment. Refer to the Comprehensive Plan page on the City's website for more details about the proposed Comprehensive Plan, the HIA, and other related documents.

Common Response #3: Car Dealerships

The City received comments with concerns about car dealerships within the City, particularly when they replace other neighborhood-serving uses.

The recent motor vehicle sales development at Mill Plain Boulevard and SE 136th Avenue (Lexus dealership) is part of an approved master plan and was found to meet all zoning and environmental requirements of the existing Mixed Use zoning district in the existing zoning code. Opportunities for public input for this project occurred in October and November 2024. This development and all other developments submitted under the existing zoning code must follow the development standards in place at the time of submittal. These developments may opt into the proposed updated zoning code once adopted and if their intended use is still allowed.

The Preferred Alternative designates the property at the northeast corner of Mill Plain Boulevard and SE 136th Avenue as Mixed-Use Neighborhood zoning. This proposed new zoning district allows both commercial and residential uses, including Motor Vehicle Sales/Rental as a conditional use. In the proposed updated zoning code, future Motor Vehicle Sales/Rental uses will be required to locate vehicle parking, display, and storage behind the building to support pedestrian-oriented design. The proposed new code includes greater limits on where Motor Vehicle Sales/Rental uses can locate. They are now allowed only as a conditional use in the Mixed-Use Neighborhood district and as an allowed use in the Industrial/Employment district.

While the zoning code determines what types and sizes of developments are *allowed* in different locations across the city, property owners decide if and when changes occur.

Property owner decisions are influenced by policies, market forces, and personal preferences and choices.

To view this and other recent development projects, visit the City's development dashboard.

Common Response #4: Vehicle Traffic Impacts

The City received comments with concerns about potential impacts on traffic related to the action alternatives.

As noted in the Final EIS, all of the alternatives, including the No Action Alternative, would increase vehicle miles traveled (VMT) to some degree in 2045 as compared to existing conditions because of expected growth and development. However, VMT per household is projected to be slightly lower under the Preferred Alternative than the No Action Alternative, likely because they propose more areas with a mix of residential and commercial land uses, which can reduce the length and frequency of vehicle trips and make different trip types more likely.

The Transportation section of Final EIS Chapter 3 addresses potential impacts of the alternatives on traffic and transportation, as well as proposed mitigation measures to offset potential impacts.

Reducing vehicle travel lanes can improve overall safety by lowering vehicle speeds and reducing the frequency and severity of crashes. Reallocating roadway space also supports walking, biking, and transit, which helps decrease vehicle miles traveled and associated greenhouse gas emissions. These changes contribute to cleaner air, safer streets, and a more accessible transportation network for all users. While some arterial street widening is planned, they are costly and limited in scope, making it essential to use existing roadway space more efficiently to move more people in more ways.

Common Response #5: Traffic Safety

The City received comments with concerns about potential impacts on traffic safety related to the action alternatives.

The Transportation section of Final EIS Chapter 3 addresses potential impacts of the alternatives, including the potential for increases in collisions, as well as proposed mitigation measures to offset potential impacts. The Preferred Alternative would have higher daily traffic volumes compared to the No Action Alternative for most safety corridors identified in the City of Vancouver's Local Road Safety Plan, 2022–2026. At most safety corridor locations, the Preferred Alternative would have similar or lower traffic volumes than

Alternatives 1 and 2, which reflects that new housing capacity would be spread more evenly throughout all areas of the city.

An increase in volume does not necessarily indicate an increase in fatal or severe crashes. However, increases in traffic volumes can increase the number of overall crashes due to greater volumes of vehicles on the road and increased exposure to vehicles by all roadway users. To address traffic safety, the Comprehensive Plan includes implementation steps related to updating street standards to create safer, and more comfortable multimodal streets and connectivity standards to improve pedestrian and small mobility access. The City is implementing a citywide low-stress bicycle and small mobility network that prioritizes safety and comfort for people of all ages and abilities regardless of mode of travel and land use patterns that reduce vehicle miles traveled, traffic congestion, and greenhouse gas emissions, and improve safety and air quality.

The Comprehensive Plan Transportation and Mobility chapter and the Transportation System Plan include goals and policies to improve traffic safety. Refer to the Comprehensive Plan page on the City's website for more details about the proposed Comprehensive Plan.

Common Response #6: Vehicle Parking

The City received comments with concerns about potential impacts on parking related to the action alternatives.

The Transportation section of Final EIS Chapter 3 discusses existing parking demand, as well as proposed mitigation measures to offset potential impacts in areas with more intense proposed land uses, such as expanding allowances for shared parking facilities and implementing strategic pricing mechanisms to regulate the availability of on-street parking in Mixed-Use and Regional Activity Centers.

The City currently requires property owners to build a minimum number of parking spaces, typically based on use and building size. The Comprehensive Plan Update proposes to eliminate most minimum parking requirements, allowing property owners to decide how much parking to build based on their needs. This can help reduce excessive, underused parking and large paved areas that create heat islands, reduce the cost of building housing, and increase space for housing, trees, and green space. This shift aligns with state law (2025 S.B. 5184), which requires reduced parking mandates for some uses, including housing, commercial spaces, and childcare.

This change does not prohibit parking. Owners can still build as much on-site parking as they choose in most places. Parking that is built will still need to meet development standards,

including size and access requirements and new requirements for parking to generally be located behind a building. On-street parking will continue to be a public amenity for public use and not owned by adjacent property owners.

For issues concerning parking enforcement, please visit the Neighborhood Parking and Traffic page on the City's website.

Refer to the Comprehensive Plan page on the City's website for more details about the proposed Comprehensive Plan and code updates that address parking minimums.

Common Response #7: Sidewalks

The City received comments with concerns about pedestrian infrastructure, including incomplete sidewalk facilities in some areas of the City.

The Comprehensive Plan Transportation and Mobility chapter as well as the Transportation System Plan (TSP) include policies to address sidewalk gaps. The TSP includes 148 miles of proposed sidewalk infill. Many of these infill projects are associated with other roadway projects happening adjacent to the sidewalk.

Because public funding alone cannot cover the enormous cost of filling existing gaps, most of the City's sidewalk network is built out by private development. As part of the review and permitting process, development is typically required to build frontage including sidewalks and pay fees that help fund broader infrastructure needs. While the City pursues grants such as Safe Routes to School, these sources address only a small portion of the overall need. Ongoing and future development helps build sidewalks and reduce sidewalk deficiencies.

Refer to the Comprehensive Plan webpage on the City's website for more details about the proposed Comprehensive Plan.

Common Response #8: Housing Affordability/Options

The City received comments with concerns about housing affordability and options.

The Housing section of Final EIS Chapter 3 discusses potential effects on housing, including the level of supply, diversity, and potential cost, as well as proposed measures to help avoid, minimize, and mitigate potential housing impacts. The Comprehensive Plan Housing chapter includes in-depth analysis of housing affordability and goals and policies to address affordability and building different types of housing to meet the needs of Vancouver residents. Refer to the Comprehensive Plan page on the City's website for more details about the proposed Comprehensive Plan.

The Preferred Alternative would result in a greater diversity of housing types than the No Action Alternative. The Preferred Alternative designates more land for higher-intensity middle housing and multifamily development types through the application of Medium-Scale Neighborhood, Mixed-Use Neighborhood, and Regional Activity Center zoning districts. These denser zoning districts allow for a broader range of housing types with more and smaller units, and more potential for lower cost units.

The proposed new zoning code standards in the Preferred Alternative are intended to be easier and simpler to understand, which may also reduce the costs and barriers to housing production. New state laws (2023 H.B. 1110) require the City of Vancouver to allow for at least four dwelling units per lot on all lots in single-family zones, and up to six dwelling units per lot if within a quarter mile of a major transit stop, or if two of the units are affordable. The Preferred Alternative goes beyond the minimum requirements established by H.B. 1110 in order to meet City and community goals, housing targets, and other state laws, including 2021 H.B. 1220, which requires the City to accommodate set numbers of housing needs at all income levels. Lands designated Low-Scale Neighborhood have the potential for a greater diversity of housing types, such as duplexes, quadplexes, sixplexes, and townhomes than current low-density zoning districts.

The higher capacity for new housing units allows for greater opportunities to construct different smaller housing types, which in turn have the potential to be more affordable for a broader range of household income levels. However, certain household income ranges will likely not be served by the private market without additional public subsidy for affordable housing.

Common Response #9: Homeownership Opportunities

The City received comments with concerns about homeownership opportunities.

The Housing section of Final EIS Chapter 3 discusses potential effects on housing, as well as proposed measures to help avoid, minimize, and mitigate potential housing impacts and promote homeownership opportunities.

Currently, homeownership in Vancouver is primarily available through detached single family homes but can be possible through a range of types and sizes of housing. The Preferred Alternative allows for more housing and a wider variety of housing types, which can help improve the availability of housing, housing affordability, and homeownership opportunities. Middle housing types in particular open more options for attached and detached fee simple homeownership opportunities, and state level condominium reform can contribute to greater feasibility of multifamily homeownership. Increased housing production that lowers the cost

of rental housing can indirectly improve homeownership opportunities, by allowing renters to save more money towards a future home down payment.

The proposed Comprehensive Plan Housing chapter includes goal H-5 Access to Homeownership and supporting policies to make homeownership attainable for people across the income spectrum, including communities previously excluded from buying a home through racial covenants and discriminatory lending practices. Refer to the Comprehensive Plan page on the City's website for more details about the proposed Comprehensive Plan.

Common Response #10: Businesses in Residential Zones

The City received comments with both support for and concerns about allowing businesses in residential zones.

The Preferred Alternative allows a greater mix of uses and increased housing density throughout the City than the No Action Alternative or today's conditions. Chapter 2: Alternatives of the Final EIS and Common Response #1 provide more details about the Preferred Alternative.

The Land and Shoreline Use and Housing sections in Chapter 3 of the Final EIS analyze the impacts of these zoning and land use changes, including compatibility with existing land uses and opportunities to locate housing within a 15-minute walk of shopping, entertainment, cultural amenities, education, and employment.

While allowing a greater mix of uses can improve access to services and support housing needs, the plan also recognizes that not all areas are appropriate for mixing uses due to potential conflicts with industrial activities or residential livability. The Preferred Alternative focuses higher-density and mixed-use development in designated centers and corridors, while maintaining flexibility in other neighborhoods to balance growth and change.

Common Response #11: Property Value and Taxes

The City received comments with concerns about property values and taxes.

This topic is generally outside the scope of the EIS analysis. The proposed Comprehensive Plan and zoning code generally increases flexibility of the type and density of uses allowed, which generally increases property values over time. However, the Comprehensive Plan is not designed to control property values. It guides growth to meet long-term community needs. Property values may change for many reasons, but the plan does not speculate on the real estate market.

In Washington state, an individual's property taxes are calculated based on the budgets prepared by the jurisdictions that provide the property users with infrastructure and services. These budgets are prepared independently from property values and are typically limited to a 1% increase from one year to the next. This limit does not apply to taxes from voter-approved bonds and special levies. A property's assessed value determines the *share of these budgets* that an individual property is taxed, rather than a specific percentage of the assessed value itself.

Washington has two property tax relief programs for senior citizens and people with disabilities: a Property Tax Deferral program and a Property Tax Exemption program.

Common Response #12: Neighborhood Character

The City received comments with concerns about changes to neighborhood character resulting from the action alternatives.

The Final EIS considers the potential impacts of the alternatives on compatibility with existing land uses, as well as aesthetics and historic and cultural preservation, in the Land and Shoreline Use, Aesthetics, and Historic and Cultural Preservation sections in Chapter 3. These sections also outline proposed measures to help avoid, minimize, and mitigate these impacts, including existing laws related to shadows, light and glare and historic preservation, development standards in the zoning code update such as transitions between zoning districts, and Comprehensive Plan goals and policies.

The EIS recognizes the potential for greater incompatibility between land uses with the Preferred Alternative as compared to the No Action Alternative, as it would accommodate more intense building types and growth, and a greater mix of residential and commercial uses, in more areas of the city. The EIS also acknowledges potential impacts to aesthetics, including compatibility with urban form and character, resulting from allowances for taller buildings and new sources of shadows, light and glare. There would also be potential aesthetic improvements associated with the redevelopment of parking lots and vacant lots and structures and infrastructure improvements required of new development.

Refer to Common Responses #1 and #2 for more information about how the potential impacts of the alternatives will occur over time and will be driven by property owner decisions.

The proposed Comprehensive Plan Community Experience chapter includes goal CE-5 Community Pride and Identity and supporting policies to support a strong community

identity. Refer to the Comprehensive Plan page on the City's website for more details about the proposed Comprehensive Plan.

Common Response #13: Village at Fisher's Landing Neighborhood

The City received a high volume of comments from Village at Fisher's Landing Neighborhood residents with concerns about the proposed action alternatives' potential impacts related to noise and the existing sound wall, vehicle traffic, safety, plants and wildlife, quality of life, sidewalk gaps, businesses in residential areas, property values, neighborhood change, CC&Rs, and compatibility.

Since the Draft EIS, the City has developed a Preferred Alternative that combines elements of Alternatives 1 and 2 for further analysis in the Final EIS and consideration for the Comprehensive Plan Update. The Preferred Alternative would designate the Village at Fisher's Landing as a mix of Medium-Scale Neighborhood and Low-Scale Neighborhood zoning. The Preferred Alternative directs higher-density growth to corridors, such as along 164th Avenue, and in areas with good access to transit and commercial services, such as The Village at Fisher's Landing. Additionally, Manufactured Home Park zoning was applied to the existing manufactured home park development to help preserve this affordable housing type.

The Preferred Alternative emphasizes directing higher-density growth to corridors and centers, such as the Fisher's Landing Transit Center along SE 164th Avenue, where existing infrastructure and services can help support it. This approach is consistent with community input to focus density in those areas rather than established neighborhoods.

Refer to Common Response #1, Preferred Alternative, for more information about how the Preferred Alternative was created, the need to consider alternatives for the plan, map, and code, and how the potential impacts of the alternatives will occur over time.

The Noise section of Final EIS Chapter 3 provides more information about the high-level noise analysis for the alternatives. No substantial increases in noise are expected to occur under the alternatives; therefore, no additional mitigation measures are proposed. All environmental noise would continue to be regulated by WAC 173-60 and VMC 20.935. The updated Comprehensive Plan includes goals and policies to address noise pollution. Refer to the Comprehensive Plan webpage on the City's website for more details about the proposed Comprehensive Plan.

The Preferred Alternative, proposed Comprehensive Plan, and zoning code do not propose the removal of the sound wall along 164th Avenue. In areas where development is planned near existing or future sources of higher noise levels, the City may consider whether to require implementation of noise reduction methods such as locating noise-sensitive areas further from noise sources, including walls or other barriers to shield noise from noise-sensitive use locations; and designing interior spaces with noise-reducing building materials.

Refer to Common Response #2 for more information about general quality of life concerns.

Vehicle traffic concerns are addressed in the Transportation section in Chapter 3 of the Final EIS, which identifies multimodal improvements and traffic calming to reduce potential impacts. Refer to Common Responses #4 and #5 for more information about traffic impacts and traffic safety.

Refer to Common Response #11 for more information about property values and taxes. The Historic and Cultural Preservation section of Final EIS Chapter 3 acknowledges the potential for disturbance of individual sites and associated impacts to historic resources and provides mitigation measures designed to offset these impacts. The Air Quality, Greenhouse Gases, and Climate section of Final EIS Chapter 4 considers the potential impacts of the alternatives on air pollution and indicates that there would be lower modeled air pollutant emissions than existing conditions under all of the alternatives under consideration.

Regarding any Covenants, Conditions, and Restrictions (CC&Rs) in the Village at Fisher's Landing neighborhood, CC&Rs are private contractual agreements among property owners. Preexisting CC&Rs established before new state housing laws (2023 H.B. 1110) remain valid and enforceable by the private parties involved, but the City does not evaluate or enforce CC&Rs as part of land use regulation or permitting. Enforcement or modification of CC&Rs remains the responsibility of property owners and their associations.

Refer to the Plants and Animals section of Final EIS Chapter 4 for more information on the potential impacts to plants and wildlife, as well as proposed measures to address those impacts. Mitigation strategies identified in the Final EIS include landscaping requirements and tree replacement policies to reduce impacts on wildlife habitat.

Refer to Common Response #12 for more information about neighborhood character.

Refer to Common Response #7 for more information about sidewalks.

Refer to Common Response #10 for more information about businesses in residential areas.

Common Response #14: Southcliff Neighborhood

The City received a high volume of comments from Southcliff neighborhood residents with concerns about the proposed action alternatives' potential impacts related to quality of life, noise, vehicle traffic and parking, safety, tree canopy, plants and wildlife, sidewalk gaps, property values, and neighborhood change, CC&Rs, and compatibility.

Since the Draft EIS, the City has developed a Preferred Alternative, which combines elements of Alternatives 1 and 2, for further analysis in the Final EIS and consideration for the Comprehensive Plan Update. The Preferred Alternative would zone the Southcliff neighborhood as a mix of Low-Scale Neighborhood and Medium-Scale Neighborhood.

Refer to Common Response #1, Preferred Alternative, for more information about how this alternative is similar to and different from the alternatives reviewed in the Draft EIS, the need to consider alternatives for the plan, map, and code, and how the potential impacts of the alternatives will occur over time.

The Preferred Alternative emphasizes directing higher-density growth to corridors and centers, such as the Heights District, where existing infrastructure and services can help support it. This approach is consistent with suggestions to focus density in those areas rather than established neighborhoods. Even with the additional housing provided by the Heights District development, additional housing is still needed to meet the needs of current and future residents over the next 20 years. Refer to the Land and Shoreline Use section and the Housing section in Chapter 3 of the Final EIS for more information about the potential for the different alternatives to meet housing targets and needs.

Refer to Common Response #2 for more information on general quality of life concerns.

Regarding any Covenants, Conditions, and Restrictions (CC&Rs) in the Southcliff Neighborhood, CC&Rs are private contractual agreements among property owners. Preexisting CC&Rs established before new state housing laws (2023 H.B. 1110) remain valid and enforceable by the private parties involved, but the City does not evaluate or enforce CC&Rs as part of land use regulation or permitting. Enforcement or modification of CC&Rs remains the responsibility of property owners and their associations.

Neighborhood Action Plans are community-driven documents that identify local issues and improvements specific to an individual or group of neighborhoods at a point in time. They are not binding documents and do not represent official City policy, but they can and often do inform City investments in neighborhoods related to items such as traffic calming, street improvements and investments in parks and open spaces. They provide one source of input

among many into City planning and investment decisions. Like other planning documents, their goals and recommendations need to be revisited and updated from time to time to reflect changing circumstances and new regulations.

Vehicle traffic concerns are addressed in the Transportation section in Chapter 3 of the Final EIS, which notes higher projected traffic volumes along corridors such as Mill Plain Boulevard and identifies multimodal improvements, traffic calming, and parking management tools to reduce neighborhood impacts. Refer to Common Responses #4 and #5 for more information about vehicle traffic impacts and safety and to Common Response #6 about vehicle parking.

No properties in the Southcliff neighborhood were identified as listed on federal or county historic registers during the EIS development process. The Historic and Cultural Preservation section of Final EIS Chapter 3 provides a map and list of historic sites and districts, as well as an analysis of potential impacts to historic resources, and mitigation measures designed to offset these impacts. All future development projects will be required to comply with City and state requirements for identification and preservation of cultural, archaeological, and historic resources.

Refer to Common Response #12 for more information about neighborhood character.

The Noise section of Final EIS Chapter 3 provides more information about the high-level noise analysis for the alternatives. No substantial increases in noise are expected to occur under the alternatives; therefore, no additional mitigation measures are proposed. All environmental noise would continue to be regulated by WAC 173-60 and VMC 20.935. The updated Comprehensive Plan includes goals and policies to address noise pollution. Refer to the Comprehensive Plan webpage on the City's website for more details about the proposed Comprehensive Plan.

Refer to the Plants and Animals section of Final EIS Chapter 4 for more information on the potential impacts to tree canopy, plants and wildlife, as well as proposed measures to address those impacts. Mitigation strategies identified in the Final EIS include landscaping requirements and tree replacement policies to reduce impacts on wildlife habitat. Refer to the Water section of the Final EIS Chapter 4 for more information on the potential impacts to stormwater runoff and proposed mitigation measures.

Refer to Common Response #11 for more information about property value and taxes.

Common Response #15: Homelessness

The City received comments with concerns about homelessness and related issues. The Comprehensive Plan Housing chapter includes goal H-3 Reduce Homelessness, and three supporting policies that aim to provide adequate transitional, permanently supportive, and affordable housing in the community, so that all residents have access to safe and stable housing. Refer to the Comprehensive Plan page on the City's website for more details about the proposed Comprehensive Plan.

The Preferred Alternative provides for a greater range of housing opportunities than the No Action Alternative, including different types and sizes of housing that can be more affordable, lessening pressures on homelessness over time. Refer to Common Response #8, Housing Affordability/Options.

Along with housing initiatives, the City is addressing homelessness in Vancouver in several ways, including:

- Development of four Safe Stay communities and one Homeward Bound Safe Park site that are managed by the City and its contractors.
- A 120-bed Bridge Shelter that will provide people a safe place to stay while they work to find permanent housing, expected to be completed in fall 2026.
- The City's 9-person Homeless Assistance and Resource Team (HART) provides outreach and assistance to people experiencing unsheltered homelessness and addresses community impacts of unsheltered homelessness.
- Funding the Talkin' Trash program in partnership with local non-profit organization Share that picks up 20 tons of trash monthly.
- Funding an emergency rental assistance program that helps reduce evictions.
- Funding additional rent-restricted affordable housing through the use of the City's voter-approved Affordable Housing Fund and federal pass-through dollars, including permanently affordable housing with services on site and facilities specifically designed for people exiting homelessness.

Appendix A: Scoping Information

OUR VANCOUVER Comprehensive Plan Update

Washington State Environmental Policy Act Determination of Significance and Request for Comments on Scope of Environmental Impact Statement

The City of Vancouver invites you to comment on the environmental topics that will be analyzed as part of its Comprehensive Plan update.

Date of Issuance: July 12, 2024
Deadline for Comments: August 12, 2024 (no later than 11:59 p.m. Pacific time)
Lead Agency: City of Vancouver

Description of Proposal: City of Vancouver Comprehensive Plan Update

The City of Vancouver is updating its Comprehensive Plan, which will establish a vision that guides the City's growth and development for the next 20 years, from 2025 to 2045. Since the plan was last updated in 2011, Vancouver has experienced substantial growth, as well as demographic, economic and social changes.

To meet the requirements of the Washington State Growth Management Act, the City is currently conducting a full rewrite of the existing Comprehensive Plan. As part of this process, the City is developing a detailed strategy for implementing the goals, policies, and strategies outlined with the revised plan, and modifying the existing zoning code (Title 20 of the Vancouver Municipal Code [VMC]), which regulates the scale, size and location of buildings and uses, to reflect the goals and policies identified in the revised plan.

The City is engaging in extensive community outreach and engagement to help planners address key questions about housing; land use, development and infrastructure; economic development; equity and opportunity; and climate and environment. The proposed update to the City's Comprehensive Plan will plan for growth of approximately 38,000 new housing units and 43,000 new jobs by the year 2045. These growth targets are based on population projections from the Washington State Office of Financial Management, recent trends, state law, and City policy to plan for long term housing and employment needs.

The Comprehensive Plan Update must be adopted by December 31, 2025.

Proponent: City of Vancouver
Location of Proposal: Vancouver, Washington (citywide)

Environmental Impact Statement (EIS) Required:
The City of Vancouver has determined that this proposal is likely to have a significant adverse impact on the environment. This means the proposal has a reasonable likelihood of negative effects on environmental quality that could be considered more than moderate. An EIS is required under state law [Revised Code of Washington RCW 43.21C.030 (2)(c)] and will be prepared, including proposed mitigation measures. Mitigation measures are changes or conditions to a proposal that are intended to avoid, minimize, or compensate for potential adverse impacts.

OUR VANCOUVER Comprehensive Plan Update

The EIS is a document that will provide information for the public, agencies, and tribal governments to consider during the decision-making process for the Comprehensive Plan Update. The EIS will describe potential alternatives, existing environmental conditions, potential significant environmental impacts, and potential measures to mitigate impacts.

The City currently plans to review a scenario of future conditions if no changes to the current Comprehensive Plan and associated plans and regulations are made, called a No Action Alternative, and up to three Action Alternatives that outline different land use and growth scenarios in specific areas of the city.

The City has identified the following elements of the built and natural environment for discussion in the EIS in accordance with Washington Administrative Code (WAC) 197-11-444:

- Land and shoreline use
- Housing
- Aesthetics (including light and glare)
- Historic and cultural resources
- Transportation
- Noise
- Public services and utilities (including emergency services, water, sewer, schools, parks and recreation)
- Earth (geologic hazard areas, soils, topography)
- Air quality, greenhouse gases, and climate
- Water resources
- Plants and animals

Request for Comments:
Agencies, affected tribes, and members of the public are invited to comment on the scope of the EIS. You may comment on alternatives, mitigation measures, probable significant adverse impacts, and licenses or other approvals that may be required. Licenses and approvals may include potential required permits from state, local, and federal agencies.

Scoping comments may be provided via email or postal mail to the following addresses:

Email: OurVancouver2045@cityofvancouver.us
Postal Mail:

Revised Washington State Environmental Policy Act Determination of Significance and Request for Comments on Scope of Environmental Impact Statement

The City of Vancouver invites you to comment on the environmental topics that will be analyzed as part of its Comprehensive Plan update. The City is issuing this revised notice to clarify proposed future growth levels, the number of alternatives that will be analyzed in the Draft EIS, and the role of desired community outcomes and goals in the Comprehensive Plan update and SEPA process. ***All comments received during the previous scoping period (July–September 2024) remain valid and will be considered as part of the SEPA review process.***

Date of Issuance: October 22, 2024
Deadline for Comments: November 21, 2024 (no later than 11:59 p.m. Pacific time)
Lead Agency: City of Vancouver
Description of Proposal: City of Vancouver Comprehensive Plan Update

The City of Vancouver is updating its Comprehensive Plan, which will establish a vision that guides the City's growth and development for the next 20 years, from 2025 to 2045. Since the plan was last updated in 2011, Vancouver has experienced substantial growth, as well as demographic, economic and social changes.

To meet the requirements of the Washington State Growth Management Act, the City is currently conducting a full rewrite of the existing Comprehensive Plan. As part of this process, the City is developing a detailed strategy for implementing the goals, policies, and strategies outlined with the revised plan, and modifying the existing zoning code (Title 20 of the Vancouver Municipal Code [VMC]), which regulates the scale, size and location of buildings and uses, to reflect the goals and policies identified in the revised plan.

The City is engaging in extensive community outreach and engagement to help planners address key questions about housing; land use, development and infrastructure; economic development; equity and opportunity; and climate and environment. The proposed update to the City's Comprehensive Plan will plan for growth of at least 38,000 new housing units and 43,100 new jobs by the year 2045. These growth targets are the minimum necessary to plan for long-term housing and employment needs based on population projections from the Washington State Office of Financial Management, recent trends, state law, and City policy. The Comprehensive Plan Update must be adopted by December 31, 2025.

Proponent: City of Vancouver
Location of Proposal: Vancouver, Washington (citywide)

Environmental Impact Statement (EIS) Required:
The City of Vancouver has determined that this proposal is likely to have a significant adverse impact on the environment. This means the proposal has a reasonable likelihood of negative effects on environmental quality that could be considered more than moderate. An EIS is required under state law [Revised Code of Washington RCW 43.21C.030 (2)(c)] and will be prepared, including proposed mitigation measures. Mitigation measures are changes or conditions to a proposal that are intended to avoid, minimize, or compensate for potential adverse impacts.

The EIS is a document that will provide information for the public, agencies, and tribal governments to consider during the decision-making process for the Comprehensive Plan Update. The EIS will describe potential alternatives, existing environmental conditions, potential significant environmental impacts, and potential measures to mitigate impacts.

The City currently plans to review a scenario of future conditions if no changes to the current Comprehensive Plan and associated plans and regulations are made, called a No Action Alternative, and up to two Action Alternatives that outline different land use and growth scenarios in specific areas of the city. The City intends for the land use and growth scenarios analyzed in the Action Alternatives to align with the Goals Framework developed with community partners for the Comprehensive Plan Update. The Goals Framework identifies numerous desired community outcomes, including connected and accessible neighborhoods; affordable, accessible housing choices; equity and inclusion; economic opportunity; and climate adaptability, sustainability, and resiliency.

The City has identified the following elements of the built and natural environment for discussion in the EIS in accordance with Washington Administrative Code (WAC) 197-11-444:

- Land and shoreline use
- Housing
- Aesthetics (including light and glare)
- Historic and cultural resources
- Transportation
- Noise
- Public services and utilities (including emergency services, water, sewer, schools, parks and recreation)
- Earth (geologic hazard areas, soils, topography)
- Air quality, greenhouse gases, and climate
- Water resources
- Plants and animals

Request for Comments:
Agencies, affected tribes, and members of the public are invited to comment on the scope of the EIS. You may comment on alternatives, mitigation measures, probable significant adverse impacts, and licenses or other approvals that may be required. Licenses and approvals may include potential required permits from state, local, and federal agencies.

Scoping comments may be provided via email or postal mail to the following addresses:
Email: OurVancouver2045@cityofvancouver.us
Postal Mail:
Attn: Meredith Herbst
City Hall
PO Box 1995
Vancouver, WA 98668

The deadline for scoping comments is November 21, 2024, at 11:59 p.m. ***Note: If you submitted a comment during the previous scoping period (July–September 2024) your comment remains valid and will be considered as part of the SEPA review process.***

Memorandum

To: City of Vancouver

From: WSP USA

Subject: State Environmental Policy Act Environmental Impact Statement Scoping Comment Summary and Final Scoping Determination

Date: December 5, 2024

The purpose of this memorandum is to summarize comments received during the State Environmental Policy Act (SEPA) scoping period for the **OUR VANCOUVER** Comprehensive Plan Update Draft Environmental Impact Statement (EIS), and to recommend next steps for the Draft EIS analysis.

Based on the comments received, the range of environmental elements identified in the scoping notice remains appropriate, and the Draft EIS analysis should proceed without modifications to its scope.

Scoping Comment Period Overview

The City of Vancouver (City) issued a SEPA Determination of Significance and request for comments on the scope of the EIS on July 12, 2024. The City published this notice in the SEPA Register, *The Columbian*, and the Be Heard Vancouver website for the Comprehensive Plan Update. The City also provided the notice via an email distribution list consisting of federal, state, and local agencies; tribes; local business organizations; local builders and real estate development professionals; neighborhood associations; environmental organizations; media outlets; and other interested parties. The scoping notice was also distributed to the **OUR VANCOUVER** project listserv that includes more than 200 individual contacts.

The scoping notice initially requested comments during an expanded 30-day period, which is greater than the 21-day minimum required by SEPA. The comment period was originally scheduled to end on August 12, 2024. In order to provide additional opportunities for review and comment by local agencies and communities, the City extended the scoping comment period to August 23, 2024, and again to September 6, 2024. The scoping notice requested comments via postal mail or email.

The City issued a revised scoping notice on October 22, 2024, to clarify proposed future growth levels, the number of alternatives that will be analyzed in the Draft EIS, and the role of desired community outcomes and goals in the Comprehensive Plan update and SEPA process. This scoping notice, which was distributed via the same methods as the previous notices, invited additional comments via postal mail or email during a 30-day period ending November 21, 2024. The notice stated that comments submitted during the previous comment period remain valid and will be considered as part of the SEPA review process.

EIS Scope Elements

The original scoping notice identified the City's intent to evaluate a No Action Alternative, as required by SEPA, and up to three other alternatives that outline different land use and growth scenarios in specific areas of the City. The revised scoping notice reduced the number of anticipated action alternatives from three to two.

The scoping notice also identified the following elements of the built and natural environment for discussion in the EIS in accordance with Washington Administrative Code (WAC) 197-11-444:

- Land and shoreline use
- Housing
- Aesthetics (including light and glare)
- Historic and cultural resources
- Transportation
- Noise
- Public services and utilities (including emergency services, water, sewer, schools, parks and recreation)
- Earth (geologic hazard areas, soils, topography)
- Air quality, greenhouse gases, and climate
- Water resources
- Plants and animals

Summary of Comments Received

The City received eight total comment submissions via email and no comments via postal mail during the two comment periods. Seven of the comment submissions came from private individuals, and one of the comment submissions came from the Washington Department of Fish and Wildlife.

None of the comments included objections to the environmental elements identified in the scoping notice. Most of the comments provided detailed input or questions about specific

topics of interest, including EIS elements to be studied, analysis methods, and potential mitigation measures. The following list summarizes the main themes of the comments received by topic area.

EIS Methodology

- Interest in how EIS elements will be prioritized and assessed given potential for conflicts between elements.

Land and Shoreline Use

- Maintain low zoning densities around high-value habitat areas to minimize habitat fragmentation and wildlife displacement.
- Limit development within the Vancouver Lake area to preserve habitats.
- Integrate green spaces into urban areas to benefit residents and provide habitat for wildlife.
- Evaluate how expected development will affect the percentage of forest cover and the effective impervious area within Vancouver's watersheds.
- Incorporate open space into high density areas, such as exploring green roofs or shared open space opportunities, particularly for access by low-income households.
- Assess the efficacy of transit-oriented development.

Housing

- Prioritize urban density and housing affordability.
- Consider "single-room occupancy" as an affordable housing strategy.
- Include utility costs over a 15-year horizon when evaluating housing affordability.

Aesthetics, Noise

- Examine strategies to reduce light and noise pollution in developed areas, particularly at night.

Transportation

- Increase interconnectedness of walkways and trails for alternative transportation.

Public Services and Utilities

- Unbundle elements within public services and utilities to discretely discuss individual topics and emphasize their importance (e.g., emergency services, including fire and police services; utilities, including water and sewer services; schools; parks and recreation; and other public services).

- Ensure that emergency services analysis includes discussion of fire and law enforcement services.
- Amend pipeline company franchise agreements to require an end-of-life plan for the pipes, require monitoring and reporting of leaks, and increase charges for easements.
- Require gasoline fueling stations to prevent and be responsible for addressing tank leaks and to carry higher insurance policy values.
- Evaluate rapid build-out of solar energy installations as an alternative to Clark Public Utilities.

Air Quality, Greenhouse Gases, and Climate

- Investigate how Vancouver can meet its future energy needs while minimizing reliance on fossil fuels.
- Require new buildings to be constructed as solar ready and electric ready.
- Require solar and electric power in development agreements.
- Publicize emissions from Clark Public Utilities' operations and look for ways to reduce their emissions.
- Evaluate carbon offsets purchased by the City and the Port of Vancouver.
- Prioritize cooling and disaster centers.

Water

- Evaluate the impact of stormwater facilities in or near critical areas and potential risk of impact to aquatic environments.
- Implement green stormwater infrastructure to reduce runoff and filter pollutants.
- Avoid new impervious surfaces for roads and trails.
- Assess the potential effects on watershed health, including impacts on hydrology, water quality, and fish habitat conditions.

Plants and Animals

- Work toward 28% tree canopy identified in 2011 Comprehensive Plan, particularly in lower income areas of the city.
- Explore opportunities to incorporate native plants and establish pollinator habitats within urban landscaping.
- Require new developments to limit tree removal and work around existing trees.
- Consider wildlife overpasses or underpasses to enhance connectivity between habitats.
- Use Priority Habitats and Species list definitions as the basis for evaluating impacts to fish and wildlife.
- Assess the impact of new roads on habitat connectivity.

- Conserve national resource lands through a transfer of development rights (TDR) program, or other strategy that provides financial incentives for protecting land from development.
- Group relatively undeveloped parcels and farm and forestland to increase habitat value.
- Identify open space areas where large, connected patches of native vegetation can be preserved to maintain biodiversity and provide corridors for wildlife movement.
- Support educational programs and resources for landowners to implement wildlife-friendly practices.
- Prioritize the mitigation sequence of impact avoidance, minimization, and mitigation.
- Identify and prioritize degraded or fragmented critical areas for implementing restoration projects.
- Implement climate-resilient land use strategies, such as preserving wetlands and riparian zones, to help mitigate the effects of extreme weather events and support species adaptation.

Final Scoping Determination

Based on the comments received during the scoping periods, the elements identified in the scoping notice remain valid for analysis in the Draft EIS, and no modifications are needed before proceeding with the analysis.

All of the high-level themes discussed by commenters will be addressed as part of the EIS analysis, including the evaluation of impacts and benefits to housing density and affordability, light and noise pollution, emissions, climate resiliency, tree canopy coverage, green spaces, stormwater runoff, and fish and wildlife habitat areas.

Some comments requested a level of specificity that is outside the scope of the EIS analysis. The City will consider these comments as appropriate in the broader context of developing the draft Comprehensive Plan and associated code amendments.

Appendix B: Market and Land Capacity Analysis Process Memorandum (Updated for Final EIS)

Subject: Market and Land Capacity Analysis Methodology and Process for the Preferred Alternative

Date: February 9, 2026

Introduction

This memorandum (memo) outlines the methodology for modeling the estimated housing and employment capacities for the Preferred Alternative studied in the OUR VANCOUVER Comprehensive Plan Update State Environmental Policy Act Final Environmental Impact Statement (FEIS). This methodology memo serves as an addendum to the previously issued methodology memo issued for the Draft Environmental Impact Statement (DEIS), which included analysis of Alternative 1, Alternative 2, and the No Action Alternative. This Preferred Alternative represents the proposed future land use and zoning map for the Comprehensive Plan Update and informs future infrastructure and capital facilities planning required as part of the Comprehensive Plan. This memo follows the same outline as the previous methodology memo but includes additional sections where additional analysis was conducted.

This memo is divided into the following five sections that outline the process for modeling estimated housing and job capacity:

1. Prototype Development and Map Creation: details the creation of the Preferred Alternative.
2. Land Capacity Analysis Deductions (Preferred Alternative): covers the assumptions made for the initial land use capacity analysis and acreage deductions for the Preferred Alternative.
3. Housing Feasibility Analysis: describes the process for modeling the number of new housing units that the Preferred Alternative has the capacity to support.

4. Parcel-Level Modeling of Housing and Job Capacity (Action Alternatives): describes the process of modeling the number of housing units and jobs that the Preferred Alternative has the capacity to support.
5. Model Outputs for Housing and Jobs Capacity: summarizes the housing and jobs capacity numbers used in the FEIS analysis.

1. Prototype Development and Map Creation

The Comprehensive Plan Update proposes to rename and simplify the current land use designations and associated zoning codes to focus on 10 zoning districts:

- Low Scale Neighborhood (LSN)
- Medium Scale Neighborhood (MSN)
- Mixed Use Neighborhood (MU)
- Manufactured Home (MH)
- Regional Activity Center (RAC)
- Institutional/Campus (IC)
- Industrial/Employment (IE)
- Heavy Industrial (HI)
- Parks (POS)
- Natural Areas (NA)

Five of the eight zoning districts (LSN, MSN, MU, RAC, and IC) developed for the Comprehensive Plan Update would allow for a mix of employment and housing types at varying scales and densities. For example, the MSN zoning district would allow housing prototypes with a higher density than single-family housing, but a lower density than podium or tower developments allowed in MU and RAC zoning districts. The Manufactured Home zone is applied to existing mobile home parks in Vancouver and does not permit redevelopment except for in limited cases to comply with HB 1220 and requirements to allow permanent supportive housing and emergency shelters in all zones that allow housing or hotels. The HI, IE, POS, and NA zones do not allow housing development.

Analysts used the steps described below to develop the Preferred Alternative for the FEIS.

Preferred Alternative Development Steps:

1. Develop Prototypes: EcoNorthwest created eighteen housing prototypes that are likely to develop in Vancouver (see Table 1). Prototypes reflect current development trends within the city and the potential for different housing types based on recent

changes in state legislation. The prototypes cover a variety of housing types from single-family homes and four-story walk-ups to towers and podiums. Each prototype has an estimated dwelling-units-per-acre (DUA) value. Prototype allowances were updated for the Preferred Alternative to reflect updated zoning language and density allowances.

2. **Assign Prototypes to Zoning Districts:** Housing prototypes that were identified are those most likely to occur in the different zoning districts that will allow housing (LSN, MSN, MU, RAC, and IC). See Table 1**Error! Reference source not found.**.

   Note: No housing prototypes were identified in IE, HI, MH, POS, or NA because no housing will be allowed.

3. **Prepare Preferred Land Use Alternative:** Finalized Preferred Alternative Map that shows zoning districts throughout the city. This step was developed over many iterations and was prepared with multiple rounds of review with community partners, city staff, the planning commission, and city council.

   Refinement of the alternatives was informed by comments on the DEIS, extensive public input, best planning practices, existing city council policy guidance, existing and planned enhanced transit corridors, locations of parks/open space and schools, and locations of growth nodes/corridors/centers.

Table 1. Housing Prototypes by Zone

Housing Prototypes	Dwelling Units Per Acre	Manufactured Home Park*	Low-Scale Neighborhood	Medium-Scale Neighborhood	Mixed-Use Neighborhood	Regional Activity Center	Institutional/ Campus	Industrial/ Employment*	Heavy Industrial*	Parks/Open Space/ Natural Areas*
Single Family	7.3									
Duplex (side by side)	14.5									
Duplex (stacked)	14.5									
3 Townhouses	21.8									
Quadplex	28.5									
4 Townhouses	29.0									
Sixplex	43.0									
6 Townhouses	43.6									
Cottage Cluster	29.0									
Courtyard (attached)	28.5									
Small Single Stair	58.1									
Small Multiunit	43.6									
Small Multiunit (taller)	58.1									
Medium Multiunit	34.8									
Medium Multiunit (taller)	52.3									
3-story wood frame	65.3									
4-story wood frame	84.4									
Podium	152.5									
Tower	217.8									
Microunits 1	273.8									
Microunits 2	342.3									

*No housing prototypes are allowed

2. Land Capacity Analysis Deductions (Preferred Alternative)

Table 2 identifies the deductions used in the land capacity analysis model for the Preferred Alternative. As noted in the table, some deductions are different in the housing capacity analysis, which estimates the capacity for new housing units, compared to the employment capacity analysis, which estimates the capacity for new jobs. Table 2 also identifies different deductions for the land categories (Vacant, Underutilized, and Built) included in the Clark County Vacant Buildable Lands Model (VBLM).[1]

[1] The parcel dataset used in the model is the 2022 Clark County Vacant Buildable Lands Model (VBLM) data output.

Table 2. Deductions

Deduction	Zoning District						
	LSN	MSN	MU	RAC	IC	IE	HI
Land Use Split per Zoning Districts[a]							
Residential	95%	90%	65%	60%	25 %	0%	0%
Employment[b]	5%	10%	35%	40%	75 %	100%	100 %
Critical Areas/Constrained Land Deductions							
Residential Capacity Analysis	50% of constrained lands are assumed to not develop.					N/A	
Employment Capacity Analysis	20% of Vacant and Underutilized constrained lands will not develop. 50% of Built constrained lands will not redevelop.						
Infrastructure Deduction							
Residential Capacity Analysis	31.5%					N/A	
Employment Capacity Analysis	31.5%					12.5%[d]	25%
Market Factor and Redevelopment Rate							
Residential Capacity Analysis	N/A (embedded in market feasibility analysis, see Section 3).						
Employment Capacity Analysis Market Factor	10% of Vacant and Underutilized lands will not develop given market conditions.						
Employment Capacity Analysis Redevelopment Rate (only applies to Build land)[e]	0%		12.8%	27.4%	0%		
Job loss deduction[f]			13 jobs/net acre				
Small Parcels, Easements, and Tax Value							
Exclude small parcels less than 1,000 SF	Applies to all zoning districts.						
Exclude roads and easements	Applies to all zoning districts.						
Exclude parcels given a zero value in Clark County's VBLM output[g]	Applies to all zoning districts.						

Notes:

(a) The residential/non-residential splits are model assumptions based on likely development trends for new zoning districts. These are not intended to reflect future codified requirements.

(b) Employment represents any non-residential use that is assumed to produce jobs instead of housing units.

(c) Critical areas/constrained lands were identified per the 2022 Clark County VBLM dataset

(d) Infrastructure deductions for IE are lower than the 25% used in the 2022 Clark County VBLM for Industrial to account for the more urban context in Vancouver.

(e) Redevelopment from employment uses to different employment uses in Low Scale Neighborhood (LSN), Medium Scale Neighborhood (MSN), Institutional/Campus (IC), and Industrial/Employment (IE) zones is unlikely and, therefore, no redevelopment rate is assumed for these zoning districts. However, an "intensification or refill" factor is applied to IE and Heavy Industrial (HI) zoning districts to establish the employment need (see Section 4 for details on the intensification factor). Redevelopment rates for Mixed Use Neighborhood (MU) and Regional Activity Center (RAC) were calculated by determining the feasibility of the four-story mixed-use prototype across all MU/RAC zones and its rate of feasibility.

(f) The job loss deduction applies to Built land in the MU and RAC zoning districts that is assumed to be redeveloped. This assumption accounts for a loss of existing jobs on the redeveloped parcels.

(g) The county assessor will flag a property as zero-value if appraisers determine the legally created tax lot does not have market value or is deemed exempt from taxes.

Key: HI = Heavy Industrial; IC = Institutional/Campus; IE = Industrial/Employment; LSN = Low Scale Neighborhood; MSN = Medium Scale Neighborhood; MU = Mixed Use Neighborhood; N/A = not applicable; RAC = Regional Activity Center; SF = square feet; VBLM = Vacant Buildable Lands Model

3. Housing Feasibility Analysis

The housing capacity analysis for the preferred alternative relies on a parcel-level feasibility analysis. The feasibility analysis examined the zoning district for each parcel, which prototypes are assumed to be allowed by future zoning, and which prototype is the most feasible option based on market conditions and available assessors' data.

Generally, the feasibility analysis examined the following factors:

- Total value per square foot of each parcel, which is equal to the total market value (land and buildings) divided by assessed acres.
- Price per square foot required to develop each building prototype.

If the total value per square foot is less than the prototype price to develop, then the prototype is considered feasible.

The feasibility analysis identified which prototypes would be considered feasible from a market perspective, which can result in multiple prototypes being viable. The model for the Preferred Alternative assigns the prototype that is considered the most feasible, or the prototype that is the most likely to develop because it is the most affordable to develop. Ultimately, this process looks at every parcel across the city and models the potential for a property to develop/redevelop. Only parcels identified as feasible with a corresponding prototype are included in the capacity analysis in Step 4 below. An overview of the feasibility analysis is included as Attachment .

4. Parcel-Level Modeling of Housing and Job Capacity (Action Alternatives)

Once the feasibility analysis (Section 3) was complete, analysts modeled housing and job capacity for the preferred alternative, applying the assumptions identified in Table 1. The following subsections identify the modeling process for the housing capacity analysis and job capacity analysis. A detailed process of this section is included as Attachment .

Housing Capacity Analysis

The first step in the housing capacity analysis model applied the deductions for critical areas, infrastructure, and residential versus employment allocation at the parcel level (see Table 2). The model then removed parcel fragments (1,000 square feet or smaller), roads/easements, and zero-value parcels.

Once all land reductions were applied, the model used the remaining net acreage to apply housing densities based on the most feasible prototype per the feasibility analysis (see Section 3). If a parcel was not determined to have a feasible prototype, then housing density was not applied to the parcel.

Housing Unit Yield Equation

Gross Acreage of a parcel – land reductions = net acreage

Net acreage X DUA (prototype DUA) = housing unit output per parcel

Post-Processing Deductions

Homeowner Association Deduction

The City sampled properties in different subdivisions across Vancouver to determine the possible existence of a homeowner association (HOA) that might limit densification or redevelopment potential. Then, using property titles obtained through a title company, analysts reviewed language in homeowner association bylaws to identify which areas may have language that could restrict the implementation of Washington State House Bill (HB) 1110. HOAs that had some degree of restrictive language were identified and the redevelopment capacity that was modeled in those areas was reduced by 70%. The 70% housing capacity reduction assumes that some of the redevelopment potential of parcels within HOAs with restrictive language would not occur because of a lack of enforcement of HOA policies. At the time of this analysis in early 2026, HB 1110 does not include retroactive application to pre-existing governing documents adopted by HOAs.

Master Plan Deduction

In areas where the city has adopted Master Plans or approved Development Agreements (DAs), the housing units and jobs projected in those documents was used instead of the model output. This requires an override where the existing master plan geography is allocated the projected number of housing units and/or jobs identified in the adopted plan or DA. At the time of this analysis in early 2026, the following master plan or DAs were identified:

- Vancouver Heights
- Vancouver Innovation Center
- Columbia Palisades
- Section 30
- Waterfront
- HQ Vancouver

Existing Unit Deduction

Clark County assessor data was used to identify the number of existing units on lots that include feasible housing development per the feasibility analysis. Existing units were then deducted to avoid double counting the total number of units per lot.

Model Output

Total number of housing units assumed in the preferred alternative based on market feasibility, land capacity, and HOA, Master Plan or DA, and existing unit adjustments. These housing unit numbers are used for the Preferred Alternative in the FEIS analysis.

Employment Capacity Analysis

The employment capacity analysis was similar to the housing analysis, but as identified in Table 2, some of the model assumptions were different. Additionally, the employment capacity analysis did not use the feasibility analysis to determine redevelopment potential, but instead applied a redevelopment rate, as noted in Table 2.

Employment Target

An additional step in the employment capacity analysis was the establishment of an employment target that accounts for "work-from-home" jobs and "intensification" or "refill," which relates to a percentage of new jobs occurring within existing employment space through an intensification of the number of jobs per square foot. These two factors reduce the amount of land needed to support anticipated job growth and are an important consideration when determining whether the employment capacity of an alternative will meet the anticipated employment growth. At a summary level, the process for determining the employment target was as follows:

- Start with the anticipated employment growth of 43,198 jobs, as detailed in the Economic Opportunity Analysis.
- Separate potential job growth by industry sector based on two-digit North American Industry Classification System (NAICS) codes and assign jobs/NAICS codes to zoning districts.
- Apply a 13% deduction for "work from home" to all job sectors except transportation, food/services, manufacturing, and construction.[2]
- Apply a 23% deduction for jobs in HI and IE zoning districts because these districts may see an intensification of jobs within existing heavy industrial or employment developments. This means more jobs per acre may be produced in the future on heavy industrial or employment lands than currently exists, and a reduction is applied to the employment target because additional land would not be needed to support these jobs.[3]

This process resulted in a net employment need of 38,792, which reflects the number of new jobs that will need to be supported within the land capacity of the Preferred Alternative. The deductions above account for new jobs that could be accommodated within existing developments or from work from home and therefore, additional land capacity is not needed for those jobs.

Employment Land Capacity Analysis

Similar to the housing capacity analysis, the employment capacity analysis was conducted at the parcel level. The first step in the employment capacity analysis model applied the deductions for critical areas, infrastructure, and residential versus employment allocation, as identified in Table 2. The model then applied the market factor for Vacant and Underutilized land and redevelopment rate for Built land, as detailed in Table 2. *Note: the redevelopment rate does not apply consistently across the zoning districts.*

Once all the land reductions were applied, the model applied the employment densities (jobs per acre) listed below for each zoning district.[4]

---

[2] Work-from-home deduction is based on 2023 American Community Survey estimates, table B038601, work from home percentage for Vancouver. Clark County is at 21.8% per the same data.

[3] The intensification factor is based on data from Portland vetted with industrial stakeholders as part of Portland's EOA (Economic Opportunity Analysis)Industrial Land Committee process. Longitudinal point-level Quarterly Census of Employment Wage data for Vancouver are not available. Intensification is essentially "refill," indicating an amount of land that will intensify in job density.

[4] The employment densities are based on recent development trends in similar contexts and professional judgment.

- LSN: 6
- MSN: 6
- MU: 48
- IC: 46
- RAC: 54
- IE: 30
- HI: 9

The final step in the employment capacity analysis is intended to avoid double counting existing jobs when a property is assumed to redevelop. Washington Employment Security Department Quarterly Census of Employment Wage data was used to determine the average jobs per acre within future MU and RAC zoning districts. Only the MU and RAC zoning districts were used because those are the only zones where a redevelopment rate is applied (see Table 3 footnotes for additional details). The average number of jobs per acre was estimated at 13, which was applied as a deduction to the output of jobs on built parcels in MU and RAC zoning districts.

Employment Yield Equation:

Gross Acreage of a parcel – land reductions X market factor/redevelopment rates = net acreage

Net acreage X jobs/acre – 13 jobs/acre on Built Mixed Use Neighborhood and RAC parcels = jobs output per parcel

Model Output: Total number of jobs assumed in the preferred alternative based on vacancy status and redevelopment potential.

5. Model Outputs for Housing and Jobs Capacity

Table 3 below shows the model output for the DEIS action alternatives, the No Action Alternative, and the Preferred Alternative.

Table 3. Model Outputs for Housing Yields and Employment Yields

Alternative (City Only)	Methodology	Housing Yields	Employment Yields
No Action	Clark County VBLM (refer to DEIS methodology memo)	29,600 units	16,600 jobs
Alternative 1	Feasibility/Redevelopment potential (refer to DEIS methodology memo)	45,100 units	46,000 jobs
Alternative 2	Feasibility/ Redevelopment potential (refer to DEIS methodology memo)	50,696 units	49,300 jobs
Preferred Alternative	Feasibility/Redevelopment Potential (Refer to Section 4)	44,111 units	45,145 jobs

Key: VBLM = Vacant Buildable Lands Model

Attachment 1

Feasibility Analysis Overview

DATE:	May 27th, 2025
TO:	Nicole McDermott and Sam Rubin, WSP
FROM:	Tyler Bump and Michelle Anderson, ECOnorthwest
SUBJECT:	Vancouver Comp Plan Update – Market Feasible Capacity Analysis

Overview

WSP partnered with ECOnorthwest to assess the potential housing capacity for two different EIS alternatives for the comprehensive plan update for the City of Vancouver. ECOnorthwest worked with WSP to complete this analysis, referred to as the *market-feasible housing capacity,* given the potential land use intensities of the different place types of the alternatives. The difference between the alternatives was the place type designated to each parcel, which could result in different citywide totals for market-feasible housing capacity.

For the capacity analysis, ECOnorthwest completed a financial analysis that models a developer's decision-making process and cash flow equation. We created pro forma models to test the financial feasibility of various housing densities that might be allowed in different place types. We estimated the market feasible capacity of multiple prototypical developments, or *housing prototypes*. These prototypes reflect theoretical development profiles that could potentially comply with proposed zoning standards to understand what the market was most likely to deliver if zoning was a constraint.

Why is development feasibility and pro forma analysis important?

Development can be costly and risky. Getting funding to construct new development requires lenders and investors to be reasonably confident they will earn enough financial return to justify the risks and attract equity to a project.

Economic or market feasibility is generally assessed by comparing the expected revenues (home sales, net income from rents, room rates) against the costs of development. If a development is not feasible, it will not be built, contrary to a city's housing goals.

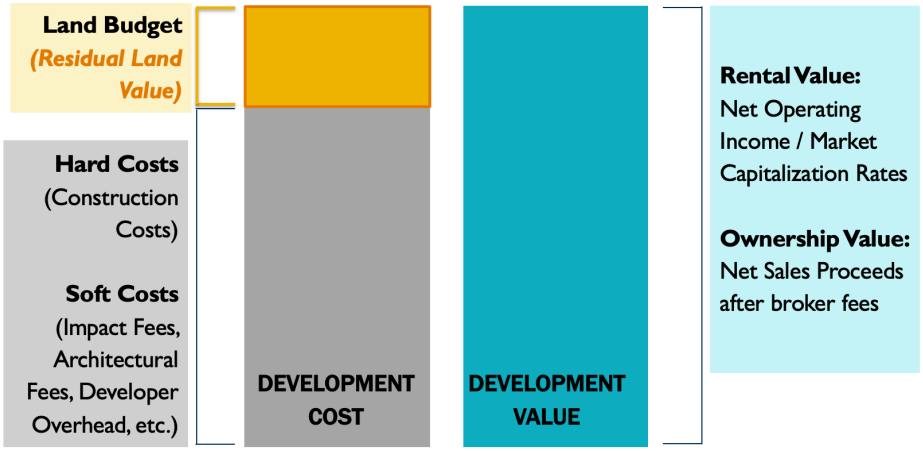
Approach

Prototypes and Assumptions

ECOnorthwest analyzed nearly 20 housing prototypes that were of various configurations and resulting densities, including general forms such as single-family, townhome, lowrise, garden-style, and midrise apartment developments. We based the prototypes on recent existing developments throughout the City of Vancouver as well as potential scales of housing that might be allowed in the future given legislative changes at the state level. Though the scale of development ranges substantially throughout the city, we developed approximate prototypes that could be possible in Vancouver.

We drew our initial market and construction cost insights from third-party sources such as the American Community Survey (ACS), Costar, Redfin, and Craftsman, and then vetted

those assumptions with local developers and brokers through various interviews. Though cost assumptions typically stay consistent throughout a city, we created a model to help differentiate the revenue assumptions (i.e., rent and sales prices) by census tract This model used rent and sales data from ACS, to interpolate what revenue assumptions might be for each census tract in the city.[1]



We then aligned similar block groups, based on rent and sales prices, into newly-defined market areas. We took those results and compared them to the city-wide average to understand how each market area related to the city-wide average (expressed as a ratio). We then applied that ratio as an input to each rent or sales price on a prototype level with the most up-to-date market data from CoStar and Redfin. This revenue model allowed us to refine our pro forma results spatially. The model therefore considered that different areas across Vancouver would have varying demand for different types of housing, which impacts the resulting feasibility of housing development.

Pro Forma Financial Analysis Methods

The pro forma model used a residual land value (RLV) metric to evaluate feasibility. RLV measures the land budget a developer would have to purchase land after accounting for potential development costs and revenues.

Exhibit 1: Example of Feasible Development using Residual Land Value (RLV) Model

Source: ECONorthwest

[1] ACS has two notable limitations we try and correct for: 1) there are many instances of tracts with missing (or "NA") estimates for rents, due to low rates of survey response or simply because there are no observations of a given type of apartment in that tract and 2) we often see unusually low rents because the ACS conflates market rate apartments with other structures like informal rental arrangements. We interpolated missing rent values by using an inverse-distance weighted average smoothing function, so that tracts with missing values take the average of their neighbors, ordered by proximity. We then cluster census tracts together into market areas (approximately 10 total areas) based on adjacency and similarity of rents and tenure splits.

Generally, if the RLV is equal to or above land prices in the potential development area, the development is considered feasible at market rate. If the RLV is zero dollars, the development could be feasible if land were donated for free. However, if the RLV is less than zero, the development is likely infeasible unless a developer receives additional subsidies or incentives, including free land. Results from this method describe a general analysis of prototypes and does not consider the many potential unique conditions that could be factors in development feasibility (e.g., increased predevelopment costs, low land basis from longtime land ownership). For these reasons, residual land value analyses should be thought of as a strong indicator of the relative likelihood of development, rather than an absolute measure of return to the investor or developer for any specific site.

In our feasibility analysis, we used key financial data like rent, operating costs, and development expenses for each prototype. To evaluate rental prototypes, we determined the leasable square footage, calculated revenue, deducted vacancy and operating costs (such as taxes, insurance, maintenance, management, select utilities) and arrived at the annual net operating income (NOI). For the ownership prototypes, we calculated gross sales price and subtracted commissions.

We calculated development costs by applying the cost per square foot values to different product types (e.g., residential, retail) and adding parking costs. We then summed those values to a total hard cost and calculated the soft cost, contingency, and developer fees to arrive at the total development cost.

To evaluate rental prototypes, we derived the value for each prototype by either dividing the NOI by a market-driven return on cost threshold (for higher-density prototypes) or by determining the loan capacity given debt service assumptions and NOI (for lower density prototypes). Return on cost is an important metric because it establishes the threshold where the potential returns offset project risks. Developers compete for capital in a market against other real estate and non-real estate investments. If return on cost is too low, a developer will not be about to attract capital, and the project will not move forward – this is most relevant for higher density prototypes that tend to attract institutional capital that is mobile across markets and investment products. We then summed those values to arrive at a total value for each prototype. We then calculated the land budget (the RLV) by subtracting the total development cost from the total value.

For lower-density rental prototypes, relating NOI to debt service requirements is more appropriate given that these projects are smaller and therefore tend not to attract institutional capital, but they are similar to larger projects in that debt is typically the largest source of funding for a project and if return requirements for debt can't be met, the development will not be able to attract the capital and the project won't move forward. For these prototypes, we solved for the land budget (the RLV) that was possible given the NOI on the project and potential terms, interest rates, and debt service coverage ratio

requirements. For the ownership prototype, we determined the land budget by subtracting total development costs from gross sales less commission and a spread on cost to account for profit.

For both rental and ownership prototypes we divided the total land budget by site square footage, arriving at a residual land value per square foot of land for each market area – this was the key variable for inclusion in the site specific analysis we conducted with the help of WSP.

Site-Specific Capacity Analysis

We delivered two key outputs for comparison to site-specific data and to finalize the market-feasible capacity analysis. For each prototype, we delivered both the calculated dwelling units per acre as well as the residual land value (RLV) per square foot of land for each market area. The units of these outputs (normalized by land area) allowed us to take the data and apply it to each site.

For each parcel, WSP and ECOnorthwest:

1. Exported a GIS csv with each parcel's market area, placetype, and key assessor data such as parcel area and total value (based on land and improvement value).
2. Calculated the total value per square foot of land (land + improvement value, divided by site area). This approach does not attempt to make adjustments to assessor's land value to values that are more reflective of real market value. We typically find that assessor data can lag behind market value. Therefore, this approach will result in an optimistic estimate of capacity
3. Subtracted total value per square foot of land from the RLV per square foot of each prototype for the corresponding market area to arrive at the remaining value.
4. Identified the feasible prototypes that were allowed by the placetype applied to the parcel – the prototype with remaining value greater than $0.
5. For parcels where the RLV was zero or negative (where the total value based on assessor data exceeded the RLVs of the allowed prototypes), the market-feasible capacity analysis resulted in no feasible housing prototype.

Attachment 2

Land Capacity Analysis Process

Land Use Model – Step-by-Step Process

The land use model for the Our Vancouver Comprehensive Plan was developed using Python in ArcGIS Pro. Instead of estimating land capacity based on broad citywide acreage, the analysis is conducted at the parcel level scenario, making it easier to show where housing and jobs are likely to be located across Vancouver. Housing and employment analyses are done separately, relying on the same data but with different assumptions about redevelopment, infrastructure, and critical areas.

1. Starting Datasets

- 2022 Vacant Buildable Lands Model (VBLM) dataset. Only parcels within the City of Vancouver are used in the land capacity analysis.
- Parcel-level feasibility analysis based on zoning. This analysis determines if a parcel is considered feasible for development and what prototype is most feasible by parcel.

2. Land Capacity Analysis

- Start with the 2022 VBLM dataset that has been updated to reflect the zoning or comprehensive plan designation assigned to the various alternatives.
- Apply filters to exclude land types **not eligible for development**:
    - **Infrastructure rights-of-way and easements**: roads, rail, utility corridors, etc.
    - **Public ownership exclusions**: parks and other tax-exempt lands unless redevelopment is anticipated. Coordination with the parks department is needed to update the inventory.
    - **Parcels below minimum size thresholds** or lacking infrastructure access may be excluded.
        - Parcels less than 1,000 square feet are excluded.
- **Split the remaining land by intended use**:
    - Allocate percentage of parcel acreage to either **residential or employment uses** (jobs/housing split) based on zoning.

        - From this point in the analysis, only the assigned acreage is used for either residential or employment analysis.

- Apply further deductions:
    - **Critical areas**: Critical areas identified by the County's VBLM process and are considered 'constrained' in the dataset.
        - Development in critical or constrained areas is limited. For housing analysis, lands in critical areas are counted at half their total area. For employment analysis, vacant or underutilized constrained lands are reduced by 20%, while built constrained lands are reduced by 50% in the calculation.
    - **Market factor for Employment**: proportion of land that will realistically be developed within the planning timeframe.
        - 10% of Vacant or Underutilized lands will not develop given market conditions. 10% reduction in total acreage by parcel is deducted.
    - **Redevelopment Rate for Employment:** 12.8% of lands zoned Mixed Use are anticipated to be redeveloped. 27.4% of lands zoned Regional Activity Center are anticipated to be redeveloped.
    - **Infrastructure:** proportion of land within a parcel that would be allocated for infrastructure placement.
        - 31.5% deduction in total acreage of a parcel for residential analysis
        - 31.5% deduction in total acreage of a parcel for employment analysis for all zones except Industrial/Employment (IE) and Heavy Industrial (HI). IE has a reduction of 12.5% and HI has a reduction of 25%.

3. Apply Density/Intensity Ratios

- Assign densities to each parcel based on their zoning. Density ratios are applied to the acreage remaining after deductions.
    - Residential: units per acre based on typology identified during feasibility analysis.
    - Employment: jobs per acre based on zoning.

4. Apply loss of existing jobs on redeveloped parcels

- The job loss deduction applies to Built (as determined by the Vacant Buildable Lands Model) land in the MU and RAC place types that are assumed to be redeveloped. This assumption accounts for a loss of existing jobs on the redeveloped parcels.
    - Reduce the number of jobs by parcel by 13 jobs/net acre.
- This analysis was done post-processing and is not included in the python notebook.

Appendix D: Draft EIS Comment Period Outreach Summary

DRAFT EIS COMMENT PERIOD OUTREACH SUMMARY

Summary

Outreach directed people to learn about the findings in the Draft EIS, including the alternatives and potential impacts, and to provide comments.

- ~2,400 Be Heard visitors
- ~3,500 StoryMap views
- 22 total e-newsletter emails sent through three City email lists.
- 27 social media posts garnered 69,454 unique views.
- 100+ community groups, neighborhood associations, and boards/commissions directly emailed.
- 20 events:
  - Two interactive public meetings
  - Two virtual sessions
  - 11 presentations
  - One self-guided exhibit
  - Four tabling events
- Seven locations with outreach materials
- Nearly 600 promotional video views, also shown at three Movie in the Park events
- Two newspaper articles – The Columbian and the City's quarterly newsletter

Be Heard

The Be Heard page shared information about the Draft EIS, comment period, and how to comment and directed people to the StoryMap. Additional project information, such as upcoming events, project documents, and FAQs, was also available on Be Heard.

Community Working Groups (CWGs) (7)

- Affordable housing developers
- Building Industry Association
- Business Leaders
- Climate
- Community-based organizations
- Market-rate housing developers
- Transportation

Boards and Commissions (6)

- City Council
- Planning Commission
- Transportation and Mobility Commission
- Urban Forestry Commission

- Parks and Recreation Advisory Commission
- City Center Redevelopment Authority

Presentations & Events

Staff presented – in-person and virtually – the findings of the Draft EIS and shared information about how to comment at the following events/groups. The interactive public meetings and virtual sessions were advertised on Be Heard and the City's website, through e-newsletters and direct emails, in canvassing and tabling materials, and during presentations.

Interactive Public Meetings

Posterboards, maps, and other materials in both English and Spanish were displayed in a room where people could drop by to learn about Our Vancouver and the Draft EIS, provide written comments (none received at either), and speak with project staff.

- 7/30/2025 - Experience Our Vancouver 2045 at Firstenburg
  - ➡ Appx. 40 attendees
- 8/9/2025 - Experience Our Vancouver 2045 at City Hall
  - ➡ Appx. 50 attendees

Virtual Sessions

- 7/22/2025 - Our Vancouver Virtual Session 1
  - ➡ Appx. 30 attendees
  - ➡ Presentation
  - ➡ Recording
- 8/4/2025 - Our Vancouver Virtual Session 2
  - ➡ Appx. 16 attendees
  - ➡ Presentation
  - ➡ Recording

Group-specific Presentations

- 7/8/2025 - Planning Commission Workshop
- 7/14/2025 - City Council Workshop
- 7/17/2025 - City Center Redevelopment Authority (CCRA)
- 7/26/2025 - National Association for the Advancement of Colored People (NAACP)
- 8/4/2025 - Building Industry Association (BIA) Community Working Group
- 8/4/2025 - City Council Workshop
- 8/7/2025 - Advancing Racial Equity, Diversity & Inclusion (AREDI) Summit
- 8/13/2025 - Transportation Community Working Group
- 8/26/2025 - Business Leaders Community Working Group

- 8/30/2025 - Cycle Vancouver
- 9/2/2025 - Transportation and Mobility Commission (TMC)

To raise awareness about the Draft EIS and comment period in the months leading up to the comment period, we also presented to several groups, including:

- Urban Forestry Commission (UFC)
- Parks and Recreation Advisory Commission (PRAC)
- Downtown Stakeholders meeting
- Other project working groups
- Groups convened by Native American Youth and Family Center (NAYA), Odyssey World International Education Services (OWIES), and Southwest Washington Equity Coalition (SWEC)
- Vancouver Neighborhood Alliance and at neighborhood association meetings

Self-guided Exhibit

Posterboards and maps from the interactive public meetings were displayed in the City Hall lobby for 12 business days, from 8/19/2025 to 9/4/2025.

Tabling

Posterboards were displayed and handouts and postcards were distributed at the following events. Staff spoke with attendees about Our Vancouver, the Draft EIS comment period, and upcoming events.

- 6/14/2025 - Juneteenth Freedom Celebration
- 6/21/2025 - Pollinator Festival
- 7/13/2025 - Sunday Sounds Concert Series
- 7/24/2025 - Waterfront Concert Series
